PANAMA CITY, October 20, 2011 – Banco Latinoamericano de Comercio Exterior, S.A. (NYSE: BLX, “Bladex”, or “the Bank”) announced today its results for the third quarter and nine months ended September 30, 2011.

Third Quarter Business Highlights

- Third quarter 2011 Net Income (*) totaled \$16.3 million, a \$1.4 million, or 9%, improvement from third quarter 2010, as the Commercial Division reported Net Income of \$17.7 million, a \$3.8 million, or 27%, increase over last year, partly offset by results in the Asset Management Unit (-\$3.3 million).
- On a year-to-date basis, the Bank’s Net Income totaled \$58.4 million, a \$31.7 million, or 118%, increase from 2010, driven by improved performance across all of the Bank’s business lines.

(*) Net income or loss attributable to Bladex (“Net Income”, or “Net Loss”).

- The Commercial Division's continued growth in Net Income was driven by net operating revenues of \$30.0 million, 42% higher than the same period 2010, and 27% higher than the second quarter 2011. The increase during the quarter was driven by portfolio growth and diversification, along with increased commission income.
- The Commercial Portfolio reached \$5.6 billion, a \$1.4 billion, or 34%, year-on-year increase, and a \$371 million, or 7%, increase from the previous quarter, while average portfolio balances grew 11%.

- As of September 30, 2011, the non-accrual portfolio stood at \$33.1 million, or 0.7% of the loan portfolio, compared to 0.9% a year ago. The Bank reported no past-due amounts and all loans in non-accruing status were current. As of September 30, 2011, the ratio of the allowance for credit losses to the Commercial Portfolio was 1.7%, compared to 2.3% as of September 30, 2010, and 1.8% as of June 30, 2011.
- In the third quarter 2011, the Treasury Division reported Net Income of \$2.0 million, compared to a \$1.5 million Net Loss in the same period 2010, and \$1.1 million in Net Income in the second quarter 2011. Net Income in the third quarter 2011 was mainly attributable to gains on sales of securities.
- As of September 30, 2011, the Bank's deposit balances totaled \$2.5 billion, a new historical high, representing a 34% year-on-year increase, and a 20% increase from the previous quarter.
- Funding costs continued to improve as the weighted average funding cost in the third quarter 2011 was 1.05%, a decrease of 17 bps compared to the third quarter 2010, and a decrease of 3 bps compared to the previous quarter.

- Net interest income amounted to \$28.7 million in the third quarter 2011, an \$8.7 million, or 43%, increase compared to the third quarter 2010, and a \$5.2 million, or 22%, increase compared to the second quarter 2011. The results were driven by higher average interest-earning assets (+31% versus third quarter 2010 and +12% versus second quarter 2011), as well as an improved net interest margin (up 17 bps from the third quarter 2010, and 15 bps higher than the second quarter 2011).
- During the third quarter 2011, the Asset Management Unit reported a Net Loss of \$3.3 million, mainly due to mark-to-market losses on long positions in Latin American currencies and Latin American short-term sovereign credits incurred late in the quarter during increased market volatility. On a year-to-date basis, Bladex's investment in the Bladex Capital Growth Fund (BCGF, the Investment Fund, managed by this Unit), contributed Net Income of \$11.5 million to the Bank, compared to a Net Loss of \$8.1 million in the same period 2010.
- As of September 30, 2011, the Bank's Tier 1 capital ratio was 16.9%, compared to 20.6% as of September 30, 2010, and 18.1% as of June 30, 2011, as the Bank continues deploying capital through growth. The Bank's equity consists entirely of issued and fully paid ordinary common stock.

CEO's Comments

Mr. Jaime Rivera, Bladex's Chief Executive Officer, stated the following regarding the Bank's results: "The third quarter saw the Bank's business shift into high gear. In just three months, net interest income grew 22%, fees increased 93%, deposits were up 20% to reach an all-time high, while the Commercial Portfolio grew 7%. Concurrently, liquidity strengthened and credit quality remained strong.

The Asset Management Division, however, posted a \$3.3 million loss during what is widely viewed as one of the most volatile quarters in recent years, but still remains comfortably ahead year-to-date with a Net Income contribution of \$11.5 million in 9M11.

By supporting clients at a difficult time in the market, Bladex is strengthening its franchise and proving once more the Bank's strategic value to the Region. With its ample capitalization supporting sustained growth, Bladex has been able to steadily increase margins, ROA and ROE levels within its core intermediation and client business, even while the world economy slows.

Bladex is keenly aware of the increasing risk levels in the markets, and has taken measures to protect the Bank accordingly - this is something we know how to do quite well. Crucially, however, the Bank has strengthened its position as a uniquely qualified specialist in the intermediation of Latin America's growing trade flows, which continue supplying the global demand for food, commodities, and energy. This is a great position in which to be, and the reason why Bladex is so confident with regards to the Bank's prospects moving forward."

RESULTS BY BUSINESS SEGMENT

COMMERCIAL DIVISION

The Commercial Division incorporates the Bank's core business of financial intermediation and fee generation activities. Net Income includes net interest income from loans, fee income, allocated operating expenses, reversals or provisions for loan and off-balance sheet credit losses, and any impairment on assets.

The Commercial Portfolio includes the book value of loans, selected deposits placed, acceptances, and contingencies (including letters of credit, stand-by letters of credit, and guarantees covering commercial and country risks and credit commitments).

During the third quarter 2011, the Commercial Division continued its business expansion through portfolio growth and diversification. Period-end portfolio balances reached \$5.6 billion, a 7% increase from the previous quarter, and a 34% increase from the third quarter 2010. The annual increase was mainly attributable to increased demand from the Bank's established client base of corporations (+30%), and financial institutions (+32%), along with new middle market clients (+103%).

The Commercial Portfolio continues to be short-term and trade-related in nature: \$4.0 billion, or 71%, of the Commercial Portfolio matures within one year, and \$1.9 billion, or 34%, within 90 days. Trade financing operations represent 64% of the portfolio, while the remaining balance consists primarily of lending to banks and corporations involved in foreign trade.

The following graphs illustrate the geographic composition of the Bank's Commercial Division by country of risk and the diversification of corporate and middle-market companies across a variety of industry segments:

Third quarter 2011 credit disbursements totaled \$2.7 billion compared to \$2.3 billion in the same period 2010, and \$3.2 billion in the second quarter 2011.

Refer to Exhibit X for additional information relating to the Bank's Commercial Portfolio distribution by country, and Exhibit XII for the Bank's distribution of credit disbursements by country.

3Q11 vs. 2Q11

Net Income in the third quarter 2011 amounted to \$17.7 million, compared to \$13.3 million in the second quarter 2011. The \$4.4 million, or 33%, increase in Net Income was mostly driven by (i) a \$4.6 million increase in net interest income, mainly from higher average loan portfolio balances (+9%) and improved net interest margins (+15 bps), and (ii) a \$1.7 million increase in non-interest operating income, mostly attributable to increased commission income from higher average volumes in the letter of credit business, and increased loan fees, as the Bank started to benefit from its enhanced structuring and distribution capabilities. The results were partly offset by a net increase of \$1.9 million in provisions for credit losses, largely related to higher portfolio balances.

3Q11 vs. 3Q10

Net Income increased \$3.8 million, or 27%, compared to the third quarter 2010 due to (i) a \$7.2 million, or 38% increase in net interest income mainly attributable to higher average loan portfolio balances (+39%), and (ii) a \$1.6 million, or 76%, increase in non-interest operating income from higher fees from letters of credit and loan structuring and distribution. The results were partially offset by (i) a \$2.7 million increase in operating expenses, mostly attributable to personnel expenses associated with the expansion of the Division's front end activities, and (ii) a net increase of \$2.3 million in provisions for credit losses due to increased portfolio balances.

9M11 vs. 9M10

The Division's accumulated Net Income amounted to \$44.6 million, compared to \$41.9 million in the same period 2010, a \$2.7 million, or 6% increase. Net operating revenues amounted to \$76.3 million, a \$18.1 million, or 31% increase over the same period 2010, mostly attributable to a \$17.2 million, or 34%, increase in net interest income, reflective of higher average loan portfolio balances (+45%) and improved net interest margins (+10 bps), along with a \$0.9 million, or 13%, increase in non-interest operating income. The revenue increase was partly offset by (i) a \$7.6 million increase in operating expenses, as the Division expanded its sales force and local presence in various markets, and (ii) \$3.2 million in credit provision charges during the first nine months 2011, compared to \$4.3 million in reversals of provisions that took place in the same period 2010.

TREASURY DIVISION

The Treasury Division incorporates the Bank's liquidity management, and investment securities activities. Net Income is presented net of allocated operating expenses, and includes net interest income on Treasury activities and net other income (loss) relating to Treasury activities.

Liquid assets (8) stood at \$535 million as of September 30, 2011, compared to \$351 million as of June 30, 2011, and \$336 million as of September 30, 2010, as the Bank chose to increase its liquidity position in response to volatility in the markets.

As of September 30, 2011, the securities available-for-sale portfolio amounted to \$412 million, compared to \$495 million as of June 30, 2011, and \$527 million as of September 30, 2010, mainly as a result of sales of securities. As of September 30, 2011, the available-for-sale portfolio consisted entirely of readily quoted Latin American securities, 80% of which were sovereign or state-owned risk in nature (refer to Exhibit XI for a per country distribution of the Treasury portfolio).

The available-for-sale portfolio is marked-to-market, with the impact recorded in stockholders' equity through the Other Comprehensive Income Account ("OCI"), which stood at (\$12.7) million in the third quarter 2011, compared to (\$3.4) million in the second quarter 2011, and (\$5.5) million in the third quarter 2010, mainly as the net result of lower valuations of the securities and/or the interest rate hedging instruments associated with such securities.

Funding costs continued to improve, as the weighted average funding cost during the first nine months 2011 was 1.07%, a decrease of 22 bps, or 17% compared to the same period 2010, while in the third quarter 2011, weighted average funding cost decreased 3 bps to 1.05%, compared to the second quarter 2011, and 17 bps, or 14%, compared to the third quarter 2010.

As of September 30, 2011, deposit balances stood at \$2.5 billion, a new historical high, with a 20% increase versus the previous quarter, and a 34% year-on-year increase. Deposits represent 45% of total liabilities and come principally from central banks and other financial institutions in the Latin American Region. Borrowings and securities sold under repurchase agreements totaled \$2.9 billion, nearly unchanged from the previous quarter, and up 34% year-on-year.

In the third quarter 2011, the Treasury Division posted Net Income of \$2.0 million, compared to Net Income of \$1.1 million in the second quarter 2011, a \$0.9 million, or 82%, increase, mostly driven by \$1.8 million in gains on the sale of securities held available-for-sale.

3Q11 vs. 3Q10

The Division's quarterly Net Income of \$2.0 million represented an increase of \$3.5 million from the \$1.5 million Net Loss reported in the third quarter 2010, primarily as a result of a \$2.5 million increase in non-interest operating income, mainly related to gains on the sale of securities, along with a \$0.8 million increase in net interest income.

9M11 vs. 9M10

In the first nine months 2011, the Treasury Division reported Net Income of \$2.2 million, compared to a \$7.1 million Net Loss in the first nine months 2010. The \$9.3 million increase was due to the combined effects of: (i) a \$2.8 million increase in non-interest operating income attributable to a positive year-on-year variation in the valuation of hedging instruments, (ii) \$3.0 million in gains on the sale of securities available-for-sale, (iii) a \$2.3 million increase in net interest income, and (iv) a \$1.2 million decrease in operating expenses.

ASSET MANAGEMENT UNIT

The Asset Management Unit incorporates the Bank's asset management activities. The Unit's Investment Fund primarily follows a Latin America macro strategy, utilizing a combination of products (foreign exchange, equity indices, interest rate swaps, and sovereign credit products) to establish long and short positions in the markets.

The Unit's Net Income includes net interest income on the Investment Fund, as well as net gains (losses) from investment fund trading, other related income (loss), allocated operating expenses, and Net Income attributable to the redeemable non-controlling interest.

3Q11 vs. 2Q11

In the third quarter 2011, the Asset Management Unit recorded a Net Loss of \$3.3 million, compared to Net Income of \$11.3 million in the second quarter 2011, mainly due to mark-to-market losses on long positions in Latin American currencies and on Latin American short-term sovereign credits incurred late in the quarter during increased market volatility.

3Q11 vs. 3Q10

The Unit's Net Loss of \$3.3 million in the third quarter 2011, compared to Net Income of \$2.6 million in the third quarter 2010, was driven mostly by losses from investments in the Investment Fund.

9M11 vs. 9M10

In the third quarter 2011, net interest income amounted to \$28.7 million, an increase of \$5.2 million, or 22%, compared to \$23.5 million in the second quarter 2011, which primarily reflects:

- (i) A \$2.3 million increase in net interest income as the result of higher average interest-earning assets, primarily average loan portfolio balances (+9%), which resulted in a \$3.5 million overall increase in interest income, partially offset by a \$1.2 million increase in interest expense associated with an increase in average interest-bearing liabilities (+13%).
- (ii) A \$2.9 million increase in net interest income as the result of higher average yields on interest-earning assets (+14bps) to 2.78%, while the average yield paid on interest-bearing liabilities decreased 3 bps to 1.05%.

3Q11 vs. 3Q10

Net interest income increased \$8.7 million, or 43%, when compared to the third quarter 2010. This increase primarily reflects:

- (i) Higher average interest-earning assets, mainly average loan portfolio balances, which increased \$1.3 billion, or 39%, compared to the third quarter 2010, resulting in a \$9.4 million overall increase in interest income. Average interest-bearing liabilities increased \$1.4 billion, or 39%, resulting in a \$3.6 million overall increase in interest expense. The combined effect resulted in a \$5.8 million increase in net interest income.
- (ii) A \$2.9 million increase in net interest income as a result of higher average interest rates on the Bank's interest-earning assets (+8 bps), while the average yield paid on interest-bearing liabilities decreased 17 bps.

The \$20.1 million, or 38%, increase of net interest income during the period primarily reflects higher average interest-earning assets, primarily average loan portfolio balances (+45%), which resulted in an \$27.7 million overall increase in interest income, partially offset by a \$7.9 million increase in interest expense associated with an increase in average interest-bearing liabilities (+39%). Average yield paid on the Bank's interest-bearing liabilities decreased 22 bps resulting in a \$3.0 million decrease in interest expense, partly offset by a \$2.7 million decrease in interest income, as the average interest rate on the Bank's interest-earning assets decreased 3 bps.

During the first nine months 2011, fees and commissions income amounted to \$7.8 million, compared to \$7.2 million in the first nine months 2010.

The \$2.5 million quarter-on-quarter increase in the total allowance for credit losses was driven by the increase in the Bank's commercial portfolio. The ratio of the allowance for credit losses to the Commercial Portfolio stood at 1.7% as of September 30, 2011, compared to 1.8% as of June 30, 2011, and 2.3% as of September 30, 2010.

Quarterly Variation

Operating expenses in the third quarter 2011 totaled \$12.4 million, a \$1.0 million, or 7%, decrease compared to \$13.4 million in the second quarter 2011, mainly as a result of lower performance-related expenses from the Investment Fund. The \$2.0 million, or 19%, increase compared to the same period of 2010 was primarily due to higher salary and other employee expenses associated with the Commercial Division's business expansion in 2011, and to other operating expenses mostly related to new representative offices established in support of the business expansion.

The Bank's third quarter 2011 efficiency ratio stood at 40%, compared to 33% in the second quarter of 2011, and 40% in the third quarter 2010, mostly the result of a \$3.6 million net loss from Investment Fund trading in the Asset Management Unit.

During the third quarter 2011, the operating expenses to average assets ratio improved to 81 bps, compared to 100 bps in the previous quarter, and 91 bps in the third quarter 2010.

9M11 vs. 9M10

During the first nine months 2011, operating expenses amounted to \$36.7 million, compared to \$30.4 million in the same period 2010. The \$6.3 million, or 21%, increase in operating expenses was primarily attributable to salary and other employee expenses associated with higher average headcount in support of expanding the Commercial Division and the risk management function.

During the first nine months 2011, the Bank's efficiency ratio improved to 37%, compared to 60% in the same period 2010, mainly as the result of a \$48.5 million increase in net operating revenues across all business segments during the period, of which \$22.3 million correspond to the Asset Management Unit, \$18.1 million to the Commercial Division, and \$8.1 million to the Treasury Division.

As of September 30, 2011, the Bank's operating expenses to average assets ratio improved to 90 bps, compared to 98 bps as of September 30, 2010.
