Universal Security Instruments, Inc. To Resume Shipping GFCI Units  
Product Supplier Secures New Underwriters Laboratories (UL) Listing

Owings Mills, MD - February 24, 2003 - Universal Security Instruments, Inc. (AMEX: UUU) today announced it expects to resume shipments of ground fault circuit interrupter (GFCI) units in April 2004.

As previously announced, Underwriters Laboratories (UL) had identified potential problems with GFCI units which were manufactured for the Company by Shanghai Meihao Electric, Inc. The Company also reported that the U.S. Consumer Product Safety Commission (CPSC) reviewed UL's concerns and test results of the GFCI units and closed its inquiry into the Company's GFCI units without recommending a recall. The Company voluntarily stopped sales in August following the concerns announced by UL. As reported earlier, the Company's results of operations for the period ended December 31, 2003 reflect the voluntary hold on GFCI sales.

Edgar Filing: UNIVERSAL SECURITY INSTRUMENTS INC - Form 8-K

UL has advised that it is satisfied that the previously identified potential problems are resolved and has now approved Shanghai Meihao GFCI units for listing and sale. Universal expects to resume GFCI sales during April/May 2004.

Steve Knepper, chairman of the board and chief executive officer of Universal Security Instruments, said "Universal is pleased to be able to resume sales of GFCI units to give our customers a high quality, lower cost alternative."

UNIVERSAL SECURITY INSTRUMENTS, INC. ([www.universalsecurity.com](http://www.universalsecurity.com)), founded in 1969, is a worldwide marketer of safety and security products directly and through its 50%-owned Hong Kong joint venture.

-----

Statements contained in this press release that are not historical facts are forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Although UNIVERSAL SECURITY INSTRUMENTS, INC. believes that the expectations reflected in such forward-looking statements are reasonable; the forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those projections.
