Item 2.02. Results of Operations and Financial Condition.

On April 27, 2009, Enterprise Products Partners L.P. (“Enterprise”) issued a press release announcing its financial and operating results for the three months ended March 31, 2009, and held a webcast conference call discussing those results. A copy of the earnings press release is furnished as Exhibit 99.1 to this Current Report, which is hereby incorporated by reference into this Item 2.02. The webcast conference call will be archived and available for replay on Enterprise’s website at www.epplp.com for 90 days.

Unless the context requires otherwise, references to “we,” “us,” “our,” or “Enterprise” within the context of this Current Report refer to the consolidated business and operations of Enterprise Products Partners L.P. References to “EPCO” refer to EPCO, Inc., a private company affiliate of Enterprise and its ultimate parent company. References to “DEP” or “Duncan Energy Partners” refer to Duncan Energy Partners L.P., a consolidated subsidiary of Enterprise.

Use of Non-GAAP financial measures

Our press release and/or the webcast conference call discussion include the non-generally accepted accounting principle (“non-GAAP”) financial measures of gross operating margin, distributable cash flow and Adjusted EBITDA. The press release provides reconciliations of these non-GAAP financial measures to their most directly comparable financial measures calculated and presented in accordance with U.S. generally accepted accounting principles (“GAAP”). Our non-GAAP financial measures should not be considered as alternatives to GAAP measures such as net income, operating income, net cash flows provided by operating activities or any other measure of financial performance calculated and presented in accordance with GAAP. Our non-GAAP financial measures may not be comparable to similarly-titled measures of other companies because they may not calculate such measures in the same manner as we do.

Gross operating margin. We evaluate segment performance based on the non-GAAP financial measure of gross operating margin. Gross operating margin (either in total or by individual segment) is an important performance measure of the core profitability of our operations. This measure forms the basis of our internal financial reporting and is used by management in deciding how to allocate capital resources among business segments. We believe that investors benefit from having access to the same financial measures that our management uses in evaluating segment results. The GAAP measure most directly comparable to total segment gross operating margin is operating income.

We define total segment gross operating margin as operating income before: (i) depreciation, amortization and accretion expense; (ii) operating lease expenses for which we do not have the payment obligation; (iii) gains and losses from asset sales and related transactions; and (iv) general and administrative costs. Gross operating margin is exclusive of other income and expense transactions, provision for income taxes, cumulative effect of changes in accounting principles, extraordinary charges and earnings attributable to noncontrolling interests. Gross operating margin by segment is calculated by subtracting segment operating costs and expenses (net of the adjustments noted above) from segment revenues, with both segment totals before the elimination of intercompany transactions. In accordance with GAAP, intercompany accounts and transactions are eliminated in consolidation.

We include equity earnings from unconsolidated affiliates in our measurement of segment gross operating margin. Our equity investments with industry partners are a vital component of our business strategy. They are a means by which we conduct our operations to align our interests with those of our customers and/or suppliers. This method of operation enables us to achieve favorable economies of scale relative to the level of investment and business risk assumed versus what we could accomplish on a standalone basis. Many of these businesses perform supporting or complementary roles to our other business operations.

Distributable cash flow. We define distributable cash flow, which we view as a non-GAAP measure of liquidity, as net income or loss attributable to Enterprise Products Partners L.P. adjusted for:

§ the addition of depreciation, amortization and accretion expense;

§ the addition of operating lease expense for which we do not have the payment obligation;

1

§ the addition of cash distributions received from unconsolidated affiliates, less equity earnings from unconsolidated affiliates;

§ the subtraction of sustaining capital expenditures and cash payments to settle asset retirement obligations;

§ the addition of losses or subtraction of gains relating to asset sales and related transactions;

§ the addition of cash proceeds from asset sales, the return of an investment in an unconsolidated affiliate or related transactions;

§ the addition of losses or subtraction of gains on the monetization of financial instruments recorded in accumulated other comprehensive income (loss), if any, less related amortization of such amounts to earnings;

§ the addition of net income attributable to the noncontrolling interest associated with the public unitholders of Duncan Energy Partners, less related cash distributions to be paid to such holders with respect to the period of calculation; and

§ the addition or subtraction of other miscellaneous non-cash amounts (as applicable) that affect net income or loss for the period.

Sustaining capital expenditures are capital expenditures (as defined by GAAP) resulting from improvements to and major renewals of existing assets. Such expenditures serve to maintain existing operations but do not generate additional revenues.

Management compares the distributable cash flow we generate to the cash distributions we expect to pay our partners. Using this data, management computes our distribution coverage ratio. Distributable cash flow is also a quantitative standard used by the investment community with respect to publicly traded partnerships because the value of a partnership unit is in part measured by its yield, which is based on the amount of cash distributions a partnership pays to a unitholder. The GAAP measure most directly comparable to distributable cash flow is net cash flows provided by operating activities.

Adjusted EBITDA. We define Adjusted EBITDA as net income or loss attributable to Enterprise Products Partners L.P. less equity earnings from unconsolidated affiliates; plus distributions received from unconsolidated affiliates, interest expense, provision for income taxes and depreciation, amortization and accretion expense. Adjusted EBITDA is commonly used as a supplemental financial measure by management and by external users of our financial statements, such as investors, commercial banks, research analysts and rating agencies, to assess:

§ the financial performance of our assets without regard to financing methods, capital structures or historical cost basis;

§ the ability of our assets to generate cash sufficient to pay interest cost and support our indebtedness; and

§ the viability of projects and the overall rates of return on alternative investment opportunities.

Since Adjusted EBITDA excludes some, but not all, items that affect net income or loss attributable to Enterprise Products Partners L.P. and because these measures may vary among other companies, the Adjusted EBITDA data presented in our press release may not be comparable to similarly titled measures of other companies. The GAAP measure most directly comparable to Adjusted EBITDA is net cash flows provided by operating activities.

Presentation of Noncontrolling Interests in Consolidated Financial Statements

Effective January 1, 2009, we adopted the provisions of Statement of Financial Accounting Standards (“SFAS”) 160, Noncontrolling Interests in Consolidated Financial Statements. SFAS 160 established accounting and reporting standards for noncontrolling interests, which were previously identified as minority interest in our financial statements. This new standard requires, among other things, that (i) noncontrolling interests be presented as a component of partners’ equity on our consolidated balance sheet (i.e., elimination of the “mezzanine” presentation previously used for minority interest); and (ii) elimination of minority interest amounts as a deduction in deriving net income or loss and, as a result, that net income or loss be allocated between our unitholders and general partner on one hand and noncontrolling interests on the other. Earnings per unit amounts are not affected by these changes. The consolidated financial statements accompanying the press release reflect our adoption of SFAS 160 and the required presentation of noncontrolling interests.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits.
