UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

Form 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2010.

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period from \_\_\_\_\_ to \_\_\_\_\_ .  
Commission file number 000-24821

eBay Inc.  
(Exact name of registrant as specified in its charter)

Delaware 77-0430924  
(State or other jurisdiction of (I.R.S. Employer  
incorporation or organization) Identification Number)

2145 Hamilton Avenue 95125  
San Jose, California  
(Address of principal (Zip Code)  
executive offices)

Registrant's telephone number, including area code:  
(408) 376-7400

Securities registered pursuant to Section 12(b) of the Securities Exchange Act of 1934:  
Title of each class Name of exchange on which registered  
Common stock The Nasdaq Global Select Market  
Securities registered pursuant to Section 12(g) of the Securities Exchange Act of 1934:  
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.  
Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes  No

Edgar Filing: EBAY INC - Form 10-K

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer

Non-accelerated filer  (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  
Yes  No

As of June 30, 2010, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$22,654,368,412 based on the closing sale price as reported on The Nasdaq Global Select Market.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date.

Class	Outstanding as of January 27, 2011
Common Stock, \$0.001 par value per share	1,298,369,992 shares

**DOCUMENTS INCORPORATED BY REFERENCE**

Part III incorporates information by reference from the definitive proxy statement for the registrant's Annual Meeting of Stockholders to be held on or about April 28, 2011.

### FORWARD LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including statements that involve expectations, plans or intentions (such as those relating to future business or financial results, new features or services, or management strategies). You can identify these forward-looking statements by words such as “may,” “will,” “would,” “should,” “could,” “expect,” “anticipate,” “believe,” “estimate,” “intend,” “plan” and other similar expressions. These forward-looking statements involve risks and uncertainties that could cause our actual results to differ materially from those expressed or implied in our forward-looking statements. Such risks and uncertainties include, among others, those discussed in “Item 1A: Risk Factors” of this Annual Report on Form 10-K, as well as in our consolidated financial statements, related notes, and the other financial information appearing elsewhere in this report and our other filings with the Securities and Exchange Commission, or the SEC. We do not intend, and undertake no obligation, to update any of our forward-looking statements after the date of this report to reflect actual results or future events or circumstances. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

### ITEM 1: BUSINESS

#### Overview

eBay Inc. was formed as a sole proprietorship in September 1995 and was incorporated in California in May 1996. In April 1998, we reincorporated in Delaware, and in September 1998, we completed the initial public offering of our common stock. Our principal executive offices are located at 2145 Hamilton Avenue, San Jose, California 95125, and our telephone number is (408) 376-7400. When we refer to “we,” “our,” “us” or “eBay” in this Annual Report on Form 10-K, we mean the current Delaware corporation (eBay Inc.) and its California predecessor, as well as all of its consolidated subsidiaries. When we refer to “eBay.com,” we mean the online marketplace located at [www.ebay.com](http://www.ebay.com) and its localized counterparts. When we refer to “PayPal,” we mean the online payments platform located at [www.paypal.com](http://www.paypal.com) and its localized counterparts. When we refer to “Skype,” we mean the Internet communications offerings provided by Skype Technologies S.A., which we sold in November 2009.

Our purpose is to pioneer new communities around the world built on commerce, sustained by trust and inspired by opportunity. We bring together millions of buyers and sellers every day on a local, national and international basis through an array of websites. We provide online marketplaces for the sale of goods and services as well as other online commerce, or ecommerce, platforms and online payment solutions to a diverse community of individuals and businesses.

We have two business segments: Marketplaces and Payments. Our Marketplaces segment provides the infrastructure to enable global online commerce on a variety of platforms, including the eBay.com platform and our other online platforms, such as our online classifieds businesses, our secondary tickets marketplace (StubHub), our online shopping comparison website (Shopping.com), our apartment listing service platform (Rent.com) and our fixed price media marketplace (Half.com). Our Payments segment consists of our online payment solutions PayPal and Bill Me Later. Historically, we also had a Communications segment that consisted of Skype Technologies S.A. (“Skype”). On November 19, 2009, we sold Skype to an investor group for cash, a subordinated note and an equity stake in the outstanding capital stock of the Skype successor entity (now approximately 30%).

We generate two types of net revenues: (1) net transaction revenues and (2) marketing services and other revenues. Our net transaction revenues are derived principally from listing fees and final value fees (which are fees payable on transactions completed on our Marketplaces trading platforms), fees paid by merchants for payment processing services and, until the sale of Skype on November 19, 2009, fees charged to users to connect Skype’s Internet communications products to traditional fixed-line and mobile telephones. Our marketing services revenues are derived principally from the sale of advertisements, revenue sharing arrangements, classifieds fees and lead referral fees. Our other revenues are derived principally from interest earned on certain PayPal customer account balances, interest and fees earned on the Bill Me Later portfolio of receivables from loans and from contractual arrangements with third parties that provide services to our users.

	Year Ended December 31,			Percent Change 2008 to 2009	Percent Change 2009 to 2010	
	2008	2009	2010			
(In thousands, except percentage changes)

#### Marketplaces

Our Marketplaces segment consists of ecommerce platforms that enable a global community of buyers and sellers to interact and trade with one another. Our goal is to create, maintain and expand the functionality, safety, ease-of-use and reliability of our ecommerce platforms while supporting the growth and success of our community of users.

#### Marketplaces Value Proposition

We seek to attract buyers and sellers to our community by offering:

##### Buyers

- Trust
- Value
- Selection
- Convenience

##### Sellers

- Access to broad global markets
- Efficient marketing and distribution
- Opportunity to increase sales
- Ability to process buyer payments efficiently and economically

We believe our Marketplaces platforms make inefficient markets more efficient because:

- our global community of users can more easily and inexpensively communicate, exchange information and complete transactions;
- our Marketplaces platforms make available to our users a wide variety and selection of goods; and
- we bring buyers and sellers together in a more cost-effective manner than many traditional intermediaries and available alternatives.

We seek to create a global platform that provides individuals and businesses of all types and sizes with access to broad markets. We have aggregated a significant number of buyers, sellers and items listed for sale, which in turn has resulted in a vibrant online commerce environment. Our buyers enjoy an extensive selection of goods and services. Key components of our community philosophy are maintaining honest and open marketplaces and treating individual users with respect. We seek to maintain the satisfaction and loyalty of our buyers and sellers by offering a variety of community and support features, such as announcement and bulletin boards, customer support boards and personal pages, as well as other topical and category-specific information exchanges.

Generally, we believe our Marketplaces platforms are more effective, relative to most available alternatives, at addressing markets of scarce new goods, new items that are no longer in-season, end-of-life products and used and vintage items. Our highest growth rates in gross merchandise volume (GMV) and sold items in recent periods have been in our fixed-price listing format, primarily for new items that are no longer in-season. We define GMV as the total value of all successfully closed items between users on eBay Marketplaces trading platforms during the period, regardless of whether the buyer and

seller actually consummated the transaction (excluding eBay's classifieds websites, Rent.com and Shopping.com). We offer our buyers additional ways to get access to discounted or value-priced products, including through our "Daily Deal" program, where we offer multiple deeply discounted deals from sellers every day, and our "Fashion Vault" program, which offers limited-time, online sales of brand-new designer fashions and accessories. Through our eBay Bucks rewards program, all buyers in the U.S. have the ability to earn eBay Bucks on qualifying purchases made on eBay.com. Upon the completion of each calendar quarter, participating buyers are issued eBay Bucks certificates for their qualifying purchases during that quarter, which are redeemable for a limited period from issuance for future purchases on eBay. The breadth of our community of active users has contributed significantly to our historical success. We had approximately 94.5 million active users at the end of 2010, compared to approximately 90.1 million at the end of 2009. We define an active user as any user who has bid on, bought or listed an item during the preceding 12-month period.

#### Marketplaces Platforms Overview

Our Marketplaces platforms seek to bring buyers and sellers together through fully automated and easy-to-use online websites that are generally available throughout the world at any time. The platforms include software tools and services, some available at no charge and others for a fee, that are intended to allow buyers and sellers to trade with one another easily and efficiently. The Marketplaces platforms consist of our core online commerce platform, eBay.com and its localized counterparts, and adjacent platforms consisting of our classifieds websites, as well as StubHub, Shopping.com, Half.com and Rent.com. Our Marketplaces platforms earn revenue from listing, feature, final value and subscription fees paid by sellers, lead referral fees, transaction fees, revenue sharing arrangements and advertising fees, as the case may be.

#### eBay.com Platform

Our Marketplaces core platform, eBay.com, includes our fixed-price format and our auction-style format and has localized websites in 38 countries, including those markets in which we have partners or a minority ownership interest. In 2010, our fixed-price listing format accounted for approximately 60% of our GMV, and our auction-style format accounted for the remaining 40% of GMV.

#### Fixed-Price Listing Format

Our fixed-price format allows buyers and sellers to close transactions in the way most shopping occurs: at a pre-determined price. In this format, sellers can indicate they have multiple items available, including variations of certain items in applicable categories, such as sizes and colors for clothing, shoes and accessories. Also, sellers are able to signal that they would be willing to close the transaction at a lower price than advertised through the "Best Offer" feature. Our Half.com subsidiary also provides a fixed-price online commerce platform that allows people to buy and sell new and previously owned books, movies, music and video games at discounted prices.

In addition, eBay Stores enables sellers to exhibit all of their listings in one place on our eBay platforms and to describe their respective businesses through customized pages. eBay Stores also provides sellers with tools to build, manage, promote and track their businesses.

#### Auction-Style Listing Format

Our auction-style format allows a seller to select a minimum price for opening bids. Additional options and features to auction listings include the ability to set a Reserve Price, which is the minimum price at which a seller is willing to sell the item, and Buy It Now, which gives a buyer the opportunity to end the auction early by purchasing the item at a pre-determined price specified by the seller. The duration of auctions ranges from one day to 10 days.

#### Key Services for Buyers and Sellers

We have developed a number of features on our platforms in the areas of Trust and Safety (including our Feedback Forum, SafeHarbor Program and Verified Rights Owner Program), Customer Support and Value-Added Tools and Services, as well as Loyalty Programs (for both buyers and sellers). These features are designed to make users more comfortable dealing with unknown trading partners and completing commercial transactions on the Internet, as well as rewarding our top buyers and sellers for their loyalty.

**Feedback Forum:** Our Feedback Forum encourages users to provide feedback ratings and comments on other users with whom they trade. Users' profiles, which include these feedback ratings and comments, can be viewed by any of our other users. Every registered user has a feedback profile that may contain compliments, criticisms and/or other

comments by users who have conducted business with that user. The Feedback Forum requires feedback to be related to specific transactions and provides an easy tool for users to match specific transactions with the user names of their trading partners. This information is recorded in a profile that includes a feedback rating for the user, with feedback sorted according to whether the feedback has been provided over the past month, six months or 12 months. Users who develop positive reputations have color-coded star symbols displayed next to their user names to indicate the number of positive feedback ratings they have received. In addition to leaving an overall feedback rating (positive, neutral or negative) for a seller, buyers also can leave anonymous Detailed Seller Ratings (DSRs) on four key attributes: accuracy of the item description, communication, shipping time and shipping and

handling charges. The Feedback Forum has several automated features designed to detect and prevent certain forms of abuse, such as a user leaving positive feedback about themselves through multiple accounts.

**SafeHarbor Program:** We also offer the SafeHarbor program, which provides guidelines for trading and user dispute resolution. Our SafeHarbor staff investigates users' complaints of possible misuse of eBay platforms and takes appropriate action, including issuing warnings to users, ending and removing listings, or suspending users from bidding on or listing items for sale.

**Verified Rights Owner (VeRO) Program:** Our VeRO Program lets intellectual property rights owners request the removal of listings that offer items or contain materials that they claim infringe on their rights. This program helps to protect community members from purchasing items that may be counterfeit or otherwise unauthorized.

**Customer Support:** We devote significant resources to providing personalized, accurate and timely support services to our community of users. Buyers and sellers can contact us through a variety of means, including email, online text chat and telephone. We continue to focus our resources on improving our accessibility, increasing our capacity, expanding our category-specific support, extending our online self-help features and improving our systems and processes to allow us to provide more efficient and effective support. In addition, top eBay customers receive prioritized customer support.

**Value-Added Tools and Services:** eBay users have access to a variety of "pre-trade" and "post-trade" tools and services to enhance their user experience and to make trading faster, easier and safer for them. "Pre-trade" tools and services are intended to simplify the listing process. "Post-trade" tools and services are designed to make transactions easier and more convenient to complete. These tools and services may not be available in all international markets.

Some of these tools and services include:

- Turbo Lister, Simple Lister, eBay Blackthorne, ProStores, Selling Manager and Selling Manager Pro, each of which helps to automate the selling process;
- Shipping Calculator, which makes it easier for buyers and sellers to calculate shipping costs;
- Shipping Labels, which allows sellers to print certain postage and labels;
- Listing Analytics, which helps sellers gain insight into the visibility, clicks and sales their listings are getting;
- eBay verified third party applications, which are designed to help sellers manage listings, track finances and research seasonal trends and prices;
- PayPal, which facilitates the online payment of funds; and
- Bill Me Later, which provides our U.S. buyers with consumer credit at the point of sale through Bill Me Later's relationship with a bank.

We currently provide these services directly or through contractual arrangements with third parties.

**PowerSeller program:** PowerSellers are eBay sellers who have consistently sustained a high volume of monthly sales and who have a high level of positive feedback and consistently high DSRs. Members of the PowerSeller program are eligible for special benefits, which currently include pricing discounts, prioritized customer support, promotional offers, eBay promotional merchandise, advanced selling education, opportunities to participate in research and other special rewards. We regularly evaluate our program and benefits currently offered through the program are subject to change.

**eBay Top-Rated Seller program:** In 2009, we introduced our eBay Top-Rated Seller (eTRS) program in some of our larger markets. To qualify for the eTRS program, PowerSellers must receive consistently high customer satisfaction ratings, as measured by consistently high DSRs on shipping, service and item descriptions, and meet certain sales volume criteria. Members of the eTRS program qualify for the same benefits as the PowerSeller program, as well as a prominent badge in search results, higher discounts and increased search exposure.

**Top Buyer program:** Our top buyers benefit from having a special phone number to call if they have an unsatisfactory user experience in connection with a transaction on our websites. From time to time, we also offer special coupon initiatives to top buyers.

**Coupons and Buyer Rewards:** Coupons were given to targeted buyers during 2009 and 2010 to help drive our GMV growth. During 2010, we made our buyer rewards program in the U.S., which we refer to as "eBay Bucks," available to all U.S. buyers. Through our eBay Bucks rewards program, all buyers in the U.S. have the ability to earn eBay Bucks on qualifying purchases made on eBay.com. Upon the completion of each calendar quarter, participating buyers are

issued eBay Bucks certificates for their qualifying purchases during that quarter, which are redeemable for a limited period from issuance for future purchases on eBay.

eBay Buyer Protection: eBay Buyer Protection covers items purchased on our sites in the U.S., U.K. and Germany through an eligible payment method and protects most buyers with respect to items that are not received or not as described in

4

---

the listing. Some purchases are not covered, including prohibited or restricted items, most vehicles, real estate and purchases made on classified listings on eBay.com. eBay Buyer Protection provides coverage for the purchase price of the item, plus original shipping costs, for a limited time period from the date of the transaction, and includes a new, streamlined online interface to help buyers and sellers navigate their way through the process.

#### Adjacent Marketplaces Platforms and Services

##### StubHub

StubHub is a leading ticket marketplace, enabling fans to buy and sell tickets to a large selection of sports, concert, theater and other live entertainment events. StubHub's online marketplace, dedicated solely to tickets, provides fans the choice to buy or sell their tickets in a safe, convenient and reliable environment. StubHub's partners include the New York Yankees, Washington Redskins and the University of Southern California, along with a total of nearly 60 other teams in the NFL, MLB, NBA, NHL and NCAA, as well as companies such as ESPN and AOL.

##### Classifieds Websites

Our classifieds websites are available in over 1,000 cities around the world and are primarily designed to help people trade on a local level. Our classifieds websites include Den Blå Avis, BilBasen, eBay Classifieds (including eBay Anuncios, eBay Kleinanzeigen and eBay Annunci), Gumtree, Kijiji, LoQUo, Marktplaats.nl and mobile.de. Our classified websites generate revenue primarily through advertising. In addition, we have a noncontrolling equity investment in craigslist, Inc., which operates the craigslist classifieds websites around the world.

##### Online Advertising and Other Services

We work with strategic partners to provide a variety of services designed to enable our buyers to find great deals and connect with sellers.

##### Shopping.com

Shopping.com is a comparison shopping destination featuring products from thousands of merchants across the Internet. Shopping.com offers one of the largest product catalogs on the Internet — searchable by thousands of attributes — along with consumer product reviews through Epinions.com, which helps users make informed buying decisions. Shopping.com's revenue is derived primarily from retailers who pay a fee for users directed to their sites by Shopping.com. In addition, Shopping.com generates revenue through advertising.

##### Rent.com

Rent.com is a leading U.S. listing website in the rental housing industry. The website is designed to bring apartment seekers and landlords together in an efficient manner. Landlords pay a fee to Rent.com for renters who indicate that they have found their apartments through Rent.com.

##### Half.com

Half.com is a fixed-price marketplace for new and used books, textbooks, music, movies, video games and video game consoles.

##### Mobile Website and Applications

We have recently developed several mobile applications, or apps, for a variety of mobile platforms that allow users to access a number of our Marketplace platforms. These include a core eBay application for the iPhone, iPad and Android phones, as well as iPhone apps for our classifieds websites, StubHub, Half.com, Fashion and Daily Deals. We also maintain a mobile version of our eBay.com website for use with internet-enabled phones.

##### Marketplaces Growth Strategy

eBay strives to offer a wide variety of inventory ranging from new in-season through end-of-life products from different types of sellers in a broad variety of categories with a favorable buyer experience and a choice between fixed price and auction-style listing formats, all in one place.

Our growth strategy is focused on investing in our customers by improving the user experience and seller economics by enhancing our products and services, improving trust and safety and customer support, extending our product offerings into new formats, categories and geographies, and implementing innovative pricing and buyer retention strategies. Over the course of 2010, we continued to make significant changes that were designed to improve the user experience on our sites, including changes to pricing and shipping policies. In addition, we continued to make progress on creating a faster and more streamlined search experience with a greater focus on relevance when sorting search results. We have made pricing changes to reduce the upfront cost of listing fixed-price items on eBay so that

fees are now based more on the successful sale of items, for both smaller and larger sellers. We encourage sellers to offer free or inexpensive shipping to our buyers by promoting their listings through our “Best Match” search algorithm.

5

---

Another element of our growth strategy is to build our adjacent Marketplaces businesses, such as our classified platforms and StubHub, which offer new formats and monetization models, as well as opportunities for growth beyond our core eBay.com platform. We continually look for opportunities to integrate our adjacent business listings into our core site to offer our buyers and sellers additional ways to get connected and conduct ecommerce. For example, in the U.S., buyers now have the ability to initiate a StubHub ticket listing search from our core eBay.com site, while in some of our European markets, users can search for Auction, Fixed Price and off-platform Classifieds listings from within localized versions of our core eBay.com site.

We will continue to work toward our goal of creating the world's leading ecommerce franchise by investing in our core Marketplaces segment and continuing to build our adjacent Marketplaces businesses. We believe that, if successful, we will increase the number of items sold on our sites.

#### Payments

Our payments segment is comprised of two online payment brands — PayPal (which enables individuals and businesses to securely, easily and quickly send and receive payments online in approximately 190 markets worldwide) and Bill Me Later (which we acquired in November 2008, and which enables U.S. merchants to offer, and U.S. consumers to obtain, credit at the point of sale for ecommerce transactions through Bill Me Later's relationship with a chartered financial institution). Our payment networks build upon the existing global financial infrastructure to create a global, real-time payment solution.

#### Payments Value Proposition

We believe our payment solutions make online commerce more efficient compared to traditional payment alternatives such as checks, money orders and credit cards via merchant accounts. Some of these traditional payment alternatives present various obstacles to the online commerce experience, including lengthy processing time, online fraud concerns, inconvenience and higher costs. Providing a more efficient and effective payment alternative for users is essential to creating a faster, easier and safer online commerce experience. Our online payment solutions allow customers to send and receive funds securely, easily and quickly and facilitate online credit for merchants and consumers.

#### Buyer Value Proposition

PayPal enables buyers to pay merchants quickly and easily without sharing sensitive financial information (such as credit card or debit card numbers) or providing their name and address information. To make payments using PayPal, buyers need to disclose only their email addresses to recipients. Buyers also benefit from PayPal's Buyer Protection Program, which, subject to specified limitations, reimburses buyers using PayPal with respect to qualified purchases on or off eBay.com in certain key geographies if the buyer does not receive the item or, in limited markets, if the item is significantly not as described. The Bill Me Later service allows qualifying U.S. buyers to obtain a revolving line of credit from a third party lender at the point of sale. When using Bill Me Later, buyers need to provide only their name, address, birth date and the last four digits of their social security number. U.S. buyers may also be offered an opportunity to defer payments for purchases made using Bill Me Later; under some promotional arrangements offered on select merchant sites, interest on such payments can be deferred for as long as six months. We believe that many buyers wary of disclosing financial information online find the limited amount of information they are required to provide using PayPal and Bill Me Later attractive.

#### Seller Value Proposition

PayPal offers online merchants an all-in-one payment processing solution that is generally less expensive than most credit card merchant accounts, offers industry-leading fraud prevention and streamlines the checkout experience for users of approximately 94.4 million active registered accounts in approximately 190 markets as of December 31, 2010. Active registered accounts are defined as registered accounts that successfully sent or received at least one payment or payment reversal through the PayPal system (or Bill Me Later accounts that are currently able to transact and that have received a statement) within the last 12 months. Users of active registered accounts may engage in cross-border shopping, which may help merchants to increase sales volume by allowing them to sell to a global base of buyers. Because PayPal already connects to more than 15,000 financial institutions or bank partners around the world, buyers can use their local payment method of choice, no matter where the seller is located. In addition, PayPal offers a payment gateway service that provides merchants that already have a payment card merchant account with a

secure connection from their online store to their internet merchant account and processing network.

A merchant can typically open a PayPal account and begin accepting PayPal and other payment card payments within a few minutes. Most merchants are approved instantly for a PayPal account and do not need to provide a personal guarantee, acquire specialized hardware, prepare an application or contact a payment gateway. PayPal can reduce or eliminate the need for merchants to receive and store sensitive customer financial information. Furthermore, PayPal charges lower transaction fees than most U.S. merchant accounts, and charges no setup fees and few or no recurring monthly fees.

The account-based nature of PayPal's network helps us to better detect and prevent fraud when funds enter, flow through and exit the PayPal network. Sellers can also reduce the risk of transaction losses resulting from unauthorized credit, debit and other payment card use and fraudulent chargebacks if they comply with PayPal's Seller Protection Policy.

Various credit arrangements are available to buyers using Bill Me Later at the point of sale for certain U.S. merchants through the issuing bank of the Bill Me Later credit products. In the fall of 2009, we made Bill Me Later available as a payment option to approved U.S. PayPal customers and began to offer Bill Me Later as a payment method on eBay.com in the U.S. In 2010, Bill Me Later became increasingly available as a payment method on eBay.com in the U.S.

#### PayPal Overview

##### Joining PayPal

PayPal offers three types of accounts: Personal, Business and Premier. A new account holder typically opens an account to send money for an eBay purchase or a purchase on another website, a payment for services rendered, or a payment to an individual in lieu of cash or check. Allowing new account holders to join the network when they make or receive payments encourages PayPal's natural, user-driven growth. PayPal's account sign-up process asks each new account holder to provide PayPal with his or her name, street address, phone number and email address. The account holder's email address serves as the unique account identifier. PayPal also offers certain customers who sell on their own websites the ability to accept credit, debit or other payment card payments from buyers without requiring the buyer to open a PayPal account.

##### PayPal Transaction Overview

Buyers make payments at the PayPal website, at the eBay.com website, or at the websites of merchants that have integrated PayPal's Website Payments or Express Checkout features. Buyers can also make payments via PayPal from their mobile device by accessing the Internet directly through their mobile device browser or by using PayPal's, eBay's or other developers' mobile applications. To make a payment at PayPal's website, a buyer logs in to his or her account and enters the recipient's email address and the amount of the payment. To make a payment through eBay.com or merchant websites, a buyer selects an item for purchase, chooses PayPal for payment and enters his or her email address and password to authorize the payment. The buyer chooses whether PayPal debits the money from the buyer's PayPal balance, credit, debit or other payment card, Bill Me Later account (in the U.S.), or bank account, and the payment is then credited to the recipient's PayPal account balance. For some bank account payments (which we call eCheck payments), the transaction is held until the funds have cleared the sender's bank, which typically takes three to five business days. Once the payment is completed, the recipient can make payments to others or withdraw his or her funds at any time via check (in the U.S. and eight other countries), electronic funds transfer, a PayPal-branded debit card (available only to U.S. users), a prepaid card (in the U.K. and Italy), or through a credit to a recipient's credit card account (in limited markets).

PayPal earns revenues in several ways:

- PayPal earns transaction fees when a Business or Premier account receives a payment or, in certain qualified transactions, when a sender elects to pay the fee in lieu of the recipient;
- PayPal earns a foreign exchange fee when an account holder converts a balance from one currency to another;
- PayPal earns fees from merchants who utilize PayPal's Pro direct payment card processing services or Payflow gateway processing services;
- PayPal earns fees when a user receives payments from outside the user's country of residence;
- PayPal may earn fees when a user withdraws money to certain bank accounts, depending on the market and the amount of the withdrawal;
- PayPal earns a return on certain customer balances; and
- Ancillary revenues are earned from related financial products.

PayPal incurs funding costs on payments at varying levels depending on the source of the payment. Funding costs associated with credit card and debit card funded payments are significantly higher than bank account, Bill Me Later, or PayPal balance-funded payments. U.S. account holders who choose to maintain PayPal balances in U.S. dollars have the ability to sweep balances into the PayPal Money Market Fund. The PayPal Money Market Fund, which is invested in a portfolio managed by BlackRock Fund Advisors, bore a current compound annual yield of 0.12% as of December 31, 2010.

##### Verification of Account Holders

To fund payments from their bank accounts in the U.S., account holders must first become verified by PayPal. The primary method for verification is our patented Random Deposit technique. Under this technique, PayPal makes two deposits ranging from 1 cent to 99 cents to the account holder's bank account. To verify ownership of the account, the account holder then enters the two amounts as a four-digit code at the PayPal website. We also automatically verify select accounts when certain other proprietary conditions have been met. In addition to allowing funding through bank accounts, verification also removes some spending limits on account holders' accounts and may enhance their credibility when transacting with other members of the PayPal community. Outside of the U.S., similar verification processes are used for payment card accounts and in the limited number of countries where PayPal offers bank funding. In certain cases specific to local markets, bank funded

transactions are permitted up to set limits before additional verification is required.

#### Withdrawing Money

Each account holder in the U.S. and in 74 other countries may withdraw money from his or her PayPal account through an electronic fund transfer to his or her U.S. bank account or, in approximately 45 of those countries, to their local bank account. In the U.S. and nine other countries, users can withdraw their funds by a mailed check.

Withdrawals by electronic transfer in the U.S. may take three to five business days to arrive in the account holder's bank account, depending on the bank, and may take longer in other countries. Mailed checks may take one to two weeks to arrive. Qualifying PayPal business users in the U.S. are eligible to receive a PayPal ATM/debit card, which provides these users with instant access to their PayPal account balances. ATM/debit cardholders can withdraw cash from any ATM connected to the Cirrus or Maestro networks and can make purchases at any merchant accepting MasterCard. PayPal offers customers the opportunity to apply for a prepaid card in the U.K. and Italy, which can be linked to a customer's PayPal account to add or withdraw funds. In certain markets, customers can also access their money by generating a credit to their credit card account.

#### PayPal's Trust and Safety Programs

We have developed a number of PayPal trust and safety programs, including PayPal's Seller Protection and Buyer Protection Programs. These programs provide additional protection to certain account holders who pay or receive payment for their transactions through PayPal on or off eBay.com in certain key geographies. PayPal's Seller Protection Program covers sellers in certain key geographies who follow specific shipping and handling practices against claims that a transaction was not authorized by the buyer or that the item was not received. PayPal's Buyer Protection Program reimburses the buyer, subject to specified limitations, for qualified purchases on or off eBay.com in certain key geographies if the buyer does not receive the item or, in limited markets, if the item is significantly not as described. In some non-U.S. markets, protection for buyers is limited to a maximum amount per transaction. In addition, our Risk Management and Fraud Investigation Teams focus on identifying and preventing fraud before it occurs, detecting fraud in process, mitigating loss if fraud does occur and delivering information to law enforcement around the world to better combat online fraud.

#### Bill Me Later Payment Solution

Bill Me Later offers U.S. online consumers a way to obtain instant credit at the point of transaction through its relationship with a chartered financial institution, WebBank, which replaced CIT Bank as the issuer of Bill Me Later credit products effective September 1, 2010. Bill Me Later is not a chartered financial institution nor is it licensed to make loans in any state. Accordingly, Bill Me Later must rely on a bank or licensed lender to issue the Bill Me Later credit products and extend credit to customers in order to offer the Bill Me Later service. Currently, when a consumer makes a purchase using a Bill Me Later credit product issued by a chartered financial institution, the chartered financial institution extends credit to the consumer, funds the extension of credit at the point of sale and advances funds to the merchant. We subsequently purchase the receivables related to the extensions of credit made by the chartered financial institution and, as a result of that purchase, bear the risk of loss in the event of loan defaults. Although the chartered financial institution continues to own each customer account, we own the related receivable, and Bill Me Later is responsible for all servicing functions related to the account.

Bill Me Later accounts are most commonly opened on a U.S. merchant website offering Bill Me Later as a payment method, including eBay.com, but can also be opened via a qualified PayPal account or at the Bill Me Later website. A buyer enters his or her birth date and the last four digits of his or her social security number and, subject to credit approval by the chartered financial institution, a Bill Me Later account is opened with the chartered financial institution for the buyer. This account can be used on U.S. merchant sites that accept the Bill Me Later payment option, as a payment method in a qualified PayPal account for certain merchants in the U.S. who accept PayPal, or on eBay.com in cases where sellers accept the Bill Me Later payment option or accept PayPal. Once established, customers can then manage their accounts online with access to their transaction history and monthly statements and can elect to establish recurring electronic monthly payments.

Bill Me Later earns revenues in several ways:

- Bill Me Later earns interest and late payment fees as a result of its purchase of receivables originated by the chartered financial institution; and

- Bill Me Later earns fees from merchants who use the Bill Me Later service.

Bill Me Later's alternative payment solution is designed to help retailers with an online presence attract, satisfy and retain customers at the point of sale. Through this offering, we believe that online retailers of all sizes can develop an effective payments strategy designed to increase sales and satisfaction by providing consumers with secure, convenient and flexible payment choices.

Payments Growth Strategy

We seek to become the online and mobile payment solution of choice around the world through our focus on simplifying and improving the customer experience, striving to be the most secure method of payment on the Internet, enhancing our

product offerings for our merchants and utilizing multiple sales channels. To establish PayPal and Bill Me Later as the online and mobile payment solutions of choice, we intend to continue focusing on increased user adoption and usage of PayPal on our Marketplaces platforms, continued expansion of PayPal's Merchant Services business and our financial products business, expanding the offerings of Bill Me Later, including as a payment method for PayPal accounts, and increasing adoption of Bill Me Later on merchant sites, including the eBay Marketplace.

#### PayPal Merchant Services

Our Merchant Services business offers a differentiated product solution for different categories of merchants, while providing a cost-effective and secure payment solution across all merchants. We intend to continue to market our global payments solution in geographies where we are already present and to add geographies to spur our growth as a payment solution off of eBay.com for sole proprietors and small, medium and large businesses.

#### Marketplaces

PayPal's services are integrated into the checkout flow of the eBay.com platform in our key markets, including the U.S., Germany, the U.K. and Canada. In 2010, eBay.com generated approximately \$61.8 billion in GMV. PayPal, in turn, generated approximately \$34.7 billion of net total payment volume from eBay.com transactions, which represented approximately 38% of PayPal's net total payment volume during 2010. Net total payment volume is the total dollar volume of payments, net of payment reversals, successfully completed through PayPal's payments network or on Bill Me Later accounts, excluding PayPal's payment gateway business.

We intend to continue to increase PayPal's penetration of GMV on the eBay.com platform globally by continuing to integrate PayPal with eBay listings and new formats, including our adjacent Marketplaces businesses, focusing on PayPal buyer and seller protection programs and adding product features and innovations that we believe are important to the Marketplaces community. We believe that PayPal's expansion into an increased number of international markets and currencies will continue to make cross-border transactions easier and more efficient, benefiting both our Marketplaces and Payments segments.

#### Bill Me Later

We continue to invest in product development designed to capitalize on synergies between Bill Me Later and other eBay brands. In 2009, we introduced Bill Me Later as a funding source within a PayPal account for certain U.S. customers and we also began to offer Bill Me Later as a payment method on eBay.com in the U.S., and in 2010, Bill Me Later became increasingly available as a payment method on eBay.com in the U.S. In 2011, we intend to further expand these offerings. In addition, we have combined our PayPal and Bill Me Later merchant sales teams and have begun offering both the PayPal and Bill Me Later solutions in a coordinated effort to provide merchants greater efficiency in product integration.

#### Payments Mobile

We continue to invest in our mobile payments solutions, which enable users to make payments on a variety of mobile platforms. In 2010, we introduced Mobile Express Checkout, which brings PayPal's two-click experience to mobile commerce. We also continued to expand the functionality of PayPal mobile apps, such as our PayPal Local feature, which helps consumers find great deals at local merchants that accept PayPal, and our donation feature, which provides a convenient way to make charitable contributions. We believe that our continued investments in our mobile payments solutions will provide increased opportunities for new and existing customers to use our PayPal service.

#### PayPal Developer Platform

In 2009, we launched the PayPal Developer Platform to enable third party developers to access a wide variety of PayPal products and programming code specifications and to connect to select PayPal payment application programming interfaces (APIs). Since the launch of PayPal's platform, 50,000 new developers have joined and more than 1,000 apps have been built. We believe there will continue to be broader development and further expansion of the use of PayPal payments solutions on the Internet as well as other platforms, such as mobile devices, as a result of this launch.

#### Payments Financial Products

We will continue to identify transactions and markets that we believe are not served adequately by existing payment systems and seek to develop product features designed to improve upon those legacy systems. In addition, we intend to expand the breadth of products and services available to our account holders and to continue offering financial

products such as the following:

PayPal ATM/Debit Card/Prepaid card, which enables business users to withdraw funds from their PayPal accounts

- at ATMs, pay for offline purchases with funds from their PayPal account, and in the U.S. qualify to receive cash back on eligible purchases;
- PayPal Plus Credit Card and eBay MasterCard issued by GE Money Bank, which allow users to earn rewards on

9

---

- purchases made offline or using PayPal, as well as a PayPal Credit Card offered to U.K. users through Santander;
- PayPal Student Account, which enables parents to electronically transfer money to an account their children can access for use online and offline via the Student Card; and
- PayPal Money Market Fund, which allows participants to earn a yield on the funds in their PayPal accounts through a money market portfolio managed by BlackRock Fund Advisors.

#### Communications

Our Communications segment formerly consisted of Skype. Skype is a global Internet communications company that offers a way for people in almost every country around the world to stay in touch over the Internet through free voice and video calls, sending instant messages, SMS (text messaging) or files, and by making low-cost calls to landline and mobile numbers. Skype primarily generated revenue through fees charged to users to connect Skype's Internet communications products to traditional fixed-line and mobile telephones (which we refer to as SkypeOut minutes). On November 19, 2009, we completed the sale of Skype to an entity ("Buyer") owned and organized by an investor group. As part of the sale, we maintained an equity stake in the outstanding capital stock of the Buyer (now approximately 30%). Skype was consolidated with our results of operations through November 19, 2009 (the date that the sale of Skype was completed). Our noncontrolling ownership interest in the Buyer for periods after the completion of the sale is accounted for as an equity investment. For additional details related to the sale of Skype, please see "Note 4 – Skype Related Transactions" to the consolidated financial statements included in this report.

#### Other Items

##### Employees

As of December 31, 2010, eBay Inc. and its subsidiaries employed approximately 17,700 people (including temporary employees), approximately 11,100 of whom were located in the U.S.

##### Competition

We encounter vigorous competition in our businesses from numerous sources. For our Marketplaces segment, our users can find, buy, sell and pay for similar items through a variety of competing online and offline channels. These include, but are not limited to, retailers, distributors, liquidators, import and export companies, online and offline auctioneers, catalog and mail-order companies, classifieds, directories, search engines, virtually all online and offline commerce participants (consumer-to-consumer, business-to-consumer and business-to-business), online and offline shopping channels and networks. As our product offerings continue to broaden into new categories of items and new commerce formats, we expect to face additional competition from other online and offline channels for those new offerings. We compete on the basis of price, product selection, and services. Our growth rates in our most mature markets have significantly slowed and we are losing market share in some segments. For our Payments segment, our users may choose to pay through a variety of alternative means, including credit and debit cards, automated clearing house and bank wires, other online payment services, offline payment methods such as cash, check or money order and using mobile phones. To compete effectively, we may need to expend significant resources in technology and marketing. These efforts may be expensive and could reduce our margins and have a materially adverse effect on our business, financial position, operating results and cash flows and reduce the trading price of our stock. Despite our efforts to preserve and expand the size and diversity of our users' online community and enhance the user experience, we may not be able to continue to manage our operating expenses or increase or maintain our revenue to avoid or reduce a decline in our consolidated net income or avoid a net loss. For more information regarding these risks, see the information in "Item 1A: Risk Factors" under the captions "Our industries are intensely competitive" and "We are subject to regulatory activity and antitrust litigation under competition laws."

##### Seasonality

We expect transaction activity patterns on our websites to mirror general consumer buying patterns. Please see the information in "Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations" under the caption "Seasonality."

##### Technology

Our Marketplaces and Payments platforms utilize a combination of proprietary technologies and services as well as technologies and services provided by others. We have developed intuitive user interfaces, customer tools and transaction processing, database and network applications that help enable our users to reliably and securely complete

transactions on our sites. Our technology infrastructure simplifies the storage and processing of large amounts of data, eases the deployment and operation of large-scale global products and services and automates much of the administration of large-scale clusters of computers. Our infrastructure has been designed around industry-standard architectures to reduce downtime in the event of outages or catastrophic occurrences. We strive to continually improve our technology to enhance the customer experience and to increase efficiency, scalability and security. For information regarding technology related risks, see the information in “Item

1A: Risk Factors” under the captions “Our failure to cost-effectively manage certain aspects of our business could harm us,” and “System failures could harm our business.”

#### Intellectual Property

We regard the protection of our intellectual property as critical to our success. We aggressively protect our intellectual property rights by relying on federal, state and common law rights in the U.S. and internationally, as well as a variety of administrative procedures. We also rely on contractual restrictions to protect our proprietary rights in products and services. We have entered into confidentiality and invention assignment agreements with our employees and contractors and nondisclosure agreements with parties with whom we conduct business in order to limit access to and disclosure of our proprietary information.

We pursue the registration of our domain names, trademarks, and service marks in the U.S. and internationally. Effective trademark, copyright, patent, domain name, trade dress, and trade secret protection is very expensive to maintain and may require litigation. We must protect our intellectual property rights and other proprietary rights in an increasing number of jurisdictions, a process that is expensive and time consuming and may not be successful in every location.

We have registered our core brands as trademarks and domain names in the U.S. and a large number of other jurisdictions and have in place an active program to continue to secure trademarks and domain names that correspond to our brands in markets of interest. If we are unable to protect our trademarks or domain names, we could be adversely affected in any jurisdiction in which our trademarks or domain names are not registered. We have licensed in the past, and expect to license in the future, certain of our proprietary rights, such as trademarks or copyrighted material, to others.

Third parties have from time to time claimed, and others may claim in the future, that we have infringed their intellectual property rights. We currently are involved in several such legal proceedings. Please see the information in “Item 3: Legal Proceedings” and in “Item 1A: Risk Factors” under the captions “We are subject to patent litigation” and “We may be unable to protect or enforce our own intellectual property rights adequately.”

#### Segments and Geographic Information

For an analysis of financial information about our segments as well as our geographic areas, please see “Note 6 — Segments” to the consolidated financial statements included in this report. Please see the information in “Item 1A: Risk Factors” under the caption “There are many risks associated with our international operations.”

#### Available Information

Our Internet address is [www.ebay.com](http://www.ebay.com). Our investor relations website is located at <http://investor.ebayinc.com>. We make available free of charge on our investor relations website under the heading “SEC Filings” our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports as soon as reasonably practicable after such materials are electronically filed with (or furnished to) the SEC. Information contained on our websites is not incorporated by reference into this Annual Report on Form 10-K.

#### ITEM 1A:

##### Risk Factors That May Affect Results of Operations and Financial Condition

The risks and uncertainties described below are not the only ones facing us. Other events that we do not currently anticipate or that we currently deem immaterial also may adversely affect our results of operations and financial condition.

Our operating results may decline.

Our operating results have varied on a quarterly basis during our operating history. Our operating results may fluctuate significantly as a result of a variety of factors, many of which are outside our control. Factors that may affect our operating results include the following:

- general economic conditions, including the possibility of a prolonged period of limited economic growth in the U.S. and Europe; disruptions to the credit and financial markets in the U.S. and worldwide; adverse effects of the ongoing financial crisis in Europe; contractions or limited growth in consumer spending or consumer credit; and adverse economic conditions that may be specific to the Internet, ecommerce and payments industries;
-

our ability to retain an active user base, attract new users, and encourage existing users to list items for sale, purchase items through our websites, or use our payment services, especially when consumer spending is weak; the primary and secondary effects of previously announced and possible future changes to our pricing, products and policies, including, among other changes, restrictions or holds on payments made to sellers or in connection with certain categories of higher-risk transactions; changes to performance standards and/or rewards for sellers, including taking into account cases filed through the eBay and PayPal buyer protection programs in evaluating individual seller performance ratings; changes to the dispute resolution process, including directing eBay buyers to resolve

- disputes with sellers through eBay instead of through PayPal; the adoption of a single fixed price format, which includes making listings previously available under our store inventory format accessible through our search algorithms; upgrades to eBay checkout services and, effective July 2011, the discontinuation of support for third party checkout services;
- consumer confidence in the safety and security of transactions using our websites or technology and the effect of any changes in our practices and policies designed to foster improved confidence;
- our ability to manage the costs of and effectively implement our user protection programs;
- the volume, velocity, size, timing, monetization, and completion rates of transactions using our websites or technology;
- regulatory and legal actions imposing obligations on our businesses or our users, including the injunction related to certain cosmetic and perfume brands (see “Item 3 - Legal Proceedings” below);
- our ability to improve the quality of the user experience on our websites (including our customer support in the event of a problem) in light of the improved quality generally of the user experience offered by competitive Internet merchants;
- our ability to reduce the loss of active buyers and sellers and increase activity of the users of our Marketplaces business, especially with respect to our top buyers and sellers;
- changes to our use of advertising on our sites, including changes in ad placement;
- the impact on PayPal or Bill Me Later of regulations enacted pursuant to new laws regulating financial institutions, including the Dodd-Frank Act in the U.S.;
- other new laws or regulations, or interpretations of existing laws or regulations, that impose liability on us for actions of our users or otherwise harm our business models or restrict the Internet, ecommerce, online payments or online advertising;
- our ability to meet existing and new regulatory requirements as we expand the range and geographical scope of our services, especially for our Payments business;
- the actions of our competitors, including the introduction of new sites, services, products and functionality;
- the costs and results of litigation that involves us;
- our ability to develop product enhancements, programs, and features on different platforms (e.g., mobile) at a reasonable cost and in a timely manner;
- our ability to upgrade and develop our systems, infrastructure, and customer service capabilities to accommodate growth and to improve our websites at a reasonable cost while maintaining 24/7 operations;
- technical difficulties or service interruptions involving our websites or services provided to us or our users by third parties;
- our ability to manage the transaction loss rate on eBay and in our Payments business;
- our ability to manage funding costs and losses associated with our Bill Me Later business;
- our ability to successfully integrate and manage businesses that we acquire, including new needs to manage credit risks and bad debts following our acquisition of Bill Me Later in November 2008 and to manage competing marketplaces in Korea following our acquisition of Gmarket in June 2009;
- the amount and timing of operating costs and capital expenditures relating to the maintenance and expansion of our businesses, operations, and infrastructure;
- our ability to comply with the requirements of entities whose services are required for our operations, such as credit card networks and banks;
- the cost and availability of online and traditional advertising, and the success of our brand building and marketing campaigns;
- our ability to attract new personnel in a timely and effective manner and to retain key employees;
- the continued healthy operation of our technology suppliers and other parties with which we have commercial relations;
- continued consumer acceptance of the Internet as a medium for ecommerce and payments in the face of increasing publicity about fraud, spoofing, phishing, viruses, spyware, malware and other dangers of the Internet; and
- macroeconomic and geopolitical events affecting commerce generally.

It is difficult for us to forecast the level or source of our revenues or earnings accurately. In view of the rapidly evolving nature of our business, we believe that period-to-period comparisons of our operating results may not be meaningful, and you should not rely upon them as an indication of future performance. We do not have backlog, and substantially all of our net revenues each quarter come from transactions involving sales or payments during that quarter. Due to the inherent difficulty in forecasting revenues, it is also difficult to forecast income statement expenses as a percentage of net revenues. Quarterly and annual income statement expenses as a percentage of net revenues may be significantly different from historical or projected rates. Our operating results in one or more future quarters may fall below the expectations of securities analysts and investors. In that event, the trading price of our common stock would almost certainly decline.

We invest heavily in technology, marketing and promotion, customer support, protection programs and further

development of the operating infrastructure for our core and non-core operations. Some of this investment entails long-term contractual commitments. As a result, we may be unable to adjust our spending rapidly enough to compensate for any unexpected revenue shortfall, which may harm our profitability.

Growth rates of our Marketplaces businesses in some of our most established markets have been slower than that for ecommerce generally and have declined in certain periods. Despite our efforts to stem this loss of market share in these and other markets, we may not be successful. As our growth rates in established markets slow, we will increasingly need to focus on keeping existing users, especially our top buyers and sellers, active and increasing their activity level on our websites in order to continue to grow our business. In addition, our Marketplaces business is facing increased competitive pressure. In particular, the competitive norm for, and the expected level of service from, Internet ecommerce websites has significantly increased, due to, for example, improved user experience, greater ease of buying goods, lower (or no) shipping costs, faster shipping times and more favorable return policies. If we are unable to change our services in ways that reflect the changing demands of the ecommerce marketplace, particularly the higher growth of sales of fixed-price items and higher service levels (some of which depend on services provided by sellers on our platforms), our business will suffer.

We have announced changes to our Marketplaces business intended to drive more sales and improve seller efficiency. For example, in the U.S. and the U.K., we have begun testing the efficacy of improving new seller performance and increasing buyer satisfaction by requesting that PayPal hold new seller funds in certain instances, and we may expand the scope of such programs in the future. Some of the changes that we have announced to date have been controversial with, and led to dissatisfaction among, our sellers, and additional changes that we announce in the future may also be negatively received by some of our sellers. This may not only impact the supply of items listed on our websites, but because many sellers also buy from our sites, it may adversely impact demand as well. Given the number of recent changes that we have made to our policies and pricing, it may take our sellers some time to fully assess and adjust to these changes, and sellers may elect to reduce volume while making such assessments and adjustments or in response to these changes. If any of these changes cause sellers to move their business (in whole or in part) away from our websites or otherwise fail to improve gross merchandise volume or the number of successful listings, our operating results and profitability will be harmed. We believe that the mix of sales under our traditional auction-style listing format and fixed-price listing format will continue to shift towards our fixed-price format. Accordingly, we have eliminated some of the features related to our traditional auction-style format and expect others will become less meaningful to, and used less frequently by, our sellers, which would result in a corresponding decrease in revenues from such features. In addition, we expect that the costs associated with our seller discount programs will increase as more sellers will become eligible for such discounts.

In addition, because a large percentage of PayPal transactions originate on the eBay platform, declines in growth rates in major Marketplaces markets also adversely affect PayPal's growth. The expected future growth of our PayPal, StubHub, and other lower margin businesses may also cause downward pressure on our profit margins because those businesses have lower gross margins than our Marketplaces platforms.

The economic downturn could harm our business.

Our Marketplaces and Payments businesses are dependent on consumer purchases. The economic downturn has resulted in reduced buyer demand and reduced selling prices and may reduce the volume of purchases on our Marketplaces platforms and the volume of transactions paid for using our Payment services, all of which would adversely affect our business. In addition, the economic downturn has adversely affected our advertising revenues and may require us to increase our reserves for bad debt and transaction and loan losses. Continuing poor economic conditions will likely continue or exacerbate these trends. In the event of the bankruptcy of a merchant that sells goods or services in advance of the date of their delivery or use (such as airline, cruise or concert tickets), PayPal could be liable to the buyers of such goods or services either through its buyer protection program or through chargebacks on payment cards used by customers to fund their payment through PayPal.

We are exposed to fluctuations in currency exchange rates and interest rates.

Because we conduct the majority of our business outside the United States but report our financial results in U.S. dollars, we face exposure to adverse movements in currency exchange rates. In connection with its multi-currency service, PayPal fixes exchange rates twice per day, and may face financial exposure if it incorrectly fixes the exchange

rate or if exposure reports are delayed. PayPal also holds some corporate and customer funds in non-U.S. currencies, and thus its financial results are affected by the translation of these non-U.S. currencies into U.S. dollars. In addition, the results of operations of many of our internationally focused websites are exposed to foreign exchange rate fluctuations as the financial results of the applicable subsidiaries are translated from the local currency into U.S. dollars upon consolidation. If the U.S. dollar weakens against foreign currencies, the translation of these foreign currency denominated transactions will result in increased net revenues, operating expenses and net income. Similarly, our translation of foreign currency denominated transactions will result in lower net revenues, operating expenses and net income if the U.S. dollar strengthens against foreign currencies, as happened in the

first half of 2010. Net revenues in the fiscal year ended December 31, 2010 were negatively impacted by foreign currency translation of \$9.6 million compared to the same period of the prior fiscal year. As exchange rates vary, net revenues and other operating results, when translated, may differ materially from expectations. In particular, to the extent the U.S. dollar strengthens against the Euro, British pound, Korean won, Australian dollar or Canadian dollar, our foreign revenues and profits will be reduced as a result of these translation adjustments. While from time to time we enter into transactions to hedge portions of our foreign currency translation exposure, it is impossible to perfectly predict or completely eliminate the effects of this exposure. In addition, to the extent the U.S. dollar strengthens against the Euro, the British pound, the Australian dollar, the Canadian dollar or other currencies, cross-border trade related to purchases of dollar-denominated goods by non-U.S. purchasers will likely decrease, and that decrease will likely not be offset by a corresponding increase in cross-border trade involving purchases by U.S. buyers of goods denominated in other currencies, adversely affecting our business.

In addition, we face exposure to fluctuations in interest rates. For example, relatively low interest rates have continued to limit our investment income, including income we earn on PayPal customer balances, which in turn has materially lowered our net interest income.

Bill Me Later's operations depend on lending services provided by an unaffiliated lender.

We acquired Bill Me Later, a company that facilitates credit services by lending banks, in November 2008. Bill Me Later is neither a chartered financial institution nor is it licensed to make loans in any state. Accordingly, Bill Me Later must rely on a bank or licensed lender to issue the Bill Me Later credit products and extend credit to customers in order to offer the Bill Me Later service. Currently, when a consumer makes a purchase using a Bill Me Later credit product issued by a chartered financial institution, the chartered financial institution extends credit to the consumer, funds the extension of credit at the point of sale and advances funds to the merchant. We subsequently purchase the receivables related to the extensions of credit made by the chartered financial institution and, as a result of the purchase, bear the risk of loss in the event of loan defaults. Although the chartered financial institution continues to own each customer account, we own the related receivable, and Bill Me Later is responsible for all servicing functions related to the account.

In September 2010, WebBank became the issuer of the Bill Me Later credit products. Any termination or interruption of WebBank's ability to lend could result in our being unable to originate any new transactions for the Bill Me Later service. Under those circumstances, we would be required to either reach a similar arrangement with another chartered financial institution, which may not be available on favorable terms, if at all, or to obtain our own bank charter, which would be a time-consuming and costly process and would subject us to a number of additional laws and regulations. A lawsuit has been filed against Bill Me Later, PayPal and eBay and is pending in the U.S. District Court for the Central District of California, alleging that in its relationship with the chartered financial institution, Bill Me Later is acting as the true lender to customers in violation of various California laws, including the state's usury law. The court dismissed the usury claims in December 2010, but breach of contract and other claims remain. We believe that these allegations are without merit and intend to defend ourselves vigorously. However, this area of law is uncertain and if the lawsuit is successful, Bill Me Later may be required to change its methods of operations, pay substantial damages and reduce some of its charges and fees, which would likely adversely affect our business.

If our Payments business is found to be subject to or in violation of any laws or regulations, including those governing money transmission, electronic funds transfers, money laundering, counter-terrorist financing, banking and lending, it could be subject to liability, licensure and regulatory approval and may be forced to change its business practices.

While PayPal currently allows its customers with credit cards to send payments from 190 markets, PayPal only allows customers in 74 of those markets (including the U.S.) to receive payments, in some cases with significant restrictions on the manner in which customers can withdraw funds. These limitations may affect PayPal's ability to grow in these markets.

Of the 190 markets whose residents can use the PayPal service, 31 (27 countries plus four French overseas departments) are members of the European Union, or EU. Since 2007, PayPal has provided localized versions of its service to customers in the EU through PayPal (Europe) S.A.R.L. et Cie, SCA, a wholly-owned subsidiary of PayPal that is licensed and subject to regulation as a bank in Luxembourg. Accordingly, PayPal (Europe) is subject to

significant fines or other enforcement action if it violates the disclosure, reporting, anti-money laundering, capitalization, funds management, corporate governance or other requirements imposed on Luxembourg banks. PayPal has limited experience in operating as a bank, and any fines or other enforcement actions imposed by the Luxembourg regulator could adversely affect PayPal's business. PayPal (Europe) implements its localized services in EU countries through a "passport" notification process through the Luxembourg regulator to regulators in other EU member states pursuant to EU Directives, and has completed the "passport" notice process in all EU member countries. The regulators in these countries could notify PayPal (Europe) of local consumer protection laws that will apply to its business, in addition to Luxembourg consumer protection law, and could also seek to persuade the Luxembourg

regulator to order PayPal (Europe) to conduct its activities in the local country through a branch office. These or similar actions by these regulators could increase the cost of, or delay, PayPal's plans for expanding its business in EU countries. In addition, the EU Payments Service Directive, which established a new regulatory regime for payment services providers, formally took effect in November 2009. The interpretation of regulations implementing the EU Payments Service Directive remains uncertain.

In Australia, PayPal serves its customers through PayPal Australia Pty. Ltd., which is licensed by the Australian Prudential Regulatory Authority as a purchased payment facility provider, which is a type of authorized depository institution. Accordingly, PayPal Australia is subject to significant fines or other enforcement action if it violates the disclosure, reporting, anti-money laundering, capitalization, corporate governance or other requirements imposed on Australian depository institutions. In China, PayPal is affiliated with Shanghai Wangfuyi Information Technology Ltd., which is licensed as an Internet Content Provider and operates a payments service only for Chinese customers and only for transactions denominated in Chinese currency. The People's Bank of China (PBOC) has recently enacted regulations to establish a new type of license, called a Payment Settlement Organization (PSO) license, which will be required for non-bank payment services. The PBOC regulations leave unclear whether a foreign-owned company such as PayPal can control or invest in a Payment Settlement Organization, and whether Wangfuyi would be eligible to obtain a PSO license.

To date, PayPal has obtained licenses to operate as a money transmitter in 42 U.S. states and territories and interpretations in seven states that licensing is not required under their existing statutes. The remaining U.S. state and territories do not currently regulate money transmitters. As a licensed money transmitter, PayPal is subject to restrictions on its investment of customer funds, reporting requirements, bonding requirements, and inspection by state regulatory agencies. If PayPal were found to be in violation of money services laws or regulations, PayPal could be subject to liability, forced to cease doing business with residents of certain states, forced to change its business practices, or required to obtain additional licenses or regulatory approvals that could impose a substantial cost on PayPal. Any change to PayPal's business practices that makes the service less attractive to customers or prohibits its use by residents of a particular jurisdiction could decrease the velocity of trade on eBay, which would further harm our business.

In markets other than the U.S., the EU, Australia and the China domestic business, PayPal serves its customers through PayPal Private Ltd., a wholly-owned subsidiary of PayPal that is based in Singapore. In many of these markets, it is not clear whether PayPal's Singapore-based service is subject only to Singaporean law or, if it were subject to local laws, whether such local law would require a payment processor like PayPal to be licensed as a bank or financial institution or otherwise. In such markets, the business may rely on partnerships with local banks to process payments and conduct foreign exchange in local currency. Local regulators who do not have direct jurisdiction over Singapore-based PayPal Private Ltd. may use their local regulatory power to slow or halt payments to local merchants conducted through the local banking partner. Such regulatory actions impacting local banking partner arrangements could impose substantial costs and involve considerable delay to the provision or development of PayPal services in that market. The Reserve Bank of India has asserted that PayPal's offering of payment services to customers outside of India to send personal, non-commercial payments to recipients in India requires a license from the Reserve Bank. For a period of time in 2010, the Reserve Bank directed the Indian affiliate of PayPal's processing bank to suspend withdrawals to the Indian bank accounts of PayPal customers for both personal and business customers. PayPal has suspended personal non-commercial payments to and from Indian accounts, and has also stopped offering certain commercial payments between Indian buyers and Indian sellers. In November 2010, the Reserve Bank of India issued guidelines to Indian banks on the requirements for processing export-related transactions for online payment gateway service providers such as PayPal. The Reserve Bank may again impose a suspension if it is not satisfied with PayPal's and its partner bank's actions to comply with these guidelines. In the event of any non-compliance, PayPal could be subject to fines from the Reserve Bank, and PayPal's prospects for future business in India, both cross-border and domestic, could be materially and adversely affected.

Even if PayPal is not currently required to be licensed in some jurisdictions, future localization or targeted marketing of PayPal's service in those countries, or expansion of the financial products offered by PayPal in new jurisdictions

(either alone, through a commercial alliance or through an acquisition), could subject PayPal to additional licensure requirements, laws and regulations and increased regulatory scrutiny, any of which may harm PayPal's business. These factors could impose substantial costs and involve considerable delay to the provision or development of its products. Delay or failure to receive such a license or regulatory approval could require PayPal to change its business practices or features in ways that would adversely affect PayPal's international expansion plans, and could require PayPal to suspend providing products and services to customers in one or more countries.

PayPal is also subject to various anti-money laundering and counter-terrorist financing laws and regulations around the world that prohibit, among other things, its involvement in transferring the proceeds of criminal activities.

Although PayPal has implemented a program to comply with these laws and regulations, any errors or failure to comply with federal, state or foreign money laundering and counter-terrorist financing laws could result in significant criminal and civil lawsuits, penalties, and

forfeiture of significant assets. In the United States, PayPal is subject to regulations that require it to report suspicious activities involving transactions of \$2,000 or more, and may be required to obtain and keep more detailed records on the senders and recipients in certain transfers of \$3,000 or more. The interpretation of suspicious activities in this context is uncertain. Pending regulations may require PayPal to revise the procedures it uses to verify the identity of its customers and to monitor international transactions more closely.

Several countries in which PayPal is regulated, including Australia, Luxembourg and Singapore, have implemented new anti-money laundering and counter-terrorist financing laws and regulations, and PayPal has had to make changes to its procedures in response. In November 2009, the Australian anti-money laundering and counter-terrorist financing regulator (AUSTRAC) accepted an enforceable undertaking from PayPal Australia pursuant to which PayPal Australia agreed, among other things, to appoint an independent auditor to assess PayPal Australia's anti-money laundering compliance policies and procedures and issue a report identifying any unremediated deficiencies accompanied by a plan by PayPal to remedy any such deficiencies. In the enforceable undertaking, AUSTRAC expressed concern that PayPal Australia did not have systems and controls in place to manage adequately its money laundering and terrorist financing risk. In September 2010, the independent auditor completed its review and issued its report, and PayPal Australia submitted a remediation plan. PayPal Australia is in the process of investing in improvements to its anti-money laundering and counter-terrorist financing systems, policies and operations as part of its remediation plan. In addition, PayPal Australia will be required to obtain additional information from customers, verify that information, and monitor its customers' activities more closely. As PayPal continues to localize its services in additional jurisdictions, it could be required to meet standards similar to those in Australia. These requirements could impose significant costs on PayPal, cause delay to other planned product improvements, make it more difficult for new customers to join its network and reduce the attractiveness of its products.

Although there have been no definitive interpretations to date, PayPal has taken actions as though its service is subject to the Electronic Fund Transfer Act and Regulation E of the U.S. Federal Reserve Board. Under such regulations, among other things, PayPal is required to provide advance disclosure of changes to its service, to follow specified error resolution procedures and to reimburse consumers for losses from certain transactions not authorized by the consumer. PayPal seeks to pass most of these losses on to the relevant merchants, but PayPal incurs losses if the merchant does not have sufficient funds in its PayPal account. Additionally, even technical violations of these laws can result in penalties of up to \$1,000 for each non-compliant transaction or up to \$500,000 per violation in any class action, and we could also be liable for plaintiffs' attorneys fees. In the second quarter of 2010, two putative class-action lawsuits (Devinda Fernando and Vadim Tsigel v. eBay Inc. and PayPal, Inc.; and Moises Zepeda v. PayPal, Inc.) were filed in the U.S. District Court in the Northern District of California. These lawsuits contain allegations related to violations of aspects of the Electronic Fund Transfer Act and Regulation E and violations of a previous settlement agreement related to Regulation E, and/or allege that PayPal improperly held users' funds or otherwise improperly limited user's accounts. These lawsuits seek damages as well as changes to PayPal's practices among other remedies. A determination that there have been violations of the Electronic Fund Transfer Act, Regulation E or violations of other laws relating to PayPal's practices could expose PayPal to significant liability. Changes to PayPal's practices that may result from these lawsuits could require PayPal to incur significant costs and to expend product resources, which could cause delay to other planned product improvements, which would further harm our business.

Our Bill Me Later service is similarly subject to a variety of laws and regulations. Although we do not originate loans under the Bill Me Later service, we do purchase receivables related to the consumer loans extended by the bank which originates them, and one or more jurisdictions may conclude that the eBay company which purchases those receivables is a lender or money transmitter or loan broker, which could subject us to liability or regulation in one or more jurisdictions. As described under the caption "Bill Me Later's operations depend on lending services provided by an unaffiliated lender" above, a lawsuit has been filed against Bill Me Later in the U.S. District Court for the Northern District of California alleging that in its relationship with the former issuer of the Bill Me Later credit products, Bill Me Later was acting as the true lender to customers in violation of various California laws, including the state's usury law.

Additionally, federal regulators could mandate changes to the relationship between us and the issuing bank of the Bill Me Later credit products. Any termination or interruption of the issuing bank's lending services to consumers could result in an interruption of Bill Me Later services, as described under the caption "Bill Me Later's operations depend on lending services provided by an unaffiliated lender" above. Also, effective in three stages in February 2010, July 2010 and August 2010, certain provisions of the Credit Card Accountability Responsibility and Disclosure Act of 2009, or the CARD Act, and certain changes to Regulation Z of the U.S. Federal Reserve Board require the issuing bank and us to make fundamental changes to many of the practices currently used with respect to Bill Me Later consumer accounts, including marketing, pricing (including finance charges, promotional programs and late fees assessed on receivables purchased by us from the bank) and billing, which could in turn adversely affect this business. The listing or sale by our users of pirated or counterfeit items may harm our business. We have received in the past, and we anticipate receiving in the future, communications alleging that certain items listed

or sold through our service by our users infringe third-party copyrights, trademarks and trade names, or other intellectual property rights. See “Item 3 - Legal Proceedings” below. Although we have sought to work actively with the owners of intellectual property rights to eliminate listings offering infringing items on our websites, some rights owners have expressed the view that our efforts are insufficient. Content owners and other intellectual property rights owners have been active in asserting their purported rights against online companies, including eBay. Allegations of infringement of intellectual property rights have resulted in threats of litigation and actual litigation against us from time to time by rights owners, including litigation brought by luxury brand owners such as Tiffany & Co. in the U.S., Rolex S.A. and Coty Prestige Lancaster Group GmbH in Germany, Louis Vuitton Malletier and Christian Dior Couture in France and L'Oréal SA, Lancôme Parfums et Beauté & Cie and Laboratoire Garnier & Cie in several European countries. The plaintiffs in these cases seek to hold eBay liable for alleged counterfeit items listed on our sites by third parties, for “tester” and other consumer products labeled in a manner to prevent resale and for unboxed and other allegedly nonconforming products listed on our sites by third parties, for the alleged misuse of trademarks or copyrights in listings or otherwise on our sites, or in connection with paid search advertisements, or for alleged violations of selective distribution channel laws or parallel import laws for listings of authentic items, or for alleged non-compliance with consumer protection laws. Such plaintiffs seek, among other things, injunctive relief and damages. In the aggregate, these suits could result in significant damage awards and injunctions that could adversely affect our business. These and similar suits may force us to modify our business practices, which could lower our revenue, increase our costs or make our websites less convenient to our customers. Any such results could materially harm our business. In addition, rights owners have aggressively sought to reduce the applicability of limitations to intellectual property rights such as copyright exhaustion and the first sales doctrine in cases such as Vernor v. Autodesk Inc. (Ninth Circuit Court of Appeals) and Costco Wholesale Corp. vs. Omega S.A. To the extent such doctrine are limited, the supply of goods available for resale on eBay may be adversely affected.

In addition to litigation from rights owners, we may be subject to regulatory, civil or criminal proceedings and penalties if governmental authorities believe we have aided in the sale of counterfeit goods. While we have had some early success in defending against such litigation, more recent cases have been based, at least in part, on different legal theories than those of earlier cases, and there is no guarantee that we will continue to be successful in defending against such litigation. Plaintiffs in recent cases have argued that we are not entitled to safe harbors under the Digital Millennium Copyright Act in the U.S. or as a hosting provider in the European Union under the Electronic Commerce Directive because of the alleged active nature of our involvement with our sellers, and that, whether or not such safe harbors are available, we should be found liable because we supposedly have not adequately removed listings that are counterfeit or are authentic but allegedly violate trademark or copyright law or effectively suspended users who have created such listings. We are continuously seek to improve and modify our efforts to eliminate counterfeit and pirated items. These improvements are in response to ongoing business initiatives designed to reduce bad buyer experiences and improve customer satisfaction as well as in response to new patterns we are seeing among counterfeiters and others committing fraud on our users. Notwithstanding these efforts, we believe that the legal climate, especially in Europe, is becoming more adverse to our positions, which may require us to take actions which could lower our revenues, increase our costs, or make our websites less convenient to our customers, which may materially harm our business. In addition, a public perception that counterfeit or pirated items are commonplace on our sites, even if factually incorrect, could damage our reputation and our business.

Content owners and other intellectual property rights owners may also seek to bring legal action against entities that are peripherally involved in the sale of infringing items, such as payment companies. To the extent that intellectual property rights owners bring legal action against PayPal based upon the use of PayPal's payment services in a transaction involving the sale of infringing items, including on our websites, our business could be harmed.

We are subject to patent litigation.

We have repeatedly been sued for allegedly infringing other parties' patents. Some of these ongoing suits are described under the heading “Item 3 - Legal Proceedings” below. We are a defendant in other patent suits and we have been notified of several other potential patent disputes, and expect that we will increasingly be subject to patent infringement claims involving various aspects of our Marketplaces and Payments segments as our services expand in scope and complexity. These claims, whether meritorious or not, are time consuming and costly to resolve, and could

require expensive changes in our methods of doing business, could require us to enter into costly royalty or licensing agreements, or could require us to cease conducting certain operations.

Use of our services for illegal purposes could harm our business.

We may be unable to prevent our users from selling unlawful or stolen goods or unlawful services, or selling goods or services in an unlawful manner, and we may be subject to allegations of civil or criminal liability for unlawful activities carried out by users through our services. We have been subject to several lawsuits based upon such allegations. In December 2004, an

executive of Baazee.com, our Indian subsidiary, was arrested in connection with a user's listing of a pornographic video clip on that website. We continue to contest the charges related to this arrest. Similarly, one of our Korean subsidiaries (IAC) and one of its employees were found criminally liable for listings (which occurred prior to our acquisition of IAC) on IAC's website. The German Federal Supreme Court has ruled that we may have a duty to take reasonable measures to prevent prohibited DVDs from being sold on our site to minors and that competitors may be able to enforce this duty. In a number of circumstances, third parties, including government regulators and law enforcement officials, have alleged that our services aid and abet certain violations of certain laws, including antiscaling laws with respect to the resale of tickets, laws regarding the sale of counterfeit items, the fencing of stolen goods, selective distribution channel laws, distance selling laws and the sale of items outside of the U.S. that are regulated by U.S. export controls.

Although we have prohibited the listing of illegal and stolen goods and certain high-risk items and implemented other protective measures, we may be required to spend substantial resources to take additional protective measures or discontinue certain service offerings, any of which could harm our business. Any costs incurred as a result of potential liability relating to the alleged or actual sale of unlawful goods or the unlawful sale of goods could harm our business. Certain manufacturers and large retailers have sought new U.S. federal and state legislation regarding stolen goods that could limit our ability to allow sellers to use our sites without confirming the source of, and their legal rights to sell, the underlying goods. In addition, from time to time we have received significant media attention relating to the listing or sale of illegal goods and stolen goods using our services. This negative publicity could damage our reputation, diminish the value of our brand names and make users reluctant to use our services.

PayPal's payment system is also susceptible to potentially illegal or improper uses. These may include illegal online gambling, fraudulent sales of goods or services, illicit sales of prescription medications or controlled substances, piracy of software and other copyrighted or trademarked goods, money laundering, terrorist financing, bank fraud, child pornography trafficking, prohibited sales of alcoholic beverages or tobacco products, online securities fraud and encouraging, promoting, facilitating or instructing others to engage in illegal activities. There has been an increased focus by rights owners and U.S. government officials on the role payments systems play in the sale of, and payment for, pirated digital goods on the Internet. Recent changes in law have increased the penalties for intermediaries providing payment services for certain illegal activities, and additional payments-related proposals are under active consideration by government policymakers. Despite measures PayPal has taken to detect and lessen the risk of this kind of conduct, illegal activities could still be funded using PayPal. Any resulting claims or liabilities could harm our business.

We are subject to risks associated with information disseminated through our service.

As discussed above with respect to certain specific issues, the law relating to the liability of online services companies for information carried on or disseminated through their services is often unsettled. Claims could be made against online services companies under both U.S. and foreign law for defamation, libel, invasion of privacy, negligence, copyright or trademark infringement, or other theories based on the nature and content of the materials disseminated through their services. Several private lawsuits seeking to impose liability under a number of these theories have been brought against us, as well as other online service companies. In addition, domestic and foreign legislation has been proposed that would prohibit or impose liability for the transmission over the Internet of certain types of information. Our service features a Feedback Forum, which includes information from users regarding other users. Although all such feedback is generated by users and not by us, claims of defamation or other injury have been made in the past and could be made in the future against us for not removing content posted in the Feedback Forum.

Furthermore, several court decisions arguably have narrowed the scope of the immunity provided to Internet service providers like us under the Communications Decency Act. For example, the Ninth Circuit has held that certain immunity provisions under the Communications Decency Act might not apply to the extent that a website owner materially contributes to the development of unlawful content on its website. As our websites evolve, challenges to the applicability of these immunities can be expected to continue. In addition, the Paris Court of Appeal has ruled in the Louis Vuitton Malletier and Christian Dior Couture cases that applicable laws protecting passive internet "hosts" from liability are inapplicable to eBay given that eBay actively promotes bidding on its sellers' listings and receives a

commission on successful transactions, and is therefore a broker. This trend, if continued, may increase our potential liability to third parties for the user-provided content on our sites, particularly in jurisdictions outside the U.S. where laws governing Internet transactions are unsettled. If we become liable for information provided by our users and carried on our service in any jurisdiction in which we operate, we could be directly harmed and we may be forced to implement new measures to reduce our exposure to this liability, including expending substantial resources or discontinuing certain service offerings, which would negatively affect our financial results. In addition, the increased attention focused upon liability issues as a result of these lawsuits and legislative proposals could require us to incur additional costs and harm our reputation and our business.

Government inquiries may lead to charges or penalties.

A large number of transactions occur on our websites on a daily basis. Government regulators have received a significant number of consumer complaints about both eBay and PayPal, which, while small as a percentage of our total transactions, are large in aggregate numbers. As a result, from time to time we have been contacted by various foreign and domestic governmental regulatory agencies that have questions about our operations and the steps we take to protect our users from fraud. PayPal has received inquiries regarding its restriction and disclosure practices from the Federal Trade Commission and regarding these and other business practices from the attorneys general of a number of states. In September 2006, PayPal entered into a settlement agreement with the attorneys general of a number of states under which it agreed to pay \$1.7 million to the attorneys general, shorten and streamline its user agreement, increase educational messaging to users about funding choices, and communicate more information regarding protection programs to users. We currently face inquiries from government regulators in various jurisdictions related to actions that we have taken that are designed to improve the security of transactions and the quality of the user experience on our websites and we may face similar inquiries from other government regulators in the future. For example, both the Australian Competition and Consumer Commission and the Reserve Bank of Australia recently reviewed our policies requiring sellers to offer PayPal as a payment alternative on most transactions on our localized Australian website and precluding sellers from imposing a surcharge or any other fee for accepting PayPal or other payment methods. Other regulators have requested information concerning PayPal's limitations of customer accounts. Similarly, Bill Me Later has from time to time received customer complaints that could result in investigations into Bill Me Later's business practices by state or federal regulators. As a result of the recent credit crisis, new laws have been passed, and we expect additional new laws and regulations to be adopted that impose, among other requirements, additional obligations and restrictions on the provision of credit. We are likely to receive additional inquiries from regulatory agencies in the future, including under existing or new credit laws or regulations, which may lead to action against us. We have responded to all inquiries from regulatory agencies by describing our current and planned antifraud efforts, customer support procedures, operating procedures and disclosures. If one or more of these agencies is not satisfied with our response to current or future inquiries, we could be subject to enforcement actions, fines or other penalties, or forced to change our operating practices in ways that could harm our business.

We are subject to general litigation and regulatory disputes.

From time to time, we are involved in other disputes or regulatory inquiries that arise in the ordinary course of business. The number and significance of these disputes and inquiries have increased as our business has expanded and our company has grown larger. We have in the past been forced to litigate such claims. We may also become more vulnerable to third-party claims as laws such as the Digital Millennium Copyright Act, the Lanham Act and the Communications Decency Act are interpreted by the courts and as we expand geographically into jurisdictions where the underlying laws with respect to the potential liability of online intermediaries such as ourselves are either unclear or less favorable. We are also subject to federal, state, local and foreign laws of general applicability, including laws regulating working conditions (e.g., the Fair Labor Standards Act). Any claims or regulatory actions against us, whether meritorious or not, could be time consuming, result in costly litigation, damage awards, injunctive relief, or increased costs of doing business through adverse judgment or settlement, require us to change our business practices in expensive ways, require significant amounts of management time, result in the diversion of significant operational resources, or otherwise harm our business.

Changes to our dispute resolution process could increase our costs and loss rate.

In April 2009, we announced plans to change the dispute resolution process (which we refer to as "resolutions") for transactions on eBay.com and eBay.co.uk in which a buyer claims the item was not received or the item they received was different from that described in the listing. We implemented these plans beginning in the fourth quarter of 2009. Previously, buyers with an issue on our eBay.com and eBay.co.uk platform were generally required to contact the seller directly and, if they were unable to resolve the issue, to start the resolutions process online via PayPal's resolution center. We have transitioned to a new, on-eBay resolutions process provided by eBay customer support, which now serves as the primary entry point for buyers on eBay.com and eBay.co.uk who are unable to resolve their disputes with eBay sellers. Among other things, the new resolutions process provides that eBay will generally reimburse the buyer for the full amount of an item's purchase price (including original shipping costs), in cases where

the item was not received or the item they received was different from that described in the listing, and the seller does not provide adequate resolution to the buyer. eBay then attempts to recoup amounts paid to the buyer from the seller's PayPal accounts or other payment methods.

Our costs associated with resolutions have increased as a result of these changes to our resolutions policies and process. These changes, together with any further changes that we may make to our resolutions process in the future, may be negatively received by, and lead to dissatisfaction on the part of, some of our sellers. These changes may also result in an increase in buyer fraud and associated transaction losses. In addition, eBay does not have the same level of rights of recoupment against sellers as PayPal, which may result in higher costs to operate the program.

Failure to deal effectively with bad transactions and customer disputes would increase our loss rate and harm our

business.

Over the last several years, we have enhanced the buyer and seller protections offered by PayPal in certain eBay marketplaces, and in certain countries for transactions outside of eBay marketplaces. These changes to PayPal's buyer and seller protection program could result in future increases and fluctuations in our Payments transaction loss rate. For the fiscal years ended December 31, 2008, 2009 and 2010, our Payments transaction losses (including both direct losses and buyer protection payouts) totaled \$171.5 million, \$180.9 million and \$153.1 million, representing 0.29%, 0.25% and 0.17% of our net total payment volume in the respective periods. We have also recently changed the dispute resolution process for transactions on eBay.com and eBay.co.uk, as described in greater detail above under the caption "Changes to our dispute resolution process could increase our costs and loss rate," which could result in an increase in our combined eBay and PayPal transaction losses. PayPal's highly automated and liquid payment service makes PayPal an attractive target for fraud. In configuring its service, PayPal continually strives to maintain the right balance of appropriate measures to promote both convenience and security for customers. Identity thieves and those committing fraud using stolen credit card or bank account numbers can potentially steal large amounts of money from businesses such as PayPal. We believe that several of PayPal's current and former competitors in the electronic payments business have gone out of business or significantly restricted their businesses largely due to losses from this type of fraud. While PayPal uses advanced anti-fraud technologies, we expect that technically knowledgeable criminals will continue to attempt to circumvent PayPal's anti-fraud systems using increasingly sophisticated methods. In addition, PayPal's service could be subject to employee fraud or other internal security breaches, and PayPal may be required to reimburse customers for any funds stolen as a result of such breaches. Merchants could also request reimbursement, or stop using PayPal, if they are affected by buyer fraud or other types of fraud.

PayPal incurs substantial losses from merchant fraud, including claims from customers that merchants have not performed or that their goods or services do not match the merchant's description. PayPal also incurs losses from claims that the customer did not authorize the purchase, from buyer fraud, from erroneous transmissions, and from customers who have closed bank accounts or have insufficient funds in them to satisfy payments. In addition to the direct costs of such losses, if they are related to credit card transactions and become excessive, they could potentially result in PayPal losing the right to accept credit cards for payment, which would materially and adversely affect our business. In addition, if PayPal were unable to accept credit cards, the velocity of trade on eBay could decrease and result in corresponding decreases in our net total payment volume, in which case our business would further suffer. The Bill Me Later service is similarly subject to the risk of fraudulent activity associated with merchants, users of the Bill Me Later service and third parties handling its user information, which could increase our exposure to transaction losses and adversely affect this business. Our Payments business has taken measures to detect and reduce the risk of fraud, but these measures need to be continually improved and may not be effective against new and continually evolving forms of fraud or in connection with new product offerings. If these measures do not succeed, our business will suffer.

eBay faces similar risks with respect to fraudulent activities on its websites. eBay periodically receives complaints from users who may not have received the goods that they had purchased. In some cases individuals have been arrested and convicted for fraudulent activities using our websites. eBay also receives complaints from sellers who have not received payment for the goods that a buyer had contracted to purchase. Non-payment may occur because of miscommunication, because a buyer has changed his or her mind and decided not to honor the contract to purchase the item, or because the buyer bid on the item maliciously in order to harm either the seller or eBay. In some European and Asian jurisdictions, buyers may also have the right to withdraw from a sale made by a professional seller within a specified time period. While eBay can, in some cases, suspend the accounts of users who fail to fulfill their payment or delivery obligations to other users, eBay does not have the ability to require users to make payment or deliver goods, or otherwise make users whole other than through our limited buyer protection programs. The impact of changes to our dispute resolutions program implemented beginning in 2009 is discussed in more detail above under the caption "Changes to our dispute resolution process could increase our costs and loss rate."

Our limited eBay and PayPal buyer protection programs represent the means by which we compensate users who believe that they have been defrauded, have not received the item that they purchased, or have received an item different than what was described. However, users who pay through PayPal may have reimbursement rights from their

credit card company or bank, which in turn will seek reimbursement from PayPal. eBay also periodically receives complaints from buyers as to the quality of the goods purchased. We expect to continue to receive communications from users requesting reimbursement or threatening or commencing legal action against us if no reimbursement is made. Our liability for these sort of claims is only beginning to be clarified in some jurisdictions and may be higher in some non-U.S. jurisdictions than it is in the U.S. Litigation involving liability for third-party actions could be costly and time consuming for us, divert management attention, result in increased costs of doing business, lead to adverse judgments, or otherwise harm our business. In addition, affected users will likely complain to regulatory agencies that could take action against us, including imposing fines or seeking injunctions.

Negative publicity and user sentiment generated as a result of fraudulent or deceptive conduct by users of our

Marketplaces and Payments services could damage our reputation, reduce our ability to attract new users or retain our current users, and diminish the value of our brand names. We believe that negative user experiences are one of the primary reasons users stop using our services.

Governmental regulators worldwide are also looking at approaches intended to reduce online fraud. Some of the current proposals (e.g., two-factor authentication in France to verify a user's identity) could increase our costs and require us to change our business practices in ways that would harm our business.

From time to time, we have considered more active mechanisms designed to combat bad transactions and increase buyer satisfaction, including evaluating sellers on the basis of their transaction history and restricting or suspending their activity as a result. Our increased usage of these or other mechanisms to attempt to improve buyer satisfaction could result in dissatisfaction on the part of sellers, loss of share to competing marketplaces, reduced selection of inventory on our sites and other adverse effects.

Any factors that reduce cross-border trade could harm our business.

Cross-border trade has become an increasingly important source of both revenue and profits for us. Cross-border transactions using our websites generally provide higher revenues and gross margins than similar transactions that take place within a single country or market. We generally earn higher transaction fees for cross-border transactions involving PayPal, and our Marketplaces business continues to represent a relatively easy way for buyers and sellers to engage in cross-border trade compared with other alternatives. Any factors that result in a net reduction in cross-border trade, including, among other factors, fluctuations in currency exchange rates, the interpretation and application of specific national or regional laws, such as selective distribution channel laws and parallel import laws, to users in other countries (e.g., the interpretation and application of such laws to the sale of "gray market" goods), the potential interpretation and application of laws of multiple jurisdictions (e.g., the jurisdiction of the buyer, the seller, and/or the location of the item being sold), or any other factors that impose restrictions on, or increase the costs of, purchasing, selling or shipping goods across national borders (including customs enforcement and tariffs) would harm our business.

Our business is subject to online security risks, including security breaches.

Our businesses involve the storage and transmission of users' proprietary information, and security breaches could expose us to a risk of loss or misuse of this information, litigation, and potential liability. An increasing number of websites, including several other large internet companies, have recently disclosed breaches of their security, some of which have involved sophisticated and highly targeted attacks on portions of their sites. Because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems, change frequently and often are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. If an actual or perceived breach of our security occurs, the market perception of the effectiveness of our security measures could be harmed and we could lose users. A party that is able to circumvent our security measures could misappropriate our or our users' proprietary information, cause interruption in our operations, damage our computers or those of our users, or otherwise damage our reputation and business. Any compromise of our security could result in a violation of applicable privacy and other laws, significant legal and financial exposure, damage to our reputation, and a loss of confidence in our security measures, which could harm our business.

Currently, a significant number of our users authorize us to bill their credit card accounts directly for all transaction fees charged by us. PayPal's users routinely provide credit card and other financial information. We rely on encryption and authentication technology licensed from third parties to provide the security and authentication to effectively secure transmission of confidential information, including customer credit card numbers. Advances in computer capabilities, new discoveries in the field of cryptography or other developments may result in the technology used by us to protect transaction data being breached or compromised. Non-technical means, for example, actions by a suborned employee, can also result in a data breach.

Under payment card rules and our contracts with our card processors, if there is a breach of payment card information that we store, or that is stored by PayPal's direct payment card processing customers, we could be liable to the payment card issuing banks for their cost of issuing new cards and related expenses. In addition, if we fail to follow payment card industry security standards, even if there is no compromise of customer information, we could incur significant fines or lose our ability to give customers the option of using payment cards to fund their payments or pay

their fees. If we were unable to accept payment cards, our business would be seriously damaged. Our servers are also vulnerable to computer viruses, physical or electronic break-ins, and similar disruptions, and we have experienced “denial-of-service” type attacks on our system that have, in certain instances, made all or portions of our websites unavailable for periods of time. In December 2010, PayPal was subject to a series of distributed “denial of service”

21

---

in our advertising revenues due to economic, competitive, regulatory, technological or other factors, including the worldwide economic slowdown, or due to the renegotiation of the terms of our contracts with major advertising companies or due to a reduction in our ability to effectively place advertisements on our sites or otherwise provide value to our advertisers, our business and financial results would suffer.

Our growth will depend on our ability to develop our brands, and these efforts may be costly.

We believe that continuing to strengthen our brands will be critical to achieving widespread acceptance of our services,

this decision is being appealed. A lawsuit alleging similar claims has been brought against us by two associations of French antique dealers. We intend to vigorously defend against these lawsuits. However, these and other regulatory and licensure claims could result in costly litigation and, if successful, could require us to change the way we or our users do business in ways that increase costs or reduce revenues (for example, by forcing us to prohibit listings of certain items for some locations). We could also be subject to fines or other penalties, and any of these outcomes could harm our business.

A number of the lawsuits against us relating to trademark issues seek to have our websites subject to unfavorable local laws. For example, “trademark exhaustion” principles provide trademark owners with certain rights to control the sale of a branded authentic product until it has been placed on the market by the trademark holder or with the holder's consent. The

PayPal or PayPal's customers. The payment card networks set and interpret the card rules. Payment card networks could adopt new operating rules or re-interpret existing rules that PayPal or its processors might find difficult or even impossible to follow. As a result, PayPal could lose its ability to give customers the option of using payment cards to fund their payments, or could lose its ability to give customers the choice of currency in which they would like their card to be charged. If PayPal were unable to accept payment cards, its business would be seriously damaged. In addition, the velocity of trade on eBay could decrease and our business would further suffer.

PayPal is required to comply with payment card networks' special operating rules for Internet payment services. PayPal and its payment card processors have implemented specific business processes for merchant customers in order to comply with

approximately two hours in October 2010. Other of our websites (e.g., StubHub) have experienced intermittent unavailability from time to time. Any unscheduled interruption in our services results in an immediate, and possibly substantial, loss of revenues. Frequent or persistent interruptions in our services could cause current or potential users to believe that our systems are unreliable, leading them to switch to our competitors or to avoid our sites, and could permanently harm our reputation and brands. Reliability is particularly critical for PayPal, especially as it seeks to expand its Merchant Services business. Because PayPal is a regulated financial institution, frequent or persistent site interruptions could lead to fines, penalties, or mandatory changes to PayPal's business practices, and ultimately could cause PayPal to lose existing licenses it needs to operate or prevent it from obtaining additional licenses that it needs to expand. Finally, because our customers may use our products for critical transactions, any system failures could result

25

---

Edgar Filing: EBAY INC - Form 10-K

- potentially adverse tax consequences, including local taxation of our fees or of transactions on our websites;
- higher Internet service provider costs;
- different and more stringent user protection, data protection, privacy and other laws;
- seasonal reductions in business activity;
- expenses associated with localizing our products, including offering customers the ability to transact business in the local currency;
- restrictions on the repatriation of funds, foreign currency exchange restrictions, and exchange rate fluctuations;
- volatility in a specific country's or region's political, economic or military conditions (e.g., in South Korea relating

liability for activities of the acquired company before the acquisition, including violations of laws, rules and regulations, commercial disputes, tax liabilities and other known and unknown liabilities.

Moreover, we may not realize the anticipated benefits of any or all of our acquisitions, or may not realize them in the time frame expected. Future acquisitions or mergers may require us to issue additional equity securities, spend our cash, or incur debt, liabilities, amortization expenses related to intangible assets or write-offs of goodwill, which could adversely affect our results of operations and dilute the economic and voting rights of our stockholders.

In addition, we have made certain investments, including through joint ventures, in which we have a minority equity

receivables related to the Bill Me Later business adequately or in a cost-effective manner, the growth and profitability of this business could be significantly and adversely affected.

Additionally, in providing the Bill Me Later service, we face other risks similar to those faced by PayPal, including the risk of system failures, security breaches or other loss of customer data, fraud, intellectual property claims, compliance failures, and changes to regulations relating to credit offerings described in these Risk Factors, including under the captions “Government inquiries may lead to charges or penalties” and “If our Payments business is found to be subject to or in violation of any laws or regulations, including those governing money transmission, electronic funds transfer, money laundering, counter-terrorist financing, banking and lending, it could be subject to liability, licensure and regulatory approval and may be forced to change its business practices.”

Our business and users may be subject to sales tax and other taxes.

Similar issues exist outside of the U.S., where the application of VAT or other indirect taxes on ecommerce providers such as eBay is uncertain and evolving. While we attempt to comply in those jurisdictions where it is clear that a tax is due, certain of our subsidiaries have, from time to time, received claims relating to the applicability of indirect taxes to our fees. Should such taxes become applicable, our business could be harmed. We collect and remit indirect taxes in certain jurisdictions. However, tax authorities may raise questions about our obligation to collect and remit such taxes, as well as the proper calculation of such taxes. For example, a Korean tax authority is currently asserting that certain coupons and incentives available on our sites should not be deducted when computing taxes on our fees. Should any new taxes become applicable to

customers, impair our ability to attract new customers, and harm our revenue and growth.

Our tickets business is subject to regulatory, competitive, and other risks that could harm this business.

Our tickets business, which includes our StubHub business, is subject to numerous risks. Many jurisdictions have laws and regulations covering the resale of event tickets. Some jurisdictions prohibit the resale of event tickets at prices above the face value of the tickets or at all, or highly regulate the resale of tickets, and new laws and regulations or changes to existing laws and regulations imposing these or other restrictions may be adopted that could limit or inhibit our ability to operate, or our users' ability to continue to use, our tickets business. Regulatory agencies or courts may claim or hold that we are responsible

Similarly, Bill Me Later relies on an unaffiliated lender in providing the Bill Me Later service and also relies heavily on third parties to operate its services, including merchant processors and payment gateways to process transactions. Financial or regulatory issues, labor issues (e.g., strikes or work stoppages) or other problems that prevent these companies from providing services to us or our users could reduce the number of listings on our websites or make completing transactions or payments on our websites more difficult, thereby harming our business. In addition, price increases by companies that provide services to our users (such as postal and delivery services) could also reduce the number of listings on our websites or make it more difficult for our users to complete transactions,

- quality of search tools.

We may be unable to compete successfully against current and future competitors. Some current and potential competitors have longer operating histories, larger customer bases and greater brand recognition in other business and Internet sectors than we do. Other online ecommerce sites may be acquired by, receive investments from, or enter into other commercial relationships with well-established and well-financed companies. As a result, some of our competitors with other revenue sources may be able to devote more resources to marketing and promotional campaigns, adopt more aggressive pricing policies

bank transaction fees, credit card interchange and assessment fees, interest expense on indebtedness incurred to finance the purchase of consumer loans receivable by Bill Me Later, employee compensation, contractor costs, facilities costs, depreciation of equipment and amortization expense.

Marketplaces

49

---

Marketplaces cost of net revenues increased \$103.2 million, or 11%, in 2010 compared to 2009. The increase during 2010 was due primarily to the inclusion of a full year of costs attributable to Gmarket and increased site operation costs. Marketplaces cost of net revenues as a percentage of Marketplaces net revenues increased slightly in 2010 compared to 2009 due primarily to the addition of Gmarket, the settlement of a lawsuit and the establishment of a reserve related to certain indirect tax positions (recorded as a reduction in revenue).

Marketplaces cost of net revenues increased \$61.1 million, or 7%, in 2009 compared to 2008. The increase during 2009 was due primarily to the inclusion of costs attributable to Gmarket and Den Blå Avis and BilBasen, partially offset by a decrease in customer support and site operations costs associated with our restructuring activities.

Marketplaces cost of net revenues increased as a percentage of Marketplaces net revenues during 2009 compared to 2008 due primarily to the impact of foreign currency movements on revenues, pricing initiatives (which are recorded as a reduction in revenue) and faster growth in our lower margin Marketplaces businesses.

#### Payments

Payments cost of net revenues increased \$272.5 million, or 22%, in 2010 compared to 2009. The increase in cost of net revenues was primarily due to the impact from our growth in net TPV. Payments cost of net revenues as a percentage of Payments net revenues decreased slightly in 2010 compared to 2009 due primarily to improved leverage of our customer support infrastructure and existing site operations.

Payments cost of net revenues increased \$183.9 million, or 18%, in 2009 compared to 2008. The increase in cost of net revenues was primarily due to the inclusion of costs attributable to Bill Me Later as well as the impact from our growth in net TPV. Payments cost of net revenues as a percentage of Payments net revenues increased during 2009 compared to 2008 due primarily to the impact of lower take rates and increased investment in our site operations, partially offset by a more favorable geographic and payment processor mix.

#### Communications

On November 19, 2009, we completed the sale of Skype to an investor group. Accordingly, Skype's cost of net revenue is not consolidated in our 2010 results.

Communications cost of net revenues increased \$6.7 million or 2%, in 2009 compared to 2008. The increase in cost of net revenues was due to an increase in SkypeOut minutes. Communications cost of net revenues as a percentage of Communications net revenues decreased in 2009 compared to 2008 due primarily to higher volume and changes in product mix.

Product development expenses increased \$77.5 million, or 11%, in 2009 compared to 2008. The increase was due primarily to an increase in employee-related and consultant costs driven by increased investment in our top technology priorities (search, catalog, platform and user experience).

Restructuring expense consists of employee severance and benefits and facility costs associated with the consolidation of certain customer service facilities in North America and Europe in fiscal 2009 and 2010, as well as a strategic reduction of our global workforce in fiscal 2008 and 2009. See "Note 11 – Restructuring" to the consolidated financial statements included in

52

---

In January 2008, our Board of Directors authorized a stock repurchase program that provides for the repurchase of up to \$2.0 billion of our common stock, with no expiration from the date of authorization. In September 2010, our Board authorized an additional stock repurchase program that provides for the repurchase of up to an additional \$2.0 billion of our common stock, with no expiration from the date of authorization, for the purpose of offsetting the impact of dilution from our equity

average remaining term on our commercial paper notes was 15 days.

**Liquidity and Capital Resource Requirements**

At December 31, 2010, we had assets classified as cash and cash equivalents, as well as time deposits and fixed income securities classified as short-term investments, in an aggregate amount of \$7.8 billion, compared to \$5.2 billion at December 31, 2009. At December 31, 2010, we held assets of these types outside the U.S. in certain of our foreign operations totaling approximately \$5.1 billion. If these assets were distributed to the U.S., we may be subject to additional U.S. taxes in certain circumstances. We actively monitor these assets, primarily focusing on the safety of principal and secondarily

services that were entered into through our ordinary course of business.

As we are unable to reasonably predict the timing of settlement of liabilities related to unrecognized tax benefits, net, the table does not include \$312.1 million of such non-current liabilities included in deferred and other tax liabilities recorded on our consolidated balance sheet as of December 31, 2010.

Off-Balance Sheet Arrangements

56

---

As of December 31, 2010, we had no off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on our consolidated financial condition, results of operations, liquidity, capital expenditures or capital resources. In Europe, we have two cash pooling arrangements with a financial institution for cash management purposes. These arrangements allow for cash withdrawals from this financial institution based upon our aggregate operating cash balances held in Europe within the same financial institution (“Aggregate Cash Deposits”). These arrangements also allow us to withdraw amounts exceeding the Aggregate Cash Deposits up to an agreed-upon limit. The net balance of the withdrawals and the Aggregate Cash Deposits are used by the financial institution as a basis for calculating our net interest expense or income. As of December 31, 2010, we had a total of \$3.3 billion in cash withdrawals offsetting our \$3.3 billion in Aggregate Cash Deposits held within the same financial institution under these cash pooling arrangements.

Based on differences in regulatory requirements and commercial law in the jurisdictions where PayPal operates, PayPal holds customer balances either as direct claims against PayPal or as an agent or custodian on behalf of PayPal's customers. Customer balances held as direct claims against us, primarily PayPal, are included on our consolidated balance sheet in funds receivable and customer accounts with an offsetting current liability in funds payable and amounts due to customers, and totaled approximately \$1.9 billion and \$1.5 billion as of December 31, 2010 and 2009. Customer funds held by PayPal as an agent or custodian on behalf of our customers are not reflected in our consolidated balance sheets. These funds include funds held on behalf of U.S. customers that are deposited in bank accounts insured by the Federal Deposit Insurance Corporation (subject to applicable limits) and funds that U.S. customers choose to invest in the PayPal Money Market Fund, which totaled approximately \$2.7 billion and \$2.2 billion as of December 31, 2010 and 2009, respectively. The PayPal Money Market Fund is invested in a portfolio managed by BlackRock Fund Advisors.

#### Indemnification Provisions

In the ordinary course of business, we have included limited indemnification provisions in certain of our agreements with parties with whom we have commercial relations, including our standard marketing, promotions and application-programming-interface license agreements. Under these contracts, we generally indemnify, hold harmless, and agree to reimburse the indemnified party for losses suffered or incurred by the indemnified party in connection with claims by a third party with respect to our domain names, trademarks, logos and other branding elements to the extent that such marks are applicable to our performance under the subject agreement. In a limited number of agreements, we have provided an indemnity for other types of third-party claims, which are indemnities mainly related to various intellectual property rights. In our PayPal business, we have provided an indemnity to our payment processors in the event of certain third-party claims or card association fines against the processor arising out of conduct by PayPal or PayPal customers. In connection with the sale of Skype, we made certain customary warranties to the buyer in the purchase agreement. Our liability to the buyer for inaccuracies in these warranties is generally subject to certain limitations. With respect to certain specified litigation matters involving Skype that were pending as of the closing of the transaction, we also agreed, among other things, to bear 50% of the cost of any monetary judgment that is rendered in respect of those matters. It is not possible to determine the maximum potential loss under these indemnification and other provisions due to our limited history of prior indemnification claims and the unique facts and circumstances involved in each particular provision. To date, no significant costs have been incurred, either individually or collectively, in connection with our indemnification provisions.

time and result in the diversion of significant operational resources. If the plaintiffs were to prevail on certain claims, we might be forced to pay significant damages and licensing fees, modify our business practices or even be prohibited from conducting a significant part of our business. Any such results could materially harm our business and could result in a material adverse impact on the financial position, results of operations or cash flows of either or both of our business segments.

### Revenue Recognition

We may enter into certain revenue transactions, primarily related to advertising contracts, that are considered multiple element arrangements (arrangements with more than one deliverable). We also may enter into arrangements to purchase goods and/or services from certain customers. As a result, significant interpretation and judgment is sometimes required to determine the appropriate accounting for these transactions including: (1) how the arrangement consideration should be allocated among potential multiple deliverables; (2) developing an estimate of the stand-alone selling price of each deliverable; (3) whether revenue should be reported gross (as eBay is acting as a principal), or net (as eBay is acting as an agent); (4) when we provide

cash consideration to our customers, determining whether we are receiving an identifiable benefit that is separable from the customer's purchase of our products and/or services and for which we can reasonably estimate fair value; and (5) whether the arrangement would be characterized as revenue or reimbursement of costs incurred. Changes in judgments with respect to these assumptions and estimates could impact the timing or amount of revenue recognition.

#### Goodwill and Intangible Assets

The purchase price of an acquired company is allocated between intangible assets and the net tangible assets of the acquired business with the residual of the purchase price recorded as goodwill. The determination of the value of the intangible assets acquired involves certain judgments and estimates. These judgments can include, but are not limited to, the cash flows that an asset is expected to generate in the future and the appropriate weighted average cost of capital.

At December 31, 2010, our goodwill totaled \$6.2 billion and our identifiable intangible assets, net totaled \$540.7 million. We assess the impairment of goodwill of our reporting units annually, or more often if events or changes in circumstances indicate that the carrying value may not be recoverable. This assessment is based upon a discounted cash flow analysis and analysis of our market capitalization. The estimate of cash flow is based upon, among other things, certain assumptions about expected future operating performance and an appropriate discount rate determined by our management. Our estimates of discounted cash flows may differ from actual cash flows due to, among other things, economic conditions, changes to our business model or changes in operating performance. Significant differences between these estimates and actual cash flows could materially adversely affect our future financial results. These factors increase the risk of differences between projected and actual performance that could impact future estimates of fair value of all reporting units. We conducted our annual impairment test of goodwill as of August 31, 2009 and 2010. As a result of this test we determined that no adjustment to the carrying value of goodwill for any reporting units was required. See "Note 5 - Goodwill and Intangible Assets" to the consolidated financial statements included in this report. As of December 31, 2010, we determined that no events or circumstances from August 31, 2010 through December 31, 2010 indicated that a further assessment was necessary.

#### Stock-Based Compensation

We measure and recognize stock-based compensation expense based on the fair value measurement for all share-based payment awards made to our employees and directors, including employee stock options, employee stock purchases and restricted stock awards over the service period for awards expected to vest. Stock-based compensation expense recognized for 2008, 2009 and 2010 was \$353.3 million, \$394.8 million and \$381.5 million, respectively. See "Note 17 - Stock-Based and Employee Savings Plans" to the consolidated financial statements included in this report. We calculated the fair value of each restricted stock award based on our stock price on the date of grant. We calculated the fair value of each stock option award on the date of grant using the Black-Scholes option pricing model. The determination of fair value of stock option awards on the date of grant using an option-pricing model is affected by our stock price as well as assumptions regarding a number of additional variables described below. The use of a Black-Scholes model requires extensive actual employee exercise behavior data and a number of assumptions, including expected life, expected volatility, risk-free interest rate and dividend yield. As a result, future stock-based compensation expense may differ from our historical amounts. The weighted-average grant-date fair value of stock options granted during 2008, 2009 and 2010 was \$7.46, \$4.59, and \$6.77 per share, respectively, using the Black-Scholes model with the following weighted-average assumptions:

	Year Ended December 31,				2010	
	2008		2009			
Risk-free interest rate	2.3	%	1.7	%	1.4	%
Expected life (in years)	3.8		3.8		3.4	
Dividend yield	—	%	—	%	—	%
Expected volatility	34	%	47	%	37	%

Our computation of expected volatility for 2008, 2009 and 2010 was based on a combination of historical and market-based implied volatility from traded options on our stock. Our computation of expected life was determined based on historical experience of similar awards, giving consideration to the contractual terms of the stock-based awards, vesting schedules and expectations of future employee behavior. The interest rate for periods within the

contractual life of the award was based on the U.S. Treasury yield curve in effect at the time of grant. The estimation of awards that will ultimately vest requires judgment, and to the extent actual results or updated estimates differ from our current estimates, such amounts will be recorded as a cumulative adjustment in the period estimates are revised. We consider many factors when estimating forfeitures, including employee class and historical experience.

#### Recent Accounting Pronouncements

See “Note 1 - The Company and Summary of Significant Accounting Policies” to the consolidated financial statements included in this report, regarding the impact of certain recent accounting pronouncements on our consolidated financial statements.

#### ITEM 7A: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

##### Foreign Currency Exposure

An increasing proportion of our operations are conducted outside the U.S. Our foreign currency exposure continues to grow as we grow internationally. The objective of our foreign exchange exposure management program is to identify material foreign currency exposures and to manage these exposures to minimize the potential effects of currency fluctuations on our reported consolidated cash flow and results of operations. In our view, our primary foreign currency exposures are transaction, economic and translation.

##### Transaction Exposure

Around the world, we have various assets and liabilities, primarily receivables, investments and accounts payable (including inter-company transactions) that are denominated in currencies other than the relevant entity's functional currency. In certain circumstances, changes in the functional currency value of these assets and liabilities create fluctuations in our reported consolidated financial position, cash flows and results of operations. We may enter into foreign exchange contracts or other instruments to minimize the short-term foreign currency fluctuations on such assets and liabilities. The gains and losses on the foreign exchange contracts economically offset the transaction gains and losses on certain foreign currency receivables, investments and payables recognized in earnings. Transaction gains and losses on these foreign exchange contracts are recognized each period in interest and other income (expense), net included in our consolidated statement of income. During the year ended December 31, 2010, we recognized losses related to these foreign exchange contracts of approximately \$2.2 million. As of December 31, 2010, we had outstanding foreign exchange contracts with notional values equivalent to approximately \$270.2 million with maturity dates within 95 days. At December 31, 2010, the fair value of these contracts resulted in a net asset position of approximately \$0.5 million.

##### Economic Exposure

We transact business in various foreign currencies and have significant international revenues as well as costs denominated in foreign currencies, subjecting us to foreign currency risk. In addition, we charge our international subsidiaries on a monthly basis for their use of intellectual property and technology and for certain corporate services provided by eBay and by PayPal. These charges are generally denominated in Euros and these forecasted inter-company transactions represent a foreign currency cash flow exposure. We purchase foreign exchange contracts, generally with maturities of 15 months or less, to reduce the volatility of cash flows related primarily to forecasted revenue and intercompany transactions denominated in certain foreign currencies. The objective of the foreign exchange contracts is to better ensure that the U.S. dollar-equivalent cash flows are not adversely affected by changes in the U.S. dollar/foreign currency exchange rate. These foreign currency contracts that we designate as cash flow hedges are expected to be highly effective in offsetting potential changes in cash flows attributed to a change in the U.S. dollar/foreign currency exchange rate. Accordingly, the effective portion of the derivative's gain or loss is initially reported as a component of accumulated other comprehensive income (loss) and subsequently reclassified into the financial statements line item in which the hedged item is recorded in the same period the forecasted transaction affects earnings.

During the year ended December 31, 2010, we realized net gains on these cash flow hedge contracts of approximately \$11.1 million which were reported as part of PayPal's net revenues. The notional amount of our economic hedges was \$1.5 billion as of December 31, 2010 of which \$1.2 billion was designated for cash flow hedge accounting treatment. At December 31, 2010, the fair value of these economic hedge contracts resulted in a net asset position of approximately \$31.7 million.

##### Translation Exposure

As our international operations grow, fluctuations in foreign currencies create volatility in our reported results of operations because we are required to consolidate the results of operations of our non-U.S. dollar denominated

subsidiaries. We may decide to purchase foreign exchange contracts or other instruments to economically offset the earnings impact of currency fluctuations. Such non-designated foreign exchange contracts will be marked-to-market on a monthly basis and any unrealized gain or loss will be recorded in interest and other income (expense), net. During the year ended December 31, 2010, we recognized net losses related to these non-designated foreign exchange contracts of approximately \$7.1 million.

Foreign exchange rate fluctuations may adversely impact our financial position as the assets and liabilities of our foreign operations are translated into U.S. dollars in preparing our consolidated balance sheet. The cumulative effect of foreign

Evaluation of disclosure controls and procedures. Based on the evaluation of our disclosure controls and procedures (as defined in the Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, or the Exchange Act) required by Exchange Act Rules 13a-15(b) or 15d-15(b), our principal executive officer and our principal financial officer have concluded that as of the end of the period covered by this report, our disclosure controls and procedures were effective.

Changes in internal controls. There were no changes in our internal controls over financial reporting as defined in Exchange Act Rule 13a-15(f) that occurred during our most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART IV

Item 15: EXHIBITS AND FINANCIAL STATEMENT SCHEDULE

The accompanying notes are an integral part of these consolidated financial statements.			

---

Investments in private entities where we hold less than a 20% ownership interest and where we do not have control over, or the ability to significantly influence the operations of, the investee are accounted for using the cost method of accounting, where our share of the investees' results of operations is not included in our consolidated statement of income, except to the extent of earnings distributions actually received from the investee, and the cost basis of our investments is included in long-term investments.

Advertising expense

We expense the costs of producing advertisements at the time production occurs and expense the cost of communicating advertisements in the period during which the advertising space or airtime is used as sales and marketing expense. Internet advertising expenses are recognized based on the terms of the individual agreements, which is generally over the greater of the ratio of the number of impressions delivered over the total number of contracted impressions, on a pay-per-click basis, or on a straight-line basis over the term of the contract. Advertising expense totaled \$923.4 million, \$799.9 million and \$808.4 million for the years ended December 31, 2008, 2009 and 2010, respectively.

Stock-based compensation

75

---

continue to accrue interest until such time as they are charged off. During the year ended December 31, 2010, we charged off \$79.0 million in loans and interest receivable, net of recoveries. As of December 31, 2010, approximately 92% of our loans and

76

---

We assess whether an other-than-temporary impairment loss on our investments has occurred due to declines in fair value or other market conditions. With respect to our debt securities, this assessment takes into account our intent to sell the security, whether it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis, and if we do not expect to recover the entire amortized cost basis of the security (that is, a credit loss exists). Other-than-temporary impairments are separated into amounts representing credit losses, which are recognized in the consolidated statement of income, and amounts related to all other factors, which are recognized in other comprehensive income (loss). With respect to our equity securities, this assessment considers whether we expect the fair value of the security to recover as well as

other income (expense), net, in the consolidated statement of income. Our derivatives program is not designed or operated for trading or speculative purposes.

Our derivative instruments expose us to credit risk to the extent that our counterparties may be unable to meet the terms of the agreements. We seek to mitigate this risk by limiting our counterparties to major financial institutions and by spreading the risk across several major financial institutions. In addition, the potential risk of loss with any one counterparty resulting

78

---

from this type of credit risk is monitored on an ongoing basis. See “Note 9 - Derivative Instruments” for additional information related to our derivative instruments.

#### Concentration of credit risk

Our cash, cash equivalents, accounts receivable, loans and interest receivable, funds receivable and customer accounts are potentially subject to concentration of credit risk. Cash, cash equivalents and customer accounts are placed with financial institutions that management believes are of high credit quality. In addition, funds receivable are generated with financial institutions or credit card companies that management believes are of high credit quality. Our accounts receivable are derived from revenue earned from customers located in the U.S. and internationally. Our loans and interest receivable are derived from consumer financing activities for customers located in the U.S. As of December 31, 2009 and 2010, no customers accounted for more than 10% of net accounts receivable or net loans receivable. During the years ended December 31, 2008, 2009 and 2010, no customers accounted for more than 10% of net revenues.

#### Impairment of long-lived assets

We evaluate long-lived assets (including intangible assets) for impairment whenever events or changes in circumstances indicate that the carrying amount of a long-lived asset may not be recoverable. An asset is considered impaired if its carrying amount exceeds the undiscounted future net cash flow the asset is expected to generate. If an asset is considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds its fair market value. We assess the recoverability of our long-lived and intangible assets by determining whether the unamortized balances can be recovered through undiscounted future net cash flows of the related assets. The amount of impairment, if any, is measured using fair market values which are estimated based on projected discounted future net cash flows.

#### Recent accounting pronouncements

In 2009, we adopted new accounting guidance for business combinations as issued by the Financial Accounting Standards Board (FASB). The new accounting guidance establishes principles and requirements for how an acquirer in a business combination recognizes and measures in its financial statements the identifiable assets acquired, liabilities assumed, and any noncontrolling interests in the acquiree, as well as the goodwill acquired. Significant changes from previous guidance resulting from this new guidance include the expansion of the definitions of a “business” and a “business combination.” For all business combinations (whether partial, full or step acquisitions), the acquirer will record 100% of all assets and liabilities of the acquired business, including goodwill, generally at their fair values; contingent consideration will be recognized at its fair value on the acquisition date and; for certain arrangements, changes in fair value will be recognized in earnings until settlement; and acquisition-related transaction and restructuring costs will be expensed rather than treated as part of the cost of the acquisition. The new accounting guidance also establishes disclosure requirements to enable users to evaluate the nature and financial effects of the business combination. The adoption of this accounting guidance did not have a material impact on our consolidated financial statements. See “Note 3 - Business Combinations” for additional details.

In 2009, we adopted new accounting guidance for noncontrolling interests in subsidiaries as issued by the FASB. The new accounting guidance establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary, which is sometimes referred to as a minority interest, is a third-party ownership interest in the consolidated entity that should be reported as a component of equity in the consolidated financial statements. Among other requirements, the new guidance requires the consolidated statement of income to be reported at amounts that include the amounts attributable to both the parent and the noncontrolling interest. The new guidance also requires disclosure on the face of the consolidated statement of income of the amounts of consolidated net income attributable to the parent and to the noncontrolling interest. As a result of the new accounting guidance, we remeasured the noncontrolling interest in Skype at its estimated fair value and recorded a gain upon sale of controlling interest on November 19, 2009. See “Note 4 - Skype Related Transactions” for additional details.

In 2009, the FASB issued new accounting guidance that amends the evaluation criteria used to identify the primary beneficiary of a variable interest entity (VIE) and requires ongoing reassessment of whether an enterprise is the primary beneficiary of the VIE. The new guidance significantly changes the consolidation rules for VIEs including the

consolidation of common structures, such as joint ventures, equity method investments and collaboration arrangements. We adopted this guidance as of January 1, 2010. The adoption of this guidance did not have a material impact on our consolidated financial statements.

In 2009, the FASB issued new accounting guidance related to the recognition of revenue from multiple element arrangements. The new guidance states that if vendor specific objective evidence or third party evidence for deliverables in an arrangement cannot be determined, companies are required to develop a best estimate of the selling price for separate deliverables and allocate arrangement consideration using the relative selling price method. We adopted this guidance as of

January 1, 2010 on a prospective basis. The adoption of this guidance did not have a material impact on our consolidated financial statements.

On January 1, 2010, we adopted the new accounting guidance related to certain revenue arrangements that include software elements. The new guidance was applied on a prospective basis for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, with earlier application permitted. The adoption of this accounting guidance did not have a material impact on our consolidated financial statements.

In January 2010, the FASB issued new accounting guidance related to the disclosure requirements for fair value measurements and that provides clarification for existing disclosure requirements. More specifically, this update requires (a) an entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and to describe the reasons for the transfers, and (b) information about purchases, sales, issuances and settlements to be presented separately, on a gross basis rather than net, in the reconciliation for fair value measurements using significant unobservable inputs (Level 3 inputs). This guidance clarifies existing disclosure requirements for the level of disaggregation used for classes of assets and liabilities measured at fair value and requires disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements using Level 2 and Level 3 inputs. The new disclosures and clarifications of existing disclosure were effective beginning January 1, 2010, except for the disclosure requirements related to the purchases, sales, issuances and settlements in the rollforward activity of Level 3 fair value measurements, which are effective for fiscal years ending after December 31, 2010. We do not believe the adoption of this guidance will have a material impact to our consolidated financial statements.

During the fourth quarter of 2010, we adopted the new disclosure guidance related to the credit quality of financing receivables and the allowance for credit losses. This guidance requires companies to provide more information about the credit quality of their financing receivables in the disclosures to financial statements including, but not limited to, significant purchases and sales of financing receivables, aging information and credit quality indicators. The adoption of this accounting guidance did not have a significant impact on our consolidated financial statements.

#### Note 2 - Net Income Per Share:

Basic net income per share is computed by dividing the net income for the period by the weighted average number of common shares outstanding during the period. Diluted net income per share is computed by dividing the net income for the period by the weighted average number of shares of common stock and potentially dilutive common stock outstanding during the period. The dilutive effect of outstanding options and restricted stock units is reflected in diluted earnings per share by application of the treasury stock method. The calculation of diluted net income per share excludes all anti-dilutive shares. The following table sets forth the computation of basic and diluted net income per share for the periods indicated (in thousands, except per share amounts):

	Year Ended December 31,		
	2008	2009	2010
Numerator:			
Net income	\$1,779,474	\$2,389,097	\$1,800,961
Denominator:			
Weighted average common shares - basic	1,303,454	1,289,848	1,305,593
Dilutive effect of equity incentive plans	9,154	15,133	21,824
Weighted average common shares - diluted	1,312,608	1,304,981	1,327,417
Net income per share:			
Basic	\$1.37	\$1.85	\$1.38
Diluted	\$1.36	\$1.83	\$1.36
Common stock equivalents excluded from income per diluted share because their effect would have been anti-dilutive	102,642	53,026	31,509

## Note 3 - Business Combinations:

Our acquisition activity in 2010, 2009 and 2008, was as follows:

## 2010 Acquisition Activity

We acquired three companies during 2010 for aggregate purchase consideration of \$95.9 million, consisting primarily of cash. Each of these three companies is included in our Marketplaces segment. Allocation of the purchase consideration resulted in net tangible assets of \$0.3 million, purchased intangible assets of \$18.0 million and goodwill of \$77.6 million. The allocation of the purchase price for these acquisitions has been prepared on a preliminary basis and changes to that allocation may occur as additional information becomes available.

## 2009 Acquisition Activity

We acquired Gmarket during the second quarter of 2009. Gmarket is a retail ecommerce marketplace in Korea, and is included in our Marketplaces segment. Gmarket's purchase consideration included cash of \$1.2 billion, fair value of minority interest of \$12.2 million and fair value of options assumed of \$5.4 million.

Allocation of the purchase consideration for Gmarket is summarized as follows (in thousands):

	Purchase Consideration	Net Tangible Assets Acquired/(Liabilities Assumed)	Purchased Intangible Assets	Goodwill
Gmarket Inc.	\$ 1,226,968	\$ 50,526	\$ 378,496	\$ 797,946

## 2008 Acquisition Activity

- Bill Me Later was acquired during the fourth quarter of 2008. Bill Me Later is a payments solution company that enables U.S. merchants to offer, and U.S. consumers to obtain, credit at the point of sale for ecommerce transactions and is included in our Payments segment. Bill Me Later's purchase consideration included cash of \$817.0 million, fair value of options assumed of \$87.7 million and transaction costs of \$9.9 million.

- Den Blå Avis and BilBasen were acquired during the fourth quarter of 2008. Den Blå Avis and BilBasen are two leading online classifieds sites in Denmark and are included in our Marketplaces segment. Den Blå Avis and BilBasen's purchase consideration included cash of \$392.0 million and transaction costs of \$2.1 million.

- Other acquisition activity during 2008 consisted of four acquisitions for an aggregate purchase consideration of approximately \$178.6 million, consisting primarily of cash. Three acquisitions are included in our Marketplaces segment and one acquisition is included in our Payments segment.

Allocation of the purchase consideration for business combinations completed in 2008 is summarized as follows (in thousands):

	Purchase Consideration	Net Tangible Assets Acquired/(Liabilities Assumed)	Purchased Intangible Assets	Goodwill
Bill Me Later	\$ 914,605	\$ 26,097	\$ 199,600	\$ 688,908
Den Blå Avis and BilBasen	394,098	(31,612	)144,100	281,610
Other	178,560	(6,809	)39,417	145,952
Total	\$ 1,487,263	\$ (12,324	)\$ 383,117	\$ 1,116,470

The purchase consideration for each acquisition was allocated to the tangible assets and intangible assets acquired and liabilities assumed based on their estimated fair values on the acquisition date, with the remaining unallocated purchase price recorded as goodwill. The fair value assigned to identifiable intangible assets acquired has been determined primarily by using valuation methods that discount expected future cash flows to present value using estimates and assumptions determined by management. Purchased identifiable intangible assets are amortized on a straight-line basis over the respective useful lives.

The consolidated financial statements include the operating results of each business from the date of acquisition. Pro forma results of operations for acquisitions completed during 2008, 2009 and 2010 have not been presented because the effects of the acquisitions, individually and in the aggregate, were not material to our financial results.

## Note 4 - Skype Related Transactions:

On November 19, 2009, we sold all of the share capital of Skype Luxembourg Holdings S.a.r.l., Skype Inc. and Sonorit Holdings, A.S. (collectively with their respective subsidiaries, the "Skype Companies") to Springboard Group S.à.r.l. (the "Buyer"), an entity organized and owned by an investor group led by Silver Lake and including Joltid Limited and certain of its affiliated parties, the Canada Pension Plan Investment Board and Andreessen Horowitz. We received cash proceeds of approximately \$1.9 billion, a subordinated note issued by a subsidiary of the Buyer in the principal amount of \$125.0 million and an equity stake in the outstanding capital stock of the Buyer. We determined the fair value of our retained 30 percent equity stake to be approximately \$620.0 million. We also purchased senior debt securities with a face value of \$50.0 million as part of a Skype debt financing.

The sale resulted in a net gain of \$1.4 billion, which was recorded in interest and other income (expense), net in our consolidated statement of income. In conjunction with the sale of Skype, we reached a legal settlement of a lawsuit between Skype, Joltid and entities controlled by Joltid's founders, which resulted in a \$343.2 million charge to general and administrative expenses.

In March 2010, Skype paid in full the subordinated note receivable of \$125.0 million and senior debt securities of \$50.0 million. As a result of the payment, we recorded a gain of approximately \$22.8 million in interest and other income (expense), net. In the same period, we reinvested approximately \$91.4 million in new senior debt securities issued by Skype, which are reflected in other assets on our consolidated balance sheet. These securities mature in five years and offer a variable interest rate (approximately 7% as of December 31, 2010).

Mr. Marc L. Andreessen, a member of the board of directors of eBay, is a general partner of Andreessen Horowitz, which owns less than 5% of the Buyer.

## Note 5 - Goodwill and Intangible Assets:

## Goodwill

Goodwill information for each reportable segment is as follows (in thousands):

	Balance as of December 31, 2009	Goodwill Acquired	Adjustments	Balance as of December 31, 2010
Marketplaces	\$4,013,906	\$77,602	\$(19,736 )	\$4,071,772
Payments	2,156,541	—	(7,789 )	2,148,752
	\$6,170,447	\$77,602	\$(27,525 )	\$6,220,524

Goodwill related to our equity method investments, included in the table above, was approximately \$27.4 million as of December 31, 2009 and 2010. The adjustments to goodwill during the year ended December 31, 2010 were due primarily to foreign currency translation.

We conducted our annual impairment test of goodwill as of August 31, 2010 and determined that no adjustment to the carrying value of goodwill for any reportable units was necessary. As of December 31, 2010, we determined that no events or circumstances from August 31, 2010 through December 31, 2010 indicated that a further assessment was necessary.

## Intangible Assets

The components of identifiable intangible assets are as follows:

	December 31, 2009			Weighted Average Useful Life (Years)	December 31, 2010			Weighted Average Useful Life (Years)
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount		Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	
	(In thousands, except years)							
Customer lists and user base	\$819,653	\$(524,667 )	\$294,986	6	\$831,806	\$(625,126 )	\$206,680	6
Trademarks and trade names	634,387	(300,046 )	334,341	5	632,899	(381,456 )	251,443	5

Edgar Filing: EBAY INC - Form 10-K

Developed technologies	225,614	(152,982 )	72,632	3	231,312	(192,421 )	38,891	3
All other	149,315	(83,462 )	65,853	4	156,306	(112,609 )	43,697	4
	\$1,828,969	\$(1,061,157)	\$767,812		\$1,852,323	\$(1,311,612)	\$540,711	

Aggregate amortization expense for intangible assets totaled \$281.6 million, \$337.5 million and \$254.1 million for the

82

---

Edgar Filing: EBAY INC - Form 10-K

years ended December 31, 2008, 2009 and 2010, respectively.

Expected future intangible asset amortization as of December 31, 2010 is as follows (in thousands):

Fiscal Years:

2011	\$ 199,259
2012	160,387
2013	130,990
2014	39,808
2015	4,381
Thereafter	5,886
	\$540,711

Note 6 - Segments:

Operating segments are based upon our internal organization structure, the manner in which our operations are managed, the criteria used by our Chief Operating Decision Maker (CODM) to evaluate segment performance and the availability of separate financial information. We currently operate two segments: Marketplaces and Payments. Historically, we also had a Communications segment that consisted of Skype Technologies S.A. (“Skype”). On November 19, 2009, we completed the sale of Skype to an investor group. For the year ended December 31, 2009, the financial performance of our Communications segment reflects Skype operations from January 1, 2009 to November 19, 2009.

The following table summarizes the financial performance of our operating segments:

	Year Ended December 31, 2008			
	Marketplaces	Payments	Communications	Consolidated
	(In thousands)			
Net transaction revenues	\$4,711,057	\$2,320,495	\$ 525,803	\$7,557,355
Marketing services and other revenues	875,694	83,174	25,038	983,906
Net revenues from external customers	5,586,751	2,403,669	550,841	8,541,261
Direct costs	3,135,611	1,922,897	434,588	5,493,096
Direct contribution	2,451,140	480,772	116,253	3,048,165
Operating expenses and indirect costs of net revenues				972,483
Income from operations				2,075,682
Interest and other income (expense), net				107,882
Income before income taxes				\$2,183,564
		Year Ended December 31, 2009		
	Marketplaces	Payments	Communications	Consolidated
	(In thousands)			
Net transaction revenues	\$4,461,845	\$2,641,194	\$ 575,096	\$7,678,135
Marketing services and other revenues	849,169	154,751	45,307	1,049,227
Net revenues from external customers	5,311,014	2,795,945	620,403	8,727,362
Direct costs	3,059,094	2,332,563	462,701	5,854,358
Direct contribution	2,251,920	463,382	157,702	2,873,004
Operating expenses and indirect costs of net revenues				1,416,238
Income from operations				1,456,766
Interest and other income (expense), net				1,422,385
Income before income taxes				\$2,879,151

Edgar Filing: EBAY INC - Form 10-K

	Year Ended December 31, 2010		
	Marketplaces	Payments	Consolidated
	(In thousands)		
Net transaction revenues	\$4,800,193	\$3,261,314	\$8,061,507
Marketing services and other revenues	920,434	174,333	1,094,767
Net revenues from external customers	5,720,627	3,435,647	9,156,274
Direct costs	3,415,879	2,714,006	6,129,885
Direct contribution	2,304,748	721,641	3,026,389
Operating expenses and indirect costs of net revenues			972,818
Income from operations			2,053,571
Interest and other income (expense), net			44,876
Income before income taxes			\$2,098,447

Direct contribution consists of net revenues from external customers less direct costs. Direct costs include specific costs of net revenues, sales and marketing expenses, and general and administrative expenses, such as advertising and marketing programs, customer support expenses, bank charges, internal interest charges related to Bill Me Later, site operations expenses, product development expenses, billing operations, certain technology and facilities expenses, transaction expenses and provision for transaction and loan losses. Expenses such as our corporate center costs (consisting of certain costs such as corporate management, human resources, finance and legal), amortization of intangible assets, restructuring charges and stock-based compensation expense are excluded from direct costs as they are not included in the measurement of segment performance.

The following tables summarize the allocation of net revenues and long-lived tangible assets based on geography (in thousands):

	December 31,		
	2008	2009	2010
U.S.	\$3,969,482	\$3,985,068	\$4,214,215
Germany	1,220,691	1,140,205	1,204,056
United Kingdom	1,072,863	1,054,730	1,266,603
Rest of world	2,278,225	2,547,359	2,471,400
Total net revenues	\$8,541,261	\$8,727,362	\$9,156,274

	December 31,	
	2009	2010
U.S.	\$1,220,977	\$1,465,234
International	345,435	186,251
Total long-lived tangible assets	\$1,566,412	\$1,651,485

Net revenues are attributed to U.S. and international geographies primarily based upon the country in which the seller, payment recipient, customer, Skype user's Internet protocol address (through November 19, 2009), website that displays advertising, or other service provider, as the case may be, is located. Long-lived assets attributed to the U.S. and international geographies are based upon the country in which the asset is located or owned.

## Note 7 - Investments:

At December 31, 2009 and 2010, the fair value of short and long-term investments classified as available for sale are as follows:

	December 31, 2009			Estimated Fair Value
	Gross Amortized Cost (In thousands)	Gross Unrealized Gains	Gross Unrealized Losses	
<b>Short-term investments:</b>				
Restricted cash	\$29,123	\$—	\$—	\$29,123

Government and agency securities	152,170	149	(1,353 )	150,966
Time deposits and other	4,541	—	—	4,541
	\$1,764,766	\$4,690	\$(6,847 )	\$1,762,609

The following table summarizes the fair value and gross unrealized losses of our short-term and long-term investments, aggregated by type of investment instrument and length of time that individual securities have been in a continuous unrealized loss position, at December 31, 2010 (in thousands):

	Less than 12 Months	12 Months or Greater	Total	
Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value
				Gross Unrealized Losses

Edgar Filing: EBAY INC - Form 10-K

Corporate debt securities	\$1,977,995	\$(5,658 )	\$—	\$—	\$1,977,995	\$(5,658 )
Government and agency securities	217,500	(1,354 )	—	—	217,500	(1,354 )
	\$2,195,495	\$(7,012 )	\$—	\$—	\$2,195,495	\$(7,012 )

Our fixed-income investment portfolio consists of corporate debt securities, government securities and time deposits that

85

---

have a maximum maturity of five years. The corporate debt and government securities that we invest in are generally deemed to be low risk based on their credit ratings from the major rating agencies. The longer the duration of these securities, the more susceptible they are to changes in market interest rates and bond yields. As interest rates increase, those securities purchased at a lower yield show a mark-to-market unrealized loss. The unrealized losses are due primarily to changes in credit spreads and interest rates. We expect to realize the full value of all these investments upon maturity or sale. As of December 31, 2010, these securities had a weighted average remaining duration of approximately 13 months. Restricted cash is held primarily in money market funds and interest bearing accounts for letters of credit related primarily to various lease arrangements.

The estimated fair values of short and long-term investments classified by date of contractual maturity at December 31, 2010 are as follows (in thousands):

	December 31, 2010
One year or less (including restricted cash of \$20,351)	\$1,045,403
One year through two years	507,777
Two years through three years (including restricted cash of \$1,332)	783,096
Three years through four years	204,517
Four years through five years	267,219
	\$2,808,012

#### Equity and cost method investments

We have made multiple equity and cost method investments in privately held companies which are reported in long-term investments on our consolidated balance sheet. As of December 31, 2009 and 2010 our equity and cost method investments in privately held companies totaled \$672.7 million and \$729.4 million, respectively.

#### Note 8 - Fair Value Measurement of Assets and Liabilities:

The following table summarizes our financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2009 (in thousands):

Description	Balance as of December 31, 2009	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)
<b>Assets:</b>

Our financial assets and liabilities are valued using market prices on both active markets (level 1) and less active markets (level 2). Level 1 instrument valuations are obtained from real-time quotes for transactions in active exchange markets involving identical assets. Level 2 instrument valuations are obtained from readily available pricing sources for comparable instruments. As of December 31, 2010, we did not have any assets or liabilities requiring measurement at fair value without observable market values that would require a high level of judgment to determine fair value (level 3). Our derivative instruments are valued using pricing models that take into account the contract terms as well as multiple inputs where applicable, such as equity prices, interest rate yield curves, option volatility and currency rates. Our derivative instruments are short-term in nature, typically one month to fifteen months in duration. We maintain our customer account balances in interest bearing bank deposits (including time deposits with maturity dates of less than a year), which are valued using market prices on active markets (level 1). As of December 31, 2010, our customer account balances were approximately \$1.9 billion.

As of December 31, 2010, we held no direct investments in auction rate securities, collateralized debt obligations, structured investment vehicles or mortgage-backed securities.

In Europe, we have two cash pooling arrangements with a financial institution for cash management purposes. These arrangements allow for cash withdrawals from this financial institution based upon our aggregate operating cash balances held in Europe within the same financial institution (“Aggregate Cash Deposits”). These arrangements also allow us to withdraw amounts exceeding the Aggregate Cash Deposits up to an agreed-upon limit. The net balance of the withdrawals and the Aggregate Cash Deposits are used by the financial institution as a basis for calculating our net interest expense or income. As of December 31, 2010, we had a total of \$3.3 billion in cash withdrawals offsetting our \$3.3 billion in Aggregate Cash Deposits held within the same financial institution under these cash pooling arrangements.

## Note 9 - Derivative Instruments:

The notional amounts associated with our foreign currency contracts at December 31, 2009 and December 31, 2010 were \$298.6 million and \$1.8 billion, respectively. Derivative transactions are measured in terms of the notional amount, but this amount is not recorded on the balance sheet and is not, when viewed in isolation, a meaningful measure of the risk profile of the instruments. The notional amount is generally not exchanged, but is used only as the basis on which the value of foreign exchange payments are determined.

Fair Value of Derivative Contracts: Derivative instruments are reported at fair value as follows (in thousands):

	Derivative Assets Reported in Other Current Assets December 31, 2009	Derivative Liabilities Reported in Other Current Liabilities	Derivative Assets Reported in Other Current Assets December 31, 2010	Derivative Liabilities Reported in Other Current Liabilities
Foreign exchange contracts designated as cash flow hedges	\$27	\$ 4,848	\$35,853	\$ 4,162
Foreign exchange contracts not designated as hedging instruments	335	862	1,343	801
Total fair value of derivative instruments	\$362	\$ 5,710	\$37,196	\$ 4,963

Effect of Derivative Contracts on Accumulated Other Comprehensive Income (Loss): The following tables represent the activity of derivative contracts which qualify for hedge accounting as of December 31, 2009 and December 31, 2010, and the impact of designated derivative contracts on accumulated other comprehensive income for those years (in thousands):

	December 31, 2008	Amount of gain (loss) recognized in other comprehensive income (effective portion)	Amount of gain (loss) reclassified from accumulated other comprehensive income to income (effective portion)	December 31, 2009
Foreign exchange contracts designated as cash flow hedges	\$40,352	\$ (29,743 )	\$ 15,430	\$(4,821 )
	December 31, 2009	Amount of gain (loss) recognized in other comprehensive income (effective portion)	Amount of gain (loss) reclassified from accumulated other comprehensive income to income (effective portion)	December 31, 2010
Foreign exchange contracts designated as cash flow hedges	\$(4,821 )	\$ 30,385	\$12,004	\$ 13,560

Effect of Derivative Contracts on the Consolidated Statement of Income: The following table provides the location in our financial statements of the recognized gains or losses related to our derivative instruments for the years ended December 31, 2009 and December 31, 2010 (in thousands):

	December 31, 2009	December 31, 2010
Foreign exchange contracts designated as cash flow hedges	\$15,430	\$11,135
recognized in net revenues	(28,933 )	(9,345 )

Foreign exchanges contracts not designated as hedging instruments  
recognized in interest and other income (expense), net  
Total gain (loss) recognized from derivative contracts in the  
consolidated statement of income                      \$(13,503                      )                      \$1,790

	\$818,104	\$751,314

Note 11 - Restructuring:

2009 Customer Service Consolidation

In 2009, we began the consolidation of certain customer service facilities in North America and Europe to streamline our operations and deliver better and more efficient customer support to our users. The consolidation has impacted approximately 1,000 employees. In connection with this consolidation, we estimate that we will incur approximately \$48.0 million of restructuring related charges, primarily employee severance and benefits. During 2009 and 2010, we incurred restructuring charges of \$26.0 million and \$21.4 million, respectively, in connection with this consolidation. As of December 31, 2010, the restructuring activities in connection with this plan are substantially complete.

2008 Restructuring Plan

In 2009, we completed a strategic reduction of our existing global workforce by approximately 800 employees worldwide to simplify and streamline our organization and strengthen the overall competitiveness of our existing businesses. During 2008 and 2009 we incurred \$49.1 million and \$12.2 million, respectively, in restructuring charges related to this plan.

A summary of the restructuring and other costs by segment recognized for the years ended December 31, 2009 and 2010 are as follows (in thousands):

	Year Ended December 31, 2009			Year Ended December 31, 2010		
	Employee Severance and Benefits		Total	Employee Severance and Benefits		Total
Marketplaces	\$30,123	\$7,866	\$37,989	\$18,607	\$3,223	\$21,830
Payments	188	10	198	(393 )	—	(393 )
	\$30,311	\$7,876	\$38,187	\$18,214	\$3,223	\$21,437

The following table summarizes the restructuring activity for the year ended December 31, 2010 (in thousands):

	Employee Severance and Benefits	Facilities	Total
Accrued liability as of January 1, 2010	\$ 8,827	\$2,082	\$10,909
Charges	18,214	3,223	21,437
Payments	(23,731 )	(1,990 )	(25,721 )
Adjustments from foreign currency translation	(885 )	244	(641 )
Accrued liability as of December 31, 2010	\$ 2,425	\$3,559	\$5,984

## Note 12 - Debt:

The following table summarizes the carrying value of our outstanding debt at December 31, 2010 (in thousands):

## Long-Term Debt

Senior Notes	Coupon Rate	Effective Interest Rate	Amount
Senior notes due 2013	0.875	% 0.946	\$ 399,220
Senior notes due 2015	1.625	% 1.703	597,857
Senior notes due 2020	3.250	% 3.319	497,150
Total long-term debt			\$ 1,494,227

## Short-Term Debt

Commercial paper	\$ 300,000
Total Debt	\$ 1,794,227

## Long-Term Debt

In October 2010, we issued senior unsecured notes in an aggregate principal amount of \$1.5 billion, of which \$400.0 million will mature in October 2013, \$600.0 million will mature in October 2015 and \$500.0 million will mature in October 2020. Interest on these notes is payable semiannually on April 15 and October 15. Interest expense associated with these notes including amortization of debt issuance costs in 2010 was \$5.5 million. Debt issuance costs are deferred costs and recorded as other non-current assets on our consolidated balance sheet. At December 31, 2010, the estimated fair value of all notes included in long-term debt was approximately \$1.4 billion based on market prices on active markets (Level 1).

## Short-Term Debt

## Commercial Paper

In November 2010, we implemented a commercial paper program pursuant to which we may issue commercial paper notes with maturities of up to 397 days from the date of issue in an aggregate principal amount of up to \$1.0 billion at any time outstanding. As of December 31, 2010, the weighted average interest rate on our outstanding commercial paper notes was 0.20%, and the weighted average remaining term on our commercial paper notes was 15 days.

## Credit Agreement

We have a credit agreement that provides for an unsecured \$1.8 billion revolving credit facility, which matures on November 7, 2012. Loans under the credit agreement will bear interest at LIBOR plus a margin ranging from 0.20 percent to 0.50 percent. As of December 31, 2010, no borrowings or letters of credit were outstanding under our \$1.8 billion credit agreement. As described above, we have a \$1.0 billion commercial paper program, and we maintain \$1.0 billion of available borrowing capacity under our credit agreement in order to repay commercial paper borrowings in the event we are unable to repay those borrowings from other sources when they become due. As a result, at December 31, 2010, \$0.8 billion of borrowing capacity was available for other purposes permitted by the credit agreement.

As of December 31, 2010, we were in compliance with all covenants related to our debt.

## Note 13 - Commitments and Contingencies:

## Commitments

Bill Me Later offers U.S. online consumers a way to obtain instant credit at the point of transaction through its relationship with a chartered financial institution. Bill Me Later is neither a chartered financial institution nor is it licensed to make loans in any state. Accordingly, Bill Me Later must rely on a bank or licensed lender to issue the Bill Me Later credit products and extend credit to customers in order to offer the Bill Me Later service. Currently, when a consumer makes a purchase using a Bill Me Later credit product issued by a chartered financial institution, the chartered financial institution extends credit to the consumer, funds the extension of credit at the point of sale and advances funds to the merchant. We subsequently purchase the receivables related to the consumer loans extended by the chartered financial institution and, as a result of the purchase, bear the risk of loss in the event of loan defaults. Although the chartered financial institution continues to own each customer account, we own the related receivable, and Bill Me Later is responsible for all servicing functions related to the account.

As of December 31, 2010, \$6.8 billion of unused credit was available to Bill Me Later accountholders. The individual

lines of credit that make up this unused credit are subject to periodic review and termination by the issuing bank based on, among other things, account usage and customer creditworthiness.

#### Lease Arrangements

We have lease obligations under certain non-cancelable operating leases. Future minimum rental payments under our non-cancelable operating leases, at December 31, 2010, are as follows (in thousands):

Year Ended December 31,	Operating Leases
2011	\$ 117,795
2012	56,249
2013	26,472
2014	18,705
2015	13,977
Thereafter	16,004
Total minimum lease payments	\$ 249,202

Rent expense in the years ended December 31, 2008, 2009 and 2010 totaled \$78.6 million, \$92.3 million and \$112.6 million, respectively. There were no material capital leases at December 31, 2009 and 2010.

#### Litigation and Other Legal Matters

In August 2006, Louis Vuitton Malletier and Christian Dior Couture filed two lawsuits in the Paris Court of Commerce against eBay Inc. and eBay International AG. Among other things, the complaint alleged that we violated French tort law by negligently broadcasting listings posted by third parties offering counterfeit items bearing plaintiffs' trademarks and by purchasing certain advertising keywords. Around September 2006, Parfums Christian Dior, Kenzo Parfums, Parfums Givenchy, and Guerlain Société also filed a lawsuit in the Paris Court of Commerce against eBay Inc. and eBay International AG. The complaint alleged that we had interfered with the selective distribution network the plaintiffs established in France and the European Union by allowing third parties to post listings offering genuine perfumes and cosmetics for sale on our websites. In June 2008, the Paris Court of Commerce ruled that eBay and eBay International AG were liable for failing to prevent the sale of counterfeit items on its websites that traded on plaintiffs' brand names and for interfering with the plaintiffs' selective distribution network. The court awarded plaintiffs approximately EUR 38.6 million in damages and issued an injunction (enforceable by daily fines of up to EUR 100,000) prohibiting all sales of perfumes and cosmetics bearing the Dior, Guerlain, Givenchy and Kenzo brands over all worldwide eBay sites to the extent that they are accessible from France. We appealed this decision, and in September 2010, the Paris Court of Appeal reduced the damages award to EUR 5.7 million and modified the injunction. We have further appealed this decision to the French Supreme Court. In 2009, plaintiffs filed an action regarding our compliance with the original injunction, and in November 2009, the court awarded the plaintiffs EUR 1.7 million (the equivalent of EUR 2,500 per day) and indicated that as a large Internet company we could do a better job of enforcing the injunction. Parfums Christian Dior has filed another motion relating to our compliance with the injunction. We have taken measures to comply with the injunction and have appealed these rulings, noting, among other things, the modification of the initial injunction. However, these and similar suits may force us to modify our business practices, which could lower our revenue, increase our costs, or make our websites less convenient to our customers. Any such results could materially harm our business. Other luxury brand owners have also filed suit against us or have threatened to do so in numerous different jurisdictions, seeking to hold us liable for, among other things, alleged counterfeit items listed on our websites by third parties, "tester" and other not for resale consumer products listed on our websites by third parties, alleged misuse of trademarks in listings, alleged violations of selective distribution channel laws, alleged violations of parallel import laws, alleged non-compliance with consumer protection laws or in connection with paid search advertisements. We have prevailed in some of these suits, lost in others, and many are in various stages of appeal. We continue to believe that we have meritorious defenses to these suits and intend to defend ourselves vigorously.

In May 2009, the U.K. High Court of Justice ruled in the case filed by L'Oréal SA, Lancôme Parfums et Beauté & Cie, Laboratoire Garnier & Cie and L'Oréal (UK) Ltd against eBay International AG, other eBay companies, and several eBay sellers (No. HC07CO1978) that eBay was not jointly liable with the seller co-defendants as a joint tortfeasor, and indicated that it would certify to the European Court of Justice questions of liability for the use of L'Oréal trademarks, hosting liability, and the scope of a possible injunction against intermediaries. The U.K. High Court of Justice certified a number of issues to the European Court of Justice and a hearing before the European Court of Justice on the certified issues took place in June 2010. A decision is expected in 2011. The case was originally filed in July 2007. L'Oréal's complaint alleged that we were jointly liable

for trademark infringement for the actions of the sellers who allegedly sold counterfeit goods, parallel imports and testers (not for resale products). Additionally, L'Oréal claimed that eBay's use of L'Oréal brands on its website, in its search engine and in sponsored links, and purchase of L'Oréal trademarks as keywords, constitute trademark infringement. The suit sought an injunction preventing future infringement, full disclosure of the identity of all past and present sellers of infringing L'Oréal goods, and a declaration that our Verified Rights Owner (VeRO) program as then operated was insufficient to prevent such infringement. Other damages claimed are to be specified after the liability stage of the proceedings.

In April 2010, the U.S. Second Circuit Court of Appeals upheld the decision of the trial court that eBay was not liable to Tiffany & Co. for direct or contributory trademark infringement and that generalized knowledge of alleged counterfeiting was not sufficient to cause intermediaries to be liable where there was no “willful blindness” by the intermediary to the problem. The U.S. Supreme Court denied certiorari with respect to this decision in late 2010.

In March 2007, a plaintiff filed a purported antitrust class action lawsuit against eBay in the Western District of Texas alleging that eBay and its wholly owned subsidiary PayPal “monopolized” markets through various anticompetitive acts and tying arrangements. The plaintiff alleged claims under sections 1 and 2 of the Sherman Act, as well as related state law claims. In April 2007, the plaintiff re-filed the complaint in the U.S. District Court for the Northern District of California (No. 07-CV-01882-RS), and dismissed the Texas action. The complaint seeks treble damages and an injunction. In 2007, the case was consolidated with other similar lawsuits (No. 07-CV-01882JF). In June 2007, we filed a motion to dismiss the complaint. In March 2008, the court granted the motion to dismiss the tying claims with leave to amend and denied the motion with respect to the monopolization claims. Plaintiffs subsequently decided not to refile the tying claims. The plaintiffs' motion on class certification and our motion for summary judgment were heard by the court in December 2009. In March 2010, the District Court granted our motion for summary judgment, denied plaintiffs' motion for class certification as moot, and entered judgment in our favor. Plaintiffs have appealed the District Court's decision, and the matter is fully briefed before the Ninth Circuit Court of Appeals. We intend to vigorously oppose plaintiffs' appeal.

In October 2007, PartsRiver filed a lawsuit in the Eastern District of Texas (No. 2-07CV-440-DF) alleging that eBay, Microsoft, Yahoo!, Shopzilla, PriceGrabber and PriceRunner infringed its patent relating to search methods. The suit seeks an injunction against continuing infringement, unspecified damages, and interest, costs, and fees. The U.S. District Court for the Eastern District of Texas granted defendants' motion to transfer venue and moved the case to the U.S. District Court for the Northern District of California. In August 2009, the District Court granted our motion for summary judgment and ruled that the PartsRiver patent was invalid based on a finding that it was “on sale” more than a year before the filing date of the patent. PartsRiver appealed the District Court's decision to the Federal Circuit Court of Appeals, but then voluntarily dismissed its appeal and requested that the Court of Appeals vacate the District Court's ruling that the patent was invalid. The Court of Appeals dismissed PartsRiver's appeal, but remanded to the District Court consideration of PartsRiver's request to vacate its earlier decision. In parallel with defense of the litigation, we also challenged the validity of the patent in reexamination proceedings before the U.S. Patent and Trademark Office (“PTO”). Before the Court of Appeals issued its decision in the litigation, the PTO issued a reexamination certificate for the patent, which was issued with several new claims, although the original claims on which eBay was sued were held invalid. PartsRiver then conveyed some interest in these newly issued claims to another entity named Kelora. We then filed a declaratory judgment action against PartsRiver and Kelora with the District Court concerning these newly issued claims. The District Court has set a hearing for March 2011 to discuss PartsRiver's request to vacate its earlier decision and eBay's declaratory judgment action.

eBay's Korean subsidiary, IAC, has notified its approximately 20 million users of a January 2008 data breach involving personally identifiable information including name, address, resident registration number and some transaction and refund data (but not including credit card information or real time banking information).

Approximately 147,000 users have sued IAC over this breach in several lawsuits in Korean courts and more may do so in the future. Trial for a group of four representative suits began in August 2009 in the Seoul District Court, and trial for a group of 23 other suits began in September 2009 in the Seoul District Court. There is some precedent in Korea for a court to grant “consolation money” for data breaches without a specific finding of harm from the breach. Such precedents have involved payments of up to approximately \$200 per user. In January 2010, the Seoul District

Court ruled that IAC had met its obligations with respect to defending the site from intrusion and, accordingly, had no liability for the breach. This ruling has been appealed by approximately 34,000 plaintiffs to the Seoul High Court, where it is currently being heard de novo. A decision is expected in 2011.

Other third parties have from time to time claimed, and others may claim in the future, that we have infringed their intellectual property rights. We are subject to additional patent disputes, and expect that we will increasingly be subject to patent infringement claims as our services expand in scope and complexity. In particular, we expect that we may face additional patent infringement claims involving various aspects of our Marketplaces and Payments businesses. We have in the past been forced to litigate such claims. We may also become more vulnerable to third-party claims as laws such as the Digital Millennium Copyright Act, the Lanham Act and the Communications Decency Act are interpreted by the courts, and as we become subject to laws in jurisdictions where the underlying laws with respect to the potential liability of online intermediaries

like ourselves are either unclear or less favorable. We believe that additional lawsuits alleging that we have violated patent, copyright or trademark laws will be filed against us. Intellectual property claims, whether meritorious or not, are time consuming and costly to resolve, could require expensive changes in our methods of doing business, or could require us to enter into costly royalty or licensing agreements.

From time to time, we are involved in other disputes or regulatory inquiries that arise in the ordinary course of business including suits by our users (individually or as class actions) alleging, among other things, improper disclosure of our prices, rules or policies, that such prices, rules or policies violate applicable law, or that we have not acted in conformity with such prices, rules or policies. The number and significance of these disputes and inquiries are increasing. Any claims or regulatory actions against us, whether meritorious or not, could be time consuming, result in costly litigation, damage awards, injunctive relief or increased costs of doing business through adverse judgment or settlement, require us to change our business practices in expensive ways, require significant amounts of management time, result in the diversion of significant operational resources or otherwise harm our business.

#### Indemnification Provisions

In the ordinary course of business, we have included limited indemnification provisions in certain of our agreements with parties with whom we have commercial relations, including our standard marketing, promotions and application-programming-interface license agreements. Under these contracts, we generally indemnify, hold harmless, and agree to reimburse the indemnified party for losses suffered or incurred by the indemnified party in connection with claims by a third party with respect to our domain names, trademarks, logos and other branding elements to the extent that such marks are applicable to our performance under the subject agreement. In a limited number of agreements, we have provided an indemnity for other types of third-party claims, which are indemnities mainly related to various intellectual property rights. In our PayPal business, we have provided an indemnity to our payment processors in the event of certain third-party claims or card association fines against the processor arising out of conduct by PayPal or PayPal's customers. In connection with the sale of Skype, we made certain customary warranties to the buyer in the purchase agreement. Our liability to the buyer for inaccuracies in these warranties is generally subject to certain limitations. With respect to certain specified litigation matters involving Skype that were pending as of the closing of the transaction, we also agreed, among other things, to bear 50% of the cost of any monetary judgment that is rendered in respect of those matters. It is not possible to determine the maximum potential loss under these indemnification or other provisions due to our limited history of prior indemnification claims and the unique facts and circumstances involved in each particular provision. To date, no significant costs have been incurred, either individually or collectively, in connection with our indemnification provisions.

#### Note 14 - Related Party Transactions:

We have entered into indemnification agreements with each of our directors, executive officers and certain other officers. These agreements require us to indemnify such individuals, to the fullest extent permitted by Delaware law, for certain liabilities to which they may become subject as a result of their affiliation with us.

All contracts with related parties are at rates and terms that we believe are comparable with those that could be entered into with independent third parties. There were no material related party transactions in 2008. We sold Skype to an investor group in November 2009. Based on our approximately 30% equity stake in the entity to which we sold Skype, Skype meets the definition of a related party. Accordingly, certain of our transactions with Skype in 2009 and 2010 in connection with and following the completion of the sale of Skype constitute related party transactions. For details related to our related party transactions with Skype, please see "Note 4 - Skype Related Transactions." As of December 31, 2010, there were no significant amounts payable to or amounts receivable from related parties.

#### Note 15 - Stockholders' Equity:

##### Preferred Stock

We are authorized, subject to limitations prescribed by Delaware law, to issue preferred stock in one or more series; to establish the number of shares included within each series; to fix the rights, preferences and privileges of the shares of each wholly unissued series and any related qualifications, limitations or restrictions; and to increase or decrease the number of shares of any series (but not below the number of shares of a series then outstanding) without any further vote or action by our stockholders. At December 31, 2009 and 2010, there were 10.0 million shares of \$0.001 par

value preferred stock authorized for issuance, and no shares issued or outstanding.

Common Stock

Our Certificate of Incorporation, as amended, authorizes us to issue 3.6 billion shares of common stock.

## Note 16 - Stock Repurchase Program:

In January 2008, our Board of Directors authorized a stock repurchase program that provides for the repurchase of up to \$2.0 billion of our common stock with no expiration from the date of authorization. In September 2010, our Board authorized an additional stock repurchase program that provides for the repurchase of up to an additional \$2.0 billion of our common stock, with no expiration from the date of authorization, for the purpose of offsetting the impact of dilution from our equity compensation programs. The stock repurchase activity, under these stock repurchase programs during 2010 is summarized as follows (in thousands, except per share amounts):

	Shares Repurchased	Average Price per Share (1)	Value of Shares Repurchased	Remaining Amount Authorized
Balance at January 1, 2010	49,805	\$ 26.98	\$ 1,343,500	\$ 656,500
Authorization of new plan in September 2010				2,000,000
Repurchase of common stock	26,793	26.60	712,793	(712,793 )
Balance at December 31, 2010	76,598	\$ 26.85	\$ 2,056,293	\$ 1,943,707

(1) The stock repurchase activity excludes broker commissions.

These repurchased shares are recorded as treasury stock and are accounted for under the cost method. No repurchased shares have been retired or reissued.

From time to time, we enter into structured equity hedging transactions. We typically enter into and settle these transactions within the same fiscal quarter. The structured hedging transactions are accounted for as equity instruments. According to the terms of these transactions, if the market price of our common stock exceeds a pre-determined price on the maturity date, we have the option to settle these transactions in cash or by repurchasing shares of our common stock. If the market price of our common stock is below that pre-determined price on the maturity date, we are required to settle these transactions by repurchasing shares of our common stock. The number of shares repurchased through the use of structured equity hedging transactions are included in the table above. The structured equity hedging transactions that settled in cash during 2010 resulted in aggregate premiums of approximately \$2.3 million, which were recorded as additional paid-in capital.

Our stock repurchase programs may be limited or terminated at any time without prior notice. Stock repurchases under these programs may be made through a variety of open market and privately negotiated transactions, including structured stock repurchase transactions or other derivative transactions, at times and in such amounts as management deems appropriate and will be funded from our working capital or other financing alternatives. The timing and actual number of shares repurchased will depend on a variety of factors including corporate and regulatory requirements, price, other market conditions and management's determination as to the appropriate use of our cash. The programs are intended to comply with the volume, timing and other limitations set forth in Rule 10b-18 under the Securities Exchange Act of 1934.

In addition to the above, we withhold shares from employees to satisfy minimum statutory tax obligations in conjunction with nonvested shares under our equity incentive plans, which are included in treasury stock.

Note 17 - Stock-Based and Employee Savings Plans:

Equity Incentive Plans

We have equity incentive plans under which we grant equity awards, including stock options, restricted stock units, nonvested shares and performance-based restricted stock units, to our directors, officers and employees. At December 31, 2010, 626.4 million shares were authorized under our equity incentive plans and 77.0 million shares were available for future grant.

All stock options granted under these plans generally vest 25% one year from the date of grant (or 12.5% six months from the date of grant for grants to existing employees) with the remainder vesting at a rate of 2.08% per month thereafter, and generally expire 7 to 10 years from the date of grant. The cost of stock options is determined using the Black-Scholes option pricing model on the date of grant.

Restricted stock units and nonvested shares are granted to eligible employees under our equity incentive plans. In general, restricted stock units and nonvested shares vest in equal annual installments over a period of one to five years, are subject to the employees' continuing service to the Company and do not have an expiration date. The cost of restricted stock units and nonvested shares is determined using the fair value of our common stock on the date of grant.

In 2008, 2009 and 2010, certain executives were eligible to receive performance based restricted stock units. The number of restricted stock units ultimately received depends on our business performance against specified performance targets set by the Compensation Committee. If the performance criteria are satisfied, the performance based restricted stock units will be granted, with one-half of the grant vesting in March following the end of the performance period and the remaining one-half vesting one year later.

Employee Stock Purchase Plan

We have an employee stock purchase plan for all eligible employees. Under the plan, shares of our common stock may be purchased over an offering period with a maximum duration of two years at 85% of the lower of the fair market value on the first day of the applicable offering period or on the last day of the six-month purchase period. Employees may purchase shares having a value not exceeding 10% of their eligible compensation during an offering period. During the years ended 2008, 2009, and 2010, employees purchased approximately 3.5 million, 4.4 million and 4.7 million shares under this plan at average prices of \$17.78, \$12.82 and \$13.55 per share, respectively. At December 31, 2010, approximately 2.5 million shares of common stock were reserved for future issuance. Our employee stock purchase plan contains an "evergreen" provision that automatically increases, on each January 1, the number of shares reserved for issuance under the employee stock purchase plan by the number of shares purchased under this plan in the preceding calendar year.

Employee Savings Plan

We have a savings plan, which qualifies under Section 401(k) of the Internal Revenue Code. Participating employees may contribute up to 25% of their annual salary, but not more than statutory limits. In 2008, 2009 and 2010, we contributed one dollar for each dollar a participant contributed, with a maximum contribution of 4% of each employee's salary, subject to a maximum employer contribution of \$9,200, \$9,800 and \$9,800, respectively, per employee. Our non-U.S. employees are covered by various other savings plans. Our total expenses for these savings plans were \$34.2 million in 2008, \$42.8 million in 2009 and \$47.4 million in 2010.

Deferred Stock Units

Since December 31, 2002, we have granted deferred stock units to non-employee directors (other than Pierre Omidyar) elected to our Board of Directors with each new director receiving a one-time grant of deferred stock units equal to the result of dividing \$150,000 by the fair market value of our common stock on the date of grant. Beginning with our 2008 annual meeting of stockholders, we have granted deferred stock units to each non-employee director (other than Mr. Omidyar) at the time of our annual meeting of stockholders equal to the result of dividing \$110,000 by the fair market value of our common stock on the date of grant. Each deferred stock unit constitutes an unfunded and unsecured promise by us to deliver one share of our common stock (or the equivalent value thereof in cash or property at our election). Each deferred stock unit award granted to a new non-employee director upon election to the Board vests 25% one year from the date of grant, and at a rate of 2.08% per month thereafter. If the services of the director are terminated at any time, all rights to the unvested deferred stock units will also terminate. In addition, directors may

elect to receive, in lieu of annual retainer and committee chair fees and at the time these fees would otherwise be payable (i.e., on a quarterly basis in arrears for services provided), fully vested deferred stock units with an initial value equal to the amount based on the fair market value of common stock at the date of grant. Deferred stock units are payable following the termination of a director's tenure as a director. As of December 31, 2010, there were approximately 203,819 deferred stock units outstanding included in our restricted stock unit activity below.

### Stock Option Valuation Assumptions

We calculated the fair value of each option award on the date of grant using the Black-Scholes option pricing model. The following weighted-average assumptions were used for each respective period:

	Year Ended December 31,					
	2008		2009		2010	
Risk-free interest rates	2.3	%	1.7	%	1.4	%
Expected life (in years)	3.8		3.8		3.4	
Dividend yield	—	%	—	%	—	%
Expected volatility	34	%	47	%	37	%

Our computation of expected volatility was based on a combination of historical and market-based implied volatility from traded options on our stock. Our computation of expected life was determined based on historical experience of similar awards, giving consideration to the contractual terms of the stock-based awards, vesting schedules and expectations of future employee behavior. The interest rate for periods within the contractual life of the award was based on the U.S. Treasury yield curve in effect at the time of grant.

### Stock-Based Compensation Expense

The following table presents details of total stock-based compensation expense that is included in each line item on our consolidated statement of income (in thousands):

	Year Ended December 31,		
	2008	2009	2010
Cost of net revenues	\$43,417	\$49,275	\$48,764
Sales and marketing	94,314	121,724	106,208
Product development	95,396	98,609	101,001
General and administrative	118,915	125,199	125,519
Restructuring	1,281	—	—
Total stock-based compensation expense	\$353,323	\$394,807	\$381,492
Capitalized in Product Development	\$10,550	\$9,060	\$10,484

As of December 31, 2010, there was approximately \$530.1 million of unearned stock-based compensation that will be expensed from 2011 through 2014. If there are any modifications or cancellations of the underlying unvested awards, we may be required to accelerate, increase or cancel all or a portion of the remaining unearned stock-based compensation expense. Future unearned stock-based compensation will increase to the extent we grant additional equity awards, change the mix of grants between stock options and restricted stock units or assume unvested equity awards in connection with acquisitions.

### Stock Option Activity

The following table summarizes stock option activity under our equity incentive plans as of and for the year ended December 31, 2010 (in thousands, except per share amounts):

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 1, 2010	54,048	\$22.28		
Granted and assumed	8,425	\$23.57		
Exercised	(11,957 )	\$14.25		
Forfeited/expired/cancelled	(6,609 )	\$29.21		
Outstanding at December 31, 2010	43,907	\$23.67	4.18	\$279,229
Expected to vest	41,749	\$23.83	4.08	\$262,930

Edgar Filing: EBAY INC - Form 10-K

Options exercisable	29,051	\$26.02	3.33	\$145,841
---------------------	--------	---------	------	-----------

The aggregate intrinsic value of options was calculated as the difference between the exercise price of the underlying awards and the quoted price of our common stock. At December 31, 2010, options to purchase 29.3 million shares of common stock were in-the-money.

97

---

The weighted average grant-date fair value of options granted during the years 2008, 2009 and 2010 was \$7.46, \$4.59 and \$6.77, respectively. During the years 2008, 2009 and 2010, the aggregate intrinsic value of options exercised under our equity incentive plans was \$83.0 million, \$69.7 million and \$140.7 million, respectively, determined as of the date of option exercise.

#### Restricted Stock Units

A summary of the status of and changes in restricted stock units granted (including performance-based restricted stock units that have been earned) under our equity incentive plans as of December 31, 2010 and changes during the year ended December 31, 2010 is presented below (in thousands, except per share amounts):

	Shares	Weighted Average Grant-Date Fair Value (per share)
Outstanding at January 1, 2010	42,241	\$ 18.13
Awarded	15,843	\$ 24.12
Vested	(14,920 )	\$ 20.28
Forfeited	(4,816 )	\$ 19.70
Outstanding at December 31, 2010	38,348	\$ 19.55
Expected to vest at December 31, 2010	31,699	

During the years 2008, 2009 and 2010, the aggregate intrinsic value of restricted stock units vested under our equity incentive plans was \$55.4 million, \$115.5 million and \$362.8 million, respectively.

#### Nonvested Shares Activity

A summary of the status of and changes in nonvested shares granted under our equity incentive plans and assumed in acquisitions as of December 31, 2010 and changes during the year ended December 31, 2010 is presented below (in thousands, except per share amounts):

	Shares	Weighted Average Grant-Date Fair Value (per share)
Nonvested at January 1, 2010	92	\$ 30.02
Granted	—	—
Vested	(82 )	\$ 28.66
Forfeited	—	—
Nonvested at December 31, 2010	10	\$ 39.90

Edgar Filing: EBAY INC - Form 10-K

Note 18 - Income Taxes:

The components of pretax income in consolidated companies for the years ended December 31, 2008, 2009 and 2010 are as follows (in thousands):

	Year Ended December 31,		
	2008	2009	2010
United States	\$327,927	\$148,773	\$847,962
International	1,855,637	2,730,378	1,250,485
	\$2,183,564	\$2,879,151	\$2,098,447

U.S pre-tax income for the year ended December 31, 2010 includes approximately \$400.0 million relating to non-U.S. income recharacterized as U.S income due to the settlement of multiple uncertain tax positions for the years 2003 through 2006.

The provision for income taxes is comprised of the following (in thousands):

	Year Ended December 31,		
	2008	2009	2010
Current:			
Federal	\$414,301	\$507,411	\$(130,962 )
State and local	94,763	96,496	(13,356 )
Foreign	101,662	64,960	92,209
	610,726	668,867	(52,109 )
Deferred:			
Federal	(148,094 )	(160,811 )	398,597
State and local	(21,109 )	(20,179 )	8,195
Foreign	(37,433 )	2,177	(57,197 )
	(206,636 )	(178,813 )	349,595
	\$404,090	\$490,054	\$297,486

The following is a reconciliation of the difference between the actual provision for income taxes and the provision computed by applying the federal statutory rate of 35% for 2008, 2009 and 2010 to income before income taxes (in thousands):

	Year Ended December 31,		
	2008	2009	2010
Provision at statutory rate	\$764,248	\$1,007,703	\$734,456
Permanent differences:			
Foreign income taxed at different rates	(519,203 )	(475,967 )	(441,044 )
Gain on sale of Skype	—	(498,360 )	—
Joltid settlement	—	120,339	—
Legal entity restructuring	—	184,410	(23,649 )
Change in valuation allowance	48,614	58,670	1,407
Stock-based compensation	26,730	41,436	7,595
State taxes, net of federal benefit	54,356	49,606	31,003
Tax credits	(9,251 )	(13,352 )	(48,745 )
Other	38,596	15,569	36,463
	\$404,090	\$490,054	\$297,486

	December 31, 2009	2010
Deferred tax assets:		
Net operating loss and credits	\$ 120,907	\$ 90,390
Accruals and allowances	387,140	310,075
Stock-based compensation	211,260	117,021
Net unrealized losses	5,077	1,882
Net deferred tax assets	724,384	519,368
Valuation allowance	(68,746 )	(42,740 )
	655,638	476,628
Deferred tax liabilities:		
Unremitted foreign earnings	—	(230,646 )
Acquisition-related intangibles	(151,563 )	(102,894 )
Depreciation and amortization	(80,956 )	(165,563 )
Available-for-sale securities	(161,536 )	(199,421 )
Foreign statutory reserves	(17,613 )	—
	(411,668 )	(698,524 )
	\$ 243,970	\$(221,896 )

As of December 31, 2010, our federal, foreign and state net operating loss carryforwards, or NOLs, for income tax purposes were approximately \$91.0 million, \$138.1 million and \$231.5 million, respectively. The federal and state net operating loss carryforwards are subject to various limitations under Section 382 of the Internal Revenue Code and applicable state tax law. If not utilized, the federal net operating loss carryforwards will begin to expire in 2021 and the state net operating loss carryforwards will begin to expire in 2011. As of December 31, 2010, our state tax credit carryforwards for income tax purposes were approximately \$11.0 million. If not utilized, the state tax credit carryforwards will begin to expire in 2015. As of December 31, 2010, our federal capital loss carryover amounted to \$65.4 million, which is subject to a full valuation allowance. If not utilized, the federal capital loss carryover will begin to expire in 2014.

At December 31, 2010 and 2009, we maintained a valuation allowance with respect to certain of our deferred tax assets relating primarily to operating losses in certain non-U.S. jurisdictions that we believe are not likely to be realized.

We have not provided for U.S. federal income and foreign withholding taxes on \$8.3 billion of our non-U.S. subsidiaries' undistributed earnings as of December 31, 2010, because such earnings are intended to be indefinitely reinvested in our international operations. Upon distribution of those earnings in the form of dividends or otherwise, we would be subject to U.S. income taxes (subject to an adjustment for foreign tax credits). It is not practicable to determine the income tax liability that might be incurred if these earnings were to be distributed.

The Company benefits from tax rulings concluded in several different jurisdictions, most significantly Singapore and Switzerland. These rulings provide for lower rates of taxation on certain classes of income and require various thresholds of investment and employment in those jurisdictions. These rulings resulted in a tax savings of \$284 million and \$300 million in 2010 and 2009, respectively, increasing earnings per share (diluted) by approximately \$0.21 and \$0.23 in 2010 and 2009, respectively. These tax rulings are in effect currently and expire over periods ranging from 2016 to the duration of business operations in the respective jurisdictions.

	2009	2010
	(in thousands)	
Gross amounts of unrecognized tax benefits as the beginning of the period	\$701,374	\$838,616
Increases related to prior year tax provisions	26,247	33,904
Decreases related to prior year tax provision	—	(305,874 )
Increases related to current year tax provisions	110,995	22,229
Settlements	—	(160,531 )
Gross amounts of unrecognized tax benefits as of the end of the period	\$838,616	\$428,344

In the fourth quarter of 2010, we settled multiple uncertain tax positions. If the remaining balance of unrecognized tax benefits were realized in a future period, it would result in a tax benefit of \$356.7 million. We have recorded \$208.5 million of our liability for unrecognized tax benefits in accrued expenses and other current liabilities and the remaining amount is recorded as deferred and other tax liabilities, net in our consolidated balance sheet.

During all years presented, we recognized interest and penalties related to unrecognized tax benefits within the provision for income taxes on the consolidated statements of income. In 2010, we recognized a net expense of \$19.5 million, including \$17.7 million related to the settlement of multiple uncertain tax positions. The amount of interest and penalties accrued as of December 31, 2009 and 2010 was approximately \$90.5 million and \$92.3 million, respectively.

We are subject to taxation in the U.S. and various states and foreign jurisdictions. We are under examination by certain tax authorities for the 2003 to 2008 tax years. The material jurisdictions in which we are subject to potential examination by tax authorities for tax years after 2002 include, among others, the U.S. (Federal and California), France, Germany, Italy, Korea, Switzerland, Singapore and Canada. We believe that adequate amounts have been reserved for any adjustments that may ultimately result from these examinations.

Although the timing of the resolution and/or closure on audits is highly uncertain, it is reasonably possible that the balance of gross unrecognized tax benefits could significantly change in the next 12 months. However, given the number of years remaining subject to examination and the number of matters being examined, we are unable to estimate the full range of possible adjustments to the balance of gross unrecognized tax benefits.

## Supplementary Data — Quarterly Financial Data — Unaudited

The following tables present certain unaudited consolidated quarterly financial information for each of the eight quarters ended December 31, 2010. This quarterly information has been prepared on the same basis as the Consolidated Financial Statements and includes all adjustments necessary to state fairly the information for the periods presented.

## Quarterly Financial Data

(Unaudited, in thousands, except per share amounts)

	Quarter Ended			
	March 31	June 30	September 30	December 31 (1)
2009				
Net revenues	\$2,020,586	\$2,097,992	\$2,237,852	\$2,370,932
Gross profit	\$1,447,200	\$1,506,219	\$1,593,944	\$1,700,237
Net income	\$357,113	\$327,342	\$349,736	\$1,354,906
Net income per share-basic	\$0.28	\$0.25	\$0.27	\$1.05
Net income per share-diluted	\$0.28	\$0.25	\$0.27	\$1.02
Weighted-average shares:				
Basic	1,283,810	1,288,815	1,293,511	1,295,541
Diluted	1,287,814	1,300,434	1,311,274	1,322,686

(1) The quarterly financial information for the quarter ended December 31, 2009 includes a \$1.4 billion gain on the sale of Skype and a legal settlement of a lawsuit between Skype, Joltid and entities controlled by Joltid's founders, which resulted in a \$343.2 million charge to general and administrative expenses. See "Note 4 - Skype Related Transactions" to the consolidated financial statements included in this report.

	Quarter Ended			
	March 31	June 30	September 30	December 31
2010				
Net revenues	\$2,196,057	\$2,215,379	\$2,249,488	\$2,495,350
Gross profit	\$1,589,502	\$1,600,008	\$1,609,220	\$1,792,877
Net income	\$397,653	\$412,192	\$431,929	\$559,187
Net income per share-basic	\$0.31	\$0.31	\$0.33	\$0.43
Net income per share-diluted	\$0.30	\$0.31	\$0.33	\$0.42
Weighted-average shares:
