

FREESTONE RESOURCES, INC.

Form 10-Q

May 12, 2011

U.S. SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended March 31, 2011

OR

TRANSITION REPORT UNDER SECTION 13 OF 15(d) OF THE EXCHANGE ACT OF 1934

Commission File Number 000-28753

FREESTONE RESOURCES, INC.

(Exact name of small business issuer as specified in its charter)

Nevada
(State or other jurisdiction of
incorporation or organization)

33-0880427
(IRS Employer Identification No.)

Republic Center, Suite 1350
325 N. St. Paul Street Dallas, TX 75201
(Address of principal executive offices)

(214) 880-4870
(Issuer's telephone number)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such

Edgar Filing: FREESTONE RESOURCES, INC. - Form 10-Q

reports), and (2) has been subject to such filing requirements for the past 90 days: Yes No

Indicate by check mark whether the Registrant is a large accredited filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accredited filer”, “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act:

Large Accredited Filer Accelerated Filer
Non-Accredited Filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of May 11, 2011 there were 80,368,994 shares of Common Stock of the issuer outstanding.

Freestone Resources, Inc.
Notes to Consolidated Financial Statements
March 31, 2011
(Unaudited)

NOTE 1 – NATURE OF ACTIVITIES AND SIGNIFICANT ACCOUNTING POLICIES

Nature of Activities, History and Organization:

Freestone Resources, Inc. (“Freestone” or the “Company”) is an oil and gas technology development company. The Company is located in Dallas, Texas and is incorporated under the laws of the State of Nevada.

The Company’s primary business is the development of new technologies that allow for the utilization of oil and gas resources in an environmentally responsible and cost effective way, as well as the development of technologies that can be used in the environmental cleanup of oil-based contaminant byproducts.

The Company acquired one hundred percent (100%) of the issued and outstanding stock of Earth Oil Services, Inc., a Nevada corporation (“EOS”), in a stock based transaction on September 24, 2009 (the “EOS Agreement”). The Company issued 31,603,734 shares of restricted common stock of the Company in consideration for this transaction. EOS owns certain exclusive, territorial, license agreements to a proprietary technology that is a chemical solvent that can separate, extract and recycle hydrocarbon contaminants from ground soils, tar sands, vessels and other materials. EOS has engaged a fabricator to build a prototype machine (the “Prototype”) designed to be used in conjunction with the solvent. EOS is indebted to the fabricator for its development of the Prototype. EOS is now a wholly owned subsidiary of Freestone and all intercompany accounts have been eliminated in consolidation. As discussed in Note 6, the Company has filed a lawsuit seeking to rescind the EOS Agreement. This is also disclosed in the Company’s fiscal year 2010 Form 10-K, Note 16.

Unaudited Interim Financial Statements:

The accompanying unaudited interim consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission. These financial statements are unaudited and, in the opinion of management, include all adjustments (consisting of normal recurring accruals) necessary to present fairly the balance sheet, statement of operations, statement of stockholders’ equity and statement of cash flows for the periods presented in accordance with accounting principles generally accepted in the United States. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to SEC rules and regulations. It is presumed that users of this interim financial information have read or have access to the audited financial statements and footnote disclosure for the preceding fiscal year contained in the Company’s Annual Report on Form 10-K. The results of operations for the nine months ended March 31, 2011 are not necessarily indicative of the results of operations for the full year or any other interim period. The information included in this Form 10-Q should be read in conjunction with Management’s Discussion and Analysis and Financial Statements and notes thereto included in the Company’s June 30, 2010 Form 10-K.

Significant Accounting Policies:

The Company's management selects accounting principles generally accepted in the United States of America and adopts methods for their application. The application of accounting principles requires the estimating, matching and timing of revenue and expense. It is also necessary for management to determine, measure and allocate resources and obligations within the financial process according to those principles. The accounting policies used conform to generally accepted accounting principles which have been consistently applied in the preparation of these financial statements.

The financial statements and notes are representations of the Company's management which is responsible for their integrity and objectivity. Management further acknowledges that it is solely responsible for adopting sound accounting practices, establishing and maintaining a system of internal accounting control and preventing and detecting fraud. The Company's system of internal accounting control is designed to assure, among other items, that 1) recorded transactions are valid; 2) valid transactions are recorded; and 3) transactions are recorded in the proper period in a timely manner to produce financial statements which present fairly the financial condition, results of operations and cash flows of the Company for the respective periods being presented.

Basis of Presentation

The Company prepares its financial statements on the accrual basis of accounting. All intercompany balances and transactions are eliminated. Investments in subsidiaries, where the Company has a controlling interest, are consolidated. For those businesses that the Company does not have a controlling interest, they are accounted through the Noncontrolling Interest method. Management believes that all adjustments necessary for a fair presentation of the results of the nine months ended March 31, 2011 and 2010 have been made.

The Company consolidates its subsidiaries in accordance with Accounting Standards Codification ("ASC") 810, "which states, "The usual condition for a controlling financial interest is ownership of a majority voting interest, and, therefore, as a general rule ownership by one reporting entity, directly or indirectly, or over 50% of the outstanding voting shares of another entity is a condition pointing toward consolidation."

The Company owns 100% of EOS and has applied ASC 810 in consolidating the subsidiary. EOS owns 50% of BRC, as does an unrelated third party, Hidden Peak Group. Although each party owns 50%, Hidden Peak Group maintains control of the three person management board with three representatives, and therefore, applying the requirements for consolidations under ASC 810, EOS has not consolidated BRC but shows its impact through the Noncontrolling Interest method.

Reclassification:

Certain prior year amounts have been reclassified in the consolidated balance sheets, consolidated statements of operations and consolidated statements of cash flows to conform to current period presentation. These reclassifications were not material to the consolidated financial statements and had no effect on net earnings reported for any period.

Use of Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Recently Issued Accounting Pronouncements:

The Company does not expect the adoption of recently issued accounting pronouncements to have a significant impact on the Company's results of operations, financial position or cash flow.

Cash and Cash Equivalents:

Cash and cash equivalents includes cash in banks with original maturities of three months or less and are stated at cost which approximates market value, which in the opinion of management, are subject to an insignificant risk of loss in value.

Revenue Recognition:

The Company recognizes revenue from the sale of products in accordance with ASC 605-15. Revenue will be recognized only when all of the following criteria have been met:

1. Persuasive evidence of an arrangement exists;
2. Ownership and all risks of loss have been transferred to buyer, which is generally upon shipment;
3. The price is fixed and determinable; and
4. Collectability is reasonably assured.

Revenue is recorded net any of sales taxes.

Income Taxes:

The Company has adopted ASC 740-10, which requires the use of the liability method in the computation of income tax expense and the current and deferred income taxes payable.

Property and Equipment:

Property and equipment are stated at cost less accumulated depreciation. Major renewals and improvements are capitalized; minor replacements, maintenance and repairs are charged to current operations. Depreciation is computed by applying the straight-line method over the estimated useful lives which are generally five to seven years.

Earnings per Share:

Basic earnings (loss) per share are computed by dividing net income (loss) by the weighted average number of common shares outstanding for the period. Diluted earnings (loss) per share include the effects of any outstanding options, warrants and other potentially dilutive securities. For the periods presented, there were no potentially dilutive securities outstanding.

Fair Value Measurements:

ASC Topic 820, establishes a framework for measuring fair value in generally accepted accounting principles, and requires certain disclosures about fair value measurements. In general, fair value of financial instruments are based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the Corporation's credit worthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time.

Accounts Receivable:

Accounts Receivable consists of accrued oil and gas receivables due from purchasers of oil and gas for which the Company owns an interest. Oil and natural gas sales are generally unsecured and such amounts are generally due within 30 to 45 days after the month of sale. Accounts Receivable are carried at their face amount, less an allowance for doubtful accounts. On a periodic basis, the Company evaluates accounts receivable and establishes the allowance for doubtful accounts based on a combination of specific customer circumstances and credit conditions, based on a history of write offs and collections. The Company's policy is generally not to charge interest on trade receivables after the invoice becomes past due. A receivable is considered past due if payments have not been received within agreed upon invoice terms. Write offs are recorded at a time when a customer receivable is deemed uncollectible. The Company had no bad debt accruals at June 30, 2010 and 2009.

Oil and Gas Properties:

Freestone is actively purchasing marginal oil and gas properties and leasing properties that will be used in the further research and development of its various solvent additives that are specially designed to increase oil and natural gas production. This research focuses on the types of formations that will benefit the most from the use of the solvents, as well as the various applications from production and storage to end cycle refinement.

Impairment of Long-Lived Assets:

The Company evaluates, on a periodic basis, long-lived assets to be held and used for impairment in accordance with the reporting requirements of ASC 360-10, "Accounting for the Impairment or Disposal of Long-Lived Assets". The evaluation is based on certain impairment indicators, such as the nature of the assets, the future economic benefit of the assets, any historical or future profitability measurements, as well as other external market conditions or factors that may be present. If these impairment indicators are present or other factors exist that indicate that the carrying amount of the asset may not be recoverable, then an estimate of the discounted value of expected future operating cash flows is used to determine whether the asset is recoverable and the amount of any impairment is measured as the difference between the carrying amount of the asset and its estimated fair value. The fair value is estimated using valuation techniques such as market prices for similar assets or discounted future operating cash flows.

Asset Retirement Obligation:

The Company records the fair value of a liability for asset retirement obligations (“ARO”) in the period in which an obligation is incurred and records a corresponding increase in the carrying amount of the related long-lived asset. For Freestone Resources, asset retirement obligations primarily relate to the abandonment of oil and gas properties. The present value of the estimated asset retirement cost is capitalized as part of the carrying amount of oil and gas properties. The settlement date fair value is discounted at Freestone Resource’s credit adjusted risk-free rate in determining the abandonment liability. The abandonment liability is accreted with the passage of time to its expected settlement fair value. Revisions to such estimates are recorded as adjustments to ARO and capitalized asset retirement costs and are charged to operations in the period in which they become known. At the time the abandonment cost is incurred, Freestone Resources is required to recognize a gain or loss if the actual costs do not equal the estimated costs included in ARO.

The amounts recognized for ARO are based upon numerous estimates and assumptions, including future abandonment costs, future recoverable quantities of oil and gas, future inflation rates, and the credit adjusted risk free interest rate.

Stock Based Compensation

The Company does not have any stock option or employee benefit plans.

NOTE 2 – FIXED ASSETS

Fixed assets at March 31, 2011 and June 30, 2010 are as follows:

	March 31, 2011	June 30, 2010
Computers & office furniture	\$ 8,967	\$ 8,967
Oil and gas research and development equipment	26,000	26,000
Demonstration equipment	58,585	0
Total fixed assets	93,552	34,967
Less: Accumulated depreciation	(4,897)	(3,786)
Total fixed assets, net of accumulated depreciation	\$ 88,655	\$ 31,181

Depreciation expense for the quarter was \$1,111 and \$1,859 for the three months ended March 31, 2011 and 2010, respectively.

The Company issued 100,000 shares for demonstration equipment valued at \$58,585 during the fiscal second quarter of 2011.

As discussed in Note 12, the Company’s oil and gas properties used for research and development were written down to salvage value during the year ended June 30, 2009.

NOTE 3 – NOTES PAYABLE - RELATED PARTIES

On May 26, 2009 the Company received a loan from Mike Doran (“Doran”), the Company’s ex-CEO, in the amount of \$25,000. A note payable was formally prepared by the Company but never executed by Doran. The terms of the loan included an interest rate of three and a half percent, and the payment of twelve monthly installments beginning on

October 31, 2009. On July 8, 2009, an amended and restated promissory note with similar terms was executed to replace the original note payable. At March 31, 2011 and June 30, 2010 the balance owed was \$9,642 and \$12,314 respectively. The last payment on this note was due on March 31, 2010. It was not paid and the note is technically in default. The Company is still in the process of renegotiating terms related to the repayment of the remaining balance and does not believe there will be any penalties incurred.

On July 9, 2009 the Company received an advance from James Carter, a shareholder, in the amount of \$25,000. There are no terms on the advance and no interest is paid. At March 31, 2011 and June 30, 2010 the balance owed was \$15,000 and \$20,000, respectively.

NOTE 4 – INCOME TAXES

The Company has adopted ASC 740-10, which requires the use of the liability method in the computation of income tax expense and the current and deferred income taxes payable (deferred tax liability) or benefit (deferred tax asset). Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized.

During the nine months ended March 31, 2011 the Company had a net loss of \$223,838, increasing the deferred tax asset approximately \$76,105 at the statutory tax rate of 34%. Deferred tax assets at March 31, 2011 and June 30, 2010 consisted of the following:

Deferred tax asset related to:

	March 31, 2011	June 30, 2010
Prior Year	\$ 1,282,960	\$ 522,009
Tax Benefit for Current Period	76,105	760,951
Net Operating Loss Carryforward	\$ 1,359,065	\$ 1,282,960
Less: Valuation Allowance	(1,359,065)	(1,282,960)
Net Deferred Tax Asset	\$ 0	\$ 0

The net deferred tax asset generated by the loss carryforward has been fully reserved and will expire in the years 2019 through 2030. The realization of deferred tax benefits is contingent upon future earnings and is fully reserved at March 31, 2011 and June 30, 2010.

NOTE 5 – ASSET RETIREMENT OBLIGATION

The Company's asset retirement obligation ("ARO") primarily represents the estimated present value of the amount Freestone Resources will incur to plug, abandon and remediate its producing properties at the end of their productive lives, in accordance with applicable state laws. Freestone Resources determines the ARO on its oil and gas properties by calculating the present value of estimated cash flows related to the liability. At March 31, 2011, the liability for ARO was \$41,123, all of which is considered long term. The asset retirement obligations are recorded as current or non-current liabilities based on the estimated timing of the anticipated cash flows. During 2011 and 2010, the Company has not recognized accretion expense, as the properties were written down to salvage value as of June 30, 2009.

NOTE 6 –LEGAL

The Company is engaged in a lawsuit in the United States District Court for the Northern District of Texas, Dallas Division, which was originally filed by the Company on July 9, 2010, Civil Action Number 3:10-cv-01349-O against Lawrence Shultz, Environmental Services and Support, Inc. ("ESSI"), David Feuerborn and Thomas Jennings (the "Defendants") for, but not limited to, the rescission of the Stock Purchase Agreement entered into by and between the Company and Environmental Services and Support, Inc. and Lawrence Shultz (the "Agreement"). The Company alleges that the Defendants and possibly others, committed fraud by nondisclosure, the common law tort of conversion by pretext and swindling, deceptive trade practices, common law fraud and fraud by misrepresentation/statutory fraud

upon the Company in connection with an executed Agreement.

On December 20, 2010 the Company filed its First Amended Complaint against the Defendants which included, but was not limited to, the fraudulent transfer of 5,875,000 shares of the Company's stock by Defendant Lawrence Shultz to seventeen (17) transferees who are not "Protected Purchasers" (sometimes also referred to in other jurisdictions as "Bona Fide Purchasers") as defined under Section 104.8303 of the Nevada Revised Statutes. These transfers are direct violations of Sections 16(a) and 23(a) of the Securities and Exchange Act of 1934, Sections 30(h) and 38 of the Investment Company Act of 1940, SEC Rule 10b-1, and SEC Rule 10b-5.

This lawsuit is also discussed in the Company's fiscal year 2010 Form 10-K filed with the Securities and Exchange Commission. In Note 16, the Company discloses a proforma balance sheet and income statement as though EOS had not been acquired on September 24, 2009.

NOTE 7 – COMMITMENTS AND CONTINGENCIES

The Company leases office space under a non-cancelable operating lease that expires in June 2014. The lease requires fixed escalations and payment of electricity costs. Rent expense, included in general and administrative expenses, totaled approximately \$6,085 and \$6,254 for the three months ended March 31, 2011 and 2010 respectively, and 12,338 and \$20,604 for the nine months ended March 31, 2011 and 2010 respectively

NOTE 8 – EQUITY TRANSACTIONS

The Company is authorized to issue 100,000,000 common shares at a par value of \$0.001 per share. These shares have full voting rights. At March 31, 2011 and June 30, 2010, there were 74,418,994 and 71,718,994, respectively, common shares outstanding.

During the nine months ended March 31, 2011 the Company issued a total 2,600,000 shares of stock that is restricted pursuant to SEC Rule 144 for \$319,500.

The Company issued 100,000 shares for demonstration equipment valued at \$58,585 during the fiscal second quarter of 2011.

During the fiscal year ended June 30, 2010, the Company issued 5,000,000 shares for \$.10 a share. These shares are restricted pursuant to SEC Rule 144. As discussed in Note 1, the Company issued 31,603,734 shares of restricted common stock for 100% of the issued and outstanding stock of EOS. On July 9, 2010, the Company filed a lawsuit seeking to rescind the stock purchase agreement and cancel the shares that were issued. See Note 6 for additional information.

The Company has not paid a dividend to its shareholders and does not have any stock option plans or warrants.

NOTE 9 – FREESTONE TECHNOLOGIES, LLC

On October 24, 2008 Freestone established Freestone Technologies, LLC (the “Subsidiary”) in the state of Texas. The Subsidiary is wholly owned by Freestone and has certain assets and liabilities relating to the purchase of oil wells. These wells were purchased as additional test wells for Petrozene, and will also be used to evaluate other petro-chemicals. The assets and liabilities of the Subsidiary are included in the consolidated financial statements of Freestone.

NOTE 10 – GOING CONCERN

As reflected in the accompanying consolidated financial statements, Freestone incurred operating losses, and has a negative working capital position as of March 31, 2011. The above factors raise substantial doubt about Freestone's ability to continue as a going concern. Freestone's continued existence is dependent on its ability to obtain additional equity and/or debt financing to fund its operations. Freestone plans to raise additional financing and to increase sales volume. There is no assurance that Freestone will obtain additional financing or achieve profitable operations or cash inflows. The consolidated financial statements do not include any adjustments relating to the recoverability or classification of recorded asset amounts or the amount and classification of liabilities that might be necessary as a result of this uncertainty.

NOTE 11 – SUBSEQUENT EVENTS

In accordance with ASC 855-10 an evaluation of subsequent events was performed through May 10, 2011, which is the date of the report.

On April 21, 2011 Freestone issued shares of the Company's common stock to certain directors, consultants, and staff as consideration for services rendered to the Company. Clayton Carter, the Company's Director, received 1,000,000 shares of the Company's common stock, Don Edwards, the Company's Director, received 1,000,000 shares of the Company's common stock, and James Carroll, the Company's Director, received 500,000 shares of the Company's common stock. The Company also issued 2,800,000 shares of the Company's common stock to consultants and staff as consideration for services rendered to the Company. In connection with each of these transactions, the persons acquiring the shares agreed to hold the shares for investment and not further distribution. In each case, the certificates representing the shares carry a legend that the shares may not be transferred without compliance with the registration requirements of the Securities Act of 1933 or in reliance upon an exemption therefrom. For each of these transactions, the Company relied upon Section 4(2) of the Securities Act of 1933 as an exemption from the registration requirements of the Act.

NOTE 12 – IMPAIRMENT OF OIL AND GAS PROPERTIES

During the fiscal year ended June 30, 2010 the Company recorded impairment expense of \$7,649 related to its oil and gas property and equipment.

In the fourth quarter of year ended June 30, 2009 the Company recorded impairment charges of \$250,266 related to its oil and gas properties used in its research and development activities. The wells were purchased by the Company to use in its development activities. The properties were marginally producing throughout the year ended June 30, 2009 and would require significant expenditures to maintain or increase production. The Company recorded the impairment to reflect the current fair market value of the wells.

NOTE 13 – ACQUISITION OF EARTH OIL SERVICES & IMPAIRMENT OF GOODWILL

On September 24, 2009 the Company acquired one hundred percent (100%) of the issued and outstanding stock of Earth Oil Services, Inc., a Nevada corporation ("EOS"), in a non-cash transaction. The following presents a summary of the net assets acquired:

EOS Summary of Net Assets as of September 24, 2009

Assets	
Investment in Bleeding Rock, LLC	\$ 250,010
Intangible assets	10,000
Licenses	150,000
Total Assets	410,010
Liabilities	
Accounts payable	250,000
Accounts payable – Related Party	150,010
Total Liabilities	400,010

Net Assets	\$ 10,000
------------	-----------

The transaction generated goodwill of \$1,254,149. This amount was capitalized and is segregated on the balance sheet. As discussed in Note 6, the Company has filed a lawsuit seeking to rescind the Stock Purchase Agreement entered into by and between the Company and the shareholders of EOS. The Company has determined that as of June 30, 2010, the assets and goodwill related to this transaction have been permanently impaired, and have recorded an impairment loss of \$1,664,159 for the year ended June 30, 2010.

NOTE 14 – FAIR VALUE MEASUREMENTS

Cash, accounts receivable, accounts payable and other accrued expenses and other current assets and liabilities are carried at amounts which reasonably approximate their fair values because of the relatively short maturity of those instruments.

Accounting Standards Codification (“ASC”) Topic 820, “Fair Value Measurements and Disclosures” (formally SFAS No. 157) establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.

Level 2 Inputs to the valuation methodology include:

2

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability’s fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for Company assets measured at fair value:

Asset retirement obligations are recorded based on the present value of the estimated cost to retire the oil and gas properties and are depleted over the useful life of the asset. The settlement date fair value is discounted at the Company’s credit adjusted risk-free rate in determining the abandonment liability.

The preceding method described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Company believes its valuation method is appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. The following table sets forth by level, within the fair value hierarchy, the Company’s liabilities at fair

value as of March 31, 2011:

Liabilities at Fair Value as of March 31, 2011

	Level 1		Level 2		Level 3		Total
Asset retirement obligations	\$	0	\$	0	\$	41,123	\$ 41,123

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS

This report contains forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. The Company's actual results could differ materially from those set forth on the forward looking statements as a result of the risks set forth in the Company's filings with the Securities and Exchange Commission, general economic conditions, and changes in the assumptions used in making such forward looking statements.

General

On August 22, 2007, the Company changed its name to Freestone Resources, Inc. in anticipation of going into the oil and gas technology development business. Since that time Freestone began developing and acquiring rights to chemical solvents that can increase the production in oil and gas wells, decrease the viscosity of heavy oil, and extract hydrocarbons from various forms of matter. The Company is currently developing its economically and environmentally viable oil, sand oil extraction, and oil remediation technology.

Acquisition of Earth Oil Services, Inc.:

The Company acquired one hundred percent (100%) of the issued and outstanding stock of Earth Oil Services, Inc., a Nevada corporation ("EOS"), in a non-cash transaction on September 24, 2009. The Company issued 31,603,734 shares of restricted common stock of the Company in consideration for this transaction. EOS owns certain exclusive, territorial, license agreements to a proprietary technology that is a chemical solvent that can separate, extract and recycle hydrocarbon contaminants from ground soils, tar sands, vessels and other materials. This technology is marketed under the name EncapSol ("EncapSol"). EOS has engaged a fabricator to build a prototype machine (the "Prototype") designed to be used in conjunction with EncapSol. EOS is indebted to the fabricator for its development of the Prototype. EOS is now a wholly owned subsidiary of Freestone. As discussed below, the Company has filed a lawsuit to rescind the EOS Agreement.

Assets of EOS

EOS holds certain assets that include exclusive territorial license agreements for the use of EncapSol, and 50% ownership of Bleeding Rock, LLC, a Utah corporation ("Bleeding Rock"). Bleeding Rock owns 20,600,000 shares of Green River Resources, Corp., an Alberta Canada corporation. The last Green River Resources, Inc. ("Green River") stock transaction was for stock options to employees of Green River ("Green River Options"). The aforesaid Green River Options were optioned for \$0.35 per share. Thus, the total ownership of Green River Shares owned by Bleeding Rock is valued at \$7,210,000. EOS owns 50% (valued at \$3,605,000) of Bleeding Rock, and is entitled to 47% of the profits from EOS' 50% ownership of Bleeding Rock. The recorded value on EOS's audited balance sheet of the investment was \$250,010, however, the entire amount has been deemed impaired with the pending litigation and was written off as of June 30, 2010.

Liabilities of EOS

EOS has certain liabilities that include \$150,000 in license fees owed to Environmental Services and Support, Inc., a non-related third party California corporation ("ESSI"), an invoice in the amount of \$250,000 from SRS Engineering Corporation, a California corporation that built the fourth generation EncapSol Recovery Technology. The Company is responsible for the payment of \$250,000 to the manufacturers of the fourth generation EncapSol Recovery Technology and the payment of \$150,000 license fee to ESSI, totaling \$400,000.

Basis of Presentation

The Company consolidates its subsidiaries in accordance with ASC 810, which states, "The usual condition for a controlling financial interest is ownership of a majority voting interest, and, therefore, as a general rule ownership by one reporting entity, directly or indirectly, or over 50% of the outstanding voting shares of another entity is a condition pointing toward consolidation."

The Company owns 100% of EOS and has applied ASC 810 in consolidating the subsidiary. EOS owns 50% of BRC, as does an unrelated third party, Hidden Peak Group. Although each party owns 50%, Hidden Peak Group maintains control of the three person management board with three representatives, and therefore, applying the requirements for consolidations under ASC 810, EOS has not consolidated BRC but shows its impact through the Noncontrolling Interest method.

Litigation involving Previous Owners of EOS

The Company filed a lawsuit in the United States District Court for the Northern District of Texas, Dallas Division, on July 9, 2010, Civil Action Number 3:10-cv-01349-O against Lawrence Shultz (“Shultz”), Environmental Services and Support, Inc. (“ESSI”), David Feuerborn (“Feuerborn”) and Thomas Jennings (Jennings”) (the “Defendants”). The Company alleges that the Defendants and possibly others, committed fraud by nondisclosure, the common law tort of conversion by pretext and swindling, deceptive trade practices, common law fraud and fraud by misrepresentation/statutory fraud upon the Company in connection with an executed Stock Purchase Agreement (the “Agreement”).

On December 20, 2010 the Company filed its First Amended Complaint against the Defendants to include, but was not limited to, the fraudulent transfer of 5,875,000 shares of the Company’s stock by Defendant Lawrence Shultz to seventeen (17) transferees who are not “Protected Purchasers” (sometimes also referred to in other jurisdictions as “Bona Fide Purchasers”) as defined under Section 104.8303 of the Nevada Revised Statutes. These transfers are direct violations of Sections 16(a) and 23(a) of the Securities and Exchange Act of 1934, Sections 30(h) and 38 of the Investment Company Act of 1940, SEC Rule 10b-1, and SEC Rule 10b-5.

The Company is seeking rescission of the Agreement and setting aside the shares of Company common stock issued to the Defendants or their assigns and the recovery of certain sums paid in connection with the agreement. The Company is also seeking a declaratory judgment that the Agreement is void and unenforceable; that the Company’s shares of stock issued to one or more of Defendants be cancelled; that the Company may adjust its share register to so reflect such cancellation; that the Agreement is void, unenforceable, and subject to cancellation by this Court; and that the Company’s damages were proximately caused by such fraud and deception and the breach of legal duties owed to it by one or more of the Defendants. The Company is also seeking actual damages from the Defendants, jointly and severally, of at least \$1,614,149, as well as reasonable and necessary attorney’s fees. The Company is further seeking unliquidated damages within the jurisdictional limits of the United States District Court for the Northern District of Texas, Dallas Division, exemplary damages, statutory damages, prejudgment interest and post judgment interest, compounded annually, and such other and further relief to which the Company may show itself to be justly entitled.

Results of Operations

Three and Nine Months Ended March 31, 2011 compared to Three and Nine Months Ended March 31, 2010

Revenue - Our revenue for the three months March 31, 2011 was \$2,327, compared to \$25,539 for the same period in 2010. This decrease is due to decreased oil and gas sales from production generated by the wells during research activities. Our revenue for the nine months March 31, 2011 was \$20,735, compared to \$52,734 for the same period in 2010. This decrease is due to reduced oil and gas sales from production generated by the wells during research activities.

Lease Operating Expense - Lease operating expense for the three months ended March 31, 2011 was \$10,182 compared to \$15,146 for the same period in 2010. Lease operating expense increased in the three months ended March 31, 2011 due to test wells that were acquired in Seguin, TX. Lease operating expenses for the nine months ended March 31, 2011 was \$28,333 compared to \$20,367 for that same period in 2010.

Operating Expense - Total operating expenses for the three months ended March 31, 2011 were \$370 of depreciation and depletion expense and \$66,077 of general and administrative expenses respectively, compared to \$620 depreciation and depletion expense, and \$163,766 of general and administrative expenses for the same period in 2010. Total operating expenses for the nine months ended March 31, 2011 were \$1,111 of depreciation and depletion expense and \$231,978 of general and administrative expenses respectively, compared to \$1,859 depreciation and depletion expense, \$7,649 of impairment expense and \$310,152 of general and administrative expenses for the same period in 2010. The decreased costs in the three months ended March 31, 2011 were related to the EOS development write-off of \$70,000 in 2010 and higher audit fees in 2010 of \$14,000 related to the EOS transaction. These savings were partially off-set by increased Payroll of \$9,000 and legal fees of about \$5,000. The increased costs for the nine months ended March 31, 2011 were related legal fees \$25,000 (the lawsuit against EOS (Note 6) that was filed in July, 2010), contract and other fees \$21,000, payroll of \$15,000 and audit and accounting fees of \$15,000 and other expenses of about \$8,000; this was mostly off-set by the \$70,000 engineering write-off in FY 2010.

Net Income/Loss - Net loss for the three months ended March 31, 2011 was \$74,386 compared to net loss of \$152,681 for the same period in 2010. Net loss for the nine months ended March 31, 2011 was \$223,838 compared to net loss of \$282,909 for the same period in 2010. The decrease in loss in the three month period ended March 31, 2011 is mainly related to the changes mentioned above. The increase in loss in the nine month period ended March 31, 2011 is due to the increased administrative costs mentioned above.

Liquidity and Capital Resources

We have little cash reserves and liquidity to the extent we receive it from operations.

During the nine months ended March 31, 2011, our cash and cash equivalent decreased to \$15,378 from \$28,062 at June 30, 2010 due to losses from operations, however additional stock sales have helped us continue operations.

Net cash used by the Company was \$12,684 for the nine months ended March 31, 2011 compared to cash provided of \$45,830 for the same period in 2010. We continue to explore working capital options and in the short-term rely on our line-of-credit and advances/loans from shareholders.

Employees

As of March 31, 2011, Freestone had two employees.

Need for Additional Financing

No commitments to provide additional funds have been made by management or other stockholders. Our independent auditors included a going concern explanatory paragraph in their report included in our annual report on Form 10-K for the year ended June 30, 2010, which raises substantial doubt about our ability to continue as a going concern.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 4T: CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of March 31, 2011. This evaluation was accomplished under the supervision and with the participation of our chief executive officer/principal executive officer, and chief financial officer/principal financial officer who concluded that our disclosure controls and procedures are effective.

Based upon an evaluation conducted for the period ended March 31, 2011, our Chief Executive and Chief Financial Officer as of March 31, 2011 and as of the date of this Report, has concluded that as of the end of the periods covered by this report, we have identified the following material weakness of our internal controls:

Lack of sufficient accounting staff which results in a lack of segregation of duties necessary for a good system of internal control and financial statement presentation.

Changes in Internal Controls over Financial Reporting

We have not yet made any changes in our internal controls over financial reporting that occurred during the period covered by this report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II

Items No. 1, 3, 4, 5 - Not Applicable.

During the three months ended September 30, 2009, Freestone issued 31,603,734 restricted shares of common stock valued at \$1,264,149 to Larry Shultz and Environmental Services and Support, Inc. Larry Shultz and Environmental Services and Support, Inc. agreed to acquire the shares for investment purposes only and not for resale. The certificates representing the shares carry a legend that the shares may not be sold or transferred without compliance with the registration requirements of the Securities Act of 1933, as amended (the "Act") or in reliance upon an applicable exemption there from. In connection with the issue of these shares, the Company relied upon the private offering exemption found in section 4(2) of the Act.

Item 6 - Exhibits and Reports on Form 8-K

The Company filed a Form 8-K on April 21, 2011 related to the issuance of 5,300,000 unregistered, restricted shares to officers, consultants and staff of the Company.

(b) Exhibits

Exhibit Number
