- FRN Floating rate note. Rate shown is rate in effect at March 31, 2006.
- 144A Securities exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers under Rule 144A, and have been deemed by the adviser to be liquid. At the period end, the value of 144A securities amounted to \$65,775,184 or 36.9% of net assets applicable to common shareholders.

Valuation: Debt securities are valued using an independent pricing service approved by the Board of Trustees, which utilizes closing market prices, market quotations and transactions, quotations from dealers and various relationships among securities in determining value. Securities for which closing market prices or market quotations are not available or are not considered by the adviser to be reflective of a security's market value, are valued at fair value as determined in good faith under consistently applied procedures established by and applied under the supervision of the Board of Trustees. Criteria considered in making this determination may include, but are not limited to, a review of other securities by the same issuer for which market quotations are available, recent bid and ask prices for the security, the issuer's position in and economic outlook of the industry and, if necessary, a review of similar securities in similar industries. Securities with remaining maturities of 60 days or less are valued at amortized cost. This method involves valuing a portfolio security initially at its cost and thereafter assumes a constant amortization to maturity of any discount or premium.

Reverse Repurchase Agreements: The fund is permitted to enter into reverse repurchase agreements with banks or securities firms deemed creditworthy by the adviser. A reverse repurchase agreement involves the sale of a security by the fund, with an agreement to repurchase the same or a substantially similar security at an agreed upon price and date. Securities purchased subject to repurchase agreements must have an aggregate market value greater than or equal to the repurchase price plus accrued interest at all times. Reverse repurchase agreements involve the risk that the market value of the securities purchased with the proceeds from the sale of securities received by the fund may decline below the price of the securities that the fund is obligated to repurchase. There were no reverse repurchase agreements outstanding at March 31, 2006.

Interest Rate Swap Contracts: The fund may enter into interest rate swap transactions. A swap is an agreement to exchange the return generated by one instrument for the return generated by another instrument. The fund may enter into interest rate swap agreements to manage its exposure to interest rate risk. Interest rate swap contracts involve the exchange by the fund with another party of their respective commitments to pay or receive interest. Swaps are marked to market daily based upon quotations from market makers and the change in value, if any, is recorded as unrealized gain or loss in the Statement of Operations. Net payments of interest on interest rate swap contracts are included as part of realized gain or loss. Entering into these agreements involves, to varying degrees, elements of credit and market risk in excess of the amounts recognized on the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to these agreements may default on its obligation to perform and that there may be unfavorable changes in interest rates. At March 31, 2006, the fund had the following open swap agreements:

Notional Amount	Expiration Date	Description	Net Unrealized Appreciation
\$ 22,500,000	03/15/07	Agreement with Citibank N.A. dated 03/11/04 to pay the notional amount multiplied by 2.27% and to receive the notional amount multiplied by the 1 month U.S. Dollars London Interbank Offered Rate - British Bankers Association (USD LIBOR BBA).	\$ 635,314

\$	22,500,000	09/28/07	Agreement with Citibank N.A. dated 09/24/04 to pay the notional amount multiplied by 3.22% and to receive the notional amount multiplied by the 1 month U.S. Dollars London Interbank Offered Rate British Bankers Association (USD LIBOR BBA).	\$	634,454
----	------------	----------	---	----	---------

Periodically, the fund receives from or deposits, with the counter party, a specific amount of cash equal to the market value of the interest rate swap contracts. At March 31, 2006, the fund had \$1,226,000 payable for collateral on interest rate swap contracts under this arrangement.
