OPERATING AND FINANCIAL REVIEW AND PROSPECTS AS OF SEPTEMBER 30, 2017

Table of Contents

TELECOM ARGENTINA S.A.

Services revenues amounted to \$41,646 (+26.7% vs. 9M16) and represented 88.1% of consolidated revenues (vs. 84.7% in 9M16). Equipment revenues decreased 5.5%, amounting to \$5,617 and represented 11.9% of consolidated revenues (vs. 15.3% in 9M16).

Fixed Services

During 9M17, services revenues generated by this segment amounted to \$14,335 (+\$3,523 or +32.6% vs. 9M16), where Voice revenues have grown the most (+\$1,791 or +41.4% vs. 9M16), followed by Internet services (+\$1,270 or +29.2% vs. 9M16).

Voice revenues (including the net revenues generated by the subsidiary Telecom USA amounting to \$212) reached \$6,119 in 9M17 (+41.4% vs. 9M16). The increase was mainly due to the increase in plans prices.

Internet service revenues amounted to \$5,621 in 9M17 (+29.2% vs. 9M16) as a result of the increase in the average plans prices. As a consequence, the Internet average monthly revenue per user (ARPU) amounted to \$350.1 pesos per month in 9M17 vs. \$260.4 pesos per month in 9M16 (+34.4%). As of September 30, 2017, the number of ADSL subscribers amounted to approximately 1,746,000. The churn rate per month amounted to 1.4% in 9M17 (vs. 1.5% in 9M16).

Data revenues (including the revenues generated by the subsidiary Telecom USA of \$12) amounted to \$2,595 (+\$462 vs. 9M16). These revenues were generated focusing on the Company's position as an integrated TICs provider (Datacenter, VPN, among others) for wholesale and government segments. The increase was primarily due to the variation of the \$/US\$ exchange rate related to agreements settled in such foreign currency and to the increase in the number of *Innovation* services customers.

Personal Mobile Services

During 9M17, total services revenues amounted to \$25,264 (+\$4,967 or 24.5% vs. 9M16), being the principal business segment in revenues terms (60.7% and 61.7% of services consolidated revenues in 9M17 and 9M16, respectively). Personal reached 19.0 million subscribers in Argentina (-4.4% vs. 9M16). Approximately 66% of the subscriber base is prepaid subscribers and 34% is postpaid subscribers (including Abono fijo and Mobile Internet subscribers dongles).

The main ratios were:

- The churn rate per month amounted to 2.9% in 9M17 (vs. 2.7% in 9M16).
- ARPU amounted to \$139.0 pesos per month in 9M17 (vs. \$108.3 pesos per month in 9M16), representing a 28.3% increase.
- Other income generated by mobile Internet services amounted to \$12,353 (+\$4,856 or +64.8% vs. 9M16), fueled by new offers aimed at content consumption, the migration of subscribers to higher value service plans and the increase in subscribers holding 3G and 4G handsets, which enhance Internet usage.

Outbound mobile services revenues amounted to \$22,118 in 9M17 (+\$4,075 or +22.6% vs. 9M16). The increase was mainly due to higher monthly charges prices in the postpaid and Abono fijo subscriber base and to the increase of the online recharges in the prepaid subscriber base.

Inbound mobile services revenues (including CPP and TLRD) amounted to \$1,949 (+\$781 or +66.9% vs. 9M16). This increase is mainly related to the higher price per minute of CPP services, representing an increase in CPP services revenues, which were partially offset by a decrease in traffic volumes. In addition, TLRD average price per minute and interconnection traffic volumes increased.

Other mobile services revenues amounted to \$1,197 (+\$111 or 10.2% vs. 9M16) mainly due to the increase in reconnection charges, which were partially offset by a decrease in international roaming traffic.

Núcleo Mobile Services

This segment generated services revenues equivalent to \$2,047 during 9M17 (+\$282 or 16.0% vs. 9M16) mainly due to the Internet revenues increase related to the increase of browsing generated by subscribers with mobile equipment prepared for that purpose. As of September 30, 2017, Núcleo's subscriber base reached 2.5 million customers. Prepaid and postpaid subscribers (including Plan Control subscribers and mobile Internet subscribers) represented 83% and 17% in 9M17, respectively.

Internet revenues amounted to \$931 (+32.1% vs. 9M16) and represented 45.5% of Núcleo Mobile Services segment services revenues (vs. 39.9% in 9M16).

OPERATING AND FINANCIAL REVIEW AND PROSPECTS AS OF SEPTEMBER 30, 2017

Table of Contents**TELECOM ARGENTINA S.A.****Equipment**

Revenues from equipment amounted to \$5,617, -\$327 or -5.5% vs. 9M16. This decrease is mainly related to the Personal Mobile Services with a decrease of \$399 vs. 9M16 due to lower handsets sold (-15% vs. 9M16) partially offset by higher handset s sale prices (+9% vs. 9M16).

- **Operating costs**

Consolidated operating costs including depreciations, amortizations and disposal and impairment of PP&E totaled \$38,306 in 9M17, which represents an increase of \$4,975 or +14.9% vs. 9M16. The increase in costs is mainly a consequence of higher revenues, higher expenses related to competition in mobile and Internet businesses, higher direct and indirect labor costs on the cost structure of the Telecom Group in Argentina, the increase in fees for services related to higher supplier prices, the increase in taxes, higher provisions, the increase in bad debt expenses and higher depreciations and amortizations, partially offset by the decrease in the cost of equipment and handsets, the decrease of VAS costs and the decrease in agent commissions.

The costs breakdown is as follows:

Employee benefit expenses and severance payments

Employee benefit expenses and severance payments amounted to \$9,158 (+\$1,945 or +27.0% vs. 9M16). The increase was mainly due to increases in salaries agreed by Telecom Argentina with several trade unions for the unionized employees and also to non-unionized employees, together with related social security charges. With a total headcount of 15,510 by the end of 9M17 (vs. 16,241 employees in 9M16), lines in service per employee reached 357 in the Fixed Services segment (similar to the amount of 9M16), subscribers per employee reached 4,352 in the Personal Mobile Services segment (+4.3% vs. 9M16) and subscribers per employee reached 6,388 (+2.4% vs. 9M16) in the Núcleo Mobile Services segment.

Interconnection costs and other telecommunication charges

Interconnection costs and other telecommunication charges (including charges for TLRD, Roaming, Interconnection costs, cost of international outbound calls and lease of circuits) amounted to \$2,295 (+\$341 or +17.5% vs. 9M16). The increase was mainly due to higher TLRD partially offset by a decrease in roaming costs.

Fees for services, maintenance, materials and supplies

Fees for services, maintenance, materials and supplies amounted to \$4,756, +\$1,176 or +32.8% vs. 9M16. The increase was mainly due to higher maintenance costs of radio bases in the mobile services segments, as a result of the variation in the \$/US\$ exchange rate, an increase in technical assistance cost of radio bases, higher system licenses costs, higher costs of sites location and higher storage costs. There were also increases in other maintenance costs and fees for services, mainly due to higher costs recognized to suppliers in all segments.

Taxes and fees with the Regulatory Authority

Taxes and fees with the Regulatory Authority (including turnover tax, fees with the Regulatory Authority, IDC, municipal and other taxes) amounted to \$4,416 (+16.2% vs. 9M16), influenced mainly by the

Table of Contents

TELECOM ARGENTINA S.A.

increase in revenues of fixed and mobile services and by the increase of the IDC related to higher collections and payments to suppliers, partially offset by lower fees with the regulatory authority.

Commissions

Commissions (including Agent, distribution of prepaid cards and other commissions) amounted to \$3,416 (-\$425 or -11.1% vs. 9M16). The decrease was mainly due to the decrease in Agents' commissions as well as a decrease in collection commissions, CPP commissions and others.

On the other hand, agent commissions capitalized as SAC amounted to \$731, -\$315 or -30.1% vs. 9M16.

Cost of equipment and handsets

Cost of equipment and handsets amounted to \$4,696 (-\$29 or -0.6% vs. 9M16) mainly due to the decrease in the units of handsets sold in the Núcleo Mobile Services segment, partially offset by the increase in the Personal Mobile Services segment, as a consequence of the increase in the average unit cost of sales (+21% vs. 9M16) partially offset by a decrease in handsets sold (-15% vs. 9M16).

On the other hand, SAC deferred costs from handsets sold amounted to \$58, -\$36 or -38.3% vs. 9M16.

Advertising

Advertising amounted to \$769 (+\$221 vs. 9M16). This increase was due to the new advertising campaigns launched by Telecom Group during 2017, especially media advertising.

Cost of VAS

Edgar Filing: TELECOM ARGENTINA SA - Form 6-K

Cost of VAS amounted to \$690 (-\$452 or -39.6% vs. 9M16). The decrease was mainly due to the decrease in the amount of VAS sales in the Personal Mobile Services segment, as a consequence of the content suppliers deputation carried out within the content business general reorganization realized by Personal in 2016.

Provisions

Provisions amounted to \$357, +\$251 vs. 9M16, mainly due to higher labor claims (+\$140 vs. 9M16) and higher civil and commercial claims (+\$107 vs. 9M16).

Bad debt expenses

Bad debt expenses amounted to \$920 (+\$76 or +9.0% vs. 9M16), representing approximately 1.9% and 2.2% of the consolidated revenues in 9M17 and 9M16, respectively. The main increase is observed in the Fixed Services segment amounting to \$53 as a consequence of higher aging of the accounts receivables provisioned in accordance to the accounting policies of the Group.

Other operating costs

Other operating costs amounted to \$2,394 (+\$362 or +17.8% vs. 9M16). The increase was mainly due to higher prices on related services recognized to suppliers in the operations in Argentina and the increase of rent prices (+\$207 or +37.0% vs. 9M16), as a result of new agreements and the renegotiation of some of the existing ones.

- **Operating income before depreciation and amortization**

Operating income before depreciation and amortization amounted to \$14,246 (+\$4,036 or +39.5% vs. 9M16), representing 30.1% of consolidated revenues in 9M17 (vs. 26.3% in 9M16). This growth was mainly fueled by the Fixed Services segment (+\$824 or +37.4% vs. 9M16) and the Mobile Services segments (+\$3,212 or +40.1% vs. 9M16).

Operating income before depreciation and amortization generated by equipment and handset sales (including SAC capitalization) amounted to \$979 in 9M17 vs. \$1,313 in 9M16 (-\$334 or -25.4% vs. 9M16), while operating income before depreciation and amortization generated by services sales amounted to \$13,267 in 9M17 vs. \$8,897 in 9M16 (+\$4,370 or +49.1% vs. 9M16).

IV

Table of Contents

TELECOM ARGENTINA S.A.

The increase in depreciation and amortization includes \$615 from PP&E depreciation and \$73 from amortization of SAC and service connection costs, partially offset by a decrease of \$40 from amortization of other intangible assets without SAC. The increase in depreciation and amortization corresponds 39% to the Fixed Services segment and 61% to the Mobile Services segments.

Disposal and impairment of PP&E

This growth was mainly fueled by the Personal Mobile Services segment (+\$2,844 or +62.0% vs. 9M16) and the Fixed Services segment (+\$537 or +64.8% vs. 9M16).

- **Financial results, net**

Net financial results resulted in a net loss of \$276, representing a lower loss of \$1,406 vs. 9M16. The lower loss was mainly due to lower foreign currency exchange losses (+\$193 vs. 9M16), higher interests on receivables (+\$294 vs. 9M16), higher investments results (+\$454 vs. 9M16) and lower interests on loans (+\$541 vs. 9M16).

- **Net income**

Telecom Argentina reached a net income of \$5,695 in 9M17, +\$3,200 or +128.3% as compared to 9M16, representing 12.0% of the consolidated revenues in 9M17 (vs. 6.4% in 9M16). Net income attributable to Telecom Argentina amounted to \$5,641 in 9M17, +\$3,170 or +128.3% as compared to 9M16.

- **Net financial position**

This variation was mainly due to an increase in the generation of cash from operating activities of the Telecom Group. As of September 30, 2017, the Fixed Services segment has a net financial asset of \$66, the Personal Mobile Services segment has a net financial asset of \$661 and the Núcleo Mobile Services segment has a net financial debt of \$224.

8. Outlook

Fiscal year 2017 is developing in a more favorable macroeconomic context than previous years. We expect moderate economic growth rates for 2017 amounting to approximately 3% (GDP in real terms), with inflation rates that should be close to 22% per year. Also, we are confident that the demand of our products and services will remain at good levels, especially those related to Internet use, and in particular of those related to innovative offers associated with convergence at home, which the Company will continue launching in order to provide to most of our customers with the benefits of hiring our services in their home, company or by enjoying the wide access levels of Personal services. We will continue working to enrich our offer with products and services to encourage the increase of our ARPU in all business segments, with pricing policies segmented to the possibilities of each type of customer, without neglecting global profitability of our business.

Analyzing the evolution of our business service by service, we expect that fixed telephony evolution will continue in line with recent year's global trend, influenced by market maturity. Relating to the fixed access Internet service, in order to continue with home Internet improving, Ultra Broad Band (high bandwidth or UBB) will continue to be developed through technologies based on fiber optic in different network points, what will allow our customers in the near future to access to speeds over 100 Mgs.

Edgar Filing: TELECOM ARGENTINA SA - Form 6-K

Personal will continue working focusing on service quality and the nationwide deployment of the 4G LTE network, improving coverage and network speed. Mobile Broadband services will also be expanded with new frequencies and more investments, continuing with technological reconversion and the expansion of the network capacity, obtaining LTE capacity in over than 80% of our sites.

For the high value mobile segment, we continue improving the user experience, working in simplifying customers management and attention, through more flexible and differential processes.

For prepaid subscribers, we will continue working on a social network-oriented offer, coupled with real-time campaigns that promote prepaid subscribers base and improve ARPU of such subscribers.

Also, convergent offers will continue to be developed by providing our customers with Internet services, fixed and mobile calls, with differential benefits for a joint services subscription. According to this, the convergent operator status and the market positioning in each country region will be enhanced.

For the corporate segment, efforts will continue to focus on the provision of converged solutions, with a portfolio that will provide customers with next-generation Datacenter services as well as value-added services associated with cloud computing and security solutions.

As disclosed in the consolidated financial statements, it is expected that the Regulatory Authority provides soon the necessary authorizations to implement the corporate integration of Telecom Argentina, and thereby facilitate the services convergence and the improvement of the relating commercial processes.

We will continue working on our goal of promoting operational excellence, looking for a better use of the Company's physical, human and technological resources, so as to continue meeting the profitability expectations of our investors. In order to achieve this goal, we have developed an ambitious multi-year business plan that foresees the implementation of an investment plan in last generation fixed and mobile network targeted to a convergent ICT market.

Finally, on August 31, 2017 the Shareholders Meeting of Telecom Argentina and Cablevisión S.A. have approved the Preliminary Merger Agreement subscribed on June 30, 2017 to merge their corporate and operational structures in order to become a convergent telecommunication supplier and participate in the sector opening, provided by the Argentine regulation for January 2018. In line with these actions, on October 31, 2017 the Chairmen of both companies signed the Final Merger Agreement, ad referendum of the ENACOM authorizations that may correspond under Decree No. 267/15.

The proposed transaction is part of a convergence global process in the provision of fixed and mobile telecommunications services, video and Internet distribution known as *cuádruple play*. This operation will allow the merged company to become a leader in convergent solutions to fulfill the digital people life and to facilitate the digital companies operations. The combination of the two companies will boost investment in the latest infrastructure of mobile technologies as well as the deployment of a high-speed fiber optic network.

The strategy implemented by the Company's Management outlines the necessary basis for the Telecom Group to pursue its continuous goals of improving service quality, strengthening its market positioning and adequately reward the invested capital of those who finance our businesses. Our strategy and the important plan of investments in capital assets are based on this vision of future and on the commitment of the Telecom Group with our country and its people.

Table of Contents**NOTE 1 BASIS OF PREPARATION OF THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS AND SIGNIFICANT ACCOUNTING POLICIES****a) Basis of preparation and significant accounting policies**

As required by the CNV for most of public companies, these consolidated financial statements have been prepared in accordance with RT 26 of FACPCE (as amended by RT 29 and RT 43) and in accordance with IFRS as issued by the IASB, as adopted by the CPCECABA.

For the preparation of these consolidated financial statements, the Company has elected to make use of the option provided by IAS 34, so, these consolidated financial statements do not include all the information required in an annual financial statement, and must be read jointly with the 2016 annual consolidated financial statements which can be consulted at the Company's website (www.telecom.com.ar/inversores).

As of September 30, 2017, entities included in the consolidation process and the respective equity interest owned by Telecom Argentina is presented as follows:

(iii) Non-controlling interest of 32.50% is owned by the Paraguayan company ABC Telecomunicaciones S.A.

(iv) Non-controlling interest of 22.75% is owned by the Paraguayan company ABC Telecomunicaciones S.A. and non-controlling interest of 30.00% is owned by TU VES S.A. Chile (See Note 12.j).

For the preparation of these consolidated financial statements, the Company followed the same accounting policies applied in the most recent annual consolidated financial statements, except for:

(i) the accounting of the acquisition of the whole remaining shares of its subsidiary Telecom Personal (0.008%, see Note 12.c). By means of this transaction, the minority interest was adjusted in \$1 and the difference between the purchase value (amounting to \$4) and the minority interest was recorded into the account Cost of equity interest increase in controlled companies within the Consolidated Statement of Changes in Equity Controlling Company as of September 30, 2017 in accordance with the provisions of IFRS 10.

(ii) the accounting of the controlling interest acquisition of Tuves Paraguay, as of June 30, 2017. For this controlling interest acquisition, the provisions of IFRS 3 Business Combination have been followed (See Note 12.j).

These unaudited condensed interim financial statements for the nine-month period ended September 30, 2017 have not been audited. The Company's management estimates they include all the necessary adjustments to present fairly the results of operations for each period. The results for the nine-month period ended September 30, 2017, does not necessarily reflect in proportion the Company's results for the complete year.

The preparation of these consolidated financial statements in conformity with IFRS requires the Company's Management to use certain critical accounting estimates. Actual results could differ from those estimates.

These consolidated financial statements (except for cash flow information) are prepared on an accrual basis of accounting. Under this basis, the effects of transactions and other events are recognized when they occur. Therefore income and expenses are recognized at fair value on an accrual basis regardless of when they are perceived or paid. When significant, the difference between the fair value and the nominal amount of income and expenses is recognized as finance income or expense using the effective interest method over the relevant period.

These consolidated financial statements have also been prepared on a going concern basis, as there is a reasonable expectation that Telecom Argentina and its subsidiaries will continue its operational activities in the foreseeable future (and in any event with a time horizon of more than twelve months).

Publication of these consolidated financial statements for the period ended September 30, 2017 was approved by resolution of the Board of Directors' meeting held on November 10, 2017.

Table of Contents

b) Financial statement formats

The financial statement formats adopted are consistent with IAS 1, In particular:

- the consolidated statements of financial position have been prepared by classifying assets and liabilities according to current and non-current criterion. Current assets and liabilities are those that are expected to be realized within twelve months after the period-end;
- the consolidated income statements have been prepared by classifying operating expenses by nature of expense as this form of presentation is considered more appropriate and representative of the specific business of the Telecom Group as evaluated by the Management, and are in line with the industrial sector of telecommunications;
- the consolidated statements of comprehensive income include the profit or (loss) for the period as shown in the consolidated income statement and all components of other comprehensive income;
- the consolidated statements of changes in equity have been prepared showing separately (i) profit (loss) for the period, (ii) other comprehensive income (loss) for the period, and (iii) transactions with shareholders (controlling and non-controlling);
- the consolidated statements of cash flows have been prepared by presenting cash flows from operating activities according to the indirect method, as permitted by IAS 7.

These consolidated financial statements contain all material disclosures required under IAS 34. Some additional disclosures required by the LGS and/or by the CNV have been also included, among them, complementary information required in the last paragraph of Article 1 Chapter III Title IV of the CNV General Resolution No. 622/13. Such information is disclosed in Notes 2 and 6 to these consolidated financial statements, as admitted by IFRS.

In addition, certain non-material reclassifications have been included in the comparative figures for the nine-month period ended September 30, 2016 of the consolidated income statements under Other Income and Disposal and impairment of PP&E with the purpose of improving the comparability of information with that elaborated for the nine-month period ended September 30, 2017.

c) Segment reporting

An operating segment is defined as a component of an entity that engages in business activities from which it may earn revenues and incur expenses, and whose financial information is available, held separately, and evaluated regularly by the Telecom Group's Chief Executive Officer (CEO).

Operating segments are reported in a consistent manner with the internal reporting provided to the CEO, who is responsible for allocating resources and assessing performance of the operating segments at the net income (loss) level and under the accounting principles effective (IFRS as issued by the IASB) at each time for reporting to the Regulatory Bodies. The accounting policies applied for segment information are the same for all operating segments.

Information regarding segment reporting is included in Note 4.

d) Net income per share

The Company computes net income per common share by dividing net income for the period attributable to Telecom Argentina (Controlling Company) by the weighted average number of common shares outstanding during the period. Diluted net income per share is computed by dividing the net income for the period by the weighted average number of common and dilutive potential common shares then outstanding during the period. Since the Company has no dilutive potential common stock outstanding, there are no dilutive earnings per share amounts.

For the nine and three month periods ended September 30, 2017 and 2016, the weighted average number of shares outstanding totaled 969,159,605 shares, respectively, due to the changes caused by the Treasury Shares Acquisition Process that began in May 2013, as described in Note 7.b) to these consolidated financial statements.

e) Application of IAS 29 (Financial reporting in hyperinflationary economies)

IAS 29 establishes the conditions under which an entity shall restate its financial statements if it is located in an economic environment considered hyperinflationary. It should be mentioned that if the qualitative and / or quantitative characteristics to consider an economy as a hyperinflationary economy set out in paragraph 3 of IAS 29 occur, the restatement of financial statements must be made retroactively from the date of the revaluation used as deemed cost (in the case of Group companies located in Argentina, since February 2003) or from the acquisition date for assets acquired after that date.

The Company's Management periodically verifies the evolution of official statistics as well as the general factors of the economic environment in the countries in which the Telecom Group operates. The

Table of Contents

Company's Management also considers the opinion of other organizations interested in this matter: the national and international accounting profession, domestic and foreign audit firms, national and the United States' capital market regulators, and, in particular, the International Practices Task Force (IPTF), aware that the conclusions to which a financial statement issuer arrives must be consistent with the vision of those organizations for an uniform application of IAS 29.

Although the standard does not establish an absolute rate at which hyperinflation is deemed to arise, usually and in accordance with the guideline of IAS 29- a cumulative inflation rate over three years approaching or exceeding 100% is used as reference considering additionally other qualitative factors related to the macroeconomic environment.

The Company analyzes the economic environment as required by the provisions of IAS 29, based on the inflation rates published by the National Institute of Statistics and Census (INDEC), following the same criteria adopted by the accounting profession in the Argentine Republic.

After declaring a state of statistical emergency in January 2016 and due to the reorganization of the INDEC structure, that agency was impelled to publish the Internal Wholesale Price Index for November and December 2015 and the Consumer Price Index for the period November 2015- April 2016. Under these circumstances, the INDEC suggested the alternative utilization of Price Indexes published by the Province of San Luis and the City of Buenos Aires, which are integral part of the National Statistic System until the INDEC publishes Price Indexes in compliance with international standards of quality. Finally, in May 2016 the INDEC published the Internal Wholesale Price Index (IPIM) retroactively from January 2016 while the Consumer Price Index (IPC) was published from May 2016. It is worth mentioning that, as of the date of issuance of these consolidated financial statements, the INDEC has not completed the IPIM and IPC's statistical series, despite the requirements of domestic accounting profession organizations.

Therefore, for years 2015 and 2016 the Company analysis was performed according to Consumer Price Index and Internal Wholesale Price Index published by the INDEC until October 2015 and it was complemented applying November and December 2015 Price Index published by the Province of San Luis and the City of Buenos Aires, as the INDEC suggested. Also, the company applied Price Index of the period January-April 2016 published by the Province of San Luis and the City of Buenos Aires for the calculation of the Consumer Price Index for the year 2016. It is worth mentioning that these simplified procedures as provided in paragraph 17 of IAS 29 were performed due to the unavailability of official statistics at national level.

The tables below show the evolution of these indexes in the last three years according to official statistics (INDEC), with the exceptions explained above regarding the use of alternative indexes for November and December 2015 for Consumer Price and Internal Wholesale Price and, additionally, the Consumer Price Index for the period January-April 2016:

	<u>2014</u>	<u>2015</u>	<u>2016</u>
<u>Consumer Price Index</u>		(*)	(**)
Consumer Price Index (annual)	23.9%	20.6%	36.3%
Consumer Price Index (3 years accumulated)	52.4%	65.8%	103.7%
<u>Internal Wholesale Price Index</u>			
Internal Wholesale Price Index (annual)	28.3%	19.2%	34.6%
Internal Wholesale Price Index (3 years accumulated)	66.5%	75.4%	105.8%

(*) Consumer Price Index and Internal Wholesale Price Index published by INDEC until October 2015 were 11.9% and 10.6% respectively. These rates (which contain ten months accumulated), were updated with November and December 2015 Consumer Price Index average rates for this two months (7.8%) published by the Province of San Luis and the City of Buenos Aires.

(**) Due to the unavailability of Consumer Price Index published by the INDEC, the Company estimated 16.6% for the period January-April 2016; this estimation is an average of the indexes published by the Province of San Luis and the City of Buenos Aires for that period. The Consumer Price Index at national level published by the INDEC for the period May-December 2016 was 16.9%.

The Annual Price Index for the last year (Consumer Price Index: 36.3%, Internal Wholesale Price: 34.6%) and three years accumulated (Consumer Price Index: 103.7%, Internal Wholesale Price: 105.8%) show high levels of inflation rates that, for the first time, exceed 100% accumulated and highlight, between other matters, the effect in the internal prices of the Argentine peso devaluation since December 2015, the elimination of certain exchange restrictions, and the increase in the public services tariffs approved by the Government after been frozen for more than a decade.

According to the high inflation levels in Argentina registered in the last years, the Company's Management has further assessed the characteristics set out in paragraph 3 of IAS 29, including (i) the quantitative condition provided in section (e) *the cumulative inflation rate over three years is approaching, or exceeds, 100%*, as well as (ii) the qualitative characteristics contained in paragraphs a) to d) of that paragraph.

Table of Contents

From the analysis assessed as of December 31, 2016, the Company's Management considered that the quantitative condition provided in section e) of IAS 29 has been met, while the qualitative conditions of the Argentine economy are mixed (some of them would recommend the existence of a high inflation environment and others have not substantially changed respect to previous years, when it was concluded that financial statements should not be restated). Under these circumstances, and in order to objectify the analysis, the Company's Management gave priority to the conclusions reached by some international auditing firms to which the Company's Management had access, which considered that, to such date, there was insufficient evidence to consider the Argentine economy as hyperinflationary under IAS 29 terms. Similar conclusions for US GAAP were reached by the IPTF, according to its memo issued on November 17, 2016.

An extract of the mentioned memo stated in point III.A.3(a) related to countries with projected inflation rates above 100% (accumulated over the last three years): *The Task Force is aware that in late December 2016, certain US accounting firms submitted a white paper to the SEC staff from the Office of the Chief Accountant that asserted that the firms would not require a registrant to consider Argentina's economy as highly inflationary under US GAAP for the reporting period from October 1, 2016 to December 31, 2016. The SEC staff from the Office of the Chief Accountant, after reviewing the white paper submitted by the firms, stated that the staff would not object to a calendar year-end registrant's determination that Argentina's economy would not be considered highly inflationary under US GAAP for the reporting period from October 1, 2016 to December 31, 2016.* In addition, the Task Force suggests registrants to continue monitoring inflation information and other Argentine economy conditions in order to assess whether it is necessary to consider it as highly inflationary during 2017.

While there are differences in the definition of a hyperinflationary and highly inflationary environments between IFRS and US GAAP, respectively, the Company believed that the assessment of the macroeconomic situation of a country should be substantially similar under both accounting frameworks and, on this condition, considered consistent the conclusions arrived by the IPTF with those provided in the analysis assessed by international audit firms according to IFRS and US GAAP.

Additionally, while the CNV required public companies the full implementation of IFRS-as issued by the IASB- from periods beginning on January 1, 2012, Decree No.664/03 continues to be in force as of the date of issuance of these consolidated financial statements. Through this Decree, the PEN instructed the control authorities including the CNV- not to accept filings of restated financial statements. This legal restriction is foreseen in the current Regulations of the CNV (Title IV - Chapter III Article 3 - paragraph 1

Developments of the nine-month period of 2017

The publication of the INDEC inflation index for the current year has shown a decrease in inflation levels during the first nine months of 2017 as compared to 2016 (the cumulative coefficient of the CPI in the first nine months of 2017 amounts to 17.5% and IPIM to 13.5%, while the accumulated CPI coefficient for the last 36 months amounts to approximately 99.6% and the IPIM rate is approximately 87.9%). Based on the deceleration in inflation rates during the first nine months of 2017 and in the analysis performed as of December 31, 2016 described above, the Company's Management has concluded that no new evidence has been verified during the current period which leads to qualify the economy as highly inflationary.

Similar conclusions for US GAAP were reached by the IPTF, according to its memo issued on May 16, 2017.

An extract of the mentioned memo stated that: *Considering the guidance in ASC 830, it does not appear that Argentina would be required to be considered highly-inflationary for the reporting periods from January 1, 2017 to June 30, 2017 for calendar year-end registrants. Registrants would be expected to have appropriate controls in place to monitor Argentina's reported inflation data throughout 2017 and consider other pertinent economic indicators to determine if and when Argentina should be considered highly-inflationary.*

For these reasons, these financial statements have not been adjusted for inflation in accordance with IAS 29. Although the above described, the Company's Management will continue monitoring the characteristics and the evolution of the inflation rates in Argentina in order to comply properly with IAS 29 provisions, with special consideration of the pronouncements of Argentine regulators which as of the date are forbidden to accept the filing of financial statements restated for inflation according to Decree No. 664/03 and its supplementary standards. The Company's Management will also monitor the pronouncements of foreign regulators, as well as the evaluation that the domestic and international accounting profession will perform with regards to the uniform application of IAS 29 together with other issuers that apply IFRS in the Argentine Republic.

(b) Acquisition of Treasury Shares

The Company's Ordinary Shareholders' Meeting held on April 23, 2013, which was adjourned until May 21, 2013, approved at its second session of deliberations, the creation of a Voluntary Reserve for Capital Investments of \$1,200, granting powers to the Company's Board of Directors to decide its total or partial application, and to approve the methodology, terms and conditions of such investments.

In connection with the foregoing, on May 22, 2013, Telecom Argentina's Board of Directors approved a Treasury Shares Acquisition Program of Telecom Argentina in the market in Argentine pesos (the Treasury Shares Acquisition Program) for the purpose of avoiding any possible damages to Telecom Argentina and its shareholders derived from fluctuations and unbalances between the shares' price and Telecom Argentina's solvency, for the following maximum amount and with the following deadline:

- Maximum amount to be invested: \$1,200.
- Deadline for the acquisitions: until April 30, 2014.

According to the offer made on November 7, 2013 by Fintech Telecom LLC for the acquisition of the controlling interest of the Telecom Italia Group in Telecom Argentina, Telecom Argentina suspended the acquisition of treasury shares and its Board of Directors considered appropriate to request the opinion of the CNV on the applicability of the new provisions contained in the rules issued by that entity (Title II, Chapter I, Section 13 and concurring) with respect to the continuation of the Treasury Shares Acquisition Program.

The CNV did not answer the Company's request and the Telecom Argentina's Board of Directors, at its meeting held on May 8, 2014, decided to conclude the request considering that the Treasury Shares Acquisition Program finished on April 30, 2014, which had been approved by Telecom Argentina's Board of Directors Meeting held on May 22, 2013.

Telecom Argentina's Board of Directors, at its meeting held on June 27, 2014, decided to request a new opinion from the CNV to confirm whether Telecom Argentina is obliged to refrain from acquiring treasury shares in the market under Section 13, Chapter I, Title II of the CNV rules (NT 2013).

As a result of the amortization, Sofora agreed to pay WAI an amount equal to the par value of WAI's shares of capital stock issued by Sofora, such amount being equivalent to \$140,704,640, and issue in the name of WAI one or more dividend certificates (Class A Bono de Goce) evidencing WAI's rights to dividends up to an aggregate amount of US\$ 470 million minus the amounts paid to amortize the shares of Sofora owned by WAI (equivalent to US\$ 8,683,596).

On May 23, 2017 the first tranche of the ordinary shares of Sofora owned by WAI (74,749,340 ordinary shares), representing 17% of Sofora's capital stock was amortized. As a result of the mentioned amortization:

The Merger Effective Date will be since 0:00 hours of the date in which the Chairmen of the Board of Directors of Telecom Argentina y Cablevisión S.A. subscribe an operations translation minute stating that: (i) Telecom Argentina has adapted its operational- technical systems to assume the operations and activities of Cablevisión S.A., and (ii) that on such Merger Effective Date the translation of the activities and operations of Cablevisión S.A. to Telecom Argentina was finalized as the following conditions to which the Merger was subject were accomplished:

Table of Contents

As a result of the merger, Telecom Argentina will increase its capital stock in the amount of \$1,184,528,406 and will issue as consideration 1,184,528,406 ordinary book-entry shares of its common stock, with nominal value of \$1 and entitled to one vote per share, to be delivered to Cablevisión S.A.'s shareholders instead of the shares they hold of such Company. These delivered shares will be Telecom Argentina's Class A or Class D shares, as appropriate, according to the established Distribution Ratio, or according to the new shares resulting from the Distribution Ratio adjustments that would be later realized according to the preliminary merger agreement.

Also, on June 30, 2017, the Telecom Argentina's and Cablevisión S.A.'s Board of Directors approved to call for an Ordinary and Extraordinary Shareholders Meeting of Telecom Argentina and Extraordinary Shareholders Meeting of Cablevisión S.A., respectively, which both were held on August 31, 2017 and approved the preliminary merger agreement and, relating Cablevisión S.A., its dissolution as of the Merger Effective Date and, relating Telecom Argentina, the Bylaws amendment and the increase of its capital stock.

In relation to the mentioned merger, on July 7, 2017 Cablevisión Holding S.A., VLG Argentina LLC, Fintech Media LLC, Fintech Advisory Inc., GC Dominio S.A. (all direct and indirect shareholders of Cablevisión S.A.) and Fintech (parent company of Telecom Argentina) approved a shareholders agreement that will rule the future exercise of their rights as shareholders of Telecom Argentina S.A. (the Agreement) once the merger is concluded. According to such Agreement, the parties had provided:

- the representation in the corporate bodies, stating that, subject to the compliance of certain conditions provided and as long as Cablevisión Holding S.A. satisfies certain minimum ownership requirements in the merged company, Cablevisión Holding S.A. will be able to appoint a majority of the members of the Board of Directors, Executive Committee, Audit Committee, Supervisory Committee and the CEO and the main managers who report to the CEO, except for the CFO and the Internal Audit. Also, the Chairman of the Board of Directors will be appointed by Cablevisión Holding S.A., whereas the vicepresident will be appointed by Fintech;

The call option can be executed during one year since July 7, 2017.

On September 6, 2017 Telecom Argentina S.A. and Cablevisión S.A. entered a presentation before the ENACOM requesting authorization for:

- (i) The transfer and incorporation of the Licencia Unica Argentina Digital (Digital Argentina Sole License) owned by Telecom Argentina S.A., of the records, resources, assignments, and ratings owned by Cablevisión S.A.

- (ii) The transfer in favor of Telecom Argentina S.A. of the authorizations of usage and the resources assigned for the provision of the services registered under the ownership of Cablevisión S.A. and / or the companies absorbed by the latter.

- (iii) The change of corporate control that will take place in Telecom Argentina S.A. once the aforementioned ENACOM authorization has been obtained, the Merger becomes effective and the shareholder agreement of July 7, 2017 becomes effective, as a result of which Cablevisión Holding S.A. will be the controlling company of Telecom Argentina S.A. as the surviving company of Cablevisión S.A.

The Merger will be accounted for using the acquisition method, as outlined by IFRS 3. IFRS 3 requires, in a business combination effected through an exchange of equity interests, all relevant facts and circumstances to be considered when identifying the acquirer. Based on the terms of the preliminary

Table of Contents

merger agreement, Cablevisión S.A. (the legally absorbed entity) is to be considered the accounting acquirer and Telecom Argentina (the surviving entity) is to be considered the accounting acquiree, which qualifies the transaction as a reverse acquisition in accordance with IFRS. The factors that were relied upon to determine that Cablevisión S.A. should be treated as the accounting acquirer in the Merger were:

- 1) the relative voting rights in the surviving entity (55% for the current shareholders of Cablevisión S.A. and 45% for the current shareholders of Telecom Argentina);
- 2) the composition of the board of directors in the surviving entity and other committees (Audit, Supervisory and Executive),
- 3) the relative fair value assigned to Telecom Argentina and Cablevisión S.A. and
- 4) the composition of the key management of the surviving entity.

Accordingly, the assets and liabilities of Cablevisión S.A. will be recognized and measured in the consolidated financial statements at their pre-Merger carrying amounts, while the identifiable assets and liabilities of Telecom Argentina S.A. will be recognized at fair value as of the Merger Effective Date. Goodwill resulting from the application of the acquisition method will be measured as the excess of the fair value of the consideration paid over the net fair value of Telecom Argentina's identifiable assets and liabilities. The retained earnings and other equity balances recognized in the consolidated financial statements of the combined entity are those of Telecom Argentina S.A. and Cablevisión S.A. immediately before the Merger.

NOTE 12 RECENT DEVELOPMENTS CORRESPONDING TO THE NINE-MONTH PERIOD ENDED SEPTEMBER 30, 2017 FOR THE TELECOM GROUP

a) *Pre-cancellation of Personal's bank loan*

On January 28, 2015, Personal had signed a loan agreement with a foreign bank for US\$ 40.8 million (equivalent to \$353 as of such date). The capital was fully cancelable in 27 months (bullet) with quarterly interest payments.

On February 7, 2017, with the maturity of the interest service, Personal proceeded to fully prepay the loan, paying US\$ 40.8 million of capital (equivalent to \$606), US\$ 1 million of interest (equivalent to \$16) and US\$ 0.3 million of pre-cancellation fee (equivalent to \$5).

b) *NDF to hedge interest rate fluctuations*

Edgar Filing: TELECOM ARGENTINA SA - Form 6-K

During 1Q17, Personal entered into several hedging agreements (NDF) to cover fluctuations in the LIBO rate of the loan with the International Financing Corporation (IFC) in an amount of US\$ 400 million. These NDF allow fixing the variable rate for the full loan term, ranging from 2.087% to 2.4525% nominal per annum (a weighted average of 2.2258% nominal per annum).

Such NDF begun on March 15, 2017 hedging US\$ 300 million and the remaining US\$ 100 million was hedge since September 15, 2017.

During 3Q17, Personal entered into several hedging agreements (NDF) to cover fluctuations in the LIBO rate of the loan with the Inter-American Investment Corporation (IIC) in an amount of US\$ 40 million. These NDF were entered in two tranches of US\$ 20 million each, both beginning on March 15, 2018, fixing the variable rate for the full loan term in 2.1325% and 2.085% nominal per annum, respectively.

c) Acquisition of Nortel s interest in Personal

On March 31, 2017, the Board of Directors of Nortel approved the sale of its interest of 120,000 shares of Personal to Telecom Argentina (representing 0.008% of Personal s capital stock) for an amount of \$4, which were fully paid in April. As a result of this transaction Telecom Argentina owns 100% of Personal.

d) Radioelectric Spectrum Fees

In October 2016 Personal modified the criteria used for the statement of some of its commercial plans (Abono fijo) for purposes of paying the radioelectric spectrum fees (*derecho de uso de espectro radioeléctrico* or DER), taking into account certain changes in such plans composition. This meant a reduction in the amount of fees paid by Personal.

In March 2017, the ENACOM demanded Personal to rectify its statements, requiring that such plans statements continue to be prepared based on the previous criteria. On August 15, 2017, Personal received a note for the differences owed, and on August 31, 2017 presented the corresponding

Table of Contents

administrative note. Personal's Management believes that it has solid legal arguments to defend its position. However, it cannot be assured that such arguments will be accepted by the ENACOM.

The difference resulting from both sets of liquidation criteria is of approximately \$26 per month since October 2016, plus interests.

e) *Claims of some Personal Content Providers*

In the framework of the general reorganization of the content business started out by Personal in 2016, and given the upcoming expiration of agreements with content providers, some of the latter have been notified that such agreements will not be renewed.

By virtue of that communication, four of those companies initiated and obtained in court precautionary measures against Personal, in order to avoid that the duly notified decision of not renewing the agreements be effective, and thus, forcing Personal to refrain from disconnecting or interrupting the contractual relationship on the scheduled dates.

On February 24, 2017, the ENACOM notified Personal the Resolution 2017-1122-APN-ENACOM # MCO (Resolution No. 1122, through which provided about content suppliers who frame as Audiotext VAS and Massive Calls suppliers), which established that Mobile Operators may receive, in every concept, a percentage that should not exceed 40% of the services invoiced on behalf and to the order of such suppliers. In addition, the Resolution provides a 30-day period to file through the ENACOM the interconnection agreements or the amendments to the existing ones, which ensure the amendments to the agreements already in force and in relation to the services rendered by the members of the Argentine Mobile Value Added Corporation (Cámara Argentina de Valor Agregado Móvil or CAVAM).

On March 22, 2017, Personal's Management, with the assistance of its legal advisors and due to its solid arguments, filed an administrative appeal against Resolution No. 1122 before the former Ministry of Communications (MINCOM - currently the Ministry of Modernization-). Likewise, Personal has exercised the necessary legal actions for the protection of its rights.

Also, Personal has renewed the commercial agreements with the majority of the contents suppliers, which are still in force.

On September 29, 2017, the ENACOM notified Personal of ENACOM Resolution No. 2,408/17, rejecting the reconsideration recourses filed by Movistar and Claro against Resolution No. 1122, and the suspension of the effects of said resolution, requested by Personal, Movistar and Claro. Likewise, by means of this act, the reconsideration recourse filed by Personal against ENACOM Note No. 29/17 (in relation to the supplier MOVICLIPS) was rejected, and the recourse filed by Personal against Resolution No. 1122 before the former MINCOM, is still pending resolution.

f) *Telecom Argentina's declaration as proper taxpayer*

Pursuant to Law No. 27,260, Argentine companies that have properly fulfilled their tax obligations during the two fiscal year periods prior to the 2016 fiscal year and comply with other requirements may qualify for an exemption from the personal assets tax for the 2016, 2017 and 2018 fiscal years. The request for this tax exemption should be filed before March 31, 2017.

Telecom Argentina has already filed this request related to the payment of the tax on personal property on behalf of Shareholders. As a consequence, Telecom Argentina recorded in 2017 the reversal of the current tax credit on personal property on behalf of Shareholders and the corresponding liability that it had recorded as of December 31, 2016 which amounted to \$8 and has discontinued recording such receivables and liabilities since January 1, 2017.

Notwithstanding, it cannot be assured that in the future, Telecom Argentina can fulfill those requirements and maintain the referred exemption.

g) Consultation documents under the General Regulation of Public Hearings and Consultation Documents for Communication Services provisions and General Regulation for the Participatory Elaboration of Standards

Telecom Argentina and Personal have timely filed through the ICT Secretary their opinions and proposals for the following consultations and documents issued during 2017:

- **Document Licenses for ICT Services Regulation** issued through SECTIC Resolution No. 1-E/17 issued on January 20, 2017;
- **Document Consultation on ICT Network Service Quality** issued through SECTIC Resolution No. 3-E/17 issued on March 13, 2017;

h) Interest rate applicable to the matters under Labor Courts of the City of Buenos Aires

On May 21, 2014 the National Labor Court of Appeals agreed, as a result of a divided vote, that the interest rate applicable to the matters under its jurisdiction in the City of Buenos Aires shall be the nominal annual rate for personal loans with free use of funds of the *Argentine National Bank* for a 49 to 60 month term (3% per month). The Court also resolved that in those cases that the Court sentences are still pending, this new rate shall be applied as from the date on which each amount is due.

As from 2002 the above mentioned Court had resolved to apply the interest rate resulting from the monthly average of the interest rate used by the National Bank of Argentina for the granting of loans (1.972% per month). Therefore, this disposition represented an increase in the interest rate, which the Company has reflected in its assessment of the provisions for pending labor claims since May 2014.

This prospective criterion was sustained until the date of issuance of the consolidated financial statements as of December 31, 2016, since Telecom Group's Management, with the assistance of its legal counsel, considered that there were strong legal arguments to challenge the retroactive application of the new rate.

However, later, the labor courts have applied the new rate criterion retroactively as from the date that each amount is considered due. The Telecom Group has appealed these decisions but the National Labor Court of Appeals validated the criterion mentioned in recent cases and extraordinary appeals have been dismissed before the Supreme Court. For this reason, during 2017, the Telecom Group has recorded additional provisions that it considers sufficient to cover the impacts that these rulings could have.

ENACOM Resolution No. 3,687-E/17, published in the Official Bulletin on May 12, 2017, provided the call for the on-demand frequency allocation of the 2,500 to 2,690 MHz radio spectrum, stating the procedure, obligations and compensations to be fulfilled by the Mobile Communications Service providers who qualify to participate, in accordance with the provisions of Section 4 of Decree No. 1,340/17.

On June 2, 2017, ENACOM announced four bidders in the opening auction session: (Telefónica Móviles Argentina S.A. (TMA), AMX Argentina S.A. (AMX), Personal and Telecentro S.A. (Telecentro). Attending to the observations made by the bidders, it was decided to adjourn the session so that, within 10 days, the ENACOM could treat the mentioned observations, setting June 16, 2017 as the new date for the auction session reopening.

ENACOM Resolution No. 4,767 E/17 issued on June 12, 2017, provided that Telecentro did not meet the requirements to be considered a qualified bidder, in accordance with the provisions of Section 2 of ENACOM Resolution No. 3,687 E/17, as it is not a current provider of mobile communications services, according to the provisions of Section 3 of Decree No. 798/16. On June 16, 2017 the auction session reopening was performed, with the participation of TMA, AMX and Personal, resulting TMA applying for Lot A, AMX applying for Lot B, and Personal applying for Lot C, thus resolving the observations made by the bidders at the opening auction session held on June 2, 2017.

Resolution No. 5,478-E/17) as requested by each provider. The spectrum allocation will last 15 years since CABA plus other thirteen areas are free of interference over a total of 18 provincial capitals plus Rosario, Mar del Plata and Bahia Blanca and will demand payment of up to approximately U\$S 55.9 million (subject to certain compensation clauses for early or late releases) to be paid by localities released from interference on every January of the following year of the year of the effective release. The conditions for the spectrum allocation include certain obligations regarding the service launch by localities, penalty clauses for non-compliance with the deadlines established by localities (which would involve the frequency return plus a fine equivalent to 15% of the spectrum value of the locality involved) and certain guarantees required, among them, the deployment.
