FIDELITY D & D BANCORP, INC.

Notes to Consolidated Financial Statements

(Unaudited)

1. Nature of operations and critical accounting policies

Nature of operations

Fidelity Deposit and Discount Bank (the Bank) is a commercial bank chartered under the law of the Commonwealth of Pennsylvania and a wholly-owned subsidiary of Fidelity D & D Bancorp, Inc. (collectively, the Company). Having commenced operations in 1903, the Bank is committed to provide superior customer service, while offering a full range of banking products and financial and trust services to both our consumer and commercial customers from our main office located in Dunmore and other branches located throughout Lackawanna and Luzerne Counties.

Principles of consolidation

The accompanying unaudited consolidated financial statements of the Company and the Bank have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and with the instructions to this Form 10-Q and Rule 8-03 of Regulation S-X. Accordingly, they do not include all of the information and footnote disclosures required by GAAP for complete financial statements. In the opinion of management, all normal recurring adjustments necessary for a fair presentation of the financial condition and results of operations for the periods have been included. All significant inter-company balances and transactions have been eliminated in consolidation.

For additional information and disclosures required under GAAP, refer to the Company’s Annual Report on Form 10-K for the year ended December 31, 2014.

Management is responsible for the fairness, integrity and objectivity of the unaudited financial statements included in this report. Management prepared the unaudited financial statements in accordance with GAAP. In meeting its responsibility for the financial statements, management depends on the Company's accounting systems and related internal controls. These systems and controls are designed to provide reasonable but not absolute assurance that the financial records accurately reflect the transactions of the Company, the Company’s assets are safeguarded and that the financial statements present fairly the financial condition and results of operations of the Company.

In the opinion of management, the consolidated balance sheets as of June 30, 2015 and December 31, 2014 and the related consolidated statements of income and consolidated statements of comprehensive income for the three and six months ended June 30, 2015 and 2014, and consolidated statements of changes in shareholders’ equity and consolidated statements of cash flows for the six months ended June 30, 2015 and 2014 present fairly the financial condition and results of operations of the Company. All material adjustments required for a fair presentation have been made. These adjustments are of a normal recurring nature. Certain reclassifications have been made to the 2014 financial statements to conform to the 2015 presentation.

In preparing these consolidated financial statements, the Company evaluated the events and transactions that occurred after June 30, 2015 through the date these consolidated financial statements were issued.

This Quarterly Report on Form 10-Q should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2014, and the notes included therein, included within the Company's Annual Report filed on Form 10-K.

Critical accounting policies

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported periods. Actual results could differ from those estimates.

A material estimate that is particularly susceptible to significant change relates to the determination of the allowance for loan losses. Management believes that the allowance for loan losses at June 30, 2015 is adequate and reasonable. Given the subjective nature of identifying and valuing loan losses, it is likely that well-informed individuals could make different assumptions and could, therefore, calculate a materially different allowance value. While management uses available information to recognize losses on loans, changes in economic conditions may necessitate revisions in the future. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to recognize adjustments to the allowance based on their judgment of information available to them at the time of their examination.

Another material estimate is the calculation of fair values of the Company's investment securities. Fair values of investment securities are determined by pricing provided by a third-party vendor, who is a provider of financial market data, analytics and related services to financial institutions. Based on experience, management is aware that estimated fair values of investment securities tend to vary among valuation services. Accordingly, when selling investment securities, price quotes may be obtained from more than one source. The majority of the Company's investment securities are classified as available-for-sale (AFS). AFS securities are carried at fair value

on the consolidated balance sheets, with unrealized gains and losses, net of income tax, reported separately within shareholders' equity as a component of accumulated other comprehensive income (loss) (OCI).

The fair value of residential mortgage loans, classified as held-for-sale (HFS), is obtained from the Federal National Mortgage Association (FNMA) or the Federal Home Loan Bank (FHLB). Generally, the market to which the Company sells residential mortgages it originates for sale is restricted and price quotes from other sources are not typically obtained. On occasion, the Company may transfer loans from the loan portfolio to loans HFS. Under these circumstances, pricing may be obtained from other entities and the loans are transferred at the lower of cost or market value and simultaneously sold. As of June 30, 2015 and December 31, 2014, loans classified as HFS consisted of residential mortgage loans.

Financing of automobiles, provided to customers under lease arrangements of varying terms, are accounted for as direct finance leases. Interest income on automobile direct finance leasing is determined using the interest method. Generally, the interest method is used to arrive at a level effective yield over the life of the lease.

Foreclosed assets held-for-sale includes other real estate acquired through foreclosure (ORE) and may, from time-to-time, include repossessed assets such as automobiles. ORE is carried at the lower of cost (principal balance at date of foreclosure) or fair value less estimated cost to sell. Any write-downs at the date of foreclosure or within a reasonable period of time after foreclosure are charged to the allowance for loan losses. Expenses incurred to maintain ORE properties, subsequent write downs to the asset's fair value, any rental income received and gains or losses on disposal are included as components of other real estate owned expense in the consolidated statements of income.

For purposes of the consolidated statements of cash flows, cash and cash equivalents includes cash on hand, amounts due from banks and interest-bearing deposits with financial institutions. For the six months ended June 30, 2015 and 2014, the Company paid interest of $1.3 million and $1.4 million, respectively. The Company did not make an income tax payment in the first half of 2015 and paid income taxes of $0.4 million during the first half of 2014. Transfers from loans to foreclosed assets held-for-sale amounted to $0.6 million and $1.2 million during the six months ended June 30, 2015 and 2014, respectively. During the same respective periods, transfers from loans to loans HFS amounted to $1.8 million and $0 and from loans to bank premises and equipment amounted to $0 and $1.0 million. Expenditures for construction in process, a component of other assets in the consolidated balance sheets, are included in acquisition of bank premises and equipment.

2. New accounting pronouncements

In an exposure draft issued in the fourth quarter of 2012, the Financial Accounting Standards Board (FASB) proposed changes to the accounting guidance related to the impairment of financial assets and the recognition of credit losses. The FASB proposal would require financial institutions to reserve for losses for the duration of the credit exposure as opposed to reserving for probable losses. The new methodology would be known as the "current expected credit losses" (CECL) methodology. The FASB is currently in the process of re-deliberating significant issues raised through feedback received from comment letters and outreach activities. Among other things, the guidance in the proposed update regarding an entity's estimate of expected credit losses will be clarified as follows:

- An entity should revert to a historical average loss experience for the future periods beyond which the entity is able to make or obtain reasonable and supportable forecasts;
- An entity should consider all contractual cash flows over the life of the related financial assets;
- When determining the contractual cash flows and the life of the related financial assets:

- o An entity should consider expected prepayments;
- o An entity should not consider expected extensions, renewals, and modifications unless the entity reasonably expects that it will execute a troubled debt restructuring with a borrower;
- · An entity's estimate of expected credit losses should always reflect the risk of loss, even when that risk is remote. However, an entity would not be required to recognize a loss on a financial asset in which the risk of nonpayment is greater than zero yet the amount of loss would be zero;
- · In addition to using a discounted cash flow model to estimate expected credit losses, an entity would not be prohibited from developing an estimate of credit losses using loss-rate methods, probability-of-default methods or a provision matrix using loss factors;
- · The final guidance on expected credit losses will include implementation guidance describing the factors that an entity should consider to adjust historical loss experience for current conditions and reasonable and supportable forecast.

FASB expects to issue this proposed accounting standard update in late 2015. An effective date has yet to be discussed. Upon adoption, the change in this accounting guidance could result in an increase in the Company's allowance for loan losses and require the Company to record loan losses more rapidly. Upon final issuance of the standard, the Company will be able to better evaluate the potential impact of this new standard on its consolidated financial statements.

In August 2014, the FASB issued an accounting standard update (ASU 2014-14) related to; Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40) Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure. The update requires that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if the following conditions are met: (1) The loan has a government guarantee that is not separable from the loan before foreclosure; (2) At the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the

Table Of Contents

guarantee, and the creditor has the ability to recover under that claim; (3) At the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. The amendments in the update are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2014. The Company adopted this accounting standard during the first quarter of 2015 and it did not have a material impact on its consolidated financial statements.

In June 2014, the FASB issued ASU 2014-12, Compensation – Stock Compensation (Topic 718) Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period, an amendment to the stock compensation accounting guidance to clarify that a performance target that affects vesting of a share-based payment and that could be achieved after the requisite service period be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant-date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. This amendment is effective for annual reporting periods, including interim periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted. Entities may apply the amendments in this update either (a) prospectively to all awards granted or modified after the effective date or (b) retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter. The Company does not expect this amendment to have a material impact on its consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the revenue recognition process than are required under existing U.S. GAAP: identify the contract(s) with a customer; identify the performance obligations in the contract; determine the transaction price; allocate the transaction price to the performance obligations in the contract; recognize revenue when (or as) the entity satisfies a performance obligation. The standard is effective for annual periods beginning after December 15, 2016, and interim periods therein, using either of the following transition methods: a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). The Company is evaluating the impact of the adoption of ASU 2014-09 on its consolidated financial statements and has not yet determined the method by which it will adopt the standard effective in the first quarter of 2017.

In January 2014, the FASB issued ASU 2014-04 related to; Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40) Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. The update applies to all creditors who obtain physical possession of residential real estate property collateralizing a consumer mortgage loan in satisfaction of a receivable. The amendments in this update clarify when an in-substance repossession or foreclosure occurs and requires disclosure of both (1) the amount of foreclosed residential real estate property held by a creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments in the update are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2014. The Company adopted this accounting standard during the first quarter of 2015 and it did not have a material impact on its consolidated financial statements.

3. Accumulated other comprehensive income

The following tables illustrate the changes in accumulated other comprehensive income by component and the details about the components of accumulated other comprehensive income as of and for the periods indicated:

As of and for the six months ended June 30, 2015

(dollars in thousands)	Unrealized gains on available-for-sale securities	Total
Beginning balance	$ 2,743	$ 2,743
Other comprehensive loss before reclassifications, net of tax	(819)	(819)
Amounts reclassified from accumulated other comprehensive income, net of tax	(12)	(12)
Net current-period other comprehensive loss	(831)	(831)
Ending balance	$ 1,912	$ 1,912

Table Of Contents

As of and for the three months ended June 30, 2015

4. Investment securities

Agency – Government-sponsored enterprise (GSE) and MBS - GSE residential

Agency – GSE and MBS – GSE residential securities consist of short- to long-term notes issued by Federal Home Loan Mortgage Corporation (FHLMC), Federal National Mortgage Association (FNMA), Federal Home Loan Bank (FHLB) and Government National Mortgage Association (GNMA). These securities have interest rates that are fixed and adjustable, have varying short- to long-term maturity dates and have contractual cash flows guaranteed by the U.S. government or agencies of the U.S. government.

Obligations of states and political subdivisions

The municipal securities are bank qualified or bank eligible, general obligation and revenue bonds rated as investment grade by various credit rating agencies and have fixed rates of interest with mid- to long-term maturities. Fair values of these securities are highly driven by interest rates. Management performs ongoing credit quality reviews on these issues.

The amortized cost and fair value of investment securities at June 30, 2015 and December 31, 2014 are summarized as follows:

(dollars in thousands)	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
June 30, 2015				
Held-to-maturity securities:				
MBS - GSE residential	$ -	$ -	$ -	$ -
Available-for-sale securities:				
Agency - GSE	$ 18,468	$ 116	$ 12	$ 18,572
Obligations of states and political subdivisions	35,831	1,858	215	37,474
MBS - GSE residential	64,321	1,226	336	65,211
Total debt securities	118,620	3,200	563	121,257
Equity securities - financial services	294	261	-	555
Total available-for-sale securities	$ 118,914	$ 3,461	$ 563	$ 121,812

(dollars in thousands)	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
December 31, 2014				
Held-to-maturity securities:				
MBS - GSE residential	$ -	$ -	$ -	$ -
Available-for-sale securities:				
Agency - GSE	$ 14,380	$ 29	$ 11	$ 14,398
Obligations of states and political subdivisions	34,609	2,444	20	37,033
MBS - GSE residential	44,455	1,438	23	45,870
Total debt securities	93,444	3,911	54	97,301
Equity securities - financial services	295	300	-	595
Total available-for-sale securities	$ 93,739	$ 4,211	$ 54	$ 97,896

Table Of Contents

The amortized cost and fair value of debt securities at June 30, 2015 by contractual maturity are summarized below:

(dollars in thousands)	Amortized cost	Fair value
Held-to-maturity securities:		
MBS - GSE residential	$ -	$ -
Available-for-sale securities:		
Debt securities:		
Due in one year or less	$ 1,420	$ 1,421
Due after one year through five years	16,393	16,493
Due after five years through ten years	3,009	3,209
Due after ten years	33,477	34,923
Total debt securities	54,299	56,046
MBS - GSE residential	64,321	65,211
Total available-for-sale debt securities	$ 118,620	$ 121,257

Actual maturities will differ from contractual maturities because issuers and borrowers may have the right to call or repay obligations with or without a call or prepayment penalty. Agency – GSE and municipal securities are included based on their original stated maturity. MBS – GSE residential, which are based on weighted-average lives and subject to monthly principal pay-downs, are listed in total. Most of the securities have fixed rates or have predetermined scheduled rate changes and many have call features that allow the issuer to call the security at par before its stated maturity without penalty.

The following table presents the fair value and gross unrealized losses of investment securities aggregated by investment type, the length of time and the number of securities that have been in a continuous unrealized loss position as of June 30, 2015 and December 31, 2014:

	Less than 12 months		More than 12 months		Total	
(dollars in thousands)	Fair value	Unrealized losses	Fair value	Unrealized losses	Fair value	Unrealized losses
June 30, 2015						
Agency - GSE	$ 2,036	$ 12	$ -	$ -	$ 2,036	$ 12
Obligations of states and political subdivisions	6,918	215	-	-	6,918	215
MBS - GSE residential	34,267	336	-	-	34,267	336
Total	$ 43,221	$ 563	$ -	$ -	$ 43,221	$ 563
Number of securities	33		-		33	

December 31, 2014						
Agency - GSE	$ 4,100	$ 11	$ 1,024	$ -	$ 5,124	$ 11
Obligations of states and political subdivisions	1,767	11	670	9	2,437	20
MBS - GSE residential	3,761	23	-	-	3,761	23
Total	$ 9,628	$ 45	$ 1,694	$ 9	$ 11,322	$ 54
Number of securities	9		3		12	

Management believes the cause of the unrealized losses is related to changes in interest rates, instability in the capital markets or the limited trading activity due to illiquid conditions in the debt market and is not directly related to credit quality. Quarterly, management conducts a formal review of investment securities for the presence of other-than-temporary impairment (OTTI). The accounting guidance related to OTTI requires the Company to assess whether OTTI is present when the fair value of a debt security is less than its amortized cost as of the balance sheet date. Under those circumstances, OTTI is considered to have occurred if: (1) the entity has intent to sell the security; (2) more likely than not the entity will be required to sell the security before recovery of its amortized cost basis; or (3) the present value of expected cash flows is not sufficient to recover the entire amortized cost. The accounting guidance requires that credit-related OTTI be recognized in earnings while non-credit-related OTTI on securities not

expected to be sold be recognized in other comprehensive income (loss) (OCI). Non-credit-related OTTI is based on other factors affecting market value, including illiquidity.

The Company's OTTI evaluation process also follows the guidance set forth in topics related to debt and equity securities. The guidance set forth in the pronouncements require the Company to take into consideration current market conditions, fair value in relationship to cost, extent and nature of changes in fair value, issuer rating changes and trends, volatility of earnings, current analysts' evaluations, all available information relevant to the collectability of debt securities, the ability and intent to hold investments until a recovery of fair value which may be to maturity and other factors when evaluating for the existence of OTTI. The guidance requires that credit-related OTTI be recognized as a realized loss through earnings when there has been an adverse change in the holder's expected cash flows such that the full amount (principal and interest) will probably not be received. This requirement is consistent with the impairment model in the guidance for accounting for debt and equity securities.

For all security types, as of June 30, 2015, the Company applied the criteria provided in the recognition and presentation guidance related to OTTI. That is, management has no intent to sell the securities and no conditions were identified by management that more likely than not would require the Company to sell the securities before recovery of their amortized cost basis. The results indicated there was no presence of OTTI in the Company's security portfolio. In addition, management believes the change in fair value is attributable to changes in interest rates.

5. Loans and leases

The classifications of loans and leases at June 30, 2015 and December 31, 2014 are summarized as follows:

(dollars in thousands)	June 30, 2015	December 31, 2014
Commercial and industrial	$ 87,774	$ 80,301
Commercial real estate:		
Non-owner occupied	95,113	94,771
Owner occupied	101,171	95,780
Construction	3,902	5,911
Consumer:		
Home equity installment	32,061	32,819
Home equity line of credit	44,698	42,188
Auto loans and leases	29,544	27,972
Other	6,742	6,501
Residential:		
Real estate	127,868	119,154
Construction	9,142	10,298
Total	538,015	515,695
Less:		
Allowance for loan losses	(9,259)	(9,173)
Unearned lease revenue	(270)	(195)
Loans and leases, net	$ 528,486	$ 506,327

Net deferred loan costs of $1.5 million and $1.4 million have been added to the carrying values of loans at June 30, 2015 and December 31, 2014, respectively.

Unearned lease revenue represents the difference between the lessor's investment in the property and the gross investment in the lease. Unearned revenue accretes over the life of the lease using the effective income method.

The Company services real estate loans for investors in the secondary mortgage market which are not included in the accompanying consolidated balance sheets. The approximate amount of mortgages serviced amounted to $258.0 million as of June 30, 2015 and $256.8 million as of December 31, 2014. Mortgage servicing rights amounted to $1.0 million as of both June 30, 2015 and December 31, 2014, respectively.

Management is responsible for conducting the Company's credit risk evaluation process, which includes credit risk grading of individual commercial and industrial and commercial real estate loans. Commercial and industrial and commercial real estate loans are assigned credit risk grades based on the Company's assessment of conditions that affect the borrower's ability to meet its contractual obligations under the loan agreement. That process includes reviewing borrowers' current financial information, historical payment experience, credit documentation, public information and other information specific to each individual borrower. Upon review, the commercial loan credit risk grade is revised or reaffirmed as the case may be. The credit risk grades may be changed at any time management feels an upgrade or downgrade may be warranted. The Company utilizes an external independent loan review firm that reviews and validates the credit risk program on at least an annual basis. Results of these reviews are presented to management and the

Table Of Contents

board of directors. The loan review process complements and reinforces the risk identification and assessment decisions made by lenders and credit personnel, as well as the Company's policies and procedures.

Non-accrual loans

The decision to place loans on non-accrual status is made on an individual basis after considering factors pertaining to each specific loan. Commercial and industrial (C&I) and commercial real estate (CRE) loans are placed on non-accrual status when management has determined that payment of all contractual principal and interest is in doubt or the loan is past due 90 days or more as to principal and interest, unless well-secured and in the process of collection. Consumer loans secured by real estate and residential mortgage loans are placed on non-accrual status at 120 days past due as to principal and interest and unsecured consumer loans are charged-off when the loan is 90 days or more past due as to principal and interest. The Company considers all non-accrual loans to be impaired loans.

Non-accrual loans, segregated by class, at June 30, 2015 and December 31, 2014, were as follows:

(dollars in thousands)	June 30, 2015	December 31, 2014
Commercial and industrial	$ 55	$ 27
Commercial real estate:		
Non-owner occupied	755	620
Owner occupied	1,930	2,013
Construction	240	256
Consumer:		
Home equity installment	252	312
Home equity line of credit	430	417
Auto loans and leases	1	1
Other	7	20
Residential:		
Real estate	580	549
Total	$ 4,250	$ 4,215

Troubled Debt Restructuring

A modification of a loan constitutes a troubled debt restructuring (TDR) when a borrower is experiencing financial difficulty and the modification constitutes a concession. The Company considers all TDRs to be impaired loans. The Company offers various types of concessions when modifying a loan, however, forgiveness of principal is rarely granted. C&I loans modified in a TDR often involve temporary interest-only payments, term extensions, and converting revolving credit lines to term loans. Additional collateral, a co-borrower, or a guarantor is often requested. CRE loans modified in a TDR often involve reducing the interest rate for the remaining term of the loan, extending the maturity date at an interest rate lower than the current market rate for new debt with similar risk, or substituting or adding a new borrower or guarantor. Commercial real estate construction loans modified in a TDR may also involve extending the interest-only payment period. Residential mortgage loans modified in a TDR are primarily comprised of loans where monthly payments are lowered to accommodate the borrowers' financial needs for an extended period of time. After the lowered monthly payment period ends, the borrower would revert back to paying principal and interest pursuant to the original terms with the maturity date adjusted accordingly. Consumer loan modifications are

typically not granted and therefore standard modification terms do not exist for loans of this type.

Loans modified in a TDR may or may not be placed on non-accrual status. As of June 30, 2015, total TDRs amounted to $3.4 million (consisting of 8 CRE loans and 2 C&I loans to 6 unrelated borrowers), of which one with a balance of $0.8 million was on non-accrual status, compared to $1.6 million (consisting of 4 CRE loans and 1 C&I loan to 3 unrelated borrowers) and $0.9 million, respectively, as of December 31, 2014. Of the TDRs outstanding as of June 30, 2015 and December 31, 2014, when modified, the concessions granted consisted of temporary interest-only payments or a reduction in the rate of interest to a below-market rate for a contractual period of time. Other than the TDR that was on non-accrual status, the TDRs were performing in accordance with their modified terms.

Table Of Contents

The following presents by class, information related to loans modified in a TDR:

(dollars in thousands)	Loans modified as TDRs for the: Three months ended June 30, 2015			Six months ended June 30, 2015		
	Number of contracts	Recorded investment (as of period end)	Increase in allowance (as of period end)	Number of contracts	Recorded investment (as of period end)	Increase in allowance (as of period end)
Commercial and industrial	-	$ -	$ -	1	$ 500	$ 331
Commercial real estate - owner occupied	2	158	-	4	1,265	251
Total	2	$ 158	$ -	5	$ 1,765	$ 582

In the above table, the period end balances are inclusive of all partial pay downs and charge-offs since the modification date.

Loans modified in a TDR are closely monitored for delinquency as an early indicator of possible future default. If loans modified in a TDR subsequently default, the Company evaluates the loan for possible further impairment. There were no loans modified as a TDR within the previous twelve months that subsequently defaulted during the three and six months ended June 30, 2015.

The allowance for loan losses (allowance) may be increased, adjustments may be made in the allocation of the allowance or partial charge-offs may be taken to further write-down the carrying value of the loan. An allowance for impaired loans that have been modified in a TDR is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or the loan's observable market price. If the loan is collateral dependent, the estimated fair value of the collateral, less any selling costs, is used to establish the allowance.

Past due loans

Loans are considered past due when the contractual principal and/or interest is not received by the due date. An aging analysis of past due loans, segregated by class of loans, as of the period indicated is as follows (dollars in thousands):

June 30, 2015	30 - 59 Days past due	60 - 89 Days past due	Past due 90 days or more (1)	Total past due	Current	Total loans (3)	Recorded investment past due ≥ 90 days and accruing
Commercial and industrial	$ 87	$ -	$ 55	$ 142	$ 87,632	$ 87,774	$ -
Commercial real estate:							

Non-owner occupied	600	254	755	1,609	93,504	95,113		-
Owner occupied	228	98	1,930	2,256	98,915	101,171		-

Total	$ 2,490	$ 1,442	$ 5,275	$ 9,207	$ 506,293	$ 515,500		$ 1,060

(1) Includes $4.2 million of non-accrual loans. (2) Net of unearned lease revenue of $0.2 million. (3) Includes net deferred loan costs of $1.4 million.

Impaired loans

A loan is considered impaired when, based on current information and events; it is probable that the Company will be unable to collect the scheduled payments in accordance with the contractual terms of the loan. Factors considered in determining impairment include payment status, collateral value and the probability of collecting payments when due. The significance of payment delays and/or shortfalls is determined on a case-by-case basis. All circumstances surrounding the loan are taken into account. Such factors include the length of the delinquency, the underlying reasons and the borrower's prior payment record. Impairment is measured on these loans on a loan-by-loan basis. Impaired loans include non-accrual loans, TDRs and other loans deemed to be impaired based on the aforementioned factors.

At June 30, 2015, impaired loans consisted of accruing TDRs totaling $2.5 million, $4.3 million of non-accrual loans and a $1.2 million accruing loan. At December 31, 2014, impaired loans consisted of accruing TDRs totaling $0.7 million, $4.2 million of non-accrual loans and a $1.2 million accruing loan. As of June 30, 2015 and December 31, 2014, the non-accrual loans included non-accruing TDRs of $0.8 million and $0.9 million, respectively. Payments received from non-accruing impaired loans are first applied against the outstanding principal balance, then to the recovery of any charged-off amounts. Any excess is treated as a recovery of interest income. Payments received from accruing impaired loans are applied to principal and interest, as contractually agreed upon.

Impaired loans, segregated by class, as of the period indicated are detailed below:

(dollars in thousands)	Unpaid principal balance	Recorded investment with allowance	Recorded investment with no allowance	Total recorded investment	Related allowance	Average recorded investment	Interest income recognized	Cash basis interest income recognized

Credit Quality Indicators

Commercial and industrial and commercial real estate

The Company utilizes a loan grading system and assigns a credit risk grade to its loans in the C&I and CRE portfolios. The grading system provides a means to measure portfolio quality and aids in the monitoring of the credit quality of the overall loan portfolio. The credit risk grades are arrived at using a risk rating matrix to assign a grade to each of the loans in the C&I and CRE portfolios.

The following is a description of each risk rating category the Company uses to classify each of its C&I and CRE loans:

Pass

Loans in this category have an acceptable level of risk and are graded in a range of one to five. Secured loans generally have good collateral coverage. Current financial statements reflect acceptable balance sheet ratios, sales and earnings trends. Management is considered to be competent, and a reasonable succession plan is evident. Payment experience on the loans has been good with minor or no delinquency experience. Loans with a grade of one are of the highest quality in the range. Those graded five are of marginally acceptable quality.

Special Mention

Loans in this category are graded a six and may be protected but are potentially weak. They constitute a credit risk to the Company, but have not yet reached the point of adverse classification. Some of the following conditions may exist: little or no collateral coverage; lack of current financial information; delinquency problems; highly leveraged; available financial information reflects poor balance sheet ratios and profit and loss statements reflect uncertain trends; and document exceptions. Cash flow may not be sufficient to support total debt service requirements.

Substandard

Loans in this category are graded a seven and have a well-defined weakness which may jeopardize the ultimate collectability of the debt. The collateral pledged may be lacking in quality or quantity. Financial statements may indicate insufficient cash flow to service the debt; and/or do not reflect a sound net worth. The payment history indicates chronic delinquency problems. Management is considered to be weak. There is a distinct possibility that the Company may sustain a loss. All loans on non-accrual are rated substandard. Other loans that are included in the substandard category can be accruing, as well as loans that are current or past due. Loans 90 days or more past due, unless otherwise fully supported, are classified substandard. Also, borrowers that are bankrupt or have loans categorized as TDRs can be graded substandard.

Doubtful

Loans in this category are graded an eight and have a better than 50% possibility of the Company sustaining a loss, but the loss cannot be determined because of specific reasonable factors which may strengthen credit in the near-term. Many of the weaknesses present in a substandard loan exist. Liquidation of collateral, if any, is likely. Any loan graded lower than an eight is considered to be uncollectible and charged-off.

Consumer and residential

The consumer and residential loan segments are regarded as homogeneous loan pools and as such are not risk rated. For these portfolios, the Company utilizes payment activity, history and recency of payment in assessing performance. Non-performing loans

Table Of Contents

are considered to be loans past due 90 days or more and accruing and non-accrual loans. All loans not classified as non-performing are considered performing.

The following table presents loans including $1.5 million and $1.4 million of deferred costs, segregated by class, categorized into the appropriate credit quality indicator category as of June 30, 2015 and December 31, 2014, respectively:

Allowance for loan losses

Management continually evaluates the credit quality of the Company's loan portfolio and performs a formal review of the adequacy of the allowance on a quarterly basis. The allowance reflects management's best estimate of the amount of credit losses in the loan portfolio. Management's judgment is based on the evaluation of individual loans, past experience, the assessment of current economic conditions and other relevant factors including the amounts and timing of cash flows expected to be received on impaired loans. Those estimates may be susceptible to significant change. Loan losses are charged directly against the allowance when loans are deemed to be uncollectible. Recoveries from previously charged-off loans are added to the allowance when received.

Management applies two primary components during the loan review process to determine proper allowance levels. The two components are a specific loan loss allocation for loans that are deemed impaired and a general loan loss allocation for those loans not specifically allocated. The methodology to analyze the adequacy of the allowance for loan losses is as follows:

§ identification of specific impaired loans by loan category;
§ identification of specific loans that are not impaired, but have an identified potential for loss;
§ calculation of specific allowances where required for the impaired loans based on collateral and other objective and quantifiable evidence;
§ determination of loans with similar credit characteristics within each class of the loan portfolio segment and eliminating the impaired loans;
§ application of historical loss percentages (trailing twelve-quarter average) to pools to determine the allowance allocation;
§ application of qualitative factor adjustment percentages to historical losses for trends or changes in the loan portfolio.
§ Qualitative factor adjustments include:
o levels of and trends in delinquencies and non-accrual loans;
o levels of and trends in charge-offs and recoveries;
o trends in volume and terms of loans;

Table Of Contents

- o changes in risk selection and underwriting standards;
- o changes in lending policies, procedures and practices;
- o experience, ability and depth of lending management;
- o national and local economic trends and conditions; and
- o changes in credit concentrations.

Allocation of the allowance for different categories of loans is based on the methodology as explained above. A key element of the methodology to determine the allowance is the Company's credit risk evaluation process, which includes credit risk grading of individual C&I and CRE loans. C&I and CRE loans are assigned credit risk grades based on the Company's assessment of conditions that affect the borrower's ability to meet its contractual obligations under the loan agreement. That process includes reviewing borrowers' current financial information, historical payment experience, credit documentation, public information and other information specific to each individual borrower. Upon review, the commercial loan credit risk grade is revised or reaffirmed as the case may be. The credit risk grades may be changed at any time management feels an upgrade or downgrade may be warranted. The credit risk grades for the C&I and CRE loan portfolios are taken into account in the reserve methodology and loss factors are applied based upon the credit risk grades. The loss factors applied are based upon the Company's historical experience as well as what we believe to be best practices and common industry standards. Historical experience reveals there is a direct correlation between the credit risk grades and loan charge-offs. The changes in allocations in the C&I and CRE loan portfolio from period to period are based upon the credit risk grading system and from periodic reviews of the loan portfolio. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies.

Each quarter, management performs an assessment of the allowance. The Company's Special Assets Committee meets monthly and the applicable lenders discuss each relationship under review and reach a consensus on the appropriate estimated loss amount, if applicable, based on current accounting guidance. The Special Assets Committee's focus is on ensuring the pertinent facts are considered regarding not only loans considered for specific reserves, but also the collectability of loans that may be past due in payment. The assessment process also includes the review of all loans on a non-accruing basis as well as a review of certain loans to which the lenders or the Company's Credit Administration function have assigned a criticized or classified risk rating.

The Company's policy is to charge-off unsecured consumer loans when they become 90 days or more past due as to principal and interest. In the other portfolio segments, amounts are charged-off at the point in time when the Company deems the balance, or a portion thereof, to be uncollectible.

Information related to the change in the allowance and the Company's recorded investment in loans by portfolio segment as of the period indicated is as follows:

Table Of Contents

6. Earnings per share

Basic earnings per share (EPS) is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted EPS is computed in the same manner as basic EPS but also reflects the potential dilution that could occur from the grant of stock-based compensation awards. The Company maintains two active share-based compensation plans that may generate additional potentially dilutive common shares. For granted and unexercised stock options, dilution would occur if Company-issued stock options were exercised and converted into common stock. As of the three and six months ended June 30, 2015, there were 3,012 and 2,783 potentially dilutive shares related to issued and unexercised stock options compared to 38 and 27 for the same 2014 periods. For restricted stock, dilution would occur from the Company's previously granted but unvested shares. There were 2,593 and 4,759 potentially dilutive shares related to unvested restricted share grants as of the three and six months ended June 30, 2015 compared to 3,631 and 3,665 for the three and six months ended June 30, 2014, respectively.

In the computation of diluted EPS, the Company uses the treasury stock method to determine the dilutive effect of its granted but unexercised stock options and unvested restricted stock. Under the treasury stock method, the assumed proceeds, as defined, received from shares issued in a hypothetical stock option exercise or restricted stock grant, are assumed to be used to purchase treasury stock. Proceeds include: amounts received from the exercise of outstanding stock options; compensation cost for future service that the Company has not yet recognized in earnings; and any windfall tax benefits that would be credited directly to shareholders' equity when the grant generates a tax deduction (or a reduction in proceeds if there is a charge to equity). The Company does not consider awards from share-based grants in the computation of basic EPS.

The following table illustrates the data used in computing basic and diluted EPS for the periods indicated:

	Three months ended June 30,		Six months ended June 30,	
	2015	2014	2015	2014
(dollars in thousands except per share data)				
Basic EPS:				
Net income available to common shareholders	$ 1,780	$ 1,627	$ 3,353	$ 3,083
Weighted-average common shares outstanding	2,439,905	2,411,754	2,437,906	2,405,278
Basic EPS	$ 0.73	$ 0.67	$ 1.38	$ 1.28
Diluted EPS:				
Net income available to common shareholders	$ 1,780	$ 1,627	$ 3,353	$ 3,083
Weighted-average common shares outstanding	2,439,905	2,411,754	2,437,906	2,405,278
Potentially dilutive common shares	5,605	3,669	7,542	3,692
Weighted-average common and potentially dilutive shares outstanding	2,445,510	2,415,423	2,445,448	2,408,970
Diluted EPS	$ 0.73	$ 0.67	$ 1.37	$ 1.28

7. Stock plans

The Company has two stock-based compensation plans (the stock compensation plans) from which it can grant stock-based compensation awards, and applies the fair value method of accounting for stock-based compensation provided under current accounting guidance. The guidelines require the cost of share-based payment transactions (including those with employees and non-employees) be recognized in the financial statements. The Company's stock compensation plans were shareholder-approved and permit the grant of share-based compensation awards to its employees and directors. The Company believes that the stock-based compensation plans will advance the development, growth and financial condition of the Company by providing incentives through participation in the appreciation in the value of the Company's common stock. In return, the Company hopes to secure, retain and motivate the employees and directors who are responsible for the operation and the management of the affairs of the Company by aligning the interest of its employees and directors with the interest of its shareholders. In the stock compensation plans, employees and directors are eligible to be awarded stock-based compensation grants which can consist of stock options (qualified and non-qualified), stock appreciation rights (SARs) and restricted stock.

At the 2012 annual shareholders' meeting, the Company's shareholders approved and the Company adopted the 2012 Omnibus Stock Incentive Plan and the 2012 Director Stock Incentive Plan (collectively, the 2012 stock incentive plans). The 2012 stock incentive plans replaced both the expired 2000 Independent Directors Stock Option Plan and the 2000 Stock Incentive Plan (collectively, the 2000 stock incentive plans). Unless terminated by the Company's board of directors, the 2012 stock incentive plans will expire on, and no stock-based awards shall be granted after the year 2022.

In each of the 2012 stock incentive plans, the Company has reserved 500,000 shares of its no-par common stock for future issuance. The Company recognizes share-based compensation expense over the requisite service or vesting period.

Table Of Contents

The following table summarizes the weighted-average fair value and vesting of restricted stock grants awarded during the six months ended June 30, 2015 and 2014 under the 2012 stock incentive plans:

	2015			2014		
	Shares granted	Weighted-average grant date fair value	Vesting period	Shares granted	Weighted-average grant date fair value	Vesting period
Director plan	3,200	$ 32.25	1 year	2,000	$ 27.00	1 year
Omnibus plan	3,300	32.25	4 yrs - 25% per year	2,120	27.00	4 yrs - 25% per year
Omnibus plan	50	32.50	1 year	-	-	
Omnibus plan	1,400	34.25	4 yrs - 25% per year	-	-	
Total	7,950	$ 32.60		4,120	$ 27.00	

A summary of the status of the Company's restricted stock grants as of and changes during the periods indicated are presented in the following table:

	2012 Stock incentive plans		
	Director	Omnibus	Total
Balance at December 31, 2014	6,000	5,870	11,870
Granted	3,200	4,750	7,950
Vested	(6,000)	(1,780)	(7,780)
Balance at June 30, 2015	3,200	8,840	12,040

For restricted stock, intrinsic value represents the closing price of the underlying stock at the end of the period. As of June 30, 2015, the intrinsic value of the Company's restricted stock under the Director and Omnibus plans was $33.50 per share.

Share-based compensation expense is included as a component of salaries and employee benefits in the consolidated statements of income. The following tables illustrate stock-based compensation expense recognized during the three and six months ended June 30, 2015 and 2014 and the unrecognized stock-based compensation expense as of June 30, 2015:

	Three months	Six months ended

	ended			
	June 30,		June 30,	
(dollars in thousands)	2015	2014	2015	2014
Stock-based compensation expense:				
Director plan	$ 26	$ 35	$ 54	$ 65
Omnibus plan	18	10	33	19
Total stock-based compensation expense	$ 44	$ 45	$ 87	$ 84

	As of June 30,
(dollars in thousands)	2015
Unrecognized stock-based compensation expense:	
Director plan	$ 60
Omnibus plan	222
Total unrecognized stock-based compensation expense	$ 282

The unrecognized stock-based compensation expense as of June 30, 2015 will be recognized ratably over the periods ended January 2016 and May 2019 for the Director Plan and the Omnibus Plan, respectively.

In addition to the 2012 stock incentive plans, the Company established the 2002 Employee Stock Purchase Plan (the ESPP) and reserved 110,000 shares of its un-issued capital stock for issuance under the plan. The ESPP was designed to promote broad-based employee ownership of the Company's stock and to motivate employees to improve job performance and enhance the financial results of the Company. Under the ESPP, participation is voluntary whereby employees use automatic payroll withholdings to purchase the Company's capital stock at a discounted price based on the fair market value of the capital stock as measured on either the commencement or termination dates, as defined. As of June 30, 2015, 38,687 shares have been issued under the ESPP. The ESPP is considered a compensatory plan and is required to comply with the provisions of current accounting guidance. The Company recognizes compensation expense on its ESPP on the date the shares are purchased. For the six months ended June 30, 2015 and 2014, compensation expense related to the ESPP approximated $44 thousand and $33 thousand, respectively, and is included as a component of salaries and employee benefits in the consolidated statements of income.

8. Fair value measurements

The accounting guidelines establish a framework for measuring and disclosing information about fair value measurements. The guidelines of fair value reporting instituted a valuation hierarchy for disclosure of the inputs used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows:

Level 1 - inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - inputs are quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument;

Level 3 - inputs are unobservable and are based on the Company's own assumptions to measure assets and liabilities at fair value. Level 3 pricing for securities may also include unobservable inputs based upon broker-traded transactions.

A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

The Company uses fair value to measure certain assets and, if necessary, liabilities on a recurring basis when fair value is the primary measure for accounting. Thus, the Company uses fair value for AFS securities. Fair value is used on a non-recurring basis to measure certain assets when adjusting carrying values to market values, such as impaired loans, other real estate owned (ORE) and other repossessed assets.

The following table represents the carrying amount and estimated fair value of the Company's financial instruments as of the periods indicated:

June 30, 2015

(dollars in thousands)	Carrying amount	Estimated fair value	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)

Long-term debt	10,000	10,758	-	10,758	-

Table Of Contents

The carrying value of short-term financial instruments, as listed below, approximates their fair value. These instruments generally have limited credit exposure, no stated or short-term maturities, carry interest rates that approximate market and generally are recorded at amounts that are payable on demand :

- Cash and cash equivalents;
- Non-interest bearing deposit accounts;
- Savings, interest-bearing checking and money market accounts and
- Short-term borrowings.

Securities: Fair values on investment securities are determined by prices provided by a third-party vendor, who is a provider of financial market data, analytics and related services to financial institutions.

Loans: The fair value of loans is estimated by the net present value of the future expected cash flows discounted at current offering rates for similar loans. Current offering rates consider, among other things, credit risk. The carrying value that fair value is compared to is net of the allowance for loan losses and since there is significant judgment included in evaluating credit quality, loans are classified within Level 3 of the fair value hierarchy.

Loans held-for-sale: The fair value of loans held-for-sale is estimated using rates currently offered for similar loans and is typically obtained from the Federal National Mortgage Association (FNMA) or the Federal Home Loan Bank of Pittsburgh (FHLB).

Certificates of deposit: The fair value of certificates of deposit is based on discounted cash flows using rates which approximate market rates for deposits of similar maturities.

Long-term debt: Fair value is estimated using the rates currently offered for similar borrowings.

The following tables illustrate the financial instruments measured at fair value on a recurring basis segregated by hierarchy fair value levels as of the periods indicated:

(dollars in thousands)	Total carrying value June 30, 2015	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
Available-for-sale securities:				
Agency - GSE	$ 18,572	$ -	$ 18,572	$ -
Obligations of states and political subdivisions	37,474	-	37,474	-
MBS - GSE residential	65,211	-	65,211	-
Equity securities - financial services	555	555	-	-
Total available-for-sale securities	$ 121,812	$ 555	$ 121,257	$ -

(dollars in thousands)	Total carrying value December 31, 2014	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
Available-for-sale securities:				
Agency - GSE	$ 14,398	$ -	$ 14,398	$ -
Obligations of states and political subdivisions	37,033	-	37,033	-
MBS - GSE residential	45,870	-	45,870	-
Equity securities - financial services	595	595	-	-
Total available-for-sale securities	$ 97,896	$ 595	$ 97,301	$ -

Equity securities in the AFS portfolio are measured at fair value using quoted market prices for identical assets and are classified within Level 1 of the valuation hierarchy. Debt securities in the AFS portfolio are measured at fair value using market quotations provided by a third-party vendor, who is a provider of financial market data, analytics and related services to financial institutions. Assets classified as Level 2 use valuation techniques that are common to bond valuations. That is, in active markets whereby bonds of similar characteristics frequently trade, quotes for similar assets are obtained. For the six months ended June 30, 2015 and the year ended December 31, 2014, there were no transfers to or from Level 1 and Level 2 fair value measurements for financial assets measured on a recurring basis.

Table Of Contents

There were no changes in Level 3 financial instruments measured at fair value on a recurring basis as of and for the periods ending June 30, 2015 and December 31, 2014.

The following table illustrates the financial instruments measured at fair value on a non-recurring basis segregated by hierarchy fair value levels as of the periods indicated:

(dollars in thousands)	Total carrying value at June 30, 2015	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
Impaired loans	$ 2,996	$ -	$ -	$ 2,996
Other real estate owned	1,174	-	-	1,174
Other repossessed assets	36	-	-	36
Total	$ 4,206	$ -	$ -	$ 4,206

(dollars in thousands)	Total carrying value at December 31, 2014	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
Impaired loans	$ 2,158	$ -	$ -	$ 2,158
Other real estate owned	1,506	-	-	1,506
Total	$ 3,664	$ -	$ -	$ 3,664

From time-to-time, the Company may be required to record at fair value financial instruments on a non-recurring basis, such as impaired loans, ORE and other repossessed assets. These non-recurring fair value adjustments involve the application of lower-of-cost-or-market accounting on write downs of individual assets.

The following describes valuation methodologies used for financial instruments measured at fair value on a non-recurring basis.

Impaired loans that are collateral dependent are written down to fair value through the establishment of specific reserves, a component of the allowance for loan losses, and as such are carried at the lower of net recorded investment

or the estimated fair value.

Estimates of fair value of the collateral are determined based on a variety of information, including available valuations from certified appraisers for similar assets, present value of discounted cash flows and inputs that are estimated based on commonly used and generally accepted industry liquidation advance rates and estimates and assumptions developed by management.

Valuation techniques for impaired loans are typically determined through independent appraisals of the underlying collateral or may be determined through present value of discounted cash flows. Both techniques include various Level 3 inputs which are not identifiable. The valuation technique may be adjusted by management for estimated liquidation expenses and qualitative factors such as economic conditions. If real estate is not the primary source of repayment, present value of discounted cash flows and estimates using generally accepted industry liquidation advance rates and other factors may be utilized to determine fair value.

At June 30, 2015 and December 31, 2014, the range of liquidation expenses and other valuation adjustments applied to impaired loans ranged from -19.96% to -86.29% and from -19.96% to -42.41% respectively. The weighted-average of liquidation expenses and other valuation adjustments applied to impaired loans amounted to -28.20% and -27.26% as of June 30, 2015 and December 31, 2014, respectively. Due to the multitude of assumptions, many of which are subjective in nature, and the varying inputs and techniques used to determine fair value, the Company recognizes that valuations could differ across a wide spectrum of techniques employed. Accordingly, fair value estimates for impaired loans are classified as Level 3.

For ORE, fair value is generally determined through independent appraisals of the underlying properties which generally include various Level 3 inputs which are not identifiable. Appraisals form the basis for determining the net realizable value from these properties. Net realizable value is the result of the appraised value less certain costs or discounts associated with liquidation which occurs in the normal course of business. Management’s assumptions may include consideration of the location and occupancy of the property, along with current economic conditions. Subsequently, as these properties are actively marketed, the estimated fair values may be periodically adjusted through incremental subsequent write-downs. These write-downs usually reflect decreases in estimated values resulting from sales price observations as well as changing economic and market conditions. At June 30, 2015 and December 31, 2014, the discounts applied to the appraised values of ORE ranged from -15.90% to -99.00% and from -19.00% to -99.00%, respectively. As of June 30, 2015 and December 31, 2014, the weighted-average of discount to the appraisal values of ORE amounted to -34.33% and -27.23%, respectively.

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is management's discussion and analysis of the significant changes in the consolidated financial condition of the Company as of June 30, 2015 compared to December 31, 2014 and a comparison of the results of operations for the three and six months ended June 30, 2015 and 2014. Current performance may not be indicative of future results. This discussion should be read in conjunction with the Company's 2014 Annual Report filed on Form 10-K.

Forward-looking statements

Certain of the matters discussed in this Quarterly Report on Form 10-Q may constitute forward-looking statements for purposes of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, and as such may involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. The words "expect," "anticipate," "intend," "plan," "believe," "estimate," and similar expressions are intended to identify such forward-looking statements.

The Company's actual results may differ materially from the results anticipated in these forward-looking statements due to a variety of factors, including, without limitation:

§ the effects of economic conditions on current customers, specifically the effect of the economy on loan customers' ability to repay loans;
§ the costs and effects of litigation and of unexpected or adverse outcomes in such litigation;
§ the impact of new or changes in existing laws and regulations, including the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 and the regulations promulgated there under;
§ impacts of the new capital and liquidity requirements of the Basel III standards and other regulatory pronouncements, regulations and rules;
§ governmental monetary and fiscal policies, as well as legislative and regulatory changes;
§ effects of short- and long-term federal budget and tax negotiations and their effect on economic and business conditions;
§ the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Financial Accounting Standards Board and other accounting standard setters;
§ the risks of changes in interest rates on the level and composition of deposits, loan demand, and the values of loan collateral, securities and interest rate protection agreements, as well as interest rate risks;
§ the effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds and other financial institutions operating in our market area and elsewhere, including institutions operating locally, regionally, nationally and internationally, together with such competitors offering banking products and services by mail, telephone, computer and the internet;
§ technological changes;
§ the interruption or breach in security of our information systems resulting in failures or disruptions in customer account management, general ledger processing and loan or deposit updates;
§ acquisitions and integration of acquired businesses;
§ the failure of assumptions underlying the establishment of reserves for loan losses and estimations of values of collateral and various financial assets and liabilities;
§ volatilities in the securities markets;
§ acts of war or terrorism;
§ disruption of credit and equity markets; and
§

the risk that our analyses of these risks and forces could be incorrect and/or that the strategies developed to address them could be unsuccessful.

The Company cautions readers not to place undue reliance on forward-looking statements, which reflect analyses only as of the date of this document. The Company has no obligation to update any forward-looking statements to reflect events or circumstances after the date of this document.

Readers should review the risk factors described in other documents that we file or furnish, from time to time, with the Securities and Exchange Commission, including Annual Reports to Shareholders, Annual Reports filed on Form 10-K and other current reports filed or furnished on Form 8-K.

Executive Summary

The Company is a Pennsylvania corporation and a bank holding company, whose wholly-owned state chartered commercial bank is The Fidelity Deposit and Discount Bank. The Company is headquartered in Dunmore, Pennsylvania. We consider Lackawanna and Luzerne Counties our primary marketplace.

As a leading Northeastern Pennsylvania community bank, our goals are to enhance shareholder value while continuing to build a full-service community bank. We focus on growing our core business of retail and business lending and deposit gathering while maintaining strong asset quality and controlling operating expenses. We continue to implement strategies to diversify earning assets

Table Of Contents

and to increase low cost core deposits. These strategies include a greater level of commercial lending and the ancillary business products and services supporting our commercial customers' needs as well as residential lending strategies and an array of consumer products. We focus on developing a full banking relationship with existing, as well as new, small- and middle-sized business prospects. In addition, we explore opportunities to selectively expand our franchise footprint, consisting presently of our 11-branch network, including the relocation of a branch during the second quarter of 2015.

We are impacted by both national and regional economic factors, with commercial, commercial real estate and residential mortgage loans concentrated in Northeastern Pennsylvania, primarily in Lackawanna and Luzerne counties. Although the U.S. economy has shown signs of modest improvement, the general operating environment and our local market area continue to remain challenging. Interest rates have been at or near historical lows and we expect them to remain low in the near-term, but slowly rise with rate increases beginning late in 2015 or early in 2016. A rising rate environment positions the Company to improve its net interest income performance, but will continue to pressure the interest-rate yield and margin. Long-term interest rates saw some improvement in the first half of 2015, with the ten-year U.S. Treasury rate increasing from 2.17% at the end of December 2014 to 2.35% at the end of June 2015, yet the rate remained 18 basis points lower than the rate from one year ago. The national unemployment rate for June 2015 was 5.3%, down from 5.6% at December 2014 with new job growth in 2015 continuing at its slow pace. However, in our region (Scranton, Wilkes-Barre Metropolitan Statistical Area), the unemployment rate has increased to 6.3% at June 30, 2015 from 5.6% as of December 31, 2014 and down, however, from 7.1% at June 30, 2014. Despite an increase in the unemployment rate in the first half of 2015, more people are entering the labor force than were in December which is a positive sign for the local economy. The median home values in the region grew 2.0% from a year ago, and according to Zillow, an online database advertising firm providing access to its real estate search engines to various media outlets, values will rise 2.6% within the next year. In light of these statistics, we will continue to monitor the economic climate in our region and scrutinize growth prospects with credit quality as a principal consideration.

In addition to the challenging economic environment in which we compete, the regulation and oversight of our business has changed significantly in recent years. As described more fully in Part I, Item 1A, "Risk Factors," and in the "Supervisory and Regulation" section of management's discussion and analysis of financial condition and results of operations in our 2014 Annual Report filed on Form 10-K, certain aspects of the Dodd-Frank Wall Street Reform Act (Dodd-Frank Act) continue to have a significant impact on us. In addition, final rules to implement Basel III regulatory capital reform, approved by the federal bank regulatory agencies in 2013, subject many banks including the Company, to capital requirements which will be phased in. The initial provisions effective for us began on January 1, 2015. The rules also revise the minimum risk-based and leverage capital ratio requirements applicable to the Company and revise the calculation of risk-weighted assets to enhance their risk sensitivity. We will continue to prepare for the impacts that the Dodd-Frank Act and the Basel III capital standards, and related rulemaking will have on our business, financial condition and results of operations.

General

The Company's earnings depend primarily on net interest income. Net interest income is the difference between interest income and interest expense. Interest income is generated from yields earned on interest-earning assets, which consist principally of loans and investment securities. Interest expense is incurred from rates paid on interest-bearing liabilities, which consist of deposits and borrowings. Net interest income is determined by the Company's interest rate spread (the difference between the yields earned on its interest-earning assets and the rates paid on its interest-bearing liabilities) and the relative amounts of interest-earning assets and interest-bearing liabilities. Interest rate spread is significantly impacted by: changes in interest rates and market yield curves and their related impact on cash flows; the composition and characteristics of interest-earning assets and interest-bearing liabilities; differences in the maturity and re-pricing characteristics of assets compared to the maturity and re-pricing characteristics of the liabilities that

fund them and by the competition in the marketplace.

The Company’s earnings are also affected by the level of its non-interest income and expenses and by the provisions for loan losses and income taxes. Non-interest income consists of: service charges on the Company’s loan and deposit products; interchange fees; trust and asset management service fees; increases in the cash surrender value of the bank owned life insurance and from net gains or losses from sales of loans and securities. Non-interest expense consists of: compensation and related employee benefit costs; occupancy; equipment; data processing; advertising and marketing; FDIC insurance premiums; professional fees; loan collection; net other real estate owned (ORE) expenses; supplies and other operating overhead.

Comparison of the results of operations

Three and six months ended June 30, 2015 and 2014

Overview

For the second quarter of 2015, the company generated net income of $1.8 million, or $0.73 per diluted share, compared to $1.6 million, or $0.67 per diluted share, for the same 2014 quarter. Net income for the first half of 2015 increased $0.3 million, or 9%, to $3.4 million, or $1.37 per diluted share, compared to $3.1 million, or $1.28 per diluted share, in the same 2014 period. In both the quarter and year-to-date comparisons, the increase was due to higher net interest income combined with a 50% lower provision for loan losses partially offset by higher non-interest expenses. Non-interest expense increased mostly due to higher salaries and benefits, professional fees and a FHLB prepayment fee.

Table Of Contents

Return on average assets (ROA) was 1.01% for both the second quarters of 2015 and 2014, respectively, and 0.96% for both the six months ended June 30, 2015 and 2014, respectively. ROA did not experience a change in the quarter and year-to-date periods because the impact of the increase in net income was in line with the increase in average assets. Return on average shareholders' equity (ROE) was 9.67% and 9.47% for the three months ended June 30, 2015 and 2014, respectively, and 9.21% and 9.14% for the six months ended June 30, 2015 and 2014, respectively. ROE increased in both periods because of the increase in net income.

Net interest income and interest sensitive assets / liabilities

Net interest income increased $0.4 million, or 7%, from $5.4 million for the quarter ended June 30, 2014 to $5.8 million for the quarter ended June 30, 2015 because of higher total interest income and, to a lesser extent, reduced interest expense. Growth in the loan portfolio had the biggest impact on interest income. Higher average balances of $38.7 million caused an increase of $0.3 million in interest income and helped offset a 10 basis point net reduction in loan yields. Though all loan portfolios showed more interest income from average growth, the mortgage loan portfolio had the most accretive impact due to the Company's mortgage modification program. This program offered mortgage customers, both secondary-market compliant and held for portfolio, shorter-termed loans with current interest rates for a flat fee. The decrease in interest expense stemmed from $84 thousand less interest paid on borrowed funds due to the $6.0 million pay down of long-term debt that occurred in the fourth quarter of 2014. The remaining long-term debt was paid off at the end of the second quarter of 2015 which will further reduce interest expense on borrowed funds for the remainder of the year. The decrease was partially offset by an increase of $10 thousand in interest expense on deposits due to higher average balances of $43.2 million in interest-bearing checking and money market accounts and higher rates paid on interest-bearing checking offset by lower balances and lower rates paid on certificates of deposit, or CDs.

Net interest income for the six months ended June 30, 2015 increased $0.7 million, or 6%, from $10.7 million at the first half of 2014 to $11.4 million at the first half of 2015, respectively. Average interest-earning assets increased $53.1 million which boosted income by $0.6 million despite a 17 basis point net reduction in yield. As in the quarterly comparison, higher average balances in the loan portfolio contributed to most of the increase and produced $0.5 million more interest income despite the negative impact of a twelve basis point reduction in yields. A $57 thousand one-time bonus dividend from the FHLB and higher average balances of mortgage-backed securities produced additional interest income from investments. On the liability side, the smaller average balance in borrowings due to the pay down of long-term debt in the fourth quarter of 2014 reduced interest expense by $0.2 million for the first half of 2015. This decrease was partially offset by an increase in interest expense on deposits due to the higher rates paid on higher average balances of interest-bearing checking and money market accounts from successful relationship-building efforts, promotions, cross-selling, transfers from unpopular CDs, and contractual and negotiated rates.

The fully-taxable equivalent (FTE) net interest rate spread decreased by three and seven basis points, respectively, to 3.59% and 3.55% for the three and six months ended June 30, 2015 compared to 3.62% for both the three and six months ended June 30, 2014. For the same periods, FTE net interest rate margin decreased by seven and eleven basis points, respectively. The decrease in the interest rate spread was caused by a more rapid decline of yields of interest-earning assets than the cost reductions of lower rates paid on interest-bearing liabilities. The decrease in net interest margin was due mostly to a lower yielding larger average portfolio of interest-earning assets. The overall cost of funds, which includes the impact of non-interest bearing deposits, was reduced by eight and seven basis points for the three and six months ended June 30, 2015 compared to the same periods in 2014 because of lower rates paid, notwithstanding higher balances of average interest-bearing liabilities, and the average balance growth of non-interest bearing deposits.

During 2015, the Company expects to continue to operate in a low but increasing interest rate environment, with rates slowly rising, likely occurring prior to the end of the year. A rate environment with rising long-term interest rates positions the Company to improve its interest income performance from new and maturing long-term earning assets. Until there is a sustained period of yield curve steepening, with rates rising more sharply at the long end, the interest rate margin may continue to experience compression. However for 2015, the Company anticipates net interest income to improve as increasing volumes of interest-earning assets would help mitigate an adverse impact of rate movements. The Federal Open Market Committee (FOMC) has not adjusted the short-term federal funds rate upward but is expected to do so by the end of 2015 or early in 2016, pressuring rates paid on funding sources. Continued growth in the loan portfolios complemented with investment security growth is the Company's strategy for 2015, and when coupled with a proactive approach to deposit cost setting strategies should help grow net interest income and contain the interest rate margin at acceptable levels.

The Company's cost of interest-bearing liabilities was 53 and 55 basis points for the three and six months ended June 30, 2015 compared to 65 basis points for both the three and six months ended June 30, 2014, respectively. The reduction was due to the $6.0 million fourth quarter of 2014 pay down of an FHLB advance which decreased the average balance of long-term debt. Other than retaining maturing long-term CDs, further reductions in deposit rates from the current historic low levels would have an insignificant cost-savings impact. As noted, interest rates along the treasury yield curve have been volatile with stability existing only at the short end. Competition could pressure banks to increase deposit rates. On the asset side, the prime interest rate, the benchmark rate that banks use as a base rate for adjustable rate loans, is not expected to rise in the near-term thereby further pressuring net interest income should deposit rates begin to steadily rise. To help mitigate the impact of the imminent change to the economic landscape, the Company has successfully developed and expects to continue to strengthen its association with existing customers, develop new business relationships, generate new loan volumes, retain and generate higher levels of average non-interest bearing deposit balances.

Table Of Contents

Strategically deploying no- and low-cost deposits into interest earning-assets is an effective margin-enhancing strategy that the Company expects to continue to pursue and expand to help stabilize net interest margin.

The Company's Asset Liability Management (ALM) team meets regularly to discuss among other things, interest rate risk and when deemed necessary adjusts interest rates. ALM also discusses revenue enhancing strategies to help combat the potential for a decline in net interest income. The Company's marketing department, together with ALM, lenders and deposit gatherers, continue to develop prudent strategies that will grow the loan portfolio and accumulate low-cost deposits to improve net interest income performance.

The tables that follow set forth a comparison of average balances of assets and liabilities and their related net tax equivalent yields and rates for the periods indicated. Interest income was adjusted to a tax-equivalent basis (FTE), using the corporate federal tax rate of 34% to recognize the income from tax-exempt interest-earning assets as if the interest was taxable. This treatment allows a uniform comparison among yields on interest-earning assets. Loans include loans HFS and non-accrual loans but exclude the allowance for loan losses. Net deferred loan cost amortization of $103 thousand and $83 thousand for the second quarters of 2015 and 2014, respectively, and $196 thousand and $148 thousand for the first halves of 2015 and 2014, respectively, are included in interest income from loans. The one-time FHLB special dividend of $57 thousand awarded in the first quarter of 2015 was removed from the annualized yield calculation and then added back to interest income. Average balances are based on amortized cost and do not reflect net unrealized gains or losses. Net interest margin is calculated by dividing annualized net interest income - FTE by total average interest-earning assets. Cost of funds includes the effect of average non-interest bearing deposits as a funding source:

Table Of Contents

(dollars in thousands)	Three months ended June 30, 2015			June 30, 2014
