PROSPECTUS SUPPLEMENT

16,182,230 SHARES OF COMMON STOCK

AMERICAN PETRO-HUNTER INC.

This Prospectus Supplement supplements and amends our Prospectus dated September 11, 2013, as amended and supplemented. This Prospectus Supplement includes our attached Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2013, as filed with the Securities and Exchange Commission on November 18, 2013.

The Prospectus, any prospectus supplements filed before the date hereof, and this Prospectus Supplement relate to the resale of up to an aggregate of 16,182,230 shares of our common stock, par value \$0.001 per share, by Hanover Holdings I, LLC, a New York limited liability company (“Hanover” or “Selling Stockholder”), 14,417,524 of which (the “Purchase Shares”) are issuable to Hanover pursuant to the terms of the Common Stock Purchase Agreement, between the Company and Hanover, dated March 22, 2013 (the “Purchase Agreement”) and 1,764,706 of which were issued to Hanover on March 22, 2013 in satisfaction of a \$150,000 commitment fee paid to Hanover for entering into the Purchase Agreement, based upon a price per share equal to \$0.085 per share.

This Prospectus Supplement should be read in conjunction with the Prospectus and any prospectus supplements filed before the date hereof. Any statement contained in the Prospectus and any prospectus supplements filed before the date hereof shall be deemed to be modified or superseded to the extent that information in this Prospectus Supplement modifies or supersedes such statement. Any statement that is modified or superseded shall not be deemed to constitute a part of the Prospectus except as modified or superseded by this Prospectus Supplement.

Our common stock is quoted on the OTC Bulletin Board under the symbol “AAPH” The shares of our common stock registered hereunder are being offered for sale by Selling Stockholder at prices established on the OTC Bulletin Board during the term of this offering. On November 14, 2013, the closing bid price of our common stock was \$0.017 per share. These prices will fluctuate based on the demand for our common stock.

INVESTING IN OUR COMMON STOCK INVOLVES A HIGH DEGREE OF RISK. SEE “RISK FACTORS” BEGINNING ON PAGE 6 OF THE PROSPECTUS.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THESE SECURITIES OR DETERMINED IF THE PROSPECTUS OR THIS PROSPECTUS SUPPLEMENT IS TRUTHFUL OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

The date of this Prospectus Supplement is November 18, 2013.

FORWARD-LOOKING STATEMENTS

This Report on Form 10-Q contains forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Reference is made in particular to the description of our plans and objectives for future operations, assumptions underlying such plans and objectives, and other forward-looking statements included in this report. Such statements may be identified by the use of forward-looking terminology such as may, expect, believe, estimate, anticipate, intend, continue, or similar terms, variations of such terms, or the negative of such terms. Such statements are based on management's current expectations and are subject to a number of factors and uncertainties, which could cause actual results to differ materially from those described in the forward-looking statements. Such statements address future events and conditions concerning, among others, capital expenditures, earnings, litigation, regulatory matters, liquidity and capital resources, and accounting matters. Actual results in each case could differ materially from those anticipated in such statements by reason of factors such as future economic conditions, changes in consumer demand, legislative, regulatory and competitive developments in markets in which we operate, results of litigation, and other circumstances affecting anticipated revenues and costs, and the risk factors set forth under the heading Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012, filed on April 15, 2013.

As used in this Form 10-Q, we, us and our refer to American Petro-Hunter Inc., which is also sometimes referred to as the Company.

YOU SHOULD NOT PLACE UNDUE RELIANCE ON THESE FORWARD LOOKING STATEMENTS

The forward-looking statements made in this report on Form 10-Q relate only to events or information as of the date on which the statements are made in this report on Form 10-Q. Except as required by law, we undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events, or otherwise, after the date on which the statements are made or to reflect the occurrence of unanticipated events. You should read this report and the documents that we reference in this report, including documents referenced by incorporation, completely and with the understanding that our actual future results may be materially different from what we expect or hope.

The accompanying notes are an integral part of these condensed financial statements

American Petro-Hunter Inc.
Notes to Condensed Financial Statements
September 30, 2013

1. Nature and Continuance of Operations

American Petro-Hunter Inc. (the Company) was incorporated in the State of Nevada on January 24, 1996 as Wolf Exploration Inc. On March 17, 1997, Wolf Exploration Inc. changed its name to Wolf Industries Inc.; on November 21, 2000, they changed its name to Travelport Systems Inc., and on August 17, 2001, changed its name to American Petro- Hunter Inc.

The Company is evaluating the acquisition of certain natural resource projects with the intent of developing such projects. The Company focus is currently in locating and assessing potential acquisition targets, including real property, oil and gas companies.

Basis of presentation

The accompanying unaudited condensed financial statements contain all adjustments (consisting only of normal recurring adjustments) which, in the opinion of management, are necessary to present fairly the financial position of the Company as of September 30, 2013, and the results of its operations and cash flows for the nine months ended September 30, 2013 and 2012. Certain information and footnote disclosures required under accounting principles generally accepted in the United States of America (U.S. GAAP) have been condensed or omitted from the following condensed financial statements pursuant to the rules and regulations of the SEC. In the opinion of management, the accompanying financial statements include all adjustments, which are of a normal and recurring nature, necessary to present fairly our financial position and results of operations. Certain reclassifications have been made to prior periods to conform to current presentations.

It is suggested that the following financial statements be read in conjunction with the financial statements and notes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2012. The Company does not believe there are any recently issued, but not yet effective, accounting standards that would have a significant impact on the Company's financial position or results of operations as of and for the nine months ended September 30, 2013.

The results of operations for the nine months ended September 30, 2013 and 2012 are not necessarily indicative of the results of the entire fiscal year or for any other period.

Going Concern

These financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) applicable to a going concern, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has an accumulated deficit of \$15,994,057 as of September 30, 2013 and has current liabilities that are \$1,033,603 in excess of its current assets. The Company has limited assets and requires additional funds to maintain its operations. Management's plan in this regard is to raise equity financing as required. There can be no assurance that sufficient funding will be obtained. The foregoing matters raise substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts of and classification of liabilities that might be necessary in the event the Company cannot continue in existence.

2. Significant Accounting Policies

The following is a summary of significant accounting policies used in the preparation of these financial statements.

Income taxes

The Company accounts for income taxes under FASB Codification Topic 740-10-25 (ASC 740-10-5). Under ASC 740-10-25, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Under ASC 740-10-25, the effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. See footnote 8 for further details.

Revenue Recognition

It is our policy that revenues will be recognized in accordance with ASC subtopic 605-10. Under ASC 605-10, product revenues are recognized when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed and determinable and collectability is reasonably assured.

Use of estimates

The preparation of financial statements, in conformity with accounting principles generally accepted in the United States, requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash Equivalents

The Company maintains cash balances in interest and non-interest bearing accounts. For the purpose of these financial statements, all highly liquid cash and investments with a maturity of three months or less are considered to be cash equivalents.

Net loss per share

In accordance with ASC subtopic 260-10, the basic loss per common share is computed by dividing net loss available to common stockholders by the weighted average number of common shares outstanding. Diluted loss per common share is computed similar to basic loss per common share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. For the three months and nine months ended September 30, 2013 and 2012, the denominator in the diluted EPS computation is the same as the denominator for basic EPS due to the anti-dilutive effect of the stock warrants and convertible debt on the Company's net loss.

Financial instruments

The Company's financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable, and notes payable. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, or credit risks arising from these financial instruments. The fair values of these financial instruments approximate their carrying values because of their relatively short-term maturities. See Note 5 for further details.

Fair Value of Financial Instruments

The Company has financial instruments whereby the fair value of the financial instruments could be different from that recorded on a historical basis in the accompanying balance sheets. The Company's financial instruments consist of cash, accounts receivable, accounts payable, and notes payable. The carrying amounts of the Company's financial instruments approximate their fair values as of September 30, 2013 and December 31, 2012, due to their short-term nature. See Note 5 for further details.

Reclassifications

Certain reclassifications have been made to the prior years' financial statements to conform to the current year presentation. These reclassifications had no effect on previously reported results of operations or retained earnings.

Oil and Gas Properties

We follow the successful efforts method of accounting for oil and gas exploration and production activities. All costs for development wells, related plant and equipment, proved mineral interests in oil and gas properties are capitalized. Costs of exploratory wells are capitalized pending determination of whether the wells found proved reserves. Cost of wells that are assigned proved reserves remain capitalized. All other exploratory wells and costs are expensed.

Depreciation, depletion and amortization of all capitalized costs of proved oil and gas producing properties are expensed using the straight-line method over the estimated life of each well. Period valuation provisions for impairment of capitalized costs of unproved mineral interests are expensed. The costs of unproved properties are excluded from amortization until the properties are proved.

Unproved properties are assessed periodically individually when drilling and flow testing results indicate whether there is an economic resource or not. All capitalized costs associated with properties that have been determined to be a dry-hole or uneconomic are impaired when that determination is made. Proved properties are assessed periodically for impairment on an individual basis. Events that can trigger the test for possible impairment include significant decreases in the market value of a property, significant change in the extent or manner of use or change in property and the expectation that a property will be sold or otherwise disposed of significantly sooner than the previously estimated useful life. The assessment is done by comparing each property's carrying value to their associated estimated undiscounted future net cash flows. Impaired properties are written down to their estimated fair values. The resulting impairment would be expensed to operations as impairment expense in the period in which it was determined that the impairment was indicated and calculated.

3. Recent Accounting Pronouncements

Management has reviewed recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the AICPA, and the SEC and they do not or are not believed by management to have a material impact on the Company's present or future financial statements

4. Investments in Mineral Properties

During the nine months ended September 30, 2013, the Company invested \$43,180 in one investment of mineral properties. During the year ended December 31, 2012, the Company invested a total of \$355,242 in four mineral properties and exchanged a Poston Prospect well with a book value of \$41,000 plus cash in the amount of \$6,500 for partial payment on a well located in the Oklahoma prospect. Management reviewed the carrying amount of the Company's investments in its oil and gas properties as of the balance sheet date and recognized an impairment expense in the amount of \$1,172,547 and \$256,737 for the nine months ended September 30, 2013 and 2012, respectively. As of September 30, 2013 and December 31, 2012, the estimated fair value of mineral properties totaled \$400,000 and \$1,582,324, net of accumulated amortization of \$185,457 and \$132,499, respectively. As of September 30, 2013, the Company has total capitalized costs of mineral properties (gross) of \$585,457; \$367,394 in proved properties and \$218,063 in unproved properties. As of December 31, 2012, the Company has total capitalized costs of mineral properties (gross) of \$1,714,822; \$1,103,205 in proved properties and \$611,617 in unproved properties. Capitalized costs of proved properties are amortized using the straight-line method over the estimated useful life of each well. Unproved properties are excluded from amortization. Amortization expense for the nine months ended September 30, 2013 and 2012 was \$52,957 and \$86,218, respectively. A summary of investments follows:

S&W Oil & Gas, LLC - Poston Prospect

On May 4, 2009, the Company entered into an Agreement with S&W Oil & Gas, LLC (S&W) to participate in the drilling for oil in the Poston Prospect #1 Lutters in Southwest Trego County, Kansas (the Poston Prospect). Pursuant to the agreement, the Company paid \$64,500 in exchange for a 25% working interest in the 81.5% net revenue interest in the Poston Prospect. Subsequent to acquiring the working interest, the Company paid \$138,615 in capitalized development costs necessary for completion of the initial well and the drilling and completion of a second well in the Poston Prospect. In 2011, the Company recognized an impairment of the investment in the amount of \$93,879. During the year ended December 31, 2012, the Company sold its interest in the Poston Prospect for cash in the amount of \$69,500, resulting in a gain of \$2,621. This well contributed approximately 5% of the Company's 2012 revenue and 0% of the revenue for the nine months ended September 30, 2013.

Oklahoma prospects

During 2010 and 2011, the Company acquired various working interest percentages ranging from 5% to 50%, from Bay Petroleum for mineral properties located in Oklahoma in exchange for cash totaling \$1,992,330. During the year ended December 31, 2011, one well was determined to be a dry hole and its full \$80,000 carrying value was impaired. During the year ended December 31, 2012, the Company acquired additional working interests in the Oklahoma prospects for cash in the amount of \$355,242 and property valued at \$41,000. During the year ended December 31, 2012, two of the wells were determined to be uneconomic and \$565,737 of impairment was taken to reduce the properties to their fair value. During the nine months ended September 30, 2013, the Company invested \$43,180 in these properties. Management reviewed the carrying amount of the Company's investments in its oil and gas properties as of the balance sheet date and recognized an impairment expense in the amount of \$1,172,547 for the nine months ended September 30, 2013 related to these properties. The Oklahoma prospects wells contributed approximately 95% of the Company's 2012 revenue and 100% of the revenue for the nine months ended September 30, 2013.

5. Fair Value Measurements

The Company adopted ASC Topic 820-10 at the beginning of 2009 to measure the fair value of certain of its financial assets required to be measured on a recurring basis. The adoption of ASC Topic 820-10 did not impact the Company's financial condition or results of operations. ASC Topic 820-10 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). ASC Topic 820-10 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability. The three levels of the fair value hierarchy under ASC Topic 820-10 are described below:

Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that an entity has the ability to access.

Level 2 Valuations based on quoted prices for similar assets and liabilities in active markets, quoted prices for identical assets and liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable data for substantially the full term of the assets or liabilities.

Level 3 Valuations based on inputs that are supportable by little or no market activity and that are significant to the fair value of the asset or liability.

The following table presents a reconciliation of all assets and liabilities measured at fair value on a recurring basis as of:

	Level 1	Level 2	Level 3	Total
September 30, 2013:				
Cash	\$ 1,454	\$ -	\$ -	\$ 1,454

6. Debt and Debt Guarantee

Short term note from Officer

During the year ended December 31, 2012, the Company issued a promissory note in the amount of \$39,200 for cash advances received from an officer of the Company. The note is non-interest bearing, unsecured and due on demand. On September 27, 2013, the Company entered into an agreement to issue 3,768,844 restricted shares of stock at \$0.0199 for an amount of \$75,000 in lieu of payment towards this note and \$35,800 in other payables owed. As of September 30, 2013, the balance on this note is \$0.

Miscellaneous Notes Payable

On October 18, 2006, the Company issued a promissory note in the amount of \$25,000. The note bears interest at a rate of 12% per annum, is unsecured and matured on May 18, 2007. On March 26, 2012, the holder of the note elected to convert the entire principal balance together with accrued interest of \$21,819 into 187,277 shares of the Company's common stock at a conversion rate of \$0.25 per share. As of December 31, 2012, there was no balance due on this note.

In August 2011, the Company issued a promissory note in the amount of \$71,000. The note bears interest at a rate of 24% per annum, is unsecured and due on demand. On April 30, 2012, the holder of the note elected to convert the entire principal balance together with accrued interest of \$12,140 into 332,561 shares of the Company's common stock at a conversion rate of \$0.25 per share. As of December 31, 2012, there was no balance due on this note.

In December, 2011, the Company issued a promissory note in the amount of \$79,980 to Centennial Petroleum Partners LLC (CPP). The note bears interest at a rate of 6% per annum, is unsecured and due on demand. On April 30, 2012, the holder of the note elected to convert the entire principal balance together with accrued interest of \$2,688 into 330,671 shares of the Company's common stock at a conversion rate of \$0.25 per share. As of December 31, 2012, there was no balance due on this note.

In 2011, CPP was assigned the 6% royalty interest originally granted to Maxum Overseas Fund. The royalty interest was valued at \$113,164 utilizing the present value of estimated future payments due over the remaining life of the wells. The liability was recorded with corresponding prepaid financing costs to be amortized over the remaining term of the debt. For the years ended December 31, 2012 and 2011, \$42,436 and \$35,364, respectively, was amortized into interest expense in relation to this prepaid. During the year ended December 31, 2012, in connection with the royalty termination agreement discussed below, the Company has recorded a gain of \$77,800 on the forgiveness of future royalty payments of \$108,746 net of the unamortized financing costs of \$30,946.

On July 3, 2012 in connection with the Purchase Agreement between the Company and ASYM Energy Opportunities, LLC, CPP agreed to enter into a royalty termination agreement, resulting in the elimination of their 6% royalty interest in exchange for anti-dilution protection with respect to the shares issued in the conversion of their note payable at a conversion rate of \$0.25. The anti-dilution protection provides that in the event the Company issues warrants to a third party with an exercise price less than the conversion rate of \$0.25, the Company will issue additional shares for the previous conversions equal to the difference between the number of shares calculated utilizing the variable ASYM warrant exercise price less the number of shares previously issued subject to a ceiling of 4.99% of the total outstanding shares of the Company. On July 3, 2012, the Company estimated the potential future number of anti-dilution share issuances required pursuant to the agreements to be 2,385,311 and recorded a derivative liability and corresponding comprehensive income (loss) in the amount of \$333,943 representing the fair value of the potential anti-dilution shares on that date. As of December 31, 2012, the Company has authorized the issuance of 3,003,104 shares as a result of the anti-dilution provision and recorded a financing expense in the amount of \$406,615, the fair value of the shares on the date of grant. As of December 31, 2012, CPP there were an additional 4,633 additional anti-dilution shares potentially issuable to meet the beneficial ownership ceiling as a result; the Company recorded a decrease in derivative liability of \$333,664 and a corresponding change in comprehensive gain (loss). During the nine months ended September 30, 2013, the Company authorized the issuance of an additional 2,163,656 shares as a result of the anti-dilution provision and recorded a financing expense in the amount of \$21,823; the fair value of the shares on the date of the grant. During the nine months ended September 30, 2013, the Company recorded a decrease in derivative liability of \$559 and a corresponding change in accumulated comprehensive gain (loss) on the balance sheet. As of September 30, 2013, the Company has not issued any of the shares discussed above and CPP is owed 5,166,760 shares. These shares are recorded as owed but not issued on the balance sheet.

Convertible Debentures - 2009

In August and September of 2009, the issued two Secured Convertible Promissory Notes in the amount of \$500,000 each to an investor for total proceeds of \$1,000,000. The notes bear interest at a rate of 18% per annum, are secured by the assets of the Company, and matured on August 13 and September 15, 2010, respectively. In accordance with the agreement, the Company is required to make monthly interest payments until the principal balances are paid in full. Additionally, the Company issued warrants to purchase up to 2,857,142 shares of the Company's common stock at an exercise price of \$0.50. The warrants expired in 2011 and were unexercised. In March 2010, the holder elected to convert \$350,000 of the notes into 1,000,000 shares of the Company's common stock at a conversion rate of \$0.35 per share. In December 2010 and August 2011, the debentures were subsequently amended whereby extending the original maturity date to August 13 and September 15, 2012 and reducing the conversion rate from the lower of \$0.35 or a 25% discount to the five day average trading price to the lower of \$0.25 or a 25% discount to the five day average.

On July 3, 2012, in connection with the Purchase Agreement between the Company and ASYM Energy Opportunities, LLC, the Company entered into a third amendment whereby the holder agreed to terminate his security interest in the assets of the Company, reduce the interest rate from 18% to 10% per annum upon receipt of the initial financing tranche of \$1,000,000 and to revise the repayment terms, whereby the entire unpaid principle together with accrued interest will be payable in two equal installments upon successful financing obtained by the Company, but in no event later than December 31, 2014. The initial funding tranche of \$1,000,000 has not been received; therefore this loan remains at an interest rate of 18% per annum.

On March 4, 2013, \$140,000 of the outstanding convertible debt was assigned to Magna Group, LLC. See Notes Payable Magna Group below for further details. On August 20, 2013, an additional \$65,000 of the outstanding convertible debt was assigned to Magna Group, LLC.

As of September 30, 2013 and December 31, 2012, the principal balance related to this note totaled \$428,306 and \$633,306, respectively, and is shown as a long term liability on the balance sheet.

Convertible Debentures - 2010

In 2010, the company entered into a Convertible Line of Credit Agreement with Maxum Overseas Fund (Maxum) in the amount of \$1,500,000 and received an initial advance in the amount of \$1,462,774. The line of credit bears interest at a rate of 24% per annum, is convertible at \$0.90, and was secured by certain assets of the Company and due in full on May 17, 2011. In November of 2010, the Company amended the line of credit agreement to reduce the conversion price to \$0.25 per share. In May and July of 2011, the Company entered into a third and fourth amendment to the line of credit whereby increasing the line of credit to \$2,000,000 in exchange for a 3% royalty interest in production revenue generated by the Company. The Company was advances additional proceeds of \$1,700,918. In August 2011, the agreement was further amended to extend the maturity date to November 17, 2012 and increase the line to \$3,000,000 in exchange for an additional 3% royalty interest. The royalty interest was subsequently assigned by Maxum to Centennial Petroleum Partners, LLC (CPP). See CPP information above for further details on the royalty interest and its termination in 2012.

In December 2011, the holder elected to convert \$1,090,902 of the balance owed into 4,363,611 shares of the Company s common stock at a conversion rate of \$0.25 per share. In the first quarter of 2012, the Company was advanced an additional \$198,000 against the line of credit and In March and April of 2012; the holder elected to convert the entire unpaid principle balance and accrued interest in the amount of \$3,163,218 into 12,652,869 shares of the Company s common stock at a conversion rate of \$0.25. As of December 31, 2012 there is no balance on this note. Additionally, in 2012, Maxum agreed to forgive the finders fee and the Company recorded debt forgiveness of \$158,185. As of December 31, 2012 and 2011, the Company recorded amortization expense related to the beneficial conversion feature in the amount of \$212,070 and \$646,760, respectively.

On July 3, 2012 in connection with the Purchase Agreement between the Company and ASYM Energy Opportunities, LLC, the investor group agreed to enter into a lien termination agreement, resulting in the termination of their security interest in certain assets of the Company in exchange for anti-dilution protection with respect to the shares issued in the conversion of the line of credit at a conversion rate of \$0.25 The anti-dilution protection provides that in the event the Company issues warrants to a third party with an exercise price less than the conversion rate of \$0.25, the Company will issue additional shares for the previous conversions equal to the difference between the number of shares calculated utilizing the exercise price of the warrants less the number of shares previously issued subject to a ceiling of 4.99% of the total outstanding shares of the Company. The Company estimated the number of shares that could be issued pursuant to the agreements on July 3, 2012 to be 2,576,975 and recorded a derivative liability and corresponding comprehensive income (loss) in the amount of \$360,776 representing the fair value of the shares on that date. During the year ended December 31, 2012, the Company authorized the issuance of 3,003,104 shares as a result of the anti-dilution provision and recorded a financing expense in the amount of \$425,468, the fair value of the shares on the date of grant. As of December 31, 2012, there were an additional 4,633 additional anti-dilution shares

potentially issuable to meet the beneficial ownership ceiling as a result; the Company recorded a decrease in derivative liability of \$360,497 and a corresponding change in comprehensive gain (loss). During the nine months ended September 30, 2013, the Company authorized the issuance of an additional 2,163,656 shares as a result of the anti-dilution provision and recorded a financing expense in the amount of \$21,823; the fair value of the shares on the date of the grant. During the nine months ended September 30, 2013, the Company recorded an decrease in derivative liability of \$559 and a corresponding change in accumulated comprehensive gain (loss) on the balance sheet. As of September 30, 2013, the Company has not issued any of the shares discussed above and Maxum is owed 5,166,760 shares. These shares are recorded as owed but not issued on the balance sheet.

Note Payable ASYM

On July 3, 2012, the Company entered into a Purchase Agreement with ASYM Energy Opportunities LLC (ASYM), pursuant to which ASYM agreed to provide up to \$10,000,000 in debt financing to be advanced in approximately ten tranches of \$1,000,000 each, with \$300,000 of the initial tranche to be paid upon closing and the remaining \$700,000 to be funded upon the satisfaction of certain conditions, including completion of due diligence by ASYM, satisfaction by the Company of certain financial tests, and the availability of funds of ASYM. Each tranche will be evidenced by a senior secured promissory note which bears interest at a rate of 15% per annum, with all tranches maturing on June 30, 2015 at an amount equal to 110% of the principle amount funded. Additionally, each note is subject to early repayment in the event the Company does not meet certain financial covenants. In accordance with the agreement, the Company has issued a First Lien Security Agreement, Mortgage, Deed of Trust, Assignment of Production, Fixture Filing and Financing Statement to ASYM as collateral to the financing. In connection with each tranche of funding, the Company is required to issue a warrant to purchase shares of the Company's common stock equal to 83% the tranche amount, divided by the warrant exercise price. Additionally, the Company has entered into a Deposit Account Control Agreement with ASYM to perfect ASYM's security interest in certain bank accounts maintained by the Company. The Company is required to pay an administrative fee of \$100,000 payable upon receipt of the second tranche of \$1,000,000.

Further, pursuant to the Purchase Agreement, the Company entered into a perpetual Management Services Agreement with ASYM Management LLC ("ASYM Management") for managerial, financial, strategic and operational consulting services. The agreement expires only upon the sale, liquidation or dissolution of the Company or termination by ASYM Management. Pursuant to the terms of the agreement, the Company has agreed to pay a monthly management fee of \$12,000 plus two percent of the unfunded balance of the Purchase Agreement. In addition, ASYM Management will be entitled to receive a warrant equal to 17% of the tranche amount divided by the exercise price of the warrant.

In March of 2013, the Company amended its agreement with ASYM Management to raise the monthly management fee to \$20,000 per month and to eliminate the fee on the unused portion of the funding. The amended agreement lowers the amount owed to ASYM as of March of 2013 by approximately \$47,000 if the full balance owed to them is paid in full by July 31, 2013. The amounts owed to ASYM were not paid in full by July 31, 2013, so the \$47,000 was not forgiven.

The aforementioned warrants had a variable exercise price computed based on the lesser of (i) \$0.20, (ii) eighty five percent (85%) of the volume weighted average price per share of the Company's common stock for the fifteen days preceding the issuance of any tranche, or (iii) the trailing ninety (90) net average daily oil production multiplied by \$40,000, the product of which is reduced by the Company's total liabilities, but not less than \$500,000, and then divided by the Company's fully diluted number of common shares outstanding. Each warrant will have a term of five years from the date of issuance and will be limited to an amount where the underlying shares of common stock issuable upon exercise does not cause ASYM collectively, to exceed a 4.99% ownership interest in the Company. Upon exercise of any warrant, the warrant shares are subject to demand registration rights utilizing best efforts.

On July 3, 2012, the Company estimated the number of shares underlying warrants that could be issued pursuant to the Purchase Agreement, while not exceeding an ownership interest of 4.99%, to be 2,576,975 and recorded a derivative liability and corresponding comprehensive income (loss) in the amount of \$354,049 representing the fair value of the of the warrants on that date. The warrants were valued utilizing the Black-Sholes Model and the following terms: i) five-year life ii) exercise price of \$0.031 iii) volatility of 181% iv) risk free rate of 0.69% and v) share price on the date of grant of \$0.14.

On July 6, 2012, the Company received \$300,000 of the initial tranche and in accordance with the Purchase Agreement the Company granted two warrants to purchase a total of 2,576,975 shares of the Company's common stock, 2,138,889 to ASYM and 438,086 to ASYM Management, at an exercise price of \$0.031 and recorded a financing expense in the amount of \$354,049, the fair value of the warrants on the date of grant. On September 27,

2012, the Company received additional proceeds of \$180,000 due under the first tranche. As consideration for the limitation of funding the entire remaining \$700,000 per the Purchase Agreement, ASYM agreed to a \$0.35 exercise price for the warrant due them in connection with the September 27th funding. As a result, the Company granted two warrants to purchase a total of 376,209 shares of the Company's common stock and recorded a financing expense in the amount of \$59,124, the fair value of the warrants on the date of grant. The warrants were valued utilizing the Black-Sholes Model and the following terms: i) five-year life ii) exercise price of \$0.2946 iii) volatility of 179% iv) risk free rate of 0.64% and v) share price on the date of grant of \$0.16

On November 19 and December 17, the Company received two additional tranches in the amount of \$5,000 each. In accordance with the terms of the financing agreement the Company granted the issuance of two warrants to purchase 18,773 and 31,147, respectively in connection with the funding advances and recorded financing costs of \$4,452. The warrants were valued utilizing the Black-Sholes Model and the following terms: i) five-year life ii) exercise price of \$0.01 iii) volatility of 184%-185 iv) risk free rate of 0.64% -0.77% and v) share price on the date of grant of \$0.12 -\$0.07.

On March 31, 2013, the Company and ASYM agreed to modify the terms of the July 3, 2012 agreement whereby eliminating the variable exercise price of each warrant grant due pursuant to the agreement to a fixed exercise price of \$0.01 applicable to both past and future warrant grants. As a result of the retrospective modification of terms, the Company re-valued all warrants previously issued and recorded a financing expense in the amount of \$174,683. As of December 31, 2012, the derivative liability related to the fair value of the variable number of warrants potentially issuable has been eliminated due to the fixed conversion rate.

The ASYM agreement contains miscellaneous debt covenant requirements. As of December 31, 2012 and March 31, 2013, the Company was not in compliance with those covenants. On March 28, 2013, ASYM granted the Company a waiver of those covenants through March 31, 2013 in return for a 3% overriding royalty interest in all existing and future properties and a \$25,000 waiver fee. The \$25,000 waiver fee was not paid but rather recorded as a tranche loan under the agreement. In accordance with the terms of the financing agreement the Company granted the issuance of two warrants to purchase 3,869 and 793, respectively in connection with the funding advances and recorded financing costs of \$240. The warrants were valued utilizing the Black-Sholes Model and the following terms: i) five-year life ii) exercise price of \$0.01 iii) volatility of 120.5% iv) risk free rate of 0.72% and v) share price on the date of grant of \$0.055.

As of June 30, 2013, the Company was not in compliance with those covenants. On September 5, 2013, ASYM granted the Company a waiver of those covenants through September 11, 2013 in return for a \$25,000 waiver fee. The \$25,000 waiver fee was not paid but rather recorded as a tranche loan under the agreement. In July of 2013, the Company received an additional tranche in the amount of \$60,766. During the quarter ended September 30, 2013, In accordance with the terms of the financing agreement the Company granted the issuance of two warrants to purchase 1,791,965 and 367,029, respectively in connection with the funding advances and valued the warrants at \$21,590. The warrants were valued utilizing the Black-Sholes Model and the following terms: i) five-year life ii) exercise price of \$0.01 iii) volatility of 203.77% iv) risk free rate of 1.39% and v) share price on the date of grant of \$0.01.

Subsequent to September 30, 2013, ASYM granted an extension of the waiver of those covenants for all periods prior to November 20, 2013 in return for \$25,000 waiver fee in the form of an additional tranche loan under the agreement.

Notes Payable Magna Group

Effective March 4, 2013, in connection with the assignment of \$140,000 of outstanding convertible debt of the Company to Magna Group, LLC (Magna), the Company issued to Magna a Twelve Percent (12%) Convertible Note, which matured on September 4, 2013. The Note provides that Magna, at any time, and the Company, on the maturity date, may convert any remaining outstanding principal balance and accrued interest under the Note into shares of common stock of the Company. The conversion price of the Note shall be equal to a forty five percent (45%) discount from the lowest trading price of the Company's common stock in the five days prior to the day Magna requests conversion. An additional eight percent (8%) discount will be applied if the Company's common stock is chilled for deposit at DTC and/or becomes chilled at any point while the Note is outstanding. In no event will the conversion price be less than \$0.00004 per share. If at any time the Company issues any stock or grants options or warrants at a price per share less than the conversion price, then the conversion price will be reduced to such lesser amount. The Company may prepay the note at any time, upon three business days' written notice, at a price equal to one hundred and fifty percent (150%) of the outstanding principal balance of the Note, plus accrued interest. This note contains a beneficial conversion feature that was calculated at \$140,000 and a discount was recorded. The discount will be

amortized over the six-month of the loan and adjusted for any conversions to common stock. During the nine months ended September 30, 2013, \$140,000 was amortized into interest expense in relation to the discount and the discount is \$0 as of September 30, 2013.

In March of 2013, the company issued 1,305,034 shares of common stock in relation to a conversion of \$40,000 of the Note. In April of 2013, the Company entered into an exchange agreement with Magna which changed the conversion price to \$.008. During the three months ended, June 30, 2013, the company issued 11,283,784 shares of common stock in relation to a conversion of \$90,000 of the note. In August of 2013, Magna converted an additional \$10,000 of the note into 1,250,000 shares of common stock. As of September 30, 2013, there is no balance due on this note.

In August of 2013, an additional \$65,000 of outstanding convertible debt of the Company was assigned to Magna. The Company issued to Magna a Twelve Percent (12%) Convertible Note, which matures on August 20, 2014. The Note provides that Magna, at any time, and the Company, on the maturity date, may convert any remaining outstanding principal balance and accrued interest under the Note into shares of common stock of the Company. The conversion price of the Note shall be equal to \$0.005 on the day of conversion request. An additional eight percent (8%) discount will be applied if the Company's common stock is chilled for deposit at DTC and/or becomes chilled at any point while the Note is outstanding. In no event will the conversion price be less than \$0.00004 per share. If at any time the Company issues any stock or grants options or warrants at a price per share less than the conversion price, then the conversion price will be reduced to such lesser amount. The Company may prepay the note at any time, upon three business days' written notice, at a price equal to one hundred and fifty percent (150%) of the outstanding principal balance of the Note, plus accrued interest. This note contains a beneficial conversion feature that was calculated at \$39,806 and a discount was recorded. The discount will be amortized over the one year term of the loan and adjusted for any conversions to common stock. During the nine months ended September 30, 2013, \$7,895 was amortized into interest expense in relation to the discount and the discount is \$31,911 as of September 30, 2013.

In September of 2013, the company issued 1,500,000 shares of common stock in relation to a conversion of \$7,500 of the note. Subsequent to September 30, 2013, an additional \$22,500 of this note has been converted into 4,500,000 shares of common stock.

During the nine months ended September 30, 2013, interest in the amount of \$1,113 was accrued. As of September 30, 2013, the balance of the note was \$57,500.

Notes Payable - JMJ Financial

Effective March 27, 2013, the Company issued a convertible promissory note in the total possible amount of \$335,000 and borrowed \$50,000 under the note. The note bears no interest if repaid within ninety days and bears interest of 12% if not repaid within ninety days. The maturity date of each loan under this promissory note is one year from the date of the draw. The loan balance is convertible at the lesser of \$0.075 or 60% of the lowest trade price in the 25 trading days previous to the conversion. In June of 2013, the Company amended its agreement with JMJ Financial to change the conversion price to be the lesser of \$0.01 or 60% of the lowest trade price in the 25 trading days previous to the conversion. This note contains a beneficial conversion feature that was bifurcated out of the loan proceeds of the initial \$50,000 draw. A discount on notes payable related to the beneficial conversion feature was recorded in the amount of \$20,000 and will be amortized over the one year of the loan.

On June 27, 2013, the Company borrowed an additional \$25,000 under the note. A discount on this notes payable related to the beneficial conversion feature was recorded in the amount of \$10,000 and will be amortized over the one year of the loan.

On September 27, 2013, the Company borrowed an additional \$25,000 under the note. A discount on this notes payable related to the beneficial conversion feature was recorded in the amount of \$19,643 and will be amortized over the one year of the loan.

In September of 2013, JMJ converted \$18,000 of the note into 3,000,000 shares of common stock.

As of September 30, 2013, the note balance on this note is \$82,000 and no interest had been accrued. This note contains a beneficial conversion feature that was calculated in total at \$49,643 and a discount was recorded. The discount is being amortized over the life of the loan and adjusted for any conversions to common stock. During the nine months ended September 30, 2013, \$25,000 was amortized into interest expense in relation to the discount and the discount is \$24,643 as of September 30, 2013.

Subsequent to September 30, 2013, 2,000,000 shares of common stock was issued in conversion of \$11,500 of the note payable.

Notes Payable Hanover Holdings I, LLC

Effective March 4, 2013, the Company issued a convertible promissory note in the amount of \$51,500. The note bears interest at 12% and matures on December 4, 2013. The loan balance is convertible at 55% of the lowest trade price in the 10 trading days previous to the conversion. This note contains a beneficial conversion feature that was bifurcated out of the loan proceeds. A discount on notes payable related to the beneficial conversion feature was recorded in the amount of \$25,925 and will be amortized over the life of the loan. In April of 2013, the Company entered into an exchange agreement with Hanover which changed the maturity date of the note to November 4, 2014 and changed the conversion price to \$.008. The discount on the notes payable related to the beneficial conversion feature was increased by \$13,768. The note balance is shown as a long term liability on the balance sheet. In September of 2013, \$12,000 of the note was converted to 1,500,000 shares of common stock. During the nine months ended September 30, 2013, \$17,858 was amortized into interest expense in relation to the discount and the discount is \$21,835 as of September 30, 2013. As of September 30, 2013, the balance of the note was \$39,500 and \$3,567 of interest had been accrued.

Effective April 25, 2013, the Company issued a convertible promissory note in the amount of \$5,000. The note bears interest at 12% payable on December 26, 2013.

During the three months ended September 30, 2013, the Company issued an additional \$31,800 convertible promissory note, bearing interest at 12% and payable on August 20, 2014. A discount on notes payable related to the beneficial conversion feature was recorded in the amount of \$20,112 and will be amortized over the life of the loan. As of September 30, 2013, the short term note balance was \$31,800 with \$987 accrued interest.

Notes Payable Friesen

Effective June 1, 2013, the Company issued a convertible promissory note in the amount of \$15,000. The note bears interest at 10% and matures one year from date of loan. The loan balance is convertible at the lesser of \$.01 or 25% discount to the average closing trading price during 5 trading days prior to conversion. This note contains a beneficial conversion feature that was bifurcated out of the loan proceeds of the initial \$15,000 draw. A discount on notes payable related to the beneficial conversion feature was recorded in the amount of \$7,500 and will be amortized over the one year of the loan. During the nine months ended September 30, 2013, \$3,125 was amortized into interest expense in relation to the discount and the discount is \$4,375 as of September 30, 2013. As of September 20, 2013, the balance on the note was \$15,000.

Loan Guarantee

In 2004, the Company received a demand for payment from Canadian Western Bank (CWB) pursuant to a guarantee provided by the Company in favor of Calgary Chemical, a former subsidiary. The Company divested itself of Calgary Chemical in 1998 under an agreement with a former president and purchaser. The agreements included an indemnity guarantee from the purchaser of Calgary Chemical, whereby the purchaser would indemnify and save harmless the Company from any and all liability, loss, damage or expenses. Upon receipt of the demand, the Company accrued the estimated amount of the claim, \$94,860 along with a comprehensive loss on foreign currency of \$8,114, since in the opinion of legal counsel it is more likely than not that CWB would prevail in this action. As of December 31, 2012,

the Company has determined the loan guarantee is no longer valid due to its age and the statute of limitations. As a result, the Company recognized a gain on debt in the amount of \$86,746 in the year ended December 31, 2012.

Financing and interest expense

Financing and interest costs related to the Company's aforementioned financing activities for the nine months ended September 30, 2013 and 2012, totaled \$462,203 and \$1,681,602, respectively.

7. Stockholders Equity Transactions

Common Stock

As of December 31, 2011, there are 32,867,028 shares of common stock issued and outstanding and no common stock owed but not issued.

In January of 2012, the Company issued 900,000 shares of common stock in lieu of executive compensation. The shares were valued at \$189,000, which was market value on the day of the grant.

During the year December 31, 2012, the Company authorized the issuance of 767,500 shares of common stock for the conversion of \$239,469 of accounts payable balances. As of the balance sheet date 84,500 shares were unissued.

During the year ended December 31, 2012, the Company authorized the issuance of 12,652,869 shares of common stock for the conversion of \$3,163,218 in convertible debt and accrued interest as discussed in Note 6.

During the year ended December 31, 2012, the Company authorized the issuance of 850,509 shares of common stock for the conversion of \$212,628 in notes payable and accrued interest as discussed in Note 6.

During the year ended December 31, 2012, the Company authorized the issuance of 6,006,208 shares of common stock valued at \$832,083 in connection with the anti-dilution provisions provided to Maxum and CPP.

As of December 31, 2012 there are 47,620,406 shares of common stock issued and outstanding and 6,423,708 shares of common stock owed but not issued.

During the nine months ended September 30, 2013, the Company issued 241,667 shares of common stock for cash of \$14,500.

During the nine months ended September 30, 2013, the Company issued 19,838,818 shares of common stock for the conversion of \$218,200 in convertible debt as discussed in Note 6. As of September 30, 2013, 1,500,000 of these shares have not been issued and are shown as common stock to be issued. The shares were issued subsequent to September 30, 2013.

During the nine months ended September 30, 2013, the Company issued 1,764,706 shares of common stock as a commitment fee in relation to the Hanover Holdings I, LLC agreement as discussed below. The shares were valued at \$150,000 and capitalized as financing costs. The fee will be amortized over the two-year life of the agreement.

During the nine months ended September 30, 2013, the Company authorized the issuance of 3,768,844 shares of common stock to an officer for the conversion of \$39,200 of short term loans and \$35,800 of accounts payable balances.

During the nine months ended September 30, 2013, 333,000 shares that were owed but not issued were issued to an officer.

As of September 30, 2013 there are 72,067,441 shares of common stock issued and outstanding and 11,918,020 shares of common stock owed but not issued.

Hanover Holdings I, LLC Purchase Agreement:

On March 22, 2013, the Company entered into a common stock purchase agreement with Hanover Holdings I, LLC, a New York limited liability company (the Investor). The Purchase Agreement provides that, upon the terms and subject

to the conditions set forth therein, the Investor is committed to purchase up to \$5,000,000 worth of the Company's common stock over the 24-month term of the Purchase Agreement.

From time to time over the term of the Purchase Agreement, commencing on the trading day immediately following the date on which the initial registration statement is declared effective by the Securities and Exchange Commission (the Commission), as further discussed below, the Company may, in its sole discretion, provide the Investor with draw down notices to purchase a specified dollar amount of Shares over a 10 consecutive trading day period commencing on the trading day specified in the applicable Draw Down Notice, with each draw down subject to the limitations discussed below. The maximum amount of Shares requested to be purchased pursuant to any single Draw Down Notice cannot exceed 300% of the average daily trading volume of the Company's common stock for the 10 trading days immediately preceding the date of the Draw Down Notice.

Once presented with a Draw Down Notice, the Investor is required to purchase a pro rata portion of the applicable Draw Down Amount on each trading day during the applicable Pricing Period on which the daily volume weighted average price for the Company's common stock (the VWAP) equals or exceeds a floor price determined by the Company for such draw down (the Floor Price). If the VWAP falls below the applicable Floor Price on any trading day during the applicable Pricing Period, the Purchase Agreement provides that the Investor will not be required to purchase the pro rata portion of the applicable Draw Down Amount allocated to that trading day. The per share purchase price for the Shares subject to a Draw Down Notice shall be equal to 90.0% of the arithmetic average of the three lowest VWAPs that equal or exceed the applicable Floor Price during the applicable Pricing Period; provided, however, that if the VWAP does not equal or exceed the applicable Floor Price for at least three trading days during the applicable Pricing Period, then the per share purchase price shall be equal to 90.0% of the arithmetic average of all VWAPs that equal or exceed the applicable Floor Price during such Pricing Period. Each purchase pursuant to a draw down shall reduce, on a dollar-for-dollar basis, the Total Commitment under the Purchase Agreement.

The Company is prohibited from issuing a Draw Down Notice if (i) the amount requested in such Draw Down Notice exceeds the Maximum Draw Down Amount, (ii) the sale of Shares pursuant to such Draw Down Notice would cause the Company to issue or sell or the Investor to acquire or purchase an aggregate dollar value of Shares that would exceed the Total Commitment, or (iii) the sale of Shares pursuant to the Draw Down Notice would cause the Company to sell or the Investor to purchase an aggregate number of shares of the Company's common stock which would result in beneficial ownership by the Investor of more than 4.99% of the Company's common stock (as calculated pursuant to Section 13(d) of the Securities Exchange Act of 1934, as amended, and the rules and regulations thereunder). The Company cannot make more than one draw down in any Pricing Period and must allow 24 hours to elapse between the completion of the settlement of any one draw down and the commencement of a Pricing Period for any other draw down.

The Purchase Agreement contains customary representations, warranties and covenants by, among and for the benefit of the parties. The Purchase Agreement may be terminated at any time by the mutual written consent of the parties. Unless earlier terminated, the Purchase Agreement will terminate automatically on the earlier to occur of (i) the first day of the month next following the 24-month anniversary of the date on which the initial registration statement is declared effective by the Commission or (ii) the date on which the Investor purchases the Total Commitment worth of common stock under the Purchase Agreement. Under certain circumstances set forth in the Purchase Agreement, the Company and the Investor each may terminate the Purchase Agreement on one trading day prior written notice to the other.

The Company paid to the Investor a commitment fee for entering into the Purchase Agreement equal to \$150,000 (or 3.0% of the Total Commitment under the Purchase Agreement) in the form of 1,764,706 restricted shares of the Company's common stock, calculated at a price equal to \$0.085 per share, which was the closing price of our Common Stock on March 4, 2013. The Commitment shares were issued in March of 2013.

The Company also agreed to pay up to \$15,000 of reasonable attorneys' fees and expenses (exclusive of disbursements and out-of-pocket expenses) incurred by the Investor in connection with the preparation, negotiation, execution and delivery of the Purchase Agreement and related transaction documentation. Further, if the Company issues a Draw Down Notice and fails to deliver the shares to the Investor on the applicable settlement date, and such failure continues for 10 trading days, the Company agreed to pay the Investor, in addition to all other remedies available to the Investor under the Purchase Agreement, an amount in cash equal to 2.0% of the purchase price of such shares for each 30-day period the shares are not delivered, plus accrued interest.

The Purchase Agreement also provides for indemnification of the Investor and its affiliates in the event that the Investor incurs losses, liabilities, obligations, claims, contingencies, damages, costs and expenses related to a breach by the Company of any of its representations and warranties under the Purchase Agreement or the other related transaction documents or any action instituted against the Investor or its affiliates due to the transactions contemplated by the Purchase Agreement or other transaction documents, subject to certain limitations.

As of September 30, 2013, no shares have been purchased under this agreement. Subsequent to September 30, 2013, the Company did sell shares under this agreement. See Note 10 for further details.

Warrants

During the year ended December 31, 2011, the Company issued 200,000 warrants in relation to a stock sale. The warrants have a \$0.40 exercise price and a two-year life. The warrants expired on November 7, 2013.

During the year ended December 31, 2012, the Company issued 3,003,104 warrants in connection with the ASYM Purchase Agreement discussed in Note 6. The warrants are exercisable for a term of five years and at a strike price of \$0.01. These warrants expire in the third and fourth quarter of 2017.

As of December 31, 2012, there are 3,203,104 warrants outstanding at a weighted average exercise price of \$0.0344.

During the nine months ended September 30, 2013, the Company issued an additional 2,163,656 warrants in connection with the ASYM Purchase Agreement discussed in Note 6. The warrants are exercisable for a term of five years and at a strike price of \$0.01. These warrants expire in the first, second, and third quarter of 2018.

As of September 30, 2013, there are 5,366,760 warrants outstanding at a weighted average exercise price of \$0.0245. 200,000 of these warrants expired on November 7, 2013. All the remaining warrants have an exercise price of \$0.01.

8. Income Taxes

The Company follows ASC subtopic 740-10 (formerly Statement of Financial Accounting Standard No. 109, Accounting for Income Taxes) for recording the provision for income taxes. ASC 740-10 requires the use of the asset and liability method of accounting for income taxes. Under the asset and liability method, deferred tax assets and liabilities are computed based upon the difference between the financial statement and income tax basis of assets and liabilities using the enacted marginal tax rate applicable when the related asset or liability is expected to be realized or settled. Deferred income tax expenses or benefits are based on the changes in the asset or liability each period. If available evidence suggests that it is more likely than not that some portion or all of the deferred tax assets will not be realized, a valuation allowance is required to reduce the deferred tax assets to the amount that is more likely than not to be realized. Future changes in such valuation allowance are included in the provision for deferred income taxes in the period of change.

Deferred income taxes may arise from temporary differences resulting from income and expense items reported for financial accounting and tax purposes in different periods. Deferred taxes are classified as current or non-current, depending on the classification of assets and liabilities to which they relate. Deferred taxes arising from temporary differences that are not related to an asset or liability are classified as current or non-current depending on the periods in which the temporary differences are expected to reverse.

The Company's effective income tax rate is higher than would be expected if the federal statutory rate were applied to income before tax, primarily because of expenses deductible for financial reporting purposes that are not deductible for tax purposes. The Company's operations for the years ended December 31, 2012 and the nine months ended September 30, 2013 resulted in losses. Accordingly, no provisions for current income taxes have been reflected in the accompanying statements of operations.

As of December 31, 2012 and September 30, 2013, the Company has total net operating loss carry forwards of approximately \$11,500,000 which may or may not be used to reduce future income taxes payable. Current federal tax law limits the amount of loss available to offset against future taxable income when a substantial change in ownership occurs. Therefore, the amount of these losses available to offset future taxable income may be limited. A valuation allowance has been recorded to reduce the net benefit recorded in the financial statements related to this deferred asset to \$0. The valuation allowance is deemed necessary as a result of the uncertainty associated with the ultimate

realization of these deferred tax assets. Accordingly, no provisions for deferred income taxes have been reflected in the accompanying statements of operations.

9. Related Party Transactions

During the nine months ended September 30, 2013, the Company issued 4,101,844 shares to an officer. 3,768,844 were issued for conversion of \$75,000 in notes and accounts payable as discussed in Note 6 and 333,000 were issued that were owed for compensation from prior periods. During the nine months ended September 30, 2012, the Company issued 900,000 shares to officers and directors in lieu of executive compensation.

During the nine months ended September 30, 2013, the Company reimbursed an officer approximately \$8,967 in connection with travel, lodging and meals. During the nine months ended September 30, 2012, the Company reimbursed an officer \$10,996 for a residential lease and related utilities in Wichita, Kansas, which was being used as the corporate offices. The Company also reimbursed the officer approximately \$9,810 in connection with travel, lodging and meals.

As noted in Note 7, during the year December 31, 2012, the Company authorized the issuance of 767,500 shares of common stock for the conversion of \$239,469 of accounts payable balances. As of the September 30, 2013 and December 31, 2012, 84,500 shares were unissued. \$173,205 of the accounts payable converted was held by officers/directors of the Company. Subsequent to September 30, 2013, 50,000 of these shares were issued.

10. Subsequent Events

In preparing these financial statements, the Company has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued. The Company has determined that there were no events to record and the following events to disclose:

During October of 2013, the Company received \$11,151 in exchange for 450,000 shares of stock.

During October of 2013, the Company issued 700,000 shares of common stock in exchange for \$15,000 of accounts payable.

During October of 2013, the Company issued 50,000 shares shown as common stock to be issued as of September 30, 2013.

During October and November of 2013, \$22,500 of notes payable was converted into 4,500,000 shares of common stock.

During November of 2013, \$11,500 of notes payable was converted into 2,000,000 shares of common stock.

During November of 2013, Hanover Holdings loaned an additional \$50,000 to the Company.

Subsequent to September 30, 2013, ASYM granted an extension of the waiver of debt covenants for all periods prior to November 20, 2013 in return for \$25,000 waiver fee in the form of an additional tranche loan under the agreement.

Acquisition and Development Agreement:

During November of 2013, the Company executed definitive agreements for the acquisition and development of the Kansas Mississippi-Osage Project (the "Kansas Project"), a 15,000 acre Mississippi Lime package located in Rice and Reno Counties, Kansas (the "Agreement").

The expenditure commitment and obligation for the Kansas Project totals \$5.4 million to the benefit of the seller, which we expect to be fully paid after drilling approximately 10 wells. The acreage, if fully developed on a 640-acre unit basis, could potentially support the drilling of a minimum of 23 wells, however, we expect down spacing will increase the number of drilling locations upon development of the assets. The Company will earn its 80% working

interest on each 640-acre unit drilled, until it ultimately will have ownership of 15,000 gross, or 12,000 net acres. The play carries an overall 81.25% Net Revenue Interest (N.R.I.). The Company and the seller have structured a timely development of a new well every ninety (90) days, allowing sufficient time to drill, complete and evaluate the well prior to proceeding to the next planned location.

Under the terms of the Agreement, the Company will not be required to provide the seller any upfront funds, however, the Company will be obligated to drill a minimum of three (3) initial horizontal wells to earn its interest in each 640 acre parcel per well. The Company estimates that for the first ten (10) wells, the Agreement requires the Company to fund 100% of the drilling and completion costs including installation of storage tanks on horizontal Mississippi-Osage wells for the Company to earn its 80% Working Interest (W.I.). The Company is required to begin the permitting of the first well within thirty days (30) and has begun the process on the first location. The well must be spudded prior to March 15 2014; however the Company is endeavoring to begin the drilling of the first well as soon as development capital has been acquired. Each well is estimated to cost \$2.5 million to drill and complete.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion should be read in conjunction with our financial statements and notes thereto included elsewhere in this quarterly report. Forward-looking statements are statements not based on historical information and which relate to future operations, strategies, financial results, or other developments. Forward-looking statements are based upon estimates, forecasts, and assumptions that are inherently subject to significant business, economic, and competitive uncertainties and contingencies, many of which are beyond our control and many of which, with respect to future business decisions, are subject to change. These uncertainties and contingencies can affect actual results and could cause actual results to differ materially from those expressed in any forward-looking statements made by us, or on our behalf. We disclaim any obligation to update forward-looking statements.

Background

We are an oil and natural gas exploration and production (E&P) company with current projects in Rice and Reno Counties in Kansas and Payne and Lincoln Counties in Oklahoma. As of November 11, 2013, we have six producing wells in Oklahoma. We also have ownership of 1,410.7 net acres and rights for the exploration and production of oil and gas on an aggregate of approximately 4,733.8 gross acres in Oklahoma. This includes rights to explore on 1,847 gross acres in Oklahoma in the North Oklahoma Mississippi Project and in 2,886 gross acres in south-central Oklahoma (the South Oklahoma Project). We also have rights to develop 15,000 gross acres, 12,000 net acres in Kansas. In 2012, oil sales from our producing wells averaged 13.1 cumulative barrels per day.

Typically, our interest in a well arises from a contract with another entity pursuant to which we provide financial support for certain costs incurred in the exploration and development of a project, which may include land costs, seismic or other exploration, and test drilling. In exchange, we typically receive an interest in the proceeds from the project's production.

We were formed on January 24, 1996 pursuant to the laws of the State of Nevada under the name Wolf Exploration, Inc. In August 2001, we changed our name to American Petro-Hunter Inc. and began focusing our business on the exploration and eventual exploitation of oil and gas. The Company operates from its offices at 250 N Rock Rd., Suite 365 Wichita, KS.

Producing Properties

North Oklahoma Project (North Oklahoma Woodford Yale and North Oklahoma Mississippi Lime Projects) -On April 21, 2010, we entered into an operating agreement with Bay Petroleum Corp. (Bay) to participate in the drilling for oil in northern Oklahoma (the Prospect). Pursuant to such operating agreement, we agreed to pay to Bay \$52,125 for all costs in connection with the acquisition and operation of the Prospect, up to the drilling of an initial test well, in exchange for a 25% working interest and 80% net revenue interest in the Prospect. We are also responsible for 25% of all expenditures in connection with the development and operation of the Prospect for drilling.

On June 1, 2010, we announced that the No. 1 well had been put into production. The well produced 1,638 barrels in 2012 at an average of 4.4 barrels per day. The current daily rate is 5 barrels per day.

On June 29, 2011, we announced that NOS122, a re-entry project where the well bore and casing was opened and cleaned, had begun commercial production. Inaugural loads of oil began shipping in July of 2011. The well produced 888 barrels in 2012 at a rate of 2.43 barrels per day. On October 1, 2012 we announced the commencement of drilling of the NOS222 oil and gas well in Payne County, Oklahoma. The well is an offset to the NOS122. On October 15, 2012 we announced that the completion program was underway. It was determined, after the program was completed that the Skinner sand portion, the primary objective of the well, was the only viable commercial producer. Currently, the NOS 122 and 222 wells are co-mingled to one tank battery and produce a combined 3 barrels per day, and sell one 160 barrel load of oil every other month.

On March 25, 2011, we announced that we had acquired a varied working interest in an additional 2,000 acres located in Payne County in northern Oklahoma, near the Company's Yale Prospect. The project has been named North Oklahoma Mississippi Lime Project. On May 16, 2011, we announced that drilling operations had commenced at the Company's first horizontal well, NOM1H. The Company owns a 25% Working Interest in the lease. On June 29, 2011, we announced that NOM1H had begun commercial production. The well produced 5,199 barrels in 2012 at a rate of 14.2 barrels per day. The well is currently producing currently six barrels per day and 30 Mcf gas and has cumulatively produced 12,922 barrels of oil to October 30th, 2013.

On July 27, 2011 we announced the NOW2H, an 80 acre offset to NOM1H. On November 7, 2011, the well commenced commercial oil and gas production. On March 26, 2012, we announced that after undergoing a second frack and the installation of a submersible pump, the well was producing at a daily rate of 30 barrels per day. Since that time the well has drastically declined and produced a total of 888 barrels in 2012, and 5,837 Mcf of gas. The well is currently no longer economically viable, has had no sales since June of 2012, and would require re-drilling of the lateral and re-completion to return to commercial viability. There are no plans at this time to implement this program.

On January 9, 2012, we announced plans to drill a third horizontal well at the North Oklahoma Project, NOM3H, on the same section of land as our two previously completed wells, NOM1H and NOW2H. On February 6, 2012, we announced that we had drilled a total of 1,988 feet in the horizontal well segment penetrating into the 100 plus foot thick Mississippi pay zone. The NOM3H began commercial oil and gas production on March 7, 2012. The average daily rate of production during 2013 has been in the 10-20 barrels of oil per day range, and the well is currently producing 8 barrels per day with daily gas production in the 60 Mcf/day range. The well has cumulatively produced 11,131 barrels of oil to October 30th, 2013.

On July 18, 2011, we announced drilling plans for a total of eleven horizontal wells at the North Oklahoma Project. As of September 5, 2013, there are at least eight locations left to drill on the acreage in each of the Woodford Shale and Mississippi Lime that would be horizontal wells spaced on 180 acres. We previously announced a drilling schedule that involved drilling one horizontal well approximately every 90 days. However, based on estimated engineering expenses of \$3,200,000 for drilling and completion, we were unable to implement that drilling schedule. Our revised drilling schedule for 2013 is between one to three wells, depending upon available capital.

The operator of the Oklahoma projects has divested and sold out of all wells, leases and production to a new operator, who in turn prepared an offer to purchase all the Company's interests. This offer of \$400,000 represented what the new operator believed to represent fair market sale price, specifically to our decreased oil and gas production from our six Oklahoma wells, and the fact that the offer did not assign any value to our leases which are due to expire within 12 months. The Company rejected the offer.

South Oklahoma Project - On July 20, 2011, we announced the acquisition of a forty percent (40%) working interest in the South Oklahoma Project on 3,000 acres of land in south-central Oklahoma. Our engineers have identified five key areas which, if developed on 160 acre spacing, could allow future development of 18 additional locations for horizontal Mississippi lime and Woodford Shale oil and gas wells.

On April 2, 2012, we announced the spud of the first well on the South Oklahoma Project, designated SOM-1H. On July 10, 2012, the well began commercial production. As of March 1, 2013, the well had cumulatively produced 5,696 barrels of oil, with 4,618 barrels for the 2012 calendar year, and sales beginning in July 2012 at an average daily rate of 25.4 barrels per day. Current production has cumulatively produced 9,111 barrels of oil through October 30, 2013, at a daily rate of 13 barrels per day. Daily gas production is in the 35 Mcf/day range.

Osage Kansas Project - On October 28, 2013 we entered into a Participation Agreement (the Participation Agreement) with Warpaint Kansas LP (Warpaint) for an 80% working interest and an 81.25% net revenue interest in 15,000 acres, 12,000 net acres, of land in Kansas. We will be acting as the operator of the project and will be able to dictate the timeline for the lease development. Additionally, we plan to fund the majority of this and future developmental drilling transactions by establishing tax-advantaged direct investment oil and natural gas partnerships with the goal of raising up to \$20 million (the Partnerships). We believe that the development of our oil and natural gas properties through a syndicated drilling program business model would enable us to earn a fee-based revenue stream, while at the same time allowing us to continue as a working interest owner in each well.

We intend that the Partnerships will own 40% to 80% of our working interest, with the Company retaining any remaining working interest not provided to the Partnerships. By seeking direct, retail driven investment of working interest in the wells, we believe we may be able to fund development drilling programs without having to incur any

additional debt or issue equity.

Our geographical focus will initially be the Mid-continent (Arkansas, Kansas, Louisiana, New Mexico, Texas and Oklahoma) and may expand to include other known producing areas located in the U.S., with a focus on operated properties, such as the Osage Kansas Project. We have formed a wholly-owned subsidiary, APH Operating Inc., which will act as operator of the Osage Kansas Project as well as any future oil and natural gas development projects. In addition, we plan to form a wholly-owned subsidiary to act as managing general partner of the Partnerships.

Under the terms of the Participation Agreement, we will not be required to pay Warpaint any upfront funds, however, we will be obligated to drill a minimum of three (3) initial horizontal wells to earn our interest in each 640 acre parcel per well. We estimate that for the first ten (10) wells, the Participation Agreement requires us to fund 100% of the drilling and completion costs including installation of storage tanks on horizontal Mississippi-Osage wells for us to earn our 80% working interest. We are required to begin the permitting of the first well within thirty days (30) and have begun the process on the first location. The well must be spudded prior to March 15 2014, however, we are endeavoring to begin the drilling of the first well as soon as we can raise the necessary capital. Each well is estimated to cost \$2.5 million to drill and complete.

The expenditure commitment and obligation to Warpaint for the Osage Kansas Project totals in the aggregate \$5.4 million, which we expect to be fully paid after drilling approximately 10 wells. We believe the acreage, if fully developed on a 640-acre unit basis, could potentially support the drilling of a minimum of 23 wells, however, we expect down spacing will increase the number of drilling locations upon development of the assets. We will earn its 80% working interest on each 640-acre unit drilled. Subject to available capital, the Company and Warpaint have plans for development of a new well every ninety (90) days, allowing sufficient time to drill, complete and evaluate the well prior to proceeding to the next planned location.

Customers

Our crude oil production is sold to Sunoco in Oklahoma. We receive Oklahoma spot prices for our oil and sell our oil in minimum allotments of 160 barrels.

We have commercial sales of natural gas at our Oklahoma Project through our connection to nearby pipeline infrastructure. We sell natural gas through such pipeline to DCP Midstream, LP of Tulsa, Oklahoma and receive a premium to the NYMEX spot natural gas prices due to the higher BTU content of the gas produced.

Critical Accounting Policies

The preparation of financial statements in conformity with United States generally accepted accounting principles (U.S. GAAP) requires management of our Company to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods.

The discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with U.S. GAAP. We believe certain critical accounting policies affect our more significant judgments and estimates used in the preparation of the financial statements. A description of our critical accounting policies is set forth in our Annual Report on Form 10-K for the year ended December 31, 2012. As of, and for the three months ended September 30, 2013, there have been no material changes or updates to our critical accounting policies.

Results of Operations

The following discussion of the financial condition, results of operations, cash flows, and changes in our financial position should be read in conjunction with our audited consolidated financial statements and notes included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

The financial statements mentioned above have been prepared in conformity with U.S. GAAP and are stated in United States dollars.

Comparison of nine month periods ended September 30, 2013 and September 30, 2012

For the nine month periods ended September 30, 2013 and September 30, 2012, we incurred a comprehensive loss of \$2,221,157 and \$2,529,752, respectively. The decrease was largely attributed to a decrease in interest expense, offset by an increase in our net loss before other income resulting from an increase in impairment expense.

General and administration expenses for the nine month period ended September 30, 2013 amounted to \$429,600 compared to \$414,777 in the same period of 2012. Executive compensation for the nine month period ended September 30, 2013 was \$153,000 compared to \$430,000, in the same period of 2012.

For the nine month period ended September 30, 2013, we used net cash of \$298,348 in operations. Net cash used in operating activities decreased from \$396,540 in the nine month period ended September 30, 2012.

Comparison of three month periods ended September 30, 2013 and September 30, 2012

For the three month periods ended September 30, 2013 and September 30, 2012, we incurred a comprehensive loss of \$1,530,710 and \$1,592,517, respectively. The slight decrease was the result of an increase in net loss before other income resulting from an increase in impairment expense, offset by a decrease in interest expense.

General and administration expenses for the three month period ended September 30, 2013 amounted to \$143,577 compared to \$157,681 in the same period of 2012. Executive compensation for the three month period ended September 30, 2013 was \$51,000 compared to \$69,000, in the same period of 2012.

Liquidity and Capital Resources

As of September 30, 2013, we had cash of \$1,454 and working capital deficiency of \$1,033,603. During the three month period ended September 30, 2013, we funded our operations from revenue received, and proceeds of private sales of equity and notes. During the three month period ended September 30, 2013, we raised \$140,766 from proceeds from a note payable and \$0 from sales of our common stock and subsequent to September 30, 2013, as of November 13, 2013, we have raised \$75,000 from proceeds of notes payable and \$11,151 from sales of our common stock. We are currently seeking further financing and we believe that will provide sufficient working capital to fund our operations for at least the next six months. Changes in our operating plans, increased expenses, acquisitions, or other events, may cause us to seek additional equity or debt financing in the future. For the three months ended September 30, 2013, we used net cash of \$175,404 in operations.

On June 24, 2013, we announced that we had entered into a common stock purchase agreement dated as of the Closing Date (the "Purchase Agreement") with Hanover Holdings I, LLC, a New York limited liability company ("Hanover"). The Purchase Agreement provides that, upon the terms and subject to the conditions set forth therein including volume based share and price limitations, Hanover is committed to purchase up to \$5,000,000 (the "Total Commitment") worth of our common stock, \$0.001 par value (the "Shares"), over the 24-month term of the Purchase Agreement, beginning on the trading day following the date on which a registration statement covering the resale of the Shares by Hanover is declared effective. The per share purchase price for the shares shall be equal to 90.0% of the arithmetic average of the three lowest volume weighted average prices for our common stock during the applicable pricing period that equal or exceed an applicable floor price equal to the product of (i) 0.70 and (ii) the volume weighted average price for the Company's common stock over the 10 trading days immediately preceding the date the draw down notice is delivered. We previously paid to Hanover, in March 2013, a commitment fee for entering into the Purchase Agreement equal to \$150,000 (or 3.0% of the Total Commitment under the Purchase Agreement) in the form of 1,764,706 restricted shares of our common stock, calculated at a price equal to \$0.085 per share, which was the closing price of our Common Stock on March 4, 2013. In connection with the execution of the Purchase Agreement, we agreed to file an initial registration statement with the Commission to register an agreed upon number of Shares, which shall not exceed 1/3 of the number of shares of our common stock held by non-affiliates of the Company, which registration statement was filed on July 31, 2013 and declared effective as of September 4, 2013. As of November 8, 2013, Hanover had purchased an aggregate of \$11,151 of the Total Commitment.

On July 9, 2012, we announced that we entered into a three-year credit facility with ASYM Energy Partners LLC and its affiliates ("ASYM"), a private investment firm focused on the energy industry (the "Credit Facility"). The Credit Facility is secured by all of our assets. As of November 8, 2013 \$600,766 has been advanced under the ASYM Credit

Facility, including \$50,000 attributed to tranche loans in exchange for waivers by ASYM of the Company's noncompliance with certain covenants of the Credit Facility. We do not expect to receive additional funds from the ASYM Credit Facility at this time as we do not qualify under the agreement covenants.

The Company and ASYM agreed to modify the terms of the agreement with ASYM whereby eliminating the variable exercise price of each warrant grant due pursuant to the agreement to a fixed exercise price of \$0.01 applicable to both past and future warrant grants.

On April 25, 2013 and in August 2013, respectively, in exchange for the cancellation of existing indebtedness, the Company issued promissory notes in the principal amount of \$71,000 and \$65,000 to Magna Group, LLC (Magna) and promissory notes in the aggregate principal amount of \$83,300 to Hanover Holdings I, LLC (Hanover), respectively (collectively, the Exchange Notes). Each of the Exchange Notes is convertible into common stock of the Company at a fixed conversion price of \$0.008 per share. Additionally, on June 7, 2013, the Company issued to Hanover a convertible note in the principal amount of \$5,000, convertible at a fixed conversion price of \$0.008 per share (the June 2013 Note). On August 27, 2013, Magna loaned an additional \$25,000 to the Company.

Effective June 1, 2013, the Company issued a convertible promissory note in the amount of \$15,000 to an investor. The note bears interest at 10% and matures one year from date of loan. The loan balance is convertible at the lesser of \$0.01 or 25% discount to the average closing trading price during the five trading days prior to conversion.

On June 27, 2013, the Company borrowed \$25,000 pursuant to the convertible promissory note issued March 27, 2013 to JMJ Financial. The note bears no interest if repaid within ninety days and bears interest of 12% if not repaid within ninety days. The maturity date is one year from the date of the draw. The loan balance is convertible at the lesser of \$0.075 or 60% of the lowest trade price in the 25 trading days previous to the conversion. On September 27, 2013, the Company borrowed an additional \$25,000 under the note.

On August 7, 2013 we announced that the Company has executed a term sheet for the acquisition of a 15,000 acre land package located in the Mississippian Osage of central Kansas. The total purchase price is \$5,400,000. We currently have insufficient capital to make the total purchase price payment. We will need to secure additional debt or equity financing to pay such obligation, and there is no assurance that we will be able to raise the required capital on terms favorable to the Company, or that such capital will be available on any terms.

On September 28, 2013, we issued 3,768,844 shares of common stock of the Company to Robert B. McIntosh, the Company's sole officer and director, in consideration for the cancellation of an aggregate of approximately \$75,000 in indebtedness owed by the Company to Mr. McIntosh, based upon the closing price of \$0.0199 per share of our common stock.

During the nine months ended September 30, 2013, we raised \$312,266 from proceeds of notes payable and \$14,500 from sales of our common stock. We also earned \$107,943 in revenue during the nine months ended September 30, 2013 from our producing wells.

Our current cash requirements are significant due to planned exploration and development of current projects. We anticipate drilling four wells in 2014 which is estimated to cost \$10,000,000. Additionally, we have an aggregate of \$191,300 in outstanding short term borrowings. We will need to secure additional debt or equity financing to pay such obligations as they become due. Accordingly, we expect to continue to use debt and equity financing to fund operations for the next twelve months, as we look to expand our asset base and fund exploration and development of our properties.

Our management believes that we will be able to generate sufficient revenue or raise sufficient amounts of working capital through debt or equity offerings, as may be required to meet our short-term and long-term obligations. In order to execute our business strategy, we will require additional working capital, commensurate with the operational needs of our planned drilling projects and obligations. Such working capital will most likely be obtained through equity or debt financings until such time as acquired operations are integrated and producing revenue in excess of operating expenses. There are no assurances that we will be able to raise the required working capital on terms favorable, or that such working capital will be available on any terms when needed. If we are unable to raise the required working capital we will be unable to satisfy our short term borrowing obligations as they become due.

Off-Balance Sheet Arrangements

There are no off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Not applicable.

Item 4. Controls and Procedures.

Our management with the participation and under the supervision of our Principal Executive Officer and Principal Financial Officer reviewed and evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined by Rule 13a-15(e) or 15d-15(e)) of the Exchange Act Rule 13a-15 as of the end of the period covered by this report. Based upon that evaluation, our Principal Executive Officer and Principal Financial Officer concluded that, as of the end of such period, our disclosure controls and procedures are not effective as of September 30, 2013 in ensuring that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. This conclusion is based on findings that constituted material weaknesses. A material weakness is a deficiency, or a combination of control deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the Company's interim financial statements will not be prevented or detected on a timely basis.

Management's Report on Internal Control Over Financial Reporting

In performing the above-referenced assessment, our management identified the following material weaknesses:

- i) We have not achieved the optimal level of segregation of duties relative to key financial reporting functions.
- ii) We have insufficient quantity of dedicated resources and experienced personnel involved in reviewing and designing internal controls. As a result, a material misstatement of the interim and annual financial statements could occur and not be prevented or detected on a timely basis.
- iii) We did not perform an entity level risk assessment to evaluate the implication of relevant risks on financial reporting, including the impact of potential fraud related risks and the risks related to non-routine transactions, if any, on our internal control over financial reporting. Lack of an entity-level risk assessment constituted an internal control design deficiency which resulted in more than a remote likelihood that a material error would not have been prevented or detected, and constituted a material weakness.
- iv) We did not have an audit committee or an independent audit committee financial expert. While not being legally obligated to have an audit committee or independent audit committee financial expert, it is the management's view that to have an audit committee, comprised of independent board members, and an independent audit committee financial expert is an important entity-level control over our financial statements.

We are currently reviewing our disclosure controls and procedures related to these material weaknesses and expect to implement changes as our financial situation allows, including identifying specific areas within our governance, accounting and financial reporting processes to add adequate resources and personnel to potentially mitigate these material weaknesses.

Our present management will continue to monitor and evaluate the effectiveness of our internal controls and procedures and our internal controls over financial reporting on an ongoing basis and are committed to taking further action and implementing additional enhancements or improvements, as necessary and as funds allow.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

There were no changes in our internal controls over financial reporting that occurred during the quarterly period ended September 30, 2013 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, we may become involved in various lawsuits and legal proceedings which arise in the ordinary course of business. However, litigation is subject to inherent uncertainties and an adverse result in these or other matters may arise from time to time that may harm our business. To the best knowledge of management, there are no material legal proceedings pending against the Company.

Item 1A. Risk Factors.

None.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Pursuant to the Credit Facility with ASYM, in July of 2013, the Company received an additional tranche in the amount of \$60,766 and the Company granted the issuance of two warrants to purchase 1,791,965 and 367,029 shares of common stock, respectively in connection with the funding advances. The warrants were valued at \$21,590.

In August 2013, in exchange for the cancellation of existing indebtedness, the Company issued a convertible promissory note in the principal amount of \$65,000 to Magna and a convertible promissory note in the aggregate principal amount of \$31,800 to Hanover. Each of the Exchange Notes is convertible into common stock of the Company at a fixed conversion price of \$0.008 per share.

In September of 2013, the Company issued 1,500,000 shares of common stock to Magna upon the conversion of \$7,500 of Exchange Notes. Subsequent to September 30, 2013, an additional \$22,500 of Exchange Notes has been converted into 4,500,000 shares of common stock.

In September of 2013, JMJ Financial converted \$18,000 of promissory notes into 3,000,000 shares of common stock. Subsequent to September 30, 2013, an additional \$11,500 of promissory notes was converted into 2,000,000 shares of common stock.

Subsequent to September 30, 2013, in October of 2013, the Company sold 450,000 shares of common stock to an investor for \$11,151.

Subsequent to September 30, 2013, in October of 2013, the Company issued 700,000 shares of common stock in exchange for \$15,000 of accounts payable.

These issuances were made in reliance upon Rule 506 of Regulation D of the Securities Act, and comparable exemptions for sales to "accredited" investors under state securities laws.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information.

On October 28, 2013 we entered into the Participation Agreement with Warpaint for an 80% working interest and an 81.25% net revenue interest in 15,000 acres, 12,000 net acres, of land in Kansas. Under the terms of the Participation Agreement, we will not be required to pay Warpaint any upfront funds, however, we will be obligated to drill a minimum of three (3) initial horizontal wells to earn our interest in each 640 acre parcel per well. We estimate that for the first ten (10) wells, the Participation Agreement requires us to fund 100% of the drilling and completion costs including installation of storage tanks on horizontal Mississippi-Osage wells for us to earn our 80% working interest. We are required to begin the permitting of the first well within thirty days (30) and have begun the process on the first location. The well must be spudded prior to March 15 2014, however, we are endeavoring to begin the drilling of the first well as soon as we can raise the necessary capital. Each well is estimated to cost \$2.5 million to drill and complete.

The expenditure commitment and obligation to Warpaint for the Osage Kansas Project totals in the aggregate \$5.4 million, which we expect to be fully paid after drilling approximately 10 wells. We will earn its 80% working interest on each 640-acre unit drilled. Subject to available capital, the Company and Warpaint have plans for development of a new well every ninety (90) days, allowing sufficient time to drill, complete and evaluate the well prior to proceeding to the next planned location.
