RETAIL TECHNOLOGIES INTERNATIONAL, INC.
Notes to Financial Statements

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business - Retail Technologies International, Inc. (the "Company") develops, markets and distributes point of sale and inventory management software. The Company began operations in 1986 and was incorporated in California on January 27, 1987. The Company sells its software solutions primarily by partnering with and distributing its products through a network of domestic and international value added resellers and distributors.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Accounts receivable -- The majority of the Company's accounts receivable is due from companies in the direct commerce sales industry. Credit is extended based on evaluation of a customers' financial condition and, generally, collateral is not required. Accounts receivable are due according to contractual terms and are stated at amounts due from customers net of an allowance for doubtful accounts. Accounts that are outstanding longer than the contractual payment terms are considered past due. The Company determines its allowance by considering a number of factors, including the length of time trade accounts receivable are past due, the Company's previous loss history, the customer's ability to pay its obligation to the Company, and the condition of the general economy and industry as a whole. The Company writes-off accounts receivable when they become uncollectible, and payments subsequently received on such receivables are credited to the allowance for doubtful accounts.

Inventory -- Inventory consists primarily of equipment and packaging material recorded at the lower of cost or market using the average cost method.

Property and Equipment -- Property and equipment, including leasehold improvements, is stated at cost. Depreciation and amortization is computed using the straight-line method over the estimated useful lives of the related assets as follows:

Equipment and software	2.5 - 5 years
Furniture and fixtures	7 years
Leasehold improvements	lease term

Non-compete covenant -- The non-compete covenant is stated at cost and amortized using the straight-line method over its estimated useful life of four years.

Software Research & Development - Statement of Financial Accounting Standards ("SFAS") No. 86, Accounting for the Costs of Computer Software to be Sold, Leased, or Otherwise Marketed, requires companies that produce software to capitalize software development costs when technological feasibility has been established. Company management believes that technological feasibility is not established until a beta version of the product exists and that costs incurred during the period from when a beta version is available until general release

Edgar Filing: ISLAND PACIFIC INC - Form 8-K/A

are not material and therefore are not capitalized.

Revenue Recognition -- Software license revenue is recognized when a non-cancelable license agreement has been executed, the product has been shipped, fees are fixed and determinable, and collection of the resulting receivable is probable. For certain private label software license revenue, which includes unspecified upgrades and enhancements, when and if developed, amounts are included in deferred revenue and recognized ratably over the term of the arrangement. Membership revenue is derived from the sale of rights to future software upgrades, when and if developed, and is billed in advance and included in deferred revenue and recognized ratably over the contracted period. Revenue is recognized from the sale of equipment upon shipment. Service revenue consists primarily of consulting and training services which is recognized as services are performed. Deferred revenues include unearned amounts received under prepaid membership and other contacts and amounts billed to customers but not yet recognized as revenue.

Income Taxes -- In accordance with SFAS No. 109, Accounting for Income Taxes, deferred tax assets and liabilities are recognized for future tax consequences attributable to differences in the timing of the recognition of certain revenues and the deduction of certain expenses for financial reporting and income tax reporting purposes, based on tax rates currently in effect for such periods when the differences become recoverable and settled.

Advertising -- The Company records expenses for advertising when the liability is incurred. The amounts expensed for the years ended December 31, 2003 and 2002 were \$165,040 and \$186,457, respectively.

Stock-Based Compensation -- The Company accounts for its stock-based awards to employees using the intrinsic value method under Accounting Principles Board Opinion ("APB") No. 25, "Accounting for Stock Issued to Employees" and related interpretations. Under this method, compensation expense is recorded on the date of grant only if the current fair value exceeds the exercise price. In December 2002, the FASB issued Statement of Financial Accounting Standards No. 148 ("SFAS 148"), "Accounting for Stock-Based Compensation-Transition and Disclosure." This Statement amends SFAS 123, "Accounting for Stock-Based Compensation," to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, SFAS 148 amends the disclosure requirements of Statement 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The Company has elected to continue to apply the intrinsic value method of accounting described above, and has adopted the disclosure requirements of SFAS 123, as amended.

Certain Significant Risks and Uncertainties -- Financial instruments which potentially subject the Company to concentrations of credit risk consist of cash, cash equivalents and accounts receivable. Cash and cash equivalents, consisting of business checking and money market accounts are held at several financial institutions. The Company considers all highly liquid debt instruments purchased with a remaining maturity of 90 days or less to be cash equivalents. Accounts at each institution are insured by the Federal Deposit Insurance Corporation up to \$100,000. As of December 31, 2003 and 2002, the uninsured portion of these balances held at financial institutions aggregated to \$732,893 and \$208,452, respectively. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk on cash and cash equivalents. The Company performs ongoing credit evaluations of customers and generally does not require its customers to provide collateral or other security to support accounts receivable.

Edgar Filing: ISLAND PACIFIC INC - Form 8-K/A

The Company participates in a dynamic industry and believes that changes in any of the following areas could have a material adverse effect on the Company's future financial position or results of operations; advances and trends in new technologies; competitive pressures in the form of new products or price reductions on existing products; changes in overall demand for products and services offered by the Company; changes in strategic partnerships or other factors; risks associated with changes in domestic and international economic and/or political conditions or regulations; litigation or claims against the Company based on intellectual property, patent, product, regulatory or other factors; and the Company's ability to attract and retain employees necessary to support its growth.

Options granted under the plans vest ratably over four years and expire 10 years from the date of grant. Pursuant to the management buyout agreement on December 6, 2002, (see note 14) the Company entered into an agreement with the 1998 stock option holders to repurchase their outstanding options, and subsequently options to purchase 1,102,458 shares of common stock were cancelled during the year ended December 31 2002. In connection with the cancellation of these options, the Company issued promissory notes totaling \$803,000 to the previous option holders and recorded a compensation expense of \$893,000 during the year ended December 31 2002.

In March 2003, the Company adopted the 2003 Stock Incentive Plan (the "2003 Plan"), which provides the granting of stock options to employees, director and consultants of the Company. Options granted under the 2003 Plan may be either incentive stock options ("ISOs") or non-qualified stock options ("NSOs"). ISOs may be granted only to employees of the Company or a parent or a subsidiary of the Company. NSOs may be granted to employees, directors and consultants.

F-8

The Company has authorized the grant of options up to 1,500,000 shares of the Company's voting common stock. As of December 31, 2003, there were 684,500 shares available for future issuance under the 2003 Plan. All ISOs granted have ten year terms and vest and become fully exercisable at the end of four years of continued employment. In cases where ISOs are granted to employees that own more than 10% of the Company stock, the term of the ISOs is five years.

The following table summarizes stock option transactions as of December 31, 2003 and 2002:

The Company has elected to follow Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25") and related interpretations in accounting for its employee stock options. Under APB 25, because the exercise price of the Company's employee stock options equals the market price of the underlying stock on the date of grant, no compensation expense has been recognized.

The Company has adopted the disclosure requirements of SFAS 123. The fair value of the employee stock options was estimated at the date of grant using the minimum value method available for privately-held companies. Under this method, the option value is determined as the excess of the fair value of the stock at the date of grant over the present value of both the exercise price lump sum and the expected dividend yields of 0%, each discounted at the risk-free rate of 3.375% over the expected 5-year life of option, with no volatility, in the year ended December 31, 2003.

The following table presents pro forma disclosures required by SFAS 148 of net income (loss) as if the fair-value method had been applied to all outstanding and unvested employee awards in the years ended December 31, 2003 and 2002:
