The 700,000 shares of common stock were issued to the members of ICR, pro rata, who were Kevin Gorman, Jon Fatula and Fred Anderson. Messrs. Gorman, Fatula and Anderson are executive officers of the Company. The stock issuances were recorded at the market value of the Company's common stock on the transaction date totaling \$252,000 which was recorded as goodwill as ICR had no tangible assets and no liabilities.

Kevin Gorman currently serves as Chief Operating Officer of the Company; Mr. Fatula serves as Vice President - Information Technology, and Mr. Anderson serves as Vice President - Engineering. Messrs. Gorman, Fatula and Anderson have been employed by the Company since August 2003.

ICR is a consulting company with established clients in the automatic vehicle location ("AVL") industry. ICR's assets consist principally of customer and client relationships which the Company plans to use in deploying and developing its wireless networks.

The Company has determined that audited financial statements for ICR and pro forma information reflecting the acquisition are not required under the provisions of Item 310(c)(2) of Regulation SB.

On November 28, 2003 the Company entered into a definitive agreement to acquire a 75% interest in a closely held Costa Rican company named DirectCom S.A. DirectCom is a development stage enterprise deploying a wireless network in Costa Rica. At March 31, 2004, the Company was in the process of satisfying the conditions required for completing the acquisition per the terms of the definitive agreement.

Note 6: Research & Development Costs

The Company is also in the process of identifying additional applications for the radio and network being developed.

For the nine months ended March 31, 2004, the Company incurred total research and development costs of \$566,326 consisting of engineering and project management salaries of \$405,792; consulting expenses of \$74,289; prototype equipment costs of \$44,587; and travel related expenses of \$41,658. The transaction was terminated during the three months ended September 30, 2003.

**ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis covers material changes in the financial condition of SkyLynx Communications, Inc., (the "Company") since June 30, 2003 and material changes in our results of operations for the three and nine months ended March 31, 2004, as compared to the same periods in 2003. This discussion and analysis should be read in conjunction with "Management's Discussion and Analysis" included in the Company's Annual Report on Form 10-KSB for the year ended June 30, 2003, including audited financial statements contained therein, as filed with the Securities and Exchange Commission.

Special note regarding forward-looking statements

This report contains forward-looking statements within the meaning of federal securities laws. These statements plan for or anticipate the future. Forward-looking statements include statements about our future business plans and strategies, statements about our need for working capital, future revenues, results of operations and most other statements that are not historical in nature. In this Report, forward-looking statements are generally identified by the words "intend", "plan", "believe", "expect", "estimate", and the like. Investors are cautioned not to put undue reliance on forward-looking statements. Except as otherwise required by applicable securities statutes or regulations, the Company disclaims any intent or obligation to update publicly these forward-looking statements, whether as a result of new information, future events or otherwise. Because forward-looking statements involve future risks and uncertainties, these are factors that could cause actual results to differ materially from those expressed or implied.

Results of Operations

Three and Nine Months Ended March 31, 2004 versus Three and Nine Months Ended March 31, 2003

We incurred a net loss of \$1,508,212 for the three months ended March 31, 2004, as compared to a net loss of \$76,660 for the three months ended March 31, 2003 due to the following:

In connection with the ICR acquisition, the Company is in the process of developing a wireless radio and network system for the intended implementation into the automatic vehicle location ("AVL") industry. The Company is also in the process of identifying additional applications for the radio and network being developed.

For the nine months ended March 31, 2004, the Company incurred total research and development costs of \$566,326 consisting of engineering and project management salaries of \$405,792; consulting expenses of \$74,289; prototype equipment costs of \$44,587; and travel related expenses of \$41,658. All expenses incurred during the research and development stage are expensed as incurred.

Sales revenue decreased approximately 0.6 percent, from \$105,983 for the three months ended March 31, 2003, to \$105,340 for the comparative period in the current year.

Costs of revenue decreased approximately 11.4 percent, from \$56,989 for the three months ended March 31, 2003, to \$50,489 for the three months ended March 31, 2004 primarily due to a decrease in our Internet backhaul charges.

General and administrative and research and development expenses increased approximately 215 percent, from \$128,231 for the three months ended March 31, 2003, to \$403,983 for the three months ended March 31, 2004. The increase is related to increased general and administrative and research and development costs in our Sarasota, Florida and Seattle, Washington operations and decreased general and administrative costs in our Fresno, California Internet Service Provider operations.

General and administrative costs incurred in the Sarasota, Florida and Seattle, Washington operations consist mainly of salaries, travel and professional fees related to our search for new business opportunities. General and administrative costs incurred in the Fresno, California decreased due to a decrease in salaries and benefits.

We incurred merger costs of \$49,077 for the nine months ended March 31, 2004, as compared to \$-0- for the nine months ended March 31, 2003. The merger costs were written off against operations during the three months ended September 30, 2003 following the termination of our letter of intent with StarCom Wireless, Inc.

Stock-based compensation increased from \$-0- for the nine months ended March 31, 2003 to \$408,750 for the nine months ended March 31, 2004. We used 1,530,000 shares of common stock (instead of cash) as payment for legal, consulting services and employee salaries in an attempt to conserve our working capital.

## Liquidity and Capital Resources

We have current assets of \$60,728 (including \$26,503 in cash) compared with current liabilities of \$857,327, resulting in a working capital deficit of \$796,600 as of March 31, 2004. Our auditors have questioned our ability to continue as a going concern in our June 30, 2003 annual audited financial statements due to our significant operating losses incurred since inception and our working capital deficit. We rely on our capital resources to maintain liquidity. In the past, we have derived our working capital from private stock sales and cash advances from principal shareholders.

Our cash balance at March 31, 2004 increased \$5,381, from \$21,122 at June 30, 2003 to \$26,503 as of March 31, 2004. The increase was the result of a combination of cash proceeds from shareholder loans and common stock sales totaling \$861,324 offset by cash used for the purchase of equipment of \$111,107 and negative cash flows from operations of \$750,256. Negative cash flows from operations consisted primarily of our \$2,660,657 net loss, offset by stock-based compensation of \$1,421,213, terminated merger costs of \$49,077, and an increase in accounts payable and accruals of \$404,598.

Until we establish profitable operations, our intended sources of liquidity will continue to be common stock sales and shareholder loans, if available. Our internet service provider operations incurred broke even during the three months ended March 31, 2004 and are not expected to provide operating cash in the foreseeable future.

The Company's future success will be dependent upon its ability to create and provide effective and competitive automatic vehicle location services and the Company's ability to develop and provide new services that meet customers changing requirements; including the effective use of leading technologies to continue to enhance its current services and to influence and respond to emerging industry standards and other technological changes on a timely and cost-effective basis.
