NOTE 1. BASIS OF PRESENTATION

The consolidated financial statements include the accounts of Peoples Financial Services Corp. (the “Corporation” or the “Company”) and its wholly owned subsidiaries, Peoples National Bank (the “Bank”), Peoples Advisors, LLC (“Advisors”), and Peoples Financial Capital Corporation. The Bank has two wholly owned subsidiaries, Peoples Financial Leasing, LLC and Peoples Investment Holdings, LLC. Peoples Financial Capital Corporation, Peoples Investment Holdings, LLC, and Peoples Financial Leasing, LLC were all incorporated in April of 2007. All material inter-company accounts and transactions have been eliminated in consolidation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information as well as instructions for Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and are of a normal, recurring nature. Operating results for the nine-month period ended September 30, 2007 are not necessarily indicative of the results that may be expected for the year ended December 31, 2007. For further information, refer to the consolidated financial statements and footnotes included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2006.

NOTE 2. EARNINGS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share:

	Nine Months Ended		Three Months Ended	
	September 30, 2007	September 30, 2006	September 30, 2007	September 30, 2006
Net income applicable to common stock	\$ 3,296,000	\$ 3,022,000	\$ 884,000	\$ 985,000
Weighted average common shares outstanding	3,135,122	3,147,527	3,136,565	3,139,763
Effect of dilutive securities, stock options	10,307	12,620	10,106	11,257
Weighted average common shares outstanding used to calculate diluted earnings per share	3,145,429	3,160,147	3,146,671	3,151,020
Basic earnings per share	\$ 1.05	\$ 0.96	\$ 0.28	\$ 0.31
Diluted earnings per share	\$ 1.05	\$ 0.96	\$ 0.28	\$ 0.31

NOTE 3. OTHER COMPREHENSIVE INCOME

The components of other comprehensive income (loss) and related tax effects for the nine months and three months ended September 30, 2007 and 2006 are as follows:

(In thousands)	Nine Months Ended		Three Months Ended	
	Sept 30, 2007	Sept 30, 2006	Sept 30, 2007	Sept 30, 2006
Unrealized holding gains (losses) on available for sale securities	\$ (1,379)	\$ 653	\$ 1,140	\$ 1,639
Less: Reclassification adjustment for gains (losses) realized in net income	(92)	6	44	15
Net unrealized gains (losses)	(1,287)	647	1,096	1,624
Tax effect	438	(220)	(372)	(552)
Other comprehensive income (loss)	\$ (849)	\$ 427	\$ 724	\$ 1,072

NOTE 4. STOCK-BASED COMPENSATION

Prior to January 1, 2006, the Company's stock option plan was accounted for under the recognition and measurement provisions of APB Opinion No. 25 (Opinion 25), *Accounting for Stock Issued to Employees*, and related Interpretations, as permitted by FASB Statement No. 123, *Accounting for Stock Based Compensation* (as amended by SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*) (collectively SFAS 123). No stock-based employee compensation cost was recognized in the Company's consolidated statements of income through December 31, 2005, as all options granted under the plan had an exercise price equal to the market value of the underlying common stock on the date of grant. Effective January 1, 2006, the Company adopted the fair value recognition provisions of FASB Statement No. 123(R), *Share-Based Payment* (SFAS 123R), using the modified-prospective transition method. Under that transition method, compensation cost recognized in 2006 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 1, 2006 based on the grant date fair value calculated in accordance with the original provisions of SFAS 123, and (b) compensation cost for all share-based payments granted subsequent to December 31, 2005, based on a grant-date fair value estimated in accordance with the provisions of SFAS 123(R). As of December 31, 2006, only 4,100 stock options were not fully vested and no stock options were granted during the nine months ended September 30, 2007.

As a result of adopting SFAS 123(R) on January 1, 2006, the Company's earnings before income taxes for the nine months ended September 30, 2007, are not materially different than if it had continued to be accounted for as share-based compensation under Opinion 25. As of September 30, 2007, the Company had 3,850 stock options not fully vested and there was less than \$2,000 of total unrecognized compensation cost related to these non-vested options. The cost is expected to be recognized monthly on a straight-line basis through December 31, 2008.

NOTE 5. GAIN ON SALE OF INTEREST IN INSURANCE AGENCY

In May of 2007, the Company sold its 20% interest in Community Banker's Insurance Agency LLC, for proceeds of \$551,000. The total gain recognized through this transaction totaled \$220,000.

NOTE 6. IMPAIRMENT CHARGE ON OTHER REAL ESTATE OWNED

In September 2007, the Company incurred an impairment charge to other real estate owned in the amount of \$575,000. The charge became necessary in relation to reasonable estimates obtained on the value of a commercial real estate property that the Bank took a deed in lieu of foreclosure on in August of 2006.

NOTE 7. GUARANTEES

The Company does not issue any guarantees that would require liability recognition or disclosure, other than standby letters of credit. Outstanding letters of credit written are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for standby letters of credit is represented by the contractual amount of those instruments. The Company had \$4,629,000 of standby letters of credit as of September 30, 2007. The Bank uses the same credit policies in making conditional obligations as it does for on-balance sheet instruments.

The majority of these standby letters of credit expire within the next twelve months. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending other loan commitments. The Company requires collateral supporting these letters of credit as deemed necessary. The maximum undiscounted exposure related to these commitments at September 30, 2007 was \$4,629,000, and the approximate value of underlying collateral upon liquidation that would be expected to cover this maximum potential exposure was \$3,368,000. The current amount of the liability as of September 30, 2007 for guarantees under standby letters of credit is not material.

NOTE 8. NEW ACCOUNTING STANDARDS

EITF 06-11

In March 2007, the FASB ratified EITF Issue No. 06-11, "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards ("EITF 06-11"). EITF 06-11 requires companies to recognize the income tax benefit realized from dividends or dividend equivalents that are charged to retained earnings and paid to employees for nonvested equity-classified employee share-based payment awards as an increase to additional paid-in capital. EITF 06-11 is effective for fiscal years beginning after September 15, 2007. The Company does not expect EITF 06-11 will have a material impact on its consolidated financial position, results of operations or cash flows.

EITF 06-10

In March 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-10, "Accounting for Collateral Assignment Split-Dollar Life Insurance Agreements" ("EITF 06-10"). EITF 06-10 provides guidance for determining a liability for the postretirement benefit obligation as well as recognition and measurement of the associated asset on the basis of the terms of the collateral assignment agreement. EITF 06-10 is effective for fiscal years beginning after December 15, 2007. The Company is currently assessing the impact of EITF 06-10 on its consolidated financial position and results of operations.

EITF 06-5

On September 7, 2006, the EITF reached a conclusion on Issue No. 06-5, "Accounting for Purchases of Life Insurance – Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance" ("EITF 06-5"). The scope of EITF 06-5 consists of six separate issues relating to accounting for life insurance policies purchased by entities protecting against the loss of "key persons." The six issues are clarifications of previously issued guidance on FASB Technical Bulletin No. 85-4. EITF 06-5 is effective for fiscal years beginning after December 15, 2006. Adoption of EITF 06-5 did not have a material impact on the Company's consolidated financial statements.

SFAS No. 157

In September 2006, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 157, "Fair Value Measurements," which defines fair value, establishes a framework for measuring fair value under U.S. GAAP, and expands disclosures about fair value measurements. SFAS No. 157 applies to other accounting pronouncements that require or permit fair value measurements. The new guidance is effective for financial statements issued for fiscal years beginning after November 15, 2007, and for interim periods within those fiscal years. We are currently evaluating the potential impact, if any, of the adoption of FASB Statement No. 157 on our consolidated financial position, results of operations and cash flows.

SFAS No. 159

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option of Financial Assets and Financial Liabilities*. SFAS No. 159 provides companies with an option to report many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. The objective of SFAS No. 159 is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. The FASB believes that SFAS No. 159 helps to mitigate accounting-induced volatility by enabling companies to report related assets and liabilities at fair value, which would likely reduce the need for companies to comply with detailed rules for hedge accounting. SFAS No. 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities, and would require entities to display the fair value of those assets and liabilities for which the company has chosen to use fair value on the face of the balance sheet. The new statement does not eliminate disclosure requirements included in other accounting standards, including requirements for disclosures about fair value measurements included in SFAS No. 157, *Fair Value Measurements*. This statement is effective as of the beginning of an entity's first fiscal year beginning after November 15, 2007. The Company is in the process of evaluating the impact, if any, that the adoption of SFAS No. 159 will have on the Company's consolidated financial statements.

FSP FIN 48-1

In May 2007, the FASB issued FASB Staff Position (“FSP”) FIN 48-1, “Definition of Settlement in FASB Interpretation No. 48” (“FSP FIN 48-1”). FSP FIN 48-1 provides guidance on how to determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits. FSP FIN 48-1 is effective retroactively to January 1, 2007. The implementation of this standard did not have a material impact on our consolidated financial position or results of operations.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of the consolidated financial statements of the Corporation is presented to provide insight into management’s assessment of financial results. The Corporation’s subsidiaries, Peoples National Bank and Peoples Advisors, LLC, provide financial services to individuals and businesses within the Bank’s primary market area made up of Susquehanna, Wyoming and Northern Lackawanna Counties in Pennsylvania, and Broome County in New York. The Bank is a member of the Federal Reserve System and subject to regulation, supervision, and examination by the Office of the Comptroller of the Currency. Advisors is a member of the National Association of Securities Dealers (NASD), which also acts as the primary regulator for Advisors. Peoples Financial Leasing, LLC is a subsidiary of the Bank and provides employee leasing services to the Bank. Peoples Investment Holdings, LLC is also a subsidiary of the Bank and its main activities are the maintenance and management of its intangible investments and the collection and distribution of the income from such investments or from tangible investments located outside of Delaware. Likewise, Peoples Financial Capital Corporation is a subsidiary of the Company and its main activities are the maintenance and management of its intangible investments and the collection and distribution of the income from such investments or from tangible investments located outside of Delaware.

CAUTIONARY STATEMENT CONCERNING FORWARD LOOKING INFORMATION

Except for historical information, this Report may be deemed to contain “forward looking” information. Examples of forward looking information may include, but are not limited to, (a) projections of or statements regarding future earnings, interest income, other income, earnings or loss per share, asset mix and quality, growth prospects, capital structure and other financial terms, (b) statements of plans and objectives of management or the Board of Directors, (c) statements of future economic performance, and (d) statements of assumptions, such as economic conditions in the market areas served by the Corporation and the Bank, underlying other statements and statements about the Corporation and the Bank or their respective businesses. Such forward looking information can be identified by the use of forward looking terminology such as “believes,” “expects,” “may,” “intends,” “will,” “should,” “anticipates,” or the use of any of the foregoing or other variations thereon or comparable terminology, or by discussion of strategy. No assurance can be given that the future results covered by the forward looking information will be achieved. Such statements are subject to risks, uncertainties, and other factors which could cause actual results to differ materially from future results expressed or implied by such forward looking information. Important factors that could impact operating results include, but are not limited to, (i) the effects of changing economic conditions in both the market areas served by the Corporation and the Bank and nationally, (ii) credit risks of commercial, real estate, consumer and other lending activities, (iii) significant changes in interest rates, (iv) changes in federal and state banking laws and regulations which could affect operations, (v) funding costs, and (vi) other external developments which could materially affect business and operations.

CRITICAL ACCOUNTING POLICIES

Disclosure of the Company’s significant accounting policies is included in Note 1 to the consolidated financial statements of the Company’s Annual Report on Form 10-K for the year ended December 31, 2006. Some of these policies are particularly sensitive requiring significant judgments, estimates and assumptions to be made by Management. Additional information is contained on page 22 of this report for the provision and allowance for loan losses and page 24 for the impairment charge to other real estate owned.

OVERVIEW

Net income for the nine months ended September 30, 2007 increased 9.07% to \$3.296 million as compared to \$3.022 million for the same period in 2006. Diluted earnings per share increased 9.38% to \$1.05 per share for the nine months ended September 30, 2007 from \$0.96 per share in the same nine-month period in 2006. At September 30, 2007, the Company had total assets of \$424.759 million, total net loans of \$280.676 million, and total deposits of \$321.343 million.

FINANCIAL CONDITION

Cash and Cash Equivalents:

At September 30, 2007, cash, federal funds sold and deposits with other banks totaled \$7.946 million as compared to \$12.380 million on December 31, 2006.

Management believes the liquidity needs of the Corporation are satisfied by the current balance of cash and cash equivalents, readily available access to traditional funding sources, and the portion of the securities and loan portfolios that mature within one year. The current sources of funds will enable the Corporation to meet all its cash obligations as they come due.

Securities:

Securities totaled \$112.080 million on September 30, 2007, increasing by \$1.778 million from the December 31, 2006 total of \$110.302 million.

The total securities portfolio is held as available for sale. This strategy was implemented in 1995 to provide more flexibility in using the investment portfolio for liquidity purposes as well as providing more flexibility in selling when market opportunities occur.

Securities available for sale are accounted for at fair value with unrealized gains or losses net of deferred income taxes reported as the accumulated other comprehensive income component of stockholders' equity. The carrying value of securities as of September 30, 2007 included an unrealized loss of \$1.885 million reflected as accumulated other comprehensive loss of \$1.244 million in stockholders' equity, net of deferred income taxes of \$641 thousand. This compares to an unrealized loss of \$598 thousand at December 31, 2006 reflected as accumulated other comprehensive loss of \$395 thousand, net of deferred income taxes of \$203 thousand.

Management monitors the earnings performance and effectiveness of liquidity of the investment portfolio on a monthly basis through the Asset/Liability Committee ("ALCO"). The ALCO also reviews and manages interest rate risk for the Corporation. Through active balance sheet management and analysis of the investment securities portfolio, the Corporation maintains sufficient liquidity to satisfy depositor requirements and various credit needs of its customers.

Loans:

Net loans increased \$11.293 million, or 4.19%, to \$280.676 million as of September 30, 2007 from \$269.383 million as of December 31, 2006. Of the loan growth experienced in the first nine months of 2007, the largest growth was in commercial loans. Commercial loans, including traditional commercial loans as well as commercial real estate mortgages, increased \$6.818 million, or 4.84%, to \$147.749 million as of September 30, 2007 compared to \$140.931 million as of December 31, 2006. Residential real estate mortgage loans increased \$3.862 million, or 3.42%, to \$116.748 million as of September 30, 2007, compared to \$112.886 million as of December 31, 2006.

Increasing the loan to deposit ratio is a goal of the Bank, but loan quality is always considered in this effort. Management continues its efforts to create good underwriting standards for both commercial and consumer credit. Most commercial lending is done primarily with locally owned small businesses.

Other Real Estate Owned:

Other real estate owned decreased \$370 thousand, or 7.31%, to \$4.692 million as of September 30, 2007 from \$5.062 million as of December 31, 2007. During the year, \$276 thousand of loans were transferred to other real estate owned through foreclosure. This was offset by sale of other real estate owned of \$71 thousand and an impairment charge to other real estate owned in the amount of \$575 thousand. The charge became necessary in relation to reasonable estimates obtained on the value of commercial real estate property that the Bank took a deed in lieu of foreclosure on in August of 2006.

Other Assets:

Other assets increased \$12 thousand, or 0.49%, to \$2.467 million as of September 30, 2007 from \$2.455 million as of December 31, 2006. The most significant increase in other assets was the \$438,000 increase in deferred taxes on unrealized losses on securities available for sale from December 31, 2006 to September 30, 2007. This increase was offset by decreases to other components of other assets; the most significant of which was the sale of the 20% interest in Community Banker's Insurance Agency LLC which decreased other assets by \$332 thousand. Miscellaneous sundry accounts with balances that vary on a regular basis account for the other fluctuations within other assets.

Deposits:

Deposits are attracted from within the Bank's primary market area through the offering of various deposit instruments including NOW accounts, money market accounts (MMDA), savings accounts, certificates of deposit, and IRA's. During the nine-month period ended September 30, 2007, total deposits decreased by \$2.270 million, or 0.70%, to \$321.343 million as compared to \$323.613 million as of December 31, 2006. Of the decreases to deposit balances, the most significant were to savings accounts, which include traditional statement savings as well as the certificate savings account. Savings balances decreased \$5.087 million, or 4.71%, to \$102.857 million as of September 30, 2007 compared to \$107.944 million as of December 31, 2006. The decrease to savings balances was offset by increases in certificates of deposit which increased \$5.319 million, or 6.88%, to \$82.640 million as of September 30, 2007, compared to \$77.321 million as of December 31, 2006. Regular checking accounts increased \$3.090 million, or 6.06%, to \$54.088 million as of September 30, 2007 compared to \$50.998 million as of December 31, 2006. In contrast, NOW account balances decreased \$1.702 million, or 5.89%, to \$27.185 million as of September 30, 2007 compared to \$28.887 million as of December 31, 2006. Lastly, MMDA balances decreased \$2.681 million, or 7.12%, to \$34.992 million as of September 30, 2007 compared to \$37.673 million as of December 31, 2006. As the short end of the yield curve has fallen in the third quarter of 2007, some customers have moved funds from traditional savings accounts paying rates tied to short term treasury rates and invested those funds in certificate of deposit specials which are currently paying more attractive rates.

Borrowings:

The Bank utilizes borrowings as a source of funds for its asset/liability management. Advances are available from the Federal Home Loan Bank (FHLB) provided certain standards related to credit worthiness have been met. Repurchase and term agreements are also available from the FHLB.

Total short-term borrowings at September 30, 2007 were \$23.146 million as compared to \$12.574 million as of December 31, 2006, an increase of \$10.572 million, or 84.08%. The increase in short-term borrowings is due in part to the maturity of \$7.500 million in term borrowings at the FHLB. The decision was made not to refinance the term borrowing and as deposit balances have declined by \$2.270 million during 2007, short term borrowing capacity has absorbed the funding need.

Long-term borrowings were \$35.993 million as of September 30, 2007 compared to \$36.525 million as of December 31, 2006 a decrease of \$532 thousand, or 1.46%. As compared to the balance of long-term borrowings as of the previous reporting period ended June 30, 2007 of \$31.447 million, the Bank utilized an additional \$5 million in FHLB term borrowings ranging in rate from 4.86% to 4.88% in August to purchase securities with like terms at yields exceeding 6.00%. This strategy allowed the Bank to lock in an attractive spread over the term of the borrowings.

Capital:

The adequacy of the Corporation's capital is reviewed on an ongoing basis with reference to the size, composition and quality of the Corporation's resources and regulatory guidelines. Management seeks to maintain a level of capital sufficient to support existing assets and anticipated asset growth, maintain favorable access to capital markets, and preserve high quality credit ratings. As of September 30, 2007, regulatory capital to total average assets was 9.18% as compared to 8.92% on December 31, 2006. The Company repurchases its stock in the open market or from individuals as warranted to leverage the capital account and to provide stock for its stock option plan and dividend reinvestment plan. In the nine months ended September 30, 2007, the Company purchased 3,500 shares for the treasury at a total cost of \$94,500.

The Corporation has complied with the standards of capital adequacy mandated by the banking regulators. The bank regulators have established "risk-based" capital requirements designed to measure capital adequacy. Risk-based capital ratios reflect the relative risks of various assets the banks hold in their portfolios. A weight category of either 0% (lowest risk asset), 20%, 50%, or 100% (highest risk assets) is assigned to each asset on the balance sheet. Capital is being maintained in compliance with risk-based capital guidelines. The Company's Tier 1 capital to risk weighted asset ratio was 12.80% and the total capital ratio to risk weighted asset ratio was 13.50% at September 30, 2007. The Corporation is deemed to be well-capitalized under regulatory standards.

Liquidity:

Liquidity measures an organization's ability to meet cash obligations as they come due. The consolidated statements of cash flows presented in the accompanying consolidated financial statements included in Part I of this Form 10-Q provide analysis of the Corporation's cash and cash equivalents. Additionally, management considers that portion of the loan and investment portfolio that matures within one year as part of the Corporation's liquid assets, as well as an available line of credit at the Federal Home Loan Bank (FHLB) in the amount of \$128 million that would be used to offset any short term funding needs.

The ALCO addresses the liquidity needs of the Bank to see that sufficient funds are available to meet credit demands and deposit withdrawals, as well as to the placement of available funds in the investment portfolio. In assessing liquidity requirements, equal consideration is given to the current position as well as the future outlook.

Off-Balance Sheet Arrangements:

The Company's consolidated financial statements do not reflect various commitments that are made in the normal course of business, which may involve some liquidity risk. These commitments consist primarily of commitments to grant new loans, unfunded commitments of existing loans and letters of credit made under the same standards as on-balance sheet instruments. Unused commitments on September 30, 2007 totaled \$47.678 million, which consisted of \$32.088 million in unfunded commitments of existing loans, \$10.961 million to grant new loans and \$4.629 million in standby letters of credit. Due to fixed maturity dates and specified conditions within these instruments, many will expire without being drawn upon. Management believes that amounts actually drawn upon can be funded in the normal course of operations and therefore, do not represent a significant liquidity risk to the Company.

Interest Rate Sensitivity:

The management of interest rate sensitivity seeks to avoid fluctuating net interest margins and to provide consistent net interest income through periods of changing interest rates.

The Company's risk of loss arising from adverse changes in the fair value of financial instruments, or market risk, is composed primarily of interest rate risk. The primary objective of the Company's asset/liability management activities is to maximize net interest income while maintaining acceptable levels of interest rate risk. The Company's ALCO is responsible for establishing policies to limit exposure to interest rate risk, and to ensure procedures are established to monitor compliance with those policies. The guidelines established by ALCO are reviewed by the Company's Board of Directors.

The tools used to monitor sensitivity are the Statement of Interest Sensitivity Gap and the interest rate shock analysis. The Bank uses a software model to measure and to keep track. In addition, an outside source does a quarterly analysis to make sure our internal analysis is current and correct. The statement of Interest Sensitivity Gap is a good assessment of current position and is a very useful tool for the ALCO in performing its job. This report is monitored in an effort to "match" maturities or re-pricing opportunities of assets and liabilities, in order to attain the maximum interest within risk tolerance policy guidelines. The statement does, although, have inherent limitations in that certain assets and liabilities may react to changes in interest rates in different ways, with some categories reacting in advance of changes and some lagging behind the changes. In addition, there are estimates used in determining the actual propensity to change of certain items, such as deposits without maturities.

The following table sets forth the Company's interest sensitivity analysis as of September 30, 2007:

INTEREST RATE SENSITIVITY ANALYSIS

(Dollars in thousands)

	Maturity or Re-pricing In:				
	3 Months	3-6 Months	6-12 Months	1-5 Years	Over 5 Years

RESULTS OF OPERATIONS

Net Interest Income:

For the three months ended September 30, 2007, total interest income increased by \$398 thousand, or 6.87%, to \$6.193 million as compared to \$5.795 million for the three months ended September 30, 2006. This increase was due to the increase in average loans and average securities held for the quarter ended September 30, 2007 compared to the same quarter in 2006. Average loans increased \$10.390 million, or 3.86%, to \$279.642 million for the quarter ended September 30, 2007 as compared to \$269.252 million for the same three-month period in 2006. Average securities increased \$8.650 million, or 8.47%, to \$110.829 million for the quarter ended September 30, 2007 as compared to \$102.179 million for the same three-month period in 2006. Overall average earning assets increased to \$390.516 million for the three months ended September 30, 2007 as compared to \$373.782 million for the three months ended September 30, 2006. The resulting interest earned on loans, on a fully tax equivalent basis, was \$5.063 million, for the three-month period ended September 30, 2007 compared to \$4.703 million for the same period in 2006, an increase of \$361 thousand, or 7.68%. The interest earned on securities, on a fully tax equivalent basis, was \$1.509 million, for the three-month period ended September 30, 2007 compared to \$1.324 million for the same period in 2006, an increase of \$185 thousand, or 13.97%. The overall yield on earning assets increased for the three months ended September 30, 2007 to 6.68% as compared to 6.45% for the three months ended September 30, 2006.

For the nine months ended September 30, 2007, total interest income increased by \$1.514 million, or 9.05%, to \$18.235 million as compared to \$16.721 million for the nine months ended September 30, 2006. This increase too was primarily due to increases in average total loans and securities. Average total loans increased to \$275.179 million for the nine months ended September 30, 2007 as compared to \$266.728 million for the nine months ended September 30, 2006. The resulting interest earned on loans, on a fully tax equivalent basis, was \$14.772 million, for the nine-month period ended September 30, 2007 compared to \$13.664 million for the same period in 2006, an increase of \$1.108 million, or 8.11%. Average securities increased to \$109.067 million for the nine months ended September 30, 2007 as compared to \$102.963 million for the nine months ended September 30, 2006. The resulting interest earned on securities, on a fully tax equivalent basis, was \$4.416 million, for the nine-month period ended September 30, 2007 compared to \$3.869 million for the same period in 2006, an increase of \$547 thousand, or 14.14%. The overall yield on earning assets increased for the nine months ended September 30, 2007 to 6.67% as compared to 6.33% for the nine months ended September 30, 2006 as average earning assets increased to \$385.633 million for the period ended September 30, 2007 from \$372.380 million for the same period in 2006.

Total interest expense decreased by \$17 thousand, or 0.60%, to \$2.805 million for the three months ended September 30, 2007 from \$2.822 million for the three months ended September 30, 2006. This decrease was attributable to the decrease in the cost of funds which decreased to 3.46% for the three months ended September 30, 2007 as compared to 3.65% for the third quarter of 2006. Average interest bearing liabilities increased to \$321.329 million for the three months ended September 30, 2007 as compared to \$306.678 million for the three months ended September 30, 2006. This increase was primarily due to the increase in average regular savings. Average regular savings increased to \$107.994 million for the three-month period ended September 30, 2007 as compared to \$92.208 million for the same period in 2006 while at the same time the effective cost of regular savings decreased to 3.09% for the three months ended September 30, 2007 compared to 3.78% for the three months ended September 30, 2006. The largest contributor to average regular savings balances is the certificate savings with an average balance of \$79.293 million for the three-month period ended September 30, 2007. This compares to an average balance of \$64.288 million for the three-month period ended September 30, 2006. While the average balance has increased in this comparison, the rate paid on this product has decreased throughout 2007 as the three month T-bill has decreased. The rate paid on the certificate savings is directly tied to the three month T-bill. Currently, the certificate savings is paying a rate that has fluctuated in the 3.50% range as compared to 2006 when the rate paid on this account was at or near the 5.00% range for most of the year.

Total interest expense increased by \$670 million, or 8.59%, to \$8.469 million for the nine months ended September 30, 2007 from \$7.799 million for the nine months ended September 30, 2006. This increase was primarily attributable to average interest bearing liabilities which increased to \$318.370 million for the nine months ended September 30, 2007 as compared to \$306.161 million for the nine months ended September 30, 2006. The year-to-date increase in average interest bearing liabilities was also primarily due to the increase in average regular savings. Average regular savings increased to \$108.817 million for the nine-month period ended September 30, 2007 when compared to \$91.603 million for the nine-month period ended September 30, 2006. This increase too has been the result of the increase in the average balance of the certificate savings account which is indexed off of the three month T-bill. The year to date average balance in certificate savings went from \$57.763 million as of September 30, 2006 to \$79.492 million as of September 30, 2007. However, as the short end of the treasury yield curve has decreased though, so has the rate paid on this product. As previously discussed, the rate paid on the certificate savings product has dropped to a range at or near 3.50% as of September 30, 2007 as compared to 5.00% as of September 30, 2006. The decrease in the rate paid has offset, or at least curtailed, the interest expense that would have been incurred on the certificate savings if the three month T-bill had not decreased in 2007. To illustrate this point, consider that the interest paid on certificate savings increased for the nine months ended September 30, 2007 to \$2.598 million as compared to \$2.030 million for the nine months ended September 30, 2006. This is an increase of \$568 thousand, or 27.98%. The average balance in certificate savings increased \$21.729 million, or 37.62% during that same nine-month period.

Net interest income increased by \$415 thousand, or 13.96%, to \$3.388 million for the three months ended September 30, 2007 from \$2.973 million for the three months ended September 30, 2006. The Bank's net interest spread increased to 3.22% for the three months ended September 30, 2007 from 2.80% for the three months ended September 30, 2006 on a fully tax equivalent basis. The net interest margin increased to 3.83% for the three-month period ended September 30, 2007 from 3.46% for the three-month period ended September 30, 2006 on a fully tax equivalent basis. The effects of the decreases to the Federal Funds rate, which were implemented by the Federal Reserve in September of 2007, have been to increase both the net interest spread and net interest margin. This is due to the short end of the treasury yield curve decreasing with those rate movements while the long end of the treasury yield curve has remained less affected. The result has been a steepened yield curve. Deposit liability rates are affected by the short end of the yield curve while loan and investment rates tend to follow the long end of the yield curve, the result of which is an increase in net interest income.

Net interest income increased by \$844 thousand, or 9.46%, to \$9.766 million for the nine months ended September 30, 2007 from \$8.922 million for the nine months ended September 30, 2006. The Bank's net interest spread increased to 3.11% for the nine months ended September 30, 2007 from 2.92% for the nine months ended September 30, 2006 on a fully tax equivalent basis. The net interest margin increased to 3.73% for the nine-month period ended September 30, 2007 from 3.53% for the nine-month period ended September 30, 2006 on a fully tax equivalent basis. The increase in net interest spread and net interest income for the nine months ended September 30, 2007 when compared to the nine months ended September 30, 2006 is also due to the steepened yield curve which was discussed with the quarterly results.

Below are the tables which set forth average balances and corresponding yields for the nine-month and three-month periods ended September 30, 2007, and September 30, 2006:

**Distribution of Assets, Liabilities and Stockholders' Equity;
Interest Rates and Interest Differential (year to date)**

Provision for Loan Losses:

The provision for loan losses for the three months ended September 30, 2007 was \$40 thousand, a decrease of \$20 thousand, or 33.33% from the same period in 2006.

The provision for loan losses for the nine months ended September 30, 2007 was \$280 thousand, an increase of \$100 thousand over the same period in 2006. Changing economic conditions, as well as internal analysis performed on the loan portfolio, have made necessary the increases in the loan loss provision for the nine-month period ended September 30, 2007. One of the Bank's main goals is to increase the loan to deposit ratio without jeopardizing loan quality. To reach its goal, management has continued its efforts to create strong underwriting standards for both commercial and consumer credit. The Bank's lending consists primarily of retail lending, which includes single family residential mortgages and other consumer lending, and commercial lending primarily to locally-owned small businesses.

In the three-month period ended September 30, 2007, charge-offs totaled \$13 thousand while net charge-offs totaled \$6 thousand as compared to \$39 thousand and \$29 thousand, respectively, for the same three-month period in 2006.

In the nine-month period ended September 30, 2007, charge-offs totaled \$49 thousand while net charge-offs totaled \$23 thousand as compared to \$97 thousand and \$72 thousand, respectively, for the same nine-month period in 2006.

Monthly, senior management uses a detailed analysis of the loan portfolio to determine loan loss reserve adequacy. The process considers all "problem loans" including classified, criticized, and monitored loans. Prior loan loss history and current market trends, both nationally and locally, are taken into consideration. A watch list of potential problem loans is maintained and monitored on a monthly basis by the Board of Directors. The Bank has not had, nor presently has, any foreign loans. Based upon this analysis, senior management has concluded that the allowance of loan losses is adequate.

Non-performing loans:

(Dollars in thousands)	September 30, 2007	December 31, 2006
Non-accrual and restructured	\$ 436	\$ 445
Loans past due 90 or more days, accruing interest	0	275
Total nonperforming loans	436	720
Other real estate owned	4,692	5,062
Total nonperforming assets	\$ 5,128	\$ 5,782
Nonperforming loans to total loans at period-end	0.15%	0.27%
Nonperforming assets to period-end loans and other real estate owned	1.78%	2.15%

Other Income:

Service charges and fees increased 12.27%, or \$54 thousand, to \$494 thousand in the three months ended September 30, 2007, from \$440 thousand in the three months ended September 30, 2006.

Service charges and fees increased 8.23%, or \$110 thousand, to \$1.447 million in the nine months ended September 30, 2007, from \$1.337 million in the nine months ended September 30, 2006. The increase in service charges and fees is due in part to net overdraft fees which were \$983 thousand for the nine-month period ended September 30, 2007 compared to \$898 thousand for the comparable period in 2006, an increase of \$85 thousand, or 9.46%. The increase was due to the increase in deposit accounts attracted within the Bank's newer market areas in New York State, as well as increases in deposit accounts at the existing branches of the Bank. Increases were budgeted in net overdraft fees in 2007. The net overdraft fees were budgeted to be \$945 thousand for the nine months ended September 30, 2007, a positive variance of \$38 thousand, or 4.02%.

Investment division income was \$93 thousand for the three-month period ended September 30, 2007, an increase of \$40 thousand, or 75.47%, from the same period in 2006.

Investment division income was \$278 thousand for the nine-month period ended September 30, 2007, an increase of \$125 thousand, or 81.70%, from the same period in 2006. As noted in previous reports, the investment division implemented a different business model starting in 2006. The change has been reflected in the fee structure which went from a one-time, up-front commission prior to 2006 to a smaller commission received on a recurring basis over the life of an account. This has benefited the investment division by recognizing fee income on a recurring basis.

Earnings on investment in life insurance has increased to \$77 thousand for the three-month period ended September 30, 2007, compared to \$73 thousand for the three-month period ended September 30, 2006, an increase of \$4 thousand, or 5.48%.

Earnings on investment in life insurance has increased to \$228 thousand for the nine-month period ended September 30, 2007, compared to \$206 thousand for the nine-month period ended September 30, 2006, an increase of \$22 thousand, or 10.68%.

Other income was \$119 thousand for the three months ended September 30, 2007, an increase of \$10 thousand, or 9.17%, from \$109 thousand for the comparable period in 2006.

Other income was \$395 thousand for the nine months ended September 30, 2007, an increase of \$99 thousand, or 33.45%, from \$296 thousand for the comparable period in 2006. Various sundry accounts contribute to the increase in other income for the nine-month period ended September 30, 2007 when compared to the same period in 2006.

Gain on sale of interest in insurance agency was \$220,000 for the nine months ended September 30, 2007 compared to \$0 for the comparable period in 2006. The Company realized this gain through the sale of its 20% interest in Community Bankers Insurance Agency (CBIA) in May of 2007. The Company does not expect the sale of the insurance agency to have a significant impact on future earnings.

Gains on security sales were \$44 thousand for the three months ended September 30, 2007 compared to gains of \$15 thousand for the comparable period in 2006, an increase of \$29 thousand, or 193.33%.

Losses on security sales were \$92 thousand for the nine months ended September 30, 2007 compared to gains of \$6 thousand for the comparable period in 2006, a decrease of \$98 thousand. The decrease is due to the existence of fewer gain positions within the Bank's investment portfolio as market yields begin to eclipse yields within the portfolio. Also contributing to the decrease are strategies which have been implemented which include selling lower yielding securities at a loss and reinvesting those balances in higher yielding positions with the intention of improving yields in future periods while sacrificing short term profits.

Other Operating Expenses:

Total other expenses increased 26.90%, or \$656 thousand, to \$3.095 million during the three months ended September 30, 2007 compared to \$2.439 million for the comparable period in 2006. In September 2007, the Company incurred an impairment charge to other real estate owned in the amount of \$575 thousand. The charge became necessary in relation to reasonable estimates obtained on the value of a commercial real estate property that the Bank took a deed in lieu of foreclosure on in August of 2006. Excluding this amount from the total, other expenses increased 3.32%, or \$81 thousand during the three months ended September 30, 2007 compared to the same three-month period in 2006.

Total other expenses increased 12.19%, or \$870 thousand, to \$8.006 million during the nine months ended September 30, 2007 compared to \$7.136 million for the comparable period in 2006. As with the three month analysis of other expenses, excluding the impairment charge in September of 2007 from the analysis, other expenses would have increased 4.13%, or \$295 thousand for the nine months ended September 30, 2007 compared to the same period in 2006.

Notable components of other expenses are as follows:

Salaries and benefits increased 7.74%, or \$87 thousand, to \$1.211 million for the three months ended September 30, 2007 compared to \$1.124 million for the same period in 2006. This increase is due in part to additional health insurance premiums incurred in the amount of \$58 thousand in September of 2007 for a new health care consortium entered into by the Bank through the Pennsylvania Bankers Association. October premiums for the new consortium were due in September as well as the September premiums for the old health insurance plan. Also contributing to the period over period variance were normal pay increases.

Salaries and benefits increased 3.75%, or \$129 thousand, to \$3.569 million for the nine months ended September 30, 2007 compared to \$3.440 million for the same period in 2006, also the result of \$58 thousand in additional health insurance premiums incurred in September of 2007 for the new health care consortium, as well as normal pay increases.

Occupancy expenses increased \$26 thousand, or 17.69%, for the three-month period ended September 30, 2007, to \$173 thousand, compared to \$147 thousand for the same period in 2006. These increases are considered normal due to increased energy costs between the two periods as well as additional repairs and maintenance costs.

Occupancy expense increased \$42 thousand, or 8.27%, for the nine-month period ended September 30, 2007, to \$550 thousand, compared to \$508 thousand for the nine-month period ended September 30, 2006. Increased heating costs as well as additional repairs and maintenance costs have contributed to the increase year to date.

Equipment expense increased \$10 thousand, or 9.09%, for the three-month period ended September 30, 2007, to \$120 thousand, compared to \$110 thousand for the same period in 2006. These costs increased due to increased depreciation expense associated with new equipment purchased late in 2006 to replace equipment which was damaged or destroyed in the flooding which occurred in June of 2006.

Equipment expense increased \$50 thousand, or 15.02%, for the nine-month period ended September 30, 2007, to \$383 thousand, compared to \$333 thousand for the nine-month period ended September 30, 2006. Again, these costs increased due to increased depreciation expense associated with new equipment purchased late in 2006 to replace equipment which was damaged or destroyed in the flooding which occurred in June of 2006.

Professional fees and outside services increased \$7 thousand, or 8.43%, in the three months ended September 30, 2007 to \$90 thousand, compared to \$83 thousand for the three-month period ended September 30, 2006. This increase is not considered to be material or indicative of a trend.

Professional fees and outside services increased \$16 thousand, or 6.32%, in the nine months ended September 30, 2007 to \$269 thousand, compared to \$253 thousand for the same nine-month period ended September 30, 2006. As with the quarter-to-date results discussed, this increase is not considered material or the result of a trend. Loan review fees paid in January 2007 in the amount of \$12 thousand which were not incurred in the same period in 2006 are the reason for the majority of the increase between periods.

Computer services and supplies increased \$4 thousand, or 2.12%, for the three months ended September 30, 2007, to \$193 thousand, compared to \$189 thousand for the comparable period in 2006. This increase is not considered material.

Computer services and supplies decreased \$9 thousand, or 1.54%, for the nine months ended September 30, 2007, to \$574 thousand, compared to \$583 thousand for the comparable period in 2006. The decrease in computer services and supplies is primarily due to decreases in ATM expenses. The Company no longer utilizes the services of Midwest Payment Systems in the processing of ATM and debit card transactions. The Company now internally processes those transactions at a reduced cost.

All other operating expenses decreased \$53 thousand, or 6.74%, to \$733 million in the three months ended September 30, 2007, compared to \$786 thousand for the same three-month period in 2006.

All other operating expenses increased \$67 thousand, or 3.32%, to \$2.086 million for the nine-month period ended September 30, 2007, compared to \$2.019 million for the same nine-month period in 2006.

Effective January 1, 2007, the Federal Deposit Insurance Corporation (FDIC) created a new risk framework of four low risk categories and established assessment rates to coincide with each category. Assessment rates for Risk Category I institutions, which includes Peoples National Bank, range from 5 to 7 basis points. The FDIC also approved a one-time assessment credit for banks in existence on December 31, 1996 that paid in deposit insurance assessments prior to that date. Management believes that the one-time credit will affect the new FDIC assessment cost for 2007. The Company will begin to recognize the FDIC assessment cost at such time as the credit will be depleted, which is currently estimated to be in the second quarter of 2008.

Income Tax Provision:

The Corporation recorded an income tax provision of \$196 thousand, or 18.15% of income, and \$179 thousand or 15.38% of income, for the quarters ended September 30, 2007 and 2006, respectively.

The Corporation recorded an income tax provision of \$660 thousand, or 16.68% of income, and \$582 thousand or 16.15% of income, for the nine months ended September 30, 2007 and 2006, respectively. The effective tax rate for the year to date period ended September 30, 2007 remains relatively low due to tax-exempt loan and investment interest income.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Federal Reserve moved to lower the target rate for overnight borrowing between banks, Fed Funds, by 50 basis points on September 18, 2007. The Federal Reserve has also lowered the borrowing rate at its own discount window two separate times in 50 basis point increments since August 2007. While the moves have steepened the yield curve, thus relieving some of the margin compression banks have experienced over the past few years, operating in a flat to inverted yield curve environment, it also brings with it greater levels of sensitivity to existing balance sheet products. As of September 30, 2007, the Bank is currently showing more sensitivity to downward rate shift scenarios. The results of the latest financial simulation follow. The simulation shows a possible decrease in net interest income of 0.55%, or \$82 thousand, in a +200 basis point rate shock scenario over a one-year period. A decrease also results from a -200 basis point rate shock over the same one-year period. However, at 6.99%, or \$1.035 million, the results show more sensitivity. The net interest income risk position of the Bank remains within the guidelines established by the Bank's asset/liability policy. The Bank continuously monitors its rate sensitivity.

Equity value at risk is monitored regularly and is also within established policy limits. Please refer to the Annual Report on Form 10-K filed with the Securities and Exchange Commission for December 31, 2006, for further discussion of this matter.

Item 4. Controls and Procedures

(a) Evaluation of disclosure controls and procedures.

The Company's management, including the Company's Chief Executive Officer and Principal Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15(d)-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2007. Based upon that evaluation, the Chief Executive Officer and Principal Financial Officer concluded that, as of the Evaluation Date, the Company's disclosure controls and procedures were effective in timely alerting them to any material information relating to the Company and its subsidiaries required to be included in the Company's periodic SEC filings.

(b) Changes in internal controls.

There were no changes made in the Company's internal controls over financial reporting that occurred during the Company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Although as stated above, we have not made any significant changes in our internal controls over financial reporting in the most recent fiscal quarter, based on our documentation and testing to date, we have made improvements in the documentation, design and effectiveness of internal controls over financial reporting, including the purchase of internal control software that allows upper management to view reports and to understand the risks and controls within the entire organization or specific areas of the organization. These reports provide up to date information at all times.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

The nature of the Company's business generates a certain amount of litigation involving matters arising out of the ordinary course of business. In the opinion of management, there are no legal proceedings that might have a material effect on the consolidated results of operations, liquidity, or the financial position of the Company at this time.

Item 1A. Risk Factors

No changes from those previously disclosed.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

PEOPLES FINANCIAL SERVICES CORP.
