Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 1 Basis of Presentation

The accompanying condensed consolidated financial statements have been prepared without audit, pursuant to the interim period reporting requirements of Form 10-Q. Consequently, certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted. References to the "Company," "EMCOR," "we," "us," "our" and similar words refer to EMCOR Group, Inc. and its consolidated subsidiaries unless the context indicates otherwise. Readers of this report should refer to the consolidated financial statements and the notes thereto included in our latest Annual Report on Form 10-K filed with the Securities and Exchange Commission.

In our opinion, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting only of a normal recurring nature) necessary to present fairly our financial position and the results of our operations. The results of operations for the three months ended March 31, 2013 are not necessarily indicative of the results to be expected for the year ending December 31, 2013.

Our reportable segments reflect certain reclassifications of prior year amounts from our United States facilities services segment to our United States mechanical construction and facilities services segment due to changes in our internal reporting structure.

NOTE 2 New Accounting Pronouncements

On January 1, 2013, we adopted an accounting pronouncement giving companies the option to perform a qualitative impairment assessment for their indefinite-lived intangible assets that may allow them to skip the annual fair value calculation. To perform a qualitative assessment, a company must identify and evaluate changes in economic, industry and company-specific events and circumstances that could affect the significant inputs used to determine the fair value of an indefinite-lived intangible asset. The adoption of this pronouncement did not have any effect on our financial position or results of operations, though it may impact the manner in which we perform future or prospective testing for indefinite-lived intangible asset impairment.

On January 1, 2013, we adopted an accounting pronouncement requiring preparers to report, in one place, information about reclassifications out of accumulated other comprehensive income ("AOCI"). It also required companies to report changes in AOCI balances. Public companies must provide the required information (e.g., changes in AOCI balances and reclassifications out of AOCI) in interim and annual periods. The adoption of this pronouncement did not have any effect on our financial position or results of operations.

NOTE 3 Acquisitions of Businesses

On January 4, 2012, we acquired a company for an immaterial amount. This company primarily provides mechanical construction services and has been included in our United States mechanical construction and facilities services segment.

The purchase price accounting for the acquisition referred to above was finalized with an insignificant impact during 2012. The acquisition was accounted for by the acquisition method, and the price paid for it has been allocated to its respective assets and liabilities, based upon the estimated fair values of its respective assets and liabilities at the date of acquisition. We believe the acquisition further expands our service capabilities into new technical areas.

During the three months ended March 31, 2013 and 2012, we recorded a net reversal of \$0.5 million of non-cash income and \$0.1 million of non-cash expense attributable to contingent consideration arrangements relating to prior acquisitions.

NOTE 4 Earnings Per Share

Calculation of Basic and Diluted Earnings per Common Share

The following tables summarize our calculation of Basic and Diluted Earnings per Common Share (“EPS”) for the three months ended March 31, 2013 and 2012 (in thousands, except share and per share data):

	For the three months ended March 31,	
	2013	2012
Numerator:		
Net income attributable to EMCOR Group, Inc. available to common stockholders	\$30,167	\$27,145
Denominator:		
Weighted average shares outstanding used to compute basic earnings per common share	67,110,334	66,685,985
Effect of dilutive securities—Share-based awards	988,787	1,260,260
Shares used to compute diluted earnings per common share	68,099,121	67,946,245
Basic earnings per common share:		
Net income attributable to EMCOR Group, Inc. available to common stockholders	\$0.45	\$0.41
Diluted earnings per share:		
Net income attributable to EMCOR Group, Inc. available to common stockholders	\$0.44	\$0.40

There were zero and 151,798 anti-dilutive stock options that were excluded from the calculation of diluted EPS for the three months ended March 31, 2013 and 2012, respectively.

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 5 Inventories

Inventories in the accompanying Condensed Consolidated Balance Sheets consisted of the following amounts (in thousands):

	March 31, 2013	December 31, 2012
Raw materials and construction materials	\$21,025	\$ 20,994
Work in process	18,630	29,518
	\$39,655	\$ 50,512

NOTE 6 Debt

Debt in the accompanying Condensed Consolidated Balance Sheets consisted of the following amounts (in thousands):

	March 31, 2013	December 31, 2012
2011 Revolving Credit Facility	\$ 150,000	\$ 150,000
Capitalized lease obligations	5,374	5,881
Other	17	18
	155,391	155,899
Less: current maturities	1,789	1,787
	\$ 153,602	\$ 154,112

Credit Facilities

Effective November 21, 2011, we entered into an amended and restated \$750.0 million revolving credit facility (the "2011 Revolving Credit Facility"). The 2011 Revolving Credit Facility expires on November 21, 2016 and permits us to increase our borrowing to \$900.0 million if additional lenders are identified and/or existing lenders are willing to increase their current commitments. We may allocate up to \$250.0 million of the borrowing capacity under the 2011 Revolving Credit Facility to letters of credit. The 2011 Revolving Credit Facility is guaranteed by most of our direct and indirect subsidiaries and is secured by substantially all of our assets and most of the assets of most of our subsidiaries. The 2011 Revolving Credit Facility contains various covenants providing for, among other things, maintenance of certain financial ratios and certain limitations on payment of dividends, common stock repurchases, investments, acquisitions, indebtedness and capital expenditures. A commitment fee is payable on the average daily unused amount of the 2011 Revolving Credit Facility, which ranges from 0.25% to 0.35%, based on certain financial tests. The fee in effect on March 31, 2013 was 0.25% of the unused amount as of such date. Borrowings under the 2011 Revolving Credit Facility bear interest at (1) a rate which is the prime commercial lending rate announced by Bank of Montreal from time to time (3.25% at March 31, 2013) plus 0.50% to 1.00%, based on certain financial tests or (2) United States dollar LIBOR (0.20% at March 31, 2013) plus 1.50% to 2.00%, based on certain financial tests. The interest rate in effect at March 31, 2013 was 1.70%. Letters of credit fees issued under this facility range from 1.50% to 2.00% of the respective face amounts of the letters of credit issued and are computed based on certain financial tests. We capitalized approximately \$4.2 million of debt issuance costs associated with the 2011 Revolving Credit Facility. This amount is being amortized over the life of the facility and is included as part of interest expense. As of March 31, 2013 and December 31, 2012, we had approximately \$88.0 million and \$84.0 million of letters of credit outstanding, respectively. We have borrowings of \$150.0 million outstanding under the 2011 Revolving Credit Facility at March 31, 2013, which may remain outstanding at our discretion until the 2011 Revolving Credit Facility expires.

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 7 Fair Value Measurements

We use a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy, which gives the highest priority to quoted prices in active markets, is comprised of the following three levels:

Level 1 – Unadjusted quoted market prices in active markets for identical assets and liabilities.

Level 2 – Observable inputs, other than Level 1 inputs. Level 2 inputs would typically include quoted prices in markets that are not active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3 – Prices or valuations that require inputs that are both significant to the measurement and unobservable.

The following tables provide the assets and liabilities carried at fair value measured on a recurring basis as of March 31, 2013 and December 31, 2012 (in thousands):

Asset Category	Assets at Fair Value as of March 31, 2013			
	Level 1	Level 2	Level 3	Total
Cash and cash equivalents ⁽¹⁾	\$499,102	—	—	\$499,102
Restricted cash ⁽²⁾	8,253	—	—	8,253
Short-term investments ⁽²⁾	4,561	—	—	4,561
Total	\$511,916	—	—	\$511,916

Asset Category	Assets at Fair Value as of December 31, 2012			
	Level 1	Level 2	Level 3	Total
Cash and cash equivalents ⁽¹⁾	\$605,303	—	—	\$605,303
Restricted cash ⁽²⁾	6,281	—	—	6,281
Short-term investments ⁽²⁾	4,879	—	—	4,879
Total	\$616,463	—	—	\$616,463

Cash and cash equivalents consist primarily of money market funds with original maturity dates of three months or (1)less, which are Level 1 assets. At March 31, 2013 and December 31, 2012, we had \$206.4 million and \$407.4 million, respectively, in money market funds.

(2)Restricted cash and short-term investments with original maturities greater than three months are classified as (2)“Prepaid expenses and other” on our Condensed Consolidated Balance Sheets.

We believe that the carrying values of our financial instruments, which include accounts receivable and other financing commitments, approximate their fair values due primarily to their short-term maturities and low risk of counterparty default. The carrying value of our 2011 Revolving Credit Facility approximates the fair value due to the variable rate on such debt.

NOTE 8 Income Taxes

For the three months ended March 31, 2013 and 2012, our income tax provision was \$19.0 million and \$17.0 million, respectively, based on effective income tax rates, before discrete items and less amounts attributable to noncontrolling interests, of 38.5% and 38.4%, respectively. The actual income tax rates on income before income taxes, less amounts attributable to noncontrolling interests, for the three months ended March 31, 2013 and 2012, inclusive of discrete items, were 38.7% and 38.5%, respectively. The increase in the 2013 income tax provision was primarily due to increased income before income taxes and a change in the allocation of earnings among various jurisdictions.

As of March 31, 2013 and December 31, 2012, the amount of unrecognized income tax benefits for each period was \$11.3 million (of which \$6.6 million, if recognized, would favorably affect our effective income tax rate).

We report interest expense related to unrecognized income tax benefits in the income tax provision. As of March 31, 2013 and December 31, 2012, we had approximately \$2.8 million and \$2.6 million, respectively, of accrued interest related to unrecognized income tax benefits included as a liability on the Condensed Consolidated Balance Sheets. For the three months ended March 31, 2013 and 2012, \$0.2 million and \$0.1 million of interest expense was recognized, respectively.

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 8 Income Taxes - (Continued)

It is possible that approximately \$3.0 million of unrecognized income tax benefits at March 31, 2013, primarily relating to uncertain tax positions attributable to certain intercompany transactions and compensation related accruals, will become recognized income tax benefits in the next twelve months due to the expiration of applicable statutes of limitations.

We file income tax returns with the Internal Revenue Service and various state, local and foreign jurisdictions. The Company is currently under examination by various taxing authorities for the years 2008 through 2011. The Internal Revenue Service is currently auditing our 2010 federal income tax return. We are still subject to audit for the years 2009 through 2011.

NOTE 9 Common Stock

As of March 31, 2013 and December 31, 2012, 67,113,961 and 66,964,162 shares of our common stock were outstanding, respectively.

During the three months ended March 31, 2013 and 2012, 139,799 and 361,014 shares of common stock, respectively, were issued primarily upon: (a) the exercise of stock options, (b) the satisfaction of required conditions under certain of our share-based compensation plans and (c) the purchase of common stock under our employee stock purchase plan.

On September 26, 2011, our Board of Directors authorized the Company to repurchase up to \$100.0 million of its outstanding common stock. As of March 31, 2013, we repurchased 2.1 million shares of our common stock for approximately \$51.4 million, and there remains authorization for us to repurchase approximately \$48.6 million of our shares. The repurchase program does not obligate the Company to acquire any particular amount of common stock and may be suspended, recommenced or discontinued at any time or from time to time without prior notice.

Acquisitions under our repurchase program may be made from time to time as permitted by securities laws and other legal requirements, including provisions in our revolving credit facility placing limitations on such repurchases. The repurchase program has been and will be funded from our operations.

NOTE 10 Retirement Plans

Our United Kingdom subsidiary has a defined benefit pension plan covering all eligible employees (the "UK Plan"); however, no individual joining the company after October 31, 2001 may participate in the plan. On May 31, 2010, we curtailed the future accrual of benefits for active employees under this plan.

Components of Net Periodic Pension Cost

The components of net periodic pension cost of the UK Plan for the three months ended March 31, 2013 and 2012 were as follows (in thousands):

	For the three months ended March 31,	
	2013	2012
Interest cost	\$3,070	\$3,107
Expected return on plan assets	(3,579)	(3,257)
Amortization of unrecognized loss	638	608
Net periodic pension cost	\$129	\$458
Employer Contributions		

For the three months ended March 31, 2013, our United Kingdom subsidiary contributed approximately \$1.2 million to its defined benefit pension plan. It anticipates contributing an additional \$4.1 million during the remainder of 2013.

NOTE 11 Commitments and Contingencies

Government Contracts

As a government contractor, we are subject to U.S. government audits and investigations relating to our operations, including claims for fines, penalties and compensatory and treble damages, and possible suspension or debarment from doing business with the government. Based on currently available information, we believe the outcome of ongoing government disputes and investigations will not have a material impact on our financial position, results of operations or liquidity.

Legal Matters

In December 2011, we received a letter from a gasket supplier that it had supplied us with gaskets from a Canadian manufacturer that, contrary to our supplier's product specifications and purchase orders, may contain asbestos material. Additionally, the supplier has informed us that one of its customers had found that certain gaskets manufactured by the Canadian company tested positive for asbestos during a routine audit. However, our supplier also informed us that industry experts have advised it no action is necessary to remove or replace any of these gaskets manufactured by the Canadian company that may have been installed by us inasmuch as any asbestos material in the gaskets is fully encapsulated in the gasket binding and enclosed within piping systems. No reasonable estimate of our ultimate liability is possible at this time, and based on our current knowledge, we do not expect that any amounts that we may incur as a consequence of our installation of these gaskets will have a material adverse effect on our financial position, results of operations or liquidity. To the extent we incur any expenditures related to this matter, we intend to seek reimbursement from the supplier.

One of our subsidiaries was a subcontractor on a construction site where an explosion occurred. An investigation of the matter could not determine who was responsible for the explosion. As a result of the explosion, the project was delayed and claims have been asserted against various parties. To date, no claims have been brought against our subsidiary with respect to the explosion. We believe, and have been advised by counsel, that to the extent such claims may be brought, we would have a number of meritorious defenses to all such matters. We believe that the ultimate outcome of such matters will not have a material adverse effect on our consolidated financial position, results of operations or liquidity. Notwithstanding our assessment of the potential financial impact of this matter, we are not able to estimate with any certainty the amount of loss, if any, which would be associated with an adverse resolution. We are involved in several proceedings in which damages and claims have been asserted against us. Other potential claims may exist that have not yet been asserted against us. We believe that we have a number of valid defenses to such proceedings and claims and intend to vigorously defend ourselves. We do not believe that any such matters will have a material adverse effect on our financial position, results of operations or liquidity. Litigation is subject to many uncertainties and the outcome of litigation is not predictable with assurance. It is possible that some litigation matters for which reserves have not been established could be decided unfavorably to us, and that any such unfavorable decisions could have a material adverse effect on our financial position, results of operations or liquidity.

NOTE 12 Segment Information

We have the following reportable segments: (a) United States electrical construction and facilities services (involving systems for electrical power transmission and distribution; premises electrical and lighting systems; low-voltage systems, such as fire alarm, security and process control; voice and data communication; roadway and transit lighting; and fiber optic lines); (b) United States mechanical construction and facilities services (involving systems for heating, ventilation, air conditioning, refrigeration and clean-room process ventilation; fire protection; plumbing, process and high-purity piping; controls and filtration; water and wastewater treatment and central plant heating and cooling; cranes and rigging; millwrighting; and steel fabrication, erection and welding); (c) United States facilities services; and (d) United Kingdom construction and facilities services. The segment "United States facilities services" principally consists of those operations which provide a portfolio of services needed to support the operation and maintenance of customers' facilities. The United Kingdom construction and facilities services segment performs electrical construction, mechanical construction and facilities services.

NOTE 12 Segment Information - (Continued)

The following tables present information about industry segments and geographic areas for the three months ended March 31, 2013 and 2012 (in thousands):

	For the three months ended March 31,	
	2013	2012
Revenues from unrelated entities:		
United States electrical construction and facilities services	\$307,584	\$290,537
United States mechanical construction and facilities services	541,117	574,203
United States facilities services	600,700	532,890
Total United States operations	1,449,401	1,397,630
United Kingdom construction and facilities services	119,000	140,891
Total worldwide operations	\$1,568,401	\$1,538,521
Total revenues:		
United States electrical construction and facilities services	\$309,775	\$294,808
United States mechanical construction and facilities services	551,784	577,566
United States facilities services	608,451	539,753
Less intersegment revenues	(20,609)	(14,497)
Total United States operations	1,449,401	1,397,630
United Kingdom construction and facilities services	119,000	140,891
Total worldwide operations	\$1,568,401	\$1,538,521
	For the three months ended March 31,	
	2013	2012
Operating income (loss):		
United States electrical construction and facilities services	\$18,940	\$23,566
United States mechanical construction and facilities services	11,140	22,823
United States facilities services	35,627	11,429
Total United States operations	65,707	57,818
United Kingdom construction and facilities services	1,279	3,482
Corporate administration	(14,358)	(15,111)
Restructuring expenses	(1,363)	—
Total worldwide operations	51,265	46,189
Other corporate items:		
Interest expense	(1,862)	(1,775)
Interest income	357	416
Income before income taxes	\$49,760	\$44,830

Table of Contents

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 12 Segment Information - (Continued)

	March 31, 2013	December 31, 2012
Total assets:		
United States electrical construction and facilities services	\$301,822	\$283,997
United States mechanical construction and facilities services	779,380	785,286
United States facilities services	1,208,141	1,200,288
Total United States operations	2,289,343	2,269,571
United Kingdom construction and facilities services	202,465	214,455
Corporate administration	522,908	623,044
Total worldwide operations	\$3,014,716	\$3,107,070

Included in our corporate administration operating loss is the receipt of an insurance recovery of approximately \$2.6 million in the first quarter of 2013 associated with a previously disposed of operation, which is classified as a component of "Cost of sales" on the Condensed Consolidated Statements of Operations.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

We are one of the largest electrical and mechanical construction and facilities services firms in the United States and the United Kingdom. We provide services to a broad range of commercial, industrial, utility and institutional customers through approximately 70 operating subsidiaries and joint venture entities. Our offices are located in the United States and the United Kingdom.

Our reportable segments reflect certain reclassifications of prior year amounts from our United States facilities services segment to our United States mechanical construction and facilities services segment due to changes in our internal reporting structure.

Overview

The following table presents selected financial data for the three months ended March 31, 2013 and 2012 (in thousands, except percentages and per share data):

	For the three months ended March 31,			
	2013	2012		
Revenues	\$1,568,401	\$1,538,521		
Revenues increase from prior year	1.9	% 21.6		%
Operating income	\$51,265	\$46,189		
Operating income as a percentage of revenues	3.3	% 3.0		%
Net income attributable to EMCOR Group, Inc.	\$30,167	\$27,145		
Diluted earnings per common share from continuing operations	\$0.44	\$0.40		

During the first quarter of 2013, we began to see a return to more traditional demand for our services within our United States facilities services segment, as revenues and/or operating income increased in a majority of the markets served by this segment. Offsetting this favorable performance in facilities services were weaker results from our United States construction segments and our United Kingdom construction and facilities services segment, when compared to the first quarter of 2012. Our overall increase in revenues for the first quarter of 2013, when compared to the prior year's first quarter, was attributable to higher revenues from our United States facilities services segment and our United States electrical construction and facilities services segment. The increase in our operating income for the three months ended March 31, 2013, compared to the same period in 2012, was attributable to higher operating income from our United States facilities services segment, partially offset by lower operating income from our United States construction segments and our United Kingdom construction and facilities services segment. For the quarter, overall operating margin increased primarily as a result of higher operating margins within our United States facilities services segment. This increase was partially offset by a decrease in operating margins in all our other operating segments. Net cash used in operating activities for the three months ended March 31, 2013 of \$95.1 million increased, compared to \$33.1 million of net cash used in operating activities for the three months ended March 31, 2012, primarily due to changes in our working capital.

Operating Segments

We have the following reportable segments: (a) United States electrical construction and facilities services (involving systems for electrical power transmission and distribution; premises electrical and lighting systems; low-voltage systems, such as fire alarm, security and process control; voice and data communication; roadway and transit lighting; and fiber optic lines); (b) United States mechanical construction and facilities services (involving systems for heating, ventilation, air conditioning, refrigeration and clean-room process ventilation; fire protection; plumbing, process and high-purity piping; controls and filtration; water and wastewater treatment and central plant heating and cooling; cranes and rigging; millwrighting; and steel fabrication, erection and welding); (c) United States facilities services; and (d) United Kingdom construction and facilities services. The segment "United States facilities services" principally consists of those operations which provide a portfolio of services needed to support the operation and maintenance of

customers' facilities. The United Kingdom construction and facilities services segment performs electrical construction, mechanical construction and facilities services.

15

Table of Contents

Results of Operations

Revenues

The following tables present our operating segment revenues from unrelated entities and their respective percentages of total revenues (in thousands, except for percentages):

	For the three months ended March 31,			
	2013	% of Total	2012	% of Total
Revenues:				
United States electrical construction and facilities services	\$307,584	20 %	\$290,537	19 %
United States mechanical construction and facilities services	541,117	35 %	574,203	37 %
United States facilities services	600,700	38 %	532,890	35 %
Total United States operations	1,449,401	92 %	1,397,630	91 %
United Kingdom construction and facilities services	119,000	8 %	140,891	9 %
Total worldwide operations	\$1,568,401	100 %	\$1,538,521	100 %

As described below in more detail, our revenues for the three months ended March 31, 2013 increased to \$1.57 billion compared to \$1.54 billion of revenues for the three months ended March 31, 2012. This increase in revenues was attributable to higher revenues from our United States facilities services segment and our United States electrical construction and facilities services segment, partially offset by lower revenues from our United States mechanical construction and facilities services segment and our United Kingdom construction and facilities services segment. While overall revenues have increased, we continue to be disciplined in a very competitive marketplace by only accepting work that we believe can be performed at reasonable margins.

Our backlog at March 31, 2013 was \$3.42 billion compared to \$3.39 billion of backlog at March 31, 2012. Our backlog was \$3.37 billion at December 31, 2012. The increase in backlog at March 31, 2013, compared to such backlog at March 31, 2012, was primarily attributable to an increase in contracts awarded for work in our United States electrical construction and facilities services segment. This increase was partially offset by a decrease in backlog in our: (a) United Kingdom construction and facilities services segment, (b) United States facilities services segment and (c) United States mechanical construction and facilities services segment. Backlog increases with awards of new contracts and decreases as we perform work on existing contracts. Backlog is not a term recognized under United States generally accepted accounting principles; however, it is a common measurement used in our industry. Backlog includes unrecognized revenues to be realized from uncompleted construction contracts plus unrecognized revenues expected to be realized over the remaining term of facilities services contracts. If the remaining term of a facilities services contract exceeds 12 months, the unrecognized revenues attributable to such contract included in backlog are limited to only the next 12 months of revenues.

Revenues of our United States electrical construction and facilities services segment were \$307.6 million for the three months ended March 31, 2013 compared to revenues of \$290.5 million for the three months ended March 31, 2012. The increase in revenues was primarily attributable to higher levels of work from industrial, institutional, commercial and hospitality construction projects, partially offset by a decrease in revenues from water and wastewater, healthcare and transportation construction projects.

Our United States mechanical construction and facilities services segment revenues for the three months ended March 31, 2013 were \$541.1 million, a \$33.1 million decrease compared to revenues of \$574.2 million for the three months ended March 31, 2012. The decrease in revenues was primarily attributable to declines in revenues from healthcare, industrial, institutional, water and wastewater and hospitality construction projects, partially offset by an increase in revenues from commercial construction projects.

Revenues of our United States facilities services segment for the three months ended March 31, 2013 increased by \$67.8 million compared to the three months ended March 31, 2012. The increase in revenues was primarily attributable to: (a) revenues from our industrial services and (b) revenues from our commercial site-based services, partially offset by a decrease in revenues from our government site-based services.

Our United Kingdom construction and facilities services segment revenues were \$119.0 million for the three months ended March 31, 2013 compared to revenues of \$140.9 million for the three months ended March 31, 2012. The decrease in revenues was attributable to: (a) a decrease in levels of work from its construction operations, primarily in the institutional and commercial markets, partially offset by an increase in the industrial market, (b) a decrease in levels of work from its facilities services operations, principally in the commercial and transportation markets, partially offset by an increase in the institutional market, and (c) a decrease of \$1.8 million relating to the effect of unfavorable exchange rates for the British pound versus the United States dollar.

Table of Contents

Cost of sales and Gross profit

The following tables present our cost of sales, gross profit (revenues less cost of sales) and gross profit margin (gross profit as a percentage of revenues) (in thousands, except for percentages):

	For the three months ended March 31,	
	2013	2012
Cost of sales	\$1,377,263	\$1,357,828
Gross profit	\$191,138	\$180,693
Gross profit, as a percentage of revenues	12.2	% 11.7

Our gross profit increased by \$10.4 million for the three months ended March 31, 2013 compared to the three months ended March 31, 2012. The increase in gross profit was predominantly attributable to: (a) higher revenues and margins from our United States facilities services segment, (b) the receipt of an insurance recovery of approximately \$2.6 million associated with a previously disposed of operation, which is classified as a component of "Cost of sales" on the Condensed Consolidated Statements of Operations and (c) lower amortization expense associated with identifiable intangible assets. This increase was partially offset by reduced revenues and/or margins from the remainder of our business segments.

Our gross profit margin was 12.2% and 11.7% for the three months ended March 31, 2013 and 2012, respectively. Gross profit margin increased in our United States facilities services segment, partially offset by a decrease in gross profit margin in all our other segments.

Selling, general and administrative expenses

The following tables present our selling, general and administrative expenses and selling, general and administrative expenses as a percentage of revenues (in thousands, except for percentages):

	For the three months ended March 31,	
	2013	2012
Selling, general and administrative expenses	\$138,510	\$134,504
Selling, general and administrative expenses, as a percentage of revenues	8.8	% 8.7

Our selling, general and administrative expenses for the three months ended March 31, 2013 increased by \$4.0 million to \$138.5 million compared to \$134.5 million for the three months ended March 31, 2012. Selling, general and administrative expenses as a percentage of revenues were 8.8% and 8.7% for the three months ended March 31, 2013 and 2012, respectively. This increase in selling, general and administrative expenses primarily resulted from higher employee related costs, such as salaries and accrued incentive compensation, and professional fees. Selling, general and administrative expenses as a percentage of revenues increased slightly for the three months ended March 31, 2013 compared to the same period in 2012.

Restructuring expenses

Restructuring expenses were \$1.4 million and zero for the three months ended March 31, 2013 and 2012, respectively, which primarily related to employee severance obligations in the construction operations of our United Kingdom construction and facilities services segment. As of March 31, 2013, the balance of obligations yet to be paid was \$1.4 million, the majority of which is expected to be paid in 2013.

Table of Contents

Operating income

The following tables present our operating income (loss) and operating income (loss) as a percentage of segment revenues from unrelated entities (in thousands, except for percentages):

	For the three months ended March 31,					
	2013	% of Segment Revenues	2012	% of Segment Revenues		
Operating income (loss):						
United States electrical construction and facilities services	\$18,940	6.2	% \$23,566	8.1	%	
United States mechanical construction and facilities services	11,140	2.1	% 22,823	4.0	%	
United States facilities services	35,627	5.9	% 11,429	2.1	%	
Total United States operations	65,707	4.5	% 57,818	4.1	%	
United Kingdom construction and facilities services	1,279	1.1	% 3,482	2.5	%	
Corporate administration	(14,358)) —	(15,111)) —		
Restructuring expenses	(1,363)) —	—	—		
Total worldwide operations	51,265	3.3	% 46,189	3.0	%	
Other corporate items:						
Interest expense	(1,862))	(1,775))		
Interest income	357		416			
Income before income taxes	\$49,760		\$44,830			

As described below in more detail, operating income was \$51.3 million and \$46.2 million for the three months ended March 31, 2013 and 2012, respectively. Operating margin was 3.3% for the three months ended March 31, 2013 compared to 3.0% for the three months ended March 31, 2012.

Operating income of our United States electrical construction and facilities services segment for the three months ended March 31, 2013 was \$18.9 million compared to operating income of \$23.6 million for the three months ended March 31, 2012. This decline in operating income was primarily the result of a decrease in gross profit from water and wastewater and transportation construction projects, partially offset by an increase in gross profit attributable to industrial and institutional construction projects. Additionally, operating income in 2012 benefited from the resolution of a construction claim on a healthcare project. Selling, general and administrative expenses increased slightly for the three months ended March 31, 2013, compared to the same period in 2012. The decrease in operating margin for the three months ended March 31, 2013 was the result of a decrease in gross profit margin.

Our United States mechanical construction and facilities services segment operating income for the three months ended March 31, 2013 was \$11.1 million, an \$11.7 million decrease compared to operating income of \$22.8 million for the three months ended March 31, 2012. This decrease in operating income was primarily due to a decrease in gross profit from institutional, healthcare and water and wastewater construction projects, partially offset by an increase in gross profit from commercial construction projects and lower amortization expense associated with identifiable intangible assets. Selling, general and administrative expenses for the quarter were flat when compared to the three months ended March 31, 2012. The decrease in operating margin for the three months ended March 31, 2013 was primarily the result of a reduction in gross profit margin and an increase in selling, general and administrative expenses as a percentage of revenues.

Operating income of our United States facilities services segment for the three months ended March 31, 2013 increased by \$24.2 million compared to operating income for the three months ended March 31, 2012. This increase in operating income was primarily attributable to an increase in gross profit from this segment's: (a) industrial services, as a result of an increase in the demand for turnaround projects and our heat exchanger services, (b) commercial site-based services, partially attributable to an increase in revenues from snow removal, and (c) mobile mechanical services, partially as a result of higher project margins due to more selective bidding practices and improved job execution. The increase in operating income was partially offset by lower gross profit from our government site-based

services as a result of a reduction in discretionary government project spending and contracts lost in 2012. Operating income was negatively impacted by an increase in selling, general and administrative expenses, primarily due to: (a) an increase in employee related costs, such as incentive compensation, and (b) real estate related costs. This segment's operating income in the first quarter of 2012 was adversely impacted by start up and transition costs relating to new commercial site-based contracts. The increase in operating margin for the three months ended March 31, 2013 was primarily the

18

Table of Contents

result of an increase in gross profit margin, primarily due to increased margins from our industrial, mobile mechanical and commercial site-based services operations and a decrease in selling, general and administrative expenses as a percentage of revenues.

Our United Kingdom construction and facilities services segment operating income for the three months ended March 31, 2013 was \$1.3 million compared to operating income of \$3.5 million for the three months ended March 31, 2012. This decrease in operating income was primarily attributable to a decrease in gross profit resulting from a loss in its construction services operations as a result of lower volume and project write-downs, partially offset by lower selling general and administrative expenses predominantly as a result of lower employee related costs. Operating margin in this segment decreased year over year due to the operating loss from its construction services operations.

Our corporate administration expenses for the three months ended March 31, 2013 were \$14.4 million compared to \$15.1 million for the three months ended March 31, 2012. Excluding the receipt of an insurance recovery of approximately \$2.6 million in the first quarter of 2013 associated with a previously disposed of operation, which is classified as a component of "Cost of sales" on the Condensed Consolidated Statements of Operations, our corporate administration operating loss increased primarily due to higher employee related costs, such as salaries and incentive compensation, and professional fees.

Interest expense for the three months ended March 31, 2013 and 2012 was \$1.9 million and \$1.8 million, respectively. Interest income for each of the three months ended March 31, 2013 and 2012 was \$0.4 million.

For the three months ended March 31, 2013 and 2012, our income tax provision was \$19.0 million and \$17.0 million, respectively, based on effective income tax rates, before discrete items and less amounts attributable to noncontrolling interests, of 38.5% and 38.4%, respectively. The actual income tax rates on income before income taxes, less amounts attributable to noncontrolling interests, for the three months ended March 31, 2013 and 2012, inclusive of discrete items, were 38.7% and 38.5%, respectively. The increase in the 2013 income tax provision was primarily due to increased income before income taxes and a change in the allocation of earnings among various jurisdictions.

Liquidity and Capital Resources

The following table presents our net cash provided by (used in) operating activities, investing activities and financing activities (in thousands):

	For the three months ended March 31,	
	2013	2012
Net cash used in operating activities	\$(95,102)	\$(33,129)
Net cash used in investing activities	\$(6,456)	\$(28,701)
Net cash used in financing activities	\$(103)	\$(12,445)
Effect of exchange rate changes on cash and cash equivalents	\$(4,540)	\$1,608

Our consolidated cash balance decreased by approximately \$106.2 million from \$605.3 million at December 31, 2012 to \$499.1 million at March 31, 2013. Net cash used in operating activities for the three months ended March 31, 2013 was \$95.1 million compared to \$33.1 million of net cash used in operating activities for the three months ended March 31, 2012. The increase in net cash used in operating activities was primarily due to changes in our working capital.

Net cash used in investing activities was \$6.5 million for the three months ended March 31, 2013 compared to net cash used in investing activities of \$28.7 million for the three months ended March 31, 2012. The decrease in net cash used in investing activities was primarily due to a \$19.2 million decrease in payments for acquisitions of businesses.

Net cash used in financing activities for the three months ended March 31, 2013 decreased by approximately \$12.3 million, compared to the three months ended March 31, 2012, inasmuch as no funds were used for the repurchase of common stock in the first quarter 2013 and no dividends were paid in the first quarter of 2013. Payment of the regular quarterly dividend that would have been paid the first quarter of 2013 was accelerated and paid in December 2012.

Table of Contents

The following is a summary of material contractual obligations and other commercial commitments (in millions):

Contractual Obligations	Total	Payments Due by Period			
		Less than 1 year	1-3 years	3-5 years	After 5 years
Revolving Credit Facility (including interest at 1.70%) ⁽¹⁾	\$159.4	\$2.6	\$5.2	\$151.6	\$—
Capital lease obligations	5.4	1.8	2.8	0.8	—
Operating leases	194.6	51.1	81.2	48.5	13.8
Open purchase obligations ⁽²⁾	869.5	693.6	166.0	9.9	—
Other long-term obligations, including current portion ⁽³⁾	267.7	31.8	231.1	4.8	—
Liabilities related to uncertain income tax positions	14.1	5.6	2.5	4.4	1.6
Total Contractual Obligations	\$1,510.7	\$786.5	\$488.8	\$220.0	\$15.4

Other Commercial Commitments	Total Committed	Amount of Commitment Expiration by Period			
		Less than 1 year	1-3 years	3-5 years	After 5 years
Letters of credit	\$88.2	\$88.2	\$—	\$—	\$—

⁽¹⁾ We classify these borrowings as long-term on our Condensed Consolidated Balance Sheets because of our intent to repay the amounts on a long-term basis. These amounts are outstanding at our discretion and are not payable until the 2011 Revolving Credit Facility expires in November 2016. As of March 31, 2013, there were borrowings of \$150.0 million outstanding under the 2011 Revolving Credit Facility.

Represents open purchase orders for material and subcontracting costs related to construction and service contracts.

⁽²⁾ These purchase orders are not reflected in EMCOR's Condensed Consolidated Balance Sheets and should not impact future cash flows, as amounts should be recovered through customer billings.

Represents primarily insurance related liabilities and liabilities for deferred income taxes, incentive compensation and earn-out arrangements, classified as other long-term liabilities in the Condensed Consolidated Balance Sheets.

Cash payments for insurance related liabilities may be payable beyond three years, but it is not practical to estimate these payments; therefore, the long-term insurance related liabilities are reflected in the 1-3 years payment period.

⁽³⁾ We provide funding to our post retirement plans based on at least the minimum funding required by applicable regulations. In determining the minimum required funding, we utilize current actuarial assumptions and exchange rates to forecast estimates of amounts that may be payable for up to five years in the future. In our judgment, minimum funding estimates beyond a five year time horizon cannot be reliably estimated, and therefore, have not been included in the table.

Effective November 21, 2011, we entered into an amended and restated \$750.0 million revolving credit facility (the "2011 Revolving Credit Facility"). The 2011 Revolving Credit Facility expires on November 21, 2016 and permits us to increase our borrowing to \$900.0 million if additional lenders are identified and/or existing lenders are willing to increase their current commitments. We may allocate up to \$250.0 million of the borrowing capacity under the 2011 Revolving Credit Facility to letters of credit. The 2011 Revolving Credit Facility is guaranteed by most of our direct and indirect subsidiaries and is secured by substantially all of our assets and most of the assets of most of our subsidiaries. The 2011 Revolving Credit Facility contains various covenants providing for, among other things, maintenance of certain financial ratios and certain limitations on payment of dividends, common stock repurchases, investments, acquisitions, indebtedness and capital expenditures. A commitment fee is payable on the average daily unused amount of the 2011 Revolving Credit Facility, which ranges from 0.25% to 0.35%, based on certain financial tests. The fee is 0.25% of the unused amount as of March 31, 2013. Borrowings under the 2011 Revolving Credit

Facility bear interest at (1) a rate which is the prime commercial lending rate announced by Bank of Montreal from time to time (3.25% at March 31, 2013) plus 0.50% to 1.00%, based on certain financial tests or (2) United States dollar LIBOR (0.20% at March 31, 2013) plus 1.50% to 2.00%, based on certain financial tests. The interest rate in effect at March 31, 2013 was 1.70%. Letters of credit fees issued under this facility range from 1.50% to 2.00% of the respective face amounts of the letters of credit issued and are computed based on certain financial tests. We capitalized approximately \$4.2 million of debt issuance costs associated with the 2011 Revolving Credit Facility. This amount is being amortized over the life of the facility and is included as part of interest expense. As of March 31, 2013 and December 31, 2012, we had approximately \$88.0 million and \$84.0 million of letters of credit outstanding, respectively. We have borrowings of \$150.0 million outstanding under the 2011 Revolving Credit Facility at March 31, 2013, which may remain outstanding at our discretion until the 2011 Revolving Credit Facility expires. The terms of our construction contracts frequently require that we obtain from surety companies ("Surety Companies") and provide to our customers payment and performance bonds ("Surety Bonds") as a condition to the award of such contracts. The Surety Bonds secure our payment and performance obligations under such contracts, and we have agreed to indemnify the Surety Companies for amounts, if any, paid by them in respect of Surety Bonds issued on our behalf. In addition, at the request of labor

Table of Contents

unions representing certain of our employees, Surety Bonds are sometimes provided to secure obligations for wages and benefits payable to or for such employees. Public sector contracts require Surety Bonds more frequently than private sector contracts, and accordingly, our bonding requirements typically increase as the amount of public sector work increases. As of March 31, 2013, based on our percentage-of-completion of our projects covered by Surety Bonds, our aggregate estimated exposure, assuming defaults on all our then existing contractual obligations, was approximately \$0.9 billion. The Surety Bonds are issued by Surety Companies in return for premiums, which vary depending on the size and type of bond.

We continually monitor our available limits of Surety Bonds, which we believe to be adequate, and discuss with our current and other Surety Bond providers the amount of Surety Bonds that may be available to us based on our financial strength and the absence of any default by us on any Surety Bond issued on our behalf. However, if we experience changes in our bonding relationships or if there are adverse changes in the surety industry, we may seek to satisfy certain customer requests for Surety Bonds by posting other forms of collateral in lieu of Surety Bonds such as letters of credit or guarantees by EMCOR, by seeking to convince customers to forego the requirement for Surety Bonds, by increasing our activities in business segments that rarely require Surety Bonds such as the facilities services segment, and/or by refraining from bidding for certain projects that require Surety Bonds. There can be no assurance that we would be able to effectuate alternatives to providing Surety Bonds to our customers or to obtain, on favorable terms, sufficient additional work that does not require Surety Bonds to replace projects requiring Surety Bonds that we may decide not to pursue. Accordingly, if we were to experience a reduction in the availability of Surety Bonds, we could experience a material adverse effect on our financial position, results of operations and/or cash flows.

From time to time in the ordinary course of business, we guarantee obligations of our subsidiaries under certain contracts. Generally, we are liable under such an arrangement only if our subsidiary fails to perform its obligations under the contract. Historically, we have not incurred any additional liabilities as a consequence of these guarantees. We do not have any other material financial guarantees or off-balance sheet arrangements other than those disclosed herein.

Our primary source of liquidity has been, and is expected to continue to be, cash generated by operating activities. We also maintain our 2011 Revolving Credit Facility that may be utilized, among other things, to meet short-term liquidity needs in the event cash generated by operating activities is insufficient or to enable us to seize opportunities to participate in joint ventures or to make acquisitions that may require access to cash on short notice or for any other reason. However, negative macroeconomic trends may have an adverse effect on liquidity. Short-term liquidity is also impacted by the type and length of construction contracts in place. During past economic downturns, there were typically fewer small discretionary projects from the private sector, and companies like us aggressively bid larger long-term infrastructure and public sector contracts. Performance of long duration contracts typically requires greater amounts of working capital. While we strive to maintain a net over-billed position with our customers, there can be no assurance that a net over-billed position can be maintained. Our net over-billings, defined as the balance sheet accounts "Billings in excess of costs and estimated earnings on uncompleted contracts" less "Costs and estimated earnings in excess of billings on uncompleted contracts", were \$257.1 million and \$290.5 million as of March 31, 2013 and December 31, 2012, respectively.

On September 26, 2011, our Board of Directors authorized the Company to repurchase up to \$100.0 million of its outstanding common stock. As of March 31, 2013, we repurchased 2.1 million shares of our common stock for approximately \$51.4 million, and there remains authorization for us to repurchase approximately \$48.6 million of our shares. The repurchase program does not obligate the Company to acquire any particular amount of common stock and may be suspended, recommenced or discontinued at any time or from time to time without prior notice.

Acquisitions under our repurchase program may be made from time to time as permitted by securities laws and other legal requirements, including provisions in our revolving credit facility placing limitations on such repurchases. The repurchase program has been and will be funded from our operations.

On September 26, 2011, we announced our plans to pay a regular quarterly dividend of \$0.05 per common share. We have paid quarterly dividends since October 25, 2011. On December 7, 2012, our Board of Directors declared a special dividend of \$0.25 per share, payable in December 2012, and announced its intention to increase the regular quarterly dividend to \$0.06 per share. In addition, at the December 7, 2012 meeting of our Board of Directors, the

regular quarterly dividend that would have been paid in January 2013 was declared, its amount increased to \$0.06 per share and its payment date accelerated to December 28, 2012. We expect that such quarterly dividends will be paid in the foreseeable future. Prior to October 25, 2011, no cash dividends had been paid on the Company's common stock. Our revolving credit facility places limitations on the payment of dividends on our common stock. However, we do not believe that the terms of the credit facility materially limit our ability to pay a quarterly dividend of \$0.06 per share for the foreseeable future. The payment of dividends has been and will be funded from our operations. Long-term liquidity requirements can be expected to be met initially through cash generated from operating activities and our 2011 Revolving Credit Facility. Based upon our current credit ratings and financial position, we can reasonably expect to be able to incur long-term debt to fund acquisitions. Over the long term, our primary revenue risk factor continues to be the level of

Table of Contents

demand for non-residential construction services, which is influenced by macroeconomic trends including interest rates and governmental economic policy. In addition, our ability to perform work is critical to meeting long-term liquidity requirements.

We believe that our current cash balances and our borrowing capacity available under the 2011 Revolving Credit Facility or other forms of financing available to us through borrowings, combined with cash expected to be generated from operations, will be sufficient to provide our short-term and foreseeable long-term liquidity and meet our expected capital expenditure requirements. However, we are a party to lawsuits and other proceedings in which other parties seek to recover from us amounts ranging from a few thousand dollars to over \$10.0 million. We do not believe that any such matters will have a materially adverse effect on our financial position, results of operations or liquidity.

Certain Insurance Matters

As of March 31, 2013 and December 31, 2012, we utilized approximately \$88.0 million and \$84.0 million, respectively, of letters of credit obtained under our 2011 Revolving Credit Facility as collateral for our insurance obligations.

New Accounting Pronouncements

We review new accounting standards to determine the expected financial impact, if any, that the adoption of such standards will have. As of the filing of this Quarterly Report on Form 10-Q, there were no new accounting standards that were projected to have a material impact on our consolidated financial position, results of operations or liquidity. Refer to Part I, Item 1, “Financial Statements – Notes to Condensed Consolidated Financial Statements – Note 2, New Accounting Pronouncements”, for further information regarding new accounting standards.

Application of Critical Accounting Policies

Our condensed consolidated financial statements are based on the application of significant accounting policies, which require management to make significant estimates and assumptions. Our significant accounting policies are described in Note 2 – Summary of Significant Accounting Policies of the notes to consolidated financial statements included in Item 8 of the annual report on Form 10-K for the year ended December 31, 2012. We adopted two new accounting pronouncements during the three months ended March 31, 2013 (see Note 2, “New Accounting Pronouncements”, for further information). We believe that some of the more critical judgment areas in the application of accounting policies that affect our financial condition and results of operations are the impact of changes in the estimates and judgments pertaining to: (a) revenue recognition from (i) long-term construction contracts for which the percentage-of-completion method of accounting is used and (ii) services contracts; (b) collectibility or valuation of accounts receivable; (c) insurance liabilities; (d) income taxes; and (e) goodwill and identifiable intangible assets.

Revenue Recognition for Long-term Construction Contracts and Services Contracts

We believe our most critical accounting policy is revenue recognition from long-term construction contracts for which we use the percentage-of-completion method of accounting. Percentage-of-completion accounting is the prescribed method of accounting for long-term contracts in accordance with Accounting Standard Codification (“ASC”) Topic 605-35, “Revenue Recognition – Construction-Type and Production-Type Contracts”, and, accordingly, is the method used for revenue recognition within our industry. Percentage-of-completion is measured principally by the percentage of costs incurred to date for each contract to the estimated total costs for such contract at completion. Certain of our electrical contracting business units measure percentage-of-completion by the percentage of labor costs incurred to date for each contract to the estimated total labor costs for such contract. Application of percentage-of-completion accounting results in the recognition of costs and estimated earnings in excess of billings on uncompleted contracts in our Condensed Consolidated Balance Sheets. Costs and estimated earnings in excess of billings on uncompleted contracts reflected in the Condensed Consolidated Balance Sheets arise when revenues have been recognized but the amounts cannot be billed under the terms of contracts. Such amounts are recoverable from customers upon various measures of performance, including achievement of certain milestones, completion of specified units or completion of a contract.

Costs and estimated earnings in excess of billings on uncompleted contracts also include amounts we seek or will seek to collect from customers or others for errors or changes in contract specifications or design, contract change orders in dispute or unapproved as to both scope and price or other customer-related causes of unanticipated additional contract costs (claims and unapproved change orders). Such amounts are recorded at estimated net realizable value and take

into account factors that may affect our ability to bill unbilled revenues and collect amounts after billing. The profit associated with claim amounts is not recognized until the claim has been settled and payment has been received. Due to uncertainties inherent in estimates employed in applying percentage-of-completion accounting, estimates may be revised as project work progresses. Application of percentage-of-completion accounting requires that the impact of revised estimates be reported prospectively in the condensed consolidated financial statements. In addition to revenue recognition for long-term construction contracts, we recognize revenues from the

Table of Contents

performance of facilities services for maintenance, repair and retrofit work consistent with the performance of services, which are generally on a pro-rata basis over the life of the contractual arrangement. Expenses related to all services arrangements are recognized as incurred. Provisions for the entirety of estimated losses on uncompleted contracts are made in the period in which such losses are determined.

Accounts Receivable

We are required to estimate the collectibility of accounts receivable. A considerable amount of judgment is required in assessing the likelihood of realization of receivables. Relevant assessment factors include the creditworthiness of the customer, our prior collection history with the customer and related aging of the past due balances. At March 31, 2013 and December 31, 2012, our accounts receivable of \$1,253.3 million and \$1,222.0 million, respectively, included allowances for doubtful accounts of \$9.9 million and \$11.5 million, respectively. The decrease in our allowance for doubtful accounts was due to the recovery of amounts previously determined to be uncollectible and the write-off of accounts receivable against the allowance for doubtful accounts. Specific accounts receivable are evaluated when we believe a customer may not be able to meet its financial obligations due to deterioration of its financial condition or its credit ratings. The allowance for doubtful accounts requirements are based on the best facts available and are re-evaluated and adjusted on a regular basis as additional information is received.

Insurance Liabilities

We have loss payment deductibles for certain workers' compensation, automobile liability, general liability and property claims, have self-insured retentions for certain other casualty claims and are self-insured for employee-related healthcare claims. Losses are recorded based upon estimates of our liability for claims incurred and for claims incurred but not reported. The liabilities are derived from known facts, historical trends and industry averages utilizing the assistance of an actuary to determine the best estimate for the majority of these obligations. We believe the liabilities recognized on our balance sheets for these obligations are adequate. However, such obligations are difficult to assess and estimate due to numerous factors, including severity of injury, determination of liability in proportion to other parties, timely reporting of occurrences and effectiveness of safety and risk management programs. Therefore, if our actual experience differs from the assumptions and estimates used for recording the liabilities, adjustments may be required and will be recorded in the period that the experience becomes known.

Income Taxes

We had net deferred income tax liabilities at March 31, 2013 and December 31, 2012 of \$40.4 million and \$35.6 million, respectively, primarily resulting from differences between the carrying value and income tax basis of certain identifiable intangible assets and depreciable fixed assets, which will impact our taxable income in future periods. A valuation allowance is required when it is more likely than not that all or a portion of a deferred income tax asset will not be realized. As of March 31, 2013 and December 31, 2012, the total valuation allowance on gross deferred income tax assets was approximately \$2.5 million.

Goodwill and Identifiable Intangible Assets

As of March 31, 2013, we had \$566.6 million and \$337.4 million, respectively, of goodwill and net identifiable intangible assets (primarily consisting of our contract backlog, developed technology/vendor network, customer relationships, non-competition agreements and trade names), primarily arising out of the acquisition of companies. As of December 31, 2012, goodwill and net identifiable intangible assets were \$566.6 million and \$343.7 million, respectively. The determination of related estimated useful lives for identifiable intangible assets and whether those assets are impaired involves significant judgments based upon short and long-term projections of future performance. These forecasts reflect assumptions regarding the ability to successfully integrate acquired companies, as well as macroeconomic conditions. ASC Topic 350, "Intangibles—Goodwill and Other" ("ASC 350") requires goodwill and other identifiable intangible assets with indefinite useful lives not be amortized, but instead must be tested at least annually for impairment (which we test each October 1, absent any impairment indicators), and be written down if impaired. ASC 350 requires that goodwill be allocated to its respective reporting unit and that identifiable intangible assets with finite lives be amortized over their useful lives.

We test for impairment of our goodwill at the reporting unit level. In assessing whether our goodwill is impaired, we first qualitatively assess whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount using various factors. If after this assessment we are unable to determine that the fair value of a reporting unit

exceeds the carrying amount, we proceed to the two-step process as prescribed by ASC 350. The first step of this test compares the fair value of the reporting unit, determined based upon discounted estimated future cash flows, to the carrying amount, including goodwill. If the fair value exceeds the carrying amount, no further work is required and no impairment loss is recognized. If the carrying amount of the reporting unit exceeds the fair value, the goodwill of the reporting unit is potentially impaired and step two of the goodwill impairment test would need to be performed to measure the amount of an impairment loss, if any. In the second step, the impairment is computed by comparing the implied fair value of the reporting unit's goodwill with the carrying amount of the goodwill. If the carrying amount of the reporting unit's goodwill is greater than the implied fair value of its goodwill, an impairment loss in the

Table of Contents

amount of the excess is recognized and charged to operations. No impairment of our goodwill was recognized for either of the three month periods ended March 31, 2013 and 2012.

We also test for the impairment of trade names that are not subject to amortization by calculating the fair value using the “relief from royalty payments” methodology. This approach involves two steps: (a) estimating reasonable royalty rates for each trade name and (b) applying these royalty rates to a net revenue stream and discounting the resulting cash flows to determine fair value. This fair value is then compared with the carrying value of each trade name. If the carrying amount of the trade name is greater than the implied fair value of the trade name, an impairment in the amount of the excess is recognized and charged to operations. No impairment of our trade names was recognized for either of the three month periods ended March 31, 2013 and 2012.

In addition, we review for the impairment of other identifiable intangible assets that are being amortized whenever facts and circumstances indicate that their carrying values may not be fully recoverable. This test compares their carrying values to the undiscounted pre-tax cash flows expected to result from the use of the assets. If the assets are impaired, the assets are written down to their fair values, generally determined based on their future discounted cash flows. No impairment of our other identifiable intangible assets was recognized for either of the three month periods ended March 31, 2013 and 2012.

As of March 31, 2013, we had \$566.6 million of goodwill on our balance sheet and, of this amount, approximately 61.1% relates to our United States facilities services segment, approximately 38.2% relates to our United States mechanical construction and facilities services segment and approximately 0.7% relates to our United States electrical construction and facilities services segment. As of the date of our latest impairment test, October 1, 2012, the fair values of our United States facilities services segment, our United States mechanical construction and facilities services segment and our United States electrical construction and facilities services segment exceeded their carrying values by approximately \$109.2 million, \$376.5 million and \$306.9 million, respectively. The weighted average cost of capital used in testing goodwill for impairment was 12.8% and 12.1% for our domestic construction segments and our United States facilities services segment, respectively. The perpetual growth rate used was 2.7% for our domestic segments.

We have certain businesses, particularly within our United States facilities services segment, whose results are highly impacted by weather. Future performance of this segment, along with a continued evaluation of the conditions of its end user markets, will be important to ongoing impairment assessments. Should its actual results suffer a decline or expected future results be revised downward, the risk of goodwill impairment or impairment of other identifiable intangible assets would increase.

Our development of the present value of future cash flow projections used in impairment testing is based upon assumptions and estimates by management from reviews of our operating results, business plans, anticipated growth rates and margins, and weighted average cost of capital, among others. Those assumptions and estimates can change in future periods, and other factors used in assessing fair value are outside the control of management, such as interest rates. There can be no assurance that estimates and assumptions made for purposes of our goodwill and identifiable asset impairment testing will prove to be accurate predictions of the future. If our assumptions regarding future business performance or anticipated growth rates and/or margins are not achieved, or there is a rise in interest rates, we may be required to record goodwill and/or identifiable asset impairment charges in future periods.

Although we have not yet conducted our October 1, 2013 goodwill and other impairment tests, there have been no impairments recognized through the first three months of 2013. It is not possible at this time to determine if any such future impairment charge would result or, if it does, whether such a charge would be material.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We have not used any derivative financial instruments during the three months ended March 31, 2013, including trading or speculating on changes in commodity prices of materials used in our business.

We are exposed to market risk for changes in interest rates for borrowings under the 2011 Revolving Credit Facility. Borrowings under the 2011 Revolving Credit Facility bear interest at variable rates. As of March 31, 2013, there were borrowings of \$150.0 million outstanding under the 2011 Revolving Credit Facility. This instrument bears interest at (1) a rate which is the prime commercial lending rate announced by Bank of Montreal from time to time (3.25% at March 31, 2013) plus 0.50% to 1.00% based on certain financial tests or (2) United States dollar LIBOR (0.20% at March 31, 2013) plus 1.50% to 2.00% based on certain financial tests. The interest rate in effect at March 31, 2013 was 1.70%. Based on the \$150.0 million borrowings outstanding on the 2011 Revolving Credit Facility, if overall interest rates were to increase by 25 basis points, interest expense, net of income taxes, would increase by approximately \$0.2 million in the next twelve months. Conversely, if overall interest rates were to decrease by 25 basis points, interest expense, net of income taxes, would decrease by approximately \$0.2 million in the next twelve months. Letter of credit fees issued under this facility range from 1.50% to 2.00% of the respective face amounts of the letters of credit issued and are charged based on certain financial tests. The 2011 Revolving Credit Facility expires on November 21, 2016. There is no guarantee that we will be able to renew the 2011 Revolving Credit Facility at its expiration.

We are also exposed to construction market risk and its potential related impact on accounts receivable or costs and estimated earnings in excess of billings on uncompleted contracts. The amounts recorded may be at risk if our customers' ability to pay these obligations is negatively impacted by economic conditions. We continually monitor the creditworthiness of our customers and maintain on-going discussions with customers regarding contract status with respect to change orders and billing terms. Therefore, we believe we take appropriate action to manage market and other risks, but there is no assurance that we will be able to reasonably identify all risks with respect to collectibility of these assets. See also the previous discussion of Accounts Receivable under the heading, "Application of Critical Accounting Policies" in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Amounts invested in our foreign operations are translated into U.S. dollars at the exchange rates in effect at the end of the period. The resulting translation adjustments are recorded as accumulated other comprehensive income (loss), a component of equity, in our Condensed Consolidated Balance Sheets. We believe the exposure to the effects that fluctuating foreign currencies may have on our consolidated results of operations is limited because the foreign operations primarily invoice customers and collect obligations in their respective local currencies. Additionally, expenses associated with these transactions are generally contracted and paid for in their same local currencies.

In addition, we are exposed to market risk of fluctuations in certain commodity prices of materials, such as copper and steel, which are used as components of supplies or materials utilized in both our construction and facilities services operations. We are also exposed to increases in energy prices, particularly as they relate to gasoline prices for our fleet of over 8,500 vehicles. While we believe we can increase our prices to adjust for some price increases in commodities, there can be no assurance that price increases of commodities, if they were to occur, would be recoverable.

Additionally, our fixed price contracts do not allow us to adjust our prices and, as a result, increases in material or fuel costs could reduce our profitability with respect to projects in progress.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES.

Based on an evaluation of our disclosure controls and procedures (as required by Rule 13a-15(b) of the Securities Exchange Act of 1934), our President and Chief Executive Officer, Anthony J. Guzzi, and our Executive Vice President and Chief Financial Officer, Mark A. Pompa, have concluded that our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934) are effective as of the end of the period covered by this report.

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15(d)-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. – OTHER INFORMATION.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

The following table summarizes repurchases of our common stock made during the quarter ended March 31, 2013 by us:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet be Purchased Under the Plan or Programs
January 1, 2013 to January 31, 2013	None	None	None	\$48,565,219
February 1, 2013 to February 28, 2013	None	None	None	\$48,565,219
March 1, 2013 to March 31, 2013	None	None	None	\$48,565,219

On September 26, 2011, we announced that our Board of Directors had authorized the Company to repurchase up to \$100.0 million of its outstanding common stock. The repurchase program remains in effect. No other shares (1) have been repurchased since the program has been announced other than pursuant to this publicly announced program. Acquisitions under our repurchase program may be made from time to time as permitted by securities laws and other legal requirements.

ITEM 6. EXHIBITS.
