PART I

Throughout this report, we refer to Choice Hotels International, Inc., together with its subsidiaries as "Choice," "we," "us" or the "Company".

Forward-Looking Statements

Certain matters discussed in this report constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Generally, our use of words such as "expect," "estimate," "believe," "anticipate," "should," "will," "forecast," "plan," "project," "assume" or similar words of futurity identify such forward-looking statements. These forward-looking statements are based on management's current beliefs, assumption and expectations regarding future events, which in turn are based on information currently available to management. Such statements may relate to projections of the Company's revenue, earnings and other financial and operational measures, Company debt levels, ability to repay outstanding indebtedness, payment of dividends, and future operations, among other matters. We caution you not to place undue reliance on any such forward-looking statements. Forward-looking statements do not guarantee future performance and involve known and unknown risks, uncertainties and other factors.

Several factors could cause actual results, performance or achievements of the Company to differ materially from those expressed in or contemplated by the forward-looking statements. Such risks include, but are not limited to, changes to general, domestic and foreign economic conditions; foreign currency fluctuations; operating risks common in the lodging and franchising industries; changes to the desirability of our brands as viewed by hotel operators and customers; changes to the terms or termination of our contracts with franchisees and our relationships with our franchisees; our ability to keep pace with improvements in technology utilized for marketing and reservations systems and other operating systems; our ability to grow our franchise system; exposure to risks relating to development activities; fluctuations in the supply and demand for hotels rooms; the level of acceptance of alternative growth strategies we may implement; operating risks associated with our international operations; the outcome of litigation; and our ability to effectively manage our indebtedness. These and other risk factors are discussed in detail in Item 1A. "Risk Factors" of this report. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by law.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission ("SEC"). Our SEC filings are available to the public over the internet at the SEC's web site at <http://www.sec.gov>. Our SEC filings are also available free of charge on our website at <http://www.choicehotels.com> as soon as reasonably practicable following the time that they are filed with or furnished to the SEC. You may also read and copy any document we file with the SEC at its public reference room located at 100 F Street, NE Washington DC 20549. Please call the SEC at 1-800-SEC-0330 for further information on its public reference room.

Item 1. Business.

Overview

We are one of the largest hotel franchisors in the world with 6,379 hotels open and 603 hotels under construction, awaiting conversion or approved for development as of December 31, 2014 representing 505,278 rooms open and 47,951 rooms under construction, awaiting conversion or approved for development in 50 states, the District of Columbia and over 35 countries and territories outside the United States. Choice franchises lodging properties under the following proprietary brand names: Comfort Inn[®], Comfort Suites[®], Quality[®], Clarion[®], Sleep Inn[®], Econo Lodge[®], Rodeway Inn[®], MainStay Suites[®], Suburban Extended Stay Hotel[®], Cambria[®] hotels & suites, and Ascend Hotel Collection[®] (collectively, the "Choice brands").

We operate in two reportable segments encompassing our hotel franchising business and our SkyTouch Technology ("SkyTouch") division. SkyTouch is a division of the Company that develops and markets cloud-based technology products, including inventory management, pricing and connectivity to third party channels, to hoteliers not under

franchise agreements with the Company. SkyTouch's technology products are based on the Company's choiceAdvantage property management system which is utilized by over 5,700 of the Company's franchised hotels. SkyTouch was announced to the public in March 2013 and represents less than 1% and 5% of the Company's total revenues and operating expenses, respectively, for the year ended December 31, 2014.

The Company's domestic franchising operations are conducted through direct franchising relationships while its international franchise operations are conducted through a combination of direct franchising and master franchising relationships. With a focus on hotel franchising instead of ownership, we benefit from the economies of scale inherent in the franchising business. The fee and cost structure of our business provides opportunities to improve operating results by increasing the number of franchised hotel rooms and effective royalty rates of our franchise contracts resulting in increased

Table of Contents

initial and relicensing fee revenue, ongoing royalty fees and procurement services revenues. In addition to these revenues, we also collect marketing and reservation system fees to provide support activities for the franchise system. Our operating results can also be improved through our company-wide efforts related to improving property level performance. The Company's hotel franchising business currently has relatively low capital expenditure requirements. The principal factors that affect the Company's franchising results are: the number and mix of franchised hotel rooms in the various hotel lodging price categories; growth in the number of hotel rooms under franchise; occupancy and room rates achieved by the hotels under franchise; the effective royalty rate achieved; the level of franchise sales and relicensing activity; and our ability to manage costs. The number of rooms at franchised properties and occupancy and room rates at those properties significantly affect the Company's results because our royalty and marketing and reservation system fees are primarily based upon room revenues or the number of rooms at franchised hotels. The key industry standard for measuring hotel-operating performance is revenue per available room ("RevPAR"), which is calculated by multiplying the percentage of occupied rooms by the average daily room rate realized. Our variable overhead costs associated with franchise system growth of our established brands have historically been less than incremental royalty fees generated from new franchises. Accordingly, continued growth of our franchise business should enable us to realize benefits from the operating leverage in place and improve operating results.

We are contractually required by our franchise agreements to use the marketing and reservation system fees we collect for system-wide support activities. These expenditures help to enhance awareness and increase consumer preference for our brands. Greater awareness and preference promotes long-term growth in business delivery to our franchisees and increases the desirability of our brands to hotel owners and developers, which ultimately increases franchise fees earned by the Company.

Our Company articulates its mission as a commitment to our franchisees' profitability by providing them with hotel franchises that strive to generate the highest return on investment of any hotel franchise. We have developed an operating system dedicated to our franchisees' success that focuses on delivering guests to our franchised hotels and reducing costs for our hotel owners.

Our capital allocation decisions, including capital structure and uses of capital, are intended to maximize our return on invested capital and create value for our shareholders. We believe our strong and predictable cash flows create a strong financial position that provides us a competitive advantage. We maintain a capital structure that generates high financial returns and use our excess cash flow to provide returns to our shareholders primarily through share repurchases, dividends or investing in growth opportunities.

Historically, we have returned value to our shareholders in two primary ways: share repurchases and dividends. In 1998, we instituted a share repurchase program which has generated substantial value for our shareholders. Since the program's inception through December 31, 2014, we have repurchased 46.7 million shares (including 33.0 million prior to the two-for-one stock split effected in October 2005) of common stock at a total cost of \$1.2 billion.

Considering the effect of the two-for-one stock split, the Company has repurchased 79.7 million shares at an average price of \$14.55 per share. In the fourth quarter of 2014, our board of directors authorized a 3 million share increase to the current share repurchase authorization increasing the shares remaining to 3.0 million at December 31, 2014. We currently believe that our cash flows from operations will support our ability to complete the current board of directors repurchase authorization and upon completion of the current authorization, our board of directors will evaluate the advisability of additional share repurchases.

The Company commenced paying quarterly dividends in 2004 and in 2012 the Company elected to pay a special cash dividend totaling approximately \$600 million. The Company currently maintains the payment of a quarterly dividend on its common shares outstanding; however the declaration of future dividends is subject to the discretion of the board of directors. With the exception of the 2012 special cash dividend, quarterly cash dividends paid on common shares outstanding was \$0.185 per share for each quarter for the years ended December 31, 2012, 2013 and 2014. In the fourth quarter of 2014, the board of directors agreed to increase the quarterly cash dividend from \$0.185 per share to \$0.195 per share, beginning with the dividend payable in the first quarter of 2015. The projected annual dividend in 2015 is \$0.78 per annum. We expect to continue to pay dividends in the future, subject to quarterly declaration by our board of directors as well as future business performance, economic conditions, changes in income tax regulations and other factors.

The Company also allocates capital to exploring growth opportunities in business areas that are adjacent or complementary to our core hotel franchising business, which leverage our core competencies and are additive to our franchising business model. The timing and amount of these investments are subject to market and other conditions. Our direct lodging property real estate exposure is limited to activity in the United States and consists of two parcels of real estate that the Company has acquired and intends to resell to incent franchise development in strategic markets or to pursue hotel development through joint ventures. In addition, our development activities that involve financing, equity investments and guaranty support to hotel developers create limited additional exposure to the real estate markets.

Table of Contents

The Lodging Industry

Companies participating in the lodging industry primarily do so through a combination of one or more of the three primary lodging industry activities: ownership, franchising and management. A company's relative reliance on each of these activities determines which drivers most influence its profitability.

Ownership requires a substantial capital commitment and involves the most risk but offers high returns due to the owner's ability to influence margins by driving RevPAR, managing operating expenses and financial leverage. The ownership model has a high fixed-cost structure that results in a high degree of operating leverage relative to RevPAR performance. As a result, profits escalate rapidly in a lodging up-cycle but erode quickly in a downturn as costs rarely decline as fast as revenue. Profits from an ownership model increase at a greater rate from RevPAR growth attributable to average daily rate ("ADR") growth, than from occupancy gains since there are more incremental costs associated with higher guest volumes compared to higher pricing.

Franchisors license their brands to a hotel owner, giving the hotel owner the right to use the brand name, logo, operating practices, and reservations systems in exchange for a fee and an agreement to operate the hotel in accordance with the franchisor's brand standards. Under a typical franchise agreement, the hotel owner pays the franchisor an initial fee, a percentage-of-revenue royalty fee and a marketing/reservation fee. A franchisor's revenues are dependent on the number of rooms in its system and the top-line performance of those hotels. Earnings drivers include RevPAR increases, unit growth and effective royalty rate improvement. Franchisors enjoy significant operating leverage in their business model since it typically costs little to add a new hotel franchise to an existing system. Franchisors normally benefit from higher industry supply growth, because unit growth usually outpaces lower RevPAR resulting from excess supply. As a result, franchisors benefit from both RevPAR growth and supply increases which aids in reducing the impact of lodging industry economic cycles.

Management companies operate hotels for owners that do not have the expertise and/or the desire to self-manage.

These companies collect management fees predominately based on revenues earned and/or profits generated. Similar to franchising activities, the key drivers of revenue based management fees are RevPAR and unit growth and similar to ownership activities, profit based fees are driven by improved hotel margins and RevPAR growth.

Similarly to other industries, lodging experiences both positive and negative operating cycles. Positive cycles are characterized as periods of sustained occupancy growth, increasing room rates and hotel development. These cycles usually continue until either the economy sustains a prolonged downturn, excess supply conditions exist or some external factor occurs such as war, terrorism or natural resource shortages. Negative cycles are characterized by hoteliers reducing room rates to stimulate occupancy and a reduction of hotel development. Industry recovery usually begins with an increase in occupancy followed by hoteliers increasing room rates. As demand begins to exceed room supply, occupancies and rates continue to improve. These factors result in increased hotel development.

Hotel room supply growth is cyclical as hotel construction responds to interest rates, construction and material supply conditions, capital availability and industry fundamentals. Historically, the industry has added hotel rooms to its inventory through new construction due largely to favorable lending environments that encouraged hotel development. Typically, hotel development continues during favorable lending environments until the increase in room supply outpaces demand. The excess supply eventually results in lower occupancies, which results in hoteliers reducing room rates to stimulate demand, and reduced hotel development. Over time, the slow growth in hotel supply results in increased occupancy rates and allows hotels to again raise room rates. The increase in occupancy and room rates serves as a catalyst for increased hotel development.

Table of Contents

The following chart demonstrates these trends over the last fifteen years:

US Lodging Industry Trends: 2000 - 2014

Year	Occupancy Rates	Average Daily Room Rates (ADR)	Change in ADR Versus Prior Year	Change in CPI Versus Prior Year	Revenue Per Available Room (RevPAR)	New Rooms Added (Gross)
2000	63.5	% \$85.24	4.9	% 3.4	% \$54.13	121,476
2001	60.1	% \$84.85	(0.5))% 2.9	% \$50.99	101,279
2002	59.2	% \$83.15	(2.0))% 1.6	% \$49.22	86,366
2003	59.1	% \$83.19	0.1	% 2.3	% \$49.20	65,876
2004	61.3	% \$86.41	3.9	% 2.7	% \$52.93	55,245
2005	63.1	% \$90.84	5.1	% 3.4	% \$57.34	65,900
2006	63.4	% \$97.31	7.1	% 3.2	% \$61.69	73,308
2007	63.1	% \$104.04	6.9	% 2.8	% \$65.61	94,541
2008	60.3	% \$106.96	2.8	% 3.8	% \$64.49	146,312
2009	54.5	% \$98.17	(8.2))% (0.4))% \$53.50	142,287
2010	57.5	% \$98.06	(0.1))% 1.6	% \$56.43	73,976
2011	59.9	% \$101.85	3.9	% 3.2	% \$61.02	38,409
2012	61.3	% \$106.25	4.3	% 2.1	% \$65.15	43,879
2013	62.2	% \$110.30	3.8	% 1.5	% \$68.58	54,020
2014	64.4	% \$115.32	4.6	% 0.8	% \$74.28	63,346

(Source: Smith Travel Research and US Department of Labor)

As a franchisor, we believe we are well positioned in any stage of the lodging cycle as our fee-for-service business model has historically delivered predictable, profitable, long-term growth in a variety of lodging and economic environments. We have historically benefited from both the RevPAR gains typically experienced in the early stages of recovery, as our revenues are based on our franchisees' gross room revenues, and the supply growth normally occurring in the later stages as we increase our portfolio size.

The Company's portfolio of brands offers both new construction and conversion opportunities. Our new construction brands typically benefit from periods of supply growth and favorable capital availability and pricing. Our conversion brands also benefit from periods of supply growth as the construction of hotels increases the need for existing hotels to seek new brand affiliations as their product moves through the hotel life cycle. Furthermore, the Company's conversion brands benefit from lodging cycle downturns as our unit growth has been historically driven from the conversion of independent and other hotel chain affiliates into our system as these hotels endeavor to improve their performance.

Table of Contents

The lodging industry can be divided into chain scale categories or groupings of generally competitive brands as follows:

Chain Scale	Brand Examples	Room Count	% of Total	Avg. No. of Rooms Per Hotel
Luxury	Four Seasons, Ritz Carlton, W Hotel	108,077	2.2	% 337.7
Upper Upscale	Marriott, Hilton, Hyatt, Sheraton	568,525	11.4	% 359.4
Upscale	Hilton Garden Inn, Courtyard, Cambria Suites	631,245	12.7	% 152.1
Upper Midscale	Comfort Inn, Holiday Inn, Hampton Inn	876,164	17.6	% 97.9
Midscale	Quality, Best Western, Ramada, La Quinta	483,144	9.7	% 85.6
Economy	Econo Lodge, Days Inn, Super 8, Red Roof Inn	774,363	15.6	% 75.9
Sub-Total Brand Affiliated		3,441,518	69.1	% 111.6
Independents		1,537,187	30.9	% 68.1
Total All Hotels		4,978,705	100	% 93.2

According to Smith Travel Research, the lodging industry consisted of approximately 53,000 hotels representing approximately 5.0 million rooms open and operating in the United States at December 31, 2014. During the year ended December 31, 2014, the industry added approximately 63,000 gross rooms to the industry supply and net room growth was approximately 0.8%. Approximately, 49% of the new rooms opened during the year were positioned in the Upper Midscale, Midscale and Economy chain scale segments in which we primarily operate. Overall, annual industry room growth remains below historical levels.

The lodging industry consists of independent operators of hotels and those that have joined national hotel franchise chains. Independent operators of hotels not owned or managed by major lodging companies have increasingly joined national hotel franchise chains as a means of remaining competitive with hotels owned by or affiliated with national lodging companies. Over the years, the industry has seen a significant movement of hotels from independent to chain affiliation, with affiliated hotels increasing from 46% of the rooms in the market in 1990 to 69% of the market in 2014. However, the pace of this increase has moderated over the last several years and in 2014 the percentage of rooms in the market affiliated with a chain increased by 20 basis points from 68.9% to 69.1%.

Due to the fact that a significant portion of the costs of owning and operating a hotel are generally fixed, increases in revenues generated by affiliation with a franchise lodging chain can improve a hotel's financial performance. The large franchise lodging chains, including us, generally provide a number of support services to hotel operators designed to improve the financial performance of their properties including central reservation and property management systems, marketing and advertising programs, training and education programs, revenue enhancement services and relationships with qualified vendors to streamline purchasing processes and make lower cost products available. We believe that national franchise chains with a large number of hotels enjoy greater brand awareness among potential guests than those with fewer hotels, and that greater brand awareness can increase the desirability of a hotel to its potential guests. Furthermore, we believe that hotel operators choose lodging franchisors based primarily on the perceived value and quality of each franchisor's brand and its services, and the extent to which affiliation with that franchisor may increase the hotel operator profitability.

Choice's Franchising Business

Choice operates primarily as a hotel franchisor offering 11 brands. This family of well-known and diversified new construction and conversion brands competes at various hotel consumer and developer price points.

Economics of Franchising Business. The fee and cost structure of our business provides opportunities for us to improve operating results by increasing the number of franchised hotel rooms, improving RevPAR performance and increasing the effective royalty rates of our franchise contracts. As a hotel franchisor, we derive our revenue primarily from various franchise fees. Our franchise fees consist primarily of an initial fee and ongoing royalty, marketing and

reservation system fees that are typically based on a percentage of the franchised hotel's gross room revenues. The initial fee and on-going royalty portion of the franchise fees are intended to cover our operating expenses, such as expenses incurred in business development, quality assurance, administrative support, certain franchise services and to provide us with operating profits. The marketing and

8

Table of Contents

reservation system fees are used for the expenses associated with marketing, media, advertising, providing a central reservation system, property management systems, e-commerce initiatives and certain franchise services.

Our fee stream depends on the number of rooms in our system, the gross room revenues generated by our franchisees and effective royalty rates under our franchise contracts. We enjoy significant operating leverage since the variable operating costs associated with the franchise system growth of our established brands have historically been less than incremental royalty fees generated from new franchises. We believe that our business is well positioned in the lodging industry since we benefit from both increases in RevPAR and unit growth from new hotel construction or conversion of existing hotel assets into our system.

Our family of well-known and diversified brand offerings positions us well within the lodging industry. Our Cambria Suites, Comfort Inn, Comfort Suites, Sleep Inn, Suburban Extended Stay Hotel and MainStay Suites are primarily new build brands which offer hotel developers an array of choices at various price points for transient and extended stay business during periods of supply growth. Our Ascend Hotel Collection, Clarion, Quality, Econo Lodge and Rodeway Inn brands offer conversion opportunities during both industry contraction and growth cycles to independent operators and non-Choice affiliated hotels who desire to affiliate with our brands and take advantage of the services we have to offer.

Strategy. Our mission is a commitment to franchisee profitability by providing our franchisees with hotel franchises that strive to generate the highest return on investment of any hotel franchise. Our business strategy is to create franchise system growth by leveraging Choice's large and well-known hotel brands, franchise sales capabilities, effective marketing and reservation delivery efforts, training and education programs, RevPAR enhancing services and technologies and financial strength created by our significant free cash flow. We believe our brands' growth will be driven by our ability to create a compelling return on investment for franchisees. Our strategic objective is to improve profitability of our franchisees by providing services which increase business delivery, enhance RevPAR, reduce hotel operating and development costs, and/or improve guest satisfaction. Specific elements of our strategy include: building strong brands, delivering exceptional services, reaching more consumers and leveraging our size, scale and distribution to reduce costs for hotel owners. We believe that by focusing on these elements we can increase the gross room revenues generated by our franchisees by increasing the business delivered to existing franchisees and expanding our market share of franchised hotels in the chain scale segments in which we operate or seek to operate. Improving the desirability of our brands should also allow us to continue to improve the effective royalty rate of our contracts.

Building Strong Brands. Each of our brands has particular attributes and strengths, including awareness with both consumers and developers. Our strategy is to utilize the strengths of each brand for room growth, RevPAR gains and royalty rate improvement that create revenue growth. We believe brand consistency, brand quality and guest satisfaction are critical in improving brand performance and building strong brands.

We have multiple brands that are positioned to meet the needs of many types of guests. These brands can be developed at various price points and are suitable for both new construction properties and existing hotels. This flexibility ensures that we have brands suitable for creating room growth in various types of markets, with various types of customers, and during both industry contraction and growth cycles. During times of lower industry supply growth and tighter capital markets, we can target conversions of existing non-Choice affiliated hotels seeking the awareness and proven performance provided by our brands. During periods of strong industry supply growth, we expect a greater portion of our room growth to come from our new construction brands. We believe that a large number of markets can still support our hotel brands and that the growth potential for our brands remains strong.

We strive to maintain the strength of our brands by enhancing product consistency and quality. We attempt to achieve consistency and quality for new entrants into the franchise system by placing prospective hotels in the appropriate brand based on the physical characteristics, performance and amenities of the hotel and by requiring property improvement plans, when necessary, to ensure the new hotel meets the quality standards of the brand. Furthermore, we may require hotels currently in our franchise system to execute property improvement plans at specified contractual windows to ensure that they continue to maintain the product consistency and quality standards of the brand.

We believe each of our brands appeals to targeted hotel owners and guests because of unique brand standards, marketing campaigns, loyalty programs, reservation delivery, service levels and pricing.

Delivering Exceptional Services. We provide a combination of services and technology based offerings to help our franchisees improve performance. We have field services staff members located nationwide that help franchisees improve RevPAR performance and guest satisfaction. In addition, we provide our franchisees with education and training programs as well as revenue management technology and services designed to improve property level performance. These services and products promote revenue gains for franchisees and improve guest satisfaction which translate into both higher royalties for the Company and improved returns for owners, leading to further room growth by making our brands even more attractive to

Table of Contents

prospective franchisees. We develop our services based on customer needs and focus on activities that generate high return on investment for our franchisees.

Reaching More Consumers. We believe hotel owners value and benefit from the large volume of guests we deliver through a mix of activities including brand marketing, reservation systems, key account sales, and the Company's loyalty program, Choice Privileges®. Our strategy is to maximize the effectiveness of these activities in delivering both leisure and business travelers to Choice-branded hotels.

The Company intends to continue to increase awareness of its brands through its national marketing campaigns and its Choice Privileges loyalty program promotions. These campaigns are intended to generate a compelling message to consumers to create even greater awareness for our brands with the ultimate goal of driving business through our central reservation system. Local and regional co-op marketing campaigns will continue to be utilized to leverage the national marketing programs to drive business to our franchised properties at a local level. We expect our efforts at marketing directly to individual guests and corporate customers will continue to be enhanced through the use of our customer relationship management technology and programs; as well as, our field based sales agents that are focused on increasing our share of business travelers. Our continued focus on overall brand quality coupled with our marketing initiatives is designed to stimulate room demand for our franchised hotels through improved guest awareness and satisfaction.

Our central reservations system is a critical technology used to deliver guests to our franchisees through multiple channels, including our call centers, proprietary web and mobile sites, global distribution systems (e.g., SABRE and Amadeus), on-line travel agents ("OTAs") (e.g. Expedia and Bookings.com) and internet referral or booking services (i.e. Kayak and Trip Advisor). We believe our well-known brands, combined with our relationships with many internet distribution web sites benefits our franchisees, by facilitating increased rate and reservations delivery, and reducing costs and operational complexity.

Leveraging Size, Scale and Distribution. We continually focus on identifying methods for utilizing the significant number of hotels in our system to reduce costs and increase returns for our franchisees. For example, we create relationships with qualified vendors to: (i) make low-cost products available to our franchisees; (ii) streamline the purchasing process; and (iii) maintain brand standards and consistency. We plan to expand these relationships and identify new methods for decreasing hotel-operating costs by increasing penetration within our existing franchise system and enhancing our existing vendor relationships and/or creating new vendor relationships. We believe our efforts to leverage the Company's size, scale and distribution benefit the Company by enhancing brand quality and consistency, improving our franchisees returns and satisfaction, and creating procurement services revenues.

Franchise System

Revenues from our domestic operations comprised 92% of our total revenues in both 2014 and 2013, respectively. As a result, our description of the franchise system is primarily focused on the domestic operations.

Our standard domestic franchise agreements grant franchisees the non-exclusive right to use certain of our trademarks and receive other benefits of our franchise system to facilitate the operation of their franchised hotel at a specified location. The majority of our standard domestic franchise agreements are 10 to 20 years in duration with certain rights for each of the franchisor and franchisee to terminate their franchise agreement, such as upon designated anniversaries of the agreement, before the 20th (or 10th, as applicable) year. Our franchisees operate domestically under one of eleven Choice brand names: Comfort Inn, Comfort Suites, Cambria hotels and suites, Quality, Clarion, Ascend Hotel Collection, Sleep Inn, Econo Lodge, Rodeway Inn, MainStay Suites and Suburban Extended Stay Hotel.

Table of Contents

The following table presents key statistics related to our domestic franchise system over the five years ended December 31, 2014.

COMBINED DOMESTIC FRANCHISE SYSTEM

	As of and For the Year Ended December 31,									
	2010	2011	2012	2013	2014					
Number of properties, end of period	4,993	5,001	5,083	5,180	5,221					
Number of rooms, end of period	393,535	392,826	396,102	400,585	398,661					
Royalty fees (\$000)	\$206,921	\$221,023	\$236,336	\$242,887	\$262,675					
Average royalty rate ⁽¹⁾	4.30	% 4.31	% 4.33	% 4.33	% 4.28					%
Average occupancy percentage ⁽¹⁾	51.5	% 53.7	% 55.6	% 56.4	% 59.5					%
Average daily room rate (ADR) ⁽¹⁾	\$70.51	\$71.92	\$73.69	\$74.76	\$77.03					
Revenue per available room (RevPAR) ^{(1),(2)}	\$36.29	\$38.63	\$40.94	\$42.20	\$45.80					

Amounts exclude results from Cambria Suites properties open during all periods since the operating statistics are (1) not representative of a stabilized brand which the Company defines as having at least 25 units open and operating for a twelve month period.

(2) The Company calculates RevPAR based on information as reported to the Company by its franchisees. Currently, no individual domestic franchisee accounts for more than 2% of the Company's total revenues.

Industry Positioning

Our brands offer consumers and developers a wide range of options, including economy hotels, mid-scale, upper mid-scale and lower upscale, full service properties. Our brands are as follows:

Cambria hotels and suites: Cambria hotels and suites is a new construction select service hotel chain that operates in the upscale lodging category. For medium frequency and Millennial business travelers, Cambria treats every guest as a high value guest by offering inviting design, options for guests to personalize their stay, and unexpected service delighters. Public spaces are designed with options that invite guests to hang out, including Social Circle™ restaurant and bar, which focuses on simple, yet interesting food and craft beers. Cambria offers guest rooms that “feel like an upgrade.” In-room amenities include pillow top mattresses, flat screen TV(s), speaker phones, mini-refrigerators and microwaves. Principal competitor brands include Courtyard by Marriott, Aloft and Hilton Garden Inn. The Cambria hotels and suites brand was launched in January 2005 and the first properties opened during 2007.

Ascend Hotel Collection: Ascend Hotel Collection is an innovative membership program that is not positioned as a traditional franchise concept. Ascend includes individual hotels that are historic, boutique and/or unique and desire to retain their independent brand identity but have access to Choice’s marketing and distribution channels. Ascend Hotel Collection offers the best of both worlds: independence backed up by a powerful global distribution network.

Principal competitors include Sterling Hotels, Summit Hotel & Resorts, Small Luxury Hotels and Historic Hotels of America. The Ascend membership was launched in October 2008.

Comfort Inn: Comfort Inn and Comfort Inn and Suites hotels are primarily upper mid-scale limited service hotels that offer a warm and welcoming guest experience designed to help travelers feel refreshed and ready to take on the day. One of the original brands in the limited service category, Comfort has built a reputation for consistent high-value accommodations for both business and leisure travelers. Comfort offers complimentary hot breakfast with fresh waffles, a swimming pool and/or exercise room, and free high-speed internet access. Principal competitor brands include Holiday Inn Express and Country Inn & Suites.

Comfort Suites: An extension of the highly regarded Comfort Inn brand, Comfort Suites hotels deliver the experience that helps guests feel refreshed and ready to take on the day. All hotels are 100% smoke free, and rooms are oversized with a separate area for working that meets the demands of today’s business traveler. In addition, each suite features a sleeper sofa, refrigerator and microwave. Comfort Suites hotels offer a complimentary hot breakfast, fitness center, business center, and free high-speed internet access, as well as a marketplace with snacks and beverages for purchase.

The brand competes with Hampton and Fairfield Inn.

Sleep Inn: Sleep Inn is a new construction brand that operates in the moderate tier of the mid-scale lodging category, offering developers a lower cost to build with competitive mid-scale average daily rates. Sleep Inn delivers a simply stylish, contemporary guest experience, providing both business and leisure travelers with free high-speed internet access, a

Table of Contents

complimentary Morning Medley hot breakfast, and an exercise room and/or pool. Sleep Inn's competitors include Microtel and La Quinta.

Clarion: Clarion helps owners of existing mid-scale assets with food and beverage capabilities achieve strong returns with reasonable investment. Clarion allows a more focused and efficient food and beverage operational model that works well with a variety of conversion property configurations. Clarion helps business and leisure guests "get together" by providing meeting/banquet facilities with catering, hot breakfast, a simplified menu of basic evening meals and lounge with at least beer and/or wine selections. Amenities include a pool, business center, free high-speed internet access and fitness center. Principal competitor brands include Four Points by Sheraton and Radisson.

Quality: Quality helps both guests and owners "get your money's worth" in the mid-scale category. Quality hotels provide clean, comfortable, and affordable accommodations, as well as the "Value Qs:" Q Bed, Q Breakfast, Q Shower, Q Service, and the Q Value of free high-speed internet access, and a swimming pool and/or an exercise room. Principal competitor brands include Best Western and Ramada.

MainStay Suites: MainStay Suites compete in the mid-scale extended stay category. Complete with a "feels like home guest experience" and value-added amenities, the MainStay brand is designed as a more practical lodging option for guests whose stays are longer than a few nights. Typically, longer hotel stays involve relocation, training, or temporary job assignments. MainStay guest rooms feature free high-speed internet access, fully equipped kitchens with a two-burner range, dishes, utensils, dishwasher, sink with disposal, microwave, and full size refrigerator. All suites include a sleeper sofa, comfortable work area with ergonomic chair and large walk-in closets. MainStay Suites' principal competitors include TownePlace Suites and Candlewood Suites.

Suburban Extended Stay Hotel: Suburban Extended Stay Hotel suites are built with today's value-conscious extended stay guest in mind. All suites provide kitchens, internet connections, and access to on-site laundry facilities.

Suburban's "just what you need" philosophy matches attractive weekly pricing with weekly housekeeping to provide extended stay guests with the all-suite accommodations they want without the cost of services they do not need. All hotels offer complimentary high-speed internet access. Principal competitors include Extended Stay America, InTown Suites, Studio 6 and Value Place.

Econo Lodge: Econo Lodge is the premier brand in the economy hotel category that is an easy stop on the road for value-oriented travelers. Free high speed internet, a premium movie channel and complimentary continental breakfast are just some of the amenities that position Econo Lodge as a great value in the economy category. The brand competes primarily with Days Inn, Super 8 and Red Roof Inn.

Rodeway Inn: Rodeway Inn is a brand that also serves the economy segment and offers sensible lodging for travelers on a budget. As part of one of the largest franchise systems in the world, Rodeway offers a welcoming environment at an affordable rate. With free coffee to get guests started in the morning, free high-speed internet and a free premium movie channel, Rodeway is a great option for practical travelers. Principal competitor brands include Americas Best Value Inn and Motel 6.

Statistics for average occupancy percentage, ADR and RevPAR have been excluded for years in which the brand (1) statistics are not representative of a stabilized brand which the Company defines as having at least 25 units open and operating for a twelve month period.

International Franchise Operations

The Company conducts its international franchise operations through a combination of direct franchising and master franchising relationships. Master franchising relationships are governed by master franchising agreements that generally provide the master franchisee with the right to use and sub-license the use of our brands in a specific geographic region, usually for a fee.

Our business philosophy has been to conduct direct franchising in those international markets where both franchising is an accepted business model and we believe our brands can achieve significant distribution. We typically elect to enter into master franchise agreements in those markets where direct franchising is currently not a prevalent or viable business model. When entering into master franchising relationships, we strive to select partners that have professional hotel and asset management capabilities together with the financial capacity to invest in building the Choice brands in their respective markets. Master franchising relationships typically provide lower revenues to the Company as the master franchisees are responsible for managing certain necessary services (such as training, quality assurance, reservations and marketing) to support the franchised hotels in the master franchise area and therefore retain a larger percentage of the hotel franchise fees to cover their expenses. In certain circumstances, the Company has and may continue to make equity investments in our master franchisees.

As a result of our use of master franchising relationships and international market conditions, revenues from international franchising operations comprised 8% of our total revenues in both 2014 and 2013 while representing approximately 18% of our franchise system hotels open at both December 31, 2014 and 2013, respectively.

In some territories outside the United States hotel franchising is less prevalent, and many markets are served primarily by independent operators. We believe that chain and franchise affiliation will increase in certain international markets as local economies grow and hotel owners seek the economies of centralized reservations systems and marketing programs. We believe that international franchise operations will provide a significant long-term growth opportunity for the Company and as a result we have embarked on a multi-year investment in information technology and

marketing which is expected to enhance the value proposition for prospective international franchisees.

14

Table of Contents

As of December 31, 2014, we had 1,158 franchise hotels open and operating in over 30 countries and territories outside of the United States. The following chart summarizes our franchise system outside of the United States.

COMBINED INTERNATIONAL FRANCHISE SYSTEM⁽¹⁾

	As of and For the Year Ended December 31,				
	2010	2011	2012	2013	2014
Number of properties, end of period	1,149	1,177	1,160	1,160	1,158
Number of rooms, end of period	101,610	104,379	103,151	105,473	106,617
Royalty fees (\$000)	\$21,697	\$25,248	\$25,131	\$24,721	\$24,515

Reporting of operating statistics (e.g., average occupancy percentage and average daily room rate) of international (1) franchisees is not required by all master franchise contracts, thus these statistics and RevPAR are not presented for international franchisees.

Scandinavia. We conduct our operations in Scandinavia through a master franchise relationship with Nordic Choice Commercial Services A/S ("NCH"), formerly known as Choice Hotels Scandinavia. As of December 31, 2014, NCH had 179 open properties in its development territory, which includes Denmark, Norway and Sweden on an exclusive basis and Latvia and Lithuania on a non-exclusive basis. The Company's master franchise agreement with NCH grants rights to the Comfort, Quality, Sleep and Clarion brand and expires in 2023. Through a separate agreement signed in 2010, we have also granted NCH limited rights to franchise Ascend Hotel Collection hotels in its territory.

Japan. The Company conducts its operations in Japan through a master franchise relationship with Choice Hotels Japan Co. Ltd ("CHJ"). CHJ possesses exclusive rights to develop the Comfort and Quality brands and non-exclusive rights to the Sleep and Clarion brands. The Company's master franchise agreement with CHJ expires in December 2023. As of December 31, 2014, CHJ had 51 open properties.

Continental Europe. The Company conducts franchising operations in Germany, Italy, Czech Republic, and portions of Switzerland through Choice Hotels Licensing B.V. ("Choice BV"), a wholly-owned subsidiary, and in France, Portugal and the French speaking Cantons of Switzerland through a wholly-owned subsidiary of Choice BV, Choice Hotels France SAS. At December 31, 2014, the Company's subsidiaries had 178 properties open and operating in continental Europe.

Ireland. In August 2007, the Company entered into a master franchising agreement with Ireland-based Cordelle Enterprises, doing business as Choice Hotels Ireland ("CHR"), for the exclusive right to develop our Clarion, Quality and Comfort brands in Ireland and Northern Ireland. The master franchise agreement with CHR expires in 2027. As of December 31, 2014, CHR had 8 properties open and operating in Ireland and Northern Ireland.

United Kingdom. The Company conducts direct franchising operations in the United Kingdom through Choice BV. At December 31, 2014, the Company's subsidiary had 42 properties open and operating in the United Kingdom.

Canada. We conduct our operations in Canada for all of our brands except Cambria hotel and suites, MainStay Suites and Suburban Extended Stay Hotel through Choice Hotels Canada Inc. ("CHC") a joint venture owned 50% by us and 50% by InnVest Management Holdings Ltd. CHC is one of the largest lodging organizations in Canada with 309 of our franchised properties open and operating as of December 31, 2014. The Company conducts direct franchising operations for its extended stay and Cambria Suites brands in Canada through its wholly-owned subsidiary, Choice Hotels International Licensing ULC, and had 4 properties open and operating at December 31, 2014.

India. The Company conducts direct franchising operations in India through wholly-owned subsidiaries for the Comfort, Quality, Sleep and Clarion brands. As of December 31, 2014, the Company had 20 franchised properties open and operating.

Australasia. The Company conducts direct franchising operations in Australia, New Zealand, and Singapore through a wholly-owned subsidiary, Choice Hotels Australasia Pty. Ltd. ("CHA"). As of December 31, 2014, CHA had 258 franchised properties open and operating in Australasia.

Mexico. The Company's wholly-owned subsidiary Choice Hotels Mexico S. de R.L. de C.V. ("CHM") conducts direct franchising operations in Mexico on behalf of Choice BV, which acts as the franchisor in Mexico. CHM is focused on establishing Clarion, Quality, Sleep and Comfort brands through conversion of hotels in Mexico. At December 31, 2014, the Company's subsidiary had 25 properties open and operating.

Table of Contents

South America. We conduct our operations in Brazil and certain other South American territories through a non-exclusive master franchise relationship with Atlantica Holdings International, Ltd. ("Atlantica"). As of December 31, 2014, Atlantica had 63 open properties in its development territory. The Company's master franchise agreement with Atlantica grants rights to the Comfort, Quality, Sleep and Clarion brands, which rights are exclusive in Brazil and non-exclusive in Atlantica's remaining territory. The agreement was executed in 2001 and pursuant to an amendment executed in September 2014, will expire in December 2024.

Central America. We conduct our operations in certain Central American territories through an exclusive master franchise relationship with Real Hotels and Resorts, Inc. ("Real"). As of December 31, 2014, Real had 14 open properties in its development territory which consists of Costa Rica, Dominican Republic, El Salvador, Guatemala, Honduras and Panama. The Company's master franchise agreement with Real grants rights to the Comfort, Quality, Sleep and Clarion brands. The agreement was executed in 1994 for a term of twenty years. In May 2014, we renewed the master franchise agreement for an additional 20-year term through May of 2034, with certain rights by both parties to terminate the contract early. Through a separate agreement signed in 2011, we have also granted Real limited non-exclusive rights to franchise Ascend Hotel Collection hotels in Costa Rica, Honduras and Panama.

Other International Relationships. We also have non-exclusive master development and area representative arrangements in place with local hotel management and franchising companies doing business in China. At December 31, 2014, five properties were open and operating in China. In addition, the Company through Choice BV, has direct franchise relationships with properties in Malaysia and Turkey. At December 31, 2014, one property was open and operating in both Malaysia and Turkey.

Franchise Sales

Brand growth is important to our business model. We have identified key market areas for hotel development based on supply/demand relationships and our strategic objectives. Development opportunities are typically offered to: (i) existing franchisees; (ii) developers of hotels; (iii) owners of independent hotels and motels; (iv) owners of hotels leaving other franchisors' brands; and, (v) franchisees of non-hotel related products such as restaurants.

Our franchise sales organization is structured to support the Company's efforts to leverage its core strengths in order to take advantage of opportunities for further growth. The franchise sales organization employs both sales managers as well as franchise sales directors. This organization emphasizes the benefits of affiliating with the Choice system, our commitment to improving hotel profitability, our central reservation delivery services, our marketing and customer loyalty programs, our training and support systems (including our proprietary property management systems) and our Company's track record of growth and profitability to potential franchisees. Franchise sales directors are assigned to specific brands to leverage their brand expertise to enhance product consistency and deal flow. Our sales managers ensure each prospective hotel is placed in the appropriate brand, facilitate teamwork and information sharing amongst the sales directors and provide better service to our potential franchisees. The structure of this organization supports the Company's efforts to leverage its core strengths in order to take advantage of opportunities for further growth. Integrating our brands and strategies allow our brand teams to focus on understanding, anticipating and meeting the unique needs of our customers.

Our objective is to continue to grow our portfolio by continuing to sell our existing brands, creating extensions of our existing brands and introducing new brands, either organically or via acquisition, within the various lodging chain categories. Based on market conditions and other circumstances, we may offer certain incentives to developers to increase development of our brands such as discounting various fees such as the initial franchise fee, and royalty rates and marketing and reservation system rates as well as provide financing for property improvements and other purposes.

Because retention of existing franchisees is important to our growth strategy, we have a formal impact policy. This policy offers existing franchisees protection from the opening of a same-brand property within a specified distance,

depending upon the market in which the property is located.

Investment, Financing and Guaranty Franchisee Support

Our board of directors authorized a program which permits us to offer financing, investment, and guaranty support to qualified franchisees as well as allows us to acquire and resell real estate to incent franchise development for certain brands in strategic markets. We expect to deploy capital pursuant to this program opportunistically to promote growth of our emerging brands. The amount and timing of the investment in this program will be dependent on market and other conditions and we generally expect to recycle these investments within a five year period.

Table of Contents

Franchise Agreements

Our standard domestic franchise agreements grant franchisees the non-exclusive right to use certain of our trademarks and receive other benefits of our franchise system to facilitate the operation of their franchised hotel at a specified location. Our standard domestic franchise agreements generally have terms ranging between 10 and 20 years, with certain rights for each of the franchisor and franchisee to terminate their franchise agreement, such as upon designated anniversaries of the agreement, before the 20th (or 10th, as applicable) year.

Generally, either party to our standard domestic franchise agreement can terminate the agreement prior to the conclusion of the agreement's term under certain circumstances, such as upon designated anniversaries of the agreement, subject to applicable law. Early termination options give us flexibility in eliminating or re-branding properties for reasons other than contractual failure by the franchisee. This allows us the opportunity to strengthen our brand portfolio in various markets by replacing weaker performing hotels. We also have the right to terminate a franchise agreement if a franchisee fails to bring the property into compliance with contractual or quality standards within specified periods of time. The franchise agreements also typically contain liquidated damages provisions which represent a fair measure of compensation that our franchisee and we agree should be paid to us upon a termination of the franchise agreement.

When the responsibility for development is transferred to an international master franchisee, that party has the responsibility to develop and grow our brands in the master franchise area. Additionally, the master franchisee generally must manage the delivery of certain necessary services (such as quality assurance, reservations and marketing) to support the franchised hotels in the master franchise area. The master franchisee collects the fees paid by the local franchisee and remits an agreed upon share to us. Master franchise agreements generally have a term of at least 10 years. We have only entered into master franchise agreements with respect to franchised hotels outside the United States.

Franchise agreements are individually negotiated and vary among the different Choice brands and franchises, but generally are competitive with the industry average within their market group. Franchise fees usually have three primary components: an initial, one-time affiliation fee; a royalty fee; and a marketing and reservation system fee. Our standard franchise fees are as follows:

QUOTED FEES BY BRAND AS OF DECEMBER 31, 2014

Brand	Initial Fee Per Room/Minimum	Royalty Fees ⁽³⁾	Marketing and Reservation System Fees ⁽³⁾
Cambria hotel & suites	\$500/\$60,000	5.00	% 4.00
Comfort Inn	\$500/\$50,000	5.65	% 3.85
Comfort Suites	\$500/\$50,000	5.65	% 3.85
Quality Inn	\$300/\$35,000	4.65	% 3.85
Ascend Hotel Collection	\$375/\$30,000	4.00	% 2.50
Clarion	\$300/\$40,000	4.25	% 3.25
Sleep Inn	\$300/\$40,000	4.65	% 3.85
MainStay Suites	\$300/\$30,000	5.00	% 2.50
Econo Lodge	\$250/\$25,000	4.50	% 3.50
Rodeway Inn	\$125/\$10,000	(1) (2
Suburban Extended Stay Hotel	\$225/\$30,000	5.00	% 2.50

(1) Royalty rate is \$33.00 per room per month.

(2) Marketing and reservation system fees are \$13.00 per room per month.

(3) Fees are based on a percentage of gross room revenue

As previously noted, the Company's franchise agreements are individually negotiated and therefore actual fees may differ from those noted above. From time to time, the Company may discount the standard royalty fees and/or marketing and reservation system fees in the initial years of the agreement as a franchisee acquisition tactic. Typically,

these discounts expire as the contract matures until the contractual fees reach the standard franchise fees in effect at the time the agreement was executed.

Table of Contents

Franchise Operations

Our operations are designed to help our franchisees, improve RevPAR and lower operating and development costs, as these are the measures of performance that most directly impact franchisee profitability. We believe that by helping our franchisees become more profitable we will enhance our ability to both retain our existing franchisees and attract new franchisees. The key aspects of our franchise operations are:

Brand Name Marketing and Advertising. Our hotels are typically located in areas conveniently accessible to business and leisure travelers and therefore approximately 60% of our hotel room nights are sold to guests who either walk-in or contact the hotel directly. As a result, we believe that brand name recognition and the strength of the brand reputation are important factors in influencing business and leisure traveler hotel accommodation choices.

Our marketing and advertising programs are designed to heighten consumer awareness and preference for our brands as offering the greatest value and convenience in the lodging categories in which we compete. Marketing and advertising efforts include national television, internet and radio advertising, on-line advertising, print advertising in consumer and trade media and promotional events, including joint marketing promotions with qualified vendors and corporate partners. We also actively seek to maximize our presence on the internet by purchasing key search related terms from the various search engine providers to ensure that our hotels are prominently displayed to all potential guests.

We conduct numerous marketing and sales programs and deploy field based sales agents which target specific groups, including business travelers, senior citizens, automobile club members, families, government and military employees, educational organizations and meeting planners. Other marketing efforts include domestic and international trade show programs, publication of group and tour rate directories, direct-mail programs, electronic direct marketing e-mail programs, centralized commissions for travel agents, fly-drive programs in conjunction with major airlines, and the publication of electronic travel and vacation directories.

We operate a loyalty program, Choice Privileges, for all of the Choice brands to attract and retain travelers by rewarding frequent stays with points towards free hotel stays and other rewards. Choice Privileges participants earn points redeemable for free stays in Choice brand properties. The Company also offers guests the ability to earn airline miles for qualifying stays redeemable for flights with various airline partners as well as redeem points for gift certificates at participating retailers. These programs allow us to conduct lower cost, more targeted marketing campaigns to our consumers, deliver incremental business to our franchised hotels and are an important selling point for our franchise sales personnel. Choice Privileges members contribute approximately a third of the Company's domestic gross room revenues and the program had more than 21 million members worldwide as of December 31, 2014. Growing the membership of the Choice Privileges program as well as increasing the number of room nights consumed by existing members will continue to be a focus of the Company.

Marketing and advertising programs are directed by our marketing department, which utilizes the services of independent advertising agencies. We also employ home-based sales personnel geographically located across the United States using personal sales calls, telemarketing and other techniques to target specific customer groups, such as potential corporate clients in areas where our franchised hotels are located, the motor coach market, and meeting planners.

Our field based franchise services area directors work with franchisees to maximize RevPAR. These consultants advise franchisees on topics such as marketing their hotels, improving quality and maximizing the benefits offered by the Choice reservations system. Our proprietary property management system includes a rate and selling management tool to help our franchisees better manage rates and inventory which are designed to help them improve RevPAR by optimizing ADR and occupancy. In addition, we have recently added revenue management services to our service offerings to assist franchisees in maximizing their room rates.

Central Reservation System ("CRS"). On average, nearly 40% of the gross room revenue booked at domestic franchised properties is reserved through our central reservation system, which consists of our toll-free telephone reservation system, our proprietary internet site, mobile phone and tablet reservation applications, interfaces with global distribution systems, and other internet reservations sites. We strive to improve the percentage of business delivered by our CRS as room nights reserved through these channels are typically at higher average daily rates than

reservations booked directly through the property. In addition, increasing the percentage of business delivered through the CRS improves our value proposition to a hotel owner and therefore assists in retention of existing and acquisition of new franchisees.

Our CRS provides a data link to our franchised properties as well as to airline reservation systems such as Amadeus, Galileo, SABRE and Worldspan that facilitate the reservation process for travel agents and corporate travelers. We also offer our rooms for sale on our own proprietary internet site (www.choicehotels.com) and mobile applications as well as those of online travel agents ("OTA's") and other third-party internet referral or booking services.

Table of Contents

Our toll-free telephone reservation system primarily utilizes third party call center service providers. Reservation agents trained on the reservation system can match each caller with a Choice-branded hotel meeting the caller's needs. We also operate a call forwarding program through which our franchisees can leverage our central reservation system capabilities by forwarding reservation calls received directly by the property to one of our reservation centers. Typically, this reduces the hotel's front desk staffing needs, improves customer service and results in a higher average daily rate than reservations booked directly through the property.

We continue to implement our integrated reservation and distribution strategy to improve reservations delivery, reduce franchisee costs and improve franchisee satisfaction by enhancing our website, choicehotels.com. We also design our marketing campaigns to drive reservation traffic directly to our proprietary channels to minimize the impact that third party reservation sites may have on the pricing of our inventory. In addition, we have introduced programs such as our Best Internet Rate Guarantee program which has greatly reduced the ability of the travel intermediaries to undercut the published rates at our hotels. We do selectively distribute our inventory to key third party travel intermediaries that we have established agreements with to drive additional business to our franchisees' hotels. These agreements typically offer our brands preferred placement on these third party sites at reduced transaction fees. We also continue to educate our individual franchisees about the unfavorable impact to their business of contracting with sites with which we do not have preferred agreements. We currently have agreements with many but not all major online third party booking sites.

Property Management Systems. Our proprietary property and yield management system, choiceADVANTAGE, is designed to help franchisees maximize profitability and compete more effectively by managing their room inventory, rates and reservations. choiceADVANTAGE synchronizes each hotel's inventory with our central reservation system, giving our reservation sales agents last room sell capabilities at every hotel. Our property management system also includes a revenue management feature that calculates and suggests optimum rates based on each hotel's past performance and projected occupancy. These tools are critical to business delivery and yield improvement as they facilitate a franchisees' ability to effectively manage hotel operations, determine appropriate rates, drive occupancy and participate in our marketing programs. As a cloud based solution, the choiceADVANTAGE system reduces each hotel's investment in on-site computer equipment typically resulting in a lower total cost of ownership for property management systems than traditional on-site solutions.

Quality Assurance Programs. Consistent quality standards are critical to the success of a hotel franchise. We have established quality standards for all of our franchised brands that cover housekeeping, maintenance, brand identification and minimum service offerings. We inspect properties for compliance with our quality standards when application is made for admission to the franchise system. The compliance of existing franchisees with quality standards is monitored through scheduled and unannounced quality assurance reviews conducted periodically at the property and through the use of guest surveys. Properties that fail to maintain a minimum score are reinspected on a more frequent basis until deficiencies are cured, or until such properties are terminated. To encourage compliance with quality standards, various brand-specific incentives and awards are used to reward franchisees that maintain consistent quality standards. We identify franchisees whose properties operate below minimum quality standards and assist them to comply with brand specifications. Franchisees who fail to improve on identified quality matters may be subject to consequences ranging from written warnings, the payment of quality re-inspection and guest satisfaction fees, attendance at mandatory training programs and ultimately to the termination of the franchise agreement. Actual consequences, if any, are determined in the Company's discretion on a case-by-case basis and may take into account a variety of factors apart from a franchisee's level of compliance with our quality standards and brand specifications.

Training. We maintain a training department that conducts mandatory and voluntary training programs for all franchisees and general managers. Regularly scheduled regional and national training meetings are also conducted for owners and general managers. We offer an interactive computer and mobile-based training system to train hotel employees real-time as well as at their own pace. Additional training is conducted through a variety of methods, including group instruction seminars and live on-line instructor-led programs.

Training is conducted by a variety of methods, including group instruction seminars and on-line programs. We have also developed an interactive computer-based training system that will train franchisees and general managers at their own pace.

Opening Services. We maintain an opening services department that ensures incoming hotels meet or exceed brand standards and are properly displayed in our various reservation distribution systems to ensure that each incoming hotel opens successfully. We also maintain a design and construction department to assist franchisees in refurbishing, renovating, or constructing their properties prior to or after joining the system. Department personnel assist franchisees in meeting our brand specifications by providing technical expertise and cost-savings suggestions.

21

Table of Contents

Competition

Competition among franchise lodging chains is intense in attracting potential franchisees, retaining existing franchisees and generating reservations for franchisees. Franchise contracts are typically long-term in nature, but most allow the hotel owner to opt-out of the agreement at mutually agreed upon anniversary dates.

We believe that hotel operators choose lodging franchisors based primarily on the value and quality of each franchisor's brand(s) and services and the extent to which affiliation with that franchisor may increase the franchisee's reservations and profits. We also believe that hotel operators select a franchisor in part based on the franchisor's reputation among other franchisees and the success of its existing franchisees.

Since our franchise system revenues are based on franchisees' gross room revenues, our prospects for growth are largely dependent upon the ability of our franchisees to compete in the lodging market, our ability to convert competitor franchises and independent hotels to our brands and the ability of existing and potential franchisees to obtain financing to construct new hotels.

The ability of a hotel to compete may be affected by a number of factors, including the location and quality of the property, the abilities of the franchisee, the number and quality of competing lodging facilities nearby, its affiliation with a recognized name brand and general regional and local economic conditions. We believe the effect of local economic conditions on our results is substantially reduced by our range of products and room rates and the geographic diversity of our franchised properties, which are open and operating in 50 states, the District of Columbia and over 30 countries and territories outside the United States.

We believe that our focus on core business strategies, combined with our financial strength and size, geographic diversity, scale and distribution will enable us to remain competitive.

Service Marks and Other Intellectual Property

The service marks Choice Hotels International, Comfort Inn, Comfort Suites, Quality, Clarion, Sleep Inn, Econo Lodge, Rodeway Inn, MainStay Suites, Cambria hotels & suites, Suburban Extended Stay Hotel, Ascend Hotel Collection, Choice Privileges, SkyTouch Technology and related marks and logos are material to our business. We, directly and through our franchisees, actively use these marks. All of the material marks are registered with the United States Patent and Trademark Office. In addition, we have registered certain of our marks with the appropriate governmental agencies in over 100 countries where we are doing business or anticipate doing business in the foreseeable future. We seek to protect our brands and marks throughout the world, although the strength of legal protection available varies from country to country. Depending on the jurisdiction, trademarks and other registered marks are valid as long as they are in use and/or their registrations are properly maintained and they have not been found to have become generic.

Seasonality

The hotel industry is seasonal in nature. For most hotels, demand is lower in November through February than during the remainder of the year. Our principal source of revenues is franchise fees based on the gross room revenues of our franchised properties. The Company's franchise fee revenues reflect the industry's seasonality and historically have been lower in the first and fourth quarters than in the second and third quarters.

Regulation

The Federal Trade Commission (the "FTC"), various states and certain other foreign jurisdictions (including Australia, France, Canada, and Mexico) regulate the sale of franchises. The FTC requires franchisors to make extensive disclosure to prospective franchisees but does not require registration. A number of states in which our franchisees operate require registration and disclosure in connection with franchise offers and sales. In addition, several states have "franchise relationship laws" that limit the ability of the franchisor to terminate franchise agreements or to withhold consent to the renewal or transfer of these agreements. While our franchising operations have not been materially adversely affected by such regulations, we cannot predict the effect of future regulation or legislation. Our franchisees are responsible for compliance with all laws and government regulations applicable to the hotels they own or operate. The lodging industry is subject to numerous federal, state and local government regulations, including those relating to the preparation and sale of food and beverage (such as health and liquor license laws), building and zoning requirements and laws governing employee relations, including minimum wage requirements, overtime, working conditions and work permit requirements.

Table of Contents

Impact of Inflation and Other External Factors

Franchise fees can be impacted by external factors including, in particular, the supply of hotel rooms within the lodging industry relative to the demand for rooms by travelers and inflation.

We expect to benefit in the form of increased franchise fees from future growth in consumer demand for hotel rooms as well as growth in the supply of hotel rooms, to the extent it does not result in excess lodging industry capacity.

However, a prolonged decline in demand for hotel rooms would negatively impact our business.

Although we believe that increases in the rate of inflation will generally result in comparable increases in hotel room rates, severe inflation could contribute to a slowing of the national economy. Such a slowdown could result in reduced travel by both business and leisure travelers, potentially resulting in less demand for hotel rooms, which could result in a reduction in room rates and fewer room reservations, negatively impacting our revenues. A weak economy could also reduce demand for new hotels, negatively impacting the franchise fees received by us.

Among other unpredictable external factors, which may negatively impact us, are wars, acts of terrorism, airline strikes, gasoline shortages, severe weather and the risks described below under the Item 1A. Risk Factors.

SkyTouch Technology

SkyTouch Technology™ ("SkyTouch") is a division of the Company that develops and markets cloud-based technology products to hoteliers not under franchise agreements with the Company to improve their efficiency and profitability. The SkyTouch Hotel OS™ solution is based on the Company's award-winning, proprietary technology platform, choiceADVANTAGE, that was first introduced over a decade ago to meet the needs of its franchisees. The SkyTouch Hotel OS solution offers many of the same functions of the choiceADVANTAGE property and rate management platform, including managing reservations, guest stays and rates on any device with an Internet connection as well as the ability to connect seamlessly with other systems used by chain and independent hotels. The system has been enhanced to add distribution management services, and offers central reservation system interfaces utilizing hotel technology next generation specifications for ease of deployment and partnership with other technology providers.

The SkyTouch platform also includes a mobile-native interface that offers fast and secure mobile functionality to the major elements of property management and housekeeping. The interface includes quick, mobile-friendly views of key operational data such as ADR, Occupancy, Availability for Tonight, helping improve management efficiency. Housekeeping functionality allows real-time, two-way communication between staff that helps improve the guest experience. Developed with a responsive design and an adaptable mobile support strategy, the interface is optimized as a true cloud-based application for smart phones and tablets, while still accessible from desktops.

SkyTouch also provides onsite and remote installation and training, and 24/7/365 phone support to our clients.

SkyTouch's online training includes simulation-based, highly interactive eLearning modules with the option to modify and create additional content to meet the needs of hoteliers.

The hotel property management system market is highly competitive and we compete on various bases, including product functionality, service capabilities, price, and geography. We compete with companies that have several hotel related software products, as well as companies that offer a single product or service aimed at a particular niche. In addition, our products and services compete with room reservation systems developed and marketed by major hotel chains for their corporate-owned operations and franchisees.

Employees

We employed approximately 1,331 people in our domestic operations as of February 17, 2015. None of our employees are represented by unions or covered by collective bargaining agreements. We consider our relations with our employees to be good.

Table of Contents

EXECUTIVE OFFICERS OF CHOICE HOTELS INTERNATIONAL, INC.

The name, age, title, present principal occupation, business address and other material occupations, positions, offices and employment of each of the executive officers of the Company as of December 31, 2014 are set forth below. The business address of each executive officer is 1 Choice Hotels Circle, Suite 400, Rockville, Maryland 20850.

Name	Age	Position
Stewart W. Bainum, Jr.	68	Chairman of the Board of Directors
Stephen P. Joyce	54	President and Chief Executive Officer
David L. White	46	Senior Vice President, Chief Financial Officer & Treasurer
Patrick S. Pacious	48	Chief Operating Officer
Simone Wu	49	Senior Vice President, General Counsel, Corporate Secretary & Chief Compliance Officer
David A. Pepper	47	Senior Vice President, Global Development
Patrick J. Cimerola	46	Senior Vice President, Human Resources and Administration
Scott E. Oaksmith	43	Controller

Stewart W. Bainum, Jr. Director from 1977 to 1996 and since 1997. Chairman of the Board of Choice Hotels International, Inc., from March 1987 to November 1996 and since October 1997; Director of the Board of Realty Investment Company, Inc., a real estate management and investment company, since December 2005 and Chairman from December 2005 through June 2009; Director of the Board of Sunburst Hospitality Corporation, a real estate developer, owner and operator, since November 1996 and Chairman from November 1996 through June 2009. He was a director of Manor Care, Inc., from September 1998 to September 2002, serving as Chairman from September 1998 until September 2001. From March 1987 to September 1998, he was Chairman and Chief Executive Officer of Manor Care, Inc. He served as President of Manor Care of America, Inc., and Chief Executive Officer of ManorCare Health Services, Inc., from March 1987 to September 1998, and as Vice Chairman of Manor Care of America, Inc., from June 1982 to March 1987.

Stephen P. Joyce. President & Chief Executive Officer since June 2008 and President & Chief Operating Officer from May 2008 until June 2008. Prior to joining the Company, he was employed by Marriott International as Executive Vice President, Global Development/Owner and Franchise Services from 2005 until 2008 and Executive Vice President, Owner and Franchise Services/North American Full Service Development from 2003 until 2005.

David L. White. Senior Vice President, Chief Financial Officer & Treasurer since December 2007. He was Chief Financial Officer & Treasurer from September 2006 to December 2007; Vice President, Finance & Controller of Choice from December 2002 to September 2006; and was Vice President, Financial/SEC Reporting from September 2002 to December 2002. He was Senior Manager, Ernst & Young, LLP from May 2002 to September 2002. He was employed by Arthur Andersen LLP as Senior Manager from May 1999 to May 2002, and manager from October 1998 to May 1999. He served as Assistant Controller for the energy marketing division of Statoil Energy, Inc. from May 1997 to September 1998.

Patrick S. Pacious. Chief Operating Officer effective January 1, 2014. He was Executive Vice President, Global Strategy & Operations from February 2011 through December 2013. He was Senior Vice President Corporate Strategy and Information Technology from August 2009 to February 2011. He was Senior Vice President, Corporate Development and Strategy from December 2007 to August 2009. He was Vice President, Corporate Development and Innovation from May 2006 to December 2007 and was Senior Director of Corporate Strategy from July 2005 to May 2006. Prior to joining the Company, he was employed by Bearingpoint Inc. as a Senior Manager from 2002 until 2005 and Arthur Andersen Business Consulting LLP as a Senior Manager from 1996 until 2002.

Simone Wu. Senior Vice President, General Counsel, Corporate Secretary & Chief Compliance Officer since joining the company in February 2012. Prior to joining the Company, she was employed by XO Communications and its affiliates as Executive Vice President, General Counsel and Secretary from 2011 until 2012, Senior Vice President, General Counsel and Secretary from 2006 to 2011, Vice President, the acting General Counsel and Secretary from 2005 to 2006, Vice President and Assistant General Counsel from 2004 until 2005, and Senior Corporate Counsel from 2001 until 2004. Before that she was Vice President of Legal and Business Affairs at LightSource Telecom, held

legal and business positions at MCI and AOL, and began her legal career in 1989 at Skadden, Arps, Slate, Meagher & Flom.

David A. Pepper. Senior Vice President, Global Development since October 2009. He was Senior Vice President, Franchise Development & Emerging Brands from July 2007 to October 2009. He was Senior Vice President and Division President Cambria Suites and Extended Stay Market Brands from January 2007 to July 2007 and was Senior Vice President,

Table of Contents

Franchise Growth and Performance of Choice from December 2005 until January 2007. He was Senior Vice President, Development of Choice from January 2005 until December 2005. He was Vice President, Franchise Sales from June 2002 until January 2005. He was Vice President, Franchise Sales with USFS in Atlanta, Georgia from 1996 through June 2002.

Patrick J. Cimerola. Senior Vice President, Human Resources and Administration since September 2009. He was Vice President of Human Resources from January 2003 to September 2009. He was Sr. Director of Human Resources from January 2002 to January 2003.

Scott E. Oaksmith. Controller of the Company since September 2006. He was Senior Director & Assistant Controller of Choice from February 2004 to September 2006. He was Director, Marketing and Reservations, Finance from October 2002 until February 2004. Prior to joining the Company, he was employed by American Express Tax & Business Services, Inc. from January 1994 to October 2002, last serving as Senior Manager from October 2000 to October 2002.

Item 1A. Risk Factors.

Choice Hotels International, Inc. and its subsidiaries are subject to various risks, which could have a negative effect on the Company and its financial condition. These risks could cause actual operating results to differ from those expressed in certain “forward looking statements” contained in this Form 10-K as well as in other Company communications. Before you invest in our securities you should carefully consider these risk factors together with all other information included in our publicly filed documents.

We are subject to the operating risks common in the lodging and franchising industries.

A significant portion of our revenue is derived from fees based on room revenues at hotels franchised under our brands. As such, our business is subject, directly or through our franchisees, to the following risks common in the lodging and franchising industry, among others:

- changes in the number of hotels operating under franchised brands;
- changes in the relative mix of franchised hotels in the various lodging industry price categories;
- changes in occupancy and room rates achieved by hotels;
- desirability of hotel geographic location;
- changes in general and local economic and market conditions, which can adversely affect the level of business and leisure travel, and therefore the demand for lodging and related services;
- level of consumer unemployment;
- increases in operating costs that may not be able to be offset by increases in room rates, such as through increases in minimum wage levels;
- increases in corporate-level operating costs resulting in lower operating margins;
- over-building in one or more sectors of the hotel industry and/or in one or more geographic regions, could lead to excess supply compared to demand, and to decreases in hotel occupancy and/or room rates;
- the availability and cost of capital to allow hotel owners and developers to build new hotels and fund investments;
- changes in travel patterns;
- travelers’ fears of exposure to contagious diseases or insect infestations in hotel rooms;
- changes in governmental regulations that influence or determine wages, benefits, prices or increase operating, maintenance or construction costs of our franchisees;
- changes by governmental agencies and within relevant legal systems of prevailing opinion and interpretation of new or existing rules, regulations and legal doctrine, particularly those limiting the liability of franchisors for employment and general liability claims involving franchisees;
- travel restrictions (whether security-related or otherwise) imposed by governmental authorities that have the effect of discouraging or limiting travel to and from certain jurisdictions;
- the costs and administrative burdens associated with compliance with applicable laws and regulations, including, among others, franchising, lending, privacy, marketing and sales, licensing, labor, climate change, employment and regulations applicable under the Office of Foreign Asset Control and the Foreign Corrupt Practices Act;
- the financial condition of franchisees and travel related companies;

franchisors' ability to develop and maintain positive relations with current and potential franchisees; and

- changes in exchange rates or sustained economic weakness in the United States (affecting domestic travel) and internationally could also unfavorably impact future results.

25

Table of Contents

Acquisition and development of new brands and markets.

From time-to-time, we consider acquisitions of new brands that complement our current domestic portfolio of brands as well as expansion of our brands in international markets. In many cases, we will be competing for these opportunities with third parties who may have substantially greater financial resources or different or lower acceptable return requirements than we do. There can be no assurance that we will be able to identify acquisition candidates, acceptable new markets or complete transactions on commercially reasonable terms or at all. If transactions are consummated or new markets entered, there can be no assurance that any anticipated benefits will actually be realized. Similarly, there can be no assurance that we will be able to obtain additional financing for acquisitions or investments, or that the ability to obtain such financing will not be restricted by the terms of our existing debt agreements.

We have recently developed and launched additional hotel brands, such as Cambria hotels and suites and Ascend Hotel Collection, and may develop and launch additional brands in the future. In addition, we plan to expand the distribution of existing brands in international markets. There can be no assurance regarding the level of acceptance of these brands in the development and consumer marketplaces, that costs incurred to develop the brands or expand in international markets (including advances for system services we provide) will be recovered or that the anticipated benefits from these new brands or markets will be realized.

We are subject to risks relating to events such as acts of God, terrorist activity, epidemics and war.

Our financial and operating performance may be adversely affected by events such as acts of God, including natural disasters and/or pandemics, epidemics, terrorist activities, political instability, civil unrest and acts of war affecting locations where we have a high concentration of franchisees and areas of the world from which our franchisees draw a large number of guests. Some types of losses, such as from terrorism and acts of war, may be either uninsurable or too expensive to justify insuring against. Should an uninsured loss or a loss in excess of insured limits occur, our results from operations and financial condition may be adversely affected.

We may not grow our franchise system or we may lose business by failing to compete effectively.

Our success and growth prospects depend on the strength and desirability of our brands. We believe that hotel operators choose lodging franchisors based primarily on the value and quality of each franchisor's brand and services, the extent to which affiliation with that franchisor may increase the hotel operator's reservations and profits, and the franchise fees charged. Demographic, economic or other changes in markets may adversely affect the desirability of our brands and, correspondingly, the number of hotels franchised under the Choice brands.

We compete with other lodging companies for franchisees. As a result, the terms of new franchise agreements may not be as favorable as our current franchise agreements. For example, competition may require us to reduce or change fee structures, make greater use of financial incentives such as loans and guarantees to acquire franchisees and/or reduce the level of property improvements required before operating under our brand names. This could potentially impact our margins negatively. New competition may also emerge using different business models with a lesser reliance on franchise fees. In addition, an excess supply of hotel rooms or unfavorable borrowing conditions may discourage potential franchisees from expanding or constructing new hotels, thereby limiting a source of growth of the franchise fees received by us.

In addition, each of our hotel brands competes with major hotel chains in national and international markets and with independent companies in regional markets. Our ability to remain competitive and to attract and retain business and leisure travelers depends on our success in distinguishing our products and services from those offered by our competitors. If we are unable to compete successfully in these areas, this could adversely affect our market share and our results of operations.

We may have disputes with the owners of our franchised hotels or their representative franchisee associations.

Our responsibilities under our franchise agreements may be subject to interpretation and may give rise to disagreements in some instances. Such disagreements may be more likely when hotel returns are depressed as a result of economic conditions. We seek to resolve any disagreements in order to develop and maintain positive relations with current and potential hotel owners as well as their representative franchisee associations. However, failure to resolve such disagreements could result in litigation with outcomes that may be adverse to our economic interests.

We may not achieve our objectives for growth in the number of franchised hotels.

The number of properties and rooms franchised under our brands significantly affects our results. There can be no assurance that we will be successful in achieving our objectives with respect to growing the number of franchised hotels in our system or that we will be able to attract qualified franchisees. The growth in the number of franchised hotels is subject to

26

Table of Contents

numerous risks, many of which are beyond the control of our franchisees or us. Among other risks, the following factors affect our ability to achieve growth in the number of franchised hotels:

- the ability of our franchisees to open and operate additional hotels profitably. Factors affecting the opening of new hotels, or the conversion of existing hotels to a Choice brand, include, among others:
 - the availability of hotel management, staff and other personnel;
 - the cost and availability of suitable hotel locations;
 - the availability and cost of capital to allow hotel owners and developers to fund investments;
 - cost effective and timely construction of hotels (which construction can be delayed due to, among other reasons, availability of financing, labor and materials availability, labor disputes, local zoning and licensing matters, and weather conditions); and
 - securing required governmental permits.
- our ability to continue to enhance our reservation, operational and service delivery systems to support additional franchisees in a timely, cost-effective manner;
- our formal impact policy, which offers franchisees protection from the opening of a same-brand property within a specified distance;
- the effectiveness and efficiency of our development organization;
- our failure to introduce new brands that gain market acceptance;
- our dependence on our independent franchisees' skills and access to financial resources necessary to open the desired number of hotels; and
- our ability to attract and retain qualified domestic and international franchisees.

In addition, we are currently planning to expand our international operations in many of the markets where we currently operate, as well as in selected new markets. This may require considerable management time as well as start-up expenses for market development before any significant revenues and earnings are generated. Operations in new foreign markets may achieve low margins or may be unprofitable, and expansion in existing markets may be affected by local economic and market conditions. Therefore, as we expand internationally, we may not experience the operating margins we expect, our results of operations may be negatively impacted and our stock price may decline.

Instability in the credit markets may impact the ability of our franchisees to expand or construct new locations. Our growth strategy relies on the ability of our franchisees to expand or open new franchises and to operate those franchises on a profitable basis. Delays or failures in opening new locations could materially and adversely affect our planned growth. During periods of credit market instability or when real estate values decline, credit and liquidity concerns increase as well as loan default rates. As a result, lenders will reduce their willingness to make new loans and tighten their credit requirements. Many of our franchisees depend on the availability of financing to refinance existing indebtedness, to expand and or renovate existing locations or construct and open new hotels. If our franchisees experience difficulty in obtaining adequate financing for these purposes, our growth strategy and franchise revenues may be adversely affected during these periods.

Development activities that involve our co-investment or financing and guaranty support for third parties may result in exposure to losses.

As a result of our program to make financial support available to developers in the form of loans, credit support, such as guarantees, and equity investments, we are subject to investment and credit risks that we would not otherwise be exposed to as a franchisor. In particular, when we make loans to franchisees, agree to provide loan guarantees for the benefit of franchisees, or make equity investments in franchisees, we are subject to all generally applicable credit and investment risks, such as (1) construction delays, cost overruns, or acts of God such as earthquakes, hurricanes, floods or fires that may increase overall project costs or result in project cancellations; (2) the possibility that the parties with which we have entered into a co-investment, financing or guaranty relations could become bankrupt or otherwise lack the financial resources to meet their obligations, or could have or develop business interests, policies or objectives that are inconsistent with ours; and (3) that the conditions within credit or capital markets may limit the ability of franchisees to raise additional debt or equity that may be required for completion of projects. In addition to general credit and capital markets risks, we face specific risks stemming from our ability to assess the existing and future

financial strength of the franchisee and its principals, the development/construction abilities of the franchisee, the expected performance of the hotel in light of the forecasted general, regional and market-specific economic climate, and the ability to negotiate for, value, and if necessary collect security for our loans or obligations. If we do not accurately assess these risks, our assumptions used to make these estimates prove inaccurate, or situations in the credit market or hospitality industry change in a manner we did not anticipate, our loans and investments may become impaired and/or we may be required to make payment under guarantees we have issued. In such instances, there is no

Table of Contents

assurance that we will be able to recover any or all of such impaired or paid amounts, in which case we will experience losses which could be material.

Development activities that involve our investment in real estate to stimulate the development of new brands may result in exposure to losses.

The Company is engaged in a program to identify real estate for potential developers to acquire and be utilized for Cambria hotels and suites development. The Company's intent is to identify potential development sites so that developers may acquire the site and commence construction of a Cambria hotels and suites. However, in certain circumstances, the Company has acquired, and continues to acquire, the real estate prior to identifying a potential developer for the project. As a result, we are subject to the investment risk that we would not otherwise be exposed to as a franchisor. In particular, we face specific risks stemming from (1) our ability to assess the fair market value of the real estate; (2) the location's suitability for development as a Cambria hotels and suites; (3) the availability of zoning or other local approvals needed for development; and (4) the availability and pricing of capital. Although we actively seek to minimize these risks prior to acquiring real estate, there is no assurance that we will be able to recover the costs of our investments in which case we will experience losses which could be material.

Investing through joint ventures decreases our ability to manage risk.

We have invested, and expect to continue to invest in real estate and other hospitality related joint ventures. Joint venturers often have shared control over the operation of the joint venture assets and therefore these investments may involve risks such as the possibility that the co-venturer in an investment might become bankrupt or not have the financial resources to meet its obligations, or have economic or business interests or goals that are inconsistent with our business interests or goals. Consequently, actions by a co-venturer might subject us to additional risk or result in actions that are inconsistent with our business interests or goals.

Under certain circumstances our franchisees may terminate our franchise contracts.

We franchise hotels to third parties pursuant to franchise agreements. These agreements may be terminated, renegotiated or expire but typically have an initial term of either ten or twenty years. These agreements also typically contain provisions permitting either party to terminate the franchise agreement after five, ten or fifteen years under certain circumstances and depending on the particular hotel brand that is licensed to the franchisee. While our franchise agreements provide for liquidated damages to be paid to us by franchisees whose agreements have been terminated as the result of a violation of the provisions of the agreement, these damage amounts are typically less than the fees we would have received if the terminated franchisee fulfilled its contractual obligations. In addition, there can be no assurance that we will be able to replace expired or terminated franchise agreements, or that the provisions of renegotiated or new agreements will be as favorable as the provisions that existed before such expiration, replacement or renegotiation. As a result, our revenues could be negatively impacted.

Deterioration in the general financial condition of our franchisees may adversely affect our results.

Our operating results are impacted by the ability of our franchisees to generate revenues at properties they franchise from us. An extended period of occupancy or room rate declines may adversely affect the operating results and financial condition of our franchisees. These negative operating conditions could result in the financial failure of our owners and result in a termination of the franchisee for non-payment of franchise fees or require the transfer of ownership of the franchise. In those instances where ownership is transferred, there can be no assurance that the new owners will choose to affiliate with our brands.

The hotel industry is highly competitive. Competition for hotel guests is based primarily on the level of service, quality of accommodations, convenience of locations and room rates. Our franchisees compete for guests with other hotel properties in their geographic markets. Some of their competitors may have substantially greater marketing and financial resources than our franchisees, and they may construct new facilities or improve their existing facilities, reduce their prices or expand and improve their marketing programs in ways that adversely affect our franchisees' operating results and financial condition. In addition, the ability of our franchisees to compete for guests directly impacts the desirability of our brands to current and prospective franchisees.

These factors, among others, could adversely affect the operating results and financial condition of our franchisees and result in declines in the number of franchised properties and/or franchise fees and other revenues derived from our

franchising business. In addition, at times, the Company provides financial support to our franchisees via notes and guarantees. Factors that may adversely affect the operating results and financial condition of these franchisees may result in the Company incurring losses related to this financial support.

Table of Contents

We may not be able to recover advances for system services that we may at certain times provide to our franchisees. The Company is obligated to use the system fees it collects from the current franchisees comprising its various hotel brands to provide system services, such as marketing and reservations services, appropriate to fulfill our obligations under the Company's franchise agreements. In discharging our obligation to provide sufficient and appropriate system services, the Company has the right to expend funds in an amount reasonably necessary to ensure the provision of such services, regardless of whether or not such amount is currently available to the Company for reimbursement. As a result, when expenditures for system services by the Company exceed available system fees, such excess is deferred and recorded as an asset in the Company's financial statements.

Under the terms of its franchise agreements, the Company has the contractually enforceable right to assess and collect from its current franchisees fees sufficient to pay for the system services the Company has provided or procured for the benefit of its franchisees, including fees to reimburse the Company for past services rendered. The Company's current franchisees are contractually obligated to pay any assessment the Company imposes on them to obtain reimbursement of any systems services advances regardless of whether the franchisees continue to generate gross room revenue and whether or not they joined the system following the deficit's occurrence. However, our ability to recover these advances may be adversely impacted by certain factors, including, among others, declines in the ability of our franchisees to generate revenues at properties they franchise from us. An extended period of occupancy or room rate declines or a decline in the number of hotel rooms in our franchise system could result in the generation of insufficient funds to recover system services advances as well as meet the ongoing system service needs of our franchisees.

Our franchisees may fail to make investments necessary to maintain or improve their properties, preference for our brands and our reputation could suffer and our franchise agreements with these franchisees could terminate.

Our franchised properties are governed by the terms of franchise agreements. Substantially all of these agreements require property owners to comply with standards that are essential to maintaining our brand integrity and reputation. We depend on our franchisees to comply with these requirements by maintaining and improving properties through investments, including investments in furniture, fixtures, amenities and personnel.

Franchisees may be unable to access capital or unwilling to spend available capital when necessary, even if required by the terms of our franchise agreements. If our franchisees fail to make investments necessary to maintain or improve the properties we franchise, our brand preference and reputation could suffer. In addition, if franchisees breach the terms of our agreements with them, we may elect to exercise our termination rights, which would eliminate our revenues from these properties and cause us to incur expenses related to terminating these relationships. These risks become more pronounced during economic downturns.

Increasing use of alternative internet reservation channels may decrease loyalty to our brands and our existing distribution channels or otherwise adversely affect us.

A significant percentage of hotel rooms are booked through internet travel intermediaries. If such bookings increase, these intermediaries may be able to obtain higher commissions, reduced room rates or other significant contract concessions from our franchisees or us. Moreover, some of these internet travel intermediaries are attempting to commoditize hotel rooms, by increasing the importance of price and general indicators of quality at the expense of brand identification. These intermediaries hope that consumers will eventually develop brand loyalties to their reservations systems rather than to our lodging brands and our existing distribution channels. If this happens, our business and profitability may be significantly harmed. We have established agreements with many key third party websites to limit transaction fees for hotels but we currently do not have agreements with several large internet travel intermediaries. We have also introduced a "Best Internet Rate Guarantee" to reduce the ability of intermediaries to undercut the published rates at our hotels. However, there can be no assurance that current margins or levels of utilization associated with either our online or contact center distribution channels will not decrease in the face of such competition. In addition, there can be no assurance that we will be able to renegotiate these agreements, upon their expiration, with terms as favorable as the provisions that existed before such expiration, replacement or renegotiation.

We are dependent upon our ability to attract and retain key officers and other highly qualified personnel.

Our future success and our ability to manage future growth depend in large part upon the efforts and skills of our senior management and our ability to attract and retain key officers and other highly qualified personnel. Competition

for such personnel is intense. There can be no assurance that we will continue to be successful in attracting and retaining qualified personnel. Accordingly, there can be no assurance that our senior management will be able to successfully execute and implement our growth and operating strategies.

Table of Contents

Our international operations are subject to political and monetary risks.

We have franchised properties open and operating in more than 35 countries and territories outside of the United States. We also have investments in foreign hotel franchisors. International operations generally are subject to greater economic, political and other risks than those affecting United States operations. In certain countries, these risks include the risk of war or civil unrest, political instability, expropriation and nationalization. Moreover, our international operations are subject to additional factors, including compliance with anti-corruption and other foreign laws and regulations. In addition, the laws of some international jurisdictions do not adequately protect our intellectual property and restrict the repatriation of non-United States earnings. Various international jurisdictions also have laws limiting the right and ability of non-United States entities to pay dividends and remit earnings to affiliated companies unless specified conditions have been met. In addition, revenues from international jurisdictions typically are earned in local currencies, which subjects us to risks associated with currency fluctuations. Currency devaluations and unfavorable changes in international monetary and tax policies could have a material adverse effect on our profitability and financing plans, as could other changes in the international regulatory climate and international economic conditions. We intend to continue to expand internationally, which would make the risks related to our international operations more significant over time.

We are subject to certain risks related to our indebtedness.

In connection with the Company's \$600 million special cash dividend paid in August 2012, we substantially increased our level of indebtedness compared to historical levels. While our debt levels have decreased since 2012, they still remain above historical levels, and there can be no assurance in the future that we will generate sufficient cash flow from operations or through asset sales to meet our debt service obligations. Our present indebtedness and future borrowings could have important adverse consequences to us, such as:

- making it more difficult for us to satisfy our obligations with respect to our existing indebtedness;
- limiting our ability to obtain additional financing;
- requiring a substantial portion of our cash flow to be used for principal and interest payments on the debt, thereby
- reducing our ability to use cash flow to fund working capital, capital expenditures, pay dividends and/or repurchase our common stock;
- limiting our ability to respond to changing business, industry and economic conditions and to withstand competitive pressures, which may affect our financial condition;
- causing us to incur higher interest expense in the event of increases in interest rates on our borrowings that have
- variable interest rates or in the event of refinancing existing debt at higher interest rates;
- limiting our ability to make investments or acquisitions;
- increasing our vulnerability to downturns in our business, our industry or the general economy and restricting us from making improvements or acquisitions or exploring business opportunities;
- placing us at a competitive disadvantage to competitors with less debt or greater resources; and
- subjecting us to financial and other restrictive covenants in our indebtedness the non-compliance with which could result in an event of default.

We cannot assure you that our business will generate sufficient cash flow from operations to enable us to pay our indebtedness or to fund our other liquidity needs. If we fail to generate sufficient cash flow from future operations to meet our debt service obligations, we may need to refinance all or a portion of our debt on or before maturity. We cannot assure you that we will be able to refinance any of our debt on attractive terms, commercially reasonable terms or at all, particularly because of our increased levels of debt and the debt incurrence restrictions imposed by the agreements governing our debt. Our future operating performance and our ability to service, extend or refinance our indebtedness will be subject to future economic conditions and to financial, business and other factors, many of which are beyond our control.

A portion of our borrowings are at variable rates of interest, and to the extent not protected with interest rate hedges, could expose us to market risk from adverse changes in interest rates. Unless we enter into interest rate hedges, if interest rates increase, our debt service obligations on the variable-rate indebtedness could increase significantly even though the amount borrowed would remain the same.

Anti-takeover provisions may prevent a change in control.

Our restated certificate of incorporation and the Delaware General Corporation Law each contain provisions that could have the effect of making it more difficult for a party to acquire, and may discourage a party from attempting to acquire, control of our Company without approval of our board of directors. These provisions together with the concentration of our share ownership could discourage tender offers or other bids for our common stock at a premium over market price.

30

Table of Contents

The concentration of share ownership may influence the outcome of certain matters.

The concentration of share ownership by our directors and affiliates allows them to substantially influence the outcome of matters requiring shareholder approval. As a result, acting together, they may be able to control or substantially influence the outcome of matters requiring approval by our shareholders, including the elections of directors and approval of significant corporate transactions, such as mergers, acquisitions and equity compensation plans.

Government franchise and tax regulation could impact our business.

The Federal Trade Commission (the "FTC"), various states and certain foreign jurisdictions where we market franchises regulate the sale of franchises. The FTC requires franchisors to make extensive disclosure to prospective franchisees but does not require registration. A number of states in which our franchisees operate require registration and disclosure in connection with franchise offers and sales. In addition, several states in which our franchisees operate have "franchise relationship laws" that limit the ability of the franchisor to terminate franchise agreements or to withhold consent to the renewal or transfer of these agreements. While our business has not been materially affected by such regulation, there can be no assurance that this will continue or that future regulation or legislation will not have such an effect.

The determination of our worldwide provision for income taxes and other tax liabilities requires estimation and significant judgment and there are many transactions and calculations where the ultimate tax determination is uncertain. Like many other multinational corporations, we are subject to tax in multiple United States and foreign tax jurisdictions and have structured our operations to reduce our effective tax rate. Our determination of our tax liability is always subject to audit and review by applicable domestic and foreign tax authorities. Any adverse outcome of any such audit or review could have a negative effect on our business, operating results and financial condition, and the ultimate tax outcome may differ from the amounts recorded in our financial statements and may materially affect our financial results in the period or periods for which such determination is made.

In addition, recent economic downturns have reduced tax revenues for United States federal and state governments and as a result proposals to increase taxes from corporate entities are being considered at various levels of government. Among the options have been a range of proposals included in the tax and budget policies recommended to the United States Congress by the United States Department of the Treasury to modify the federal tax rules related to the imposition of United States federal corporate income taxes for companies operating in multiple United States and foreign tax jurisdictions. If such proposals are enacted into law, this could increase our effective tax rate.

We are subject to certain risks related to litigation filed by or against us.

We cannot predict with certainty the cost of defense, the cost of prosecution or the ultimate outcome of litigation filed by or against us, including, remedies or damage awards. This litigation may involve, but is not limited to, actions or negligence by franchisees outside of our control. Our franchise agreements provide that we are not liable for the actions of our franchisees; however, there is no guarantee that we would be insulated from liability in all cases.

Moreover, we may be involved in matters such as class actions, administrative proceedings, employment and personal injury claims, and litigation with or involving our relationship with franchisees and the legal distinction between our franchisees and us for employment law or general liability purposes, for which the cost and other effects of defense, settlements or judgments may require us to make disclosures or take other actions that may affect perceptions of our brand and products and adversely affect our business results.

We and our franchisees are reliant upon technology and the disruption or malfunction in our information systems could adversely affect our business.

The lodging industry depends upon the use of sophisticated technology and systems including those utilized for reservations, property management, procurement, operation of our customer loyalty programs and our administrative systems. The operation of many of these systems is dependent upon third party data communication networks and software upgrades, maintenance and support. These technologies can be expected to require refinements and there is the risk that advanced new technologies will be introduced. There can be no assurance that as various systems and technologies become outdated or new technology is required we will be able to replace or introduce them as quickly as our competitors or within budgeted costs for such technology.

There can be no assurance that we will achieve the benefits that may have been anticipated from any new technology or system. Further, there can be no assurance that disruptions of the operation of these systems will not occur as a result of failures related to our internal or third party systems and support.

Information technology systems that we rely upon are also vulnerable to damage or interruption from:
• earthquakes, fires, floods and other natural disasters;

Table of Contents

power losses, computer systems failures, internet and telecommunications or data network failures, service provider negligence, improper operation by or supervision of employees, user error, physical and electronic losses of data and similar events; and

computer viruses, penetration by individuals seeking to disrupt operations or misappropriate information and other breaches of security.

The hospitality industry is under increasing attack by cyber-criminals in the United States and other jurisdictions in which we operate. These attacks can be deliberate attacks or unintentional events that could cause interruptions or delays in our business, loss of data, or render us unable to process reservations. Accordingly, an extended interruption in the ability of any system to function could significantly curtail, directly and indirectly, our ability to conduct our business and generate revenue.

We seek to minimize the impact of these attacks through various technologies, processes and practices designed to protect our networks, systems, computers and data from attack, damage or unauthorized access. However, there are no guarantees that our cyber-security practices will be sufficient to thwart all attacks. While we carry property and business operation interruption insurance, we may not be sufficiently compensated for all losses we may incur. These losses include not only a loss of revenues but also potential reputational damage to our brands and litigation, fines or regulatory action against us. Furthermore, the Company may also incur substantial remediation costs to repair system damage as well as satisfy liabilities for stolen assets or information that may further reduce our profits.

Failure to protect our trademarks and other intellectual property could impact our business.

We believe that our trademarks and other intellectual property are fundamental to our brands and our franchising business. We generate, maintain, license and enforce a substantial portfolio of trademarks and other intellectual property rights. We enforce our intellectual property rights to protect the value of our trademarks, our development activities, to protect our good name, to promote our brand name recognition, to enhance our competitiveness and to otherwise support our business goals and objectives. We rely on trademark laws to protect our proprietary rights. Monitoring the unauthorized use of our intellectual property is difficult. Litigation has been and may continue to be necessary to enforce our intellectual property rights or to determine the validity and scope of the proprietary rights of others. Litigation of this type could result in substantial costs and diversion of resources, may result in counterclaims or other claims against us and could significantly harm our results of operations. In addition, the laws of some foreign countries do not protect our proprietary rights to the same extent as do the laws of the United States. From time to time, we apply to have certain trademarks registered. There is no guarantee that such trademark registrations will be granted. We cannot assure you that all of the steps we have taken to protect our trademarks in the United States and foreign countries will be adequate to prevent imitation of our trademarks by others. The unauthorized reproduction of our trademarks could diminish the value of our brand and its market acceptance, competitive advantages or goodwill, which could adversely affect our business.

Failure to maintain the integrity of internal or customer data could result in faulty business decisions, damage of reputation and/or subject us to costs, fines or lawsuits.

Our business requires the collection and retention of large volumes of internal and customer data, including credit card numbers and other personally identifiable information of our employees and customers as such information is entered into, processed, summarized, and reported by the various information systems we use. The integrity and protection of that customer, employee, and company data is critical to us. Our customers have a high expectation that we will adequately protect their personal information, and the regulatory environment surrounding information security and privacy is increasingly demanding, both in the United States and in the international jurisdictions in which we operate. If the Company fails to maintain compliance with the various United States and international laws and regulations applicable to the protection of such data or with the Payment Card Industry ("PCI") data security standards, the Company's ability to process such data could be adversely impacted and expose the Company to fines, litigation or other expenses or sanctions.

Changes in privacy law could adversely affect our ability to market our products effectively.

We rely on a variety of direct marketing techniques, including telemarketing, email, marketing and postal mailings. Any future restrictions in laws such as Telemarketing Sales Rule, CANSPAM Act, and various United States state laws, or new federal laws regarding marketing and solicitation or international data protection laws that govern these

activities could adversely affect the continuing effectiveness of telemarketing, email and postal mailing techniques and could force changes in our marketing strategies. If this occurs, we may not be able to develop adequate alternative marketing strategies, which could impact the amount and timing of our revenues. We also obtain access to potential customers from travel service providers and other companies with whom we have substantial relationships and market to some individuals on these lists directly or by including our marketing message in the other company's marketing materials. If access to these lists was prohibited or otherwise restricted, our ability to develop new customers and introduce them to our products could be impaired.

Table of Contents

We depend on the skill, ability and decisions of third party operators.

The Company utilizes third party operators to provide significant franchise services, such as providing general reservation call center services, providing loyalty member call center support, providing data center co-location services, inspecting its franchisees and providing support for the use of its property management system. The failure of any third-party operator to make decisions, perform their services, discharge their obligations, deal with regulatory agencies, and comply with laws, rules and regulations could result in material adverse consequences to our business. Our investment in SkyTouch Technology and other new business lines is inherently risky, and could disrupt our core business.

We have invested in the development of our SkyTouch operating division - a hospitality-based software and technology developer and provider. Furthermore, we expect to continue to invest in SkyTouch, and may in the future invest in other new business strategies, products, services, and technologies.

Such endeavors generally involve significant risks and uncertainties, including distraction of management from our core franchising operations, unanticipated expenses, inadequate return of capital on our investments, and unidentified issues and risks not discovered in our development or analysis of such strategies and offerings. For SkyTouch, additional specific risks and uncertainties may include a limited history as a stand-alone operating business, the willingness of our potential competitors to enter into a business relationship with one of our operating divisions, the ability to develop and offer innovative products that appeal to hoteliers, continuing market acceptance of enterprise cloud computing, security threats to processed and stored data, intense competition in the technology industry, protection of intellectual property rights, and claims of infringement of the intellectual property of third parties. Because SkyTouch and similar new ventures are inherently risky, there can be no assurance that our investment in SkyTouch or similar new ventures will be successful. If we do not realize the financial or strategic goals that are contemplated at the time we commit to significant investments in support of these ventures, our reputation, financial condition, operating results and growth trajectory may be impacted.

We may identify material weaknesses in our internal control over financial reporting which could, if not remediated, result in a material misstatement of our financial statements.

Our management is responsible for establishing and maintaining adequate internal control over our financial reporting, as defined in Rule 13a-15(f) under the Securities Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. However, our management does not expect that our disclosure controls or our internal control over financial reporting will prevent all errors and fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Furthermore, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our principal executive offices are located at 1 Choice Hotels Circle, Suite 400, Rockville, Maryland 20850 and are leased from a third party.

We lease one office building and own a second office building in Phoenix, AZ, which houses our reservation and property systems' information technology operations and our SkyTouch division. The Company also leases office space for regional offices in Australia, United Kingdom, Canada, Germany, Italy, France, India, Mexico and Chevy Chase, MD.

Management believes that the Company's existing properties are sufficient to meet its present needs and does not anticipate any difficulty in securing additional or alternative space, as needed, on terms acceptable to the Company. In addition, we believe that all properties owned and leased are in generally good physical condition with the need for

only routine repairs and maintenance and periodic capital improvements.

Item 3. Legal Proceedings.

The Company is not a party to any litigation other than litigation in the ordinary course of business. The Company's management and legal counsel do not expect that the ultimate outcome of any of its currently ongoing legal proceedings, individually or collectively, will have a material adverse effect on the Company's financial position, results of operations, or cash flows.

Item 4. Mine Safety Disclosures.

None

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

The shares of the Company's common stock are listed and traded on the New York Stock Exchange. The following table sets forth information on the high and low sales prices of the Company's common stock and cash dividends declared per share for each quarterly period for the two most recently completed years.

QUARTERLY MARKET PRICE RANGE OF COMMON STOCK AND CASH DIVIDENDS DECLARED

Quarters Ended	Market Price Per Share		Cash Dividends Declared Per Share
	High	Low	
2013			
March 31,	\$42.32	\$34.00	\$0.185
June 30,	\$45.96	\$38.30	\$0.185
September 30,	\$44.04	\$37.94	\$0.185
December 31,	\$49.79	\$39.71	\$0.185
2014			
March 31,	\$50.37	\$44.06	\$0.185
June 30,	\$47.26	\$43.42	\$0.185
September 30,	\$54.83	\$46.29	\$0.185
December 31,	\$57.90	\$47.39	\$0.195

The Company currently maintains the payment of a quarterly dividend on its common shares outstanding, however, the declaration of future dividends are subject to the discretion of the board of directors. We expect that regular quarterly cash dividends will continue to be paid at a comparable rate in the future, subject to future business performance, economic conditions and changes in the current income tax regulations. In addition, the Company may not make dividend payments if there is an existing event of default under its senior secured credit facility or if the payment would create an event of default. Furthermore, if the Company's total leverage, as defined in the Company's senior secured credit facility, exceeds 4.50 to 1, the Company is generally restricted from paying aggregate dividends in excess of \$50 million during any calendar year.

As of February 17, 2015, there were 1,430 holders of record of the Company's common stock.

(1) The Company's share repurchase program was initially approved by the board of directors on June 25, 1998. The program has no fixed dollar amount or expiration date.

(2) During the year ended December 31, 2014, the Company redeemed 110,579 shares of common stock from employees to satisfy the option price and minimum tax-withholding requirements related to the exercising of options and vesting of performance vested restricted stock units and restricted stock grants. These redemptions were not part of the board repurchase authorization.

(3) In December 2014, the Company's board of directors authorized an increase under the Company's existing stock purchase program to 3 million shares of outstanding common stock.

Cash Dividends Declared Per Common Share	\$0.74	\$0.74	11.15	\$0.74	\$0.75

Matters that affect the comparability of our annual results are as follows:

Operating and net income in 2010 included termination benefits expense totaling \$1.7 million resulting from the termination of certain employees. In addition, the Company’s income tax expense included an adjustment of \$3.3 million to our deferred tax assets and the identification of \$1.6 million of additional federal income tax benefits, partially offset by an increase of \$1.6 million related to the identification of unrecognized tax positions. These items represented an increase in diluted EPS of \$0.04 per share.

Operating and net income in 2011 was reduced by termination benefits totaling \$4.4 million resulting from the termination of certain employees. Net income was further impacted by a \$1.8 million loss on assets held for sale resulting from the Company reducing the carrying amount of a parcel of land held for sale to its estimated fair value. In addition, the Company's income tax expense was reduced due to the identification of \$1.4 million of changes in unrecognized tax positions and the identification of \$2.8 million of additional federal tax benefits. Additionally, an adjustment to our current federal taxes payable of \$1.4 million reduced our effective tax rate. These items represented a net increase in diluted EPS of \$0.16 per share.

Operating and net income in 2012 was reduced by termination benefits of \$0.5 million resulting from the termination of certain employees and a \$1.8 million loss on the settlement of the Company's Supplemental Executive Retirement

Plan. The Company's 2012 net income was further reduced by the issuance of unsecured senior notes in the principal amount of \$400 million as well as a \$350 million senior secured credit facility to pay a special cash dividend totaling approximately \$600.7 million. The issuance of this debt resulted in interest

Table of Contents

expense increasing by approximately \$14.2 million and a loss on extinguishment of debt totaling \$0.5 million. Net income was favorably impacted by a \$4.5 million tax benefit related to a change in estimate of the tax benefit from foreign operations. These items represented a net decline in diluted EPS of \$0.12 per share.

Operating and net income in 2013 reflect an increased investment in the Company's SkyTouch division, a new division launched that develops and markets cloud-based technology products, totaling approximately \$6.6 million. Net income was further reduced by the issuance of unsecured senior notes in the principal amount of \$400 million as well as a \$350 million senior secured credit facility to pay a special cash dividend totaling approximately \$600.7 million in the second and third quarters of 2012. The issuance of this debt resulted in interest expense for the year ended December 31, 2013 increasing by approximately \$15.3 million over the prior year. These items represented a net decline in diluted EPS of \$0.24 per share.

Operating and net income in 2014 reflect a full year of operations for the Company's SkyTouch division which was publicly announced in 2013 as well as an increased investment in the sales and marketing capabilities of the division. As a result, the net operating loss of the division increased by approximately \$7.1 million. In addition, 2014 operating and net income were reduced by termination benefits of \$1.2 million resulting from the termination of certain employees. Discontinued operations for 2014 reflect the sale of the Company's three company-owned MainStay Suites hotels which resulted in a \$2.8 million pre-tax gain.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation.

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to help the reader understand Choice Hotels International, Inc. and its subsidiaries (together the "Company"). MD&A is provided as a supplement to—and should be read in conjunction with—our consolidated financial statements and the accompanying notes.

Overview

We are primarily a hotel franchisor with franchise agreements representing 6,379 hotels open and 603 hotels under construction, awaiting conversion or approved for development as of December 31, 2014, with 505,278 rooms and 47,951 rooms, respectively, in 50 states, the District of Columbia and more than 35 countries and territories outside the United States. Our brand names include Comfort Inn, Comfort Suites, Quality, Clarion, Ascend Hotel Collection, Sleep Inn, Econo Lodge, Rodeway Inn, MainStay Suites, Suburban Extended Stay Hotel and Cambria hotels & suites (collectively, the "Choice brands").

The Company's domestic franchising operations are conducted through direct franchising relationships while its international franchise operations are conducted through a combination of direct franchising and master franchising relationships. Master franchising relationships are governed by master franchising agreements which generally provide the master franchisee with the right to use our brands and sub-license the use of our brands in a specific geographic region, usually for a fee.

Our business philosophy has been to conduct direct franchising in those international markets where both franchising is an accepted business model and we believe our brands can achieve significant scale. We elect to enter into master franchise agreements in those markets where direct franchising is currently not a prevalent or viable business model. When entering into master franchising relationships, we strive to select partners that have professional hotel and asset management capabilities together with the financial capacity to invest in building the Choice brands in their respective markets. Master franchising relationships typically provide lower revenues to the Company as the master franchisees are responsible for managing certain necessary services (such as training, quality assurance, reservations and marketing) to support the franchised hotels in the master franchise area and therefore retain a larger percentage of the hotel franchise fees to cover their expenses. In certain circumstances, the Company has and may continue to make equity investments in our master franchisees.

As a result of our use of master franchising relationships and international market conditions, revenues from international franchising operations comprised 8% of our total revenues in both 2014 and 2013 while representing approximately 18% of our franchise system hotels open at December 31, 2014 and 2013, respectively. Therefore, our description of the franchise system is primarily focused on the domestic operations.

Our Company generates revenues, income and cash flows primarily from initial, relicensing and continuing royalty fees attributable to our franchise agreements. Revenues are also generated from qualified vendor arrangements and other sources. The hotel industry is seasonal in nature. For most hotels, demand is lower in November through February than during the remainder of the year. Our principal source of revenues is franchise fees based on the gross room revenues of our franchised properties. The Company's franchise fee revenues reflect the industry's seasonality and historically have been lower in the first and fourth quarters than in the second and third quarters.

Table of Contents

With a focus on hotel franchising instead of ownership, we benefit from the economies of scale inherent in the franchising business. The fee and cost structure of our business provides opportunities to improve operating results by increasing the number of franchised hotel rooms and effective royalty rates of our franchise contracts resulting in increased initial and relicensing fee revenue; ongoing royalty fees and procurement services revenues. In addition, our operating results can also be improved through our company-wide efforts related to improving property level performance. The Company currently estimates, based on its current domestic portfolio of hotels under franchise, that a 1% change in revenue per available room ("RevPAR") or rooms under franchise would increase or decrease royalty revenues by approximately \$2.8 million and a 1 basis point change in the Company's effective royalty rate would increase or decrease domestic royalties by approximately \$0.6 million. In addition to these revenues, we also collect marketing and reservation system fees to support centralized marketing and reservation activities for the franchise system. The Company's hotel franchising business currently has relatively low capital expenditure requirements. The principal factors that affect the Company's results are: the number and relative mix of franchised hotel rooms in the various hotel lodging price categories; growth in the number of hotel rooms under franchise; occupancy and room rates achieved by the hotels under franchise; the effective royalty rate achieved; the level of franchise sales and relicensing activity; and our ability to manage costs. The number of rooms at franchised properties and occupancy and room rates at those properties significantly affect the Company's results because our fees are based upon room revenues or the number of rooms at franchised hotels. The key industry standard for measuring hotel-operating performance is RevPAR, which is calculated by multiplying the percentage of occupied rooms by the average daily room rate realized. Our variable overhead costs associated with franchise system growth of our established brands have historically been less than incremental royalty fees generated from new franchises. Accordingly, continued growth of our franchise business should enable us to realize benefits from the operating leverage in place and improve operating results.

We are required by our franchise agreements to use the marketing and reservation system fees we collect for system-wide marketing and reservation activities. These expenditures, which include advertising costs and costs to maintain our central reservations and property management systems, help to enhance awareness and increase consumer preference for our brands. Greater awareness and preference promotes long-term growth in business delivery to our franchisees and increases the desirability of our brands to hotel owners and developers, which ultimately increases franchise fees earned by the Company.

Our Company articulates its mission as a commitment to our franchisees' profitability by providing our franchisees with hotel franchises that strive to generate the highest return on investment of any hotel franchise. We have developed an operating system dedicated to our franchisees' success that focuses on delivering guests to our franchised hotels and reducing costs for our hotel owners.

We believe that executing our strategic priorities creates value for our shareholders. Our Company focuses on two key goals:

Profitable Growth. Our success is dependent on improving the performance of our hotels, increasing our system size by selling additional hotel franchises, effective royalty rate improvement and maintaining a disciplined cost structure. We attempt to improve our franchisees' revenues and overall profitability by providing a variety of products and services designed to increase business delivery to and/or reduce operating and development costs for our franchisees. These products and services include national marketing campaigns, maintaining a guest loyalty program, a central reservation system, property and yield management programs and systems, quality assurance standards and qualified vendor relationships. We believe that healthy brands, which deliver a compelling return on investment for franchisees, will enable us to sell additional hotel franchises and raise royalty rates. We have established multiple brands that meet the needs of many types of guests, and can be developed at various price points and applied to both new and existing hotels. This ensures that we have brands suitable for creating growth in a variety of market conditions. Improving the performance of the hotels under franchise, growing the system through additional franchise sales and improving franchise agreement pricing while maintaining a disciplined cost structure are the keys to profitable growth.

Maximizing Financial Returns and Creating Value for Shareholders. Our capital allocation decisions, including capital structure and uses of capital, are intended to maximize our return on invested capital and create value for our shareholders. We believe our strong and predictable cash flows create a strong financial position that provides us a

competitive advantage. Currently, our business does not require significant capital to operate and grow. Therefore, we can maintain a capital structure that generates high financial returns and use our excess cash flow to increase returns to our shareholders primarily through share repurchases, dividends or investing in growth opportunities.

Historically, we have returned value to our shareholders in two primary ways: share repurchases and dividends. In 1998, we instituted a share repurchase program which has generated substantial value for our shareholders. During the year ended December 31, 2014, the Company purchased 1.4 million shares of common stock under the repurchase program at a total cost of \$72.6 million. These shares were purchased from family members of the Company's largest shareholder. Since the

Table of Contents

program's inception through December 31, 2014, we have repurchased 46.7 million shares (including 33.0 million prior to the two-for-one stock split effected in October 2005) of common stock at a total cost of \$1.2 billion. Considering the effect of the two-for-one stock split, the Company has repurchased 79.7 million shares at an average price of \$14.55 per share. At December 31, 2014, we had approximately 3.0 million shares remaining under the current share repurchase authorization. We currently believe that our cash flows from operations will support our ability to complete the current repurchase authorization. Upon completion of the current authorization, our board of directors will evaluate the advisability of additional share repurchases.

The Company commenced paying quarterly dividends in 2004 and in 2012 the Company elected to pay a special cash dividend totaling approximately \$600 million. The Company currently maintains the payment of a quarterly dividend on its common shares outstanding, however the declaration of future dividends are subject to the discretion of the board of directors. During the fourth quarter of 2014, the Company's board of directors announced a 5% increase to the quarterly dividend rate to \$0.195 per common share outstanding. During the year ended December 31, 2014, the Company paid cash dividends totaling approximately \$43.5 million. We expect to continue to pay dividends in the future, subject to declaration by our board of directors as well as future business performance, economic conditions, changes in income tax regulations and other factors. Based on our present dividend rate and outstanding share count, we expect that aggregate annual regular dividends for 2015 would be approximately \$44.7 million.

The Company also allocates capital to exploring growth opportunities in business areas that are adjacent or complementary to our core hotel franchising business, which leverage our core competencies and are additive to our franchising business model. The timing and amount of these investments are subject to market and other conditions and include the following:

Our board of directors authorized a program which permits us to offer financing, investment and guaranty support to qualified franchisees as well as allows us to acquire and resell real estate to incent franchise development for certain brands in strategic markets. Recent market conditions have resulted in an increase in opportunities to incentivize development under this program and as a result over the next several years we expect to deploy capital pursuant to this program opportunistically to promote growth of our emerging brands. The amount and timing of the investment in this program will be dependent on market and other conditions and we generally expect to recycle these investments within a five year period.

In March 2013, the Company announced the launch of a new division, SkyTouch Technology ("SkyTouch"), which develops and markets cloud-based technology products for the hotel industry. During 2014, the Company continued to invest and build this division by enhancing its product offerings and expanding the sales and marketing capabilities. In conjunction with the continued launch of this new line of business, the Company incurred selling, general and administrative ("SG&A") expenses of \$16.7 million and generated \$0.6 million in revenues during the year ended December 31, 2014. The Company expects to continue to incur SG&A in excess of revenues during 2015 as the divisions continues to expand its customer base.

Notwithstanding investments in SkyTouch and other alternative growth strategies, the Company expects to continue to return value to its shareholders through a combination of share repurchases and dividends, subject to the discretion of our board of directors as well as to business performance, economic conditions, changes in income tax regulations and other factors.

We believe these investments and strategic priorities, when properly implemented, will enhance our profitability, maximize our financial returns and continue to generate value for our shareholders. The ultimate measure of our success will be reflected in the items below.

Results of Operation: Royalty fees, operating income, net income and diluted earnings per share ("EPS") represent key measurements of these value drivers. These measurements are primarily driven by the operations of our franchise system and therefore our analysis of the Company's operations is primarily focused on the size, performance and potential growth of the franchise system as well as our variable overhead costs.

Refer to MD&A heading "Operations Review" for additional analysis of our results.

Liquidity and Capital Resources: Historically, the Company has generated significant cash flows from operations. Since our business does not currently require significant reinvestment of capital, we typically utilize cash in ways that management believes provide the greatest returns to our shareholders which include share repurchases and dividends.

However, we may determine to utilize cash for acquisitions and other investments in the future. We believe the Company's cash flow from operations and available financing capacity is sufficient to meet the expected future operating, investing and financing needs of the business.

Refer to MD&A heading "Liquidity and Capital Resources" for additional analysis.

Inflation: Inflation has been moderate in recent years and has not had a significant impact on our business.

Table of Contents

Non-GAAP Financial Statement Measurements

The Company utilizes certain measures which do not conform to generally accepted accounting principles accepted in the United States ("GAAP") when analyzing and discussing its results with the investment community. This information should not be considered as an alternative to any measure of performance as promulgated under GAAP. The Company's calculation of these measurements may be different from the calculations used by other companies and therefore comparability may be limited. We have included a reconciliation of these measures to the comparable GAAP measurement below as well as our reasons for reporting these non-GAAP measures.

Franchising Revenues: The Company utilizes franchising revenues, which exclude revenues from marketing and reservation system activities and the SkyTouch division, rather than total revenues when analyzing the performance of the business. Marketing and reservation activities are excluded from franchising revenues since the Company is contractually required by its franchise agreements to use the fees collected for marketing and reservation activities; as such, no income or loss to the Company is generated. Cumulative marketing and reservation system fees not expended are recorded as a liability in the Company's financial statements and are carried over to the next fiscal year and expended in accordance with the franchise agreements. Cumulative marketing and reservation expenditures incurred in excess of fees collected for marketing and reservation activities are deferred and recorded as an asset in the Company's financial statements and recovered in future periods. SkyTouch is a division of the Company that develops and markets cloud-based technology products, including inventory management, pricing and connectivity to third party channels, to hoteliers not under franchise agreements with the Company. SkyTouch operations are excluded from franchising revenue since they do not reflect the Company's core franchising business but are an adjacent, complimentary line of business. This non-GAAP measure is a commonly used measure of performance in our industry and facilitates comparisons between the Company and its competitors.

Calculation of Franchising Revenues

	Year Ended December 31, (in thousands)		
	2014	2013	2012
Total Revenues	\$757,970	\$724,650	\$692,728
Less Adjustments:			
Marketing and reservation system revenues	(412,619)	(407,633)	(389,678)
SkyTouch division	(600)	(33)	—
Franchising Revenues	\$344,751	\$316,984	\$303,050

Adjusted EBITDA: We also utilize adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA") to analyze our results which reflects earnings excluding the impact of interest expense, interest income, loss on extinguishment of debt, provision for income taxes, depreciation and amortization, other (gains) and losses and equity in net (income) loss of unconsolidated affiliates. We consider Adjusted EBITDA to be an indicator of operating performance because we use it to measure our ability to service debt, fund capital expenditures, and expand our business. We also use Adjusted EBITDA, as do analysts, lenders, investors and others, to evaluate companies because it excludes certain items that can vary widely across different industries or among companies within the same industry. For example, interest expense can be dependent on a company's capital structure, debt levels and credit ratings. Accordingly, the impact of interest expense on earnings can vary significantly among companies. The tax positions of companies can also vary because of their differing abilities to take advantage of tax benefits and because of the tax policies of the jurisdictions in which they operate. As a result, effective tax rates and provision for income taxes can vary considerably among companies. Adjusted EBITDA also excludes depreciation and amortization because companies utilize productive assets of different ages and use different methods of both acquiring and depreciating productive assets. These differences can result in considerable variability in the relative costs of productive assets and the depreciation and amortization expense among companies. Additionally, Adjusted EBITDA is also utilized as a performance indicator as it excludes equity in net (income) loss of unconsolidated affiliates and other (gains) and losses which primarily reflect the performance of investments held in the Company's non-qualified

retirement, savings and investment plans which can vary widely from period to period based on market conditions.

Calculation of Adjusted EBITDA

	Year Ended December 31,		
	(in thousands)		
	2014	2013	2012
Income from continuing operations, net of income taxes	\$121,473	\$113,350	\$121,278

Income from continuing operations, net of income taxes	121,473	113,350
Income from discontinued operations, net of income taxes	1,687	359
Net income	\$123,160	\$113,709

Results of Operations

The Company recorded income from continuing operations before income taxes of \$173.8 million for the year ended December 31, 2014, a \$15.1 million or 10% increase from the same period of the prior year. The increase in income from continuing operations before income taxes primarily reflects an \$18.3 million increase in operating income partially offset by a \$2.2 million decline in other (gains) losses and a \$1.3 million decline in equity in net (income) loss of affiliates. The decline in other gains and losses resulted from a \$0.4 million decline in the fair value of investments held in the Company's non-qualified benefit plans during the year ended December 31, 2014 compared to a \$1.6 million appreciation in fair value during 2013. The decline in equity in net (income) loss of affiliates in 2014 compared to 2013 primarily reflects pre-opening costs of several hotels owned by equity method joint ventures that commenced operations in the third and fourth quarters of 2014.

Operating income increased \$18.3 million as the Company's franchising revenues increased by \$27.8 million or 9% but were partially offset by a \$9.7 million or 9% increase in SG&A expenses. Adjusted EBITDA for the year ended December 31, 2014 increased \$18.6 million or 9% to \$223.9 million. The key drivers of these fluctuations are described in more detail below.

Franchising Revenues: Franchising revenues were \$344.8 million for the year ended December 31, 2014 compared to \$317.0 million for the year ended December 31, 2013, a 9% increase. The increase in franchising revenues is

primarily due to a

43

Table of Contents

\$19.7 million or 7% increase in royalty revenues, an \$0.8 million increase in initial franchise and relicensing fees, a \$3.2 million or 15% increase in procurement services fees and a \$4.1 million increase in other revenues.

Royalty Fees

Domestic royalty fees for the year ended December 31, 2014 increased \$19.9 million to \$263.0 million from \$243.1 million in 2013, an increase of 8%. The increase in domestic royalties is attributable to an 8.5% increase in domestic RevPAR partially offset by 0.5% decrease in the number of domestic franchised hotel rooms and a decline in the effective royalty rate. The Company's effective royalty rate of the domestic hotel system decreased from 4.33% to 4.28% from 2013 to 2014. System-wide RevPAR increased due to a 310 basis point increase in occupancy rates and a 3.0% increase in average daily rates.

A summary of the Company's domestic franchised hotels operating information for the years ending December 31, 2014 and 2013 is as follows:

	2014*			2013*			Change		
	Average Daily Rate	Occupancy	RevPAR	Average Daily Rate	Occupancy	RevPAR	Average Daily Rate	Occupancy	RevPAR
Comfort Inn	\$86.08	63.3	% \$54.50	\$83.27	60.1	% \$50.05	3.4	% 320	bps 8.9%

* Operating statistics exclude Cambria hotels & suites since the operating statistics are not representative of a stabilized brand, which the Company defines as having at least 25 units open and operating for a twelve month period. The number of domestic rooms on-line decreased to 398,661 rooms as of December 31, 2014 from 400,585 as of December 31, 2013 a decline of 1,924 rooms or 0.5%. The total number of domestic hotels on-line increased by 41 units or 0.8% to 5,221 as of December 31, 2014 from 5,180 as of December 31, 2013. The decline in the number of rooms in the domestic system primarily reflects the Company's multi-year strategy to rejuvenate the Comfort family of brands by terminating or repositioning to more suitable brands under-performing hotels that no longer meet the Comfort brand standards. While the total number of domestic units on-line continues to grow, the unit growth has been driven primarily by brands with lower average room counts than the Comfort brand.

Table of Contents

A summary of the domestic hotels and available rooms at December 31, 2014 and 2013 by brand is as follows:

	December 31, 2014		December 31, 2013		Variance					
	Hotels	Rooms	Hotels	Rooms	Hotels	%	Rooms	%		
Comfort Inn	1,240	95,862	1,302	101,673	(62)	(4.8)%	(5,811)	(5.7)%

Cambria	22	2,642	18	2,119	4	22.2 %	523	24.7 %		
Total Domestic Franchises	5,221	398,661	5,180	400,585	41	0.8 %	(1,924)	(0.5)%		

Domestic hotels open and operating increased by 41 hotels during the year ended December 31, 2014 compared to an increase of 97 domestic hotels open and operating during the year ended December 31, 2013. Gross domestic franchise additions decreased from 340 for the year ended December 31, 2013 to 302 for the same period in 2014.

New construction hotels represented 35 of the gross domestic additions during year ended December 31, 2014 compared to 34 hotels in the same period of the prior year. Gross domestic additions for conversion hotels during the year ended December 31, 2014 decreased by 39 from 306 hotels during the year ended December 31, 2013 to 267 hotels. Conversion hotel openings declined by 39 units primarily due to an 8% decline in the number of domestic conversion franchise agreements executed in 2014 compared to 2013. Conversion franchise agreements executed and opened during 2013 reflected the impact of a strategic marketing alliance entered into with a timeshare company that added 24 hotels to our Ascend Hotel Collection brand without similar impact in 2014. The remaining decline reflects the variability in the timing of hotel openings from period to period. The timing of conversion hotel openings are impacted by various factors including the complexity of the property improvement plans required to be completed prior to opening but typically open within three to four months after the execution of a franchise agreement. The Company expects the number of new franchise units that will open during 2015 to increase from 302 hotels in 2014 to 348 hotels. The projected increase in gross openings primarily reflects an additional 20 new construction openings as well as a 26 unit increase in conversion openings. The increase in new construction openings reflects the improving hotel development environment which has resulted in an increase in new construction executed franchise agreements since 2012. New construction hotels typically average 18 to 36 months to open after the franchise agreement is executed.

Net domestic franchise terminations increased by 18 units from 243 for the year ended December 31, 2013 to 261 for the year ended December 31, 2014. The increase in net terminations is primarily related to the removal of hotels for non-compliance with the Company's rules, regulations and standards as well as non-payment of franchise fees. In addition, terminations reflect an increase in franchisees electing not to renew their franchise agreements at the contractual window as franchisees may be unwilling or unable to meet the Company's increasing brand standards and property improvement plans. As industry supply growth continues to improve and return to historical levels, the Company will continue to execute its strategy to replace franchised hotels that do not meet our brand standards or are under-performing in their market.

International royalties decreased \$0.2 million from \$24.7 million in the year ended December 31, 2013 to \$24.5 million for the same period in 2014 despite a 1.1% increase in the number of rooms available primarily due to declining RevPAR performance in the various countries in which we operate and the negative impact of foreign currency fluctuations. International available rooms increased by 1,144 rooms to 106,617 as of December 31, 2014

from 105,473 as of December 31, 2013. The total number of international hotels on-line decreased by 2 units from 1,160 at December 31, 2013 to 1,158 at December 31, 2014.

Initial Franchise and Relicensing Fees

Domestic initial franchise fee revenue, included in the initial franchise and relicensing fees caption above, generated from executed franchise agreements decreased 3% to \$10.8 million for 2014 from \$11.0 million for 2013. Initial franchise fee revenue decreased despite a 7% increase in the number of new executed franchise agreements primarily due to the timing of

Table of Contents

revenue recognition related to agreements containing incentives. Revenues associated with agreements including incentives are deferred and recognized when the incentive criteria are met or the agreement is terminated, whichever comes first. At December 31, 2014, the Company had approximately \$7.1 million and \$3.5 million of deferred initial franchise fees and sales commissions, respectively, outstanding related to domestic franchise agreements executed with developer incentives which represents an increase from the \$4.5 million and \$2.3 million outstanding at December 31, 2013.

During 2014, the Company received 848 applications for new franchise agreements (not including relicensing of existing agreements) compared to 756 in 2013. These applications resulted in 566 new domestic franchise agreements executed during 2014 representing 44,467 rooms compared to 530 agreements representing 41,390 rooms executed in the same period of 2013. An application received does not always result in an executed franchise agreement during the year received or at all due to various factors, such as financing and agreement on all contractual terms. During 2014, 159 of the executed agreements were for new construction hotel franchises, representing 12,145 rooms, compared to 89 contracts, representing 6,330 rooms for 2013. The increase in new construction franchise agreements primarily reflects a gradual improvement of the lending environment for hotel construction and improving lodging fundamentals including an increasing RevPAR environment and low industry supply growth which are typically a catalyst for increased construction of new hotels. In addition, the termination of under performing Comfort hotels has opened up additional markets for the Comfort brand which resulted in 36 additional new construction franchise agreements in 2014 compared to 2013.

Conversion hotel franchise executed contracts totaled 407 representing 32,322 rooms for the year ended December 31, 2014 compared to 441 agreements representing 35,060 rooms for the year ended December 31, 2013. The decline in conversion hotel franchise agreements primarily reflects the impact of a strategic marketing alliance with a timeshare company in 2013, which resulted in the execution of 24 new franchise agreements for our Ascend Hotel Collection brand during the twelve months ended December 31, 2013 and a decline in Comfort conversion deals as the Company has emphasized adding new units through new construction franchise agreements rather than conversions of existing product.

The number of franchise applications received and the number of franchise agreements executed are dependent on the availability of hotel financing, cost of capital and the presence of an active real estate market. Improvements in these areas should serve as a positive catalyst in the number of franchise applications received and ultimately the number of franchise agreements executed.

A summary of executed domestic franchise agreements by brand for the years ended December 31, 2014 and 2013 is as follows:

	2014			2013			% Change			
	New Construction	Conversion	Total	New Construction	Conversion	Total	New Construction	Conversion	Total

Total Domestic System	159	407	566	89	441	530	79	% (8)% 7	%

Relicensing fees include fees charged to the new owners of a franchised property whenever an ownership change occurs and the property remains in the franchise system as well as fees required to renew expiring franchise contracts. Domestic relicensing contracts increased 21% from 258 during 2013 to 311 for the year ended December 31, 2014. Renewals of expired contracts decreased 19% from 31 for the year ended December 31, 2013 to 25 during the current year. As a result of the 16% increase in relicensing and renewal contracts and an increase in average fees per deal, domestic relicensing and renewal revenues increased 25% from \$6.4 million in 2013 to \$8.0 million for 2014. As of December 31, 2014, the Company had 510 franchised hotels with 39,243 rooms under construction, awaiting conversion or approved for development in its domestic system compared to 422 hotels and 31,786 rooms at December 31, 2013. The number of new construction franchised hotels in the Company's domestic pipeline increased 39% to 326 at

Table of Contents

December 31, 2014 from 235 at December 31, 2013. The growth in the number of new construction hotels in the domestic pipeline reflects the 79% increase in new construction franchise agreements executed in 2014. The number of conversion franchised hotels in the Company's domestic pipeline decreased by 3 units or 2% from December 31, 2013 to 184 hotels at December 31, 2014 primarily due to a 8% decline in conversion franchise agreements in 2014 compared to 2013 and the timing of hotel openings.

A summary of the domestic franchised hotels under construction, awaiting conversion or approved for development at December 31, 2014 and 2013 by brand is as follows:

	December 31, 2014			December 31, 2013			Variance		New Construction		Total			
	Conversion	New Construction	Total	Conversion	New Construction	Total	Units	%	Units	%	Units	%

	184	326	510	187	235	422	(3)	(2)%	91	39	%	88	21	%

The Company had an additional 93 franchised hotels with 8,708 rooms under construction, awaiting conversion or approved for development in its international system as of December 31, 2014 compared to 81 hotels and 7,171 rooms at December 31, 2013. While the Company's hotel pipeline provides a strong platform for growth, a hotel in the pipeline does not always result in an open and operating hotel due to various factors.

Procurement Services: Revenues increased \$3.2 million or 15% from \$20.7 million for the year ended December 31, 2013 to \$23.8 million for the year ended December 31, 2014. The increase in procurement services revenue primarily reflects the implementation of new brand programs as well as an increased volume of business transacted with existing and new qualified vendors and strategic alliance partners.

Other Income: Revenue increased \$4.7 million from the year ended December 31, 2013 to \$14.5 million for the year ended December 31, 2014. Other income related to franchising operations increased \$4.1 million primarily due to revenue generated from additional fees implemented in late 2013 and charged to franchisees for non-compliance with the Company's rules and regulations. Revenues from the Company's SkyTouch division increased \$0.6 million.

Selling, General and Administrative Expenses: The cost to operate the franchising business is reflected in SG&A on the consolidated statements of income. SG&A expenses were \$121.4 million for 2014, an increase of \$9.7 million from the 2013 total of \$111.7 million.

SG&A expenses for the year end December 31, 2014 and 2013 include approximately \$16.7 million and \$9.6 million, respectively related to the Company's SkyTouch division. The increase in expenses related to SkyTouch primarily reflects increased investment in the division's sales and marketing efforts and product development.

Excluding the SG&A expenses for the SkyTouch division, SG&A for the year end December 31, 2014 increased \$2.7 million or 3% from \$102.1 million in the prior year to \$104.8 million in the current year. The fluctuations in SG&A include a decrease in compensation expense of \$2.4 million on deferred compensation arrangements reflecting the decrease in the fair value of investments held in the Company's Non-Qualified and Executive Deferred Compensation Plan ("EDCP") retirement and savings plans compared to an increase in 2013. The decline in deferred compensation expenses were offset by general cost increases as well as higher variable management incentive and variable sales compensation expense.

Table of Contents

Marketing and Reservations: The Company's franchise agreements require the payment of franchise fees, which include marketing and reservation system fees. The fees, which are primarily based on a percentage of the franchisees' gross room revenues, are used exclusively by the Company for expenses associated with providing franchise services such as central reservation systems, national marketing and media advertising. The Company is contractually obligated to expend the marketing and reservation system fees it collects from franchisees in accordance with the franchise agreements; as such, no income or loss to the Company is generated.

Total marketing and reservation system revenues increased \$5.0 million from \$407.6 million for the year ended December 31, 2013 to \$412.6 million for the year ended December 31, 2014. Marketing and reservation system revenues recognized during the year ended December 31, 2014 were impacted by the deferral of approximately \$44.3 million of revenue as the Company billed marketing and reservation system fees in excess of cumulative expenses. The Company is contractually obligated by its franchise agreements to use the marketing and reservations system fees collected for marketing and reservation activities. As a result, cumulative marketing and reservation fees not expended are deferred and recorded as a liability in the Company's financial statements and carried over to the next fiscal year and expended in accordance with the franchise agreements. Conversely, cumulative marketing and reservation expenditures incurred in excess of fees billed for marketing and reservation activities are deferred and recorded as an asset in the Company's financial statements and recovered in future periods. During the year ended December 31, 2013, the Company's cumulative expenses exceeded cumulative marketing and reservation fees and therefore marketing and reservation fees collected in excess of current period expenses were utilized to reimburse cumulative advances. As a result, no revenues were deferred during 2013.

Excluding the impact of the revenue deferred during 2014, marketing and reservation revenues increased approximately 12%. The increase in revenues was primarily due to improved system fees resulting from RevPAR increases, increasing revenues from the Choice Privileges loyalty program resulting from the growth in program membership and new marketing and distribution program fees.

At December 31, 2013, the Company incurred marketing and reservation system expenses in excess of cumulative marketing and reservation system fees earned of \$5.8 million. At December 31, 2014, cumulative marketing and reservation system fees billed exceeded expenses by \$44.3 million with the excess reflected as an other long-term liability in the accompanying consolidated balance sheets.

Interest Expense: Interest expense decreased \$1.1 million from the prior year to \$41.5 million for the year ended December 31, 2014 due to lower outstanding borrowings on the Company's revolving credit facility, lower effective borrowing costs, and increased capitalization of interest related to our software development activities in 2014.

Income Taxes: The Company's effective income tax rates for continuing operations were 30.1% and 28.6%, for the years ended December 31, 2014 and 2013, respectively. The effective income tax rate for discontinued operations was 37.1% for the years ended December 31, 2014 and 2013. The effective income tax rates from continuing operations for the periods ended December 31, 2014 and 2013 were lower than the United States federal income tax rate of 35% due to the recurring impact of foreign operations, partially offset by state income taxes. Additionally, the effective income tax rates for the periods ended December 31, 2014 and 2013 were reduced by the settlement of unrecognized tax positions. The effective income tax rate for the period ended December 31, 2013 also included the impact of legislation retroactively extending the U.S. controlled foreign corporation look-through rules.

Discontinued Operations: In the first quarter of 2014, the Company's management approved a plan to dispose of three Company owned Mainstay Suites hotels. As a result, the Company has reported the operations related to these three hotels as discontinued operations in this Form 10-K. Net income from discontinued operations was \$1.7 million for the year ended December 31, 2014 compared to \$0.4 million in 2013. The increase in net income was primarily due to a \$2.8 million gain on the sale of the three hotels.

Interest income	(2,547)	(1,540)
Loss on extinguishment of debt	—	526
Other (gains) and losses	(1,780)	(1,989)
Equity in net income of affiliates	(634)	(212)
Other income and expenses, net	37,576	23,974
Income from continuing operations before income taxes	158,672	169,506
Income taxes	45,322	48,228
Income from continuing operations, net of income taxes	113,350	121,278
Income from discontinued operations, net of income taxes	359	335
Net income	\$113,709	\$121,613

The Company recorded income from continuing operations, net of income taxes, of \$113.4 million for the year ended December 31, 2013, a \$7.9 million or 7% decline from the year ended December 31, 2012. The decline in net income for the year ended December 31, 2013 primarily reflects a \$15.3 million increase in interest expense resulting from the issuance of debt in June and July of 2012 to finance the Company's \$600.7 million special dividend paid on August 23, 2012, partially offset by a \$2.8 million increase in operating income and a \$0.5 million loss on extinguishment of debt incurred in the prior year as a result of refinancing the Company's \$300 million revolving credit facility.

Operating income increased \$2.8 million as the Company's franchising revenues increased by \$13.9 million or 5% but were partially offset by a \$9.8 million or 10% increase in SG&A expenses and a \$1.4 million increase in depreciation and amortization expenses. Adjusted EBITDA for the year ended December 31, 2013 increased \$4.1 million or 2% to \$205.3 million. The key drivers of these fluctuations are described in more detail below.

Franchising Revenues: Franchising revenues were \$317.0 million for the year ended December 31, 2013 compared to \$303.1 million for the year ended December 31, 2012, a 5% increase. The increase in franchising revenues is primarily due to a \$6.1 million or 2% increase in royalty revenues, a \$4.5 million increase in initial franchise and relicensing fees and a \$2.7 million or 15% increase in procurement services fees.

Table of Contents

Royalty Fees

Domestic royalty fees for the year ended December 31, 2013 increased \$6.6 million to \$243.1 million from \$236.5 million in 2012, an increase of 3%. The increase in domestic royalties is attributable to a combination of factors including a 3.1% increase in domestic RevPAR and a 1.1% increase in the number of domestic franchised hotel rooms. The Company's effective royalty rate of the domestic hotel system for 2013 remained unchanged at 4.33% from 2012. System-wide RevPAR increased due to an 80 basis point increase in occupancy rates and a 1.5% increase in average daily rates.

A summary of the Company's domestic franchised hotels operating information for the years ending December 31, 2013 and 2012 is as follows:

	2013*			2012*			Change		
	Average Daily Rate	Occupancy	RevPAR	Average Daily Rate	Occupancy	RevPAR	Average Daily Rate	Occupancy	RevPAR
Comfort Inn	\$83.27	60.1 %	\$50.05	\$81.70	59.5 %	\$48.60	1.9	% 60	bps 3.0%

* Operating statistics exclude Cambria hotel & suites since the operating statistics are not representative of a stabilized brand, which the Company defines as having at least 25 units open and operating for a twelve month period.

The number of domestic rooms on-line increased to 400,585 rooms as of December 31, 2013 from 396,102 as of December 31, 2012 an increase of 4,483 rooms or 1.1%. The total number of domestic hotels on-line increased by 97 units or 1.9% to 5,180 as of December 31, 2013 from 5,083 as of December 31, 2012.

A summary of the domestic hotels and available rooms at December 31, 2013 and 2012 by brand is as follows:

	December 31, 2013		December 31, 2012		Variance					
	Hotels	Rooms	Hotels	Rooms	Hotels	%	Rooms	%

Domestic hotels open and operating increased by 97 hotels during the year ended December 31, 2013 compared to an increase of 82 domestic hotels open and operating during the year ended December 31, 2012. Gross domestic franchise additions increased from 308 for the year ended December 31, 2012 to 340 for the same period in 2013.

New construction

50

Table of Contents

hotels represented 34 of the gross domestic additions during year ended December 31, 2013 compared to 27 hotels in the same period of the prior year. The increase in new construction hotel openings reflect a slight improvement in the lending environment and willingness of developers to build new product in the hotel chain scales in which we operate. Gross domestic additions for conversion hotels during the year ended December 31, 2013 increased by 25 from 281 hotels during the year ended December 31, 2012 to 306 hotels. Conversion hotel openings increased 9% primarily due to a 14% increase in the number of domestic conversion franchise agreements executed in 2013 compared to 2012 partially offset by the timing of openings. The timing of conversion hotel openings are impacted by various factors including the complexity of the property improvement plans required to be completed prior to opening but typically open within three to four months after the execution of a franchise agreement. Although there has been an increase in the number of projected hotel openings, new construction and conversion openings continue to be impacted by the restrictive lending environment, retention efforts implemented by other hotel brand companies and increased competition for existing hotels seeking a new brand affiliation.

Net domestic franchise terminations increased by 17 units from 226 for the year ended December 31, 2012 to 243 for the year ended December 31, 2013. The increase in net terminations is primarily related to the removal of hotels for non-compliance with the Company's rules, regulations and standards as well as non-payment of franchise fees partially offset by increased retention efforts implemented by the Company to reduce the number of franchisees converting to competitor brands or independent status.

International royalties decreased \$0.4 million from \$25.1 million in the year ended December 31, 2012 to \$24.7 million for the same period in 2013 despite a 2.3% increase in the number of rooms available primarily due to RevPAR performance in the various countries in which we operate and the negative impact of foreign currency fluctuations. International available rooms increased by 2,322 rooms to 105,473 as of December 31, 2013 from 103,151 as of December 31, 2012. The total number of international hotels on-line totaled 1,160 at both December 31, 2013 and 2012.

Initial Franchise and Relicensing Fees

Domestic initial franchise fee revenue, included in the initial franchise and relicensing fees caption above, generated from executed franchise agreements increased 26% to \$11.0 million for 2013 from \$8.7 million for 2012. Initial franchise fee revenue increased due to a 12% increase in the number of new executed franchise agreements executed and an increase in the amount of deferred revenue recognized in 2013 related to franchise agreements containing developer incentives that were executed in prior years. Revenues associated with agreements including incentives are deferred and recognized when the incentive criteria are met or the agreement is terminated, whichever comes first. At December 31, 2013, the Company had approximately \$4.5 million and \$2.3 million of deferred initial franchise fees and sales commissions, respectively, outstanding related to domestic franchise agreements executed with developer incentives.

During 2013, the Company received 756 applications for new franchise agreements (not including relicensing of existing agreements) compared to 750 in 2012. These applications resulted in 530 new domestic franchise agreements executed during 2013 representing 41,390 rooms compared to 473 agreements representing 36,105 rooms executed in the same period of 2012. An application received does not always result in an executed franchise agreement during the year received or at all due to various factors, such as financing and agreement on all contractual terms. During 2013, 89 of the executed agreements were for new construction hotel franchises, representing 6,330 rooms, compared to 86 contracts, representing 6,414 rooms for 2012. The increase in new construction franchise agreements primarily reflects a gradual improvement of the lending environment for hotel construction and improving lodging fundamentals including an increasing RevPAR environment and low industry supply growth which are typically a catalyst for increased construction of new hotels.

Conversion hotel franchise executed contracts totaled 441 representing 35,060 rooms for the year ended December 31, 2013 compared to 387 agreements representing 29,691 rooms for the year ended December 31, 2012. Conversion hotel franchise agreements included large multi-unit transactions in both 2012 and 2013. During the year ended December 31, 2013, the Company executed 24 Ascend Hotel Collection franchise agreements in conjunction with a strategic alliance entered into with BlueGreen Vacation Resorts. Conversion franchise results for the year ended December 31, 2012 included 46 hotels previously operated under the Jameson brand which were converted to the

Company's Comfort (2 hotels), Quality Inn (42 hotels) and Econo Lodge (2 hotels) brands. Excluding these multi-unit transactions, conversion franchise sales increased by 76 contracts or 22% primarily due to increased franchise sales for the Company's Comfort, Econo Lodge and Ascend Hotel Collection brands.

The number of franchise applications received and the number of franchise agreements executed are dependent on the availability of hotel financing, cost of capital and the presence of an active real estate market. Improvements in these areas should serve as a positive catalyst in the number of franchise applications received and ultimately the number of franchise agreements executed.

Table of Contents

A summary of executed domestic franchise agreements by brand for the years ended December 31, 2013 and 2012 is as follows:

	2013			2012			% Change					
	New Construction	Conversion	Total	New Construction	Conversion	Total	New Construction	Conversion	Total	New Construction	Conversion	Total

Cambria	5	—	5	7	—	7	(29))%	NM		(29))%
Total Domestic System	89	441	530	86	387	473	3	%	14	%	12	%

Relicensing fees include fees charged to the new owners of a franchised property whenever an ownership change occurs and the property remains in the franchise system as well as fees required to renew expiring franchise contracts. Domestic relicensing contracts increased 19% from 216 during 2012 to 258 for the year ended December 31, 2013. Renewals of expired contracts increased 48% from 21 for the year ended December 31, 2012 to 31 during 2013. As a result of the 22% increase in relicensing and renewal contracts and an increase in average fees per deal, domestic relicensing and renewal revenues increased 29% from \$5.0 million in 2012 to \$6.4 million for 2013.

As of December 31, 2013, the Company had 422 franchised hotels with 31,786 rooms under construction, awaiting conversion or approved for development in its domestic system as compared to 394 hotels and 31,118 rooms at December 31, 2012. The number of new construction franchised hotels in the Company's domestic pipeline declined 2% to 235 at December 31, 2013 from 240 at December 31, 2012. The growth in the number of new construction hotels in the domestic pipeline continues to be negatively impacted by the limited availability of hotel construction financing. As a result, the ability of new and existing projects to obtain financing and commence construction has been significantly impacted and has resulted in the execution of fewer franchise agreements for new construction hotels than historically achieved. The number of conversion franchised hotels in the Company's domestic pipeline increased by 33 units or 21% from December 31, 2012 to 187 hotels at December 31, 2013 primarily due to the 14% increase in conversion franchise agreements achieved in 2012 compared to 2013 and the timing of hotel openings. A summary of the domestic franchised hotels under construction, awaiting conversion or approved for development at December 31, 2013 and 2012 by brand is as follows:

	December 31, 2013			December 31, 2012			Variance		New Construction		Total				
	Conversion	New Construction	Total	Conversion	New Construction	Total	Units	%	Units	%	Units	%

Table of Contents

The Company had an additional 81 franchised hotels with 7,171 rooms under construction, awaiting conversion or approved for development in its international system as of December 31, 2013 compared to 88 hotels and 7,851 rooms at December 31, 2012. While the Company's hotel pipeline provides a strong platform for growth, a hotel in the pipeline does not always result in an open and operating hotel due to various factors.

Procurement Services: Revenues increased \$2.7 million or 15% from \$18.0 million for the year ended December 31, 2012 to \$20.7 million for the year ended December 31, 2013. The increase in procurement services revenue primarily reflects the implementation of new brand programs as well as an increased volume of business transacted with existing and new qualified vendors and strategic alliance partners.

Selling, General and Administrative Expenses: The cost to operate the franchising business is reflected in SG&A on the consolidated statements of income. SG&A expenses were \$111.7 million for 2013, an increase of \$9.8 million from the 2012 total of \$101.9 million.

SG&A expenses for the year end December 31, 2013 and 2012 include approximately \$9.6 million and \$3.4 million, respectively related to the Company's new division, SkyTouch. SkyTouch is a division of the Company that develops and markets cloud-based technology products to hoteliers not under franchise agreements with the Company. The new division was announced to the public in March 2013 and the increase in expenses primarily relate to business development, sales and marketing and product development.

Excluding the SG&A expenses for the SkyTouch division, SG&A for the year end December 31, 2013 increased \$3.6 million or 4% from \$98.5 million in 2012 to \$102.1 million in 2013. The fluctuations in SG&A include a \$1.3 million increase in occupancy costs related to the relocation of the Company's corporate headquarters and a \$2.1 million increase in variable franchise sales compensation and procurement services expenses which increased due to a 26% and 15% increase in initial franchise and procurement services revenues, respectively. In addition, compensation expense recognized on deferred compensation arrangements increased \$1.3 million. The increase in compensation expense reflects the increase in the fair value of investments held in the Company's Non-Qualified and Executive Deferred Compensation Plan ("EDCP") retirement and savings plans. The increase in deferred compensation expenses are partially offset by investment gains recorded in other gains and losses. These increases in the current year SG&A expenses were partially offset by a loss on settlement of the Company's pension plan totaling \$1.8 million recognized during the year ended December 31, 2012 resulting from the recognition of previously unrecognized actuarial losses which had been recorded as a component of the Company's accumulated other comprehensive loss on the Company's consolidated balance sheets. In addition, expenses declined by \$3.3 million resulting from lower management incentive plan compensation earned based on Company earnings per share performance.

Depreciation and Amortization: Expenses increased \$1.4 million from \$7.7 million for the year ended December 31, 2012 to \$9.1 million for the year ended December 31, 2013. The increase in depreciation and amortization expenses primarily reflects additional capital expenditures incurred in conjunction with the Company's relocation of its corporate headquarters in April 2013 as well as an increase in amortization related to the issuance of forgivable notes receivable in conjunction with brand and development programs.

Marketing and Reservations: The Company's franchise agreements require the payment of franchise fees, which include marketing and reservation system fees. The fees, which are primarily based on a percentage of the franchisees' gross room revenues, are used exclusively by the Company for expenses associated with providing franchise services such as central reservation systems, national marketing and media advertising. The Company is contractually obligated to expend the marketing and reservation system fees it collects from franchisees in accordance with the franchise agreements; as such, no income or loss to the Company is generated.

Total marketing and reservation system revenues were \$407.6 million and \$389.7 million for the years ended December 31, 2013 and 2012, respectively. The increase in revenues was primarily due to improved system fees resulting from system growth and RevPAR increases as well as increased revenues from the Choice Privileges loyalty program resulting from the growth in program membership. Depreciation and amortization attributable to marketing and reservation activities was \$16.0 million and \$14.5 million for the years ended December 31, 2013 and 2012, respectively. Interest expense attributable to reservation activities was \$3.7 million and \$4.0 million for the years ended December 31, 2013 and 2012, respectively.

As of December 31, 2013 and 2012, the Company's balance sheets include deferred costs of \$5.8 million and \$29.5 million, respectively resulting from cumulative marketing and reservation expenses incurred in excess of cumulative system fee revenues earned. During the year ended December 31, 2013, the Company collected \$23.7 million of marketing and reservation system revenue in excess of expense incurred compared to \$12.5 million for the year ended December 31, 2012. The fees collected in excess of expenses incurred were utilized to reimburse the Company for a portion of the outstanding cumulative advances for marketing and reservation expenses. This resulted in expense recognition of an equivalent amount of previously

Table of Contents

unrecognized costs. The increase in excess fees collected in 2013 compared to 2012 primarily reflects increased revenues related to growth in the number of units, RevPAR in the franchise system and the size of the Company's loyalty program.

The decline in cumulative advances for marketing and reservation activities since December 31, 2012 reflects the Company's strategy to recover prior year advances for marketing and reservation activities in future periods. Costs incurred in excess of fees collected are deferred and recorded as an asset in the financial statements as the Company has the contractual authority to recover the deficits incurred related to marketing and reservation activities from the franchisees in the system at any given point in time. The Company's current franchisees are contractually obligated to pay any assessment the Company imposes on its franchisees to obtain reimbursement of such deficit regardless of whether those constituents continue to generate gross room revenue and whether or not they joined the system following the deficit's occurrence. The Company expects to recover the deferred costs over a period of time by expending fewer amounts on marketing and reservation activities than marketing and reservation system fees collected, depending on the marketing and reservation needs of the system. Conversely, cumulative marketing and reservation system fees not expended are recorded as a liability in the financial statements and are carried over to the next fiscal year and expended in accordance with the franchise agreements.

Interest Expense: Interest expense increased \$15.3 million from the prior year to \$42.5 million for the year ended December 31, 2013 due to the issuance of the Company's \$400 million senior notes due in 2022 with an effective rate of 5.94% on June 27, 2012 as well as the \$350 million senior secured credit facility entered into by the Company on July 25, 2012. The Company utilized the proceeds from these debt issuances to pay a special cash dividend on August 23, 2012 totaling approximately \$600.7 million to common stockholders.

Loss on Extinguishment of Debt: In conjunction with the refinancing of the Company's \$300 million revolving credit facility, which was scheduled to mature in February 2016, the Company recognized a \$0.5 million loss on extinguishment of debt during the year ended December 31, 2012.

Other Gains and Losses: Other gains and losses decreased \$0.2 million from a gain of \$2.0 million in 2012 to a gain of \$1.8 million in 2013 primarily due to the fluctuations in the fair value of investments held in the Company's non-qualified employee benefit plans.

As discussed in the accompanying critical accounting policies, the Company sponsors two non-qualified retirement and savings plans: the Non-Qualified Plan and the EDCP plan. The fair value of the Non-Qualified Plan investments increased \$1.3 million during 2013 compared to an appreciation of \$0.8 million in the fair value during 2012. The fair value of the Company's investments held in the EDCP plan increased \$0.3 million during the year ended December 31, 2013 compared to an appreciation in fair value of \$1.2 million in 2012.

The Company accounts for the EDCP Plan and Non-Qualified Plan in accordance with accounting for deferred compensation arrangements when investments are held in a rabbi trust and invested. Therefore, the Company also recognizes compensation expense or benefits in SG&A related to changes in the fair value of investments held in the Non-Qualified Plan and a portion of the investments held in the EDCP Plan, excluding investments in the Company's stock. As a result, during the year ended December 31, 2013 and 2012, the Company's SG&A expense was increased by \$2.2 million and \$1.0 million respectively, due to the change in fair value of these investments.

Income Taxes: In 2013 and 2012, the effective income tax rates for continuing operations were 28.6% and 28.5%, respectively. The effective income tax rate for discontinued operations was 37.1% for the periods ended December 31, 2013 and 2012. The effective income tax rates from continuing operations for the years ended December 31, 2013 and 2012 were lower than the United States federal income tax rate of 35% due to the recurring impact of foreign operations, partially offset by state income taxes. Additionally, the effective income tax rates for the years ended December 31, 2013 and 2012 reflect adjustments to our federal and foreign accruals. The effective income tax rate for the year ended December 31, 2013 was further reduced by the settlement of unrecognized tax positions and legislation retroactively extending the U.S. controlled foreign corporation look-through rules. The effective income tax rate for the year ended December 31, 2012 also includes a \$4.5 million benefit related to a change in estimate of the benefit from foreign operations.

Discontinued Operations: In the first quarter of 2014, the Company's management approved a plan to dispose of three Company owned Mainstay Suites hotels. As a result, the Company has reported the operations related to these three

hotels as discontinued operations in this Form 10-K.

Liquidity and Capital Resources

Operating Activities

Net cash flows provided by operating activities were \$183.9 million for the year ended December 31, 2014 compared to \$153.9 million for the same period of 2013. Cash flow from operating activities increased primarily due to an increase in operating income, a \$27.2 million improvement in cash flows from marketing and reservation activities partially offset by a

54

Table of Contents

\$4.6 million increase in net disbursements to franchisees for property improvements and other purposes utilizing forgivable notes receivable.

Net operating cash provided by marketing and reservation activities totaled \$70.2 million for the year ended December 31, 2014 compared to \$43.0 million during the year ended December 31, 2013. The improvement in cash flows from marketing and reservation activities primarily reflects an improvement in marketing and reservation system fees resulting from RevPAR performance, improved financial performance of the Company's loyalty programs and new advertising and distribution program fees which have increased at a faster pace than expenses.

In conjunction with brand and development programs, the Company provides financing to franchisees for property improvements and other purposes in the form of forgivable notes receivable. If the franchisee remains in the system in good standing over the term of the promissory note, the Company forgives the outstanding principal balance and related interest. Since these forgivable notes are predominantly forgiven ratably over the term of the promissory note rather than repaid, the Company classifies the related issuance and collections of these notes as operating activities. During the years ended December 31, 2014, 2013 and 2012, the Company's net advances for these purposes totaled \$12.9 million, \$8.3 million and \$10.9 million, respectively. The timing and amount of these cash flows is dependent on various factors including the implementation of various development and brand incentive programs, the level of franchise sales and the timing of hotel openings. At December 31, 2014, the Company had commitments to extend an additional \$42.5 million for these purposes provided certain conditions are met by its franchisees, of which \$22.5 million is expected to be advanced in the next twelve months.

Investing Activities

Cash utilized in investing activities totaled \$17.6 million, \$29.4 million and \$47.1 million for the years ended December 31, 2014, 2013 and 2012, respectively. The decline in cash utilized for investing activities from 2013 to 2014 primarily reflects the following items:

During the years ended December 31, 2014, 2013 and 2012, capital expenditures totaled \$20.9 million, \$33.4 million and \$15.4 million, respectively. The decline in capital expenditures from 2013 primarily reflects tenant improvements related to the relocation of the Company's corporate headquarters and computer equipment purchases made in conjunction with the relocation of the Company's technology data center incurred during 2013.

During the year ended December 31, 2014, the Company realized proceeds from the sale of assets totaling \$15.6 million related to the sale of three company owned MainStay Suites hotels, a facility previously utilized as a call center and the sale of a parcel of land related to the development of a new Cambria Suites hotel.

During the year ended December 31, 2014, 2013 and 2012, the Company invested \$17.8 million, \$5.7 million and \$20.3 million in joint ventures accounted for under the equity method of accounting. The Company's investment in these joint ventures primarily pertain to ventures that either support the Company's efforts to increase business delivery to its franchisees or promote growth of our emerging brands.

During the year ended December 31, 2014, 2013 and 2012, the Company sold investments totaling \$1.0 million, \$4.2 million and \$11.2 million, respectively, and utilized the proceeds to distribute participant deferred compensation balances from the Company's non-qualified retirement plans. The decline in proceeds from the sale of investments primarily reflects the timing of employee terminations and their deferred compensation distribution elections.

The Company provides financing to franchisees for hotel development efforts and other purposes in the form of mezzanine and other notes receivable. These loans bear interest and are expected to be repaid in accordance with the terms of the loan agreements. During the years ended December 31, 2014, 2013 and 2012, the Company advanced \$3.3 million, \$1.1 million and \$23.7 million for these purposes, respectively. In addition, the Company collected \$11.3 million, \$9.7 million and \$3.3 million of these advances during the years ended December 31, 2014, 2013 and 2012, respectively. At December 31, 2014, the Company had commitments to extend an additional \$2.1 million for these purposes within the next twelve months provided certain conditions are met by its franchisees.

Our board of directors authorized a program which permits us to offer financing, investment and guaranty support to qualified franchisees as well as allows us to acquire and resell real estate to incent franchise development for certain brands in strategic markets. Over the next several years, we expect to continue to deploy capital opportunistically pursuant to this program to promote growth of our emerging brands and we generally expect to recycle these investments within a five year period. However, the amount and timing of the investment in this program will be

dependent on market and other conditions.

55

Table of Contents

Financing Activities

Financing cash flows relate primarily to the Company's borrowings, treasury stock purchases and dividends.

Debt

Senior Unsecured Notes due 2022

On June 27, 2012 the Company issued unsecured notes with a principal amount of \$400 million (the "2012 Senior Notes") at par, bearing a coupon of 5.75% with an effective rate of 6.0%. The 2012 Senior Notes will mature on July 1, 2022, with interest to be paid semi-annually on January 1st and July 1st. The Company utilized the net proceeds of this offering, after deducting underwriting discounts and commissions and other offering expenses, together with borrowings under the Company's senior credit facility, to pay the special cash dividend totaling approximately \$600.7 million paid to stockholders on August 23, 2012. The Company's 2012 Senior Notes are guaranteed jointly, severally, fully and unconditionally, subject to certain customary limitations by eight wholly-owned domestic subsidiaries. The Company incurred debt issuance costs in connection with the 2012 Senior Notes totaling approximately \$7.5 million. These debt issuance costs are amortized utilizing the effective interest method through the maturity of the 2012 Senior Notes. Amortization of these costs is included in interest expense in the consolidated statements of income.

The Company may redeem the 2012 Senior Notes at its option at a redemption price equal to the greater of (a) 100% of the principal amount of the notes to be redeemed and (b) the sum of the present values of the remaining scheduled principal and interest payments from the redemption date to the date of maturity discounted to the redemption date on a semi-annual basis at the Treasury rate, plus 50 basis points.

Senior Unsecured Notes due 2020

On August 25, 2010, the Company issued unsecured senior notes in the principal amount of \$250 million (the "2010 Senior Notes") at a discount of \$0.6 million, bearing a coupon of 5.70% with an effective rate of 6.19%. The 2010 Senior Notes will mature on August 28, 2020, with interest on the 2010 Senior Notes to be paid semi-annually on February 28th and August 28th. The Company used the net proceeds from the offering, after deducting underwriting discounts and other offering expenses, to repay outstanding borrowings and other general corporate purposes. The Company's 2010 Senior Notes are guaranteed jointly, severally, fully and unconditionally, subject to certain customary limitations, by eight wholly-owned domestic subsidiaries.

The Company may redeem the 2010 Senior Notes at its option at a redemption price equal to the greater of (a) 100% of the principal amount of the notes to be redeemed and (b) the sum of the present values of the remaining scheduled principal and interest payments from the redemption date to the date of maturity discounted to the redemption date on a semi-annual basis at the Treasury rate, plus 45 basis points.

Senior Secured Credit Facility

On July 25, 2012, the Company entered into a \$350 million senior secured credit facility, comprised of a \$200 million revolving credit tranche (the "New Revolver") and a \$150 million term loan tranche (the "Term Loan") with Deutsche Bank AG New York Branch, as administrative agent, Wells Fargo Bank, National Association, as syndication agent, and a syndication of lenders (the "New Credit Facility"). The New Credit Facility has a final maturity date of July 25, 2016, subject to an optional one-year extension, provided certain conditions are met. Up to \$25 million of the borrowings under the New Revolver may be used for letters of credit, up to \$10 million of borrowings under the New Revolver may be used for swing-line loans and up to \$35 million of borrowings under the New Revolver may be used for alternative currency loans. The Term Loan requires quarterly amortization payments (a) during the first two years, in equal installments aggregating 5% of the original principal amount of the Term Loan per year, (b) during the second two years, in equal installments aggregating 7.5% of the original principal amount of the Term Loan per year, and (c) during the one-year extension period (if exercised), equal installments aggregating 10% of the original principal amount of the Term Loan.

The Company utilized the proceeds from the Term Loan and borrowings from the New Revolver, together with the net proceeds from the 2012 Senior Notes offering, to pay the special cash dividend of approximately \$600.7 million in the aggregate to the Company's stockholders on August 23, 2012.

The New Credit Facility is unconditionally guaranteed, jointly and severally, by certain of the Company's domestic subsidiaries. The subsidiary guarantors currently include all subsidiaries that guarantee the obligations under the

Company's Indenture governing the terms of its 2010 and 2012 Senior Notes.

56

Table of Contents

The New Credit Facility is secured by first priority pledges of (i) 100% of the ownership interests in certain domestic subsidiaries owned by the Company and the guarantors, (ii) 65% of the ownership interests in (a) the top-tier foreign holding company of Choice's foreign subsidiaries, and (b) the domestic subsidiary that owns the top-tier foreign holding company of Choice's foreign subsidiaries and (iii) all presently existing and future domestic franchise agreements (the "Franchise Agreements") between the Company and individual franchisees, but only to the extent that the Franchise Agreements may be pledged without violating any law of the relevant jurisdiction or conflicting with any existing contractual obligation of the Company or the applicable franchisee. At the time that the maximum total leverage ratio is required to be no greater than 4.00 to 1.00 (beginning of year 4 of the New Credit Facility), the security interest in the Franchise Agreements will be released.

The Company may at any time prior to the final maturity date increase the amount of the New Credit Facility by up to an additional \$100 million to the extent that any one or more lenders commit to being a lender for the additional amount and certain other customary conditions are met. Such additional amounts may take the form of an increased revolver or term loan.

The Company may elect to have borrowings under the New Credit Facility bear interest at a rate equal to (i) LIBOR, plus a margin ranging from 200 to 425 basis points based on the Company's total leverage ratio or (ii) a base rate plus a margin ranging from 100 to 325 basis points based on the Company's total leverage ratio.

The New Credit Facility requires the Company to pay a fee on the undrawn portion of the New Revolver, calculated on the basis the average daily unused amount of the New Revolver multiplied by 0.30% per annum.

The Company may reduce the New Revolver commitment and/or prepay the Term Loan in whole or in part at any time without penalty, subject to reimbursement of customary breakage costs, if any. Any Term Loan prepayments made by the Company shall be applied to reduce the scheduled amortization payments in direct order of maturity. Additionally, the New Credit Facility requires that the Company and its restricted subsidiaries comply with various covenants, including with respect to restrictions on liens, incurring indebtedness, making investments, paying dividends or repurchasing stock, and effecting mergers and/or asset sales. With respect to dividends, the Company may not make any payments if there is an existing event of default or if the payment would create an event of default. In addition, if the Company's total leverage exceeds 4.50 to 1, the Company is generally restricted from paying aggregate dividends in excess of \$50 million during any calendar year.

The New Credit Facility also imposes financial maintenance covenants (as defined in the loan agreement) requiring the Company to maintain:

- a total leverage ratio of not more than 5.75 to 1.00 in year 1, 5.00 to 1.00 in year 2, 4.50 to 1.00 in year 3 and 4.00 to 1.00 thereafter,
- a maximum secured leverage ratio of not more than 2.50 to 1.00 in year 1, 2.25 to 1.00 in year 2, 2.00 to 1.00 in year 3 and 1.75 to 1.00 thereafter, and
- a minimum fixed charge coverage ratio of not less than 2.00 to 1.00 in years 1 and 2, 2.25 to 1.00 in year 3 and 2.50 to 1.00 thereafter.

At December 31, 2014, the Company maintained a total leverage ratio of 3.11x, a maximum secured leverage ratio of 0.51x and a minimum fixed charge coverage ratio of 5.07x. At December 31, 2014, the Company was in compliance with all covenants under the New Credit Facility.

The New Credit Facility includes customary events of default, the occurrence of which, following any applicable cure period, would permit the lenders to, among other things, declare the principal, accrued interest and other obligations of the Company under the New Credit Facility to be immediately due and payable.

The Company incurred debt issuance costs in connection with the New Credit Facility totaling approximately \$3.7 million. These debt issuance costs are amortized, on a straight-line basis, which is not materially different than the effective interest method, through the maturity of the New Credit Facility. Amortization of these costs is included in interest expense in the consolidated statements of income.

In connection with the entry into the New Credit Facility, the Company's \$300 million senior unsecured revolving credit agreement, dated as of February 24, 2011, among the Company, Wells Fargo Bank, National Association, as administrative agent, and a syndicate of lenders (the "Old Credit Facility"), was terminated and replaced by the New Credit Facility. The Old Credit Facility permitted the Company to borrow, repay and re-borrow revolving loans until

the scheduled maturity date of February 24, 2016. In addition, the Old Credit Facility bore interest, at the Company's election, at either (i) a base rate plus a margin ranging from 5 to 80 basis points based on the Company's credit rating or (ii) LIBOR plus a margin ranging from 105 to 180 basis points based on the Company's credit rating. The Old Credit Facility also required the Company to pay a quarterly

Table of Contents

facility fee on the full amount of the commitments under the Old Credit Facility (regardless of usage) ranging from 20 to 45 basis points based upon the credit rating of the Company.

At December 31, 2014 and 2013, the Company had \$129.4 million and \$138.8 million outstanding under the Term Loan, respectively. At December 31, 2014 and 2013, no amounts were outstanding under the New Revolver.

Fixed Rate Collateralized Mortgage

On December 30, 2014, a court awarded the Company title to an office building as settlement for a portion of an outstanding loan receivable for which the building was pledged as collateral. In conjunction with the court award, the Company also assumed the \$9.5 million mortgage on the property with a fixed interest rate of 7.26%. The mortgage which is collateralized by the office building requires monthly payments of principal and interest and matures in December 2020 with a balloon payment due of \$6.9 million. At the time of acquisition, the Company determined that the fixed interest rate of 7.26% exceeded market interest rates and therefore the Company increased the carrying value of the debt by \$1.2 million to record the debt at fair value. The fair value adjustment will be amortized over the remaining term of the mortgage utilizing the effective interest method.

Economic Development Loans

The Company entered into economic development agreements with various governmental entities in conjunction with the relocation of its corporate headquarters in April 2013. In accordance with these agreements, the governmental entities agreed to advance approximately \$4.4 million to the Company to offset a portion of the corporate headquarters relocation and tenant improvement costs in consideration of the employment of permanent, full-time employees within the jurisdictions. At December 31, 2014, the Company had been advanced approximately \$3.5 million pursuant to these agreements and expects to receive the remaining \$0.9 million over the next several years, subject to annual appropriations by the governmental entities. These advances bear interest at a rate of 3% per annum.

Repayment of the advances is contingent upon the Company achieving certain performance conditions. Performance conditions are measured annually on December 31st and primarily relate to maintaining certain levels of employment within the various jurisdictions. If the Company fails to meet an annual performance condition, the Company may be required to repay a portion or all of the advances including accrued interest by April 30th following the measurement date. Any outstanding advances at the expiration of the Company's ten year corporate headquarters lease in 2023 will be forgiven in full. The advances will be included in long-term debt in Company's consolidated balance sheets until the Company determines that the future performance conditions will be met over the entire term of the agreement and the Company will not be required to repay the advances. The Company accrues interest on the portion of the advances that it expects to repay. The Company was in compliance with all current performance conditions as of December 31, 2014.

Regular Quarterly Dividends

The Company currently maintains the payment of a quarterly dividend on its common shares outstanding, however, the declaration of future dividends are subject to the discretion of our board of directors. During the years ended December 31, 2014, 2013 and 2012, the Company paid cash dividends at a quarterly rate of \$0.185 per share. In December 2014, the Company's board of directors increased the quarterly dividend rate to \$0.195 per share, beginning with the first dividend payable in 2015, representing a 5% increase from the previous quarterly declarations.

During the year ended December 31, 2014, 2013 and 2012, the Company paid regular quarterly cash dividends totaling \$43.5 million, \$32.8 million and \$53.4 million, respectively. Dividend payments during the years ended December 31, 2013 and 2012, reflect the Company's board of directors decision to pay the regular quarterly dividend initially scheduled to be paid in the first quarter of 2013 in December 2012. As a result, the dividends paid during 2013 reflect three quarterly payments as compared to five payments in the prior year. We expect that cash dividends will continue to be paid in the future, subject to declaration by our board of directors, future business performance, economic conditions, changes in tax regulations and other matters. Based on our present dividend rate and outstanding share count, aggregate annual regular dividends for 2015 are estimated to be approximately \$44.7 million.

Special Cash Dividend

On July 26, 2012, the Company's board of directors declared a special cash dividend in the amount of \$10.41 per share or approximately \$600.7 million in the aggregate, which was paid on August 23, 2012. The Company utilized the proceeds from the 2012 Senior Notes and the New Credit Facility for payment of the special cash dividend.

Table of Contents

Share Repurchases

During the year ended December 31, 2014, the Company repurchased 1.4 million of its common stock under the repurchase program at a total cost of \$72.6 million. These shares were purchased from family members of the Company's largest shareholder. Through December 31, 2014, the Company repurchased 46.7 million shares of its common stock (including 33.0 million prior to the two-for-one stock split effected in October 2005) under the share repurchase program at a total cost of \$1.2 billion. In the fourth quarter of 2014, our board of directors authorized a 3.0 million share increase to the current share repurchase authorization increasing the shares remaining to 3.0 million at December 31, 2014. We currently believe that our cash flows from operations will support our ability to complete the current board of directors repurchase authorization and upon completion of the current authorization, our board of directors will evaluate the advisability of additional share repurchases.

Other items

Approximately \$189.6 million of the Company's cash and cash equivalents at December 31, 2014 pertains to undistributed earnings of the Company's consolidated foreign subsidiaries. Since the Company's intent is for such earnings to be reinvested by the foreign subsidiaries, the Company has not provided additional United States income taxes on these amounts. While the Company has no intention to utilize these cash and cash equivalents in its domestic operations, any change to this policy would result in the Company incurring additional United States income taxes on any amounts utilized domestically.

The following table summarizes our contractual obligations as of December 31, 2014:

Contractual Obligations	Payment due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
	(in millions)				
Long-term debt ⁽¹⁾	\$1,069.1	\$51.2	\$196.7	\$76.6	\$744.6
Capital lease obligations ⁽²⁾	1.6	1.0	0.6	—	—
Purchase obligations ⁽³⁾	45.4	25.1	19.3	0.6	0.4
Operating lease obligations	79.6	11.6	22.4	19.2	26.4
Other long-term liabilities ⁽⁴⁾	24.1	—	1.7	1.4	21.0
Total contractual obligations	\$1,219.8	\$88.9	\$240.7	\$97.8	\$792.4

(1) Long-term debt includes principal as well as interest payments. Assumes forward estimates of LIBOR rates as of December 31, 2014 for our variable interest rate debt.

(2) Capital lease obligations include interest and related maintenance agreements on the equipment.

(3) Purchase obligations also include commitments to provide loan and joint venture financing under various Company programs.

(4) Other long-term liabilities primarily consist of deferred compensation plan liabilities and excludes cumulative marketing and reservation fees in excess of cumulative marketing and reservation expenses incurred totaling \$44.3 million due to the uncertain timing of the fulfillment of this contractual obligation. See Note 7 to our consolidated financial statements for further discussion.

The total amount of unrecognized tax positions and the related interest and penalties totaled \$4.1 million at December 31, 2014. Due to the uncertainty with respect to the timing of payments in individual years in connection with these tax liabilities, we are unable to make reasonably reliable estimates of the period of cash settlement with the respective taxing authorities. Therefore, we have not included these amounts in the contractual obligations table above. See Note 17 to our consolidated financial statements for a discussion on income taxes.

The Company believes that cash flows from operations and available financing capacity are adequate to meet the expected future operating, investing and financing needs of the business.

Off Balance Sheet Arrangements

On October 9, 2012, the Company entered into a limited payment guaranty with regards to a VIE's \$18 million bank loan for the construction of a hotel franchised under one of the Company's brands in the United States. Under the terms of the limited guaranty, the Company has agreed to guarantee 25% of the outstanding principal balance for a maximum exposure of

59

Table of Contents

\$4.5 million and accrued and unpaid interest, as well as any unpaid expenses incurred by the lender. The limited guaranty shall remain in effect until the maximum amount guaranteed by the Company is paid in full. In addition to the limited guaranty, the Company entered into an agreement in which the Company guarantees the completion of the construction of the hotel and an environmental indemnity agreement which indemnifies the lending institution from and against any damages relating to or arising out of possible environmental contamination issues with regards to the property.

On November 15, 2013, the Company entered into a limited payment guaranty with regards to a VIE's \$46.2 million bank loan for the construction of a hotel franchised under one of the Company's brands in the United States. Under the terms of the limited guaranty, the Company has agreed to unconditionally guarantee and become surety for the full and timely payment of the guaranteed outstanding principal balance, as well as any unpaid expenses incurred by the lender. The guarantee is limited to 25% of the outstanding principal balance of the \$46.2 million loan due at any time for a maximum exposure of \$11.6 million. The limited guaranty shall remain in effect until the maximum amount guaranteed by the Company is repaid in full. The maturity date of the VIE's loan is May 2017. The Company believes the likelihood of having to perform under the aforementioned limited payment guarantees is remote at December 31, 2014 and December 31, 2013.

Critical Accounting Policies

Our accounting policies comply with principles generally accepted in the United States. We have described below those policies that we believe are critical and require the use of complex judgment or significant estimates in their application. Additional discussion of these policies is included in Note 1 to our consolidated financial statements.

Revenue Recognition.

We recognize continuing franchise fees, including royalty, marketing and reservations system fees, when earned and realizable from our franchisees. Franchise fees are typically based on a percentage of gross room revenues or the number of hotel rooms of each franchisee. Franchise fees based on a percentage of gross room revenues are recognized in the same period that the underlying gross room revenues are earned by our franchisees. Our estimate of the allowance for uncollectible royalty fees is charged to SG&A expense and our estimate of the allowance for uncollectible marketing and reservation system fees is charged to marketing and reservation expenses.

Initial franchise and relicensing fees are recognized, in most instances, in the period the related franchise agreement is executed because the initial franchise and relicensing fees are non-refundable and the Company is not required to provide initial services to the franchisee prior to hotel opening. We defer the initial franchise and relicensing fee revenue related to franchise agreements which include incentives until the incentive criteria are met or the agreement is terminated, whichever occurs first.

The Company recognizes procurement services revenues from qualified vendors when the services are performed or the product delivered, evidence of an arrangement exists, the fee is fixed or determinable and collectability is reasonably assured. We defer the recognition of procurement services revenues related to certain upfront fees and recognize them over a period corresponding to the Company's estimate of the life of the arrangement.

Marketing and Reservation Revenues and Expenses.

The Company's franchise agreements require the payment of certain marketing and reservation system fees, which are used exclusively by the Company for expenses associated with providing franchise services such as national marketing, media advertising, central reservation systems and technology services. The Company is contractually obligated to expend the marketing and reservation system fees it collects from franchisees in accordance with the franchise agreements; as such, no net income or loss to the Company is generated. In accordance with our contracts, we include in marketing and reservation expenses an allocation of costs for certain activities, such as human resources, facilities, legal and accounting, required to carry out marketing and reservation activities.

The Company records marketing and reservation system revenues and expenses on a gross basis since the Company is the primary obligor in the arrangement, maintains the credit risk, establishes the price and nature of the marketing or reservation services and retains discretion in supplier selection. In addition, net advances to and recoveries from the franchise system for marketing and reservation activities are presented as cash flows from operating activities.

Marketing and reservation system fees not expended in the current year are recorded as a liability in the Company's balance sheet and are carried over to the next fiscal year and expended in accordance with the franchise agreements or utilized to repay previous advances. Marketing and reservation expenses incurred in excess of revenues are recorded as an asset in the Company's balance sheet, with a corresponding reduction in costs, and are similarly recovered in subsequent years. Under the

60

Table of Contents

terms of the franchise agreements, the Company may advance capital and incur costs as necessary for marketing and reservation activities and recover such advances through future fees. The Company believes that any credit risk associated with cost advances for marketing and reservation system activities is mitigated due to our contractual right to recover these amounts from a large geographically dispersed group of franchisees. However, our ability to recover advances may be adversely impacted by certain factors, including, among others, declines in the ability of our franchisees to generate revenues at properties they franchise from us, lower than expected franchise system growth, an extended period of occupancy or room rate declines or a decline in the number of hotel rooms in our franchise system. If these factors exist it could result in the generation of insufficient funds to recover marketing and reservation advances as well as meet the ongoing marketing and reservation needs of the overall system.

The Company evaluates the recoverability of marketing and reservation costs incurred in excess of cumulative marketing and reservation system revenues earned on a periodic basis. The Company will record a reserve when, based on current information and events, it is probable that it will be unable to recover the cumulative amounts advanced for marketing and reservation activities according to the contractual terms of the franchise agreements. These advances are considered to be unrecoverable if the expected net, undiscounted cash flows from marketing and reservation activities are less than the carrying amount of the asset.

Choice Privileges is our frequent guest incentive marketing program. Choice Privileges enables members to earn points based on their spending levels with our franchisees and, to a lesser degree, through participation in affiliated partners' programs, such as those offered by credit card companies. The points, which we accumulate and track on the members' behalf, may be redeemed for free accommodations or other benefits.

We provide Choice Privileges as a marketing program to franchised hotels and collect a percentage of program members' room revenue from franchises to operate the program. Revenues are deferred in an amount equal to the estimated fair value of the future redemption obligation. The Company develops an estimate of the eventual redemption rates and point values using various actuarial methods. These judgmental factors determine the required liability attributable to outstanding points. Upon redemption of points, the Company recognizes the previously deferred revenue as well as the corresponding expense relating to the cost of the awards redeemed. Revenues in excess of the estimated future redemption obligation are recognized when earned to reimburse the Company for costs incurred to operate the program, including administrative costs, marketing, promotion and performing member services.

Valuation of Intangibles and Long-Lived Assets

The Company evaluates the potential impairment of property and equipment and other long-lived assets, including franchise rights and other definite-lived intangibles, whenever an event or other circumstances indicates that the Company may not be able to recover the carrying value of the asset. When indicators of impairment are present, recoverability is assessed based on net, undiscounted expected cash flows. If the net, undiscounted expected cash flows are less than the carrying amount of the assets, an impairment charge is recorded for the excess of the carrying value over the fair value of the asset. We estimate the fair value of intangibles and long lived assets primarily using undiscounted cash flow analysis. Significant management judgment is involved in evaluating indicators of impairment and developing any required projections to test for recoverability or estimate the fair value of an asset. Furthermore, if management uses different projections or if different conditions occur in future periods, future-operating results could be materially impacted.

The Company evaluates the impairment of goodwill and trademarks with indefinite lives on an annual basis, or during the year if an event or other circumstance indicates that the Company may not be able to recover the carrying amount of the asset. In evaluating these assets for impairment, the Company may elect to first assess qualitative factors to determine whether it is more likely than not that the fair value of the reporting unit or the indefinite lived intangible asset is less than its carrying amount. If the conclusion is that it is not more likely than not that the fair value of the asset is less than its carrying value, then no further testing is required. If the conclusion is that it is more likely than not that the fair value of the asset is less than its carrying value, then a two-step impairment test is performed for goodwill. The Company may elect to forego the qualitative assessment and move directly to the two-step impairment test for goodwill and the the fair value determination for indefinite-lived intangibles. The Company determines the fair value of its reporting units and indefinite-lived intangibles using income and market methods.

Loan Loss Reserves

The Company segregates its notes receivable for the purposes of evaluating allowances for credit losses between two categories: Mezzanine and Other Notes Receivable and Forgivable Notes Receivable. The Company utilizes the level of security it has in the various notes receivable as its primary credit quality indicator (i.e. senior, subordinated or unsecured) when determining the appropriate allowances for uncollectible loans within these categories.

61

Table of Contents

Mezzanine and Other Notes Receivables

The Company has provided financing to franchisees in support of the development of properties in strategic markets. The Company expects the owners to repay the loans in accordance with the loan agreements, or earlier as the hotels mature and capital markets permit. The Company estimates the collectability and records an allowance for loss on its mezzanine and other notes receivable when recording the receivables in the Company's financial statements. These estimates are updated quarterly based on available information.

The Company considers a loan to be impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. All amounts due according to the contractual terms means that both the contractual interest payments and the contractual principal payments of a loan will be collected as scheduled in the loan agreement. The Company measures loan impairment based on the present value of expected future cash flows discounted at the loan's original effective interest rate or the estimated fair value of the collateral. For impaired loans, the Company establishes a specific impairment reserve for the difference between the recorded investment in the loan and the present value of the expected future cash flows or the estimated fair value of the collateral. The Company applies its loan impairment policy individually to all mezzanine and other notes receivable in the portfolio and does not aggregate loans for the purpose of applying such policy. For impaired loans, the Company recognizes interest income on a cash basis. If it is likely that a loan will not be collected based on financial or other business indicators it is the Company's policy to charge off these loans to SG&A expenses in the accompanying consolidated statements of income in the quarter when it is deemed uncollectible. Recoveries of impaired loans are recorded as a reduction of SG&A expenses in the quarter received. The Company assesses the collectability of its senior notes receivable by comparing the market value of the underlying assets to the carrying value of the outstanding notes. In addition, the Company evaluates the property's operating performance, the borrower's compliance with the terms of the loan and franchise agreements, and all related personal guarantees that have been provided by the borrower. For subordinated or unsecured receivables, the Company assesses the property's operating performance, the subordinated equity available to the Company, the borrower's compliance with the terms of the loan and franchise agreements, and the related personal guarantees that have been provided by the borrower.

The Company considers loans to be past due and in default when payments are not made when due. Although the Company considers loans to be in default if payments are not received on the due date, the Company does not suspend the accrual of interest until those payments are more than 30 days past due. The Company applies payments received for loans on non-accrual status first to interest and then principal. The Company does not resume interest accrual until all delinquent payments are received.

Forgivable Notes Receivable

In conjunction with brand and development programs, the Company may provide financing to franchisees for property improvements and other purposes in the form of forgivable promissory notes which bear interest at market rates. Under these promissory notes, the franchisee promises to repay the principal balance together with interest upon maturity unless certain conditions are met throughout the term of the promissory note. The principal balance and related interest are forgiven ratably over the term of the promissory note if the franchisee remains in the system in good standing. If during the term of the promissory note, the franchisee exits our franchise system or is not operating their franchise in accordance with our quality or credit standards, the Company may declare a default under the promissory note and commence collection efforts with respect to the full amount of the then-current outstanding principal and interest.

In accordance with the terms of the promissory notes, the initial principal balance and related interest are ratably reduced over the term of the loan on each anniversary date until the outstanding amounts are reduced to zero as long as the franchisee remains within the franchise system and operates in accordance with our quality and brand standards. As a result, the amounts recorded as an asset on the Company's consolidated balance sheet are also ratably reduced since the amounts forgiven no longer represent probable future economic benefits to the Company. The Company records the reduction of its recorded assets through amortization and marketing and reservation expense on its consolidated statements of income. Since these forgivable promissory notes receivable are predominately forgiven

ratably over the term of the promissory note rather than repaid, the Company classifies the issuance and collection of these notes receivable as operating activities in its consolidated statement of cash flows.

The Company fully reserves all defaulted notes in addition to recording a reserve on the estimated uncollectible portion of the remaining notes. For those notes not in default, the Company calculates an allowance for losses and determines the ultimate collectibility on these forgivable notes based on the historical default rates for those unsecured notes that are not forgiven but are required to be repaid. The Company records bad debt expense in SG&A and marketing and reservation system expenses in the accompanying consolidated statements of income in the quarter when the note is deemed uncollectible.

Table of Contents

See Note 3 Notes Receivable for additional information.

Stock Compensation.

The Company's policy is to recognize compensation cost related to share-based payment transactions in the financial statements based on the fair value of the equity or liability instruments issued. Compensation expense related to the fair value of share-based awards is recognized over the requisite service period based on an estimate of those awards that will ultimately vest. The Company estimates the share-based compensation expense for awards that will ultimately vest upon inception of the grant and adjusts the estimate of share-based compensation for those awards with performance and/or service requirements that will not be satisfied so that compensation cost is recognized only for awards that ultimately vest.

Income Taxes.

Income taxes are recorded using the asset and liability method of accounting for income taxes. Deferred income taxes reflect the net tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. A valuation allowance is provided for deferred tax assets if it is more likely than not such assets will be unrealized. Deferred United States income taxes have not been recorded for temporary differences related to investments in certain foreign subsidiaries and corporate affiliates. The temporary differences consist primarily of undistributed earnings that are considered permanently reinvested in operations outside the United States. If management's intentions change in the future, deferred taxes may need to be provided.

With respect to uncertain income tax positions, a tax liability is recorded in full when management determines that the position does not meet the more likely than not threshold of being sustained on examination. A tax liability may also be recognized for a position that meets the more likely than not threshold, based upon management's assessment of the position's probable settlement value. The Company records interest and penalties on unrecognized tax benefits in the provision for income taxes. Additional information regarding the Company's unrecognized tax benefits is provided in Note 17 to Consolidated Financial Statements.

New Accounting Standards

See Footnotes No. 1 "Recently Adopted Accounting Guidance" and Note 29 "Future Adoption of Accounting Standards" of the Notes to our Financial Statements for information related to our adoption of new accounting standards in 2014 and for information on our anticipated adoption of recently issued accounting standards.

FORWARD-LOOKING STATEMENTS

Certain matters discussed in this report constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Generally, our use of words such as "expect," "estimate," "believe," "anticipate," "should," "will," "forecast," "plan," "project," "assume" or similar words of futurity identify such forward-looking statements. These forward-looking statements are based on management's current beliefs, assumption and expectations regarding future events, which in turn are based on information currently available to management. Such statements may relate to projections of the Company's revenue, earnings and other financial and operational measures, Company debt levels, ability to repay outstanding indebtedness, payment of dividends, and future operations, among other matters. We caution you not to place undue reliance on any such forward-looking statements. Forward-looking statements do not guarantee future performance and involve known and unknown risks, uncertainties and other factors.

Several factors could cause actual results, performance or achievements of the Company to differ materially from those expressed in or contemplated by the forward-looking statements. Such risks include, but are not limited to, changes to general, domestic and foreign economic conditions; foreign currency fluctuations; operating risks common in the lodging and franchising industries; changes to the desirability of our brands as viewed by hotel operators and customers; changes to the terms or termination of our contracts with franchisees and our relationships with our franchisees; our ability to keep pace with improvements in technology utilized for marketing and reservations systems

and other operating systems; our ability to grow our franchise system; exposure to risks relating to development activities; fluctuations in the supply and demand for hotels rooms; the level of acceptance of alternative growth strategies we may implement; operating risks associated with our international operations; the outcome of litigation; and our ability to effectively manage our indebtedness. These and other risk factors are discussed in detail in Item 1A. “Risk Factors” of this report. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by law.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

The Company is exposed to market risk from changes in interest rates and the impact of fluctuations in foreign currencies on the Company’s foreign investments and operations. The Company manages its exposure to these market risks through the

Table of Contents

monitoring of its available financing alternatives including in certain circumstances the use of derivative financial instruments. We are also subject to risk from changes in debt and equity prices from our non-qualified retirement savings plan investments in debt securities and common stock, which have a carrying value of \$17.8 million at December 31, 2014, which we account for as trading securities. The Company will continue to monitor the exposure in these areas and make the appropriate adjustments as market conditions dictate.

At December 31, 2014, the Company had \$129.4 million of variable interest rate debt instruments outstanding at an effective rate of 2.2%. A hypothetical change of 10% in the Company's effective interest rate from December 31, 2014 levels would increase or decrease annual interest expense by \$0.3 million. The Company expects to refinance its fixed and variable long-term debt obligations prior to their scheduled maturities.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of Choice Hotels International, Inc. and Subsidiaries

We have audited the accompanying consolidated balance sheet of Choice Hotels International, Inc. and subsidiaries as of December 31, 2014, and the related consolidated statements of income, comprehensive income, shareholders' deficit and cash flows for the year then ended. Our audit also included the financial statement schedule listed in the Index at Item 15(a)(2). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Choice Hotels International, Inc. and subsidiaries at December 31, 2014, and the consolidated results of their operations and their cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Choice Hotels International, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated March 2, 2015 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Choice Hotels International, Inc.:

In our opinion, the consolidated balance sheet as of December 31, 2013 and the related consolidated statements of income, comprehensive income, shareholders' deficit and cash flows for each of two years in the period ended December 31, 2013 listed in the accompanying index present fairly, in all material respects, the financial position of Choice Hotels International, Inc. and its subsidiaries at December 31, 2013, and the results of their operations and their cash flows for each of the two years in the period ended December 31, 2013, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) for each of the two years in the period ended December 31, 2013 presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

CHOICE HOTELS INTERNATIONAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements present the financial position, results of operations and cash flows of Choice Hotels International, Inc., a Delaware corporation and subsidiaries (the "Company"). The Company consolidates entities under its control, including variable interest entities where it is deemed to be the primary beneficiary. Investments in unconsolidated affiliates, including corporate joint ventures and certain other entities, in which the Company owns 50% or less and exercises significant influence over the operating and financial policies of the investee are accounted for by the equity method. All significant inter-company accounts and transactions have been eliminated in consolidation.

The consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") and require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Accordingly, ultimate results could differ from those estimates. In the opinion of management, the accompanying consolidated financial statements include all normal and recurring adjustments that are necessary to fairly present the financial position, results of operations and cash flows of the Company.

The financial statements for the years ended December 31, 2013 and 2012 have been revised related to revenue recognition and other immaterial errors as disclosed in the Company's Form 10-K/A, filed with the Securities and Exchange Commission on November 3, 2014.

Discontinued Operations

In the first quarter of 2014, the Company's management approved a plan to dispose of the three Company owned Mainstay Suites hotels. As a result, the Company has reported the operations related to these three hotels as discontinued operations. The Company's results of operations for the periods included in this Form 10-K have also been recast to account for these operations as discontinued. For additional information regarding discontinued operations, see Note 27, Discontinued Operations.

Revenue Recognition

The Company enters into franchise agreements to provide franchisees with various marketing services, a centralized reservation system and limited non-exclusive rights to utilize the Company's registered trade names and trademarks. These agreements typically have an initial term from ten to twenty years with provisions permitting franchisees or the Company to terminate after five, ten, or fifteen years under certain circumstances. In most instances, initial franchise and relicensing fees are recognized upon execution of the franchise agreement because the initial franchise and relicensing fees are non-refundable and the Company is not required to provide initial services to the franchisee prior to hotel opening. The initial franchise and relicensing fees related to executed franchise agreements which include incentives, such as future potential cash rebates or forgivable promissory notes, are deferred and recognized when the incentive criteria are met or the agreement is terminated, whichever occurs first.

Royalty and marketing and reservation system revenues, which are typically based on a percentage of gross room revenues or the number of hotel rooms of each franchisee, are recorded when earned and realizable from the franchisee. Franchise fees based on a percentage of gross room revenues are recognized in the same period that the underlying gross room revenues are earned by the Company's franchisees. An estimate of uncollectible revenue is charged to bad debt expense and included in selling, general and administrative ("SG&A") and marketing and reservation expenses in the accompanying consolidated statements of income.

The Company generates procurement services revenues from qualified vendors. Procurement services revenues are generally based on the level of goods or services purchased from qualified vendors by hotel franchise owners and hotel guests who stay in the Company's franchised hotels or based on marketing services provided by the Company on behalf of the qualified vendors to hotel owners and guests. The Company recognizes procurement services revenues

when the services are performed or the product is delivered, evidence of an arrangement exists, the fee is fixed or determinable and collectibility is reasonably assured. The Company defers the recognition of procurement services' revenues related to upfront fees. Such upfront fees are generally recognized over a period corresponding to the Company's estimate of the life of the arrangement.

73

Table of Contents

Marketing and Reservation Revenues and Expenses

The Company's franchise agreements require the payment of certain marketing and reservation system fees, which are used exclusively by the Company for expenses associated with providing franchise services such as national marketing, operating a guest loyalty program, media advertising, central reservation systems and technology services. The Company is contractually obligated to expend the marketing and reservation system revenue it collects from franchisees in accordance with the franchise agreements; as such, no income or loss to the Company is generated. In accordance with the franchise agreements, the Company includes in marketing and reservation expenses an allocation of costs for certain activities, such as human resources, facilities, legal, accounting, etc., required to carry out marketing and reservation activities.

The Company records marketing and reservation system revenues and expenses on a gross basis since the Company is the primary obligor in the arrangement, maintains the credit risk, establishes the price and nature of the marketing or reservation services and retains discretion in supplier selection. In addition, net advances to and recoveries from the franchise system for marketing and reservation activities are presented as cash flows from operating activities.

Marketing and reservation system revenues not expended in the current year are recorded as a liability in the Company's balance sheet and are carried over to the next fiscal year and expended in accordance with the franchise agreements or utilized to repay previous advances. Marketing and reservation expenses incurred in excess of revenues are recorded as an asset in the Company's balance sheet, with a corresponding reduction in costs, and are similarly recovered in subsequent years. Under the terms of the franchise agreements, the Company may advance capital and incur costs as necessary for marketing and reservation activities and recover such advances through future fees.

The Company evaluates the recoverability of marketing and reservation costs incurred in excess of cumulative marketing and reservation system revenues earned on a periodic basis. The Company will record a reserve when, based on current information and events, it is probable that it will be unable to collect all amounts advanced for marketing and reservation activities according to the contractual terms of the franchise agreements. These advances are considered to be unrecoverable if the expected net, undiscounted cash flows from marketing and reservation activities are less than the carrying amount of the asset. The Company believes that any credit risk associated with cumulative cost advances for marketing and reservation system activities is mitigated due to the contractual right to recover these amounts from a large geographically dispersed group of franchisees.

Choice Privileges is the Company's frequent guest incentive marketing program. Choice Privileges enables members to earn points based on their spending levels with franchisees and, to a lesser degree, through participation in affiliated partners' programs, such as those offered by credit card companies. The points, which the Company accumulates and tracks on the members' behalf, may be redeemed for free accommodations or other benefits.

The Company provides Choice Privileges as a marketing program to franchised hotels and collects a percentage of program members' room revenue from franchises to operate the program. Revenues are deferred in an amount equal to the estimated fair value of the future redemption obligation. The Company develops an estimate of the eventual redemption rates and point values using various actuarial methods. These judgmental factors determine the required liability attributable to outstanding points. Upon redemption of points, the Company recognizes the previously deferred revenue as well as the corresponding expense relating to the cost of the awards redeemed. Revenues in excess of the estimated future redemption obligation are recognized when earned to reimburse the Company for costs incurred to operate the program, including administrative costs, marketing, promotion, and performing member services.

Accounts Receivable and Credit Risk

Accounts receivable consist primarily of franchise and related fees due from hotel franchises and are recorded at the invoiced amount. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in the existing accounts receivable. The Company determines the allowance considering historical write-off experience and a review of aged receivable balances. However, the Company considers its credit risk associated with trade receivables to be partially mitigated due to the dispersion of these receivables across a large number of geographically diverse franchisees.

The Company records bad debt expense in SG&A and marketing and reservation expenses in the accompanying consolidated statements of income based on its assessment of the ultimate realizability of trade receivables

considering historical collection experience and the economic environment. When the Company determines that an account is not collectible, the account is written-off to the associated allowance for doubtful accounts.

Advertising Costs

The Company expenses advertising costs as the advertising occurs. Advertising expense was \$93.7 million, \$84.7 million and \$79.7 million for the years ended December 31, 2014, 2013 and 2012, respectively. Prepaid advertising at December 31,

Table of Contents

2014 and 2013 totaled \$45 thousand and \$0.2 million, respectively and is included within other current assets in the accompanying consolidated balance sheets. The Company includes advertising costs primarily in marketing and reservation expenses on the accompanying consolidated statements of income.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with a maturity of three months or less at the date of purchase to be cash equivalents. At December 31, 2014 and 2013, the Company had book overdrafts totaling \$5.4 million and \$5.0 million, respectively which are included in accounts payable in the accompanying consolidated balance sheets. These book overdrafts represent outstanding checks in excess of funds on deposit.

The Company maintains cash balances in domestic banks, which, at times, may exceed the limits of amounts insured by the Federal Deposit Insurance Corporation. In addition, the Company also maintains cash balances in international banks which do not provide deposit insurance.

Capitalization Policies

Property and equipment are recorded at cost and depreciated using the straight-line method over the estimated useful lives of the assets. Leasehold improvements are amortized over the shorter of the lease term or their useful lives.

Major renovations and replacements incurred during construction are capitalized. Additionally, the Company capitalizes any interest incurred during construction of property and equipment or the development of software. Upon sale or retirement of property, the cost and related accumulated depreciation are eliminated from the accounts and any related gain or loss is recognized in the accompanying consolidated statements of income. Maintenance, repairs and minor replacements are charged to expense as incurred.

Costs for computer software developed for internal use are capitalized during the application development stage and depreciated using the straight-line method over the estimated useful lives of the software.

Leased property meeting certain capital lease criteria is capitalized and the present value of the related lease payments is recorded as a liability. The present value of the minimum lease payments are calculated utilizing the lower of the Company's incremental borrowing rate or the lessor's interest rate implicit in the lease, if known by the Company. Amortization of capitalized leased assets is computed utilizing the straight-line method over either the shorter of the estimated useful life of the asset or the initial lease term and included in depreciation and amortization in the Company's consolidated statements of income. However, if the lease meets the bargain purchase or transfer of ownership criteria the asset shall be amortized in accordance with the Company's normal depreciation policy for owned assets.

Assets Held for Sale

The Company considers property to be assets held for sale when all of the following criteria are met:

- Management commits to a plan to sell an asset;
- It is unlikely that the disposal plan will be significantly modified or discontinued;
- The asset is available for immediate sale in its present condition;
- Actions required to complete the sale of the asset have been initiated;
- Sale of the asset is probable and the Company expects the completed sale will occur within one year; and
- The asset is actively being marketed for sale at a price that is reasonable given its current market value.

Upon designation as an asset held for sale, the Company records the carrying value of each asset at the lower of its carrying value or its estimated fair value, less estimated costs to sell, and ceases recording depreciation. If at any time these criteria are no longer met, subject to certain exceptions, the assets previously classified as held for sale are reclassified as held and used and measured individually at the lower of the following:

- a. the carrying amount before the asset was classified as held for sale, adjusted for any depreciation (amortization) expense that would have been recognized had the asset been continuously classified as held and used;
- b. the fair value at the date of the subsequent decision not to sell.

Valuation of Intangibles and Long-Lived Assets

The Company evaluates the potential impairment of property and equipment and other long-lived assets, including franchise rights and other definite-lived intangibles, whenever an event or other circumstances indicates that the Company may not be able to recover the carrying value of the asset. When indicators of impairment are present, recoverability is assessed

Table of Contents

based on net, undiscounted expected cash flows. If the net, undiscounted expected cash flows are less than the carrying amount of the assets, an impairment charge is recorded for the excess of the carrying value over the fair value of the asset. We estimate the fair value of intangibles and long lived assets primarily using undiscounted cash flow analysis. During the year ended December 31, 2012, the Company recognized an impairment loss totaling \$0.2 million on the franchise rights recorded in conjunction with an acquisition of a subsidiary in India. The Company did not identify any indicators of impairment of long-lived assets during the years ended December 31, 2014 and 2013. Significant management judgment is involved in evaluating indicators of impairment and developing any required projections to test for recoverability or estimate the fair value of an asset. Furthermore, if management uses different projections or if different conditions occur in future periods, future-operating results could be materially impacted. The Company evaluates the impairment of goodwill and trademarks with indefinite lives on an annual basis, or during the year if an event or other circumstance indicates that the Company may not be able to recover the carrying amount of the asset. In evaluating these assets for impairment, the Company may elect to first assess qualitative factors to determine whether it is more likely than not that the fair value of the reporting unit or the indefinite lived intangible asset is less than its carrying amount. If the conclusion is that it is not more likely than not that the fair value of the asset is less than its carrying value, then no further testing is required. If the conclusion is that it is more likely than not that the fair value of the asset is less than its carrying value, then a two-step impairment test is performed for goodwill. For indefinite-lived intangibles, the carrying value is compared to the fair value of the asset and an impairment charge is recognized for any excess. The Company may elect to forego the qualitative assessment and move directly to the two-step impairment test for goodwill and the the fair value determination for indefinite-lived intangibles. The Company determines the fair value of its reporting units and indefinite-lived intangibles using income and market methods. During the year ended December 31, 2012, the Company recognized an impairment loss totaling \$0.2 million on the goodwill recorded in conjunction with an acquisition of a subsidiary in India. Based on the Company's assessment, it was determined that the fair value of the Company's Indian subsidiary, was less than its carrying value resulting in the recognition of an impairment loss equal to the gross amount of the goodwill. The Company did not record any impairment of goodwill or trademarks with indefinite lives during the years ended December 31, 2014 and 2013.

Variable Interest Entities

In accordance with the guidance for the consolidation of variable interest entities, the Company analyzes its variable interests, including loans, guarantees, and equity investments, to determine if the entity in which the Company has a variable interest is a variable interest entity. The analysis includes both quantitative and qualitative consideration. For those entities determined to be variable interests entities, a further quantitative and qualitative analysis is performed to determine if the Company will be deemed the primary beneficiary. The primary beneficiary is the party who has the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and who has an obligation to absorb losses of the entity or a right to receive benefits from the entity that could potentially be significant to the entity. The Company consolidates those entities in which it is determined to be the primary beneficiary.

Valuation of Investments in Ventures

The Company evaluates an investment in a venture for impairment when circumstances indicate that the carrying value may not be recoverable, for example due to loan defaults, significant under performance relative to historical or projected operating performance, and significant negative industry or economic trends. When there is indication that a loss in value has occurred, the Company evaluates the carrying value compared to the estimated fair value of the investment. Fair value is based upon internally developed discounted cash flow models, third-party appraisals, and if appropriate, current estimated net sales proceeds from pending offers. If the estimated fair value is less than carrying value, management uses its judgment to determine if the decline in value is other-than-temporary. In determining this, the Company considers factors including, but not limited to, the length of time and extent of the decline, loss of values as a percentage of the cost, financial condition and near-term financial projections, the Company's intent and ability to recover the lost value and current economic conditions. For declines in value that are deemed other-than-temporary, impairments are charged to earnings.

Sales Taxes

The Company presents taxes collected from customers and remitted to governmental authorities on a net basis and therefore they are excluded from revenues in the consolidated financial statements.

Foreign Operations

The United States dollar is the functional currency of the consolidated entities operating in the United States. The functional currency for the consolidated entities operating outside of the United States is generally the currency of the primary economic environment in which the entity primarily generates and expends cash. The Company translates the financial

Table of Contents

statements of consolidated entities whose functional currency is not the United States dollar into United States dollars. The Company translates assets and liabilities at the exchange rate in effect as of the financial statement date and translates income statement accounts using the weighted average exchange rate for the period. The Company includes translation adjustments from foreign exchange and the effect of exchange rate changes on inter-company transactions of a long-term investment nature as a separate component of shareholders' deficit. The Company reports foreign currency transaction gains and losses and the effect of inter-company transactions of a short-term or trading nature in SG&A expenses on the consolidated statements of income. Foreign currency transaction gains and losses for the years ended December 31, 2014, 2013 and 2012 were a \$0.9 million loss, \$0.4 million loss and a \$0.1 million gain, respectively.

Derivatives

The Company periodically uses derivative instruments as part of its overall strategy to manage exposure to market risks associated with fluctuations in interest rates. All outstanding derivative financial instruments are recognized at their fair values as assets or liabilities. The impact on earnings from recognizing the fair values of these instruments depends on their intended use, their hedge designation and their effectiveness in offsetting changes in the fair values of the exposures they are hedging. The Company does not use derivatives for trading purposes.

The effective portion of changes in fair value of derivatives designated as cash flow hedging instruments are recorded as a component of accumulated other comprehensive income (loss) and the ineffective portion is reported currently in earnings. The amounts included in accumulated other comprehensive income are reclassified into earnings in the same period during which the hedged item affects earnings. Amounts reported in earnings are classified consistent with the item being hedged.

The Company formally documents all relationships between its hedging instruments and hedged items at inception, including its risk management objective and strategy for establishing various hedge relationships. Cash flows from hedging instruments are classified in the consolidated statements of cash flows consistent with the items being hedged. Hedge accounting is discontinued prospectively when (i) the derivative instrument is no longer effective in offsetting changes in fair value or cash flows of the underlying hedged item, (ii) the derivative instrument expires, is sold, terminated or exercised, or (iii) designating the derivative instrument as a hedge is no longer appropriate. The effectiveness of derivative instruments is assessed at inception and on an ongoing basis.

Guarantees

The Company has historically issued certain guarantees to support the growth of its brands. A liability is recognized for the fair value of such guarantees upon inception of the guarantee and upon any subsequent modification, such as renewals, when the Company remains contingently liable. The fair value of a guarantee is the estimated amount at which the liability could be settled in a current transaction between willing unrelated parties. The Company evaluates these guarantees on a quarterly basis to determine if there is a probable loss requiring recognition.

Recently Adopted Accounting Guidance

In February 2013, the Financial Accounting Standards Board ("FASB") issued ASU No. 2013-04, "Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date" ("ASU 2013-04"). The ASU requires entities to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of this guidance is fixed at the reporting date, as the sum of the following: (a) the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (b) any additional amount the reporting entity expects to pay on behalf of its co-obligors. Required disclosures include a description of the joint-and-several arrangement and the total outstanding amount of the obligation for all joint parties. The ASU permits entities to aggregate disclosures (as opposed to providing separate disclosures for each joint-and-several obligation). ASU 2013-04 was effective for all interim and annual periods beginning after December 15, 2013. The Company adopted this ASU on January 1, 2014 and it did not have a material impact on its financial statements.

In March 2013, the FASB issued ASU No. 2013-05, "Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity" ("ASU 2013-05"). ASU 2013-05 clarifies that when a reporting entity ceases to have a controlling

financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity, the parent is required to apply the guidance in ASC 830 "Foreign Currency Matters" Subtopic 830-30 to release any related cumulative translation adjustment into net income. Accordingly, the cumulative translation adjustment should be released into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets had resided. The provisions of ASU 2013-05 are effective prospectively for reporting periods beginning after December 15, 2013

77

Table of Contents

and the Company adopted this ASU on January 1, 2014. The adoption of this ASU did not have a material impact on the Company's financial statements.

In July 2013, the FASB issued ASU No. 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists" ("ASU 2013-11"). ASU 2013-11 requires an entity to present an unrecognized tax benefit as a reduction of a deferred tax asset for a net operating loss ("NOL") carryforward, or similar tax loss or tax credit carryforward, rather than as a liability when (1) the uncertain tax position would reduce the NOL or other carryforward under the tax law of the applicable jurisdiction and (2) the entity intends to use the deferred tax asset for that purpose. The ASU does not require new recurring disclosures. The provisions of ASU 2013-11 are effective prospectively for fiscal years, and interim periods within those years, beginning after December 15, 2013. The Company adopted this ASU on January 1, 2014 and the adoption of this ASU did not have a material impact on its financial statements.

2. Other Current Assets

Other current assets consist of the following at:

	December 31, 2014	December 31, 2013
	(in thousands)	
Notes receivable (See Note 3)	\$3,961	\$12,816
Prepaid expenses	12,280	13,746
Other current assets	3,081	3,148
Total	\$19,322	\$29,710

3. Notes Receivable and Allowance for Losses

The Company segregates its notes receivable for the purposes of evaluating allowances for credit losses between two categories: Mezzanine and Other Notes Receivable and Forgivable Notes Receivable. The Company utilizes the level of security it has in the various notes receivable as its primary credit quality indicator (i.e. senior, subordinated or unsecured) when determining the appropriate allowances for uncollectible loans within these categories.

Mezzanine and Other Notes Receivables

The Company has provided financing to franchisees in support of the development of properties in strategic markets. Interest income associated with these notes receivable is reflected in the accompanying consolidated statements of income under the caption interest income. The Company expects the owners to repay the loans in accordance with the loan agreements, or earlier as the hotels mature and capital markets permit. The Company estimates the collectibility and records an allowance for loss on its mezzanine and other notes receivable when recording the receivables in the Company's financial statements. These estimates are updated quarterly based on available information.

The Company considers a loan to be impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. All amounts due according to the contractual terms means that both the contractual interest payments and the contractual principal payments of a loan will be collected as scheduled in the loan agreement. The Company measures loan impairment based on the present value of expected future cash flows discounted at the loan's original effective interest rate or the estimated fair value of the collateral. For impaired loans, the Company establishes a specific impairment reserve for the difference between the recorded investment in the loan and the present value of the expected future cash flows or the estimated fair value of the collateral. The Company applies its loan impairment policy individually to all mezzanine and other notes receivable in the portfolio and does not aggregate loans for the purpose of applying such policy. For impaired loans, the Company recognizes interest income on a cash basis. If it is likely that a loan will

not be collected based on financial or other business indicators, it is the Company's policy to charge off these loans to SG&A expenses in the accompanying consolidated statements of income in the quarter when it is deemed uncollectible. Recoveries of impaired loans are recorded as a reduction of SG&A expenses in the quarter received. The Company assesses the collectibility of its senior notes receivable by comparing the market value of the underlying assets to the carrying value of the outstanding notes. In addition, the Company evaluates the property's operating performance,

78

Table of Contents

the borrower's compliance with the terms of the loan and franchise agreements, and all related personal guarantees that have been provided by the borrower. In addition, for properties under development, the Company evaluates the progress of development as compared to the project's development schedule and cost budget. For subordinated or unsecured receivables, the Company assesses the property's operating performance, the subordinated equity available to the Company, the borrower's compliance with the terms of loan and franchise agreements, and the related personal guarantees that have been provided by the borrower.

The Company considers loans to be past due and in default when payments are not made when due. Although the Company considers loans to be in default if payments are not received on the due date, the Company does not suspend the accrual of interest until those payments are more than 30 days past due. The Company applies payments received for loans on non-accrual status first to interest and then principal. The Company does not resume interest accrual until all delinquent payments are received.

The Company determined that approximately \$0.8 million and \$12.5 million of its mezzanine and other notes receivable were impaired at December 31, 2014 and 2013, respectively. The Company recorded an allowance for credit losses on these impaired loans at December 31, 2014 and December 31, 2013 totaling \$0.8 million and \$8.3 million respectively, resulting in a carrying value of impaired loans of \$0.0 million and \$4.2 million. For the years ended December 31, 2014 and 2013, the average mezzanine and other notes receivable on non-accrual status was approximately \$11.5 million and \$12.9 million, respectively. The Company recognized approximately \$0.2 million and \$0.4 million of interest income on impaired loans during the years ended December 31, 2014 and 2013, respectively, on the cash basis. The Company provided loan reserves on non-impaired loans totaling \$1.5 million and \$1.6 million at December 31, 2014 and 2013, respectively

Past due balances of mezzanine and other notes receivable by credit quality indicators are as follows:

	30-89 days Past Due	> 90 days Past Due	Total Past Due	Current	Total Mezzanine and Other Notes Receivables
As of December 31, 2014	(in thousands)				
Senior	\$—	\$—	\$—	\$10,152	\$10,152

Table of Contents

Loans Acquired with Deteriorated Credit Quality

On December 2, 2011, the Company acquired an \$11.5 million first mortgage, held on a franchisee hotel asset, from a financial institution for \$7.9 million. At the time of acquisition, the Company determined that it would be unable to collect all contractually required payments under the original mortgage terms. The contractually required payments receivable, including principal and interest, under the terms of the acquired mortgage totaled \$12.0 million. The Company expected to collect \$9.7 million of these contractually required payments. No prepayments were considered in the determination of contractual cash flows and cash flows expected to be collected. During the year ended December 31, 2014, the borrower repaid the Company an amount equal to its original loan acquisition cost of \$7.9 million and the Company does not expect to receive further payments. At December 31, 2013, the carrying amount of this loan, which was reported under senior mezzanine and other notes receivable, was \$7.9 million and there was no allowance for uncollectable amounts. The Company's accretable yield at acquisition was \$1.8 million or 7.36% and a reconciliation of the accretable yield for years ended December 31, 2014 and 2013 is as follows:

	Year Ended December 31,	
	2014	2013
	(in thousands)	
Balance, Beginning of Year	\$582	\$1,161
Additions	—	—
Accretion	(143) (579
Disposals	(439) —
Reclassifications from nonaccretable yield	—	—
Balance, End of Year	\$—	\$582

Significant Collection Activity

On December 30, 2014, the Company recovered a portion of a loan previously determined to be impaired. The impaired loan totaled \$9.6 million with a corresponding allowance of \$7.4 million for a net carrying amount of \$2.2 million. The Company recovered this impaired loan through acquisition of the underlying collateral of the promissory note. The underlying collateral for this loan represented the equity interest of a single-purpose limited liability company that owned a commercial office building in Columbus, Ohio and was obtained through a court ruling. The Company accounted for this transaction as a business combination and determined that the gross fair values of the assets and liabilities received totaled \$13.5 million and \$10.7 million, respectively. The fair values of the assets and liabilities acquired were determined utilizing non-recurring fair value measures such as comparable market transactions, replacement costs, and discounted cash flow analysis which utilized significant assumptions including market rental rates, discount rates, and market interest rates. The net fair value of the assets and liabilities received totaled \$2.8 million compared to a carrying value of the impaired loan of \$2.2 million. As a result, the Company recorded bad debt recoveries totaling \$0.6 million which are recorded in selling, general and administrative expenses in the Company's Consolidated Statements of Income.

Forgivable Notes Receivable

In conjunction with brand and development programs, the Company may provide financing to franchisees for property improvements and other purposes in the form of forgivable unsecured promissory notes which bear interest at market rates. Under these promissory notes, the franchisee promises to repay the principal balance together with interest upon maturity unless certain conditions are met throughout the term of the promissory note. The principal balance and related interest are forgiven ratably over the term of the promissory note if the franchisee remains in the system in good standing. If during the term of the promissory note, the franchisee exits our franchise system or is not operating their franchise in accordance with our quality or credit standards, the Company may declare a default under the promissory note and commence collection efforts with respect to the full amount of the then-current outstanding principal and interest.

In accordance with the terms of the promissory notes, the initial principal balance and related interest are ratably reduced over the term of the loan on each anniversary date until the outstanding amounts are reduced to zero as long as the franchisee remains within the franchise system and operates in accordance with our quality and brand standards.

As a result, the amounts recorded as an asset on the Company's consolidated balance sheet are also ratably reduced since the amounts forgiven no longer represent probable future economic benefits to the Company. The Company records the reduction of its recorded assets through amortization and marketing and reservation expense on its consolidated statements of income. Since these forgivable

80

Table of Contents

promissory notes receivable are predominately forgiven ratably over the term of the promissory note rather than repaid, the Company classifies the issuance and collection of these notes receivable as operating activities in its consolidated statement of cash flows.

The Company fully reserves all defaulted notes in addition to recording a reserve on the estimated uncollectible portion of the remaining notes. For those notes not in default, the Company calculates an allowance for losses and determines the ultimate collectability on these forgivable notes based on the historical default rates for those unsecured notes that are not forgiven but are required to be repaid. The Company records bad debt expense in SG&A and marketing and reservation expenses in the accompanying consolidated statements of income in the quarter when the note is deemed uncollectible.

As of December 31, 2014 and 2013, the unamortized balance of these notes totaled \$32.4 million and \$20.6 million, respectively. The Company recorded an allowance for credit losses on these forgivable unsecured notes receivable of \$3.7 million and \$1.7 million at December 31, 2014 and 2013, respectively. At December 31, 2014, the Company had \$1.2 million forgivable unsecured notes that were past due. At December 31, 2013, the Company did not have any forgivable unsecured notes that were past due. Amortization expense included in the accompanying consolidated statements of income related to the notes was \$5.0 million, \$4.2 million and \$2.8 million for the years ended December 31, 2014, 2013 and 2012, respectively.

A summary of the Company's notes receivable and related allowances are as follows:

Credit Quality Indicator	December 31, 2014 (in thousands)			December 31, 2013		
	Forgivable Notes Receivable	Mezzanine & Other Notes Receivable	Total	Forgivable Notes Receivable	Mezzanine & Other Notes Receivable	Total
Senior	\$—	\$ 10,152	\$ 10,152	\$—	\$ 18,052	\$ 18,052
Subordinated	—	3,863	3,863	—	14,152	14,152
Unsecured	32,379	3,995	36,374	20,625	3,405	24,030
Total notes receivable	32,379	18,010	50,389	20,625	35,609	56,234
Allowance for losses on non-impaired loans	3,661	1,540	5,201	1,650	1,607	3,257
Allowance for losses on receivables specifically evaluated for impairment	—	786	786	—	8,289	8,289
Total loan reserves	3,661	2,326	5,987	1,650	9,896	11,546
Net carrying value	\$28,718	\$ 15,684	\$44,402	\$ 18,975	\$ 25,713	\$44,688
Current portion, net	\$ 124	\$ 3,837	\$ 3,961	\$ 361	\$ 12,455	\$ 12,816
Long-term portion, net	28,594	11,847	40,441	18,614	13,258	31,872
Total	\$28,718	\$ 15,684	\$44,402	\$ 18,975	\$ 25,713	\$44,688

The Company classifies notes receivable due within one year as other current assets and notes receivable with a maturity greater than one year as other assets in the Company's consolidated balance sheets.

Table of Contents

The following table summarizes the activity related to the Company's Forgivable Notes Receivable and Mezzanine & Other Notes Receivable allowance for losses for the years ended December 31, 2014 and 2013:

	Year Ended December 31, 2014		Year Ended December 31, 2013	
	Forgivable Notes Receivable (in thousands)	Mezzanine & Other Notes Receivable	Forgivable Notes Receivable	Mezzanine & Other Notes Receivable

4. Property and Equipment

The components of property and equipment are:

	December 31, 2014	December 31, 2013
	(in thousands)	
Land and land improvements	\$3,107	\$2,490
Facilities in progress and software under development	10,408	6,435
Computer equipment and software	99,306	83,089
Buildings and leasehold improvements	37,013	38,403
Furniture, fixtures and equipment	15,326	16,371
Assets under capital lease	4,827	3,468
	169,987	150,256
Less: Accumulated depreciation and amortization	(92,678) (82,404
Property and equipment, at cost, net	\$77,309	\$67,852

As facilities in progress and software development are completed and placed in service, they are transferred to appropriate property and equipment categories and depreciation begins. Interest capitalized as a cost of property and equipment totaled \$0.4 million for the year ended December 31, 2014.

Unamortized capitalized software development costs at December 31, 2014 and 2013 totaled \$25.2 million and \$15.9 million, respectively. Amortization of software development costs for the years ended December 31, 2014, 2013 and 2012 totaled \$6.3 million, \$3.8 million and \$3.3 million, respectively.

Depreciation has been computed for financial reporting purposes using the straight-line method. A summary of the ranges of estimated useful lives upon which depreciation rates are based follows:

Computer equipment and software	2-5 years
Buildings and leasehold improvements	5-40 years
Furniture, fixtures and equipment	3-15 years
Assets under capital leases	3 - 8 years

Depreciation expense, excluding amounts attributable to marketing and reservation activities, for the years ended December 31, 2014, 2013 and 2012 was \$3.1 million, \$3.2 million and \$2.4 million, respectively. Accumulated amortization of capital leases, included in accumulated depreciation and amortization above, at December 31, 2014 and 2013 totaled \$2.0 million and \$1.4 million, respectively.

Table of Contents

5. Goodwill

Goodwill relates to the Company's franchising segment and was acquired in the following transactions (i) the purchase price of a minority interest in the Company for consideration in excess of the recorded minority interest and (ii) the acquisition of 100% of the stock of Suburban Franchise Holding Company, Inc. and its wholly-owned subsidiary, Suburban Franchise Systems, Inc. (iii) the acquisition of the remaining 60% ownership interest in Choice Hospitality (India) Ltd. The following table details the carrying amount of our goodwill at December 31, 2014 and 2013:

	December 31,	
	2014	2013
	(in thousands)	
Goodwill	\$66,005	\$66,005
Accumulated impairment losses	(192) (192
Net carrying amount	\$65,813	\$65,813

6. Franchise Rights and Other Identifiable Intangibles

The components of franchise rights and other identifiable intangible assets at December 31, 2014 and 2013 are as follows:

	December 31,	
	2014	2013
	(in thousands)	
Franchise rights, net of accumulated amortization	\$2,753	\$6,069
Other identifiable intangible assets, net of accumulated amortization	6,159	3,884
Total	\$8,912	\$9,953

Franchise rights represent the unamortized purchase price assigned to acquire long-term franchise contracts. As of December 31, 2014 and 2013, the unamortized balance relates primarily to the Econo Lodge, Suburban Extended Stay Hotel and Choice Hotels Australasia franchise rights. The franchise rights are being amortized over lives ranging from 5 to 25 years. Amortization expense for the years ended December 31, 2014, 2013 and 2012 amounted to \$3.3 million, \$3.5 million and \$3.7 million, respectively. Franchise rights are net of accumulated amortization of \$79.2 million and \$76.4 million at December 31, 2014 and 2013, respectively.

The estimated annual amortization expense related to the Company's franchise rights for each of the years ending December 31, 2015 through 2019 is as follows:

Year	(In millions)
2015	\$2.2
2016	\$0.3
2017	\$0.2
2018	\$—
2019	\$—

Other identifiable intangible assets consist of the cost of registering and renewing existing trademarks, acquiring new trademarks and intangible assets recognized at fair market value and the acquisition of income producing real estate. The intangible assets pertaining to the acquisition of income producing real estate total \$2.2 million and were recognized in conjunction with the acquisition of an office building on December 31, 2014. These amounts represent costs related to in-place leases which met the separability criterion in that they can be sold, transferred, licensed, rented, or exchanged in combination

Table of Contents

with a related contract, asset, or liability (i.e., the sale of the entire building). The costs are being amortized over the 36 year term of the in-place lease.

The costs of registering and renewing existing trademarks are being amortized primarily over ten years.

Approximately \$1.0 million of the Company's outstanding trademarks pertain to the Company's acquisition of the Suburban brand. These trademarks were determined to have an indefinite life and therefore, no amounts have been amortized.

Amortization expense for each of the years ended December 31, 2014, 2013 and 2012 amounted to \$0.6 million, \$0.5 million and \$0.5 million, respectively. Identifiable intangible assets are net of accumulated amortization of \$8.0 million and \$7.5 million at December 31, 2014 and 2013, respectively.

The estimated annual amortization expense related to the Company's other identifiable intangibles for each of the years ending December 31, 2015 through 2019 is as follows:

Year	(In millions)
2015	\$0.6
2016	\$0.5
2017	\$0.5
2018	\$0.4
2019	\$0.4

7. Marketing and Reservation Activities

The Company's franchise agreements require the payment of franchise fees, which include marketing and reservation system fees. The Company is obligated to use the marketing and reservation system revenues it collects from the current franchisees comprising its various hotel brands to provide marketing and reservation services appropriate to support the operation of the overall system. In discharging its obligation to provide sufficient and appropriate marketing and reservation services, the Company has the right to expend funds in an amount reasonably necessary to ensure the provision of such services, whether or not such amount is currently available to the Company for reimbursement. The franchise agreements provide the Company the right to advance monies to the franchise system when the needs of the system surpass the balances currently available. As a result, expenditures by the Company in support of marketing and reservation services in excess of available revenues are deferred and recorded as an asset in the Company's financial statements. Conversely, cumulative marketing and reservation system revenues not expended are recorded as a liability in the financial statements and are carried over to the next fiscal year and expended in accordance with the franchise agreements or utilized to reimburse the Company for prior year advances.

Under the terms of these agreements, the Company has the contractually enforceable right to assess and collect from its current franchisees, fees sufficient to pay for the marketing and reservation services the Company has procured for the benefit of the franchise system, including fees to reimburse the Company for past services rendered. The Company has the contractual authority to require that the franchisees in the system at any given point repay any deficits related to marketing and reservation activities. The Company's current franchisees are contractually obligated to pay any assessment the Company imposes on its franchisees to obtain reimbursement of such deficit regardless of whether those constituents continue to generate gross room revenue and whether or not they joined the system following the deficit's occurrence.

At December 31, 2013, the Company had incurred marketing and reservation system expenses in excess of cumulative marketing and reservation system fees earned of \$5.8 million. Based on the Company's analysis of projected net cash flows from marketing and reservation activities, the Company concluded that the cumulative advances for marketing and reservation activities recorded as an asset on the balance sheet at December 31, 2013 was fully recoverable and as a result no reserve for possible losses was recorded.

At December 31, 2014, cumulative marketing and reservation system fees billed exceeded expenses by \$44.3 million with the excess reflected as an other long-term liability in the accompanying consolidated balance sheets.

Depreciation and amortization expense attributable to marketing and reservation activities for the years ended

December 31, 2014, 2013 and 2012 was \$17.1 million, \$16.0 million and \$14.5 million, respectively. Interest expense attributable to reservation activities was \$1.9 million, \$3.7 million and \$4.0 million for the years ended December 31, 2014, 2013 and 2012, respectively.

Table of Contents

8. Other Assets

Other assets consist of the following at:

	December 31,	
	2014	2013
	(in thousands)	
Equity method investments	\$50,605	\$32,257
Deferred financing fees	7,228	8,954
Land	4,011	10,097
Other assets	3,452	856
Total	\$65,296	\$52,164

Land represents the Company's purchase of real estate as part of its program to incent franchise development in strategic markets for certain brands. The Company has acquired this real estate with the intent to resell it to third-party developers for the construction of hotels operated under the Company's brands or contribute the land into joint ventures for the same purpose. The real estate is carried at the lower of its carrying value or its estimated fair value (based on comparable sales), less estimated costs to sell.

Equity Method Investments - Variable Interest Entities

Equity method investments include investments in joint ventures totaling \$47.1 million and \$28.9 million at December 31, 2014 and 2013, respectively, that the Company has determined to be variable interest entities ("VIEs"). These investments relate to the Company's program to offer equity support to qualified franchisees to develop and operate Cambria Suites hotels in strategic markets. Based on an analysis of who has the power to direct the activities that most significantly impact these entities performance and who has an obligation to absorb losses of these entities or a right to receive benefits from these entities that could potentially be significant to the entity, the Company has determined that it is not the primary beneficiary of any of its VIEs. The Company based its qualitative analysis on its review of the design of the entity, its organizational structure including decision-making ability and the relevant development, operating management and financial agreements. Although the Company is not the primary beneficiary of these VIEs, it does exercise significant influence through its equity ownership and as a result the Company's investment in these entities is accounted for under the equity method. For the years ended December 31, 2014 and 2013, the Company recognized a \$1.5 million loss and \$8 thousand of net income from the investment in these entities, respectively. The Company's maximum exposure to losses related to its investments in VIEs is limited to its equity investments as well as certain guarantees as described in Note 26 "Commitments and Contingencies" of these financial statements.

Table of Contents

Equity method investment ownership interests at December 31, 2014 and 2013 are as follows:

Equity Method Investment	Ownership Interest	
	December 31, 2014	December 31, 2013
Main Street WP Hotel Associates, LLC	50	% 50
FBC-CHI Hotels LLC	40	% 40
CS Hotel 30W46th, LLC	25	% 25
CS Brickell, LLC	50	% —
CHH Plano, LLC	50	% 50
CS Maple Grove LLC	50	% 50
CS Hotel West Orange, LLC	50	% 50
Hotel JV Services, LLC	16	% 17
CS at Ninth, LLC	43	% 43
CS at Phoenix, LLC	50	% 50
CS Woodlands, LLC	50	% —
Choice Hotels Canada	50	% 50

The following tables present summarized financial information for all unconsolidated ventures in which the Company holds an investment that is accounted for under the equity method.

	Year Ended December 31,		
	2014	2013	2012
	(in thousands)		
Revenues	\$30,608	\$25,076	\$17,892
Operating income (loss)	(2,533) (752) (5,164

Termination benefits (see Note 25)	984	582
Other liabilities and contingencies	4,977	4,387
Total	\$63,530	\$56,625

10. Deferred Revenue

Deferred revenue consists of the following:

	December 31,	
	2014	2013
	(in thousands)	
Loyalty programs	\$57,757	\$53,875
Initial, relicensing and franchise fees	6,439	5,354
Procurement services fees	1,936	1,504
Other	250	455
Total	\$66,382	\$61,188

11. Other Non-Current Liabilities

Other non-current liabilities consist of the following at:

	December 31,	
	2014	2013
	(in thousands)	
Marketing and reservation liability (see Note 7)	\$44,272	\$—
Deferred rent and unamortized lease incentives	14,898	16,337
Uncertain tax positions	4,108	5,627
Deferred revenue	4,320	1,633
Other liabilities	2,306	211
Total	\$69,904	\$23,808

Uncertain tax positions have been recorded for potential exposures involving tax positions that could be challenged by taxing authorities.

Table of Contents

12. Debt

Debt consists of the following at:

	December 31, 2014	2013
	(in thousands)	
\$400 million senior unsecured notes with an effective interest rate of 6.0% at December 31, 2014 and 2013	\$400,000	\$400,000
\$250 million senior unsecured notes with an effective interest rate of 6.19%, less a discount of \$0.4 million at both December 31, 2014 and 2013	249,636	249,572
\$350 million senior secured credit facility with an effective interest rate of 2.17% at December 31, 2014 and 2013	129,375	138,750
Fixed rate collateralized mortgage plus a fair value adjustment of \$1.2 million with an effective interest rate of 4.65% at December 31, 2014	10,667	—
Economic development loans with an effective rate interest rate of 3.00% at December 31, 2014 and 2013	3,536	3,360

Senior Unsecured Notes Due 2022

On June 27, 2012, the Company issued unsecured notes in the principal amount of \$400 million (the "2012 Senior Notes") at par, bearing a coupon of 5.75% with an effective rate of 6.0%. The 2012 Senior Notes will mature on July 1, 2022, with interest to be paid semi-annually on January 1st and July 1st. The Company used the net proceeds of this offering, after deducting underwriting discounts and commissions and other offering expenses, together with borrowings under the Company's senior credit facility, to pay a special cash dividend totaling approximately \$600.7 million paid to stockholders on August 23, 2012. The Company's 2012 Senior Notes are guaranteed jointly, severally, fully and unconditionally, subject to certain customary limitations by eight wholly-owned domestic subsidiaries.

Table of Contents

The Company incurred debt issuance costs in connection with the 2012 Senior Notes totaling approximately \$7.5 million, which are included in other current assets and other assets on the Company's consolidated balance sheets. These debt issuance costs are amortized, utilizing the effective interest method through the maturity of the 2012 Senior Notes. Amortization of these costs is included in interest expense in the consolidated statements of income. The Company may redeem the 2012 Senior Notes at its option at a redemption price equal to the greater of (a) 100% of the principal amount of the notes to be redeemed and (b) the sum of the present values of the remaining scheduled principal and interest payments from the redemption date to the date of maturity discounted to the redemption date on a semi-annual basis at the Treasury Rate, plus 50 basis points.

Senior Unsecured Notes Due 2020

On August 25, 2010, the Company issued unsecured senior notes in the principal amount of \$250 million (the "2010 Senior Notes") at a discount of \$0.6 million, bearing a coupon of 5.7% with an effective rate of 6.19%. The 2010 Senior Notes will mature on August 28, 2020, with interest to be paid semi-annually on February 28th and August 28th. The Company used the net proceeds from the offering, after deducting underwriting discounts and other offering expenses, to repay outstanding borrowings and for other general corporate purposes. The Company's 2010 Senior Notes are guaranteed jointly, severally, fully and unconditionally, subject to certain customary limitations, by eight wholly-owned domestic subsidiaries.

Bond discounts incurred in connection with the 2010 Senior Notes are amortized on a straight-line basis, which is not materially different than the effective interest method, through the maturity of the 2010 Senior Notes. Amortization of these costs is included in interest expense in the consolidated statements of income.

The Company may redeem the 2010 Senior Notes at its option at a redemption price equal to the greater of (a) 100% of the principal amount of the notes to be redeemed and (b) the sum of the present values of the remaining scheduled principal and interest payments from the redemption date to the date of maturity discounted to the redemption date on a semi-annual basis at the Treasury Rate, plus 45 basis points.

Revolving Credit Facilities

On July 25, 2012, the Company entered into a \$350 million senior secured credit facility, comprised of a \$200 million revolving credit tranche (the "New Revolver") and a \$150 million term loan tranche (the "Term Loan") with Deutsche Bank AG New York Branch, as administrative agent, Wells Fargo Bank, National Association, as administrative agent and a syndication of lenders (the "New Credit Facility"). The New Credit Facility has a final maturity date of July 25, 2016, subject to an optional one-year extension provided certain conditions are met. Up to \$25 million of the borrowings under the New Revolver may be used for letters of credit, up to \$10 million of borrowings under the New Revolver may be used for swing-line loans and up to \$35 million of borrowings under the New Revolver may be used for alternative currency loans. The Term Loan requires quarterly amortization payments (a) during the first two years, in equal installments aggregating 5% of the original principal amount of the Term Loan per year, (b) during the second two years, in equal installments aggregating 7.5% of the original principal amount of the Term Loan per year, and (c) during the one-year extension period (if exercised), equal installments aggregating 10% of the original principal amount of the Term Loan.

The Company utilized the proceeds from the Term Loan and borrowings from the New Revolver, together with the net proceeds from the Company's 2012 Senior Notes offering, to pay during 2012 a special cash dividend of approximately \$600.7 million in the aggregate to the Company's stockholders on August 23, 2012.

The New Credit Facility is unconditionally guaranteed, jointly and severally, by certain of the Company's domestic subsidiaries. The subsidiary guarantors currently include all subsidiaries that guarantee the obligations under the Company's Indenture governing the terms of its 2010 and 2012 Senior Notes.

The New Credit Facility is secured by first priority pledges of (i) 100% of the ownership interests in certain domestic subsidiaries owned by the Company and the guarantors, (ii) 65% of the ownership interests in (a) the top-tier foreign holding company of Choice's foreign subsidiaries and (b) the domestic subsidiary that owns the top-tier foreign holding company of Choice's foreign subsidiaries and (iii) all presently existing and future domestic franchise agreements (the "Franchise Agreements") between the Company and individual franchisees, but only to the extent that

the Franchise Agreements may be pledged without violating any law of the relevant jurisdiction or conflicting with any existing contractual obligation of the Company or the applicable franchisee. At the time that the maximum total leverage ratio is required to be no greater than 4.0 to 1.00 (beginning of year 4 of the New Credit Facility), the security interest in the Franchise Agreements will be released.

Table of Contents

The Company may at any time prior to the final maturity date increase the amount of the New Credit Facility by up to an additional \$100 million to the extent that any one or more lenders commit to being a lender for the additional amount and certain other customary conditions are met. Such additional amounts may take the form of an increased revolver or term loan.

The Company may elect to have borrowings under the New Credit Facility bear interest at a rate equal to (i) LIBOR, plus a margin ranging from 200 to 425 basis points based on the Company's total leverage ratio or (ii) a base rate plus a margin ranging from 100 to 325 basis points based on the Company's total leverage ratio.

The New Credit Facility requires the Company to pay a fee on the undrawn portion of the New Revolver, calculated on the basis of the average daily unused amount of the New Revolver multiplied by 0.30% per annum.

The Company may reduce the New Revolver commitment and/or prepay the Term Loan in whole or in part at any time without penalty, subject to reimbursement of customary breakage costs, if any. Any Term Loan prepayments made by the Company shall be applied to reduce the scheduled amortization payments in direct order of maturity. Additionally, the New Credit Facility requires that the Company and its restricted subsidiaries comply with various covenants, including with respect to restrictions on liens, incurring indebtedness, making investments, paying dividends or repurchasing stock, and effecting mergers and/or asset sales. With respect to dividends, the Company may not make any payments if there is an existing event of default or if the payment would create an event of default. In addition, if the Company's total leverage ratio exceeds 4.50 to 1.00, the Company is generally restricted from paying aggregate dividends in excess of \$50.0 million during any calendar year.

The New Credit Facility also imposes financial maintenance covenants (as defined in the loan agreements) requiring the Company to maintain:

- a total leverage ratio of not more than 5.75 to 1.00 in year 1, 5.00 to 1.00 in year 2, 4.50 to 1.00 in year 3 and 4.00 to 1.00 thereafter,
- a maximum secured leverage ratio of not more than 2.50 to 1.00 in year 1, 2.25 to 1.00 in year 2, 2.00 to 1.00 in year 3 and 1.75 to 1.00 thereafter, and
- a minimum fixed charge coverage ratio of not less than 2.00 to 1.00 in years 1 and 2, 2.25 to 1.00 in year 3 and 2.50 to 1.00 thereafter.

At December 31, 2014, the Company maintained a total leverage ratio of 3.11x, a maximum secured leverage ratio of 0.51x and a minimum fixed charge ratio of 5.07x.

The New Credit Facility includes customary events of default, the occurrence of which, following any applicable cure period, would permit the lenders to, among other things, declare the principal, accrued interest and other obligations of the Company under the New Credit Facility to be immediately due and payable. At December 31, 2014, the Company was in compliance with all covenants under the New Credit Facility.

The Company incurred debt issuance costs in connection with the New Credit Facility totaling approximately \$3.7 million, which are included in other current assets and other assets on the Company's consolidated balance sheets. These debt issuance costs are amortized, on a straight-line basis, which is not materially different than the effective interest method, through the maturity of the New Credit Facility. Amortization of these costs is included in interest expense in the consolidated statements of income.

At December 31, 2014 and 2013, the Company had \$129.4 million and \$138.8 million, respectively, outstanding under the Term Loan and no amounts outstanding under the New Revolver.

In connection with entering into the New Credit Facility, the Company's \$300 million senior unsecured revolving credit agreement, dated as of February 24, 2011, among the Company, Wells Fargo Bank, National Association, as administrative agent, and a syndicate of lenders (the "Old Credit Facility"), was terminated and replaced by the New Credit Facility. Upon refinancing, the Company had unamortized deferred financing fees totaling \$1.7 million pertaining to the Old Credit Facility. Based on an analysis of the lenders participating in both the Old and New Credit Facilities, the Company recorded a loss on extinguishment of debt of approximately \$0.5 million during the year ended December 31, 2012. The remaining unamortized deferred fees related to the Old Credit Facility are being amortized, on a straight-line basis through the maturity of the New Credit Facility.

Borrowings under the Old Credit Facility bore interest at (i) a base rate plus a margin ranging from 5 to 80 basis points based on the Company's credit rating or (ii) LIBOR plus a margin ranging from 105 to 180 basis points based

on the Company's credit rating. In addition, the Old Credit Facility required the Company to pay a quarterly facility fee on the full

90

Table of Contents

amount of the commitments under the Old Credit Facility (regardless of usage) ranging from 20 to 45 basis points based upon the credit rating of the Company.

Fixed Rate Collateralized Mortgage

On December 30, 2014, a court awarded the Company title to an office building as settlement for a portion of an outstanding loan receivable for which the building was pledged as collateral. In conjunction with the court award, the Company also assumed the \$9.5 million mortgage on the property with a fixed interest rate of 7.26%. The mortgage which is collateralized by the office building requires monthly payments of principal and interest and matures in December 2020 with a balloon payment due of \$6.9 million. At the time of acquisition, the Company determined that the fixed interest rate of 7.26% exceeded market interest rates and therefore the Company increased the carrying value of the debt by \$1.2 million to record the debt at fair value. The fair value adjustment will be amortized over the remaining term of the mortgage utilizing the effective interest method.

Economic Development Loans

The Company entered into economic development agreements with various governmental entities in conjunction with the relocation of its corporate headquarters in April 2013. In accordance with these agreements, the governmental entities agreed to advance approximately \$4.4 million to the Company to offset a portion of the corporate headquarters relocation and tenant improvement costs in consideration of the employment of permanent, full-time employees within the jurisdictions. At December 31, 2014, the Company had been advanced approximately \$3.5 million pursuant to these agreements and expects to receive the remaining \$0.9 million over the next several years, subject to annual appropriations by the governmental entities. These advances bear interest at a rate of 3% per annum.

Repayment of the advances is contingent upon the Company achieving certain performance conditions. Performance conditions are measured annually on December 31st and primarily relate to maintaining certain levels of employment within the various jurisdictions. If the Company fails to meet an annual performance condition, the Company may be required to repay a portion or all of the advances including accrued interest by April 30th following the measurement date. Any outstanding advances at the expiration of the Company's ten year corporate headquarters lease in 2023 will be forgiven in full. The advances will be included in long-term debt in Company's consolidated balance sheets until the Company determines that the future performance conditions will be met over the entire term of the agreement and the Company will not be required to repay the advances. The Company accrues interest on the portion of the advances that it expects to repay. The Company was in compliance with all current performance conditions as of December 31, 2014.

13. Pension Plan

The Company sponsored an unfunded non-qualified defined benefit plan ("SERP") for certain senior executives. The Company accounted for the SERP in accordance with applicable guidance which required the Company to (a) recognize in its statement of financial position an asset for a plan's over funded status or a liability for a plan's underfunded status; (b) measure a plan's assets and its obligations that determine its funded status as of the end of the employer's fiscal year; and (c) recognize changes in the funded status of a defined benefit post-retirement plan in the year in which the changes occur. The plan assets and benefit obligations were measured as of the Company's fiscal year end.

On December 26, 2011, the Company's board of directors approved the termination of the SERP effective immediately. Pursuant to this termination, the Company effectuated the termination of the SERP through the payment of lump sum distributions to all SERP participants based upon the actuarial equivalent commuted lump sum value of the full accrued benefit earned by each such participant, using actuarial and other assumptions on December 27, 2012. No assets were held with respect to the SERP, therefore benefits were funded when paid to participants.

Table of Contents

The following is a reconciliation of the changes in the projected benefit obligation for the year ended December 31, 2012:

	December 31, 2012 (in thousands)	
Projected benefit obligation, beginning of year	\$11,896	
Interest cost	526	
Actuarial loss (gain)	(85)
Benefit payments	(414)
Settlement payments	(11,923)
Projected benefit obligation, end of year	\$—	

For the year ended December 31, 2012 the Company recorded \$2.8 million for the expenses related to the SERP which are included in SG&A and marketing and reservation expense in the accompanying consolidated statements of income.

The following table presents the components of net periodic benefit costs for the year ended December 31, 2012. No periodic benefit costs were incurred during the years ended December 31, 2014 and 2013 due to the 2012 settlement of the SERP:

	Year Ended December 31, 2012 (in thousands)	
Components of net periodic benefit cost:		
Interest cost	\$526	
Amortization of actuarial loss	128	
	654	
Settlement loss, net	2,162	
Net periodic benefit cost	\$2,816	
Weighted average assumption:		
Discount rate	4.50	%

As a result of the settlement of the SERP, the Company recognized a net settlement loss totaling \$2.2 million during the year ended December 31, 2012. The net settlement loss consisted of an actuarial gain of \$0.1 million representing the difference between actuarial calculation of the lump sum distribution to participants and the projected benefit obligation and the reclassification of the unamortized accumulated loss from other comprehensive loss to the net periodic benefit cost totaling \$2.3 million. Following the settlement of the SERP, there were no amounts in accumulated other comprehensive income (loss) that have not yet been recognized as a component of net periodic benefit costs.

14. Non-Qualified Retirement, Savings and Investment Plans

The Company sponsors two non-qualified retirement savings and investment plans for certain employees and senior executives. Employee and Company contributions are maintained in separate irrevocable trusts. Legally, the assets of the trusts remain those of the Company; however, access to the trusts' assets is severely restricted. The trusts cannot be revoked by the Company or an acquirer, but the assets are subject to the claims of the Company's general creditors. The participants do not have the right to assign or transfer contractual rights in the trusts.

In 2002, the Company adopted the Choice Hotels International, Inc. Executive Deferred Compensation Plan ("EDCP") which became effective January 1, 2003. Under the EDCP, certain executive officers may defer a portion of their salary into an irrevocable trust and invest these amounts in a selection of available diversified investment options. The Company recorded current and long-term deferred compensation liabilities of \$10.2 million and \$11.3 million at December 31, 2014 and 2013, respectively, related to these deferrals and credited investment returns. Compensation expense is recorded in SG&A expense on the Company's consolidated statements of income based on

the change in the deferred compensation obligation related to earnings credited to participants as well as changes in the fair value of diversified investments. Compensation expense recorded in SG&A for the years ended December 31, 2014, 2013 and 2012 were \$0.5 million, \$0.9 million and \$0.8 million, respectively.

Table of Contents

The Company has invested the employee salary deferrals in diversified long-term investments which are intended to provide investment returns that partially offset the earnings credited to the participants. The diversified investments held in the trusts totaled \$4.6 million and \$4.1 million as of December 31, 2014 and 2013, respectively, and are recorded at their fair value, based on quoted market prices. At December 31, 2014, the Company expects \$0.2 million of the assets held in the trust to be distributed during the year ended December 31, 2015 to participants. These investments are considered trading securities and therefore the changes in the fair value of the diversified assets is included in other gains and losses in the accompanying consolidated statements of income. The Company recorded investment gains (losses) during the years ended December 31, 2014, 2013 and 2012 of \$(49) thousand, \$0.3 million, and \$1.2 million, respectively. In addition, the EDCP Plan held shares of the Company's common stock with a market value of \$0.2 million and \$0.2 million at December 31, 2014 and 2013, respectively which were recorded as a component of shareholders' deficit.

In 1997, the Company adopted the Choice Hotels International, Inc. Non-Qualified Retirement Savings and Investment Plan ("Non-Qualified Plan"). The Non-Qualified Plan allows certain employees who do not participate in the EDCP to defer a portion of their salary and invest these amounts in a selection of available diversified investment options. As of December 31, 2014 and 2013, the Company had recorded a deferred compensation liability of \$14.4 million and \$13.7 million, respectively related to these deferrals. Compensation expense is recorded in SG&A expense on the Company's consolidated statements of income based on the change in the deferred compensation obligation related to earnings credited to participants as well as changes in the fair value of diversified investments. The net increase (decrease) in compensation expense recorded in SG&A for the years ended December 31, 2014, 2013 and 2012 were \$(0.3) million, \$1.7 million and \$0.7 million, respectively.

The diversified investments held in the trusts were \$13.1 million and \$12.3 million as of December 31, 2014 and 2013, respectively, and are recorded at their fair value, based on quoted market prices. These investments are considered trading securities and therefore the changes in the fair value of the diversified assets are included in other gains and losses in the accompanying consolidated statements of income. The Company recorded investment gains (losses) during the years ended December 31, 2014, 2013 and 2012 of \$(0.4) million, \$1.3 million and \$0.8 million, respectively. In addition, the Non-Qualified Plan held shares of the Company's common stock with a market value of \$1.3 million and \$1.4 million at December 31, 2014 and 2013, respectively.

15. Fair Value Measurements

The Company estimates the fair value of its financial instruments utilizing a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. The following summarizes the three levels of inputs, as well as the assets that the Company values using those levels of inputs.

Level 1: Quoted prices in active markets for identical assets and liabilities. The Company's Level 1 assets consist of marketable securities (primarily mutual funds) held in the Company's EDCP and Non-Qualified Plan deferred compensation plans.

Level 2: Observable inputs, other than quoted prices in active markets for identical assets and liabilities, such as quoted prices for similar assets and liabilities; quoted prices in markets that are not active; or other inputs that are observable. The Company's Level 2 assets consist of money market funds held in the Company's EDCP and Non-Qualified Plan deferred compensation plans and those recorded in cash and cash equivalents.

Level 3: Unobservable inputs, supported by little or no market data available, where the reporting entity is required to develop its own assumptions to determine the fair value of the instrument. The Company does not currently have any assets whose fair value was determined using Level 3 inputs.

The Company's policy is to recognize transfers in and transfers out of the three levels of the fair value hierarchy as of the end of each quarterly reporting period. There were no transfers between Level 1, 2 and 3 assets during the years ended December 31, 2014 and 2013.

Table of Contents

As of December 31, 2014 and 2013, the Company had the following assets measured at fair value on a recurring basis:

	Fair Value Measurements at			
	Total	Level 1	Level 2	Level 3
Assets (in thousands)				
December 31, 2014				
Money market funds, included in cash and cash equivalents	\$ 50,001	\$—	\$ 50,001	\$—
Mutual funds ⁽¹⁾	16,405	16,405	—	—
Money market funds ⁽¹⁾	1,348	—	1,348	—
	\$ 67,754	\$ 16,405	\$ 51,349	\$—
December 31, 2013				
Money market funds, included in cash and cash equivalents	\$ 50,001	\$—	\$ 50,001	\$—
Mutual funds ⁽¹⁾	14,564	14,564	—	—
Money market funds ⁽¹⁾	1,786	—	1,786	—
	\$ 66,351	\$ 14,564	\$ 51,787	\$—

⁽¹⁾ Included in Investments, employee benefit plans at fair value on consolidated balance sheets.

Other Financial Instruments

The Company believes that the fair values of its current assets and current liabilities approximate their reported carrying amounts due to the short-term nature of these items. In addition, the interest rates of the Company's New Credit Facility adjust frequently based on current market rates; accordingly its carrying amount approximates fair value.

The Company estimates the fair value of notes receivable which approximate their carrying value, utilizing an analysis of future cash flows and credit worthiness for similar types of arrangements. Based upon the availability of market data, the notes receivable have been classified as Level 3 inputs. The primary sensitivity in these calculations is based on the selection of appropriate interest and discount rates. For further information on the notes receivable see Note 3. The fair value of the Company's \$250 million and \$400 million senior notes are classified as Level 2 as the significant inputs are observable in an active market. At December 31, 2014 and 2013, the \$250 million senior notes had an approximate fair value of \$268.9 million and \$261.3 million, respectively. At December 31, 2014 and 2013, the \$400 million senior notes had an approximate fair value of \$437.7 million and \$416.0 million, respectively.

Fair values estimated are made at a specific point in time, are subjective in nature and involve uncertainties and matters of significant judgment. Settlement of such fair value amounts may be possible and may not be a prudent management decision.

16.401(k) Retirement Plan

The Company sponsors a 401(k) retirement plan for all eligible employees. For the years ended December 31, 2014, 2013 and 2012, the Company recorded compensation expense of \$3.5 million, \$3.7 million and \$3.7 million, respectively, representing matching contributions for plan participants. In accordance with the safe harbor matching provisions of the plan, the Company matches plan participant contributions in cash as bi-weekly deductions are made.

Table of Contents

17. Income Taxes

Total income from continuing operations before income taxes, classified by source of income, was as follows:

	Year Ended December 31,		
	2014	2013	2012
	(in thousands)		
U.S.	\$138,616	\$122,517	\$131,722
Outside the U.S.	35,142	36,155	37,784
Income from continuing operations before income taxes	\$173,758	\$158,672	\$169,506

The provision for income taxes, classified by the timing and location of payment, was as follows:

	Year Ended December 31,		
	2014	2013	2012
	(in thousands)		
Current tax expense			
Federal	\$67,985	\$46,925	\$40,821
State	6,278	4,891	4,705
Foreign	1,689	1,914	2,345
Deferred tax (benefit) expense			
Federal	(21,398) (7,011) (249
State	(2,116) (635) 101
Foreign	(153) (762) 505
Income taxes	\$52,285	\$45,322	\$48,228

Net deferred tax assets consisted of:

	December 31,	
	2014	2013
	(in thousands)	
Property, equipment and intangible assets	\$(8,687) \$(10,153
Accrued compensation	15,124	15,696
Accrued expenses	35,023	12,718
Foreign operations	790	603
Valuation allowance on foreign deferred tax assets	(153) (227
Foreign net operating losses	1,800	1,441
Valuation allowance on foreign net operating losses	(1,800) (1,441
Deferred tax asset on unrecognized tax positions	1,283	1,736
Other	1,026	1,162
Net deferred tax assets	\$44,406	\$21,535

As of December 31, 2014, the Company had foreign net operating loss carryforwards of approximately \$5.5 million before applying tax rates for the respective jurisdictions. These foreign net operating loss carryforwards have an indefinite life, subject to a full valuation allowance. In addition, the Company has recorded a valuation allowance on approximately \$0.5 million of foreign deferred tax assets before applying the tax rate of the respective jurisdiction.

Table of Contents

Balance sheet presentation:

	December 31,	
	2014	2013
	(in thousands)	
Current net deferred tax assets	\$23,860	\$26,684
Non-current net deferred tax assets (liabilities)	20,546	(5,149)
Net deferred tax assets	\$44,406	\$21,535

The statutory United States federal income tax rate reconciles to the effective income tax rates for continuing operations as follows:

	Year Ended December 31,					
	2014		2013		2012	
Statutory U.S. federal income tax rate	35.0	%	35.0	%	35.0	%
State income taxes, net of federal tax benefit	1.6	%	1.6	%	1.5	%
Benefits and taxes related to foreign operations	(6.2))%	(7.2))%	(8.5))%
Unrecognized tax positions	(0.4))%	(0.2))%	0.1	%
Adjustment to current and deferred taxes, prior years	—	%	—	%	(0.5))%
Other	0.1	%	(0.6))%	0.9	%
Effective income tax rates	30.1	%	28.6	%	28.5	%

The Company's effective income tax rates from continuing operations were 30.1% and 28.6% for the years ended December 31, 2014 and 2013, respectively. The effective tax rate for discontinued operations was 37.1% for the years ended December 31, 2014 and 2013.

The effective income tax rates for the years ended December 31, 2014 and 2013 were lower than the United States federal statutory rate of 35% primarily due to the recurring impact of foreign operations, partially offset by state income taxes. Additionally, the effective income tax rates for the years ended December 31, 2014 and 2013 were reduced by the settlement of unrecognized tax positions. The effective income tax rate for the year ended December 31, 2013 also included the impact of legislation retroactively extending the U.S. controlled foreign corporation look-through rules.

As of December 31, 2014 and 2013, the Company's gross unrecognized tax benefits totaled \$3.4 million and \$4.0 million, respectively. After considering the deferred income tax accounting impact, it is expected that \$2.8 million of the total as of December 31, 2014 would favorably affect the effective tax rate if resolved in the Company's favor. The following table presents a reconciliation of the beginning and ending amounts of unrecognized tax benefits:

	2014		2013		2012
	(in thousands)				
Balance, January 1	\$4,047		\$4,415		\$4,570
Changes for tax positions of prior years	5		503		410
Increases for tax positions related to the current year	1,201		1,164		—
Settlements and lapsing of statutes of limitations	(1,858))	(2,035))	(565)
Balance, December 31	\$3,395		\$4,047		\$4,415

It is reasonably possible that the Company's unrecognized tax benefits could decrease within the next 12 months by as much as \$3.4 million due to settlements and the expiration of applicable statutes of limitations.

The Internal Revenue Service has concluded their examination of the Company's United States federal income tax returns for all tax years prior to 2012. There were no significant adjustments.

Table of Contents

The practice of the Company is to recognize interest and penalties related to income tax matters in the provision for income taxes. The Company did not incur any material interest or penalties for 2014 and 2013. The Company had \$0.7 million and \$1.6 million of accrued interest and penalties at December 31, 2014 and 2013, respectively.

The Company has not provided deferred United States income taxes on approximately \$205.2 million of accumulated and undistributed earnings of its foreign subsidiaries. The Company's intent is for such earnings to be permanently reinvested in operations outside the United States. Determination of the deferred United States income tax liability on these earnings is not practicable because such liability, if any, is dependent on circumstances existing if and when remittance occurs.

18. Share-Based Compensation and Capital Stock

Dividends

The Company currently maintains the payment of a quarterly dividend on its common shares outstanding, however, the declaration of future dividends are subject to the discretion of our board of directors. During the years ended December 31, 2013 and 2012, the Company's board of directors declared quarterly cash dividends at a quarterly rate of \$0.185 per share for an annual rate of \$0.74 per share or \$43.2 million and \$42.7 million, respectively. The Company maintained its quarterly dividend rate of \$0.185 per share for the first three quarters of 2014. In the fourth quarter of 2014, the Company's board of directors announced an increase in the quarterly dividend rate to \$0.195 per share. As a result, annual dividends declared during the year ended December 31, 2014 were \$0.75 per share or \$43.8 million.

In addition, during the years ended December 31, 2014 and 2013, the Company paid previously declared but unrecorded dividends totaling \$0.4 million and \$0.5 million, respectively, that were contingent upon the vesting of performance vested restricted units. No dividends on performance vested restricted units were paid during the year ended December 31, 2012.

On July 26, 2012, the Company's board of directors declared a special cash dividend to common shareholders in the amount of \$10.41 per share or approximately \$600.7 million ("Special Cash Dividend") which was paid on August 23, 2012.

Share-Based Compensation

The Company recognizes compensation cost related to share-based payment transactions in the financial statements based on the fair value of the equity or liability instruments issued. Compensation expense related to the fair value of share-based awards is recognized over the requisite service period based on an estimate of those awards that will ultimately vest. The Company estimates the share-based compensation expense for awards that will ultimately vest at the inception of the grant. Over the life of the grant, the estimate of share-based compensation expense for awards with performance and/or service requirements is adjusted so that compensation cost is recognized only for awards that ultimately vest.

The Company has stock compensation plans pursuant to which it is authorized to grant stock-based awards of up to 7.6 million shares of the Company's common stock, of which 2.7 million shares remain available for grant as of December 31, 2014. The Company's policy allows the issuance of new or treasury shares to satisfy stock-based awards. Restricted stock, stock options, stock appreciation rights and performance share awards may be granted to officers, key employees and non-employee directors with contractual terms set by the Compensation and Management Development Committee of the Board of Directors.

Table of Contents

Stock Options

The Company granted approximately 0.7 million, 0.2 million and 0.2 million options to certain employees of the Company at a fair value of approximately \$5.7 million, \$1.7 million and \$1.6 million during the years ended December 31, 2014, 2013 and 2012, respectively. The stock options granted by the Company had an exercise price equal to the market price of the Company's common stock on the date of grant. The fair value of the options granted was estimated on the grant date using the Black-Scholes option-pricing model with the following weighted average assumptions:

	2014	2013	2012	
Risk-free interest rate	1.56	% 0.73	% 0.78	%
Expected volatility	25.01	% 38.14	% 40.15	%
Expected life of stock option	4.5 years	4.5 years	4.4 years	
Dividend yield	1.62	% 2.01	% 2.08	%
Requisite service period	4 years	4 years	4 years	
Contractual life	7 years	7 years	7 years	
Weighted average fair value of options granted (per option)	\$8.82	\$9.89	\$9.98	

The expected term of the options and volatility are based on the historical data which is believed to be indicative of future exercise patterns and volatility. Historical volatility is calculated based on a period that corresponds to the expected term of the stock option. The dividend yield and the risk-free rate of return are calculated on the grant date based on the then current dividend rate and the risk-free rate for the period corresponding to the expected life of the stock option. Compensation expense related to the fair value of these awards is recognized straight-line over the requisite service period based on those awards that ultimately vest.

The aggregate intrinsic value of stock options outstanding and exercisable at December 31, 2014 was \$43.7 million and \$30.8 million respectively. The total intrinsic value of options exercised during the years ended December 31, 2014, 2013 and 2012 was \$10.1 million, \$5.2 million and \$2.8 million, respectively.

The Company received \$10.1 million, \$8.9 million, and \$7.1 million in proceeds from the exercise of 0.4 million, 0.3 million and 0.3 million employee stock options during the years ended December 31, 2014, 2013 and 2012, respectively.

The following table summarizes information about stock options outstanding at December 31, 2014:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding at December 31, 2014	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number Exercisable at December 31, 2014	Weighted Average Exercise Price
\$ 0.00 to \$24.37	337,565	1.1 years	\$20.57	337,565	\$20.57
\$24.38 to \$29.25	591,074	2.4 years	\$25.84	494,330	\$25.61
\$29.26 to \$34.12	163,058	3.1 years	\$31.31	122,288	\$31.31
\$34.13 to \$39.00	163,975	5.1 years	\$36.76	40,990	\$36.76
\$43.88 to \$48.75	647,505	6.2 years	45.59	—	—
	1,903,177	3.8 years	\$33.03	995,173	\$25.06

Special Dividend Adjustment

The Company's long-term incentive plans ("the Plans") contain provisions which require the automatic adjustment of outstanding share-based awards in the event that the Company makes any changes to its capital structure, such as special dividends, stock splits or spin-offs, if such changes result in the dilution or enlargement of the benefits or potential benefits

intended upon the grant of the award. The Company's board of directors concluded that the Special Cash Dividend paid on

August 23, 2012 would result in the dilution of the value of the Company's outstanding stock options. Therefore, in accordance

with the anti-dilution provision of the Plans, the Company's outstanding stock options were automatically adjusted to maintain their pre-dividend value. The Company elected to maintain the pre-dividend value of the outstanding options by adjusting both the exercise price and the number of stock options outstanding as of the ex-dividend date of the Special Dividend so that the

aggregate difference between the market price and exercise price multiplied by the number of shares issuable upon exercise

Table of Contents

was substantially the same immediately before and after the payment of the Special Cash Dividend. As a result of this adjustment, an additional 0.5 million stock options were awarded during the year ended December 31, 2012 and the exercise price of the outstanding options were reduced by approximately 24%. This adjustment did not result in additional stock-based compensation expense as the fair value of the options immediately before and after the payment of the Special Cash Dividend was substantially equal.

Restricted Stock

The following table is a summary of activity related to restricted stock grants for the year ended December 31:

	2014	2013	2012
Restricted shares granted	154,833	225,240	266,159
Weighted average grant date fair value per share	\$46.81	\$37.74	\$35.76
Aggregate grant date fair value (\$000)	\$7,248	\$8,500	\$9,517
Restricted shares forfeited	23,804	40,552	26,824
Vesting service period of shares granted	12 - 48 months	12 - 48 months	12-68 months
Grant date fair value of shares vested (\$000)	\$10,280	\$8,569	\$6,696

Compensation expense related to the fair value of these awards is recognized straight-line over the requisite service period based on those restricted stock grants that ultimately vest. The fair value of grants is measured by the market price of the Company's common stock on the date of grant. Restricted stock awards generally vest ratably over the service period beginning with the first anniversary of the grant date. Awards granted to retirement eligible non-employee directors are recognized over the shorter of the requisite service period or the length of time until retirement since the terms of the grant provide that awards will vest upon retirement.

Performance Vested Restricted Stock Units

The Company has granted performance vested restricted stock units ("PVRSU") to certain employees. The fair value is measured by the market price of the Company's common stock on the date of grant. The vesting of these stock awards is contingent upon the Company achieving performance targets at the end of specified performance periods and the employees' continued employment. The performance conditions affect the number of shares that will ultimately vest. The range of possible stock-based awards vesting is generally between 0% and 200% of the initial target. If minimum performance targets are not attained then no awards will vest under the terms of the various PVRSU agreements. Compensation expense related to these awards is recognized over the requisite period based on the Company's estimate of the achievement of the various performance targets. The Company has currently estimated that between 0% and 180% of the various award targets will be achieved. Compensation expense is recognized ratably over the requisite service period only on those PVRSUs that ultimately vest.

The following table is a summary of activity related to PVRSU grants for the years ended December 31, 2014, 2013 and 2012:

	2014	2013	2012
Performance vested restricted stock units granted at target	24,678	80,184	117,523
Weighted average grant date fair value per share	\$45.59	\$39.48	\$35.27
Aggregate grant date fair value (\$000)	\$1,125	\$3,165	\$4,145
Stock units forfeited	22,099	3,334	57,176
Requisite service period	36 months	22-38 months	24-60 months

During the year ended December 31, 2014, a total of 28,886 PVRSU grants vested at a fair value of \$1.4 million. These PVRSU grants were initially granted at a target of 18,635 units. However, since the Company achieved 155% of the targeted performance conditions contained in the stock awards granted in prior periods, an additional 10,251

shares were earned and issued. During the year ended December 31, 2013, a total of 39,816 PVRSU grants vested at a fair value of \$1.5 million. These PVRSU grants were initially granted at a target of 30,624 units. However, since the Company achieved 130% of the targeted performance conditions contained in the stock awards granted in prior periods, an additional 9,192 shares were earned and issued. During the year ended December 31, 2012, no PVRSU grants vested.

Table of Contents

During the year ended December 31, 2014 and 2013, PVRSU grants totaling 22,099 units and 3,334 units, respectively, were forfeited due to termination of employment. During the year ended December 31, 2012, PVRSU grants totaling 57,176 units were terminated in accordance with an amended and restated employment agreement of an executive officer.

A summary of stock-based award activity as of December 31, 2014, 2013 and 2012 and the changes during the years are presented below:

	2014			Restricted Stock		Performance Vested Restricted Stock Units	
	Stock Options			Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value

---	-----------	---------	-----------

* PVRSU units outstanding have been increased by 9,192 units during the year ended December 31, 2013, due to the Company exceeding the targeted performance conditions contained in PVRSU's granted in prior periods.

Table of Contents

	2012			Restricted Stock		Performance Vested Restricted Stock Units	
	Stock Options			Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value
	Options	Weighted Average Exercise Price ⁽¹⁾	Weighted Average Remaining Contractual Life				
Outstanding at January 1, 2012	1,573,726	\$33.30		565,627	\$ 34.43	109,769	\$ 35.57
Granted	160,408	\$35.60		266,159	\$ 35.76	117,523	\$ 35.27
Special Dividend Adjustment	497,497	\$25.31		—	—	—	—
Exercised/Vested	(266,754)	\$26.57		(198,415)	\$ 33.75	—	—
Forfeited	(30,843)	\$36.67		(26,824)	\$ 36.06	(57,176)	\$ 34.98
Outstanding at December 31, 2012	1,934,034	\$25.80	4.0 years	606,547	\$ 35.17	170,116	\$ 35.56
Options exercisable at December 31, 2012	1,302,624	\$25.62	3.1 years				

⁽¹⁾ The weighted average exercise price for options outstanding and exercisable reflect the reduction of the option price for outstanding options as described under "Special Dividend Adjustment". The weighted average exercise price for options granted, exercised or forfeited reflects the option price in effect at the time of the transaction. The components of the Company's pretax stock-based compensation expense and associated income tax benefits are as follows for the years ended December 31:

(in millions)	2014	2013	2012
Stock options	\$2.4	\$1.8	\$2.1
Restricted stock	7.2	7.5	7.5
Performance vested restricted stock units	(0.2)	2.2	1.7
Total	\$9.4	\$11.5	\$11.3
Income tax benefits	\$3.5	\$4.2	\$4.1

During all years presented, the Company revised its estimate of the projected achievement of various performance conditions that affect the number of PVRsUs that will ultimately vest. As a result, previously recognized stock-based compensation costs related to these PVRsUs has been decreased by \$1.3 million for the year ended December 31, 2014 and decreased by \$0.3 million and increased by \$0.5 million during the years ended December 31, 2013 and 2012, respectively.

The total unrecognized compensation costs related to stock-based awards that have not yet vested and the related weighted average amortization period over which the costs are to be recognized as of December 31, 2014 are as follows:

	Unrecognized Compensation Expense on Unvested Awards	Weighted Average Remaining Amortization Period
	(in millions)	
Stock options	\$ 5.7	2.8 years

Restricted stock	11.9	2.4 years
Performance vested restricted stock units	1.8	2.0 years
Total	\$ 19.4	

Share Repurchases and Redemptions

The Company announced a stock repurchase program on June 25, 1998 to return excess capital to its shareholders. Treasury stock activity is recorded at cost in the accompanying consolidated financial statements. During the year ended December 31, 2014, the Company repurchased 1.4 million of its common stock under the repurchase program at a total cost of \$72.6 million. These shares were purchased from family members of the Company's largest shareholder. There were no share

Table of Contents

repurchases during the year ended December 31, 2013. During the year ended December 31, 2012, the Company purchased 0.5 million shares of its common stock under the repurchase program at a total cost of \$19.9 million. Through December 31, 2014, the Company repurchased 46.7 million shares of its common stock (including 33.0 million prior to the two-for-one stock split effected in October 2005) under the share repurchase program at a total cost of \$1.2 billion.

During 2014, the Company redeemed 110,579 shares of common stock at a total cost of \$5.3 million from employees to satisfy the option price and minimum tax-withholding requirements related to the exercising of options and vesting of performance vested restricted stock units and restricted stock grants. During 2013 and 2012, the Company redeemed 103,880 and 75,105 shares of common stock at a total cost of \$4.0 million and \$2.7 million, respectively. These redemptions were outside the share repurchase program initiated in June 1998.

Other

Effective January 1, 2014, the Company reduced its reported number of common shares outstanding by 0.3 million shares to address a reconciling item with the Company's share transfer agent.

19. Accumulated Other Comprehensive Loss

The components of accumulated other comprehensive loss is as follows:

	December 31,		
	2014	2013	2012
	(in thousands)		
Foreign currency translation adjustments	\$(2,087) \$(472) \$2,391
Deferred loss on cash flow hedge	(4,884) (5,745) (6,607
Total accumulated other comprehensive loss	\$(6,971) \$(6,217) \$(4,216

Cash Flow Hedge

In July 2010, the Company entered into an interest rate swap agreement to protect itself from an increase in the market interest rate on \$250 million of 10-year, fixed rate debt with the coupon to be set at market interest rates. The interest rate swap agreement was designated as a cash flow hedge under the guidance for derivatives and hedging. In August 2010, upon issuance of the related fixed-rate debt, the Company terminated and settled the interest rate swap agreement for a cash payment of \$8.7 million. The Company recorded the effective portion of this deferred loss as a component of accumulated other comprehensive income (loss). The ineffective portion was recognized immediately as a component of earnings under interest expense in the Company's consolidated statements of income. The effective portion of the deferred loss is being amortized over the term of the related debt as interest expense in the Company's consolidated statements of income.

Table of Contents

The following represents the changes in accumulated other comprehensive loss, net of tax by component for the years ended December 31, 2014 and 2013:

	Year Ended December 31, 2014			Year Ended December 31, 2013		
	Loss on Cash Flow Hedge (in thousands)	Foreign Currency Items	Total	Loss on Cash Flow Hedge (in thousands)	Foreign Currency Items	Total
Beginning Balance	\$ (5,745)	\$ (472)	\$ (6,217)	\$ (6,607)	\$ 2,391	\$ (4,216)
Other comprehensive income (loss) before reclassification	—	(1,615)	(1,615)	—	(2,863)	(2,863)
Amounts reclassified from accumulated other comprehensive income (loss)	861	—	861	862	—	862
Net current period other comprehensive income (loss)	861	(1,615)	(754)	862	(2,863)	(2,001)
Ending Balance	\$ (4,884)	\$ (2,087)	\$ (6,971)	\$ (5,745)	\$ (472)	\$ (6,217)

The amounts reclassified from other accumulated other comprehensive income (loss) during the years ended December 31, 2014 and 2013 were reclassified to the following line items in the Company's Consolidated Statements of Income.

Component	Amount Reclassified from Accumulated Other Comprehensive Income(Loss) Year Ended		Affected Line Item in the Consolidated Statement of Income
	Year Ended December 31, 2014 (in thousands)	Year Ended December 31, 2013	
Loss on cash flow hedge			
Interest rate contract	\$ 861	\$ 862	Interest expense
	—	—	Tax (expense) benefit
	\$ 861	\$ 862	Net of tax

Table of Contents

20. Earnings Per Share

The computation of basic and diluted earnings per common share is as follows:

	Year Ended December 31,		
	2014	2013	2012
	(in thousands, except per share amounts)		
Computation of Basic Earnings Per Share:			
Numerator:			
Net income from continuing operations	\$121,473	\$113,350	\$121,278
Net income from discontinued operations	1,687	359	335
Net income	123,160	113,709	121,613
Income allocated to participating securities	(1,075) (1,127) (1,281
Net income available to common shareholders	\$122,085	\$112,582	\$120,332
Denominator			
Weighted average common shares outstanding -- basic	57,730	57,925	57,467
Basic earnings per share -- Continuing operations	\$2.08	\$1.94	\$2.09
Basic earnings per share -- Discontinued operations	0.03	—	—
	\$2.11	\$1.94	\$2.09
Computation of Diluted Earnings Per Share:			
Numerator:			
Net income from continuing operations	\$121,473	\$113,350	\$121,278
Net income from discontinued operations	1,687	359	335
Net income	123,160	113,709	121,613
Income allocated to participating securities	(1,069) (1,122) (1,299
Net income available to common shareholders	\$122,091	\$112,587	\$120,314
Denominator:			
Weighted average common shares outstanding -- basic	57,730	57,925	57,467
Diluted effect of stock options and PVRsUs	526	410	186
Weighted average commons shares outstanding -- diluted	58,256	58,335	57,653
Diluted earnings per share -- Continuing operations	\$2.07	\$1.92	\$2.08
Diluted earnings per share -- Discontinued operations	0.03	0.01	0.01
	\$2.10	\$1.93	\$2.09

The Company's unvested restricted shares contain rights to receive non-forfeitable dividends and thus are participating securities requiring the two-class method of computing earnings per share ("EPS"). The calculation of EPS for common stock shown above excludes the income attributable to the unvested restricted share awards from the numerator and excludes the dilutive impact of those awards from the denominator.

At December 31, 2014, 2013, and 2012, the Company had 1.9 million, 1.7 million and 1.9 million outstanding stock options, respectively. Stock options are included in the diluted earnings per share calculation using the treasury stock method and average market prices during the period, unless the stock options would be anti-dilutive. For the years ended December 31, 2014 and 2013, no anti-dilutive stock options were excluded from the diluted earnings per share calculation. For the year ended December 31, 2012, the Company excluded 0.3 million of anti-dilutive stock options from the diluted earnings per share calculation.

PVRsUs are also included in the diluted earnings per share calculation if the performance conditions have been met at the reporting date. However, at December 31, 2014, 2013, and 2012, PVRsUs totaling 161,810, 197,707 and 139,492 respectively, were excluded from the computation since the performance conditions had not been met at the reporting date.

Table of Contents

21. Operating Leases

The Company enters into operating leases primarily for office space, office equipment and transportation vehicles. Minimum rents as defined in the Company's lease agreements including rent escalations, rent holidays and rental concessions are recognized on the straight-line basis over the non-cancellable lease term. Payments made to or on behalf of the Company for leasehold improvement incentives are considered reductions in rental expense and are amortized on a straight-line basis over the non-cancellable lease term. Rental expense under non-cancellable operating leases was approximately \$10.4 million, \$12.6 million and \$9.2 million for the years ended December 31, 2014, 2013 and 2012, respectively. The Company received sublease rental income related to real estate leased to third-parties totaling \$0.4 million, \$0.3 million and \$0.3 million during the years ended December 31, 2014, 2013 and 2012.

Future minimum lease payments are as follows:

	2015	2016	2017	2018	2019	Thereafter	Total
	(in thousands)						
Minimum lease payments	\$ 11,604	\$ 11,532	\$ 10,856	\$ 9,897	\$ 9,286	\$ 26,403	\$ 79,578
Minimum sublease rentals	(75)	—	—	—	—	—	(75)
	\$ 11,529	\$ 11,532	\$ 10,856	\$ 9,897	\$ 9,286	\$ 26,403	\$ 79,503

22. Condensed Consolidating Financial Statements

The Company's Senior Notes due 2020 and 2022 are guaranteed jointly, severally, fully and unconditionally, subject to certain customary limitations, by eight wholly owned domestic subsidiaries. There are no legal or regulatory restrictions on the payment of dividends to Choice Hotels International, Inc. from subsidiaries that do not guarantee the Senior Notes. As a result of the guarantee arrangements, the following condensed consolidating financial statements are presented. Investments in subsidiaries are accounted for under the equity method of accounting.

Table of Contents

23. Reportable Segment Information

Franchising: Franchising includes the Company's hotel franchising operations consisting of its eleven brands. The eleven brands are aggregated within this segment considering their similar economic characteristics, types of customers, distribution channels and regulatory business environments. Revenues from the franchising business include royalty fees, initial franchise and relicensing fees, marketing and reservation system fees, procurement services revenue and other franchising related revenue. The Company is obligated under its franchise agreements to provide marketing and reservation services appropriate for the operation of its systems. These services do not represent separate reportable segments as their operations are directly related to the Company's franchising business. The revenues received from franchisees that are used to pay for part of the Company's ongoing operations are included in franchising revenues and are offset by the related expenses paid for marketing and reservation activities to calculate franchising operating income.

SkyTouch Technology: SkyTouch Technology ("SkyTouch") is a division of the Company that develops and markets cloud-based technology products to hoteliers not under franchise agreements with the Company.

The Company evaluates its segments based primarily on the results of the segment without allocating corporate expenses, income taxes or indirect general and administrative expenses. Equity in earnings or losses from franchising related joint ventures is allocated to the Company's franchising segment. Corporate and other expenses consist primarily of overhead selling, general and administrative costs such as finance, legal, human resources and other general administrative expenses that are not allocated to the Company's two segments. As described in Note 7, certain interest expenses related to the Company's marketing and reservation activities are allocated to the franchising segment. The Company does not allocate the remaining interest expense, interest income, other gains and losses or income taxes to its segments.

The Company conducts its international franchise operations through a combination of direct franchising and master franchising relationships. Master franchising relationships allow the use of the Company's brands by third parties in foreign countries. Direct franchising operations are primarily conducted through wholly-owned subsidiaries. The results of the Company's international operations are included in the franchising segment. Revenues generated by foreign operations, including royalty, marketing and reservations system fees and other revenues for the years ended December 31, 2014, 2013 and 2012 were \$57.6 million, \$57.3 million and \$55.6 million, respectively. Long-lived assets related to international operations were \$4.5 million, \$8.6 million and \$8.2 million as of December 31, 2014, 2013 and 2012, respectively. All other long-lived assets of the Company are associated with domestic activities. The Company's investment in equity method investees at December 31, 2014, 2013 and 2012 was \$50.6 million, \$32.3 million, and \$27.5 million, respectively. These investments are included as a component of total assets for the Company's franchising segment.

Table of Contents

24. Related Party Transactions

Transactions with Company's Largest Shareholder

Effective October 15, 1997, Choice Hotels International, Inc. which included both a franchising business and owned hotel business, separated the businesses via a spin-off into two companies: Sunburst Hospitality Corporation (referred to hereafter as "Sunburst") and the Company. Subsequent to the spin-off, the Company's largest shareholder retained significant ownership percentages in both Sunburst and the Company. As part of the spin-off, Sunburst and the Company entered into a strategic alliance agreement. Among other things, the strategic alliance agreement, as amended, provided for the determination of liquidated damages related to the termination of Choice branded Sunburst properties. The liquidated damage provisions extend through the life of the existing Sunburst franchise agreements. As of December 31, 2014, Sunburst operates 10 hotels under franchise with the Company.

Total franchise fees, including royalty, marketing and reservation system fees, paid by Sunburst to the Company, included in the accompanying consolidated financial statements were \$2.4 million, \$2.6 million and \$2.6 million for the years ended December 31, 2014, 2013 and 2012, respectively. As of December 31, 2014 and 2013, accounts receivable included \$0.2 million and \$0.2 million, respectively, due from Sunburst.

Through June 3, 2013, the Company maintained a Master Aircraft Lease Agreement with LP_C, LLC ("LPC"), which is owned by family members of the Company's largest shareholder. The agreement permitted the Company to lease an aircraft owned by LPC. During the years ended December 31, 2013 and 2012, the Company incurred \$0.3 million and \$0.3 million, respectively, pursuant to the lease agreement.

On June 3, 2013, an unrelated financial institution purchased the aircraft from LPC pursuant to a purchase agreement between LPC and the Company which the Company assigned to the financial institution. Simultaneously, the financial institution entered into an agreement with the Company to lease the aircraft. In connection with the lease of the aircraft by the Company, the Company and family members of the Company's largest shareholder entered into an agreement that allows those family members to sub-lease the aircraft from the Company from time to time for their personal use. The agreements provide for lease payments that contribute towards the fixed costs associated with the aircraft as well as reimbursement of the Company's variable costs associated with operation of the aircraft, in compliance with, and to the extent authorized by, applicable regulatory requirements. The terms of the sub-lease agreements are consistent with the terms of sub-lease agreements that the Company has entered into with unrelated third parties for use of the aircraft. During the year ended December 31, 2014, the Company received \$0.1 million pursuant to this arrangement. During 2013, no amounts were paid to the Company pursuant to this agreement.

Through May 2013 (which was the expiration date of the Company's master lease), the Company subleased space in its corporate headquarters complex for use by a non-profit organization. Several family members of the Company's largest shareholder serve as members of the board of directors of this non-profit organization. The Company donated the entire space utilized by the non-profit organization, as a result, no rent payments were received. Upon the expiration of the Company's corporate headquarter lease, the Company provided a \$0.1 million contribution to the non-profit organization to defray their costs of transitioning to new office space.

The Company maintained a lease agreement on behalf of a family member of the Company's largest shareholder for 1,950 square feet of office space located in Chevy Chase, Maryland. The lease had a 5 year term ending in 2013 with annual lease payments totaling approximately \$72,000. In August 2012, the Company amended the terms of this lease to increase the square footage to 2,154 and extend the lease term until 2016. Annual rent payments under the amended lease terms total approximately \$84,000. The Company provided the use of the entire leased space free of charge and reimbursed the family member for the taxes incurred related to the personal use of the office space. These payments ranged between \$30,000 and \$50,000 per year over the last three years. The lease was terminated as of September 30, 2014, and a \$102,840 termination payment was made to the landlord in connection with the early termination.

In December 2008, the Company's board of directors approved an arrangement with an entity controlled by the family members of the Company's largest shareholder to permit this entity to utilize services of a particular Company employee. Under the terms of the agreement, the related party is permitted to utilize up to 50% of the designated employee's overall working time and in return is required to reimburse the Company for 50% of the Company's overall costs associated with the individual's employment. This arrangement was terminated in January 2013. During the years ended December 31, 2013 and 2012, the Company received payments pursuant to this arrangement totaling

\$37 thousand and \$0.2 million, respectively.

In December 2013, the Company's board of directors approved an arrangement with an entity controlled by the family members of the Company's largest shareholder to sublease approximately 2,200 square feet of office space located in Chevy Chase, Maryland. The lease has a month to month term, with a 90 day notice period, and annual lease payments totaling

119

Table of Contents

approximately \$90,000. During the years ended December 31, 2014 and 2013, the Company recorded approximately \$90,000 and \$15,000, respectively, in rent expense associated with this lease.

Transactions with Unconsolidated Joint Ventures

In December 2012, the Company entered into a \$19.5 million promissory note with Concord 46th NYC, LLC ("Concord"). The Company and Concord are both members in a limited liability company whose sole business and purpose is to develop and operate a Cambria hotel & suites hotel in the borough of Manhattan in New York City ("the Joint Venture"). The proceeds from the promissory note were utilized to partially finance the construction of the Cambria Suites hotel by the Joint Venture.

The promissory note matures in two tranches with \$9.5 million of the promissory note maturing during the year ended December 31, 2013 and the remaining \$10.0 million maturing on the fifth anniversary date of the promissory note. The promissory note bears interest at a fixed rate of interest which increases from 6% to 8% after the completion of the hotel construction. Interest is payable quarterly during the hotel construction and due monthly, thereafter. During the year ended December 31, 2013, the Company was repaid the first tranche of the promissory note or \$9.5 million. The promissory note is secured by a pledge of 100% of Concord's membership interests in the Joint Venture. In addition, the members of Concord have unconditionally guaranteed and agreed to be fully and personally liable for the entire outstanding amount of the promissory note. If Concord defaults under the terms of the promissory note, the Company may purchase Concord's interest in the Joint Venture for the sum of one dollar.

In July 2014, the Company sold a parcel of land to FBC-CHI Hotels, LLC ("FBC") for \$6.5 million in exchange for cash and an equity investment in the joint venture. No gain or loss was recognized on the sale. FBC is an unconsolidated limited liability company whose sole business and purpose is to develop and operate Cambria hotel & suites hotels.

25. Termination Charges

During the year ended December 31, 2014 the Company recorded a \$1.8 million charge in SG&A and marketing and reservation expenses related to salary and benefit continuation termination benefits provided to employees separating from service with the Company and remitted approximately \$0.8 million of these benefits during the current year. At December 31, 2014, approximately \$1.0 million of these salary and benefits continuation payments remain to be remitted.

During the year ended December 31, 2013, the Company recorded a \$1.7 million charge in SG&A and marketing and reservation expenses related to salary and benefit continuation termination benefits provided to employees separating from service with the Company. During the years ended December 31, 2014 and 2013, the Company remitted \$0.6 million and \$1.1 million, respectively, related to these salary and benefit continuation benefits and at December 31, 2014 all benefits incurred had been remitted.

During the year ended December 31, 2012, the Company recorded a \$2.9 million charge in SG&A and marketing and reservation expenses related to salary and benefit continuation termination benefits provided to employees separating from service with the Company. During the years ended December 31, 2013 and 2012, the Company remitted \$2.2 million and \$0.7 million, respectively, related to the salary and benefit continuation benefits and at December 31, 2013 all benefits incurred had been remitted.

At December 31, 2014, approximately \$1.0 million of termination benefits remained to be paid and were included in current liabilities in the Company's consolidated financial statements.

26. Commitments and Contingencies

The Company is not a party to any litigation other than litigation in the ordinary course of business. The Company's management and legal counsel do not expect that the ultimate outcome of any of its currently ongoing legal proceedings, individually or collectively, will have a material adverse effect on the Company's financial position, results of operations or cash flows.

Contingencies

On October 9, 2012, the Company entered into a limited payment guaranty with regards to a VIE's \$18.0 million bank loan for the construction of a hotel franchised under one of the Company's brands in the United States. Under the terms of the limited guaranty, the Company has agreed to guarantee 25.0% of the outstanding principal balance for a maximum exposure of \$4.5 million and accrued and unpaid interest, as well as any unpaid expenses incurred by the lender. The limited guaranty shall

120

Table of Contents

remain in effect until the maximum amount guaranteed by the Company is paid in full. In addition to the limited guaranty, the Company entered into an agreement in which the Company guarantees the completion of the construction of the hotel and an environmental indemnity agreement which indemnifies the lending institution from and against any damages relating to or arising out of possible environmental contamination issues with regards to the property.

On November 15, 2013, the Company entered into a limited payment guaranty with regards to a VIE's \$46.2 million bank loan for the construction of a hotel franchised under one of the Company's brands in the United States. Under the terms of the limited guaranty, the Company has agreed to unconditionally guarantee and become surety for the full and timely payment of the guaranteed outstanding principal balance, as well as any unpaid expenses incurred by the lender. The guarantee is limited to 25.0% of the outstanding principal balance of the \$46.2 million loan due at any time for a maximum exposure of \$11.6 million. The limited guaranty shall remain in effect until the maximum amount guaranteed by the Company is repaid in full. The maturity date of the VIE's loan is May 2017. In conjunction with this guaranty, the Company has entered into a reimbursement and guaranty agreement with certain individuals that requires them to reimburse the Company in an amount equal to 75.0% of any payments made by the Company under this limited payment guaranty.

The Company believes the likelihood of having to perform under the aforementioned limited payment guarantees is remote at December 31, 2014 and December 31, 2013.

Commitments

The Company has the following commitments outstanding:

- The Company occasionally provides financing in the form of forgivable promissory notes or cash incentives to franchisees for property improvements, hotel development efforts and other purposes. At December 31, 2014, the Company had commitments to extend an additional \$42.5 million for these purposes provided certain conditions are met by its franchisees, of which \$22.5 million is expected to be advanced in the next twelve months.
- The Company has committed to make additional capital contributions totaling \$2.1 million to existing joint ventures, related to the construction of various hotels to be operated under the Company's Cambria Suites brand. These commitments are expected to be funded in the next twelve months.

In the ordinary course of business, the Company enters into numerous agreements that contain standard indemnities whereby the Company indemnifies another party for breaches of representations and warranties. Such indemnifications are granted under various agreements, including those governing (i) purchases or sales of assets or businesses, (ii) leases of real estate, (iii) licensing of trademarks, (iv) access to credit facilities, (v) issuances of debt or equity securities, and (vi) certain operating agreements. The indemnifications issued are for the benefit of the (i) buyers in sale agreements and sellers in purchase agreements, (ii) landlords in lease contracts, (iii) franchisees in licensing agreements, (iv) financial institutions in credit facility arrangements, (v) underwriters in debt or equity security issuances and (vi) parties under certain operating agreements. In addition, these parties are also generally indemnified against any third party claim resulting from the transaction that is contemplated in the underlying agreement. While some of these indemnities extend only for the duration of the underlying agreement, many survive the expiration of the term of the agreement or extend into perpetuity (unless subject to a legal statute of limitations). There are no specific limitations on the maximum potential amount of future payments that the Company could be required to make under these indemnities, nor is the Company able to develop an estimate of the maximum potential amount of future payments to be made under these indemnifications as the triggering events are not subject to predictability. With respect to certain of the aforementioned indemnities, such as indemnifications of landlords against third party claims for the use of real estate property leased by the Company, the Company maintains insurance coverage that mitigates potential liability.

Table of Contents

27. Discontinued Operations

In the first quarter of 2014, the Company's management approved a plan to sell the three Company-owned hotels operated under the MainStay Suites brand. The Company determined that this disposal transaction met the definition of a discontinued operation since the operations and cash flows of this component would be eliminated from the on-going operations of the Company and the Company will not have significant continuing involvement in the operations of the hotels after the disposal transaction.

The operations related to these three Company-owned hotels were reported as a component of "Corporate and Other" for segment reporting purposes. The results of operations for the years ended December 31, 2014, 2013 and 2012 presented in these Consolidated Financial Statements reflect these three Company-owned hotels as discontinued operations. All prior period amounts have been recast throughout these financial statements as appropriate. Unless noted otherwise, discussion in the notes to the consolidated financial statements pertain to continuing operations. Summarized financial information related to the discontinued operations is as follows:

⁽¹⁾ The sum of the earnings per share for the four quarters may differ from annual earnings per share due to the required method of computing the weighted average shares in interim periods.

The matters which affect the comparability of the quarterly results include the following:

• **Seasonality:** The Company's revenues and operating income reflect the industry's seasonality and as a result are lower in the first and fourth quarters and higher in the second and third quarters.

• **Investment income and losses:** The Company's net income reflects gains and losses related to the Company's investments held in non-qualified retirement plans and are subject to market conditions.

Table of Contents

29. Future Adoption of Accounting Standards

In April 2014, the FASB issued ASU No. 2014-08, "Presentation of Financial Statements and Property, Plant, and Equipment: Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity" ("ASU 2014-08"). ASU 2014-08 changes the definition of a discontinued operation to include only those disposals of components of an entity that represent a strategic shift that has (or will have) a major effect on an entity's operations and financial results. ASU 2014-08 is effective for all disposals (or classifications as held for sale) of components of an entity that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years. The Company is currently evaluating what impact, if any, the adoption of this ASU will have on the presentation of its consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, "Revenue From Contracts with Customers" ("ASU 2014-09"), which impacts virtually all aspects of an entity's revenue recognition. ASU No. 2014-09 supersedes the revenue recognition requirements in Topic 605, Revenue Recognition, as well as most industry-specific guidance, and significantly enhances comparability of revenue recognition practices across entities and industries by providing a principles-based, comprehensive framework for addressing revenue recognition issues. In order for a provider of promised goods or services to recognize as revenue the consideration that it expects to receive in exchange for the promised goods or services, the provider should apply the following five steps: (1) identify the contract with a customer(s); (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when (or as) the entity satisfies a performance obligation. ASU No. 2014-09 also specifies the accounting for some costs to obtain or fulfill a contract with a customer and provides enhanced disclosure requirements. ASU No. 2014-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The guidance permits the retrospective or modified retrospective method when adopting ASU No. 2014-09 but early application is not permitted. The Company is still assessing the impact that ASU No. 2014-09 will have on its financial statements and disclosures.

30. Subsequent Events

On February 28, 2015, the Company's board of directors declared a quarterly cash dividend of \$0.195 per share of common stock. The dividend is payable on April 17, 2015 to shareholders of record on April 3, 2015.

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

The Company changed its independent registered public accounting firm effective May 27, 2014 from PricewaterhouseCoopers LLP to Ernst & Young LLP. Information regarding the change in the independent registered public accounting firm was disclosed in a Current Report on Form 8-K filed with the SEC on June 2, 2014. There were no disagreements with PricewaterhouseCoopers LLP or any reportable events requiring disclosure under Item 304(b) of Regulation S-K.

Item 9A. Controls and Procedures

Management's Evaluation of Disclosure Controls and Procedures

The Company has a disclosure review committee whose membership includes the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), among others. The disclosure review committee's procedures are considered by the CEO and CFO in performing their evaluations of the Company's disclosure controls and procedures and in assessing the accuracy and completeness of the Company's disclosures.

Our management, with the participation of our CEO and CFO have evaluated the effectiveness of our disclosure controls and procedures, as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, (the “Exchange Act”), as of the end of the period covered by this annual report as required by Rules 13a-15(b) or 15d-15(b) under the Exchange Act. Our management, including our CEO and CFO, does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system’s objectives will be met.

Table of Contents

An evaluation was performed under the supervision and with the participation of the Company's CEO and CFO, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the CEO and CFO, concluded that the Company's disclosure controls and procedures were effective as of December 31, 2014.

Changes in Internal Control Over Financial Reporting

There have been no changes, other than those disclosed below, in the Company's internal control over financial reporting that occurred during the fourth quarter of 2014 that materially affected, or is reasonably likely to materially affect the Company's internal control over financial reporting.

Remediation of Material Weakness

As disclosed in the Company's Form 10-K/A, filed with the Securities and Exchange Commission ("SEC") on November 3, 2014, the Company had identified a material weakness, which was a result of the Company's policy of recognizing royalty and certain marketing and reservation system fees one month in arrears, which was not in accordance with generally accepted accounting principles in the United States of America ("GAAP").

In response to the material weakness, the Company developed and executed a plan in the second quarter of 2014, with the oversight of the Audit Committee of the Board of Directors, to remediate this material weakness. Our remediation included updating the Company's revenue recognition method to recognize royalty and certain marketing and reservation system fees as revenue in the same period as the gross room revenues are earned by its franchisees, which is in compliance with GAAP. Additionally, the Company filed the following statements with the Securities and Exchange Commission on November 3, 2014:

- Amended 2014 first quarter report on Form 10-Q, including restated financial statements;
- Amended 2013 third quarter report on Form 10-Q, including restated financial statements;
- Amended 2013 annual report on Form 10-K, including revised financial statements for years ended 2011, 2012 and 2013;

The material weakness is remediated as of December 31, 2014, as management has concluded, through testing, that all applicable remediated controls are operating effectively at December 31, 2014.

Management's Report on Internal Control Over Financial Reporting

The management of Choice Hotels International, Inc. and its subsidiaries (together "the Company") is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework (2013). Based on

management's assessment under those criteria, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2014.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2014 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report which appears herein.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of Choice Hotels International, Inc. and Subsidiaries

We have audited Choice Hotels International, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). Choice Hotels International, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Choice Hotels International, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Choice Hotels International, Inc. and subsidiaries as of December 31, 2014, and the related consolidated statements of income, shareholders' deficit and cash flows for the year the ended and our report dated March 2, 2015 expressed an unqualified opinion thereon.
