FORWARD-LOOKING STATEMENTS

This quarterly report on Form 10-Q contains forward-looking statements that involve risks and uncertainties. Forward-looking statements in this quarterly report include, among others, statements regarding our capital needs, business plans and expectations. Such forward-looking statements involve risks and uncertainties regarding our ability to restructure our existing secured credit facility, the market price of copper, availability of funds, government regulations, permitting, common share prices, operating costs, capital costs, outcomes of ore reserve development, recoveries and other factors. Forward-looking statements are made, without limitation, in relation to operating plans, property exploration and development, availability of funds, environmental reclamation, operating costs and permit acquisition. Any statements contained herein that are not statements of historical facts may be deemed to be forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as "may", "will", "should", "expect", "plan", "intend", "anticipate", "believe", "estimate", "predict", "potential" or "continue" or other comparable terminology. Actual events or results may differ materially. In evaluating these statements, you should consider various factors, including the risks and other factors outlined in our annual report on Form 10-K for the year ended December 31, 2012, this quarterly report on Form 10-Q, and, from time to time, in other reports that we file with the Securities and Exchange Commission (the "SEC"). These factors may cause our actual results to differ materially from any forward-looking statement. Given these uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

PART I FINANCIAL INFORMATION**Item 1. Financial Statements**

The following unaudited condensed consolidated interim financial statements of Nord Resources Corporation and its wholly-owned subsidiary Cochise Aggregates and Materials, Inc. (sometimes collectively referred to as we, us or our Company) are included in this quarterly report on Form 10-Q:

	Page
<u>Condensed Consolidated Balance Sheets as of September 30, 2013 (unaudited) and December 31, 2012</u>	<u>F-1</u>
<u>Unaudited Condensed Consolidated Statements of Operations for the nine months ended September 30, 2013 and 2012</u>	<u>F-3</u>
<u>Unaudited Condensed Consolidated Statements of Operations for the three months ended September 30, 2013 and 2012</u>	<u>F-4</u>
<u>Unaudited Condensed Consolidated Statement of Changes in Stockholders' Deficit for the nine months ended September 30, 2013</u>	<u>F-5</u>
<u>Unaudited Condensed Consolidated Statements of Cash Flows for the nine months ended September 30, 2013 and 2012</u>	<u>F-6</u>
<u>Unaudited Notes to Condensed Consolidated Financial Statements</u>	<u>F-8</u>

It is the opinion of management that the interim condensed consolidated financial statements for the three and nine months ended September 30, 2013 and 2012 include all adjustments necessary in order to ensure that the condensed consolidated financial statements are not misleading. These condensed consolidated financial statements reflect all adjustments which are, in the opinion of management, necessary to present fairly the financial position, results of operations and cash flows for the interim periods presented in accordance with accounting principles generally accepted in the United States of America. These interim condensed consolidated financial statements follow the same accounting policies and methods of their application as our Company's audited annual consolidated financial statements for the year ended December 31, 2012. All adjustments are of a normal recurring nature. These interim condensed consolidated financial statements should be read in conjunction with our Company's audited annual consolidated financial statements as of and for the year ended December 31, 2012.

**NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)**

1. FINANCIAL STATEMENTS

Nord Resources Corporation (together with Cochise Aggregates and Materials, Inc., its wholly-owned Nevada subsidiary, the Company) is a United States based corporation involved in all phases of the mining business including exploration, permitting, developing and operating mining projects. The Company's primary asset is the Johnson Camp Copper Mine (Johnson Camp Mine) located in Arizona. In July 2007, the Company commenced the reactivation of the Johnson Camp Mine. The Company commenced copper cathode production from leaching existing old dumps in January 2008 and commenced mining of new ore upon completion of the reactivation work in January 2009. The Company achieved commercial copper cathode production from newly-mined ore on April 1, 2009 following substantial completion of the testing and development phase. In July 2010, the Company suspended the mining and crushing of new ore and implemented an action plan aimed at reducing costs, maximizing cash flow and improving operating efficiencies. The current production of copper is the result of leaching copper previously placed on the heaps. The Company expects that the production level will continue to steadily decline unless mining and crushing operations are resumed.

The accompanying financial information of the Company is prepared in accordance with the rules prescribed for filing interim condensed consolidated financial statements and, accordingly, does not include all disclosures that may be necessary for complete financial statements prepared in accordance with U.S. generally accepted accounting principles. The disclosures presented are sufficient, in management's opinion, to make the interim information presented not misleading. All adjustments, consisting of normal recurring adjustments which are necessary so as to make the interim information not misleading, have been made. Results of operations for the three and nine months ended September 30, 2013 are not necessarily indicative of results of operations that may be expected for the year ending December 31, 2013. The Company recommends that this financial information be read in conjunction with the complete consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012, previously filed with the Securities and Exchange Commission (the SEC).

2. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The condensed consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amount and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

Going Concern

Nedbank Limited (Nedbank), the Company's senior lender, has declined to extend the forbearance agreement with respect to the scheduled principal and interest payments that were due between March 31, 2010 and September 30, 2013 under the Company's \$25,000,000 secured term loan credit facility. Accordingly, the Company has been in default of its obligations under the Credit Agreement with Nedbank since May 14, 2010. The full amount of the outstanding principal and accrued and unpaid interest is included in the Company's current liabilities, together with any additional amounts payable under the Credit Agreement. As of the date of these condensed consolidated financial statements, Nedbank has not exercised its rights under the Credit Agreement to provide notification of the Company's default condition or commence foreclosure actions on the collateral held, which represents substantially all of the assets of the Company.

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

On July 29, 2010, the Company reached an agreement with Fisher Sand & Gravel Company (Fisher) to convert \$8,200,000 of unsecured trade payables, including a former note in the amount of \$850,000 and \$110,500 of accrued interest thereon, into a two-year unsecured note bearing interest on the outstanding principal at the rate of 6% per annum. The Company was unable to make the required principal and accrued interest payment to Fisher upon the maturity of the note on July 31, 2012. As of the date of these interim condensed consolidated financial statements, Fisher has not provided the Company with a written notice of default. If the Company fails to make the required payment to remedy the default within three business days of any such notice of default, the whole sum shall become immediately due and payable at the option of Fisher without further notice. As of September 30, 2013, the total principal balance on the Note of \$6,164,964 is included in current liabilities.

Nedbank Capital Limited (Nedbank Capital) has also declined to extend the forbearance agreement regarding the Company's failure to make the timely monthly settlement payments beginning in March of 2010 through December 31, 2011 under the Copper Hedge Agreement which is described in more detail in Note 10. As of September 30, 2013, the amount due to Nedbank Capital related to these settlements is \$16,106,691 and is included in current liabilities within the copper derivatives settlement payable line item.

The Company's continuation as a going concern is dependent upon its ability to refinance the obligations under the Credit Agreement with Nedbank, the Copper Hedge Agreement with Nedbank Capital, and the unsecured note with Fisher (and thereby curing the current state of default under the respective agreements), raise additional capital, and on its ability to produce copper to sell at a level where the Company becomes profitable and generates cash flows from operations. The Company's continued existence is dependent upon its ability to resume full operations and achieve its operating plan. If management cannot achieve its operating plan because of sales shortfalls, a reduction in copper prices, or other unfavorable events, the Company may find it necessary to dispose of assets, or undertake other actions as may be appropriate.

The Company's ramp-up of production following the commencement of commercial production was slower than originally forecasted. In July 2010, the Company suspended the mining and crushing of ore, and implemented measures to reduce costs, maximize cash flow and improve efficiencies. In addition, the Company initiated additional drilling, metallurgical testing and assaying to enhance the understanding of mineralogy and the distribution of acid-soluble grades in the block model, and commenced updating the mine plan to optimize production and increase operating efficiencies.

As disclosed in Note 1, the Company continues to leach copper previously placed on the heaps. However, the Company expects that the production level of copper will continue to steadily decline unless mining and crushing operations are resumed. Accordingly, until the Company is able to execute on its refinancing and operating plan, the Company anticipates that additional financing will be required from time to time in order to meet its current obligations.

The Company is evaluating alternatives to improve its liquidity. There can be no assurance that the Company will be able to improve its liquidity.

Use of Estimates

The preparation of the Company's condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period.

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

The more significant areas requiring the use of management estimates and assumptions relate to mineral reserve estimation, the metallurgical recovery rate and estimates of recoverable copper in stockpiles and ore on leach pads of the Johnson Camp Mine that are the basis for future cash flow estimates; estimates of costs to produce a pound of copper under normalized production levels (standard costs); useful asset lives for depreciation, depletion and amortization; reclamation and closure cost obligations; asset impairment (including long lived assets), including estimates used to derive future cash flows associated with those assets; deferred taxes and valuation allowances; disclosures and reserves for contingencies and litigation; and the fair value and accounting treatment of financial instruments and stock based compensation. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Accordingly, actual results may differ significantly from these estimates under different assumptions or conditions.

The Company is currently in the process of revising its estimate of the proven and probable reserves at the Johnson Camp Mine. Upon the Company's purchase of the Johnson Camp Mine in 1999, pursuant to the accounting standards and market conditions in place at the time, the Company allocated 100% of the purchase price to the property and equipment and, as such, nothing was allocated to proven and probable reserves. Accordingly, a revision to this estimate, if and when it occurs, is not expected to have a material impact on the Company's condensed consolidated financial statements. Furthermore, under current market conditions, the Company does not believe that a revision will trigger an impairment analysis for its long lived assets. A revision to the estimate of proven and probable reserves, when and if it occurs, will be accounted for on a prospective basis and will impact those items that are amortized via the units of production method; specifically property and equipment and deferred revenue.

3. ADOPTION OF RECENTLY ISSUED ACCOUNTING GUIDANCE

There were no material changes to the Company's significant accounting policies disclosed in Note 2 to the Company's audited consolidated financial statements included in its Annual Report on Form 10-K for the year ended December 31, 2012, as filed with the SEC on March 27, 2013.

4. INVENTORY

Inventory is as follows:

	September 30, 2013	December 31, 2012
Current Assets:	(unaudited)	
Copper in process	\$ 964,381	\$ 2,018,795
Finished goods	6,642	72,815
Material and supplies	426,891	441,582
	1,397,914	2,533,192
Long-Term Assets:		
Stockpiles and ore on leach pads	4,003,790	4,412,151
Total Inventory	\$ 5,401,704	\$ 6,945,343

The Company's inventories are carried at the lower of average cost or net realizable value. Copper in process and finished goods inventories are valued using the average cost of production and include all costs of purchase, conversion costs (direct costs and an allocation of fixed and variable production overheads) and other costs incurred in bringing the inventories to their present location and condition. The Company considers only those costs that are consistent with its estimate of costs to be incurred at a normalized production level, currently estimated at 25,000,000 pounds per annum, as inventoriable costs. Costs incurred in excess of this standard are expensed as incurred as abnormal costs which are included in costs applicable to sales within the condensed consolidated statements of

operations. Accordingly, during the three and nine month periods ended September 30, 2013, the Company expensed \$1,510,501 and \$4,719,979, respectively, of abnormal production costs due to the underutilization of plant capacity. During the three and nine month periods ended September 30, 2012, the Company expensed \$1,800,371 and \$6,384,851, respectively, of abnormal production costs due to the underutilization of plant capacity.

F-10

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

The current portion of copper in process inventory is determined based on the expected amounts to be processed within the next 12 months. Inventories not expected to be processed within the next 12 months are classified under long term assets as stockpiles and ore on leach pads.

5. PROPERTY AND EQUIPMENT

Property and equipment costs consist of the following:

	September 30, 2013 (unaudited)	December 31, 2012
Land	\$ 87,114	\$ 87,114
Buildings	2,071,618	2,071,618
Mine development costs existing dumps	468,034	468,034
Mine development costs new dumps	1,841,080	1,841,080
Asset retirement obligation	2,708,870	2,708,870
Mining and other equipment	42,507,786	42,457,786
Total	49,684,502	49,634,502
Accumulated depreciation, depletion and amortization	(6,943,767)	(6,648,074)
Net property and equipment	\$ 42,740,735	\$ 42,986,428

Total depreciation, depletion and amortization (DD&A) of property and equipment charged to operations was \$130,184 and \$444,812 for the three and nine month periods ended September 30, 2013, respectively. Total depreciation, depletion and amortization (DD&A) of property and equipment charged to operations was \$182,028 and \$590,364, respectively, for the three and nine month periods ended September 30, 2012, respectively. The Company allocates DD&A to copper inventories based upon the relative pounds in inventory at each reporting date. Accordingly, as of September 30, 2013 and December 31, 2012, \$495,026 and \$644,145, respectively, of DD&A costs were included in copper inventories.

6. OTHER CURRENT LIABILITIES

On June 24, 2013, the Company issued a promissory note to a related party of the Company in the aggregate principal amount of up to \$238,411. The sum of \$128,411 was advanced on June 24, 2013 of that amount, \$28,411 was applied to repay in full the principal and accrued interest outstanding under a previously-issued promissory note held by the lender, and the balance of \$100,000 was allocated to working capital. The remaining \$110,000 in principal was advanced under the promissory note in July 2013 and used for working capital purposes. The promissory note matures on June 24, 2014 and bears an interest rate of 20% per annum. In connection with this financing, the Company issued 953,644 common stock purchase warrants to the lender, each exercisable for a period of three years to purchase one share of the Company's common stock at an exercise price of \$0.02. Due to its de minimis nature, the value of the warrant in the amount of \$13,246 was expensed as interest expense during the nine months ended September 30, 2013 within the condensed consolidated statements of operations.

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

On July 18, 2013, the Company issued the following convertible promissory notes in the aggregate principal amount of \$222,100:

- (a) Two convertible promissory notes (the 20% Notes) were issued to two existing arm s-length creditors of the Company (the 20% Note Holders), to evidence the Company s promise to repay to the 20% Note holders an aggregate of \$57,252, together with interest at a rate of 20% per annum on the unpaid balance of the principal;
- (b) A convertible promissory note (the Hirsch Note) was issued to Ronald Hirsch, the Chair of the Company s Board of Directors, to evidence the Company s promise to repay Mr. Hirsch the sum of \$89,581, together with interest at a rate of 10% per annum on the unpaid balance of the principal; and
- (c) A convertible promissory note (the Seymour Note and together with the Hirsch Note the 10% Notes) was issued to Stephen Seymour, a member of the Company s Board of Directors, to evidence the Company s promise to repay Mr. Seymour the sum of \$75,267, together with interest at a rate of 10% per annum on the unpaid balance of the principal.

Each of the 20% Notes will become due and payable on the earlier of January 14, 2014 and the closing of a financing transaction by the Company for gross proceeds in excess of \$20,000,000.

Each of the 10% Notes will become due and payable on the earlier of July 18, 2016 and the closing of a financing transaction by the Company for gross proceeds in excess of \$20,000,000.

The 20% Notes and the 10% Notes may be prepaid at any time without penalty.

The outstanding principal under each 20% Note and the accrued and unpaid interest thereon, is convertible at the option of the holder, in whole and not in part, into shares of the Company s common stock at the conversion price equal to \$0.02 per common share. The outstanding principal under each 10% Note and the accrued and unpaid interest thereon, is convertible at the option of the holder, in whole and not in part, into shares of the Company s common stock at the conversion price equal to \$0.04 per common share.

The principal amount of \$28,626 advanced under each 20% Note was applied to pay in full the outstanding principal amount and accrued interest under an existing convertible promissory note issued by the Company to each 20% Note Holder on July 30, 2012, in the principal amount of \$25,000 and bearing interest at the rate of 15% per annum.

The principal amount of \$89,581 under the Hirsch Note was advanced for the purposes of: (i) application by the Company of \$77,081 to payment in full of the outstanding principal amount and accrued interest under the convertible promissory notes issued by the Company to Mr. Hirsch on December 29, 2010, in the principal amount of \$50,000 and bearing interest at the rate of 10% per annum, on July 30, 2012, in the principal amount of \$6,250 and bearing interest at the rate of 15% per annum, and on July 31, 2012, in the principal amount of \$6,250 and bearing interest at the rate of 15% per annum; and (ii) as to the balance of \$12,500, for general working capital purposes.

The principal amount under the Seymour Note was advanced for the purposes of: (i) application by the Company of \$62,767 to payment in full of the outstanding principal amount and accrued interest under the convertible promissory note issued by the Company to Mr. Seymour on December 29, 2010, in the principal amount of \$50,000 and bearing interest at the rate of 10% per annum; and (ii) as to the balance of \$12,500, for general working capital purposes.

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

On July 26, 2013, the Company received \$200,000 as an advance royalty payment from Texas Canyon, the producer of decorative rock and aggregate from the Company's waste rock, in exchange for future royalties on 173,913.04 tons of material, in consideration of a \$0.35 per ton discount. The deferred revenue will be amortized to miscellaneous income as Texas Canyon sells the aggregate to a third party.

7. LONG-TERM DEBT

Long term debt consists of the following:

	September 30, 2013 (unaudited)	December 31, 2012
Senior project financing facility	\$ 23,257,826	\$ 23,257,826
Less current maturities on senior facility	(23,257,826)	(23,257,826)
Total Long-Term Debt	\$ -	\$ -

Senior Project Financing Facility

The Company was unable to make the quarterly payments of principal in the amounts of \$1,790,099 that were due between March 31, 2010 and September 30, 2013, respectively, and interest payments during the same period totaling \$9,645,446 to Nedbank under the terms of the amended and restated Credit Agreement dated March 31, 2009. The Company is in default of its obligations under the Credit Agreement with Nedbank, and the full amount of the outstanding principal of \$23,257,826 is included in the Company's current liabilities. Given this default, Nedbank has full authority to exercise its rights under the Credit Agreement, including the acceleration of the full amount due thereunder and the institution of foreclosure proceedings against the Johnson Camp Mine. In accordance with the Credit Agreement, upon an event of default the interest rate on the outstanding debt and unpaid accrued interest is increased by 3.00% to the three-month United States Dollar London Interbank Offered Rate (LIBOR) plus 9.06% (9.31% at September 30, 2013). Accrued interest related to the Credit Agreement was \$9,645,446 and \$7,363,900 as of September 30, 2013 and December 31, 2012, respectively, and is included within accrued interest on the condensed consolidated balance sheets.

The Credit Agreement is collateralized by substantially all of the Company's assets, restricts the Company's ability to incur certain additional debt, and limits the Company's ability to pay dividends and make restrictive payments. Effective March 31, 2009, the Company must comply with certain financial covenants as defined within the amended and restated credit agreement, including a debt service coverage ratio of at least 1.5, an interest coverage ratio of at least 2.0, and a minimum debt to adjusted equity ratio of 1.3. The Company was not in compliance with these covenants as of September 30, 2013.

Pursuant to the terms of the Credit Agreement, as amended, upon default, Nedbank has the right, among others, to provide notification of such condition and commence foreclosure actions on the collateral held, which represents substantially all of the assets of the Company. As of the date of these condensed consolidated financial statements, the Company has not received notification that Nedbank has exercised its rights under the Credit Agreement.

In accordance with the Credit Agreement, a default on the derivative contracts to which Nedbank is the counterparty would trigger a cross default under the Credit Agreement which would put Nedbank in a position to pursue any and all remedies under the related derivative contracts and Credit Agreement. Furthermore, under the Credit Agreement and derivative contracts, there is a master netting agreement which allows either party to offset an obligation by the other should either party be in default of its obligations. The Company was unable to make the required payments that were due to Nedbank between April 6, 2010 and January 6, 2012 under the terms of its Copper Hedge Agreement.

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

As of September 30, 2013 and December 31, 2012, the total amount due to Nedbank under the Copper Hedge Agreement was \$16,106,691, and is included in copper derivatives settlement payable within the condensed consolidated balance sheets. Interest is being accrued on this liability at Nedbank's internal borrowing rate (0.46% at September 30, 2013).

Note Payable with Mining Contractor

On July 29, 2010, the Company reached an agreement with Fisher to convert \$8,200,000 of unsecured trade payables, including a previous note in the amount of \$850,000 and \$110,500 of accrued interest thereon, into a two-year unsecured note bearing interest on the outstanding principal at the rate of 6% per annum.

Under the Settlement Agreement, Fisher is entitled to receive weekly payments on the Note with the amounts based on a formula related to the level of copper sales made by the Company and the weekly realized price of copper. Accordingly, under the Agreement, if the Company ships four loads, as defined in the Agreement, or approximately 176,000 pounds of copper or greater on a weekly basis, the weekly payments are calculated by multiplying the base amount of \$100,000 by a factor equal to the average weekly realized price of copper per pound divided by \$3.00. If the Company ships between 132,000 (three loads) and 176,000 (four loads) pounds of copper on a weekly basis, the base weekly amount decreases to \$75,000. If the Company ships less than 132,000 pounds of copper on a weekly basis, the amounts due under the note equates to interest only payments on the outstanding principal balance. Any unpaid principal, along with any accrued interest, was due in full on July 31, 2012.

During the nine months ended September 30, 2013, the Company made a non-cash (sale of aggregate) principal payment of \$18,535 and an interest payment of \$7,572 on the note. During the three and nine months ended September 30, 2012, the Company made principal payments on the note of \$0 and \$7,500, respectively. Interest payments of \$0 and \$151,893, respectively, were made in accordance with the Agreement for the three and nine month periods ended September 30, 2012.

The Company was unable to make the required principal and accrued interest payment to Fisher upon the maturity of the note on July 31, 2012. As of the date of these interim condensed consolidated financial statements, Fisher has not provided the Company with a written notice of default. If the Company fails to make the required payment to remedy the default within three business days of any such notice of default, the whole sum shall become immediately due and payable at the option of Fisher without further notice. The Company has accrued \$479,564 and \$224,223 of interest as of September 30, 2013 and December 31, 2012, respectively, which is included within accrued interest on the condensed consolidated balance sheets. As of September 30, 2013 and December 31, 2012, the total principal balance on the note of \$6,164,964 and \$6,183,499, respectively, is included in current liabilities.

8. DEFERRED REVENUE

On March 31, 2009, the Company sold to Royal Gold (formerly known as IRC Nevada Inc.) a 2.5% net smelter royalty on the mineral production sold from the existing mineral rights at Johnson Camp. The net proceeds of the sale in the amount of \$4,950,000 were recorded as deferred revenue and are being amortized to revenue over the life of the mine based on a units of production method. Amounts payable to Royal Gold, which are being calculated based on the revenue generated from the sale of copper, are expensed in the period incurred.

During the three and nine month periods ended September 30, 2013, the Company recognized \$3,916 and \$15,932 respectively, in revenue and recorded \$23,943 and \$102,350, respectively, in royalty expense related to this royalty within the condensed consolidated statements of operations.

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

During the three and nine month periods ended September 30, 2012, the Company recognized \$7,587 and \$23,416, respectively, in revenue and recorded \$50,677 and \$160,767, respectively, in royalty expense related to this royalty within the condensed consolidated statements of operations.

As of September 30, 2013 and December 31, 2012, the total amount owed by the Company under the terms of the royalty agreement was \$1,452,532 and \$1,350,182, respectively, and is included in accounts payable on the condensed consolidated balance sheets. Furthermore, amounts greater than 30 days past due accrue interest at a rate of 12% per annum for which the Company has accrued \$462,241 and \$247,042 of interest as of September 30, 2013 and December 31, 2012, respectively, which is included within accrued interest on the condensed consolidated balance sheets.

On October 18, 2012, the Company received \$180,000 as an advance royalty payment from Texas Canyon, the producer of decorative rock and aggregate from the Company's waste rock, in exchange for \$204,000 of future royalties. On July 26, 2013 the Company received \$200,000 as an advance royalty payment from Texas Canyon, the producer of decorative rock and aggregate from the Company's waste rock, in exchange for future royalties on 173,913.04 tons of material, in consideration of a \$0.35 per ton discount. The deferred revenue is being amortized to miscellaneous income as Texas Canyon sells the aggregate to a third party. During the three and nine month periods ended September 30, 2013, the Company recognized \$61,697 and \$195,805, respectively, in miscellaneous income.

Total deferred revenue for both contracts is \$4,799,298 and \$4,661,371 as of September 30, 2013 and December 31, 2012, respectively. Deferred revenue of \$17,878 is expected to be amortized to revenue over the next twelve months.

9. ACCRUED RECLAMATION COSTS

The Company estimates its asset retirement obligations and related accrued reclamation costs using an expected cash flow approach, in which multiple cash flow scenarios are used to reflect a range of possible outcomes. During 2010, the Company completed an updated review of its reclamation plan and the related estimated costs of reclamation. As a result, as of December 31, 2010, the Company estimated the aggregate undiscounted obligation to be approximately \$13,000,000 for the Johnson Camp Mine. However, as of March 31, 2011, the Company determined that certain aspects of the reclamation plan could be revised thus decreasing the estimated costs to reclaim the Johnson Camp Mine to approximately \$9,100,000 (based on 2011 dollars). This estimate was subsequently refined during the quarter ended September 30, 2011 to \$10,100,000.

To calculate the estimated fair value of this obligation, the projected cash flows, which were further adjusted for an estimated inflation rate of 2.5% per annum, were discounted at the Company's estimated annual credit adjusted risk free interest rate of 12.53% at April 1, 2011. The estimated remaining life of the Johnson Camp Mine as of September 30, 2013 is approximately twelve years. Accordingly, the cash expenditures for reclamation and closure activities are expected to occur at the conclusion of production, currently anticipated to be in 2024-2025. As 100% of the cash flows are projected to occur in 2024-2025, 100% of the accrued reclamation costs are classified as long-term within the condensed consolidated balance sheets. A reconciliation of the beginning and ending carrying amounts of the Company's asset retirement obligation as of September 30, 2013 and December 31, 2012, respectively, are as follows:

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

	September 30, 2013 (unaudited)	December 31, 2012
Accrued reclamation costs, beginning of period	\$ 3,597,968	\$ 3,195,497
Accretion expense	338,744	402,471
Accrued reclamation costs, end of period	\$ 3,936,712	\$ 3,597,968

10. DERIVATIVE INSTRUMENTS

Copper Price Protection Program

In connection with the Credit Agreement dated June 28, 2007 with Nedbank, the Company agreed to implement a price protection program with respect to a specified percentage of copper output from the Johnson Camp Mine. The price protection program consisted of financial derivatives whereby the Company entered into a combination of forward sale and call option contracts for copper quantities based on a portion of the estimated production from the Johnson Camp Mine during the term of the loan. These financial derivatives did not require the physical delivery of copper cathode and were expected to be net cash settled upon maturity and/or settlement of the contracts based upon the average daily London Metal Exchange (LME) cash settlement copper price for the month of settlement. As of December 31, 2011, all of the copper derivative contracts had matured and the outstanding amount due to the settlement of the contracts was recorded in copper derivatives settlement payable on the consolidated balance sheets.

As noted above, as of September 30, 2013, the Company is in default of the related Copper Hedge Agreement with Nedbank Capital as it failed to make the requisite monthly payments (March 31, 2010 through December 31, 2011 settlements) related to the settlement of the derivative contracts. As of September 30, 2013 and December 31 2012, the total amounts owed to Nedbank as a result of these missed payments are \$16,106,691.

11. STOCK-BASED COMPENSATION

Stock Options

The Company has granted incentive and non-qualified stock options to its employees and directors under its 2006 Stock Incentive Plan. The Company has also granted non-qualified, non-plan stock options, which have been authorized by the Company's board of directors. Stock options are generally granted at an exercise price equal to or greater than the quoted market price on the date of grant.

There are 4,431,744 stock options outstanding at September 30, 2013 issued pursuant to the Company's 2006 Stock Incentive Plan. The outstanding options expire at various dates from 2013 to 2017. The Company did not grant any stock options during the three and nine month periods ended September 30, 2013. During the three and nine month periods ended September 30, 2013, the Company recognized \$3,842 and \$23,209, respectively, in compensation expense related to employee stock options that vest over time. The Company did not grant any stock options during the three and nine month periods ended September 30, 2012. During the three and nine month periods ended September 30, 2012, the Company recognized \$13,075 and \$62,597, respectively, in compensation expense related to employee stock options that vest over time.

As summarized in the following tables, during the three and nine month periods ended September 30, 2013, there were no stock options granted nor exercised, and 0 and 6,750 were cancelled or forfeited, respectively.

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

	Number of Shares	Weighted Average Exercise Price
Three months ended September 30, 2013		
Options outstanding at June 30, 2013	4,431,744	\$.18
Granted	-	-

Cancelled/Forfeited	-	-
Options outstanding at September 30, 2013	4,431,744	\$.18

	Number of Shares	Weighted Average Exercise Price
Nine months ended September 30, 2013		
Options outstanding at December 31, 2012	4,438,494	\$.18
Granted	-	-
Exercised	-	-
Cancelled/Forfeited	(6,750)	.16
Options outstanding at September 30, 2013	4,431,744	\$.18

The following table summarizes certain additional information about the Company's total and exercisable stock options outstanding as of September 30, 2013:

	Number Outstanding	Weighted Average Remaining Contractual Life in Years	Weighted Average Exercise Price	Intrinsic Value
Total stock options	4,431,744	1.9	\$.18	\$ -
Exercisable stock options	4,224,994	2.0	\$.18	\$ -

The closing price of the Company's common stock on the OTCQB Market on September 30, 2013 was \$0.03 per share. Accordingly, the intrinsic values of total stock options and exercisable stock options as of September 30, 2013 was \$0.

The following table summarizes the unvested stock options outstanding as of September 30, 2013:

	Number of Shares	Weighted Average Grant Date Fair Value
Three months ended September 30, 2013		
Unvested options outstanding at June 30, 2013	604,997	\$.10
Granted	-	-
Vested	(398,247)	.08
Cancelled/Forfeited	-	-
Unvested Options outstanding at September 30, 2013	206,750	\$.11

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

	Number of Shares	Weighted Average Grant Date Fair Value
Nine months ended September 30, 2013		
Unvested options outstanding at December 31, 2012	811,747	\$.11
Granted	-	-
Vested	(604,997)	.09
Cancelled/Forfeited	-	-
Unvested Options outstanding at September 30, 2013		
	206,750	\$.11

The total grant date fair value of options vested during the three and nine month periods ended September 30, 2013 was \$33,333 and \$56,634, respectively. The Company recognizes stock option compensation expense on stock options with a graded vesting schedule on a straight line basis over the requisite service period for each separately vesting portion of the award as if the award was, in substance, multiple awards. As of September 30, 2013, 206,750 stock options remain unvested, which will result in \$6,539 in compensation expense to be recognized during the next nine months.

Deferred Stock Units

During the three and nine months ended September 30, 2012, certain equity-based fees have been paid to the Company's non-executive directors in the form of awards issued pursuant to the Company's 2006 Stock Incentive Plan. The non-executive directors have limited rights, exercisable within applicable time limits, to elect to have any percentage of such awards, and any percentage of cash fees, payable in deferred stock units. Each of the Company's non-executive directors exercised such rights in respect of the equity-based fees payable to him for the three and nine months ended September 30, 2012.

During the three and nine months ended September 30, 2012, Douglas Hamilton, the Chairman of the Company's Audit Committee, received 210,525 and 518,650 deferred stock units, respectively; John Cook, the Chairman of the Company's Compensation Committee, received 171,053 and 421,403 deferred stock units, respectively; Stephen Seymour, the Chairman of the Company's Corporate Governance and Nominating Committee, received 171,053 and 421,403 deferred stock units, respectively. During the three and nine months ended September 30, 2012, the Company recognized expense of \$26,250 and \$78,750, respectively, related to the issuance of deferred stock units to its independent directors. The deferred stock units were granted under the 2006 Deferred Stock Unit Plan, which forms part of the Company's 2006 Stock Incentive Plan.

During the three and nine months ended September 30, 2013, 0 and 790,721 deferred stock units were converted into shares of the Company's common stock, respectively. As of September 30, 2013, there were 3,592,179 deferred stock units outstanding.

12. BASIC AND DILUTED LOSS PER SHARE

Basic earnings (loss) per common share is computed by dividing net earnings (loss) by the weighted average number of basic common shares outstanding during the period. Diluted earnings (loss) per share are calculated based on the weighted average number of basic common shares outstanding adjusted for the dilutive effect, if any, of stock options, warrants and other dilutive securities outstanding. Outstanding options, warrants and other dilutive securities to purchase 12,568,862 and 8,474,660 shares of common stock for the three and nine months ended September 30, 2013 and 2012, respectively, are not included in the computation of diluted earnings per share as the effect of the assumed exercise of these options and warrants, and other dilutive securities would be anti-dilutive. During the nine months

ended

F-18

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

September 30, 2012, 15,333,350 and 40,000,000 warrants with an exercise price of \$1.10 and \$0.38, respectively, expired unexercised.

Components of basic and diluted loss per share were as follows:

Diluted	\$ (0.06)	\$ (0.06)

13. CONCENTRATIONS

The Company currently sells 100% of its copper cathode production to Red Kite Master Fund Limited (Red Kite) under a cathode sales agreement effective September 30, 2013, as amended, which replaced an earlier long term cathode sales agreement between the parties that first became effective on February 1, 2008. The cathode sales agreement runs through December 31, 2013 with renewable extensions by mutual agreement of both parties. The Company considers the credit risk to be minimal since Red Kite is a large, well-capitalized and diversified multinational organization.

14. FAIR VALUE OF FINANCIAL INSTRUMENTS

Disclosures about fair value of financial instruments for the Company's financial instruments are presented in the table below. These calculations are subjective in nature and involve uncertainties and significant matters of judgment and do not include income tax considerations. Therefore, the results cannot be determined with precision and, in certain cases, cannot be substantiated by comparison to independent market values and may not be realized in an actual sale or settlement of the instruments. There may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used could significantly affect the results.

The following table presents a summary of the Company's financial instruments as of September 30, 2013:

NORD RESOURCES CORPORATION AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

	Carrying Amount (unaudited)	Estimated Fair Value (unaudited)
Financial Assets:		
Restricted marketable securities	\$ 686,476	\$ 686,476
Accounts receivable	37,344	37,344
Financial Liabilities:		
Accounts payable	\$ 4,884,846	\$ ***
Accrued expenses	2,385,453	***
Accrued interest	11,434,283	***
Copper derivatives settlement payable	16,106,691	***
Current maturity of long-term debt	6,164,964	***
Current maturities of senior long term debt	23,257,826	***
Other current liabilities	609,007	***

Financial assets include cash and cash equivalents, restricted marketable securities and accounts receivable and the carrying amounts approximate fair value because of the short maturities of these financial instruments.

*** Given the current situation with the Company's senior lender and the related default of the underlying Credit Agreement, as amended, the Company does not believe that an estimate of the fair value of its senior long-term debt can be made without incurring substantial time and resources. Accordingly, an estimate of the fair value of its senior long-term debt as of September 30, 2013 is considered impracticable. In addition, due to the current situation with the Company's senior lender and the impact this situation may have on the remaining liabilities of the Company, as of September 30, 2013, an estimate of the fair value of accounts payable, accrued expenses, accrued interest, copper derivatives settlement payable, long term debt, and other current liabilities is also considered impracticable.

15. SUBSEQUENT EVENTS

On October 3, 2013, the Company entered into a non-binding letter of intent with an arm's length third party that contemplates the third party making significant equity and/or debt financing available to the Company, subject to the third party obtaining the necessary funding, completion of due diligence to the satisfaction of the third party, the execution and delivery of a definitive agreement on mutually acceptable terms, and certain other conditions. The third party has advanced a total of \$300,000 to the Company for general working capital purposes. All funds advanced by the third party bear interest at the rate of 15 percent per annum, and will be repayable from the proceeds of the equity and/or debt financing transaction (if any). The Company expects that the loan would become repayable upon demand if the equity and/or debt financing transaction do not close. There can be no assurance that the Company will be successful on the closing of the equity and/or debt financing contemplated in this transaction.

On October 23, 2013, the Company issued a convertible promissory note in the aggregate principal amount of \$100,000. The note will become due and payable on the earlier of October 22, 2014 and the closing of a financing transaction by the Company for gross proceeds in excess of \$20,000,000. The outstanding principal under the Note and the accrued and unpaid interest thereon, is convertible at the option of the holder, in whole and not in part, into shares of the Company's common stock at the conversion price equal to \$0.02 per common share.

Item 2. Management's Discussion and Analysis

The following discussion of our financial condition, changes in financial condition and results of operations for the three and nine month periods ended September 30, 2013 and 2012 should be read in conjunction with our unaudited condensed consolidated interim financial statements and related notes for the three and nine month periods ended September 30, 2013 and 2012. The following discussion contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of many factors, including, but not limited to, those referenced under the heading Risk Factors and included in the Form 10-K for the year ended December 31, 2012, previously filed with the SEC on March 27, 2013.

Overview of Our Business

We are a copper mining company and our principal asset is the Johnson Camp property located in Dragoon, Arizona. The Johnson Camp property includes the Johnson Camp Mine, an integrated open pit copper mine and a production facility that uses the solvent extraction, electrowinning (SX-EW) process. The Johnson Camp Mine includes two existing open pits, namely the Burro and the Copper Chief bulk mining pits.

We are currently in default under our Credit Agreement with Nedbank, our Copper Hedge Agreement with Nedbank Capital and our note payable with Fisher Industries, our mining contractor and largest unsecured trade creditor, who converted approximately \$8.2 million of payables to a two-year unsecured note bearing interest on the outstanding principal at the rate of 6% per annum, which matured on July 31, 2012.

Nedbank, Nedbank Capital and Fisher Industries have not exercised their respective rights to note us in default. However, our Company's continuation as a going concern is dependent upon our ability to refinance the obligations under the Credit Agreement with Nedbank, our Copper Hedge Agreement with Nedbank Capital and our note payable to Fisher Industries, raise approximately \$20 million dollars in additional capital, and on our ability to produce copper to sell at a level where our Company becomes profitable and generates cash flows from operations, all of which is uncertain.

In July 2010, we suspended the mining and crushing of ore at the Johnson Camp Mine and laid off approximately half of our workforce at the mine. We have continued to produce copper through the leaching of ore already in place on our existing pads and processing the solution through the SX-EW plant. We expect that the production level will continue to steadily decline until the resumption of mining and crushing operations. The Company continuously tries to maintain expenses at a level commensurate with current operating requirements; however, due to the anticipated decline in copper production from our residual leaching operations, we anticipate that additional financing will be required from time to time in order for the Company to meet its current obligations.

We now believe that we will not be able to achieve our targeted production rate of 25 million pounds of copper per year until we have resumed mining operations, and have completed and put into full operation our planned new leaching pad. We estimate that we would incur approximately \$18 million in capital costs for the development and construction of the new leach pad. Accordingly, our new leaching pad remains subject to financing, the availability of which cannot be assured.

If we are unable to obtain financing, we expect to be able to continue our residual leaching and solvent extraction/electro-winning operations for the foreseeable future, assuming that neither Nedbank, Nedbank Capital nor Fisher Industries exercises their rights to note us in default, our vendors continue to provide us goods and services in accordance with existing terms and conditions, both copper prices and our costs (in particular, the cost of sulfuric acid) remain at or near current levels, and our copper recovery rate and copper production trends remain consistent with the average recovery rate and production trends that we have experienced for the last twelve months (none of which can be assured).

Given our financial difficulties, we have little or no capital to deploy in response to unforeseen adverse changes in market conditions or operational problems that may arise from time to time. As a result, our residual leaching and solvent extraction/electro-winning operations are particularly vulnerable to risk factors such as a material drop in copper prices, a material increase in the cost of sulfuric acid, or a material drop in our copper recovery rates (for example, due to heavy rainfall which could negatively impact our leaching efficiencies) and related copper production. If our residual leaching and solvent extraction/electro-winning operations become economically unviable, we would be forced to terminate our operations, significantly reduce our workforce, place the Johnson Camp Mine on a care and maintenance program, and, perhaps, sell some of our assets (subject to the consent of our secured creditors, as appropriate).

If Nedbank, Nedbank Capital, and/or Fisher Industries elect to note us in default and enforce their rights under their respective agreements, we will not be able to continue as a going concern.

Development of Our Business

We acquired the Johnson Camp Mine from Arimetco, Inc. pursuant to a Sales and Purchase Agreement that had been assigned to us in June 1999 by Summo USA Corporation, the original purchaser, following the completion of certain due diligence work by Summo. Although Arimetco had ceased mining on the property in 1997, we, like Arimetco before us, continued production of copper from ore that had been mined and placed on leach pads, and from 1999 to 2003 we (through our then-subsiary Nord Copper Company) produced approximately 4,490,045 pounds of copper cathode.

In August 2003, we placed the Johnson Camp Mine on a care and maintenance program due to weak market conditions for copper at that time. In June 2007 when conditions improved, we began the process of reactivating the Johnson Camp Mine.

In September 2007, Bikerman Engineering & Technology Associates, Inc. completed a technical report for us entitled, Johnson Camp Mine Project, Feasibility Study, Cochise County, Arizona, USA, Technical Report (the Technical Report), and prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects of the Canadian Securities Administrators (as required for us to comply with provincial securities laws in Canada that are applicable to our Company).

In January 2008, we commenced copper cathode production from leaching old leach pads, and during 2008, we produced approximately 2.9 million pounds of copper from residual leaching.

In February 2008, we entered into a long-term cathode sales agreement with Red Kite Master Fund Limited for 100% of the copper cathode production from the Johnson Camp Mine. That agreement has been superseded by a new a cathode sales agreement effective September 30, 2013, as amended, which runs through December 31, 2013, subject to renewable extensions by mutual agreement of both parties. Pursuant to the agreement, Red Kite accepts delivery of the cathodes at the Johnson Camp Mine, and pricing is based on the COMEX price for high grade copper on the date of sale.

In August 2008, we received the Air Quality permit necessary to enable us to complete the construction related to the reactivation of the Johnson Camp Mine.

We commenced mining of new ore upon completion of the reactivation work in January 2009, and we commenced production of nominal amounts of copper from newly-mined ore during the testing and development phase of the mine in February and March 2009. We achieved commercial copper cathode production from newly-mined ore on April 1, 2009 and entered the production stage.

In July 2010, we temporarily suspended the mining and crushing of ore at the Johnson Camp Mine and laid off approximately half of our workforce at the mine. We continue to produce copper through the leaching of ore already in place on the existing pads and processing the solution through the SX-EW plant. The suspension resulted in an immediate reduction of costs and enabled our Company to maximize operating cash flow from the production of copper achieved through continued leaching of ore on the existing pads and the operation of our SX-EW plant. The suspension provides our Company with the opportunity to further evaluate our geological data, continue column leach testing, expand mineralogical classification of the reserve and perform additional drilling as appropriate. The resulting improved database and geologic block model are expected to provide us with the necessary tools to optimize the mine plan by focusing on higher grade acid-soluble ore.

Default Under Secured Credit Agreement with Nedbank Limited, as Lead Arranger

In March 2009, our credit agreement with Nedbank was amended and restated to provide for, among other things, the deferral of certain principal and interest payments until December 31, 2012 and September 30, 2013. Due to our cash flow constraints, we have been unable to make the quarterly payments of principal due on and after March 31 2010, each in the amount of \$1,790,099, and the related interest payments. As of September 30, 2013, our quarterly payments in arrears totaled \$23,257,826, and unpaid interest thereon totaled \$9,645,446.

We do not have a forbearance agreement with Nedbank and Nedbank has the full authority to exercise its rights under the credit agreement, including the acceleration of the full amount due thereunder and the institution of foreclosure proceedings against the Johnson Camp Mine. In accordance with the credit agreement, upon missing the principal and interest payments, the interest rate on the outstanding debt and unpaid accrued interest has been increased by 3.00% to LIBOR plus 9.06% (9.31% at September 30, 2013).

Default Under Copper Derivative and Interest Rate Swap Agreements with Nedbank Capital

Nedbank Capital has also declined to extend the forbearance agreement regarding the Company's failure to make the timely payments for the monthly settlements beginning in March of 2010 through December 31, 2011 in the aggregate amount of \$16,106,691 due under the copper derivatives agreements between the parties. All of the related copper derivatives have matured.

Default Under Fisher Sand & Gravel Company Promissory Note

In July 2010, we reached an agreement with Fisher Industries to convert \$8,200,000 of payables to a two-year unsecured note bearing interest on the outstanding principal at the rate of 6% per annum (the Promissory Note). Since the outstanding principal under the Promissory Note is due and payable on July 31, 2012, the entire balance remaining unpaid to Fisher Industries under the note has been classified as a current liability. As of September 30, 2013, current maturities of long-term debt and accrued interest in the amount of \$6,164,964 and \$479,564, respectively, are reflected in the condensed consolidated balance sheets.

The Company was unable to make the required principal and accrued interest payment to Fisher upon the maturity of the note on July 31, 2012. Under the terms of the Promissory Note, Fisher must first provide the Company a written notice of default. If the Company fails to make the required payment to remedy the default within three business days, the whole sum shall become immediately due and payable at the option of Fisher without further notice. As of the date of this report, the Company has not received the default notification from Fisher. Our Company plans to renegotiate the terms and conditions of this note in conjunction with any refinancing that we may succeed in obtaining.

Company Operations if We Are Unable to Obtain Additional Capital

If we are unable to obtain financing, we expect to be able to continue our residual leaching and solvent extraction/electro-winning operations for the foreseeable future, assuming that neither Nedbank nor Nedbank Capital exercises its rights to note us in default, that Fisher Industries does not exercise its default rights under our promissory note, our vendors continue to provide us goods and services in accordance with existing terms and conditions, both copper prices and our costs (in particular, the cost of sulfuric acid) remain at or near current levels, and our copper recovery rate and copper production trends remain consistent with the average recovery rate and production trends that we have experienced for the last twelve months (none of which can be assured).

As disclosed above under Overview of Our Business , if our residual leaching and solvent extraction/electro-winning operations become economically unviable (for example, due to a material drop in copper prices, a material increase in the cost of sulfuric acid, or a material drop in our copper recovery rates and related copper production), we would be forced to terminate our operations, significantly reduce our workforce, place the Johnson Camp Mine on a care and maintenance program, and, perhaps, sell some our assets (subject to the consent of our secured creditors, as appropriate).

Financial Advisory and Consulting Services Olympus Securities LLC

In March 2011, the Company engaged Olympus Securities, LLC (Olympus) to provide financial advisory and consulting services. The Company has agreed to pay Olympus a success fee ranging between 2.5% and 7.2% of the capital raised for the Company depending on the type of transaction consummated. To date no success fees have been paid under the terms of the agreement with Olympus.

Delisting From OTCBB

On February 23, 2011, our common stock was de-listed from the OTC Bulletin Board (the OTCBB), and now trades exclusively on the OTCQB. According to the notice published on the OTCBB website (www.otcbb.com), our common stock is no longer eligible for quotation on the OTCBB due to quoting inactivity under SEC Rule 15c2-11. The stock will remain ineligible for quotation on the OTCBB until the Financial Industry Regulatory Authority, Inc. accepts a Form 211 filed pursuant to SEC Rule 15c2-11 by a market maker who wishes to resume quotations in the stock on the OTCBB.

Results of Operations Three and Nine Month Periods Ended September 30, 2013 and 2012

The following table sets forth our operating results for the three and nine month periods ended September 30, 2013, as compared with our operating results for the three and nine month periods ended September 30, 2012.

	Three Months Ended			Nine months Ended		
	September 30, 2013 (unaudited)	September 30, 2012 (unaudited)	Change Increase/ (Decrease) (unaudited)	September 30, 2013 (unaudited)	September 30, 2012 (unaudited)	Change Increase/ (Decrease) (unaudited)
Net sales	\$ 959,593	\$ 2,034,707	\$ (1,075,114)	\$ 4,069,403	\$ 6,429,116	\$ (2,359,713)
Costs applicable to sales	1,902,288	2,619,855	(717,567)	6,265,876	8,937,580	(2,671,704)

Revenue

We commenced production of nominal amounts of copper from newly-mined ore during the testing and development phase of the mine in February and March 2009. We entered the production stage as we achieved commercial copper cathode production from newly-mined ore on April 1, 2009. Due to continued copper recovery issues with the existing leach pads combined with a reduction in the amount of mining activity stemming from inadequate capital, we were unable to become cash flow positive in the second quarter of 2010 as anticipated. As a result, on July 2, 2010, we suspended the mining and crushing of new ore operations to increase cash flow with the goal of building a new leach pad. All other operations, including leaching, SX-EW and copper production, are continuing. However, as noted above, we expect that the production level will continue to steadily decline until the resumption of mining and crushing operations.

In February 2008, we entered into a long term cathode sales agreement with Red Kite for 100% of the copper cathode production from the Johnson Camp Mine. This agreement has been superseded by a cathode sales agreement effective

September 30, 2013, as amended, which runs through December 31, 2013 with renewable extensions by mutual agreement of both parties. Pursuant to the agreement, Red Kite accepts delivery of the cathodes at the Johnson Camp Mine. Pricing is based on the closing COMEX price for high grade copper on date of sale.

We recorded revenues of \$959,593 (including \$3,916 in amortization of deferred revenue) from the sale of 297,164 pounds of copper cathode for the three months ended September 30, 2013, and revenues of \$4,069,403 (including \$15,932 in amortization of deferred revenue) from the sale of 1,208,810 pounds of copper cathode for the nine months ended September 30, 2013. The average realized price of copper sold during the three and nine month periods ended September 30, 2013 was \$3.23 and \$3.37 per pound, respectively.

We recorded revenues of \$2,034,707 (including \$7,586 in amortization of deferred revenue) from the sale of 575,616 pounds of copper cathode for the three months ended September 30, 2012, and revenues of \$6,429,116 (including \$23,416 in amortization of deferred revenue) from the sale of 1,776,556 pounds of copper cathode for the nine months ended September 30, 2012. The average realized price of copper sold during the three and nine month periods ended September 30, 2012 was \$3.53 and \$3.62 per pound, respectively.

Costs Applicable to Sales

Costs applicable to sales represents the costs incurred in converting ore into salable copper cathode. Ordinarily, the conversion process includes the mining of ore, crushing, conveying and stacking of ore on to the pads, leaching of stockpiles, solvent extraction and electrowinning, and results in the production of copper cathode; the costs include labor, supplies, energy, site overhead costs and other necessary costs associated with the extraction and processing of ore. However, as noted above, we suspended the mining (extraction) and crushing of ore at our Johnson Camp Mine in July 2010. We continue to produce copper through the leaching of ore already in place on the existing pads and processing the solution through our SX-EW plant. Accordingly, our costs applicable to sales represent the costs incurred in converting the existing ore on our leach pads into salable copper cathode.

For the three months ended September 30, 2013, we incurred \$1,902,288 of costs applicable to sales (including \$1,510,501 in abnormal production costs due to the underutilization of plant capacity) from the sale of copper. For the nine months ended September 30, 2013, we incurred \$6,265,876 (including \$4,719,979 in abnormal production costs due to the underutilization of plant capacity) of costs applicable to sales from the sale of copper.

The average cost per pound of copper sold during the three and nine month periods ended September 30, 2013 was \$6.40 and \$5.18 per pound, respectively. The average cost per pound of copper sold excluding abnormal production costs was \$1.32 and \$1.28 per pound, respectively, during the same periods.

For the three months ended September 30, 2012, we incurred \$2,619,855 of costs applicable to sales (including \$1,800,371 in abnormal production costs due to the underutilization of plant capacity) from the sale of copper. For the nine months ended September 30, 2012, we incurred \$8,937,580 (including \$6,384,581 in abnormal production costs due to the underutilization of plant capacity) of costs applicable to sales from the sale of copper.

The average cost per pound of copper sold during the three and nine month periods ended September 30, 2012 was \$4.55 and \$5.03 per pound, respectively. The average cost per pound of copper sold excluding abnormal production costs was \$1.42 and \$1.44 per pound, respectively, during the same periods.

General and Administrative Expenses

Our general and administrative expenses increased to \$428,877 for the three months ended September 30, 2013, compared to \$365,164 for the three months ended September 30, 2012. The increase was primarily due to a \$77,285 increase in legal fees.

Our general and administrative expenses increased to \$1,134,991 for the nine months ended September 30, 2013, compared to \$1,131,112 for the nine months ended September 30, 2012. The increase was primarily due to a \$73,965 increase in legal fees offset by decreases in payroll expense of \$60,069 and insurance of \$5,044.

Depreciation, Depletion and Amortization

Our depreciation, depletion and amortization (DD&A) expenses decreased by \$51,844 and \$145,552 for the three and nine month periods ended September 30, 2013, respectively, as compared to the three and nine month periods ended September 30, 2012. The decrease in DD&A was primarily due to the decrease in the pounds of copper produced during the period.

Other Income (Expense)

The decrease in net other expense of \$371,322 for the three months ended September 30, 2013 in comparison to the same period in the prior year was primarily due to a decrease in interest expense of \$236,798 and an increase in miscellaneous income of \$143,033 as compared to the same period in 2012.

The decrease in net other expense of \$278,404 for the nine months ended September 30, 2013 in comparison to the same period in the prior year was primarily due to a decrease in interest expense of \$34,582 and an increase in miscellaneous income of \$298,718 as compared to the same period in 2012.

The decrease in interest expense for the three and nine month periods ended September 30, 2013 versus the same periods in 2012 were due to the fact that as of March 31, 2013, the Company had fully amortized the debt issuance costs originally incurred and capitalized in June 2007 upon the execution of the Nedbank Senior Debt.

The increase in miscellaneous income for the three and nine month periods ended September 30, 2013 versus the same periods in 2012 is primarily due to the reclassification of the deferred revenue to revenue from the sale of the advanced royalties on aggregate rock sold to Texas Canyon.

Net Loss

The Company incurred a net loss of (\$2,280,098) for the three months ended September 30, 2013 as compared to a net loss of (\$2,282,004) for the three months ended September 30, 2012. The decrease in net loss between these periods is primarily related to a \$717,567 decrease in net cost of sales and a decrease in net other expense of \$371,322 which accompanied and offset a decrease in Net Sales of \$1,075,114.

The Company incurred a net loss of (\$6,455,500) for the nine months ended September 30, 2013 as compared to a net loss of (\$7,187,568) for the nine months ended September 30, 2012. The decrease in the net loss between these periods is primarily related to the \$453,664 decrease in loss from operations coupled with the \$278,404 decrease in net other expense.

Liquidity and Financial Resources

We are currently in default under our Credit Agreement with Nedbank, our Copper Hedge Agreement with Nedbank Capital and our Promissory Note with Fisher Industries. Nedbank, Nedbank Capital and Fisher Industries have not exercised their respective rights to note us in default. However, our Company's continuation as a going concern is dependent upon our ability to refinance the obligations under these agreements, raise approximately \$20 million dollars in additional capital (to finance approximately \$18 million in capital costs for the development and construction of the new leach pad, and provide an additional \$2 million in working capital), and on our ability to produce copper to sell at a level where our Company becomes profitable and generates cash flows from operations, all of which is uncertain.

If our Company cannot raise additional capital, refinance our obligations or achieve our operating plan because of sales shortfalls, a reduction in copper prices, or other unfavorable events, we would be forced to terminate our operations, significantly reduce our workforce, place the Johnson Camp Mine on a care and maintenance program, and, perhaps, sell some of our assets (subject to the consent of our secured creditors, as appropriate).

Further, if Nedbank, Nedbank Capital or Fisher Industries take steps to enforce their rights under their respective agreements, we will not be able to continue as a going concern. Our condensed consolidated financial statements do not include any adjustments that might result from the outcome of these uncertainties.

As noted above, we have suspended the mining and crushing of ore at the Johnson Camp Mine and laid off approximately half of our workforce at the mine. We have continued to produce copper through the leaching of ore already in place on our existing pads and processing the solution through the SX-EW plant. Our Company is now maintaining its current infrastructure in order to maintain current operations and be in position to ramp up full mining operations if we are successful in closing a substantial capital infusion into our Company for the proposed construction of a new leach pad (which cannot be assured).

If we are unable to obtain financing for our new leach pad, we would not be able to resume our mining and crushing operations. However, we expect to be able to continue our residual leaching and solvent-extraction/electro-winning operations for the foreseeable future, assuming that neither Nedbank, Nedbank Capital, nor Fisher Industries exercises its rights to note us in default, both copper prices and our costs (in particular, the cost of sulfuric acid) remain at or near current levels, and our copper recovery rate and copper production trends remain consistent with the average recovery rate and production trends that we have experienced for the last twelve months (none of which can be assured).

We caution that extraction and recovery of copper by residual leaching is, by its nature, difficult to predict, and there can be no assurance that future copper recovery rates and copper production trends will be consistent with our past experience, apart from the certainty that our production level will continue to steadily decline until the resumption of mining and crushing operations. Accordingly, until our Company is able to execute on its refinancing and operating plan, we anticipate that additional financing will be required from time to time in order to meet our current obligations.

As disclosed above under *Overview of Our Business*, if our residual leaching and solvent extraction/electro-winning operations become economically unviable (for example, due to a material drop in copper prices, a material increase in the cost of sulfuric acid or a material drop in our copper recovery rates and copper production trends), we would be forced to terminate our operations, significantly reduce our workforce, place the Johnson Camp Mine on a care and maintenance program, and, perhaps, sell some of our assets (subject to the consent of our secured creditors, as appropriate).

If Nedbank, Nedbank Capital, and/or Fisher Industries elect to note us in default and enforce their security interests, we will not be able to continue as a going concern.

On October 3, 2013, we entered into a non-binding letter of intent with an arm's length third party that contemplates the third party making significant equity and/or debt financing available to our Company, subject to the third party obtaining the necessary funding, completion of due diligence to the satisfaction of the third party, the execution and delivery of a definitive agreement on mutually acceptable terms, and certain other conditions. The third party has advanced a total of \$300,000 to our Company for general working capital purposes.

All funds advanced by the third party bear interest at the rate of 15 percent per annum, and will be repayable from the proceeds of the equity and/or debt financing transaction (if any). There is no assurance that the financing contemplated by the letter of intent will close. We expect that the loan would become repayable upon demand if the equity and/or debt financing transaction do not close.

Cash and Working Capital

The following table sets forth our cash and working capital as of September 30, 2013 and December 31, 2012:

	As of September 30, 2013	As of December 31, 2012
	(Unaudited)	
Cash reserves	\$	\$ 11,863 ⁽¹⁾
Working capital surplus (deficiency)	(63,255,219) ⁽²⁾	(57,999,677) ⁽³⁾

(1) Excludes \$686,476 in restricted cash being held in conjunction with two letters of credit.

(2) Includes \$23,257,826 in current portion of senior long-term debt, \$16,106,691 in copper derivatives settlement payable and \$6,164,964 current portion of long-term debt.

(3) Includes \$23,257,826 in current portion of senior long-term debt, \$16,106,691 in copper derivatives settlement payable and \$6,183,499 current portion of long-term debt.

Cash Flows from Operating Activities

Our cash flows used by operating activities during the nine months ended September 30, 2013 were (\$246,861) as compared to (\$178,708) during the same period in 2012. The \$68,153 increase in cash flows used by operating activities between the two periods is primarily due to a decrease in cash flows from the sale of inventory of \$915,961, and a decrease in cash flows from the collection of accounts receivable of \$148,160, which offset a decrease in net loss of \$732,068, a decrease in depreciation, depletion and amortization of \$145,552, and a decrease in the amortization of debt issuance costs of \$196,901. We also had an increase in accrued interest of \$305,169, accrued expenses of \$134,815 and prepaid expenses of \$129,308.

Cash Flows from Investing Activities

Our cash flows used by investing activities during the nine months ended September 30, 2013 and 2012 were \$0 and (\$14,123), respectively. The increase of \$14,123 is due to fewer capital expenditures.

Cash Flows from Financing Activities

Our cash flows from financing activities during the nine months ended September 30, 2013 were \$234,998 compared to \$79,230 for the same period in 2012. The increase in cash flows from financing activities is primarily due to the increase in the issuance of related party debt of \$147,498 as a result of issuing \$234,998 of related party debt during the nine months ended September 30, 2013.

Accounting Developments

There were no material changes to our Company's significant accounting policies disclosed in Note 2 to our audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2012, as filed with the SEC on March 27, 2013.

For a discussion of significant estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses see Note 2 within the unaudited condensed consolidated financial statements.

For a discussion of recently adopted accounting pronouncements see Note 3 to the unaudited condensed consolidated financial statements.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

As a smaller reporting company, we are not required to provide any information under this item.

Item 4. Controls and Procedures

Disclosure controls and procedures are designed to ensure that information required to be disclosed by our Company is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Our Chief Executive Officer and Chief Financial Officer, Wayne Morrison, is responsible for establishing and maintaining disclosure controls and procedures for our Company.

Our management has evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2013 (under the supervision and with the participation of the Chief Executive Officer and the Chief Financial Officer), pursuant to Rule 13a-15(b) promulgated under the *Securities Exchange Act of 1934*, as amended. As part of such evaluation, management considered the matters discussed below relating to internal control over financial reporting. Based on this evaluation, our Company's Chief Executive Officer and Chief Financial Officer has concluded that our Company's disclosure controls and procedures were effective as of September 30, 2013.

Changes in Internal Control over Financial Reporting

The term "internal control over financial reporting" is defined as a process designed by, or under the supervision of, the registrant's principal executive and principal financial officers, or persons performing similar functions, and effected by the registrant's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the registrant;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the registrant are being made only in accordance with authorizations of management and directors of the registrant; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the registrant's assets that could have a material effect on the financial statements.

There have not been any changes in our internal control over financial reporting that occurred during our fiscal quarter ended September 30, 2013 that have materially affected, or are likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

We know of no material, existing or pending legal proceedings against our Company, nor are we involved as a plaintiff in any material proceeding or pending litigation. There are no proceedings in which any of our directors, officers or affiliates, or any registered or beneficial shareholder, is an adverse party or has a material interest adverse to our interest.

Item 1A. Risk Factors

As a smaller reporting company, we are not required to provide any information under this item.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Company did not complete any unregistered sales of equity securities during the period covered by this quarterly report on Form 10-Q that have not already been disclosed in a current report filed by the Company with the SEC on Form 8-K.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

We have not purchased any of our shares of common stock during the period covered by this quarterly report on Form 10-Q.

Item 3. Defaults upon Senior Securities

Nedbank Limited, our Company's senior lender, has declined to extend the forbearance agreement with respect to the scheduled quarterly principal and interest payments that were due between March 31, 2010 and September 30, 2013 under our Company's \$25,000,000 secured term-loan credit facility with Nedbank. We are now in default of our obligations under the Amended and Restated Credit Agreement with Nedbank dated March 31, 2009.

Given this default, Nedbank has full authority to exercise its rights under the credit agreement, including the acceleration of the full amount due there under and the institution of foreclosure proceedings against the Johnson Camp Mine. Nedbank has not served our Company with a formal notice of default under credit agreement, which is a precondition to such exercise of Nedbank's rights of acceleration and foreclosure. In accordance with the credit agreement, upon missing the March 31, 2010 principal and interest payment, the interest rate on the outstanding debt and unpaid accrued interest was increased by 3.00% to LIBOR plus 9.06%.

Nedbank Capital has also declined to extend the forbearance agreement regarding our Company's failure to make the monthly payments due between April 6, 2010 and January 5, 2012 under the Copper Hedge Agreement between the parties. Accordingly, although Nedbank Capital has not served our Company with a formal notice of default, we are in default under the Copper Hedge Agreement.

Item 4. Mine Safety Disclosures

We are required to disclose in this report certain information about the Company's U.S. mining operations, including the number of certain types of violations and orders issued under the Federal Mine Safety and Health Act of 1977 by

the U.S. Labor Department's Mine Safety and Health Administration. Information concerning such safety information related to our Company's U.S. mining operations or other regulatory matters required to be disclosed for the quarter ended September 30, 2013 is included as Exhibit 95.1 to this quarterly report on Form 10-Q and incorporated by reference herein.

Item 5. Other Information

Not applicable.

Item 6. Exhibits

Exhibit Number	Description
-------------------	-------------

Articles of Incorporation and By laws	
---------------------------------------	--

3.1	Certificate of Incorporation (as amended) of Nord Resources Corporation ⁽¹⁾
