- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01 Other Events.

On March 29, 2012, Cleco Power LLC (“Cleco Power”), a wholly owned subsidiary of Cleco Corporation, filed a request with the Federal Energy Regulatory Commission (“FERC”) for revisions to its Open Access Transmission Tariff (“OATT”). The revisions are proposed to allow adoption of a formula rate methodology for transmission delivery and ancillary services provided by Cleco Power under the OATT and the existing bilateral Electric System Interconnection Agreements that preceded the OATT. The new formula rates also will permit recovery of Cleco Power's FERC-jurisdictional investments in transmission and other assets placed in service since the existing rates were established.

The proposed rates subject to this filing are expected to be placed in effect, subject to refund, as early as the third quarter of 2012. At this time, Cleco Power anticipates settlement of this rate proceeding in the latter half of 2013. If approved by the FERC as filed, based on historical usage by wholesale users of the transmission system, the new formula is expected to ultimately increase base revenues by approximately \$9 million annually.

This Current Report contains forward-looking statements about future results and circumstances. There are many risks and uncertainties with respect to such forward-looking statements, including the risks and uncertainties more fully described in the Company's latest Annual Report on Form 10-K and Quarterly Report on Form 10-Q. Actual results may differ materially from those indicated in such forward-looking statements.
