Assured Guaranty Ltd.
Notes to Consolidated Financial Statements
June 30, 2006
(Unaudited)

1. Business and Organization

Assured Guaranty Ltd. (the Company) is a Bermuda-based holding company which provides, through its operating subsidiaries, credit enhancement products to the public finance, structured finance and mortgage markets. Credit enhancement products are financial guarantees or other types of support, including credit derivatives, that improve the credit of underlying debt obligations. Assured Guaranty Ltd. applies its credit expertise, risk management skills and capital markets experience to develop insurance, reinsurance and derivative products that meet the credit enhancement needs of its customers. Under a reinsurance agreement, the reinsurer, in consideration of a premium paid to it, agrees to indemnify another insurer, called the ceding company, for part or all of the liability of the ceding company under one or more insurance policies that the ceding company has issued. A derivative is a financial instrument whose characteristics and value depend upon the characteristics and value of an underlying asset. Assured Guaranty Ltd. markets its products directly to and through financial institutions, serving the U.S. and international markets. Assured Guaranty Ltd.'s financial results include four principal business segments: financial guaranty direct, financial guaranty reinsurance, mortgage guaranty and other. These segments are further discussed in Note 10.

Financial guaranty insurance provides an unconditional and irrevocable guaranty that protects the holder of a financial obligation against non-payment of principal and interest when due. Financial guaranty insurance may be issued to the holders of the insured obligations at the time of issuance of those obligations, or may be issued in the secondary market to holders of public bonds and structured securities. A loss event occurs upon existing or anticipated credit deterioration, while a payment under a policy occurs when the insured obligation defaults. This requires the Company to pay the required principal and interest when due in accordance with the underlying contract. The principal types of obligations covered by the Company's financial guaranty direct and financial guaranty assumed reinsurance businesses are structured finance obligations and public finance obligations. Because both businesses involve similar risks, the Company analyzes and monitors its financial guaranty direct portfolio and financial guaranty assumed reinsurance portfolio on a coordinated basis.

Mortgage guaranty insurance is a specialized class of credit insurance that provides protection to mortgage lending institutions against the default of borrowers on mortgage loans that, at the time of the advance, had a loan to value in excess of a specified ratio. Reinsurance in the mortgage guaranty insurance industry is used to increase the insurance capacity of the ceding company, to assist the ceding company in meeting applicable regulatory and rating agency requirements, to augment the financial strength of the ceding company, and to manage the ceding company's risk profile. The Company provides mortgage guaranty protection on an excess of loss basis.

The Company has participated in several lines of business that are reflected in its historical financial statements but that the Company exited in connection with its 2004 initial public offering (IPO), including, but not limited to, equity layer credit protection, trade credit reinsurance and title reinsurance. These lines of business make up the Company's other segment.

2. Basis of Presentation

The unaudited interim consolidated financial statements, which include the accounts of the Company, have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) and, in the opinion of management, reflect all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of the Company's financial condition, results of operations and cash flows for the periods presented. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. These

unaudited interim consolidated financial statements cover the three-month period ended June 30, 2006 (Second Quarter 2006) and the three-month period ended June 30, 2005 (Second Quarter 2005), and the six-month period ended June 30, 2006 (Six Months 2006) and the six-month period ended June 30, 2005 (Six Months 2005). Operating results for the three- and six-month periods ended June 30, 2006 and 2005 are not necessarily indicative of the results that may be expected for a full year. Certain items in the prior year unaudited interim consolidated financial statements have been reclassified to conform with the current period presentation. These unaudited interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2005, filed with the Securities and Exchange Commission.

Certain of the Company's subsidiaries are subject to U.S. income tax. The provision for income taxes is calculated in accordance with Statement of Financial Accounting Standards (FAS) FAS No. 109, Accounting for Income Taxes . The Company's provision for income taxes for interim financial periods is not based on an estimated annual effective rate due to the variability in changes in fair value of its derivative financial instruments. A discrete calculation of the provision is calculated for each interim period.

3. Recent Accounting Pronouncements

In February 2006, the Financial Accounting Standards Board (FASB) issued FAS No. 155, Accounting for Certain Hybrid Financial Instruments (FAS 155) which amends FAS No. 133, Accounting for Derivative Instruments and Hedging Activities (FAS 133) and FAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities (FAS 140), and addresses issues raised in FAS 133 Implementation Issue No. D1, Application of Statement 133 to Beneficial Interests in Securitized Financial Assets. The primary objectives of FAS 155 are: (i) with respect to FAS 133, to address the accounting for beneficial interests in securitized financial assets and (ii) with respect to FAS 140, eliminate a restriction on the passive derivative instruments that a qualifying special purpose entity may hold. FAS 155 is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The Company is currently evaluating the implications of FAS 155 on its financial statements.

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Company is assessing FIN 48 and has not determined the impact that the adoption of FIN 48 will have on its results of operations or financial position.

4. Analysis of premiums written, premiums earned and loss and loss adjustment expenses

To limit its exposure on assumed risks, at the time of the IPO, the Company entered into certain proportional and non-proportional retrocessional agreements with other insurance companies, primarily subsidiaries of ACE Limited (ACE), to cede a portion of the risk underwritten by the Company. In addition, the Company enters into reinsurance agreements with non-affiliated companies to limit its exposure to risk on an on-going basis.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

In the event that any or all of the reinsurers are unable to meet their obligations, the Company would be liable for such defaulted amounts. Direct, assumed, and ceded amounts were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
	(in thousands of U.S. dollars)			
Premiums Written				
Direct	\$ 68,418	\$ 20,942	\$ 98,666	\$ 44,697
Assumed	43,066	19,528	68,202	73,870
Ceded	(1,139)	(10,314)	(5,739)	(11,942)
Net	\$ 110,345	\$ 30,156	\$ 161,129	\$ 106,625

Assumed	28,475	42,248	59,003	71,660
Ceded	(2,178)	(10,790)	(5,879)	(13,342)
Net	\$ 48,184	\$ 48,264	\$ 96,239	\$ 96,354
Loss and Loss Adjustment Expenses				
Direct	\$ (12,644)	\$ 4,703	\$ (15,675)	\$ 2,636
Assumed	7,250	(71,385)	10,542	(80,574)
Ceded	(1,119)	7,549	(1,762)	9,409
Net	\$ (6,513)	\$ (59,133)	\$ (6,895)	\$ (68,529)

Net written premiums for Second Quarter 2006 and Six Months 2006 were \$110.3 million and \$161.1 million, respectively, compared with \$30.2 million and \$106.6 million for Second Quarter 2005 and Six Months 2005, respectively. The increase in direct written premiums for both periods is primarily attributable to several financial guaranty transactions written during Second Quarter 2006 in the United Kingdom (UK) with upfront premiums totaling \$41.0 million. Assumed written premiums increased in Second Quarter 2006 compared with Second Quarter 2005 due to more deals being written on an upfront basis during Second Quarter 2006 while Second Quarter 2005 was comprised of more installment based deals. Also contributing to the increase is a Second Quarter 2005 transaction whereby Financial Security Assurance Inc. (FSA) reassumed from Assured Guaranty Re Ltd. (AG Re) \$18.4 million of healthcare related business (FSA transaction).

The decrease in assumed written premiums for Six Months 2006 compared with Six Months 2005 is primarily due to a large excess of loss reinsurance transaction of \$16.3 million written during the three month period ended March 31, 2005 in our mortgage guaranty segment.

Ceded written and earned premiums have decreased in Second Quarter 2006 compared with Second Quarter 2005 and Six Months 2006 compared with Six Months 2005 due to the run-off and novation of our trade credit business, which is 100% retroceded to ACE.

Loss and loss adjustment expenses (LAE) were \$(6.5) million and \$(6.9) million for Second Quarter 2006 and Six Months 2006, respectively. The major component of these amounts is a \$10.1 million loss recovery from third party litigation settlements recorded during Second Quarter 2006 from our equity layer credit protection business, which was exited in connection with the IPO. This recovery was partially offset by increased loss reserves of \$5.4 million in our financial guaranty reinsurance segment, of which \$3.8 million related to a rating downgrade of a European infrastructure transaction and \$1.6 million related to the rating downgrade of various credits. In addition to these increases Six Months 2006 also contained a \$2.5 million case reserve addition due to a U.S. public infrastructure transaction.

Loss and loss adjustment expenses of \$(59.1) million in Second Quarter 2005 and \$(68.5) million in Six Months 2005, was the result of a third party settlement agreement that was reached during Second Quarter 2005, with two parties relating to a reinsurance claim incurred in 1998 and 1999, resulting in a recovery of \$63.7 million.

Also in First Quarter 2005 the Company recovered \$6.8 million relating to this same reinsurance claim. In addition, during First Quarter 2005, the Company recovered \$1.1 million relating to its exited equity layer credit protection business. Loss recoveries for all periods presented are shown in the statements of operations and comprehensive income in loss and loss adjusted expenses.

Reinsurance recoverable on ceded losses and LAE as of June 30, 2006 and December 31, 2005 were \$11.3 million and \$12.4 million, respectively and are all related to our other segment. Of these amounts, \$11.1 million and \$12.3 million, respectively, relate to reinsurance agreements with ACE.

The following summarizes the Company's gross written premiums by significant client:

			Three Months Ended June 30,		Six Months Ended June 30,	
Gross Written Premiums by Client			2006	2005	2006	2005
			(\$ in millions)			
Financial Security Assurance Inc.(1)			\$ 18.2	\$ 10.4	\$ 25.7	\$ 32.6
Ambac Assurance Corporation			10.5	9.7	14.8	20.4
Financial Guaranty Insurance Company			9.5	3.3	12.9	5.6
MBIA Insurance Corporation			2.3	4.2	5.8	8.9

(1) Second Quarter 2005 and Six Months 2005 excludes \$18.4 million of reassumption premiums related to the Company's healthcare business.

Agreement with Financial Security Assurance Inc.

During Second Quarter 2005, Assured Guaranty Corp. (AGC) and AG Re, two of the Company's subsidiaries, entered into a reinsurance agreement with FSA pursuant to which substantially all of FSA's financial guaranty risks previously ceded to AGC (the Ceded Business) was assumed by AG Re. This agreement was effective as of January 1, 2005. In connection with the transaction, AGC transferred liabilities of \$169.0 million, consisting primarily of unearned premium reserves. All profit and loss related items associated with this transfer were eliminated in consolidation, with the exception of profit commission expense, certain other operating expenses, and provision for income taxes. Since this transaction transferred unearned premium reserve from AGC, a U.S. tax paying entity, to AG Re, a non-U.S. tax paying entity, the Company released a deferred tax liability related to differences between the book and tax carrying amounts of unearned premium reserves which resulted in a tax benefit. The total impact of all these items increased net income \$1.9 million for both Second Quarter 2005 and Six Months 2005. FSA has released AGC from all liabilities with respect to the Ceded Business. AG Re has assumed substantially all of AGC's liabilities with respect to the Ceded Business. FSA may receive a profit commission on the Ceded Business based on its future performance.

FSA has also reassumed from AG Re approximately \$12.0 million of unearned premium reserves, net of ceding commissions, of healthcare related business with an approximate par value of \$820.0 million.

5. Commitments and Contingencies

Lawsuits arise in the ordinary course of the Company's business. It is the opinion of the Company's management, based upon the information available, that the expected outcome of these matters, individually or in the aggregate, will not have a material adverse effect on the Company's financial position, results of operations or liquidity, although an adverse resolution of a number of these items could have a material adverse effect on the Company's results of operations or liquidity in a particular quarter or fiscal year.

In the ordinary course of their respective businesses, certain of the Company's subsidiaries assert claims in legal proceedings against third parties to recover losses paid in prior periods. The amounts, if any, the Company will recover in these proceedings are uncertain, although recoveries in any one or more of these proceedings during any quarter or fiscal year could be material to the Company's results of operations in that particular quarter or fiscal year.

In April 2005, AGC received a Notice of Order to Preserve (Order) from the Office of the Commissioner of Insurance, State of Georgia (Commissioner). The Order was directed to ACE Limited, and all affiliates and requires the preservation of documents and other items related to finite insurance and a broad group of other insurance and reinsurance agreements. Also in April 2005, AGC, and numerous other insurers, received a subpoena from the Commissioner related to the initial phase of the Commissioner's investigation into finite-risk transactions. The subpoena requests information on AGC's assumed and ceded reinsurance contracts in force during 2004. AGC provided the required information in response to the subpoena in January of 2006 and has not been contacted further by the Commissioner.

During Second Quarter 2006, the Company's wholly owned subsidiary, Assured Guaranty Re Overseas Ltd. (AGRO), and a number of other parties, completed various settlements with defendants in the *In re: National Century Financial Enterprises Inc. Investment Litigation* now pending in the United States District Court for the Southern District of Ohio - Eastern District. AGRO received approximately \$10.1 million (pre-tax) in Second Quarter 2006, from the settlements. AGRO originally paid claims in 2003 of approximately \$41.7 million (pre-tax) related to National Century Financial Enterprises Inc. To date, including the settlements described above, the Company has recovered \$16.6 million (pre-tax). This is a partial settlement of the litigation, and the litigation will continue against other parties.

The Company is party to reinsurance agreements with all of the major monoline primary financial guaranty insurance companies. The Company's facultative and treaty agreements are generally subject to termination (i) upon written notice (ranging from 90 to 120 days) prior to the specified deadline for renewal, (ii) at the option of the primary insurer if the Company fails to maintain certain financial, regulatory and rating agency criteria which are equivalent to or more stringent than those the Company is otherwise required to maintain for its own compliance with state mandated insurance laws and to maintain a specified financial strength rating for the particular insurance subsidiary or (iii) upon certain changes of control of the Company. Upon termination under the conditions set forth in (ii) and (iii) above, the Company may be required (under some of its reinsurance agreements) to return to the primary insurer all statutory unearned premiums, less ceding commissions, attributable to reinsurance ceded pursuant to such agreements after which the Company would be released from liability with respect to the ceded business. Upon the occurrence of the conditions set forth in (ii) above, whether or not an agreement is terminated, the Company may be required to obtain a letter of credit or alternative form of security to collateralize its obligation to perform under such agreement or it may be obligated to increase the level of ceding commission paid.

6. Long-Term Debt and Credit Facilities

The Company's unaudited interim consolidated financial statements include long-term debt, used to fund the Company's insurance operations, and related interest expense, as described below.

Senior Notes

On May 18, 2004, Assured Guaranty US Holdings Inc., a subsidiary of the Company, issued \$200.0 million of 7.0% Senior Notes due 2034 for net proceeds of \$197.3 million. The proceeds of the offering were used to repay substantially all of a \$200.0 million promissory note issued to a subsidiary of ACE in April 2004 as part of the IPO related formation transactions. The coupon on the Senior Notes is 7.0%, however, the effective rate will be approximately 6.4%, taking into account the effect of a cash flow hedge executed by the Company in March 2004. The Company recorded interest expense of \$3.3 million, including \$0.2 million of amortized gain on the cash flow hedge, for both Second Quarter 2006 and Second Quarter 2005. The Company recorded interest expense of \$6.7 million, including \$0.3 million of amortized gain on the cash flow hedge, for both Six Months 2006 and Six Months 2005. These Senior Notes are fully and unconditionally guaranteed by Assured Guaranty Ltd.

Credit Facilities

\$300.0 million Credit Facility

On April 15, 2005, Assured Guaranty Ltd. and certain of its subsidiaries entered into a \$300.0 million three-year unsecured revolving credit facility (the "\$300.0 million credit facility") with a syndicate of banks, for which ABN AMRO Incorporated and Bank of America, N.A. acted as lead arrangers and KeyBank National Association (KeyBank) acted as syndication agent. Under the \$300.0 million credit facility, each of AGC, Assured Guaranty (UK) Ltd. (AG (UK)), a subsidiary of AGC organized under the laws of the United Kingdom, Assured Guaranty Ltd., AG Re and AGRO are entitled to request the banks to make loans to such borrower or to request that letters of credit be issued for the account of such borrower. Two letters of credit have been issued, both on behalf of AGRO, with an aggregate stated amount of approximately \$20.7 million.

If drawn, the proceeds of the loans and letters of credit are to be used for working capital and other general corporate purposes of the borrowers and to support reinsurance transactions.

At the closing of the \$300.0 million credit facility, (i) AGC guaranteed the obligations of AG (UK) under such facility, (ii) Assured Guaranty Ltd. guaranteed the obligations of AG Re and AGRO under such facility and agreed that, if the Company Consolidated Assets (as defined in the related credit agreement) of AGC and its subsidiaries were to fall below \$1.2 billion, it would, within 15 days, guarantee the obligations of AGC and AG (UK) under such facility and (iii) Assured Guaranty Overseas US Holdings Inc., as a Material Non-AGC Subsidiary (as defined in the related credit agreement), guaranteed the obligations of Assured Guaranty Ltd., AG Re and AGRO under such facility. Subsequently, AG Re and AGRO, as Material Non-AGC Subsidiaries, both guaranteed the obligations of the other and of Assured Guaranty Ltd. under such facility.

The \$300.0 million credit facility's financial covenants require that Assured Guaranty Ltd. (a) maintain a minimum net worth of \$1.2 billion, (b) maintain an interest coverage ratio of at least 2.5:1, and (c) maintain a maximum debt-to-capital ratio of 30%. In addition, the \$300.0 million credit facility requires that AGC: (x) maintain qualified statutory capital of at least 80% of its statutory capital as of the fiscal quarter prior to the closing date of the facility and (y) maintain a ratio of aggregate net par outstanding to qualified statutory capital of not more than 150:1. Furthermore, the \$300.0 million credit facility contains restrictions on Assured Guaranty Ltd. and its subsidiaries, including, among other things, in respect of their ability to incur debt, permit liens, become liable in respect of guaranties, make loans or investments, pay dividends or make distributions, dissolve or become party to a merger, consolidation or acquisition, dispose of assets or enter into affiliate transactions. Most of these restrictions are subject to certain minimum thresholds and exceptions. A default by one borrower will give rise to a right of the lenders to terminate the facility and accelerate all amounts then outstanding. As of June 30, 2006 and December 31, 2005, Assured Guaranty was in compliance with all of those financial covenants.

As of June 30, 2006 and December 31, 2005, no amounts were outstanding under this facility nor have there been any borrowings under this facility.

Non-Recourse Credit Facility

AGC is also party to a non-recourse credit facility with a syndicate of banks which provides up to \$175.0 million specifically designed to provide rating agency-qualified capital to further support AGC's claims paying resources. The facility expires in December 2010. As of June 30, 2006 and December 31, 2005, no amounts were outstanding under this facility nor have there been any borrowings under this facility.

The Company's failure to comply with certain covenants under the Company's credit facilities could, subject to grace periods in the case of certain covenants, result in an event of default. This could require the Company to repay any outstanding borrowings in an accelerated manner.

Committed Capital Securities

On April 8, 2005, AGC entered into four separate agreements with four different unaffiliated custodial trusts pursuant to which AGC may, at its option, cause each of the custodial trusts to purchase up to \$50.0 million of

perpetual preferred stock of AGC. The custodial trusts were created as a vehicle for providing capital support to AGC by allowing AGC to obtain immediate access to new capital at its sole discretion at any time through the exercise of the put option. If the put options were exercised, AGC would receive \$200.0 million in return for the issuance of its own perpetual preferred stock, the proceeds of which may be used for any purpose including the payment of claims. The put options were not exercised as of June 30, 2006. Initially, all of the committed capital securities (the CCS Securities) were issued to a special purpose pass-through trust (the Pass-Through Trust). The Pass-Through Trust is a newly created statutory trust organized under the Delaware Statutory Trust Act formed for the purposes of (i) issuing \$200,000,000 of Pass-Through Trust Securities to qualified institutional buyers within the meaning of Rule 144A under the Securities Act of 1933, as amended, (ii) investing the proceeds from the sale of the Pass-Through Trust Securities in, and holding, the CCS Securities issued by the Custodial Trusts and (iii) entering into related agreements. Neither the Pass-Through Trust nor the Custodial Trusts are consolidated in Assured Guaranty Ltd.'s financial statements.

During Second Quarter 2006 and Six Months 2006, AGC incurred \$0.7 million and \$1.3 million, respectively, of put option premiums which are an on-going expense. During both Second Quarter 2005 and Six Months 2005, AGC incurred \$2.5 million which consists of \$2.0 million of investment banking fees associated with the committed capital securities and put option premiums which are an on-going expense. These expenses are presented in the Company's unaudited interim consolidated statements of operations and comprehensive income under other expense.

7. Share-Based Compensation

Effective January 1, 2006, the Company adopted FAS No. 123 (revised), Share-Based Payment (FAS 123R), which replaces FAS No. 123, Accounting for Stock-Based Compensation (FAS 123) and supersedes Accounting Principles Board Opinion (APB) No. 25, Accounting for Stock Issued to Employees (APB 25). FAS 123R requires all share-based compensation transactions with employees, including grants of employee stock options, to be recognized as compensation expense over the requisite service period based on their relative fair values.

Prior to the adoption of FAS 123R, the Company followed the guidance of APB 25 and did not record share-based compensation expense related to employee stock options in the statement of operations, since for all grants the exercise price was equal to the market value of the common stock on the grant date.

The Company elected to use the modified prospective transition method for implementing FAS 123R. Under this transition method, compensation expense includes: (a) compensation expense for all share-based payments granted prior to, but not yet vested as of, January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of FAS 123, and (b) compensation expense for all share-based payments granted on or after January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of FAS 123R. Because we elected to use the modified prospective transition method, results for prior periods have not been restated and new awards are valued and accounted for prospectively upon adoption.

Beginning January 1, 2006, upon adoption of FAS 123R, the Company recorded share-based compensation for the cost of stock options, restricted stock and the Company sponsored employee stock purchase plan. As a result of adopting FAS 123R on January 1, 2006, the Company's Second Quarter 2006 income before income taxes and net income are \$1.5 million and \$1.1 million lower, respectively, and for Six Months 2006 are \$3.2 million and \$2.5 million lower, respectively, than if it had continued to account for share-based compensation under APB 25. Basic and diluted earnings per share for Second Quarter 2006 and Six Months 2006 are \$0.01 and \$0.03 lower, respectively, than if the Company had continued to account for share-based compensation under APB 25.

Share-based compensation expense in Second Quarter 2006 and Six Months 2006 was \$3.1 million (\$2.5 million after tax) and \$6.3 million (\$5.2 million after tax), respectively. The effect on basic and diluted earnings per share for Second Quarter 2006 and Six Months 2006 was \$0.03 and \$0.07, respectively. Included in Second Quarter 2006 and Six Months 2006 expense was \$0.5 million and \$1.2 million, respectively, for stock award grants to retirement-eligible employees. FAS 123R requires these awards to be expensed over the period through the date the employee first becomes eligible to retire and is no longer required to provide service to earn part or all of the award, regardless of the employees intent of retirement. The amount of share-based compensation capitalized in Second

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Quarter 2006 and Six Months 2006 as deferred acquisition costs (DAC) was \$0.7 million and \$1.2 million, respectively. Share-based compensation expense in Second Quarter 2005 and Six Months 2005 was \$1.7 million (\$1.4 million after tax) and \$3.0 million (\$2.7 million after tax), respectively.

The following table presents pre-DAC and pre-tax, share-based compensation cost by share-based type:

	Three Months Ended June 30,		Six Months Ended June 30,	
(in thousands of U.S. dollars)	2006	2005	2006	2005
Share-Based Employee Cost				
<i>Restricted Stock</i>				
Recurring amortization	\$ 1,957	\$ 1,382	\$ 3,764	\$ 2,561
Accelerated amortization for retirement eligible employees	364		807	
Subtotal	2,321	1,382	4,571	2,561
<i>Stock Options</i>				
Recurring amortization	909		1,953	
Accelerated amortization for retirement eligible employees	150		355	
Subtotal	1,059		2,308	
<i>ESPP</i>	32		64	
Total Share-Based Employee Cost	3,412	1,382	6,943	2,561
Share-Based Directors Cost				
<i>Restricted Stock</i>	72	120	139	150
<i>Restricted Stock Units</i>	229	149	413	307
Total Share-Based Directors Cost	301	269	552	457
Total Share-Based Cost	\$ 3,713	\$ 1,651	7,495	\$ 3,018

For Second Quarter 2005 and Six Months 2005, had the compensation expense been determined in accordance with the fair value method recommended in FAS 123, the Company's net income and net income per share would have been adjusted to the pro forma amounts indicated below:

(in thousands of U.S. dollars, except per share amounts)	Three Months Ended June 30, 2005	Six Months Ended June 30, 2005
Net income as reported	\$ 66,750	\$ 111,098
Add: Stock-based compensation expense included in reported net income, net of income tax	1,445	2,653
Deduct: Compensation expense, in accordance with FAS 123, net of income tax	2,394	4,701
Pro forma net income	\$ 65,801	\$ 109,050
Basic Earnings Per Share:		
As reported	\$ 0.90	\$ 1.50
Pro forma	\$ 0.89	\$ 1.47
Diluted Earnings Per Share:		
As reported	\$ 0.90	\$ 1.49
Pro forma	\$ 0.89	\$ 1.46

Assured Guaranty Ltd. Share-Based Compensation Plans

As of April 27, 2004, the Company adopted the Assured Guaranty Ltd. 2004 Long-Term Incentive Plan (the Incentive Plan). The Incentive Plan authorizes the grant of incentive stock options, non-qualified stock options, stock appreciation rights, and full value awards that are based on the Company's common shares. The number of common shares that may be delivered under the Incentive Plan may not exceed 7,500,000. As of June 30, 2006, 2,682,432 common shares were available for grant under the Incentive Plan. In January 2005, the Company implemented the Stock Purchase Plan (Stock Purchase Plan) in accordance with Internal Revenue Code

Section 423. The Company reserved for issuance and purchases under the Stock Purchase Plan 100,000 shares of its common stock. As of June 30, 2006, 80,512 common shares were available for grant under the Stock Purchase Plan. The Incentive Plan and the Stock Purchase Plan are described more fully in the Company's 2005 Annual Report on Form 10-K.

Stock Options

Nonqualified or incentive stock options may be granted to employees and directors of the Company. Stock options are generally granted once a year with exercise prices equal to the closing price on the date of grant. To date, the Company has only issued nonqualified stock options. All stock options granted to employees vest in equal annual installments over a three-year period and expire 10 years from the date of grant. None of our options have a performance or market condition. The following table summarizes stock option activity for the six months ended June 30, 2006:

Options	Options for Common Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (1) (in thousands)
Outstanding at December 31, 2005	2,457,302	\$ 18.05		
Granted	785,967	\$ 25.49		
Exercised	(24,774)) \$ 17.91		
Forfeited	(52,996)) \$ 19.99		
Outstanding at June 30, 2006	3,165,499	\$ 19.86	8.2	17,442
Vested and exercisable at June 30, 2006	1,348,481	\$ 17.95	7.5	\$ 9,999

(1) The aggregate intrinsic value was calculated based on the positive difference between the closing price of the Company's common stock on June 30, 2006 (i.e. \$25.37) and the weighted average exercise price of the underlying options.

The Company recorded \$1.1 million (\$0.8 million after tax) and \$2.3 million (\$1.8 million after tax) in share-based compensation related to stock options during Second Quarter 2006 and Six Months 2006, respectively. As of June 30, 2006 the total unrecognized compensation expense related to outstanding non-vested stock options was \$5.2 million, which will be adjusted in the future for the difference between estimated and actual forfeitures. The Company expects to recognize that expense over the weighted-average remaining service period of 1.6 years.

The weighted-average grant-date fair value of options granted were \$6.86 and \$5.08 for Second Quarter 2006 and Second Quarter 2005, respectively. The weighted-average grant-date fair value of options granted were \$6.71 and \$4.53 for Six Months 2006 and Six Months 2005, respectively. The fair value of options issued is estimated on the date of grant using the Black-Scholes option-pricing model, with the following weighted-average assumptions used for grants in 2006 and 2005:

	Three Months Ended June 30, 2006	2005	Six Months Ended June 30, 2006	2005
Dividend yield	0.6%		0.6%	0.7%
Expected volatility	20.12%		20.92%	20.82%
Risk free interest rate	5.1%		4.2%	4.1%
Expected life	5 years		5 years	5 years
Forfeiture rate	6.0%		6.0%	6.0%

These assumptions were based on the following:

- The expected dividend yield is based on the current expected annual dividend and company share price on the grant date,
- Expected volatility is estimated at the date of grant based on the historical share price volatility, calculated on a daily basis,

- The risk-free interest rate is the implied yield currently available on U.S. Treasury zero-coupon issues with an equivalent remaining term to the granted stock options,
- The expected life is based on the average expected term of our guideline companies, which are defined as similar entities, since the Company has insufficient expected life data,
- The forfeiture rate is based on the rate used by our guideline companies, since the Company has insufficient forfeiture data. Estimated forfeitures will be reassessed at each balance sheet date and may change based on new facts and circumstances.

For options granted before January 1, 2006, the Company amortizes the fair value on an accelerated basis. For options granted on or after January 1, 2006, the Company amortizes the fair value on a straight-line basis. All options are amortized over the requisite service periods of the awards, which are generally the vesting periods, with the exception of retirement-eligible employees. For retirement-eligible employees options are amortized over the period through the date the employee first becomes eligible to retire and is no longer required to provide service to earn part or all of the award. The Company may elect to use different assumptions under the Black-Scholes option valuation model in the future, which could materially affect the Company's net income or earnings per share.

The total intrinsic value of options exercised during Six Months 2006 was \$0.2 million. During Six Months 2006, \$0.4 million was received from the exercise of stock options and an immaterial related tax benefit was recorded.

Restricted Stock Awards

The Company has granted restricted stock awards to employees and directors of the Company. Restricted stock awards generally vest in equal annual installments over a four-year period. Restricted stock awards are amortized over the requisite service periods of the awards, which are generally the vesting periods, with the exception of retirement-eligible employees, discussed above. Prior to the adoption of FAS 123R, the Company presented restricted stock issuances on the balance sheet in common stock and additional paid-in capital with an offset in unearned stock grant compensation as a separate component of shareholders' equity. In accordance with the provisions of FAS 123R, on January 1, 2006, the Company reclassified the balance in unearned stock grant compensation to common stock and additional paid-in capital in shareholders' equity. The following table summarizes restricted stock award activity for the six months ended June 30, 2006:

Nonvested Shares	Number of Shares	Weighted Average Grant-Date Fair Value	
Nonvested at December 31, 2005	1,021,124	\$ 18.12	
Granted	454,333	\$ 25.49	
Vested	(268,638)	\$ 18.00	
Forfeited	(30,336)	\$ 19.54	
Nonvested at June 30, 2006	1,176,483	\$ 20.96	

The Company recorded \$2.4 million (\$1.9 million after tax) and \$4.7 million (\$3.7 million after tax) in share-based compensation, related to restricted stock awards, during Second Quarter 2006 and Six Months 2006, respectively. Restricted stock awards are expensed on a straight-line basis over the vesting period. As of June 30, 2006 the total unrecognized compensation cost related to outstanding nonvested restricted stock awards was \$20.8 million, which the Company expects to recognize over the weighted-average remaining service period of 2.4 years.

Restricted Stock Units

The Company has granted restricted stock units to directors of the Company. Restricted stock units vest over a one-year period.

The following table summarizes restricted stock unit activity (excluding dividend equivalents) for the six months ended June 30, 2006:

Nonvested Stock Units	Number of Stock Units	Weighted Average Grant-Date Fair Value	
Nonvested at December 31, 2005	36,301	\$	20.25
Granted	34,030	\$	24.39
Vested	(28,773)	\$	19.29
Forfeited		\$	
Nonvested at June 30, 2006	41,558	\$	24.30

The Company recorded \$0.2 million (\$0.2 million after tax) and \$0.4 million (\$0.4 million after tax) in share-based compensation during Second Quarter 2006 and Six Months 2006, respectively. The compensation for restricted stock units is expensed on a straight-line basis over the vesting period. As of June 30, 2006, the total unrecognized compensation cost related to outstanding nonvested restricted stock units was \$0.7 million, which the Company expects to recognize over the weighted-average remaining service period of 0.7 years.

Employee Stock Purchase Plan

Participation in the Stock Purchase Plan is available to all eligible employees. Maximum annual purchases by participants are limited to the number of whole shares that can be purchased by an amount equal to 10 percent of the participant's compensation or, if less, shares having a value of \$25,000. Participants may purchase shares at a purchase price equal to 85 percent of the lesser of the fair market value of the stock on the first day or the last day of the subscription period. The Company recorded \$32,000 (\$23,000 after tax) and \$64,000 (\$45,000 after tax) in share-based compensation during Second Quarter 2006 and Six Months 2006, respectively.

8. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share (EPS):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
	(in thousands of U.S. dollars, except per share amounts)			
Net income as reported	\$ 44,514	\$ 66,750	\$ 79,396	\$ 111,098
Basic shares	73,633	73,813	73,695	74,134
Effect of dilutive securities:				
Stock awards	809	281	947	362
Diluted shares	74,442	74,094	74,642	74,496
Basic EPS	\$ 0.60	\$ 0.90	\$ 1.08	\$ 1.50
Diluted EPS	\$ 0.60	\$ 0.90	\$ 1.06	\$ 1.49

9. Liability For Tax Basis Step-Up Adjustment

In connection with the IPO, the Company and ACE Financial Services Inc. (AFS), a subsidiary of ACE, entered into a tax allocation agreement, whereby the Company and AFS will make a Section 338 (h)(10) election that will have the effect of increasing the tax basis of certain affected subsidiaries' tangible and intangible assets to fair value. Future tax benefits that the Company derives from the election will be payable to AFS when realized by the Company.

As a result of the election, the Company has adjusted its net deferred tax liability, to reflect the new tax basis of the Company's affected assets. The additional basis is expected to result in increased future income tax deductions and, accordingly, may reduce income taxes otherwise payable by the Company. Any tax benefit realized

by the Company will be paid to AFS. Such tax benefits will generally be calculated by comparing the Company's affected subsidiaries' actual taxes to the taxes that would have been owed by those subsidiaries had the increase in basis not occurred. After a 15-year period, to the extent there remains an unrealized tax benefit, the Company and AFS will negotiate a settlement of the unrealized benefit based on the expected realization at that time.

The Company initially recorded a \$49.0 million reduction of its existing deferred tax liability, based on an estimate of the ultimate resolution of the Section 338(h)(10) election. Under the tax allocation agreement, the Company estimates that as of the IPO date, it will pay \$20.9 million to AFS and accordingly has established this amount as a liability. The initial difference, which is attributable to the change in the tax basis of certain liabilities for which there is no associated step-up in the tax basis of its assets and no amounts due to AFS, resulted in an increase to additional paid-in capital of \$28.1 million during 2004. During both Six Months 2006 and Six Months 2005 the Company paid AFS \$0.4 million.

10. Segment Reporting

The Company has four principal business segments: (1) financial guaranty direct, which includes transactions whereby the Company provides an unconditional and irrevocable guaranty that indemnifies the holder of a financial obligation against non-payment of principal and interest when due, and could take the form of a credit derivative; (2) financial guaranty reinsurance, which includes agreements whereby the Company is a reinsurer and agrees to indemnify a primary insurance company against part or all of the loss which the latter may sustain under a policy it has issued; (3) mortgage guaranty, which includes mortgage guaranty insurance and reinsurance whereby the Company provides protection against the default of borrowers on mortgage loans; and (4) other, which includes several lines of business in which the Company is no longer active, including, but not limited to equity layer credit protection, trade credit reinsurance and title reinsurance.

The Company does not segregate assets and liabilities at a segment level since management reviews and controls these assets and liabilities on a consolidated basis. The Company allocates operating expenses to each segment based on a comprehensive cost study. During 2006, the Company implemented a new operating expense methodology to more closely apply expenses to the individual operating segments. This new methodology was based on a comprehensive study and is based on departmental time estimates and headcount. 2005 amounts have been restated to show this new methodology on a comparative basis. Management uses underwriting gains as the primary measure of each segment's financial performance.

The following tables summarize the components of underwriting gain (loss) for each reporting segment:

	Three Months Ended June 30, 2006													
	Financial Guaranty Direct			Financial Guaranty Reinsurance			Mortgage Guaranty			Other			Total	
	(in millions of U.S. dollars)													
Gross written premiums	\$	68.4		\$	41.7		\$	1.2		\$	0.1		\$	111.5

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The following is a reconciliation of total underwriting gain to income before provision for income taxes for the periods ended:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
	(in millions of U.S. dollars)			
Total underwriting gain	\$ 26.1	\$ 77.9	\$ 45.2	\$ 109.9
Net investment income	27.3	23.7	53.5	46.8
Net realized investment (losses) gains	(1.0)	1.7	(2.0)	3.5
Unrealized gains (losses) on derivative financial instruments	5.7	(12.5)	5.7	(9.4)
Other income		(0.2)		0.1
Interest expense	(3.4)	(3.4)	(6.7)	(6.7)
Other expense	(0.7)	(2.5)	(1.3)	(2.5)
Income before provision for income taxes	\$ 54.0	\$ 84.6	\$ 94.5	\$ 141.4

The following table provides the lines of businesses from which each of the Company's segments derive their net earned premiums:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
	(in millions of U.S. dollars)			
Financial guaranty direct:				
Public finance	\$ 1.7	\$ 0.4	\$ 2.8	\$ 0.5
Structured finance	19.5	15.6	39.1	35.9
Total	21.2	16.0	41.9	36.4
Financial guaranty reinsurance:				
Public finance	14.4	12.7	30.0	23.7
Structured finance	8.7	14.5	16.4	26.5
Total	23.1	27.2	46.4	50.2
Mortgage guaranty:				
Mortgage guaranty	3.7	5.1	7.9	9.7
Total net earned premiums	\$ 48.2	\$ 48.3	\$ 96.2	\$ 96.4

The other segment had an underwriting gain of \$10.1 million for Second Quarter 2006 and \$11.3 million and \$1.1 million for Six Months 2006 and Six Months 2005, respectively, as the equity layer credit protection business recorded loss recoveries in both periods. During Second Quarter 2005 the other segment had no underwriting gain or loss.

11. Subsidiary Information

The following tables present the unaudited condensed consolidated financial information for Assured Guaranty Ltd., Assured Guaranty US Holdings Inc., of which AGC is a subsidiary and other subsidiaries of Assured Guaranty Ltd. as of June 30, 2006 and December 31, 2005 and for the three and six months ended June 30, 2006 and 2005.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Form 10-Q contains information that includes or is based upon forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give Assured Guaranty Ltd. (hereafter Assured Guaranty, we, our or the Company) expectations or forecasts of future events. You can identify these statements by the fact that they do not relate strictly to historical or current facts and relate to future operating or financial performance.

Any or all of Assured Guaranty's forward-looking statements herein may turn out to be wrong and are based on current expectations and the current economic environment. Assured Guaranty's actual results may vary materially. Among factors that could cause actual results to differ materially are: (1) downgrades of the financial strength ratings assigned by the major rating agencies to any of our insurance subsidiaries at any time, which has occurred in the past; (2) our inability to execute our business strategy; (3) reduction in the amount of reinsurance ceded by one or more of our principal ceding companies; (4) contract cancellations; (5) developments in the world's financial and capital markets that adversely affect our loss experience, the demand for our products or our investment returns; (6) more severe or frequent losses associated with our insurance products; (7) changes in regulation or tax laws applicable to us, our subsidiaries or customers; (8) governmental action; (9) natural catastrophes; (10) dependence on customers; (11) decreased demand for our insurance or reinsurance products or increased competition in our markets; (12) loss of key personnel; (13) technological developments; (14) the effects of mergers, acquisitions and divestitures; (15) changes in accounting policies or practices; (16) changes in general economic conditions, including interest rates and other factors; (17) other risks and uncertainties that have not been identified at this time; and (18) management's response to these factors. Assured Guaranty is not obligated to publicly correct or update any forward-looking statement if we later become aware that it is not likely to be achieved, except as required by law. You are advised, however, to consult any further disclosures we make on related subjects in our periodic reports filed with the Securities and Exchange Commission.

Executive Summary

Assured Guaranty Ltd. is a Bermuda-based holding company which provides, through its operating subsidiaries, credit enhancement products to the public finance, structured finance and mortgage markets. We apply our credit expertise, risk management skills and capital markets experience to develop insurance, reinsurance and credit derivative products that meet the credit enhancement needs of our customers. We market our products directly and through financial institutions. We serve the U.S. and international markets.

Our financial results include four principal business segments: financial guaranty direct, financial guaranty reinsurance, mortgage guaranty and other. The other segment consists of a number of businesses that we exited in connection with our 2004 initial public offering (IPO).

We derive our revenues principally from premiums from our insurance, reinsurance and credit derivative businesses, net investment income, net realized gains and losses from our investment portfolio and unrealized gains and losses on derivative financial instruments. Our premiums are a function of the amount and type of contracts we write as well as prevailing market prices. We receive premiums on an upfront basis when the policy is issued or the contract is executed and/or on an installment basis over the life of the applicable transaction.

Investment income is a function of invested assets and the yield that we earn on those assets. The investment yield is a function of market interest rates at the time of investment as well as the type, credit quality and maturity of our invested assets. In addition, we could realize capital losses on securities in our investment portfolio from other than temporary declines in market value as a result of changing market conditions, including changes in market interest rates, and changes in the credit quality of our invested assets.

Unrealized gains and losses on derivative financial instruments are a function of changes in the estimated fair value of our credit derivative contracts. We expect these unrealized gains and losses to fluctuate primarily based on changes in credit spreads and the credit quality of the referenced entities. We generally hold these derivative contracts to maturity. Where we hold a derivative contract to maturity, the cumulative unrealized gains and losses will net to zero if we incur no credit losses on that contract.

Our expenses consist primarily of losses and loss adjustment expenses (LAE), profit commission expense, acquisition costs, operating expenses, interest expense and income taxes. Losses and LAE are a function of the amount and types of business we write. Losses and LAE are based upon estimates of the ultimate aggregate losses inherent in the portfolio. The risks we take have a low expected frequency of loss and are investment grade at the time we accept the risk. Prior to the IPO, the majority of the risks we underwrote were investment grade, however some risks accepted were below investment grade. Profit commission expense represents payments made to ceding companies generally based on the profitability of the business reinsured by us. Acquisition costs are related to the production of new business. Certain acquisition costs that vary with and are directly attributable to the production of new business are deferred and recognized over the period in which the related premiums are earned. Operating expenses consist primarily of salaries and other employee-related costs, various outside service providers, rent and related costs and other expenses related to maintaining a holding company structure. These costs do not vary with the amount of premiums written. Interest expense is a function of outstanding debt and the contractual interest rate related to that debt. Income taxes are a function of our profitability and the applicable tax rate in the various jurisdictions in which we do business.

Critical Accounting Estimates

Our unaudited interim consolidated financial statements include amounts that, either by their nature or due to requirements of accounting principles generally accepted in the United States of America (GAAP), are determined using estimates and assumptions. The actual amounts realized could ultimately be materially different from the amounts currently provided for in our unaudited interim consolidated financial statements. We believe the items requiring the most inherently subjective and complex estimates to be reserves for losses and LAE, valuation of derivative financial instruments, valuation of investments, other than temporary impairments of investments, premium revenue recognition, deferred acquisition costs and deferred income taxes. An understanding of our accounting policies for these items is of critical importance to understanding our unaudited interim consolidated financial statements. The following discussion provides more information regarding the estimates and assumptions used for these items and should be read in conjunction with the notes to our unaudited interim consolidated financial statements.

Reserves for Losses and Loss Adjustment Expenses

Reserves for losses and loss adjustment expenses for non-derivative transactions in our financial guaranty direct, financial guaranty assumed reinsurance and mortgage guaranty business include case reserves and portfolio reserves. See the Valuation of Derivative Financial Instruments for more information on our derivative transactions. Case reserves are established when there is significant credit deterioration on specific insured obligations and the obligations are in default or default is probable, not necessarily upon non-payment of principal or interest by an insured. Case reserves represent the present value of expected future loss payments and LAE, net of estimated recoveries, but before considering ceded reinsurance. This reserving method is different from case reserves established by traditional property and casualty insurance companies, which establish case reserves upon notification of a claim and establish incurred but not reported (IBNR) reserves for the difference between actuarially estimated ultimate losses and recorded case reserves. Financial guaranty insurance and assumed reinsurance case reserves and related salvage and subrogation, if any, are discounted at 6%, which is the approximate taxable equivalent yield on our investment portfolio in all periods presented.

We record portfolio reserves in our financial guaranty direct, financial guaranty assumed reinsurance and mortgage guaranty business. Portfolio reserves are established with respect to the portion of our business for which case reserves have not been established. Portfolio reserves are not established for quota share mortgage insurance contract types, all of which are in run-off, rather IBNR reserves have been established for these contracts.

Portfolio reserves are not established based on a specific event, rather they are calculated by aggregating the portfolio reserve calculated for each individual transaction. Individual transaction reserves are calculated on a quarterly basis by multiplying the par in-force by the product of the ultimate loss and earning factors without regard to discounting. The ultimate loss factor is defined as the frequency of loss multiplied by the severity of loss, where the frequency is defined as the probability of default for each individual issue. The earning factor is inception to date earned premium divided by the estimated ultimate written premium for each transaction. The probability of default is estimated from historical rating agency data and is based on the transaction's credit rating, industry sector and

time until maturity. The severity is defined as the complement of historical recovery/salvage rates gathered by the rating agencies of defaulting issues and is based on the industry sector.

Portfolio reserves are recorded gross of reinsurance. To date our reinsurance programs have been made up of excess of loss contracts. We have not ceded any amounts under these contracts, as our recorded portfolio reserves have not exceeded our contractual retentions.

The Company records an incurred loss that is reflected in the statement of operations upon the establishment of portfolio reserves. When we initially record a case reserve, we reclassify the corresponding portfolio reserve already recorded for that credit within the balance sheet. The difference between the initially recorded case reserve and the reclassified portfolio reserve is recorded as a charge in our statement of operations. It would be a remote occurrence when the case reserve is not greater than the reclassified portfolio reserve. Any subsequent change in portfolio reserves or the initial case reserves is recorded quarterly as a charge or credit in our statement of operations in the period such estimates change. Due to the inherent uncertainties of estimating loss and LAE reserves, actual experience may differ from the estimates reflected in our unaudited interim consolidated financial statements, and the differences may be material.

The chart below demonstrates the portfolio reserve's sensitivity to frequency and severity assumptions. The change in these estimates represent management's estimate of reasonably possible material changes and are based upon our analysis of historical experience. Portfolio reserves were recalculated with changes made to the default and severity assumptions. In all scenarios, the starting point used to test the portfolio reserve's sensitivity to the changes in the frequency and severity assumptions was the weighted average frequency and severity by rating and asset class of our insured portfolio. Overall the weighted average default frequency was 0.86 % and the weighted average severity was 19.1 % at June 30, 2006. For example, in the first scenario where the frequency was increased by 5.0%, each transaction's contribution to the portfolio reserve was recalculated by adding 0.04 % (i.e. 5.0% multiplied by 0.86 %) to the individual transaction's default frequency.

(in thousands of U.S. dollars)	Portfolio Reserve	Reserve Increase	Percentage Change	
Portfolio reserve as of June 30, 2006	\$ 64,676	\$		
5% Frequency Increase	68,931	4,255	6.58	%
10% Frequency Increase	72,831	8,155	12.61	%
5% Severity Increase	68,291	3,615	5.59	%
10% Severity Increase	71,551	6,875	10.63	%
5% Frequency and Severity Increase	72,399	7,723	11.94	%

In addition to analyzing the sensitivity of our portfolio reserves to possible changes in frequency and severity, we have also performed a sensitivity analysis on our financial guaranty and mortgage guaranty case reserves. Case reserves may change from our original estimate due to changes in severity factors. An actuarial analysis of the historical development of our case reserves shows that it is reasonably possible that our case reserves could develop by as much as ten percent. This analysis was performed by separately evaluating the historical development by comparing the initial case reserve established to the subsequent development in that case reserve, excluding the effects of discounting, for each sector in which we currently have significant case reserves, and estimating the possible future development. Based on this analysis, it is reasonably possible that our current financial guaranty and mortgage guaranty case reserves of \$31.2 million could reasonably increase by approximately \$3.0 million to \$4.0 million in the future. This would cause an increase in incurred losses on our statement of operations and comprehensive income.

A sensitivity analysis is not appropriate for our other segment reserves and our mortgage guaranty IBNR, since the amounts are fully reserved or reinsured.

We also record IBNR reserves for our mortgage guaranty and other segments. IBNR is an estimate of losses for which the insured event has occurred but the claim has not yet been reported to us. In establishing IBNR, we use traditional actuarial methods to estimate the reporting lag of such claims based on historical experience, claim reviews and information reported by ceding companies. We record IBNR for mortgage guaranty quota-share

reinsurance contracts, all of which are in run-off, within our mortgage guaranty segment. We also record IBNR for title reinsurance, auto residual value reinsurance and trade credit reinsurance within our other segment. The other segment represents lines of business we have exited or sold prior to the IPO.

For all other mortgage guaranty transactions we record portfolio reserves in a manner consistent with our financial guaranty business. While other mortgage guaranty insurance companies do not record portfolio reserves, rather just case and IBNR reserves, we record portfolio reserves because we write business on an excess of loss basis, while other industry participants write quota share or first layer loss business. We manage and underwrite this business in the same manner as our financial guaranty insurance and reinsurance business because they have similar characteristics as insured obligations of mortgage-backed securities.

Statement of Financial Accounting Standards (FAS) No. 60, Accounting and Reporting by Insurance Enterprises (FAS 60) is the authoritative guidance for an insurance enterprise. FAS 60 prescribes differing reserving methodologies depending on whether a contract fits within its definition of a short-duration contract or a long-duration contract. Financial guaranty contracts have elements of long-duration insurance contracts in that they are irrevocable and extend over a period that may exceed 30 years or more, but for regulatory purposes are reported as property and liability insurance, which are normally considered short-duration contracts. The short-duration and long-duration classifications have different methods of accounting for premium revenue and contract liability recognition. Additionally, the accounting for deferred acquisition costs (DAC) could be different under the two methods.

We believe the guidance of FAS 60 does not expressly address the distinctive characteristics of financial guaranty insurance, so we also apply the analogous guidance of Emerging Issues Task Force (EITF) Issue No. 85-20, Recognition of Fees for Guaranteeing a Loan (EITF 85-20), which provides guidance relating to the recognition of fees for guaranteeing a loan, which has similarities to financial guaranty insurance contracts. Under the guidance in EITF 85-20, the guarantor should assess the probability of loss on an ongoing basis to determine if a liability should be recognized under FAS No. 5, Accounting for Contingencies (FAS 5). FAS 5 requires that a loss be recognized where it is probable that one or more future events will occur confirming that a liability has been incurred at the date of the financial statements and the amount of loss can be reasonably estimated.

The following tables summarize our reserves for losses and LAE by segment, by type of reserve and by segment and type of reserve as of the dates presented. For an explanation of changes in these reserves see Consolidated Results of Operations.

The following table sets forth the financial guaranty in-force portfolio by underlying rating:

	As of June 30, 2006			As of December 31, 2005		
Ratings(1)	Net par outstanding	% of Net par outstanding		Net par outstanding	% of Net par outstanding	
	(in billions of U.S. dollars)					
AAA	\$ 43.7	37.8	%	\$ 34.5	33.7	%
AA	21.0	18.2	%	20.0	19.5	%
A	32.2	27.8	%	30.3	29.5	%
BBB	17.3	14.9	%	16.4	16.0	%
Below investment grade	1.4	1.3	%	1.3	1.3	%
Total exposures	\$ 115.6	100.0	%	\$ 102.5	100.0	%

(1) These ratings represent the Company's internal assessment of the underlying credit quality of the insured obligations. Our scale is comparable to that of the nationally recognized rating agencies.

Our surveillance department is responsible for monitoring our portfolio of credits and maintains a list of closely monitored credits. The closely monitored credits are divided into four categories: Category 1 (low priority; fundamentally sound, greater than normal risk); Category 2 (medium priority; weakening credit profile, may result in loss); Category 3 (high priority; claim/default probable, case reserve established); Category 4 (claim paid, case reserve established for future payments). The closely monitored credits include all below investment grade (BIG) exposures where there is a material amount of exposure (generally greater than \$10.0 million) or a material risk of the Company incurring a loss greater than \$0.5 million. The closely monitored credits also include investment grade (IG) risks where credit quality is deteriorating and where, in the view of the Company, there is significant potential that the risk quality will fall below investment grade. The closely monitored credits include approximately 97% of our BIG exposure, and the remaining BIG exposure of \$38.6 million is distributed across 76 different credits, as of June 30, 2006. As of December 31, 2005, the closely monitored credits include approximately 96% of our BIG exposure, and the remaining BIG exposure of \$55.2 million is distributed across 103 different credits. Other than those excluded BIG credits, credits that are not included in the closely monitored credit list are categorized as fundamentally sound risks.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The following table provides financial guaranty net par outstanding by credit monitoring category as of June 30, 2006 and December 31, 2005:

	As of June 30, 2006					
Description:	Net Par Outstanding		% of Net Par Outstanding		# of Credits in Category	Case Reserves
	(\$ in millions)					
Fundamentally sound risk(1)	\$ 114,102		98.7	%

Industry Methodology

The Company is aware that there are certain differences regarding the measurement of portfolio loss liabilities among companies in the financial guaranty industry. In January and February 2005, the Securities and Exchange Commission (SEC) staff had discussions concerning these differences with a number of industry participants. Based on those discussions, in June 2005, the Financial Accounting Standards Board (FASB) staff decided additional guidance is necessary regarding financial guaranty contracts. When the FASB staff reaches a conclusion on this issue, which is expected during the third quarter of 2006, the Company and the rest of the financial guaranty industry may be required to change some aspects of their loss reserving policies, but the Company cannot currently assess how the FASB or SEC staffs' ultimate resolution of this issue will impact our reserving policy or other balances, i.e., premiums and DAC. Until the issue is resolved, the Company intends to continue to apply its existing policy with respect to the establishment of both case and portfolio reserves.

Valuation of Derivative Financial Instruments

The Company follows FAS No. 133, Accounting for Derivative Instruments and Hedging Activities (FAS 133) and FAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities (FAS 149), which establishes accounting and reporting standards for derivative instruments. FAS 133 and FAS 149 require recognition of all derivatives on the balance sheet at fair value.

We issue credit derivative financial instruments, which prior to 2004 included a few index-based derivative financial instruments, that we view as an extension of our financial guaranty business but which do not qualify for the financial guaranty insurance scope exception under FAS 133 and FAS 149 and therefore are reported at fair value, with changes in fair value included in our earnings.

Since we view these derivative contracts as an extension of our financial guaranty business, we believe that the most meaningful presentation of these derivatives is to reflect revenue as earned premium, to record estimates of losses and LAE on specific credit events as incurred and to record changes in fair value as incurred. Reserves for losses and LAE are established on a similar basis as our insurance policies. Other changes in fair value are included in unrealized gains and losses on derivative financial instruments. We generally hold derivative contracts to maturity. However, in certain circumstances such as for risk management purposes or as a result of a decision to exit a line of business, we may decide to terminate a derivative contract prior to maturity. Where we hold a derivative contract to maturity, the cumulative unrealized gains and losses will net to zero if we incur no credit losses on that contract. However, in the event that we terminate a derivative contract prior to maturity the unrealized gain or loss will be realized through premiums earned and losses incurred.

The fair value of these instruments depends on a number of factors including credit spreads, changes in interest rates, recovery rates and the credit ratings of referenced entities. Where available, we use quoted market

prices to determine the fair value of these credit derivatives. If the quoted prices are not available, particularly for senior layer CDOs and equity layer credit protection, the fair value is estimated using valuation models for each type of credit protection. These models may be developed by third parties, such as rating agencies, or developed internally based on market conventions for similar transactions, depending on the circumstances. These models and the related assumptions are continuously reevaluated by management and enhanced, as appropriate, based upon improvements in modeling techniques and availability of more timely market information. The majority of our single name credit derivatives were valued using third-party market quotes. These exposures were substantially liquidated in the first quarter of 2005 as we are no longer involved in the single name credit derivatives business. Our exposures to CDOs are typically valued using a combination of rating agency models and internally developed models.

Valuation models include the use of management estimates and current market information. Management is also required to make assumptions on how the fair value of derivative instruments is affected by current market conditions. Management considers factors such as current prices charged for similar agreements, performance of underlying assets, and our ability to obtain reinsurance for our insured obligations. Due to the inherent uncertainties of the assumptions used in the valuation models to determine the fair value of these derivative products, actual experience may differ from the estimates reflected in our unaudited interim consolidated financial statements, and the differences may be material.

During the first quarter 2005 review of its valuation models, management identified a limitation in its valuation models highlighted by the then widening credit spread environment. Management adjusted its valuation models for this limitation in the first quarter 2005 resulting in an adjustment to unrealized gains on derivative financial instruments of \$4.3 million, net of income taxes. Management continues to perform additional analysis, as necessary, to address market anomalies and their effect on its valuation models.

The fair value adjustment recognized in our statements of operations for the three months ended June 30, 2006 (Second Quarter 2006) was a \$5.7 million gain compared with a \$12.5 million loss for the three months ended June 30, 2005 (Second Quarter 2005). The fair value adjustment recognized in our statements of operations for Six Months ended June 30, 2006 (Six Months 2006) was a \$5.7 million gain compared with a \$9.4 million loss for Six Months ended June 30, 2005 (Six Months 2005). The change in fair value is related to many factors but primarily due to narrowing in credit spreads.

Valuation of Investments

As of June 30, 2006 and December 31, 2005, we had total investments of \$2.2 billion. The fair values of all of our investments are calculated from independent market quotations.

As of June 30, 2006, approximately 92% of our investments were long-term fixed maturity securities, and our portfolio had an average duration of 4.3 years, compared with 95% and 4.4 years as of December 31, 2005. Changes in interest rates affect the value of our fixed maturity portfolio. As interest rates fall, the fair value of fixed maturity securities increases and as interest rates rise, the fair value of fixed maturity securities decreases.

Other than Temporary Impairments

We have a formal review process for all securities in our investment portfolio, including a review for impairment losses. Factors considered when assessing impairment include:

- a decline in the market value of a security by 20% or more below amortized cost for a continuous period of at least six months;
- a decline in the market value of a security for a continuous period of 12 months;
- recent credit downgrades of the applicable security or the issuer by rating agencies;
- the financial condition of the applicable issuer;

- whether scheduled interest payments are past due; and
- whether we have the ability and intent to hold the security for a sufficient period of time to allow for anticipated recoveries in fair value.

If we believe a decline in the value of a particular investment is temporary, we record the decline as an unrealized loss on our balance sheet in accumulated other comprehensive income in shareholders' equity. If we believe the decline is other than temporary, we write down the carrying value of the investment and record a realized loss in our statement of operations. Our assessment of a decline in value includes management's current assessment of the factors noted above. If that assessment changes in the future, we may ultimately record a loss after having originally concluded that the decline in value was temporary.

The Company had no write downs of investments for other than temporary impairment losses for the three- and six-month periods ended June 30, 2006 and 2005.

The following table summarizes the unrealized losses in our investment portfolio by type of security and the length of time such securities have been in a continuous unrealized loss position as of the dates indicated:

	As of June 30, 2006		As of December 31, 2005	
	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses

Premium Revenue Recognition

Premiums are received either upfront or in installments. Upfront premiums are earned in proportion to the expiration of the related risk. Each installment premium is earned ratably over its installment period, generally one year or less. For the financial guaranty direct and financial guaranty reinsurance segments, earned premiums related to upfront premiums are greater in the earlier periods of an upfront transaction when there is a higher amount of risk outstanding. The premiums are allocated in accordance with the principal amortization schedule of the related bond issue and are earned ratably over the amortization period. When an insured issue is retired early, is called by the issuer, or is in substance paid in advance through a refunding accomplished by placing U.S. Government securities in escrow, the remaining unearned premium reserve is earned at that time. Unearned premium reserves represent the portion of premiums written that are applicable to the unexpired amount at risk of insured bonds.

In our reinsurance businesses, we estimate the ultimate written and earned premiums to be received from a ceding company at the end of each quarter and the end of each year because some of our ceding companies report premium data anywhere from 30 to 90 days after the end of the relevant period. Written premiums reported in our statement of operations are based upon reports received from ceding companies supplemented by our own estimates of premium for which ceding company reports have not yet been received. As of June 30, 2006 and December 31, 2005, the assumed premium estimate and related ceding commissions included in our unaudited interim consolidated financial statements were \$23.1 million and \$7.2 million and \$14.3 million and \$4.5 million, respectively. Key assumptions used to arrive at management's best estimate of assumed premiums are premium amounts reported historically and informal communications with ceding companies. Differences between such estimates and actual amounts are recorded in the period in which the actual amounts are determined. Historically, the differences have not been material. We do not record a provision for doubtful accounts related to our assumed premium estimate. Historically there have not been any material issues related to the collectibility of assumed premium. No provision for doubtful accounts related to our premium receivable was recorded for 2006 or 2005.

Deferred Acquisition Costs

Acquisition costs incurred, other than those associated with credit derivative products, that vary with and are directly related to the production of new business are deferred and amortized in relation to earned premiums. These costs include direct and indirect expenses such as ceding commissions, brokerage expenses and the cost of underwriting and marketing personnel. As of June 30, 2006 and December 31, 2005, we had deferred acquisition costs of \$205.3 million and \$193.4 million, respectively. Ceding commissions paid to primary insurers are the largest component of deferred acquisition costs, constituting 70.0% and 72.6% of total deferred acquisition costs as of June 30, 2006 and December 31, 2005, respectively. Management uses its judgment in determining what types of costs should be deferred, as well as what percentage of these costs should be deferred. We annually conduct a study to determine which operating costs vary with, and are directly related to, the acquisition of new business and qualify for deferral. Ceding commissions received on premiums we cede to other reinsurers reduce acquisition costs. Anticipated losses, LAE and the remaining costs of servicing the insured or reinsured business are considered in determining the recoverability of acquisition costs. Acquisition costs associated with credit derivative products are expensed as incurred. When an insured issue is retired early, as discussed in the Premium Revenue Recognition section of these Critical Accounting Estimates, the remaining related deferred acquisition cost is expensed at that time.

Deferred Income Taxes

As of June 30, 2006 and December 31, 2005, we had a net deferred income tax liability of \$24.3 million and \$26.6 million, respectively. Certain of our subsidiaries are subject to U.S. income tax. Deferred income tax assets and liabilities are established for the temporary differences between the financial statement carrying amounts and tax bases of assets and liabilities using enacted rates in effect for the year in which the differences are expected to reverse. Such temporary differences relate principally to deferred acquisition costs, reserves for losses and LAE, unearned premium reserves, net operating loss carryforwards (NOLs), unrealized gains and losses on investments and derivative financial instruments and statutory contingency reserves. A valuation allowance is recorded to reduce a deferred tax asset to the amount that in management's opinion is more likely than not to be realized.

As of June 30, 2006, Assured Guaranty Re Overseas Ltd. (AGRO) had a stand-alone NOL of \$54.0 million, which is available to offset its future U.S. taxable income. AGRO has \$33.3 million of this NOL.

available through 2017 and \$20.7 million available through 2023. AGRO's stand-alone NOL is not permitted to offset income of any other members of AGRO's consolidated group due to certain tax regulations. Under applicable accounting rules, we are required to establish a valuation allowance for NOLs that we believe are more likely than not to expire before utilized. Management believes it is more likely than not that \$20.0 million of AGRO's \$54.0 million NOL will not be utilized before it expires and has established a \$7.0 million valuation allowance related to the NOL deferred tax asset. In addition, management has established a valuation allowance for deferred tax assets attributable to unrealized losses of AGRO in the amount of \$1.7 million which are unlikely to be realized. The valuation allowance is subject to considerable judgment, is reviewed quarterly and will be adjusted to the extent actual taxable income differs from estimates of future taxable income that may be used to realize NOLs or capital losses.

Accounting for Share-Based Compensation

Prior to January 1, 2006, we accounted for our share-based employee compensation plans under the measurement and recognition provisions of Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25) and related Interpretations, as permitted by FAS No. 123, *Accounting for Stock-Based Compensation* (FAS 123). During the three- and six- month periods ended June 30, 2005, we recorded no share-based employee compensation expense for options granted under the Assured Guaranty Ltd. 2004 Long-Term Incentive Plan (the Incentive Plan) as all options granted under that plan had exercise prices equal to the fair market value of our common stock on the date of grant. Also, during the three- and six-month periods ended June 30, 2005, we recorded no compensation expense in connection with the Assured Guaranty Ltd. Employee Stock Purchase Plan (the Stock Purchase Plan) as the purchase price of the stock was not less than 85% of the lower of the fair market value of our common stock at the beginning of each offering period or at the end of each purchase period. In accordance with FAS 123 and FAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure* (FAS 148) we disclosed our net income and earnings per share as if we had applied the fair value-based method in measuring compensation expense for our share-based incentive programs.

Effective January 1, 2006, we adopted the fair value recognition provisions of FAS No. 123 (revised), *Share-Based Payment* (FAS 123R) using the modified prospective transition method. Under that transition method, compensation expense includes: (a) compensation expense for all share-based payments granted prior to, but not yet vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of FAS 123, and (b) compensation expense for all share-based payments granted on or after January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of FAS 123R.

As a result of adopting FAS 123R on January 1, 2006, the Company's Second Quarter 2006 income before income taxes and net income are \$1.5 million and \$1.1 million lower, respectively, and for Six Months 2006 are \$3.2 million and \$2.5 million lower, respectively, than if it had continued to account for share-based compensation under APB 25. Basic and diluted earnings per share for Second Quarter 2006 and Six Months 2006 are \$0.01 and \$0.03 lower, respectively, than if the Company had continued to account for share-based compensation under APB 25. In addition, the Company capitalized \$1.2 million in Six Months 2006 of share-based compensation as deferred acquisition costs (DAC). Because we elected to use the modified prospective transition method, results for prior periods have not been restated.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The following table presents pre-DAC and pre-tax, share-based compensation cost by share-based expense type:

	Three Months Ended June 30,			Six Months Ended June 30,		
(in thousands of U.S. dollars)	2006		2005	2006		2005
Share-Based Employee Cost						
<i>Restricted Stock</i>						
Recurring amortization	\$ 1,957		\$ 1,382	\$ 3,764		\$ 2,561
Accelerated amortization for retirement eligible employees	364			807		
Subtotal	2,321		1,382	4,571		2,561
<i>Stock Options</i>						
Recurring amortization	909			1,953		
Accelerated amortization for retirement eligible employees	150			355		
Subtotal	1,059			2,308		
<i>ESPP</i>	32			64		
Total Share-Based Employee Cost	3,412		1,382	6,943		2,561
Share-Based Directors Cost						
<i>Restricted Stock</i>	72		120	139		150
<i>Restricted Stock Units</i>	229		149	413		307
Total Share-Based Directors Cost	301		269	552		457
Total Share-Based Cost	\$ 3,713		\$ 1,651	7,495		\$ 3,018

At June 30, 2006, there was \$26.9 million of total unrecognized compensation cost related to non-vested share-based compensation arrangements granted under all equity compensation plans. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures. We expect to recognize that cost over a weighted average period of 1.9 years. As a result of the adoption of FAS 123R, the income tax effects of compensatory stock options are included in the computation of the income tax expense (benefit), and deferred tax assets and liabilities, subject to certain prospective adjustments to shareholders' equity for the differences between the income tax effects of expenses recognized in the results of operations and the related amounts deducted for income tax purposes. Prior to the adoption of FAS 123R, the tax benefits relating to the income tax deductions for compensatory stock options were recorded directly to shareholders' equity.

The weighted-average grant-date fair value of options granted were \$6.86 and \$5.08 for Second Quarter 2006 and Second Quarter 2005, respectively. The weighted-average grant-date fair value of options granted were \$6.71 and \$4.53 for Six Months 2006 and Six Months 2005, respectively. The fair value of options issued is estimated on the date of grant using the Black-Scholes option-pricing model, with the following weighted-average assumptions used for grants in 2006 and 2005:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2006		2005	2006		2005
Dividend yield	0.6	%	0.6	%	0.5	%
Expected volatility	20.12	%	20.92	%	20.44	%
Risk free interest rate	5.1	%	4.2	%	4.6	%
Expected life	5 years		5 years		5 years	
Forfeiture rate	6.0	%	6.0	%	6.0	%

These assumptions were based on the following:

- The expected dividend yield is based on the current expected annual dividend and share price on the grant date,

- Expected volatility is estimated at the date of grant based on the historical share price volatility, calculated on a daily basis,

43

- The risk-free interest rate is the implied yield currently available on U.S. Treasury zero-coupon issues with an equivalent remaining term to the granted stock options,
- The expected life is based on the average expected term of our guideline companies, which are defined as similar entities, since the Company has insufficient expected life data,
- The forfeiture rate is based on the rate used by our guideline companies, since the Company has insufficient forfeiture data. Estimated forfeitures will be reassessed at each balance sheet date and may change based on new facts and circumstances.

For options granted before January 1, 2006, the Company amortizes the fair value on an accelerated basis. For options granted on or after January 1, 2006, the Company amortizes the fair value on a straight-line basis. All options are amortized over the requisite service periods of the awards, which are generally the vesting periods. Stock options are generally granted once a year with exercise prices equal to the closing price on the date of grant. The Company may elect to use different assumptions under the Black-Scholes option valuation model in the future, which could materially affect the Company's net income or earnings per share.

Consolidated Results of Operations (1)

The following table presents summary consolidated results of operations data for the three and six months ended June 30, 2006 and 2005.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005

(1) Some amounts may not foot due to rounding.

(2) Prior year segment amounts have been adjusted to reflect current year operating expense allocations for comparability purposes.

We organize our business around four principal business segments: financial guaranty direct, financial guaranty reinsurance, mortgage guaranty and other. There are a number of lines of business that we exited as part of our IPO in April 2004, which are included in the other segment. However, the results of these businesses are reflected in our consolidated financial statements. These businesses include equity layer credit protection, trade credit reinsurance, title reinsurance and auto residual value reinsurance. These unaudited interim consolidated financial statements cover the Second Quarter 2006, Second Quarter 2005, Six Months 2006 and Six Months 2005.

Net Income

Net income was \$44.5 million for Second Quarter 2006, a decrease of \$22.3 million compared with \$66.8 million for Second Quarter 2005. The decrease is primarily attributable to a \$63.7 million loss recovery in Second Quarter 2005 resulting from reinsurance of financial guaranty policies that insured certain investments in securities issued by entities related to Commercial Financial Services, Inc. (CFS). Offsetting the decrease are

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

unrealized gains on derivative financial instruments of \$5.7 million in Second Quarter 2006 compared with a loss of \$12.5 million in Second Quarter 2005. Further offsetting the decrease was an \$8.3 million reduction in our income tax provision which was \$9.5 million in Second Quarter 2006, compared with \$17.8 million in Second Quarter 2005. The Second Quarter 2005 included \$22.3 million of income tax expense related to the \$63.7 million loss recovery mentioned above. Differences in our income tax expense are primarily attributable to the relative distribution of income across our taxable and non-taxable jurisdictions. Net income was \$79.4 million for Six Months 2006, compared with \$111.1 million for Six Months 2005. The decrease of \$31.7 million in 2006 compared with 2005 is primarily due to the same reasons mentioned above.

Gross Written Premiums

	Three Months Ended June 30,		Six Months Ended June 30,	
Gross Written Premiums	2006	2005	2006	2005
	(\$ in millions)			
Financial guaranty direct	\$ 68.4	\$ 20.9	\$ 98.6	\$ 44.7
Financial guaranty reinsurance	41.7	8.2	60.5	42.2
Mortgage guaranty	1.2	1.9	3.8	21.3
Total financial guaranty gross written premiums	111.4	31.0	163.0	108.2
Other	0.1	9.5	3.9	10.4
Total gross written premiums	\$ 111.5	\$ 40.5	\$ 166.9	\$ 118.6

Gross written premiums for Second Quarter 2006 were \$111.5 million compared with \$40.5 million for Second Quarter 2005. Gross written premiums from our financial guaranty direct operations increased \$47.5 million in Second Quarter 2006 compared with Second Quarter 2005. The increase is primarily attributable to several financial guaranty transactions written during Second Quarter 2006 in the United Kingdom (UK) with upfront premiums totaling \$41.0 million. Our financial guaranty reinsurance segment increased \$33.5 million in Second Quarter 2006 compared with Second Quarter 2005 due to increased upfront treaty and facultative assumed premiums in Second Quarter 2006, where as Second Quarter 2005 had more installment treaty and facultative assumed premiums. In addition, Financial Security Assurance Inc. (FSA) reassumed from Assured Guaranty Re Ltd. (AG Re) \$18.4 million of healthcare related business (FSA transaction) in Second Quarter 2005.

Gross written premiums for Six Months 2006 were \$166.9 million, compared with \$118.6 million for Six Months 2005. This increase is primarily due to the same reasons mentioned above. However, gross written premiums for Six Months 2006 in our mortgage guaranty segment decreased \$17.5 million compared with Six Months 2005, primarily attributable to a single transaction executed in First Quarter 2005 which contributed \$16.3 million to gross written premiums.

Net Earned Premiums

	Three Months Ended June 30,		Six Months Ended June 30,	
Net Earned Premiums	2006	2005	2006	2005
	(\$ in millions)			
Financial guaranty direct	\$ 21.2	\$ 16.0	\$ 41.9	\$ 36.4
Financial guaranty reinsurance	23.1	27.2	46.4	50.2
Mortgage guaranty	3.7	5.1	7.9	9.7
Total financial guaranty net earned premiums	48.2	48.3	96.2	96.4
Other				
Total net earned premiums	\$ 48.2	\$ 48.3	\$ 96.2	\$ 96.4

Net earned premiums for Second Quarter 2006 were \$48.2 million compared with \$48.3 million for Second Quarter 2005. Financial guaranty direct segment net earned premium was \$21.2 million for Second Quarter 2006

an increase of \$5.2 million compared with Second Quarter 2005. The increase reflects the continued execution of our direct business strategy and increased market share.

Net earned premiums for Six Months 2006 were \$96.2 million, compared with \$96.4 million for Six Months 2005. Included in Six Months 2005 financial guaranty direct net earned premiums is \$4.4 million of single name corporate CDS net earned premiums, primarily due to a novation of the business which generated \$2.4 million of net earned premiums. Six Months 2006 included only \$0.6 million, of net earned premiums from this line of business.

Net Investment Income

Net investment income was \$27.3 million for Second Quarter 2006, compared with \$23.7 million for Second Quarter 2005. The \$3.6 million increase is attributable to increasing investment yields during the year, combined with increased invested assets due to positive operating cash flows.

Net investment income was \$53.5 million for Six Months 2006, compared with \$46.8 million for Six Months 2005. Pre-tax book yields were 5.1% and 4.7% for the periods ended June 30, 2006 and 2005, respectively. The \$6.7 million increase for Six Months 2006 compared with Six Months 2005 is primarily due to the same reasons mentioned above.

Net Realized Investment (Losses)Gains

Net realized investment (losses)gains, principally from the sale of fixed maturity securities were \$(1.0) million and \$1.7 million for Second Quarter 2006 and Second Quarter 2005, respectively, and \$(2.0) million and \$3.5 million for Six Months 2006 and Six Months 2005, respectively. The Company had no write downs of investments for other than temporary impairment losses for the three and six months ended June 30, 2006 and 2005. Net realized investment (losses)gains, net of related income taxes, were \$(0.8) million and \$1.2 million for Second Quarter 2006 and Second Quarter 2005, respectively, and \$(1.4) million and \$2.7 million for Six Months 2006 and Six Months 2005, respectively.

Unrealized Gains (Losses) on Derivative Financial Instruments

Derivative financial instruments are recorded at fair value as required by FAS 133 and FAS 149. However, as explained under Critical Accounting Estimates, we record part of the change in fair value in the loss and LAE reserves as well as in unearned premium reserves. The fair value adjustment for Second Quarter 2006 was a \$5.7 million gain compared with a \$12.5 million loss in Second Quarter 2005. The fair value adjustment for Six Months 2006 was \$5.7 million gain compared with a \$9.4 million loss for Six Months 2005. The change in fair value for both years is related to many factors but primarily due to run-off of deals and changes in credit spreads. Unrealized gains (losses) on derivative financial instruments, net of related income taxes, were \$4.3 million and \$(9.7) million for Second Quarter 2006 and Second Quarter 2005, respectively, and \$4.2 million and \$(8.1) million for Six Months 2006 and Six Months 2005, respectively.

The gain or loss created by the estimated fair value adjustment will rise or fall based on estimated market pricing and may not be an indication of ultimate claims. Fair value is defined as the amount at which an asset or liability could be bought or sold in a current transaction between willing parties. We generally plan to hold derivative financial instruments to maturity. Where we hold derivative financial instruments to maturity, these fair value adjustments would generally be expected to reverse resulting in no gain or loss over the entire term of the contract.

Loss and Loss Adjustment Expenses

	Three Months Ended June 30,		Six Months Ended June 30,	
Loss and Loss Adjustment Expenses	2006	2005	2006	2005
	(\$ in millions)			
Financial guaranty direct	\$ (2.5)	\$ 5.0	\$ (4.3)	\$ 3.5
Financial guaranty reinsurance	5.7	(64.1)	8.5	(71.2)
Mortgage guaranty	0.4		0.2	0.2
Total financial guaranty loss and loss adjustment expenses	3.6	(59.1)	4.4	(67.5)
Other	(10.1)		(11.3)	(1.1)
Total loss and loss adjustment expenses	\$ (6.5)	\$ (59.1)	\$ (6.9)	\$ (68.5)

Loss and loss adjustment expenses (LAE) for Second Quarter 2006 and Second Quarter 2005 were \$(6.5) million and \$(59.1) million, respectively. The financial guaranty direct segment had loss and loss adjustment expenses of \$(2.5) million mainly due to a \$2.1 million release of portfolio reserves as a result of the early termination of 20 swap transactions based on the counterparties right to terminate. Second Quarter 2005 includes the addition of \$4.5 million in case reserves relating to a mortgage transaction, executed in 2001. During Second Quarter 2006 we increased loss reserves \$5.4 million in our financial guaranty reinsurance segment, of which \$3.8 million related to a rating downgrade of a European infrastructure transaction and \$1.6 million related to the rating downgrade of various credits. Second Quarter 2005 included a \$63.7 million loss recovery resulting from a third party litigation settlement agreement, discussed earlier. Our other segment was impacted by \$10.1 million of loss recoveries from third party litigation settlements related to the equity layer credit protection business in Second Quarter 2006.

Loss and loss adjustment expenses for Six Months 2006 and Six Months 2005 were \$(6.9) million and \$(68.5) million, respectively. In addition to the \$10.1 million of loss recoveries from third party litigation settlements related to the equity layer credit protection business in Second Quarter 2006, during First Quarter 2005 the Company recovered \$1.1 million in the other segment relating to its equity layer credit protection business. In addition to the \$63.7 million loss recovery recorded in Second Quarter 2005, mentioned above, we recovered an additional \$6.8 million in the financial guaranty reinsurance segment relating to this same reinsurance claim during First Quarter 2005.

Profit Commission Expense

Profit commissions allow the ceding company to share favorable experience on a reinsurance contract due to lower than expected losses. Profit commissions for Second Quarter 2006 and Six Months 2006 were \$1.7 million and \$3.0 million, respectively, compared with \$3.3 million and \$4.3 million for the comparable periods in the prior year. The decrease for both periods is primarily related to the FSA transaction, which contains a profit commission component. Since the transaction was completed during Second Quarter 2005, but effective back to January 1, 2005, the entire \$2.3 million profit commission was recorded during Second Quarter 2005. The remainder of the decrease is associated with the run-off of mortgage guaranty experience rated quota share treaties.

Acquisition Costs

Acquisition costs primarily consist of ceding commissions, brokerage fees and operating expenses that are related to the acquisition of new business. Acquisition costs that vary with and are directly related to the acquisition of new business are deferred and amortized in relation to earned premium. For Second Quarter 2006 and Second Quarter 2005, acquisition costs were \$11.3 million and \$11.7 million, respectively, while Six Months 2006 and Six Months 2005 acquisition costs were \$22.1 million and \$21.9 million, respectively. These amounts are consistent with earned premium.

Operating Expenses

For Second Quarter 2006 and Second Quarter 2005, operating expenses were \$15.6 million and \$14.5 million, respectively. Operating expenses for Six Months 2006 were \$32.8 million, compared with \$29.0 million for Six Months 2005. The \$1.1 million increase for Second Quarter 2006 compared with Second Quarter 2005 was primarily due to the recognition of stock option expense. The Company adopted FAS 123R on January 1, 2006, which requires, among other items, the recognition of stock option expense in the results of operations. The increase in Six Months 2006 compared with Six Months 2005 is due to the same factor described above.

Other Expenses

For Second Quarter 2006 and Second Quarter 2005, other expenses were \$4.1 million and \$5.9 million, respectively, while for Six Months 2006 and Six Months 2005, other expenses were \$8.0 million and \$9.2 million, respectively. The 2006 and 2005 amounts are comprised of put option premiums associated with Assured Guaranty Corp. s (AGC) \$200.0 million committed capital securities and interest expense primarily related to our 7% Senior Notes (Senior Notes) in May 2004. The coupon on the Senior Notes is 7.0%, however, the effective rate will be approximately 6.4%, taking into account the effect of a cash flow hedge executed in March 2004. The decrease in Second Quarter 2006 and Six Months 2006 compared with the same periods in 2005 is primarily due to \$2.0 million of investment banking fees associated with the committed capital securities in Second Quarter 2005.

Income Tax

For Second Quarter 2006 and Second Quarter 2005, income tax expense was \$9.5 million and \$17.8 million, respectively. For Six Months 2006 and Six Months 2005, income tax expense was \$15.1 million and \$30.3 million, respectively. Our effective tax rate was 17.5% and 15.9% for Second Quarter 2006 and Six Months 2006, respectively, compared with 21.1% and 21.4% for Second Quarter 2005 and Six Months 2005, respectively. Our effective tax rates reflect the proportion of income recognized by each of our operating subsidiaries, with U.S. subsidiaries taxed at the U.S. marginal corporate income tax rate of 35%, UK subsidiaries taxed at the UK marginal corporate tax rate of 30%, and no taxes for our Bermuda holding company and subsidiaries. Accordingly, our overall corporate effective tax rate fluctuates based on the distribution of taxable income across these jurisdictions. Second Quarter 2006 and Six Months 2006 includes \$3.5 million of income tax expense related to the \$10.1 million of loss recoveries from third party litigation settlements related to the equity layer credit protection business. Second Quarter 2005 and Six Months 2005 include \$22.3 million of income tax expense related to the \$63.7 million loss recovery mentioned above. This was partially offset by a \$7.8 million tax benefit from the FSA transaction discussed earlier.

Segment Results of Operations

Our financial results include four principal business segments: financial guaranty direct, financial guaranty reinsurance, mortgage guaranty and other. Management uses underwriting gains and losses as the primary measure of each segment s financial performance. Underwriting gain and loss includes net premiums earned, loss and loss adjustment expenses, profit commission expense, acquisition costs and other operating expenses that are directly related to the operations of our insurance businesses. This measure excludes certain revenue and expense items, such as investment income, realized investment gains and losses, unrealized gains and losses on derivative financial instruments, and interest expense, that are not directly related to the underwriting performance of our insurance operations, but are included in net income.

Financial Guaranty Direct Segment

The financial guaranty direct segment consists of our primary financial guaranty insurance business and our credit derivative business. Financial guaranty insurance provides an unconditional and irrevocable guaranty that protects the holder of a financial obligation against non-payment of principal and interest when due. Financial guaranty insurance may be issued to the holders of the insured obligations at the time of issuance of those

obligations, or may be issued in the secondary market to holders of public bonds and structured securities. As an alternative to traditional financial guaranty insurance, credit protection on a particular security or issuer can also be provided through a credit derivative, such as a credit default swap. Under a credit default swap, the seller of protection makes a specified payment to the buyer of protection upon the occurrence of one or more specified credit events with respect to a reference obligation or a particular reference entity. Credit derivatives typically provide protection to a buyer rather than credit enhancement of an issue as in traditional financial guaranty insurance.

The table below summarizes the financial results of our financial guaranty direct segment for the periods presented:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
	(\$ in millions)			
Gross written premiums	\$ 68.4	\$ 20.9	\$ 98.6	\$ 44.7
Net written premiums	67.8	20.4	97.5	43.5
Net earned premiums	21.2	16.0	41.9	36.4
Loss and loss adjustment expenses	(2.5)	5.0	(4.3)	3.5
Profit commission expense				
Acquisition costs	2.3	1.6	4.2	3.1
Operating expenses	12.0	9.5	25.4	20.9
Underwriting gain (loss)	\$ 9.4	\$ (0.1)	\$ 16.6	\$ 8.9
Loss and loss adjustment expense ratio	(11.7)%	31.3%	(10.2)%	9.7%
Expense ratio	67.4%	69.1%	70.6%	65.8%
Combined ratio	55.7%	100.4%	60.4%	75.5%

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
	(\$ in millions)			
Gross Written Premiums				
Public finance	\$ 48.0	\$ 5.4	\$ 56.9	\$ 7.0
Structured finance	20.4	15.5	41.7	37.7
Total	\$ 68.4	\$ 20.9	\$ 98.6	\$ 44.7

For Second Quarter 2006 the financial guaranty direct segment contributed \$68.4 million to gross written premiums, an increase of \$47.5 million, compared with \$20.9 million for Second Quarter 2005. The increase is mainly attributable to several financial guaranty transactions written during Second Quarter 2006 in the UK with upfront premiums totaling \$41.0 million. Gross written premiums for Six Months 2006 and Six Months 2005 were \$98.6 million and \$44.7 million, respectively. The increase of \$53.9 million is attributable to the same reason as discussed for Second Quarter 2006.

Gross and net written premiums from structured finance and credit derivatives are generally received on an installment basis. For Six Months 2006, 56% of gross written premiums in this segment were upfront premiums and 44% were installment premiums. For Six Months 2005, 24% of gross written premiums in this segment were upfront premiums and 76% were installment premiums.

			Three Months Ended June 30,		Six Months Ended June 30,	
Net Written Premiums			2006	2005	2006	2005
			(\$ in millions)			
Public finance			\$ 48.0	\$ 5.6	\$ 56.9	\$ 7.0
Structured finance			19.8	14.8	40.6	36.5
Total			\$ 67.8	\$ 20.4	\$ 97.5	\$ 43.5

For Second Quarter 2006 and Six Months 2006, net written premiums were \$67.8 million and \$97.5 million, respectively, compared with \$20.4 million for Second Quarter 2005 and \$43.5 million for Six Months 2005. The variances in net written premiums are consistent with the variances in gross written premiums as we typically retain a substantial portion of this business.

			Three Months Ended June 30,		Six Months Ended June 30,	
Net Earned Premiums			2006	2005	2006	2005
			(\$ in millions)			
Public finance			\$ 1.7	\$ 0.4	\$ 2.8	\$ 0.5
Structured finance			19.5	15.6	39.1	35.9
Total			\$ 21.2	\$ 16.0	\$ 41.9	\$ 36.4

Net earned premiums for Second Quarter 2006 were \$21.2 million compared with \$16.0 million for Second Quarter 2005, reflecting the continued execution of our direct business strategy and increased market share. Net earned premiums for Six Months 2006 increased \$5.5 million compared with Six Months 2005. Included in Six Months 2005 financial guaranty direct net earned premiums is \$4.4 million of single name corporate CDS net earned premiums, primarily due to a novation of the business which generated \$2.4 million of net earned premiums. Six Months 2006 included only \$0.6 million of net earned premiums from this line of business.

Loss and LAE were \$(2.5) million and \$5.0 million, respectively, for Second Quarter 2006 and Second Quarter 2005, while these expenses were \$(4.3) million and \$3.5 million for Six Months 2006 and Six Months 2005, respectively. Second Quarter 2006 included a \$2.1 million release of portfolio reserves as a result of the early termination of 20 swap transactions based on the counterparties right to terminate and \$0.4 million loss recovery from a transaction originally executed in 2001. During Second Quarter 2005 we added \$4.5 million in case reserves for a specific mortgage transaction executed in 2001.

In addition to the reduction discussed above, Six Months 2006 includes a \$3.2 million settlement of a sub-prime mortgage transaction, offset by a related \$0.7 million subrogation recovery and a \$4.5 million release of case reserves. This was partially offset by a \$0.2 million increase in portfolio reserves. Six Months 2005 amount is attributable to a \$0.9 million release of portfolio reserves related to the single name corporate CDS line of business, as well as a release of portfolio reserves related to our CDO book of business as those deals approached maturity and the underlying credit quality improved during First Quarter 2005.

Acquisition costs for Second Quarter 2006 and Six Months 2006 were \$2.3 million and \$4.2 million, respectively. For Second Quarter 2005 and Six Months 2005 acquisition costs were \$1.6 million and \$3.1 million, respectively. Acquisition costs generally are expensed in proportion to net earned premiums. Net earned premiums in 2005 included \$2.4 million from the novation of our single name corporate CDS business, with no offsetting acquisition expenses. Excluding the novation, the ratio of acquisition costs to net earned premiums are consistent period to period.

Operating expenses for Second Quarter 2006 and Second Quarter 2005 were \$12.0 million and \$9.5 million, respectively. Operating expenses for Six Months 2006 were \$25.4 million, compared with \$20.9 million for Six Months 2005. During 2006 the Company implemented a new operating expense methodology to more closely apply expenses to the individual operating segments. This new methodology was based on a

comprehensive study and is based on departmental time estimates and headcount. 2005 amounts have been restated to show this new methodology on a comparative basis. The increase in operating expenses for the three- and six-month periods ended June 30, 2006, compared with the three- and six-month periods ended June 30, 2005 is due to increased salaries and employee related benefits, including the expensing of stock options, due to staffing additions and merit increases.

Financial Guaranty Reinsurance Segment

In our financial guaranty reinsurance business, we assume all or a portion of risk undertaken by other insurance companies that provide financial guaranty protection. The financial guaranty reinsurance business consists of public finance and structured finance reinsurance lines. Premiums on public finance are typically written upfront and earned over the life of the policy, and premiums on structured finance are typically written on an installment basis and earned ratably over the installment period.

The table below summarizes the financial results of our financial guaranty reinsurance segment for the periods presented:

	Three Months Ended June 30,				Six Months Ended June 30,								
	2006			2005			2006			2005			
				(\$ in millions)									
Gross written premiums	\$	41.7		\$	8.2			\$	60.5		\$	42.2	
Net written premiums		41.3			8.0				59.8			42.0	
Net earned premiums		23.1			27.2				46.4			50.2	
Loss and loss adjustment expenses		5.7			(64.1))			8.5			(71.2))
Profit commission expense		1.0			2.3				1.4			2.3	
Acquisition costs		8.5			9.5				17.2			17.6	
Operating expenses		3.4			4.7				6.8			7.5	
Underwriting gain	\$	4.6		\$	74.8			\$	12.6		\$	94.0	
Loss and loss adjustment expense ratio		24.6	%		(235.7))%			18.3	%		(141.8))%
Expense ratio		55.4	%		60.7	%			54.5	%		54.6	%
Combined ratio		80.0	%		175.0	%			72.8	%		(87.2))%

			Three Months Ended June 30,			Six Months Ended June 30,		
Gross Written Premiums			2006		2005	2006		2005
			(\$ in millions)					
Public finance	\$	33.2	\$	(1.8)	\$	44.6	\$	21.4
Structured finance		8.5		10.0		15.9		20.8
Total	\$	41.7	\$	8.2	\$	60.5	\$	42.2

Gross written premiums for our financial guaranty reinsurance segment include upfront premiums on transactions underwritten during the period, plus installment premiums on business primarily underwritten in prior periods. Consequently, this amount is affected by changes in the business mix between public finance and structured finance. For Six Months 2006, 67% of gross written premiums in this segment were upfront premiums and 33% were installment premiums. For Six Months 2005, 38% of gross written premiums in this segment were upfront premiums and 62% were installment premiums.

Gross written premiums for Second Quarter 2006 were \$41.7 million, an increase of \$33.5 million, compared with \$8.2 million for Second Quarter 2005, while gross written premiums for Six Months 2006 were \$60.5 million, an increase of \$18.3 million, compared with \$42.2 million for Six Months 2005. The increase of Second Quarter 2006 gross written premiums compared with Second Quarter 2005 is attributable to a greater portion of business being public finance, which tends to be received on an upfront basis, rather than structured finance,

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

which tends to be received on an installment basis. In Second Quarter 2006 upfront treaty and facultative deals totaled \$31.9 million compared with \$(3.8) million in Second Quarter 2005. Installment premiums were \$9.8 million for Second Quarter 2006, compared with \$12.0 million for Second Quarter 2005. The \$(3.8) million in Second Quarter 2005 is attributable to FSA reassuming \$18.4 million of healthcare related reinsurance business from AG Re.

The following table summarizes the Company's gross written premiums by significant client:

			Three Months Ended June 30,		Six Months Ended June 30,	
Gross Written Premiums by Client			2006	2005	2006	2005
			(\$ in millions)			
Financial Security Assurance Inc.(1)			\$ 18.2	\$ 10.4	\$ 25.7	\$ 32.6
Ambac Assurance Corporation			10.5	9.7	14.8	20.4
Financial Guaranty Insurance Company			9.5	3.3	12.9	5.6
MBIA Insurance Corporation			2.3	4.2	5.8	8.9

(1) Second Quarter 2005 and Six Months 2005 excludes \$18.4 million of reassumption of premiums related to the Company's healthcare business during Second Quarter 2005.

As of April 1, 2005 our quota share reinsurance treaty with Ambac Assurance Corporation (Ambac) was renewed. In addition, AG Re entered into a master facultative agreement with Ambac on March 31, 2005. On April 20, 2005, Ambac provided notice of a non-renewal of the quota share treaty on a run-off basis, effective July 1, 2006.

			Three Months Ended June 30,		Six Months Ended June 30,	
Net Written Premiums			2006	2005	2006	2005
			(\$ in millions)			
Public finance			\$ 32.9	\$ (2.0)	\$ 44.0	\$ 21.2
Structured finance			8.4	10.0	15.8	20.8
Total			\$ 41.3	\$ 8.0	\$ 59.8	\$ 42.0

For Second Quarter 2006 and Six Months 2006, net written premiums were \$41.3 million and \$59.8 million, respectively, compared with \$8.0 million and \$42.0 million, respectively, for the same periods last year. The increases of \$33.3 million and \$17.8 million are consistent with the increases in gross written premium described above.

			Three Months Ended June 30,		Six Months Ended June 30,	
Net Earned Premiums			2006	2005	2006	2005
			(\$ in millions)			
Public finance			\$ 14.4	\$ 12.7	\$ 30.0	\$ 23.7
Structured finance			8.7	14.5	16.4	26.5
Total			\$ 23.1	\$ 27.2	\$ 46.4	\$ 50.2
Included in public finance reinsurance net earned premiums are refundings of			\$ 1.7	\$ 3.6	\$ 5.3	\$ 5.0

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

Net earned premiums for Second Quarter 2006 and Six Months 2006 were \$23.1 million and \$46.4 million, respectively, compared with \$27.2 million and \$50.2 million for Second Quarter 2005 and Six Months 2005, respectively. Public finance net earned premiums include refunding premiums, which reflect the unscheduled pre-payment or refundings of underlying municipal bonds due to lower interest rates. These unscheduled refunding premiums, which were \$1.7 million and \$5.3 million for Second Quarter 2006 and Six Months 2006, respectively,

compared with \$3.6 million and \$5.0 million, respectively, for the same periods last year, are sensitive to market interest rates. We evaluate our net earned premiums both including and excluding these premiums.

Losses and LAE were \$5.7 million and \$(64.1) million for Second Quarter 2006 and Second Quarter 2005, respectively. During Second Quarter 2006 we increased loss reserves \$5.4 million, of which \$3.8 million related to a ratings downgrade of a European infrastructure transaction and \$1.6 million related to the ratings downgrade of various credits. Second Quarter 2005 includes a \$63.7 million loss recovery resulting from reinsurance of financial guaranty policies that insured certain investments in securities issued by entities related to CFS.

Losses and LAE were \$8.5 million and \$(71.2) million for Six Months 2006 and Six Months 2005, respectively. In addition to the reserve increases mentioned above, Six Months 2006 includes a \$2.5 million case reserve addition due to a U.S. public infrastructure transaction. Also included in Six Months 2006 are various additions to case reserves totaling \$0.7 million and incurred and paid LAE of \$0.6 million related to the same European infrastructure transaction mentioned above. Offsetting these additions was a \$1.0 million release of portfolio reserves. Six Months 2005 includes an additional \$6.8 million relating to the CFS reinsurance claim mentioned above. This recovery was received in connection with the completion of two settlements.

Profit commission expense was \$1.0 million in Second Quarter 2006 compared to \$2.3 million in Second Quarter 2005, and \$1.4 million in Six Months 2006 compared with \$2.3 million in Six Months 2005. During Second Quarter 2005, AGC and AG Re, two of the Company's subsidiaries, entered into a reinsurance agreement, effective as of January 1, 2005, with FSA pursuant to which substantially all of FSA's financial guaranty risks previously ceded to AGC were assumed by AG Re. Since the transaction was completed during Second Quarter 2005, but effective back to January 1, 2005, the entire \$2.3 million profit commission was recorded during Second Quarter 2005.

For Second Quarter 2006 and Second Quarter 2005, acquisition costs were \$8.5 million and \$9.5 million, respectively, while acquisition costs were \$17.2 million for Six Months 2006 compared with \$17.6 million for Six Months 2005. The changes in acquisition costs over the periods are directly related to the changes in net earned premium.

Operating expenses for Second Quarter 2006 and Second Quarter 2005 were \$3.4 million and \$4.7 million, respectively. Operating expenses for Six Months 2006 were \$6.8 million, compared with \$7.5 million for Six Months 2005. During 2006 the Company implemented a new operating expense methodology to more closely apply expenses to the individual operating segments. This new methodology was based on a comprehensive study and is based on departmental time estimates and headcount. 2005 amounts have been restated to show this new methodology on a comparative basis. Though overall operating expenses have increased, financial guaranty reinsurance operating expenses decreased in Second Quarter 2006 and Six Months 2006, compared with comparable periods in 2005 as more time and resources are being focused on our financial guaranty direct segment and thus a greater share of the expenses have been allocated to that segment.

Mortgage Guaranty Segment

Mortgage guaranty insurance provides protection to mortgage lending institutions against the default of borrowers on mortgage loans that, at the time of the advance, had a loan-to-value ratio in excess of a specified ratio. We primarily function as a reinsurer in this industry and assume all or a portion of the risks undertaken by primary mortgage insurers.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The table below summarizes the financial results of our mortgage guaranty segment for the periods presented:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2006		2005	2006		2005
			(\$ in millions)			
Gross written premiums	\$	1.2	\$	1.9	\$	3.8
Net written premiums		1.2		1.9		3.8
Net earned premiums		3.7		5.1		7.9
Loss and loss adjustment expenses		0.4				0.2
Profit commission expense		0.7		1.0		1.6
Acquisition costs		0.3		0.6		0.6
Operating expenses		0.3		0.3		0.6
Underwriting gain	\$	2.0	\$	3.2	\$	4.8
Loss and loss adjustment expense ratio		9.4	%			2.5
Expense ratio		36.4	%	37.5	%	36.2
Combined ratio		45.8	%	37.5	%	38.7

Gross written premiums for Second Quarter 2006 and Six Months 2006 were \$1.2 million and \$3.8 million, respectively, compared with \$1.9 million and \$21.3 million for the comparable periods in 2005. The decrease in gross written premiums for Second Quarter 2006 compared with Second Quarter 2005 is due to the run-off of our quota share treaty business. In addition to the run-off of our quota share treaty business, the decrease in gross written premiums for Six Months 2006 compared with Six Months 2005 is primarily related to a single transaction executed in First Quarter 2005 which contributed \$16.3 million to gross written premiums.

Net written premiums for Second Quarter 2006 and Six Months 2006 were \$1.2 million and \$3.8 million, respectively, compared with \$1.9 million and \$21.3 million for the comparable periods in 2005. This is consistent with gross written premiums, as we do not cede a significant amount of our mortgage guaranty business.

For Second Quarter 2006 and Second Quarter 2005, net earned premiums were \$3.7 million and \$5.1 million, respectively. For Six Months 2006 net earned premiums were \$7.9 million compared with \$9.7 million for Six Months 2005. The decrease in net earned premiums reflects the run-off of our quota share treaty business.

Loss and LAE were \$0.4 million for Second Quarter 2006 while Second Quarter 2005 experienced no net losses. Loss and LAE for both Six Months 2006 and Six Months 2005 was \$0.2 million. During Second Quarter 2006 portfolio reserves were increased \$0.4 million reflecting continued earnings from the remaining in-force exposure on our excess of loss mortgage insurance contracts. Offsetting the portfolio increase mentioned above, Six Months 2006, includes a \$0.2 million reduction of case reserves, reflecting the run-off of our quota share treaty business. During Six Months 2005, the Company added \$0.5 million to portfolio reserves which was offset by case and IBNR reserve releases of \$0.3 million.

Profit commission expense for Second Quarter 2006 and Second Quarter 2005 was \$0.7 million and \$1.0 million, respectively. For Six Months 2006 profit commission expense decreased to \$1.6 million, compared with \$2.0 million for Six Months 2005. The decrease in profit commission expense for 2006 compared with 2005 is primarily due to the run-off of mortgage guaranty experience rated quota share treaties, which have a large profit commission component.

Acquisition costs for Second Quarter 2006 and Second Quarter 2005 were \$0.3 million and \$0.6 million, respectively. Acquisition costs for Six Months 2006 were \$0.6 million compared with \$1.1 million for Six Months 2005. The decline in acquisition costs in 2006 as compared with 2005 is directly related to the decline in net earned premiums.

Operating expenses for both Second Quarter 2006 and Second Quarter 2005 were \$0.3 million, while for both Six Months 2006 and Six Months 2005 they were \$0.6 million. During 2006 the Company implemented a new operating expense methodology to more closely apply expenses to the individual operating segments. This new methodology was based on a comprehensive study and is based on departmental time estimates and headcount. 2005 amounts have been restated to show this new methodology on a comparative basis. Though overall operating expenses increased, mortgage guaranty operating expenses remained flat in Second Quarter 2006 and Six Months 2006, compared with comparable periods in 2005, as more time and resources are being focused on our financial guaranty direct segment and thus a greater share of the expenses have been allocated to that segment.

Other Segment

Our other segment consists of certain non-core businesses that we have exited in connection with the IPO, including, but not limited to, equity layer credit protection, trade credit reinsurance and title reinsurance .

The other segment had no earned premiums during 2006 or 2005. However, during Second Quarter 2006 and Six Months 2006, due to loss recoveries from third party litigation settlements from our exited equity layer credit protection business, the other segment generated \$10.1 million and \$11.3 million, respectively, of underwriting gains. Six Months 2005 had an underwriting gain of \$1.1 million from loss recoveries associated with our exited equity layer credit protection business, while no underwriting gain was generated in Second Quarter 2005.

Liquidity and Capital Resources

Our liquidity, both on a short-term basis (for the next twelve months) and a long-term basis (beyond the next twelve months), is largely dependent upon: (1) the ability of our operating subsidiaries to pay dividends or make other payments to us, (2) external financings and (3) investment income from our invested assets. Our liquidity requirements include the payment of our operating expenses, interest on our debt, and dividends on our common shares. We may also require liquidity to make periodic capital investments in our operating subsidiaries. In the ordinary course of our business, we evaluate our liquidity needs and capital resources in light of holding company expenses, debt-related expenses and our dividend policy, as well as rating agency considerations. Based on the amount of dividends we expect to receive from our subsidiaries and the income we expect to receive from our invested assets, management believes that we will have sufficient liquidity to satisfy our needs over the next twelve months, including the ability to pay dividends on our common shares in accordance with our dividend policy. Total cash paid in Six Months 2006 and Six Months 2005 for dividends to shareholders was \$5.3 million, or \$0.07 per common share, and \$4.5 million, or \$0.06 per common share, respectively. Beyond the next twelve months, the ability of our operating subsidiaries to declare and pay dividends may be influenced by a variety of factors including market conditions, insurance and rating agencies regulations and general economic conditions. Consequently, although management believes that we will continue to have sufficient liquidity to meet our debt service and other obligations over the long term, no guaranty can be given that we will not be required to seek external debt or equity financing in order to meet our operating expenses, debt service obligations or pay dividends on our common shares.

We anticipate that a major source of our liquidity, for the next twelve months and for the longer term, will be amounts paid by our operating subsidiaries as dividends. Certain of our operating subsidiaries are subject to restrictions on their ability to pay dividends. The amount available at AGC to pay dividends in 2006 with notice to, but without the prior approval of, the Maryland Insurance Commissioner is approximately \$29.6 million. AGC has committed to its rating agencies that it will not pay more than \$10.0 million per year in dividends, without prior consultation. Dividends paid by a U.S. company to a Bermuda holding company presently are subject to a 30% withholding tax. The amount available at AG Re to pay dividends in 2006 in compliance with Bermuda law is \$590.2 million.

Liquidity at our operating subsidiaries is used to pay operating expenses, claims, payment obligations with respect to credit derivatives, reinsurance premiums and dividends to Assured Guaranty U.S. Holdings Inc. for debt service and dividends to us, as well as, where appropriate, to make capital investments in their own subsidiaries. In addition, certain of our operating companies may be required to post collateral in connection with credit derivatives and reinsurance transactions. Management believes that these subsidiaries' operating needs generally can be met

from operating cash flow, including gross written premium and investment income from their respective investment portfolios.

Net cash flows provided by operating activities were \$91.4 million and \$70.6 million during Six Months 2006 and Six Months 2005, respectively. The increase in cash flows provided by operating activities was primarily due to upfront premium received in both our financial guaranty direct and financial guaranty reinsurance segments during Second Quarter 2006 and a \$10.1 million loss recovery from third party litigation settlements from our equity layer credit protection business, which was exited in connection with the IPO.

Net cash flows used in investing activities were \$42.3 million and \$57.6 million during Six Months 2006 and Six Months 2005, respectively. These investing activities consist of net purchases and sales of fixed maturity securities and short-term investments.

Net cash flows used in financing activities were \$26.8 million and \$24.8 million during Six Months 2006 and Six Months 2005, respectively. During Six Months 2006 we paid \$5.3 million in dividends and \$2.3 million, net, under our stock award plans. In addition, in April 2006, the Company repaid \$2.1 million of notes outstanding and related interest to subsidiaries of ACE. These notes were assumed in connection with the IPO. During Six Months 2005, we paid \$4.5 million in dividends and \$1.3 million, net, under our stock award plans.

On May 4, 2006, the Company's Board of Directors approved a new share repurchase program for 1.0 million common shares. Share repurchases will take place at management's discretion depending on market conditions. During Six Months 2006, we paid \$17.2 million to repurchase 0.7 million shares of our Common Stock. During Six Months 2005 we paid \$19.0 million to repurchase 1.0 million shares of our Common Stock under the Board of Directors authorized \$25.0 million stock repurchase program, which was initiated in November 2004.

As of June 30, 2006 our future cash payments associated with contractual obligations pursuant to our operating leases for office space and have not materially changed since December 31, 2005.

Credit Facilities

\$300.0 million Credit Facility

On April 15, 2005, Assured Guaranty Ltd. and certain of its subsidiaries entered into a \$300.0 million three-year unsecured revolving credit facility (the "\$300.0 million credit facility") with a syndicate of banks, for which ABN AMRO Incorporated and Bank of America, N.A. acted as lead arrangers and KeyBank National Association ("KeyBank") acted as syndication agent. Under the \$300.0 million credit facility, each of AGC, Assured Guaranty (UK) Ltd. ("AG (UK)"), a subsidiary of AGC organized under the laws of the United Kingdom, Assured Guaranty Ltd., AG Re and AGRO are entitled to request the banks to make loans to such borrower or to request that letters of credit be issued for the account of such borrower. The \$300.0 million credit facility replaced the previously outstanding (1) \$250.0 million credit facility and (2) Letter of Credit Agreement.

The proceeds of the loans and letters of credit are to be used for working capital and other general corporate purposes of the borrowers and to support reinsurance transactions.

At the closing of the \$300.0 million credit facility, (i) AGC guaranteed the obligations of AG (UK) under such facility, (ii) Assured Guaranty Ltd. guaranteed the obligations of AG Re and AGRO under such facility and agreed that, if the Consolidated Assets (as defined in the related credit agreement) of AGC and its subsidiaries were to fall below \$1.2 billion, it would, within 15 days, guarantee the obligations of AGC and AG (UK) under such facility and (iii) Assured Guaranty Overseas US Holdings Inc., as a Material Non-AGC Subsidiary (as defined in the related credit agreement), guaranteed the obligations of Assured Guaranty Ltd., AG Re and AGRO under such facility. Subsequently, AG Re and AGRO, as Material Non-AGC Subsidiaries, both guaranteed the obligations of the other and of Assured Guaranty Ltd. under such facility.

The \$300.0 million credit facility's financial covenants require that Assured Guaranty Ltd. (a) maintain a minimum net worth of \$1.2 billion, (b) maintain an interest coverage ratio of at least 2.5:1, and (c) maintain a

maximum debt-to-capital ratio of 30%. In addition, the \$300.0 million credit facility requires that AGC: (x) maintain qualified statutory capital of at least 80% of its statutory capital as of the fiscal quarter prior to the closing date of the facility and (y) maintain a ratio of aggregate net par outstanding to qualified statutory capital of not more than 150:1. Furthermore, the \$300.0 million credit facility contains restrictions on Assured Guaranty Ltd. and its subsidiaries, including, among other things, in respect of their ability to incur debt, permit liens, become liable in respect of guaranties, make loans or investments, pay dividends or make distributions, dissolve or become party to a merger, consolidation or acquisition, dispose of assets or enter into affiliate transactions. Most of these restrictions are subject to certain minimum thresholds and exceptions. A default by one borrower will give rise to a right of the lenders to terminate the facility and accelerate all amounts then outstanding. As of June 30, 2006 and December 31, 2005, Assured Guaranty was in compliance with all of those financial covenants.

As of June 30, 2006 and December 31, 2005, no amounts were outstanding under this facility nor have there been any borrowings under this facility.

Non-Recourse Credit Facility

AGC is also party to a non-recourse credit facility with a syndicate of banks which provides up to \$175.0 million specifically designed to provide rating agency-qualified capital to further support AGC's claims paying resources. The facility expires in December 2010. As of June 30, 2006 and December 31, 2005, no amounts were outstanding under this facility nor have there been any borrowings under the life of this facility.

The Company's failure to comply with certain covenants under our credit facilities could, subject to grace periods in the case of certain covenants, result in an event of default. This could require the Company to repay any outstanding borrowings in an accelerated manner.

Committed Capital Securities

On April 8, 2005, AGC entered into separate agreements (the "Put Agreements") with each of Woodbourne Capital Trust I, Woodbourne Capital Trust II, Woodbourne Capital Trust III and Woodbourne Capital Trust IV (each, a "Custodial Trust") pursuant to which AGC may, at its option, cause each of the Custodial Trusts to purchase up to \$50,000,000 of perpetual preferred stock of AGC (the "AGC Preferred Stock").

Structure

Each of the Custodial Trusts is a newly organized Delaware statutory trust formed for the purpose of (i) issuing a series of flex committed capital securities (the "CCS Securities") representing undivided beneficial interests in the assets of such Custodial Trust; (ii) investing the proceeds from the issuance of the CCS Securities or any redemption in full of AGC Preferred Stock in a portfolio of high-grade commercial paper and (in limited cases) U.S. Treasury Securities (the "Eligible Assets"), (iii) entering into the Put Agreement with AGC; and (iv) entering into related agreements.

Initially, all of the CCS Securities were issued to a special purpose pass-through trust (the "Pass-Through Trust"). The Pass-Through Trust is a newly created statutory trust organized under the Delaware Statutory Trust Act formed for the purposes of (i) issuing \$200,000,000 of Pass-Through Trust Securities to qualified institutional buyers within the meaning of Rule 144A under the Securities Act of 1933, as amended, (ii) investing the proceeds from the sale of the Pass-Through Trust Securities in, and holding, the CCS Securities issued by the Custodial Trusts and (iii) entering into related agreements. Neither the Pass-Through Trust nor the Custodial Trusts are consolidated in Assured Guaranty's financial statements.

Income distributions on the Pass-Through Trust Securities will be equal to an annualized rate of One-Month LIBOR plus 110 basis points for all periods ending on or prior to April 8, 2008, and thereafter distributions will be determined pursuant to a remarketing process (the "Flexed Rate Period") or pursuant to an auction process (the "Auction Rate Mode"). Distributions on the CCS Securities and dividends on the AGC Preferred Stock will be determined pursuant to the same process.

Put Agreement

Pursuant to the Put Agreement, AGC will pay a monthly put premium to each Custodial Trust except (1) during any period when the AGC Preferred Stock that has been put to a Custodial Trust is held by that Custodial Trust or (2) upon termination of the Put Agreement. The put premium will equal the product of (A) the applicable distribution rate on the CCS Securities for the respective distribution period less the excess of (i) the Custodial Trust's stated return on the Eligible Assets for such distribution period (including any fees and expenses of the Pass-Through Trust) (expressed as an annual rate) over (ii) the expenses of the Custodial Trust for such distribution period (expressed as an annual rate), (B) the aggregate face amount of the CCS Securities of the Custodial Trust outstanding on the date the put premium is calculated, and (C) a fraction, the numerator of which will be the actual number of days in such distribution period and the denominator of which will be 360. In addition, and as a condition to exercising the put option under a Put Agreement, AGC is required to enter into a Custodial Trust Expense Reimbursement Agreement with the respective Custodial Trust pursuant to which AGC agrees it will pay the fees and expenses of the Custodial Trust (which includes the fees and expenses of the Pass-Through Trust) during the period when such Custodial Trust holds AGC Preferred Stock.

Upon exercise of the put option granted to AGC pursuant to the Put Agreement, a Custodial Trust will liquidate its portfolio of Eligible Assets and purchase the AGC Preferred Stock and will hold the AGC Preferred Stock until the earlier of (i) the redemption of such AGC Preferred Stock and (ii) the liquidation or dissolution of the Custodial Trust.

Each Put Agreement has no scheduled termination date or maturity, however, it will terminate if (1) AGC fails to pay the put premium in accordance with the Put Agreement, and such failure continues for five business days, (2) during the Auction Rate Mode, AGC elects to have the AGC Preferred Stock bear a fixed rate dividend (a Fixed Rate Distribution Event), (3) AGC fails to pay (i) dividends on the AGC Preferred Stock, or (ii) the fees and expenses of the Custodial Trust, for the related dividend period, and such failure continues for five business days, (4) AGC fails to pay the redemption price of the AGC Preferred Stock and such failure continues for five business days, (5) the face amount of a Custodial Trust's CCS Securities is less than \$20,000,000, (6) AGC elects to terminate the Put Agreement, or (7) a decree of judicial dissolution of the Custodial Trust is entered. If, as a result of AGC's failure to pay the put premium, the Custodial Trust is liquidated, AGC will be required to pay a termination payment which will be distributed to the holders of the Pass-Through Trust Securities. The termination payment will be at a rate equal to 1.10% per annum of the amount invested in Eligible Assets calculated from the date of the failure to pay the put premium through the end of the applicable period.

As of June 30, 2006 and December 31, 2005, the put option had not been exercised.

AGC Preferred Stock

AGC Preferred Stock will be issued in one or more series, with each series in an aggregate liquidation preference amount equal to the aggregate face amount of a Custodial Trust's outstanding CCS Securities, net of fees and expenses, upon exercise of the put option. Unless redeemed by AGC, the AGC Preferred Stock will be perpetual.

For each distribution period, holders of the outstanding AGC Preferred Stock of any series, in preference to the holders of common stock and of any other class of shares ranking junior to the AGC Preferred Stock, will be entitled to receive out of any funds legally available therefore when, as and if declared by the Board of Directors of AGC or a duly authorized committee thereof, cash dividends at a rate per share equal to the dividends rate for such series of AGC Preferred Stock for the respective distribution period. Prior to a Fixed Rate Distribution Event, the dividend rate on the AGC Preferred Stock will be equal to the distribution rate on the CCS Securities. The Custodial Trust's expenses (including any expenses of the Pass-Through Trust) for the period will be paid separately by AGC pursuant to the Custodial Trust Expense Reimbursement Agreement.

Upon a Fixed Rate Distribution Event, the distribution rate on the AGC Preferred Stock will equal the fixed rate equivalent of one-month LIBOR plus 2.50%. A Fixed Rate Distribution Event will be deemed to have occurred during the Auction Rate Mode when AGC Preferred Stock is outstanding, if: (1) AGC elects to have the AGC Preferred Stock bear dividends at a fixed rate, (2) AGC fails to pay dividends on the AGC Preferred Stock for the related distribution period and such failure continues for five business days or (3) AGC fails to pay the fees and

expenses of the Custodial Trust for the related distribution period pursuant to the Custodial Trust Expense Reimbursement Agreement and such failure continues for five business days.

During the Flexed Rate Period and for any period in which AGC Preferred Stock is held by a Custodial Trust, dividends will be paid monthly, except that during the Auction Rate Mode dividends will be paid every 49 days. Following a Fixed Rate Distribution Event, dividends will be paid every 90 days.

Following exercise of the put option during any Flexed Rate Period, AGC may redeem the AGC Preferred Stock held by a Custodial Trust in whole and not in part on any distribution payment date by paying a redemption price to such Custodial Trust in an amount equal to the liquidation preference amount of the AGC Preferred Stock (plus any accrued but unpaid dividends on the AGC Preferred Stock for the then current distribution period). If AGC redeems the AGC Preferred Stock held by a Custodial Trust, the Custodial Trust will reinvest the redemption proceeds in Eligible Assets and, in accordance with the Put Agreement, AGC will pay the put premium to the Custodial Trust. If the AGC Preferred Stock was distributed to holders of CCS Securities during any Flexed Rate Period then AGC may not redeem the AGC Preferred Stock until the end of such period.

Following exercise of the put option during the Auction Rate Mode or at the end of any Flexed Rate Period, AGC may redeem the AGC Preferred Stock held by a Custodial Trust in whole or in part (x) on the final distribution payment date of the applicable Flexed Rate Period and (y) on any distribution payment date in the Auction Rate Mode, by paying a redemption price to the Custodial Trust in an amount equal to the liquidation preference amount of the AGC Preferred Stock to be redeemed (plus any accrued but unpaid dividends on such AGC Preferred Stock for the then current distribution period). If AGC partially redeems the AGC Preferred Stock held by a Custodial Trust, the redemption proceeds will be distributed pro rata to the holders of the CCS Securities and, if the Pass-Through Trust is the holder of CCS Securities, distributed by the Pass-Through Trust to holders of Pass-Through Securities (and a corresponding reduction in the aggregate face amount of CCS Securities and, if the Pass-Through Trust is the holder of CCS Securities, Pass-Through Trust Securities will be made); provided that AGC must redeem all of the AGC Preferred Stock if after giving effect to a partial redemption, the aggregate liquidation preference amount of the AGC Preferred Stock held by such Custodial Trust immediately following such redemption would be less than \$20,000,000. If a Fixed Rate Distribution Event occurs, AGC may not redeem the AGC Preferred Stock for a period of two years from the date of such Fixed Rate Distribution Event.

Investment Portfolio

Our investment portfolio consisted of \$2,069.2 million of fixed maturity securities, \$170.7 million of short-term investments and had a duration of 4.3 years as of June 30, 2006, compared with \$2,134.0 million of fixed maturity securities, \$115.8 million of short-term investments with a duration of 4.4 years as of December 31, 2005. Our fixed maturity securities are designated as available-for-sale in accordance with FAS No. 115 Accounting for Certain Investments in Debt and Equity Securities (FAS 115). Fixed maturity securities are reported at their fair value in accordance with FAS 115, and the change in fair value is reported as part of accumulated other comprehensive income. If we believe the decline in fair value is other than temporary, we write down the carrying value of the investment and record a realized loss in our statement of operations.

Fair value of the fixed maturity securities is based upon quoted market prices provided by either independent pricing services or, when such prices are not available, by reference to broker or underwriter bid indications. Our investment portfolio does not include any non-publicly traded securities. For a detailed description of our valuation of investments see Critical Accounting Estimates.

We review our investment portfolio for possible impairment losses. For additional information, see Critical Accounting Estimates.

Edgar Filing: ASSURED GUARANTY LTD - Form 10-Q

The following table summarizes the ratings distributions of our investment portfolio as of June 30, 2006 and December 31, 2005. Ratings are represented by the lower of the Moody's and S&P classifications.

	As of June 30, 2006		As of December 31, 2005	
AAA or equivalent	82.7	%	84.9	%
AA	12.1	%	10.7	%
A	5.2	%	4.4	%
Total	100.0	%	100.0	%

As of June 30, 2006 and December 31, 2005, our investment portfolio did not contain any securities that were not rated or rated below investment grade.

Short-term investments include securities with maturity dates equal to or less than one year from the original issue date. Our short-term investments are composed of money market funds, discounted notes and certain time deposits for foreign cash portfolios. Short-term investments are reported at cost, which approximates the fair value of these securities due to the short maturity of these investments.

Under agreements with our cedants and in accordance with statutory requirements, we maintain fixed maturity securities in trust accounts for the benefit of reinsured companies and for the protection of policyholders, generally in states where we or our subsidiaries, as applicable, are not licensed or accredited. The carrying value of such restricted balances as of June 30, 2006 and December 31, 2005 was \$491.3 million and \$552.8 million, respectively.

Under certain derivative contracts, we are required to post eligible securities as collateral, generally cash or U.S. government or agency securities. The need to post collateral under these transactions is generally based on marked to market valuations in excess of contractual thresholds. The fair market values of our pledged securities totaled \$1.7 million as of June 30, 2006 and \$1.8 million as of December 31, 2005.

Recent Accounting Pronouncements

In February 2006, the FASB issued FAS No. 155, *Accounting for Certain Hybrid Financial Instruments* (FAS 155) which amends FAS 133 and FAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* (FAS 140), and addresses issues raised in FAS 133 Implementation Issue No. D1, *Application of Statement 133 to Beneficial Interests in Securitized Financial Assets*. The primary objectives of FAS 155 are: (i) with respect to FAS 133, to address the accounting for beneficial interests in securitized financial assets and (ii) with respect to FAS 140, eliminate a restriction on the passive derivative instruments that a qualifying special purpose entity may hold. FAS 155 is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The Company is currently evaluating the implications of FAS 155 on its financial statements.

In July 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Company is assessing FIN 48 and has not determined the impact that the adoption of FIN 48 will have on its results of operations or financial position.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Risk

Market risk represents the potential for losses that may result from changes in the value of a financial instrument as a result of changes in market conditions. The primary market risks that impact the value of our financial instruments are interest rate risk, basis risk, such as taxable interest rates relative to tax-exempt interest rates, and credit spread risk. Senior managers in our surveillance department are responsible for monitoring risk limits and applying risk measurement methodologies. The estimation of potential losses arising from adverse changes in market conditions is a key element in managing market risk. We use various systems, models and stress test scenarios to monitor and manage market risk. These models include estimates made by management that use current and historic market information. The valuation results from these models could differ materially from amounts that actually are realized in the market. See Critical Accounting Estimates Valuation of Investments.

Financial instruments that may be adversely affected by changes in interest rates consist primarily of investment securities. The primary objective in managing our investment portfolio is generation of an optimal level of after-tax investment income while preserving capital and maintaining adequate liquidity. Investment strategies are based on many factors, including our tax position, fluctuation in interest rates, regulatory and rating agency criteria and other market factors. There have been no significant changes in circumstances affecting our market risks. As such, we have not provided disclosure in this quarterly report on Form 10-Q.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. Assured Guaranty Ltd. s management, with the participation of Assured Guaranty Ltd. s Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of Assured Guaranty Ltd. s disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on this evaluation, Assured Guaranty Ltd. s Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, Assured Guaranty Ltd. s disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by Assured Guaranty Ltd. (including its consolidated subsidiaries) in the reports that it files or submits under the Exchange Act and that such information is accumulated and communicated to Assured Guaranty Ltd. s management as appropriate to allow for timely decisions regarding the required disclosure.

There have been no changes in internal controls that has materially affected, or is reasonably likely to affect, Assured Guaranty Ltd. s internal control over financial reporting.

PART II OTHER INFORMATION

Item 1 Legal Proceedings

Lawsuits arise in the ordinary course of the Company's business. It is the opinion of the Company's management, based upon the information available, that the expected outcome of these matters, individually or in the aggregate, will not have a material adverse effect on the Company's financial position, results of operations or liquidity, although an adverse resolution of a number of these items could have a material adverse effect on the Company's results of operations or liquidity in a particular quarter or fiscal year.

In the ordinary course of their respective businesses, certain of our subsidiaries assert claims in legal proceedings against third parties to recover losses paid in prior periods. The amounts, if any, the Company will recover in these proceedings are uncertain, although recoveries in any one or more of these proceedings during any quarter or fiscal year could be material to the Company's results of operations in that particular quarter or fiscal year.

In April 2005, AGC received a Notice of Order to Preserve (Order) from the Office of the Commissioner of Insurance, State of Georgia (Commissioner). The Order was directed to ACE Limited, and all affiliates and requires the preservation of documents and other items related to finite insurance and a broad group of other insurance and reinsurance agreements. Also in April 2005, AGC, and numerous other insurers, received a subpoena from the Commissioner related to the initial phase of the Commissioner's investigation into finite-risk transactions. The subpoena requests information on AGC's assumed and ceded reinsurance contracts in force during 2004. AGC provided the required information in response to the subpoena in January of 2006 and has not been contacted further by the Commissioner.

During Second Quarter 2006, the Company's wholly owned subsidiary, Assured Guaranty Re Overseas Ltd. (AGRO), and a number of other parties, completed various settlements with defendants in the *In re: National Century Financial Enterprises Inc. Investment Litigation* now pending in the United States District Court for the Southern District of Ohio - Eastern District. AGRO received approximately \$10.1 million (pre-tax) in Second Quarter 2006, from the settlements. AGRO originally paid claims in 2003 of approximately \$41.7 million (pre-tax) related to National Century Financial Enterprises Inc. To date, including the settlements described above, the Company has recovered \$16.6 million (pre-tax). This is a partial settlement of the litigation, and the litigation will continue against other parties.

Item 1A Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2005, which could materially affect our business, financial condition or future results. There have been no significant changes in circumstances affecting our risk factors. As such, we have not provided disclosure in this quarterly report on Form 10-Q.

Item 2 Unregistered Sales of Equity Securities and Use of Proceeds**Issuer's Purchases of Equity Securities**

The following table reflects purchases made by the Company during the three months ended June 30, 2006. On May 4, 2006, the Company's Board of Directors approved a new 1.0 million share repurchase program. Share repurchases will take place at management's discretion depending on market conditions.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Program	(d) Maximum Number of Shares that May Yet Be Purchased Under the Program
April 1 - April 30	75,564	(1) \$ 25.08		
May 1 - May 31	369,984	(2) \$ 24.92	368,182	631,818
June 1 - June 30	325,814	\$ 24.60	325,814	306,004
Total	771,362	\$ 24.80	693,996	

(1) 75,564 shares were repurchased from employees in connection with the payment of withholding taxes due in connection with the vesting of restricted stock awards.

(2) 1,802 shares were repurchased from employees in connection with the payment of withholding taxes due in connection with the vesting of restricted stock awards.

Items 3, 4 and 5 are omitted either because they are inapplicable or because the answer to such question is negative.

Item 6 Exhibits

See Exhibit Index for a list of exhibits filed with this report.
