MATERIAL CHANGE REPORT

ITEM 1.

NAME AND ADDRESS OF COMPANY

Pan American Silver Corp. (the **Company**)

1500 625 Howe Street

Vancouver, British Columbia V6C 2T6

ITEM 2.

DATE OF MATERIAL CHANGE

July 21, 2005

ITEM 3.

NEWS RELEASE

A news release was issued by the Company on July 21, 2005 at Vancouver, British Columbia and distributed through the facilities of Canada NewsWire.

ITEM 4.

SUMMARY OF MATERIAL CHANGE

Pan American Silver Corp. is pleased to announce that 14,000 meters of exploration and infill drilling conducted over the past six months at its 87% owned Morococha mine in Peru has expanded known mineralized systems and has identified several new silver-rich zones. As a result, proven and probable reserves, measured and indicated resources and inferred resources have expanded significantly.

ITEM 5.

FULL DESCRIPTION OF MATERIAL CHANGE

The Company is pleased to announce that 14,000 meters of exploration and infill drilling conducted over the past six months at its 87% owned Morococha mine in Peru has expanded known mineralized systems and has identified several new silver-rich zones. As a result, proven and probable reserves, measured and indicated resources and

inferred resources have expanded significantly.

Proven and probable reserves have increased 1.2 million tonnes containing 6.4 million ounces of silver (100% basis). This increase is net of production for the first half of this year. Measured and indicated resources have increased by 1.0 million tonnes, containing an additional 6.1 million ounces of silver, and inferred resources have increased by 1.7 million tonnes at a grade of 241 g/tonne silver.

The reserve and resource increases come primarily from three newly discovered mantos as well as from the expansion of two others previously identified. All of these mantos are large mineralized ore deposits that are significantly thicker and wider than the vein systems that have been the primary producers on the property. As a result, it is expected that bulk mechanized mining in these zones will be at a much lower cost.

www.panamericansilver.com

Given the success of the exploration efforts to date, another 14,000 meters is scheduled to be drilled through the remainder of 2005. The Company expects this program to convert resources into proven and probable reserves and to further add to the reserve base and mine life.

The following table represents the Morococha mine (100%) reserves and resources as at June 30, 2005.

	Tonnes	Grade (g/t Ag)	Grade Zn(%)	Grade Pb(%)	Grade Cu(%)	Contained Silver (Oz.)
Proven Mineral Reserves	2,309,110	201	4.19	1.52	0.41	14,922,151
Probable Mineral Reserves	980,437	220	4.00	1.37	0.74	6,934,787
Total	3,289,547	207	4.13	1.48	0.51	21,892,592
Measured Mineral Resources						
Indicated Mineral Resources	1,661,942	159	3.10	1.42	0.28	8,495,789
Total	464,343	171	2.84	1.31	0.30	2,552,853
	2,126,285	162	3.04	1.40	0.28	11,074,579
Inferred Mineral Resources	9,283,418	241	3.94	1.75	0.38	71,930,932

(Mineral reserve estimates, measured and indicated resource estimates and inferred resource estimates were prepared under the supervision of or were reviewed by Michael Steinmann, P. Geo, Vice-President Geology Operations, the Qualified Person as defined in NI 43-10. Drilling is ongoing and future results, as well as results to date, will be reviewed and compiled into a new reserve statement as of December 31, 2005.)
