China Digital TV Announces Unaudited Third Quarter 2009 Results

BEIJING, China, November 10, 2009 — China Digital TV Holding Co., Ltd. (NYSE: STV) (“China Digital TV” or the “Company”), the leading provider of conditional access (“CA”) systems to China’s expanding digital television market, announced today its unaudited financial results for the quarter ended September 30, 2009.

Highlights for the Third Quarter 2009

China Digital TV shipped approximately 1.96 million smart cards during the third quarter, compared to 2.21 million and 2.13 million smart cards shipped in the third quarter of 2008 and in the second quarter of 2009, respectively.

According to market data collected by the Company, China Digital TV entered into 9 out of a total of 15 new contracts to install CA systems in China in the third quarter of 2009.

Net revenues in the third quarter were US\$12.1 million, a 28.2% decrease from the corresponding period in 2008 and a 17.1% decrease from the second quarter of 2009, which were within the Company’s revenue guidance.

Diluted earnings per American depositary share (“ADS”) (one ADS representing one ordinary share) in the third quarter of 2009 were US\$0.08.

“As expected, the third quarter continued to be a challenging period for CA card shipments. Cable operators continued to postpone digital migration projects as they have been waiting for more clarity regarding potential consolidation of the Chinese cable television industry and television subscription fee adjustments in certain regions,” said Mr. Jianhua Zhu, China Digital TV’s chairman and chief executive officer. “While we do not anticipate any immediate growth catalysts in our industry, we are confident that China Digital TV will maintain strong market share and win new contracts.”

Mr. Zhu noted that about two thirds of China’s cable TV subscribers are still awaiting digitalization.

“As one of the leading players in China’s digital television industry, China Digital TV’s deep market insight, technology knowhow and ability to provide flexible solutions, position us well to understand the evolving needs of Chinese television viewers. Looking forward, in addition to providing value-added services to television viewers through cooperation with cable TV operators, we will continue exploring ways to directly address consumer’s needs to capture opportunities in this market,” Mr. Zhu continued.

Mr. Mason Xu, chief financial officer of China Digital TV said, “The decrease in average selling price of our smart cards continued in the third quarter due to ongoing competitive pressures. As the migration of TV digitalization progresses from larger cities to smaller cities and counties, where the cable operators are generally more price sensitive, we expect to make pricing concessions in order to win new customers.”

“Operational expenses remained stable during the third quarter,” added Mr. Xu. “We continued to manage costs prudently while expanding our research & development team for value-added services. With a strong balance sheet and a profitable business, we are in a strong position to continue investing for long-term growth.”

Third Quarter 2009 Results

(Note: Unless otherwise stated, all financial statement measures presented in this press release are based on generally accepted accounting principle in the United States (“U.S. GAAP”).)

In the third quarter of 2009, net revenues were US\$12.1 million, a decrease of 28.2% from the third quarter of 2008 and a decrease of 17.1% from the second quarter of 2009. The year-over-year decrease in net revenues was primarily due to a decrease in revenues from smart card sales. The quarter-over-quarter decrease was largely due to decreases in both smart card sales and revenues from services.

Revenue Breakdown

	For the three months ended		
	September 30, 2009	June 30, 2009	September 30, 2008
	(in U.S. dollars, in thousands)		
Products			
Smart Cards	\$ 10,524	\$ 12,593	\$ 15,050
Set-top boxes and others	60	10	49
Subtotal	10,584	12,603	15,099
Services			
Head-end system integration	909	1,361	814
Head-end system development	113	103	221
Licensing income	285	319	689
Royalty income	130	209	154
Other service (1)	150	85	-
Subtotal	1,587	2,077	1,878
Total revenues	\$ 12,171	\$ 14,680	\$ 16,977

(1) Other service represents digital TV-based advertising business

Revenues from smart cards and related products were US\$10.6 million in the third quarter of 2009, a decrease of 29.9% from the corresponding period in 2008 and a decrease of 16.0% from the second quarter of 2009. Sales of smart cards and related products accounted for 87.0% of total revenues for the quarter, slightly up from 85.9% in the second quarter of 2009. The year-over-year and quarter-over-quarter decreases were primarily due to decreases in both shipment volume and the ASP of smart cards.

Revenues from the top five customers accounted for 33.3% of total revenues in the third quarter of 2009, compared to 33.4% in the second quarter of 2009.

Revenues from services were US\$1.6 million in the third quarter of 2009, a decrease of 15.5% from the corresponding period in 2008 and a decrease of 23.6% from the second quarter of 2009. Service revenues accounted for 13.0% of total revenues for the quarter. The year-over-year decrease was primarily due to a 58.6% decrease in licensing revenues as demand for such service weakened during that period. The quarter-over-quarter decrease was primarily due to decreases in head-end system integration and royalty revenues.

Gross profit in the third quarter of 2009 was US\$8.9 million, a decrease of 35.3% from the corresponding period in 2008 and a decrease of 17.3% from the second quarter of 2009. Gross margin was 73.8% in the third quarter of 2009, compared to 81.8% in the corresponding period in 2008 and 74.0% in the second quarter of 2009. The year-over-year decline in gross margin was mainly due to a decrease in the ASP and an increase in non-chip cost of smart cards. Gross margin for the third quarter remained stable from the second quarter primarily due to the impact of a lower ASP being largely offset by improving profitability in the system integration business.

In the third quarter of 2009, the ASP for smart cards decreased by 7.8% compared to the second quarter of 2009. The unit cost of smart cards increased by 8.4% compared to the second quarter of 2009 due to increase in non-chip cost of smart cards.

Operating expenses in the third quarter of 2009 were US\$5.0 million, a decrease of 8.5% from the third quarter of 2008 and a decrease of 1.4% from the second quarter of 2009.

1 Research and development expenses in the third quarter were US\$2.2 million, an increase of 12.6% from the corresponding period in 2008 and an increase of 0.4% from the second quarter of 2009. The year-over-year increase was mainly due to increases in both the number of research & development staff and travelling expenses. The flat quarter-over-quarter expenses largely reflected the increase in number of R&D staff being offset by lower average salaries.

1 Sales and marketing expenses in the third quarter were US\$1.8 million, a decrease of 13.7% from the corresponding period in 2008 and an increase of 1.8% from the second quarter of 2009. The year-over-year decrease was mainly due to decrease in marketing activities in third quarter of 2009. The slight quarter-over-quarter increase was primarily due to higher compensation costs for sales and marketing staff, which was largely offset by lower expenses for marketing activities.

1 General and administrative expenses in the third quarter were US\$1.0 million, a decrease of 29.8% from the corresponding period in 2008 and a decrease of 9.7% from the second quarter of 2009. The year-over-year decrease was mainly due to a decrease in professional service fees. The quarter-over-quarter decrease was mainly due to a decrease in bad debt expense.

Income from operations in the third quarter was US\$3.9 million, a 52.8% decrease from the corresponding period in 2008 and a 31.4% decrease from the second quarter of 2009.

Operating margin, defined as income from operations divided by net revenues, in the third quarter of 2009 was 32.5%, compared to 49.4% in the corresponding period in 2008 and 39.3% in the second quarter of 2009.

Income tax expenses in the third quarter of 2009 were US\$0.3 million, a decrease of 83.8% from the corresponding period in 2008 and a decrease of 27.9% from the second quarter of 2009. For year 2009, the Company expects to be subject to a 7.5% preferential tax rate under relevant PRC tax regulations.

Net income attributable to China Digital TV in the third quarter of 2009 was US\$4.9 million, a decrease of 39.9% from the corresponding period in 2008 and a decrease of 27.5% from the second quarter of 2009.

Non-GAAP net income attributable to China Digital TV, defined as net income excluding certain non-cash expenses, i.e., share-based compensation expenses and amortization of acquired intangible assets relating to business acquisitions, in the third quarter of 2009 was US\$ 5.5 million, a decrease of 35.0% from the corresponding period in 2008 and a decrease of 24.6% from the second quarter of 2009.

As of September 30, 2009, China Digital TV had cash and cash equivalents, restricted cash deposits with maturity over three months and short-term investments totaling US\$224.7 million. In the third quarter of 2009, cash flow from operations was approximately US\$2.1 million.

Business Outlook

Based on information available as of November 10, 2009, China Digital TV expects smart card shipments for the fourth quarter of 2009 to be in the range of 2.2 million to 2.4 million. Net revenues for the fourth quarter of 2009 are expected to be in the range of US\$12.5 million to US\$13.6 million, representing a year-over-year decrease in the range of 25% to 19%.

Conference Call Information

The Company will hold an earnings conference call at 7:00 p.m., Eastern Standard Time, on November 10, 2009 (8:00 a.m. on November 11, Beijing/Hong Kong Time).

Conference Call Dial-in Information

United States Toll Free: +1-800-884-5695
International: +1-617-786-2960

Safe Harbor Statements

This announcement contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such forward-looking statements are made under the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995.

These forward-looking statements can be identified by terminology such as "will," "expects," "anticipates," "future," "intend," "plans," "believes," "estimates," "may," "should" and similar expressions. Such forward-looking statements include, with limitation, statements regarding the outlook for the fourth quarter of 2009 and comments by management in this announcement about trends in the CA systems, digital television, cable television and related industries in the PRC and China Digital TV's strategic and operational plans and future market positions. China Digital TV may also make forward-looking statements in its periodic reports to the U.S. Securities and Exchange Commission, in its annual report to shareholders, in press releases and other written materials and in oral statements made by its officers, directors or employees to third parties. Statements that are not historical facts, including statements about China Digital TV's beliefs and expectations, are forward-looking statements. Forward-looking statements involve inherent risks and uncertainties. A number of factors could cause actual results to differ materially from projections contained or implied in any forward-looking statement, including but not limited to the following: competition in the CA systems, digital television, cable television and related industries in the PRC and the impact of such competition on prices, our ability to implement our business strategies, changes in technology, the progress of the television digitalization in the PRC, the structure of the cable television industry or television viewer preferences, changes in PRC laws, regulations or policies with respect to the CA systems, digital television, cable television and related industries, including the extent of non-PRC companies' participation in such industries, and changes in political, economic, legal and social conditions in the PRC, including the government's policies with respect to economic growth, foreign exchange and foreign investment.

Further information regarding these and other risks and uncertainties is included in our annual report on Form 20-F and other documents filed with the U.S. Securities and Exchange Commission. China Digital TV does not assume any obligation to update any forward-looking statements, which are as of the date of this press release only.

About China Digital TV

Founded in 2004, China Digital TV is the leading provider of CA systems to China's expanding digital television market. CA systems enable television network operators to manage the delivery of customized content and services to their subscribers. China Digital TV conducts substantially all of its business through its PRC subsidiary, Beijing Super TV Co., Ltd., and its affiliate, Beijing Novel-Super Digital TV Technology Co., Ltd., as well as subsidiaries of its affiliate.

Reconciliation of Non-GAAP Measures

Non-GAAP net income attributable to China Digital TV excludes certain non-cash expenses, i.e., share-based compensation expenses and amortization of acquired intangible assets relating to business acquisitions. The Company believes that these financial measures provide meaningful supplemental information regarding the Company's performance and liquidity by excluding certain non-cash expenses that may not be indicative of its operating performance from a cash-flow perspective. The Company believes that both management and investors benefit from referring to this additional information in assessing the Company's performance and when planning and forecasting future periods.
