*This Annual Report on Form 10-K and the information incorporated by reference in this Form 10-K include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Some of the forward-looking statements can be identified by the use of forward-looking words such as "believes," "expects," "may," "should," "seeks," "approximately," "intends," "plans," "estimates" or "anticipates," or the negative of those words or other comparable terminology. Forward-looking statements involve risks and uncertainties. You should be aware that a number of important factors could cause our actual results to differ materially from those in the forward-looking statements. We will not necessarily update the information presented or incorporated by reference in this Annual Report on Form 10-K if any of these forward-looking statements turn out to be inaccurate. Risks affecting our business are described throughout this Form 10-K and especially in the section "Risk Factors." This entire Annual Report on Form 10-K, including the consolidated financial statements and the notes and any other documents incorporated by reference into this Form 10-K, should be read for a complete understanding of our business and the risks associated with that business.*

## PART I

## Item 1. Business

### Overview

Merriman Holdings, Inc. and subsidiaries (the Company) is a financial services holding company that provides capital markets advisory and research, corporate and investment banking services through its wholly-owned operating subsidiary, Merriman Capital, Inc. (hereafter MC). MC is an investment bank and securities broker-dealer whose clients are fast growing public and private companies and the entrepreneurs who manage those companies. MC facilitates efficient capital formation through a proprietary digital network (DCN). MC is registered with the Securities and Exchange Commission (SEC) as a broker-dealer and is a member of the Financial Industry Regulatory Authority (FINRA) and Securities Investor Protection Corporation (SIPC).

Our mission is to be the leader in advising, financing, trading and investing in fast-growing companies under $1 billion in market capitalization. We originate differentiated equity research, brokerage and trading services primarily to institutional and family office investors, as well as investment banking and advisory services to our fast-growing corporate clients.

We are headquartered in San Francisco, CA with an additional office in New York, NY. As of December 31, 2014, we had 31 employees.

COR Clearing LLC became the Company's clearing broker effective March 16, 2015.

**Liquidity/Going Concern**

The Company incurred substantial losses in 2014 and 2013, having net losses of $1,628,000 and $3,992,000, respectively. As of December 31, 2014, the Company had an accumulated deficit of $150,537,000 and a shareholders' deficit of $102,000. These facts raise substantial doubt as to the Company's ability to continue as a going concern.

The consolidated financial statements have been prepared assuming the Company will continue on a going concern basis which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business and do not include any adjustments that might result from uncertainty about the Company's ability to continue as a going concern.

Management's plan to alleviate the going-concern uncertainty includes, but is not limited to, the issuance of equity and debt instruments for working capital. The Company's continued existence is also dependent upon its ability to increase revenues generated from operations which will enable the Company to achieve a profitable level of operations.

If anticipated operating results are not achieved, management has the intent, and believes it has the ability, to further delay or reduce expenditures. In such case, the further reduction in operating expenses might need to be substantial. Failure to generate sufficient cash flows from operations, raise additional capital, or reduce certain discretionary spending would have a material adverse effect on the Company's ability to achieve its intended business objectives. The Company can give no assurance that it will be successful in its plans and can give no assurance that additional financing will be available on terms advantageous to the existing terms or that additional financing will be available at all. Should the Company not be successful in obtaining the necessary financing to fund its operations, the Company would need to curtail certain or all of its operational activities and/or contemplate the sale of its assets if necessary.

**Principal Services**

Our investment banking /broker-dealer subsidiary provides four distinctive lines of business: investment banking, institutional brokerage, capital markets advisory and financial entrepreneur platform. We also provide focused research-based financial services to companies with market capitalization up to $1 billion, which we believe is an under-served sector in the financial services industry.

***Investment Banking***

Our investment bankers provide a full range of corporate finance and strategic advisory services. Our corporate finance practice is comprised of industry coverage investment bankers who focus on raising capital for fast-growing companies in selected industry sectors. Our strategic advisory practice tailors solutions to meet the specific needs of our clients at various phases in their growth cycle.

*Corporate Finance* – Our corporate finance practice advises on and structures capital raising solutions for our corporate clients through public and private offerings primarily of equity and convertible debt securities. Our focus is to provide fast-growing companies with necessary capital to bring them to the next level of growth. We offer a wide range of financial services designed to meet the needs of fast-growing companies, including initial public offerings, secondary offerings and private placements. Our equity capital markets team executes securities underwriting offerings, assists clients with investor relations advice and introduces companies seeking to raise capital to investors who we believe will be supportive, long-term investors. Additionally, we draw upon our extensive connections throughout the financial and corporate world, expanding the available options to our corporate clients.

*Strategic Advisory* – Our strategic advisory services include transaction-specific advice regarding mergers and acquisitions, divestitures, spin-offs and privatizations, as well as general strategic advice. Our commitment to long-term relationships and our ability to meet the needs of a diverse range of clients has made us a reliable source of advisory services for fast-growing public and private companies. Our strategic advisory services are also supported by our capital markets professionals, who provide assistance in acquisition financing in connection with mergers and acquisition transactions.

***Institutional Brokerage***

We provide institutional sales trading and equity execution and options execution services to institutional clients around the world.

We execute securities transactions for money managers, mutual funds, hedge funds, insurance companies, and pension and profit-sharing plans. Institutional investors normally purchase and sell securities in large quantities requiring the distribution and trading expertise we provide.

We provide integrated research and trading solutions centered on assisting our institutional clients in investing profitably, to grow their portfolios and ultimately their businesses. We understand the importance of building long-term relationships with our clients who look to us for the professional resources and relevant expertise to provide solutions for their specific situations. We believe it is important for us to assist public companies early in their corporate life cycles. We strive to provide unique investment opportunities in fast-growing, relatively undiscovered companies and to help our institutional clients to execute trades efficiently, timely and accurately.

*Institutional Sales* – Our sales professionals focus on communicating investment ideas to our clients and executing trades in securities of companies in our target growth sectors. By actively trading in these securities, we endeavor to couple the capital market information flow with the fundamental information flow provided by our analysts. We believe that this combined information flow is the basis of delivering favorable execution of investment strategies for our clients. Our sales professionals work with our analysts and bankers to provide up-to-date information to our institutional clients. We interface actively with our clients and plan to be involved with them over the long term.

*Trading* – Our trading professionals facilitate liquidity discovery in equity securities. We make markets in securities traded on the NASDAQ Stock Market, OTCQX, other stock exchanges and electronic communication networks, and service the trading desks of institutions in the United States. Our trading professionals have direct access to the major stock exchanges, including the NASDAQ Stock Market, the New York Stock Exchange and the American Stock Exchange.

The client base of our institutional brokerage business includes mutual funds, hedge funds and private investment firms. We believe this group of potential clients to number over 4,000. We grow our business by adding new clients and increasing the penetration of existing institutional clients that use our equity research and trading services in their investment process.

*Corporate & Executive Services* – We offer brokerage services to corporations such as stock repurchase programs. We also serve the needs of company executives with restricted stock transactions, cashless exercise of options, and liquidity strategies.

*Capital Markets Advisory Group* – MC began offering services to sponsor companies on the International and Domestic OTCQX markets in 2007. Since 2008 we have solidified our position as the leading investment bank sponsor in this market. We enable non-U.S. and domestic companies to obtain greater exposure to U.S. institutional investors without the expense and regulatory burdens of listing on traditional U.S. exchanges. The International and Domestic OTCQX market tiers do not require full SEC registration and are not subject to the Sarbanes Oxley Act of 2002. Listing on the market requires the sponsorship of a qualified investment bank called a Principal American Liaison (PAL) for non-U.S. companies or a Designated Advisor for Disclosure (DAD) for domestic companies. MC was the first investment bank to achieve DAD and PAL designations. We believe that we are the leading investment bank in the number of listings of issuers on the OTCQX.

MC also offers Capital Markets Advisory Services to U.S. based companies desiring to increase the liquidity and visibility of their securities. MC believes that the market for these services is significant as it comprises the thousands of NYSE, NASDAQ, OTC and Pink Sheet companies that fall into MC's areas of research expertise and market capitalization.

***Segment Reporting***

Currently, the Company's business results are categorized into three operating segments: MC, Financial Entrepreneurial Platform (FEP) and Capital Market Advisory Services (CMAG). FEP is an investment banking division assisting corporate issuers in raising capital through a network of independent investment bankers. CMAG is its capital market advisory services assisting clients to obtain listing on OTCQX, a tier of Pink Sheets as well as general advisory services. The Company recognizes revenues earned by FEP on a gross basis in accordance with ASC 605-45, *Revenue Recognition: Principal Agent Considerations*, as the Company is the primary obligor in the arrangements entered into by FEP.

The Company's reportable segments are strategic business units that offer products and services which are compatible with its core business strategy. The MC segment includes a broad range of services, such as capital raising and financial advisory services for corporate clients, and brokerage and equity research services for our institutional investor clients. The FEP segment includes capital raising services through a network of independent investment bankers and CMAG includes assisting corporate issuers in listing on OTCQX, the premier OTC Market tier, along with other services that facilitate the access to institutional capital markets.

**Competition**

MC is engaged in the highly competitive financial services and investment industries. We compete with other securities firms – from large U.S.-based firms, securities subsidiaries of major commercial bank holding companies and U.S. subsidiaries of large foreign institutions to major regional firms, smaller niche players, and those offering competitive services via the internet. Long term developments in the brokerage industry, including decimalization and the growth of electronic communications networks, or ECNs, have reduced commission rates and profitability in the brokerage industry. Many large investment banks have responded to lower margins within their equity brokerage divisions by reducing research coverage, particularly for smaller companies, consolidating sales and trading services, and reducing headcount of more experienced sales and trading professionals. The trend by competitors to reduce services to address these challenges has created an opportunity for us as many highly qualified individuals have been dislocated, expanding the pool of experienced employees whom we might hire. Many smaller firms have ceased their operations in the last five years. With our reduced overhead and the core compliance competency we have developed over the years, we believe the opportunity exists to expand our market presence in a cost effective way for our shareholders.

For a further discussion of the competitive factors affecting our business, see “We face strong competition from larger firms,” under “Item 1A - Risk Factors.”

3

**Corporate Support**

***Accounting, Administration and Operations***

Our accounting, administration and operations personnel are responsible for financial controls, internal and external financial reporting, human resources and personnel services, office operations, information technology and telecommunication systems, the processing of securities transactions, and corporate communications. With the exception of payroll processing which is performed by an outside service bureau, and client transaction processing which is performed by our clearing firm, most data processing functions are performed internally.

***Compliance, Legal, Risk Management and Internal Audit***

Our compliance, legal and risk management personnel (together with other appropriate personnel) are responsible for our compliance with legal and regulatory requirements of our investment banking business and our exposure to market, credit, operations, liquidity, compliance, legal and reputation risk. In addition, our compliance personnel test and audit for compliance with our internal policies and procedures. Our general counsel provides legal service throughout our Company, including advice on managing legal risk. The supervisory personnel in these areas have direct access to senior management and to the Audit Committee of our Board of Directors to ensure their independence in performing these functions. In addition to our internal compliance, legal, and risk management personnel, we retain outside auditors, tax advisors, consultants and legal counsel for their particular functional expertise.

**Risk Management**

In conducting our business, we are exposed to a range of risks including:

*Market risk* is the risk to our earnings or capital resulting from adverse changes in the values of assets resulting from movement in equity prices or market interest rates.

*Credit risk* is the risk of loss due to an individual client’s or institutional counterparty’s unwillingness or inability to fulfill its obligations.

*Operations risk* is the risk of loss resulting from systems failure, inadequate controls, human error, fraud or unforeseen catastrophes.

*Liquidity risk* is the potential that we would be unable to meet our obligations as they come due because of an inability to liquidate assets or obtain funding. Liquidity risk also includes the risk of having to sell assets at a loss to generate liquid funds, which is a function of the relative liquidity (market depth) of the asset(s) and general market conditions.

*Compliance risk* is the risk of loss, including fines, penalties and suspension or revocation of licenses by self-regulatory organizations, or from failing to comply with federal, state or local laws pertaining to financial services activities.

*Legal risk* is the risk that arises from potential contract disputes, lawsuits, adverse judgments, or adverse governmental or regulatory proceedings that can disrupt or otherwise negatively affect our operations or financial condition.

*Reputation risk* is the potential that negative publicity regarding our practices, whether factually correct or not, will cause a decline in our client base, costly litigation, or revenue decline.

We have a risk management program which sets forth various risk management policies, provides for a risk management committee and assigns risk management responsibilities. The program is designed to focus on the following:

- Identifying, assessing and reporting on corporate risk exposures and trends;
- Establishing and revising policies, procedures and risk limits, as necessary;
- Monitoring and reporting on adherence with risk policies and limits;
- Developing and applying new measurement methods to the risk process as appropriate; and
- Approving new product developments or business initiatives.

We cannot provide assurance that our risk management program or our internal controls will prevent or mitigate losses attributable to the risks to which we are exposed.

For a further discussion of the risks affecting our business, see "Item 1A Risk Factors."

**Regulation**

As a result of federal and state registration and self-regulatory organization ("SRO") memberships, we are subject to overlapping layers of regulation that cover all aspects of our securities business. Such regulations cover matters such as capital requirements, uses and safe-keeping of clients' funds, conduct of directors, officers and employees, record-keeping and reporting requirements, supervisory and organizational procedures intended to ensure compliance with securities laws and to prevent improper trading on material nonpublic information, employee-related matters, including qualification and licensing of supervisory and sales personnel, limitations on extensions of credit in securities transactions, requirements for the registration, underwriting, sale and distribution of securities, and rules of the SROs designed to promote high standards of commercial honor and just and equitable principles of trade. A particular focus of the applicable regulations concerns the relationship between broker-dealers and their clients. As a result, many aspects of the broker-dealer client relationship are subject to regulation including, in some instances, "suitability" determinations as to certain client transactions, limitations on the amounts that may be charged to clients, timing of proprietary trading in relation to clients' trades, and disclosures to clients.

As a broker-dealer registered with the SEC and as a member firm of FINRA, we are subject to the net capital requirements of the SEC (Rule 15c3-1 of the Securities Exchange Act of 1934) as regulated and enforced by FINRA. These capital requirements specify minimum levels of capital, computed in accordance with regulatory requirements that most firms are required to maintain and also limit the amount of leverage that each firm is able to obtain in its respective business.

"Net capital" is essentially defined as net worth (assets minus liabilities, as determined under accounting principles generally accepted in the United States ("U.S. GAAP"), plus qualifying subordinated borrowings, less the value of all of a broker-dealer's assets that are not readily convertible into cash (such as fixed assets, prepaid expenses, and unsecured receivables), and further reduced by certain percentages (commonly called "haircuts") of the market value of a broker-dealer's positions in securities and other financial instruments. The amount of net capital in excess of the regulatory minimum is referred to as "excess net capital."

The SEC's capital rules also (i) require that the broker-dealers notify it, in writing, two business days prior to making withdrawals or other distributions of equity capital or lending money to certain related persons if those withdrawals would exceed, in any 30-day period, 30% of the broker-dealers' excess net capital, and that they provide such notice within two business days after any such withdrawal or loan that would exceed, in any 30-day period, 20% of the broker-dealers' excess net capital; (ii) prohibit a broker-dealer from withdrawing or otherwise distributing equity capital or making related party loans if, after such distribution or loan, the broker-dealer would have net capital of less than $300,000 or if the aggregate indebtedness of the broker-dealer's consolidated entities would exceed 1000% of the broker-dealer's net capital in certain other circumstances; and (iii) provide that the SEC may, by order, prohibit withdrawals of capital from a broker-dealer for a period of up to 20 business days, if the withdrawals would exceed, in any 30-day period, 30% of the broker-dealer's excess net capital and if the SEC believes such withdrawals would be detrimental to the financial integrity of the broker-dealer or would unduly jeopardize the broker-dealer's ability to pay its client claims or other liabilities.

Compliance with regulatory net capital requirements could limit those operations that require the intensive use of capital, such as underwriting and trading activities, and could also restrict our ability to withdraw capital from our broker-dealer, which in turn could limit our ability to pay interests and dividends, repay debt, and redeem or repurchase shares of our outstanding capital stock.

Except for the period from February 28, 2015 through March 23, 2015, we believe that we have been in compliance with the applicable minimum net capital rules of the SEC and FINRA at all times. For further details, see notes 15 and 17 to the consolidated financial statements.

The failure of a broker-dealer to maintain its minimum required net capital would require it to cease executing client transactions until it came back into compliance, and could cause it to lose its FINRA membership, its registration with the SEC or require its liquidation. Further, the decline in a broker-dealer's net capital below certain "early warning levels," even though above minimum net capital requirements, could cause material adverse consequences to the broker-dealer.

We are also subject to "Risk Assessment Rules" imposed by the SEC, which require, among other things, that certain broker-dealers maintain and preserve certain information, describe risk management policies and procedures, and report on the financial condition of certain affiliates whose financial and securities activities are reasonably likely to have a material impact on the financial and operational condition of the broker-dealer. Certain "Material Associated Persons" (as defined in the Risk Assessment Rules) of the broker-dealer and the activities conducted by such Material Associated Persons may also be subject to regulation by the SEC.

In the event of non-compliance by us or our subsidiary with an applicable regulation, governmental regulators and one or more of the SROs may institute administrative or judicial proceedings that may result in censure, fine, civil penalties (including treble damages in the case of insider trading violations), the issuance of cease-and-desist orders, the deregistration or suspension of the non-compliant broker-dealer, the suspension or disqualification of officers or employees, or other adverse consequences. The imposition of any such penalties or orders on us or our personnel could have a material adverse effect on our operating results and financial condition.

Additional legislation and regulations, including those relating to the activities of our broker-dealer, changes in rules promulgated by the SEC, FINRA, or other states, or foreign governmental regulatory authorities and SROs, or changes in the interpretation or enforcement of existing laws and rules may adversely affect our operation and profitability. Our businesses may be materially affected not only by regulations applicable to us as a financial market intermediary but also by regulations of general application.

**Geographic Area**

Merriman Holdings, Inc. is domiciled in the United States and most of our revenue is attributed to United States and Canadian clients. In 2007, through our broker-dealer subsidiary, we began advising both international and domestic companies on listing on OTCQX.

All of our long-lived assets are located in the United States.

**Available Information**

Our website address is www.merrimanco.com. You may obtain free electronic copies of our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports on the “Investor Relations” portion of our website under the heading “SEC Filings.” These reports are available on our website as soon as reasonably practicable after we electronically file them with the SEC. We are providing the address to our internet site solely for the information of investors. We do not intend the address to be an active link or to otherwise incorporate the contents of the website into this report.

**Item 1a. Risk Factors**

We face a variety of risks in our business, many of which are substantial and inherent in our business and operations. The following are risk factors that could affect our business which we consider material to our industry and to holders of our common stock. Other sections of this Annual Report on Form 10-K, including reports which are incorporated by reference, may include additional factors which could adversely impact our business and financial performance. Moreover, we operate in a very competitive and rapidly changing environment. New risk factors emerge from time to time and it is not possible for our management to predict all risk factors, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

**Risks Related to Our Business**

**We may not be able to achieve a positive cash flow and profitability.**

Our ability to achieve a positive cash flow and profitability depends on our ability to generate and maintain greater revenue while incurring reasonable expenses. This, in turn, depends, among other things, on the successful shift from a transaction oriented business to service oriented business. It also depends on the continued development of our investment banking, securities brokerage business, continued growth in our Capital Markets Advisory Group (CMAG) and our Financial Entrepreneur Platform. We may be unable to achieve profitability if we fail to do any of the following:

- establish, maintain, and increase our client base;
- manage the quality of our services;
- compete effectively with existing and potential competitors;
- further develop our business activities;
- attract and retain qualified personnel;
- limit operating costs; and

· maintain adequate working capital.

We cannot be certain that we will be able to achieve a positive cash flow and profitability on a quarterly or annual basis in the future. Our inability to achieve profitability or positive cash flow could result in disappointing financial results, impede implementation of our growth strategy, or cause the market price of our common stock to decrease. Accordingly, we cannot assure you that we will be able to generate the cash flow and profits necessary to sustain our business.

We have had a number of structural changes to our operations as we divested certain non-core business lines to focus on our core service and product offerings. Additionally, there have been a number of significant challenges faced by the securities and financial industries in the past five years. As a result of our structural changes and the uncertainty of the current economic environment, the factors upon which we are able to base our estimates as to the gross revenue and the number of participating clients that will be required for us to maintain a positive cash flow are unpredictable. For these and other reasons, we cannot assure you that we will not require higher gross revenue and an increased number of clients, securities brokerage, and investment banking transactions, and/or more time in order for us to complete the development of our business that we believe we need to be able to cover our operating expenses. It is more likely than not that our estimates will prove to be inaccurate because actual events more often than not differ from anticipated events. Furthermore, in the event that financing is needed in addition to the amount that is required for this development, we cannot assure you that such financing will be available on acceptable terms, if at all.

**We may not be able to continue operating our business**

The Company incurred significant losses in 2014 and 2013. Even if we are successful in executing our plans, we will not be capable of sustaining losses such as those incurred in 2014 and 2013. The Company's ability to meet its financial obligations is highly dependent on market and economic conditions. We also recorded net losses in certain quarters within other past fiscal years. If operating conditions worsen in 2015, we may not have the resources to meet our financial obligations. If the Company is not able to continue in business, the entire investment of our common shareholders may be at risk, and there can be no assurance that any proceeds shareholders would receive in liquidation would be equal to their investment in the Company, or even that shareholders would receive any proceeds in consideration of their common stock.

**Prior claims on assets in liquidation**

There can be no assurance that there will be any proceeds available in liquidation for our common shareholders after payments to holders of our Secured Promissory Notes and Unsecured Promissory Notes.

Common shareholders may receive nothing in liquidation or receive much less than they would if there were no Secured Promissory Notes and Unsecured Promissory Notes outstanding.

**Limitations on our access to capital and our ability to comply with net capital requirements could impair our ability to conduct our business**

Liquidity, or ready access to funds, is essential to financial services firms. Failures of financial institutions have often been attributable in large part to insufficient liquidity. Liquidity is of importance to our trading business, and perceived liquidity issues may affect our customers and counterparties' willingness to engage in brokerage transactions with us. Our liquidity could be impaired due to circumstances that we may be unable to control, such as a general market disruption or operational problems that affect our trading capability.

MC, our broker-dealer subsidiary, is subject to the net capital requirements of the SEC and various self-regulatory organizations of which it is a member. These requirements typically specify the minimum level of net capital a broker-dealer must maintain and also mandate that a significant part of its assets be kept in relatively liquid form. Any failure to comply with these net capital requirements could impair our ability to conduct our core business as a brokerage firm. Furthermore, MC is subject to laws that authorize regulatory bodies to prevent or reduce the flow of

funds from it to Merriman Holdings, Inc. As a holding company, Merriman Holdings, Inc. depends on distributions and other payments from its subsidiary to fund all payments on its obligations. As a result, regulatory actions could impede access to funds that Merriman Holdings, Inc. needs to make payments on obligations, including debt obligations.

Factors which could impede our ability to access additional capital include the recent extreme volatility in the equity markets and our recent operating results. If we are not able to access additional capital, we might not be able to meet our obligations in a timely manner, which would have a material adverse effect on the Company’s ability to achieve its intended business objectives.

**Our exposure to legal liability may be significant, and damages that we may be required to pay and the reputation harm that could result from legal action against us could materially adversely affect our businesses.**

We face significant legal risks in our businesses and, in recent years, the volume of claims and amount of damages sought in litigation and regulatory proceedings against financial institutions have been increasing. These risks include potential liability under securities or other laws for materially false or misleading statements made in connection with securities offerings and other transactions, potential liability for “fairness opinions” and other advice we provide to participants in strategic transactions and disputes over the terms and conditions of trading arrangements. We are also subject to claims arising from disputes with employees for alleged discrimination or harassment, among other things. These risks often may be difficult to assess or quantify and their existence and magnitude often remain unknown for substantial periods of time.

Our role as advisor to our clients on important underwriting or mergers and acquisitions transactions involves complex analysis and the exercise of professional judgment, including rendering “fairness opinions” in connection with mergers and other transactions. Therefore, our activities may subject us to the risk of significant legal liabilities to our clients and third parties, including shareholders of our clients who could bring securities class actions against us. Our investment banking engagements typically include broad indemnities from our clients and provisions to limit our exposure to legal claims relating to our services, but these provisions may not protect us or may not be enforceable in all cases.

For example, an indemnity from a client that subsequently is placed into bankruptcy is likely to be of little value to us in limiting our exposure to claims relating to that client. As a result, we may incur significant legal and other expenses in defending against litigation and may be required to pay substantial damages for settlements and adverse judgments. Substantial legal liability or significant regulatory action against us could have a material adverse effect on our results of operations or cause significant reputation harm to us, which could seriously harm our business and prospects.

In the past, following periods of volatility in the market price of a company’s securities, securities class action litigation often has been instituted against many broker-dealers. Such litigation is expensive and diverts management’s attention and resources. We cannot assure you that we will not be subject to such litigation. If we are subject to such litigation, even if we ultimately prevail, our business and financial condition may be adversely affected.

**Our business and prospects increasingly rely on new business lines and new ways of doing business.**

Our business and financial prospects rely in part on new and unproven business lines and ways of doing business, including the Digital Capital Network. Since they are new, it may be difficult to evaluate prospects for future business from such sources. Any failure of such business lines and ways of doing business to evolve in the manner expected

could adversely affect our stock price, financial condition and prospects. An increasing percentage of our revenue producers are independent contractors rather than employees of the Company. Such contractors may be more likely to sever their relationships with the Company than the employees we have typically relied on in the past, and if they do so, they may be more likely to take important client relationships with them. Furthermore, such contractors may work more independently from the Company than employees typically have and may be more likely to work from remote locations rather than from the Company’s two office locations. These factors may increase the risk of claims and litigation arising from the actions of such independent contractors.

**Our financial results may fluctuate substantially from period to period, which may impair our stock price.**

We have experienced, and expect to experience in the future, significant periodic variations in our revenue and results of operations. These variations may be attributed in part to the fact that our investment banking revenue is typically earned upon the successful completion of a transaction, the timing of which is uncertain and beyond our control. In most cases we receive little or no payment for investment banking engagements that do not result in the successful completion of a transaction. As a result, our business is highly dependent on market conditions as well as the decisions and actions of our clients and interested third parties. For example, a client's acquisition transaction may be delayed or terminated because of a failure to agree upon final terms with the counterparty, failure to obtain necessary regulatory consents or board or shareholder approvals, failure to secure necessary financing, adverse market conditions, or unexpected financial or other problems in the client's or counterparty's business. If the parties fail to complete a transaction on which we are advising or an offering in which we are participating, we will earn little or no revenue from the transaction.

Due to many factors, including the increased regulatory burden on corporate issuers, there have been fewer initial public offerings of securities of U.S. based companies. Consequently, many fast-growing companies have found a more cost effective method to attract capital through listing on the OTCQX.  More companies initiating the process of an initial public offering are also simultaneously exploring merger and acquisition opportunities. If we are not engaged as a strategic advisor in any such dual-tracked process, our investment banking revenue would be adversely affected in the event that an initial public offering is not consummated.

As a result, we are unlikely to achieve steady and predictable earnings on a quarterly basis, which could in turn adversely affect our stock price.

**Our ability to retain our professionals and recruit additional professionals is critical to the success of our business, and our failure to do so could materially adversely affect our reputation, business, and results of operations.**

Our ability to obtain and successfully execute our business depends upon the personal reputation, judgment, business generation capabilities and project execution skills of our senior professionals, particularly D. Jonathan Merriman, our Co-Founder and Chief Executive Officer of Merriman Holdings, Inc., and the other senior professionals. Our senior professionals' personal reputations and relationships with our clients are a critical element in obtaining and executing client engagements. We face intense competition for qualified employees from other companies in the investment banking industry as well as from businesses outside the investment banking industry, such as investment advisory firms, hedge funds, private equity funds, and venture capital funds. From time to time, we have experienced losses of investment banking, brokerage, research, and other professionals and losses of our key personnel may occur in the future. The departure or other loss of Mr. Merriman or any other senior professionals who manage substantial client relationships and possess substantial experience and expertise, could impair our ability to secure or successfully

complete engagements, or protect our market share, each of which, in turn, could materially adversely affect our business and results of operations.

If any of our professionals were to join an existing competitor or form a competing company, some of our clients could choose to leave. The compensation plans and other incentive plans we have entered into with certain of our professionals may not prove effective in preventing them from resigning to join our competitors. If we are unable to retain our professionals or recruit additional professionals, our reputation, business, results of operations, and financial condition may be materially adversely affected.

**Our compensation structure may negatively impact our financial condition if we are not able to effectively manage our expenses and cash flows.**

Historically, the industry has been able to attract and retain investment banking, research, and sales and trading professionals in part because the business models have provided for lucrative compensation packages. Compensation and benefits are our largest expenditure and the variable compensation component, or bonus, has represented a significant proportion of this expense. The Company's bonus compensation is discretionary. For 2014, the potential pool was determined by a number of components including revenue production, key operating milestones, and profitability. There is a potential, in order to ensure retention of key employees, that we could pay individuals for revenue production despite the business having negative cash flows and/or net losses.

**Pricing and other competitive pressures may impair the revenue and profitability of our brokerage business.**

We derive a significant portion of our revenue from our brokerage business. Along with other brokerage firms, we have experienced intense price competition in this business in recent years. Recent developments in the brokerage industry, including decimalization and the growth of electronic communications networks, or ECNs, have reduced commission rates and profitability in the brokerage industry. We expect this trend toward alternative trading systems to continue. We believe we may experience competitive pressures in these and other areas as some of our competitors seek to obtain market share by competing on the basis of price.

In addition, we face pressure from larger competitors, which may be better able to offer a broader range of complementary products and services to brokerage customers in order to win their trading business.

Finally, certain large U.S. based broker-dealer firms operate under capital requirements which are less restrictive than the regulatory capital requirements we face, which puts smaller investment banks such as our Company at a competitive disadvantage in the market place.

**We may experience significant losses if the value of our marketable security positions deteriorates.**

We conduct active and aggressive securities trading, market making, and investment activities for our own account, which subjects our capital to significant risks. These risks include market, credit, counterparty, and liquidity risks, which could result in losses. These activities often involve the purchase, sale, or short sale of securities as principal in markets that may be characterized as relatively illiquid or that may be particularly susceptible to rapid fluctuations in liquidity and price. Trading losses resulting from such activities could have a material adverse effect on our business

and results of operations.

**Difficult market conditions could adversely affect our business in many ways.**

Difficult market and economic conditions and geopolitical uncertainties have in the past adversely affected and may in the future adversely affect our business and profitability in many ways. Weakness in equity markets and diminished trading volume of securities could adversely impact our brokerage business, from which we have historically generated more than half of our revenue. Industry-wide declines in the size and number of underwritings and mergers and acquisitions also would likely have an adverse effect on our revenue. In addition, reductions in the trading prices for equity securities also tend to reduce the deal value of investment banking transactions, such as underwriting and mergers and acquisitions transactions, which in turn may reduce the fees we earn from these transactions. As we may be unable to reduce expenses correspondingly, our profits and profit margins may decline.

**We may suffer losses through our investments in securities purchased in secondary market transactions or private placements.**

Occasionally, our Company, its officers and/or employees may make principal investments in securities through secondary market transactions or through direct investment in companies through private placements. In many cases, employees and officers with investment discretion on behalf of our Company decide whether to invest in our account or their personal account. It is possible that gains from investing will accrue to these individuals because investments were made in their personal accounts, and our Company will not realize gains because it did not make an investment. It is possible that gains from investing will accrue to these individuals and /or to the Company, while the Company's brokerage customers do not accrue gains in the same securities due to differences in timing of investment decisions. Conversely, it is possible that losses from investing will accrue to our Company, while these individuals do not experience losses in their personal accounts because the individuals did not make investments in their personal accounts.

**We face strong competition from larger firms.**

The brokerage and investment banking industries are intensely competitive. We compete on the basis of a number of factors, including client relationships, reputation, the abilities and past performance of our professionals, market focus and the relative quality and price of our services and products. We have experienced intense price competition with respect to our brokerage business, including large block trades, spreads, and trading commissions. Pricing and other competitive pressures in investment banking, including the trends toward multiple book runners, co-managers, and multiple financial advisors handling transactions, have continued and could adversely affect our revenue, even during periods where the volume and number of investment banking transactions are increasing. We believe we may experience competitive pressures in these and other areas in the future as some of our competitors seek to obtain market share by competing on the basis of price.

We are a small investment bank with 31 employees as of December 31, 2014 and revenues of approximately $16 million in 2014. Many of our competitors in the investment banking and brokerage industries have a broader range of products and services, greater financial and marketing resources, larger customer bases, greater name recognition, more senior professionals to serve their clients' needs, greater global reach, have more established relationships with clients than we have, and some operate under less restrictive capital requirements. These larger and better capitalized competitors may be better able to respond to changes in the brokerage and investment banking industries, to compete for skilled professionals, to finance acquisitions, to fund internal growth, and to compete for market share generally.

The scale of our competitors has increased in recent years as a result of substantial consolidation among companies in the investment banking and brokerage industries. In addition, a number of large commercial banks, insurance companies, and other broad-based financial services firms have established or acquired underwriting or financial advisory practices and broker-dealers or have merged with other financial institutions. These firms operate under less restrictive capital requirements than we do and these firms have the ability to offer a wider range of products than we do, which enhances their competitive position. They also have the ability to support investment banking with commercial banking, insurance, and other financial services in an effort to gain market share, which has resulted, and could further result, in pricing pressure in our businesses. In particular, the ability to provide financing has become an important advantage for some of our larger competitors and, because we do not provide such financing, we may be unable to compete as effectively for clients in a significant part of the brokerage and investment banking market.

If we are unable to compete effectively with our competitors, our business, financial condition, and results of operations will be adversely affected.

**We have incurred losses for the period covered by this report in the recent past and may incur losses in the future.**

The Company recorded net losses of $1,628,000 and $3,392,000 for the years ended December 31, 2014 and 2013. We also recorded net losses in certain quarters within other past fiscal years. We may incur losses in future periods. If we are unable to finance future losses, those losses may have a significant effect on our liquidity as well as our ability to operate.

In addition, the Company may incur significant expenses in connection with initiating new business activities or in connection with any expansion of our underwriting, brokerage, or other businesses. We may also engage in strategic acquisitions and investments for which we may incur significant expenses. Accordingly, we may need to increase our revenue at a rate greater than our expenses to achieve and maintain profitability. If our revenue does not increase sufficiently, or even if our revenue does increase but we are unable to manage our expenses, we will not achieve and maintain profitability in future periods.

**Capital markets and strategic advisory engagements are singular in nature and do not generally provide for subsequent engagements.**

The ability to complete capital raising transactions for our clients is significantly affected by the state of the capital markets in general.  Additionally, our investment banking clients generally retain us on a short-term, engagement-by-engagement basis in connection with specific capital markets or mergers and acquisitions transactions, rather than on a recurring basis under long-term contracts. As these transactions are typically singular in nature and our engagements with these clients may not recur, we must seek out new engagements when our current engagements are successfully completed or are terminated. As a result, high activity levels in any period are not necessarily indicative of continued high levels of activity in any subsequent period. If we are unable to generate a substantial number of new engagements and generate fees from those successful completion of transactions, our business and results of operations would likely be adversely affected.

**Our risk management policies and procedures could expose us to unidentified or unanticipated risk.**

Our risk management strategies and techniques may not be fully effective in mitigating our risk exposure in all market environments or against all types of risk.

We are exposed to the risk that third parties who owe us money, securities, or other assets will not fulfill their obligations. These parties may default on their obligations due to bankruptcy, lack of liquidity, operational failure, breach of contract, or other reasons. We are also subject to the risk that our rights against third parties may not be enforceable in all circumstances. Although we regularly review credit exposures to specific clients and counterparties and to specific industries and regions that we believe may present credit concerns, default risk may arise from events or circumstances that are difficult to detect or foresee. In addition, concerns about, or a default by, one institution could lead to significant liquidity problems, losses, or defaults by other institutions, which in turn could adversely affect us. Also, risk management policies and procedures that we utilize with respect to investing our own funds or committing our capital with respect to investment banking or trading activities may not protect us or mitigate our risks from those activities. If any of the variety of instruments, processes, and strategies we utilize to manage our exposure to various types of risk are not effective, we may incur losses.

**Our operations and infrastructure may malfunction or fail.**

Our business is highly dependent on our ability to process, on a daily basis, a large number of increasingly complex transactions across diverse markets. Our financial, accounting, or other data processing systems may fail to operate properly or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services or our inability to occupy one or more of our buildings. The inability of our systems to accommodate an increasing volume of transactions could also constrain our ability to expand our businesses. If any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes, people, or systems, we could suffer impairment to our liquidity, financial loss, and disruption of our businesses, liabilities to clients, regulatory intervention, or reputation damage.

We also face the risk of operational failure of any of our clearing agents, the exchanges, clearing houses, or other financial intermediaries we use to facilitate our securities transactions. Any such failure or termination could adversely affect our ability to execute transactions and to manage our exposure to risk.

In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the communities in which located. This may include a disruption involving electrical, communication, transportation, or other services used by us or third parties with whom we conduct business, whether due to fire, other natural disaster, power or communication failure, act of terrorism or war or otherwise. Nearly all of

our employees in our primary locations, including San Francisco and New York, work in proximity to each other. If a disruption occurs in one location and our employees in that location are unable to communicate with or travel to other locations, our ability to service and interact with our clients may suffer and we may not be able to implement successfully contingency plans that depend on communication or travel. Insurance policies to mitigate these risks may not be available or may be more expensive than the perceived benefit. Further, any insurance that we may purchase to mitigate certain of these risks may not cover our loss.

Our operations also rely on the secure processing, storage, and transmission of confidential and other information in our computer systems and networks. Our computer systems, software, and networks may be vulnerable to unauthorized access, computer viruses, or other malicious code and other events that could have a security impact. If one or more of such events occur, this potentially could jeopardize our or our clients' or counterparties' confidential and other information processed by, stored in, and transmitted through our computer systems and networks, or otherwise cause interruptions or malfunctions in our, our clients', our counterparties', or third parties' operations. We may be required to expend significant additional resources to modify our protective measures or to investigate and remediate vulnerabilities or other exposures, and we may be subject to litigation and financial losses that are either not insured against or not fully covered through any insurance maintained by us.

**Evaluation of our prospects may be more difficult in light of our operating history.**

As a result of the volatile economic conditions faced by the securities and financial industries, and the restructuring of our business lines, there have been a number of changes to our operations. Given these changes, we can no longer rely upon prior operating history to evaluate our business and prospects. Additionally, we are subject to the risks and uncertainties that face a company in the process of restructuring its business in the midst of uncertain economic environment. Some of these risks and uncertainties relate to our ability to attract and retain employees and clients on a cost-effective basis, expand and enhance our service offerings, raise additional capital, and respond to competitive market conditions. We may not be able to address these risks adequately, and our failure to do so may adversely affect our business and the value of an investment in our common stock.

**Risks Related to Our Industry**

**Risks associated with volatility and losses in the financial markets.**

In the last decade, the U.S. financial markets have experienced tremendous volatility and uncertainty. Several mortgage-related financial institutions and large, reputable investment banks were not able to continue operating their businesses. In the event that the securities and financial industries face similar or greater volatility, there can be no assurance that we will be able to continue our operations.

**Employee misconduct could harm us and is difficult to detect and deter.**

There have been a number of highly publicized cases involving fraud or other misconduct by employees in the financial services industry in recent years. There is potential risk that employee misconduct could occur at our Company. For example, misconduct by employees could involve the improper use or disclosure of confidential information, which could result in regulatory sanctions and serious reputation or financial harm to us. It is not always possible to deter employee misconduct. The precautions we take to detect and prevent this activity may not be effective in all cases and we may suffer significant reputation harm for any misconduct by our employees.

**Risks associated with regulatory impact on capital markets.**

Highly publicized financial scandals in recent years have led to investor concerns over the integrity of the U.S. financial markets and have prompted Congress, the SEC, the NYSE, and FINRA to significantly expand corporate governance and public disclosure requirements. To the extent that private companies, in order to avoid becoming subject to these new requirements, decide to forgo initial public offerings, our equity underwriting business may be adversely affected. In addition, provisions of the Sarbanes-Oxley Act of 2002 and the corporate governance rules imposed by self-regulatory organizations have diverted many companies' attention away from capital market transactions, including securities offerings and acquisition and disposition transactions. In particular, companies that are or are planning to register their securities with the SEC or to become subject to the reporting requirements of the Securities Exchange Act of 1934 are incurring significant expenses in complying with the SEC and accounting standards relating to internal control over financial reporting, and companies that disclose material weaknesses in such controls under the new standards may have greater difficulty accessing the capital markets. These factors, in addition to adopted or proposed accounting and disclosure changes, may have an adverse effect on the business.

**Financial services firms have been subject to increased scrutiny over the last several years, increasing the risk of financial liability and reputation harm resulting from adverse regulatory actions.**

Firms in the financial services industry have been operating in a differentiated and difficult regulatory environment. The industry has experienced increased scrutiny from a variety of regulators, including the SEC, the NYSE, FINRA and state attorneys general. Penalties and fines sought by regulatory authorities have increased substantially over the last several years. This regulatory and enforcement environment has created uncertainty with respect to a number of transactions that had historically been entered into by financial services firms and that were generally believed to be permissible and appropriate. We may be adversely affected by changes in the interpretation or enforcement of existing laws and rules by these governmental authorities and self-regulatory organizations. We also may be adversely affected as a result of new or revised legislation or regulations imposed by the SEC and other United States or foreign governmental regulatory authorities or self-regulatory organizations that supervise the financial markets. Among other things, we could be fined, prohibited from engaging in some of our business activities or subjected to limitations or conditions on our business activities. Substantial legal liability or significant regulatory action against us could have material adverse financial effects or cause significant reputation harm to us, which could seriously harm our business prospects.

In addition, financial services firms are subject to numerous conflicts of interests or perceived conflicts. The SEC and other federal and state regulators have increased their scrutiny of potential conflicts of interest. We have adopted various policies, controls and procedures to address or limit actual or perceived conflicts and regularly seek to review and update our policies, controls and procedures. However, appropriate dealing with conflicts of interest is complex and difficult and our reputation could be damaged if we fail, or appear to fail, to deal appropriately with conflicts of interest. Our policies and procedures to address or limit actual or perceived conflicts may also result in increased costs, additional operational personnel and increased regulatory risk. Failure to adhere to these policies and procedures may result in regulatory sanctions or client litigation. For example, the research areas of investment banks have been and remain the subject of heightened regulatory scrutiny which has led to increased restrictions on the interaction between equity research analysts and investment banking personnel at securities firms. Several securities firms in the United States reached a global settlement in 2003 and 2004 with certain federal and state securities regulators and self-regulatory organizations to resolve investigations into equity research analysts' alleged conflicts of interest. Under this settlement, the firms have been subject to certain restrictions and undertakings, which have imposed additional costs and limitations on the conduct of our businesses.

Financial service companies have experienced a number of highly publicized regulatory inquiries concerning market timing, late trading and other activities that focus on the mutual fund industry. These inquiries have resulted in increased scrutiny within the industry and new rules and regulations for mutual funds, investment advisers, and broker-dealers.

**Risks Related to Ownership of Our Common Stock**

**Investor interest in our firm may be diluted due to issuance of additional shares of common stock.**

Our Board of Directors has the authority to issue up to 300,000,000 shares of common stock and to issue options and warrants to purchase shares of our common stock without shareholder approval in certain circumstances. Future issuance of additional shares of our common stock could be at values substantially below the price at which you may purchase our stock and, therefore, could represent substantial dilution. In addition, our Board of Directors could issue large blocks of our common stock to fend off unwanted tender offers or hostile takeovers without further shareholder approval.

The table below represents a list of potentially dilutive securities outstanding as of:

| | December 31, | |
|---|---|---|
| | 2014 | 2013 |
| Series D convertible preferred stock warrants | - | 112,927 |
| Series E convertible preferred stock warrants | 113,741 | 113,741 |
| Stock options | 865,704 | 425,029 |
| Warrants issued in connection with secured promissory notes | 13,495 | 13,495 |
| Warrants issued in connection with recapitalization | 1,164,530 | 1,164,530 |
| Other outstanding warrants | 274,236 | 33,661 |
| Potentially dilutive securities oustanding | 2,431,706 | 1,863,383 |

In addition to the potentially dilutive securities listed above, the total number of common shares outstanding as of March 24, 2015

was 4,518,633.

The exercise of the outstanding options and warrants would dilute the then-existing shareholders' percentage ownership of our common stock. Any sales resulting from the exercise of options and warrants in the public market could adversely affect prevailing market prices for our common stock. Moreover, our ability to obtain additional equity capital could be adversely affected since the holders of outstanding options and warrants may exercise them at a time when we would also wish to enter the market to obtain capital on terms more favorable than those provided by such options and warrants. We lack control over the timing of any exercise or the number of shares issued or sold if exercises occur.

**A significant percentage of our outstanding common stock is owned or controlled by senior members of our firm and other employees and their interests may differ from those of other shareholders.**

Our executive officers and directors, and entities affiliated with them, currently control approximately 52% of our outstanding common stock including exercise of their options and associated warrants. These shareholders, if they act together, will be able to exercise substantial influence over all matters requiring approval by our shareholders, including the election of directors and approval of significant corporate transactions. This concentration of ownership may also have the effect of delaying or preventing a change in control of us and might affect the market price of our common stock.

**Provisions of the organizational documents may discourage an acquisition of us.**

In addition, the Delaware General Corporation Law contains provisions that may enable our management to retain control and resist a takeover of the Company. These provisions generally prevent us from engaging in a broad range of business combinations with an owner of 15% or more of our outstanding voting stock for a period of three years from the date that such person acquires his or her stock. Accordingly, these provisions could discourage or make more difficult a change in control or a merger or other type of corporate reorganization even if it could be favorable to the interests of our shareholders.

**The market price of our common stock may decline.**

The market price of our common stock has in the past been, and may in the future continue to be, volatile. A variety of events may cause the market price of our common stock to fluctuate significantly, including:

- variations in quarterly operating results;
- announcements of significant contracts, milestones, and acquisitions;
- relationships with other companies;
- ability to obtain needed capital commitments;
- additions or departures of key personnel;
- sales of common and preferred stock, conversion of securities convertible into common stock, exercise of options and warrants to purchase common stock, or termination of stock transfer restrictions;
- general economic conditions, including conditions in the securities brokerage and investment banking markets;
- changes in financial estimates by securities analysts; and
- fluctuations in stock market price and trading volume.

Many of these factors are beyond our control. Any one of the factors noted herein could have an adverse effect on the value of our common stock. Declines in the price of our stock may adversely affect our ability to recruit and retain key employees, including our senior professionals.

In addition, the stock market in recent years has experienced significant price and volume fluctuations that have particularly affected the market prices of equity securities of many companies and that often have been unrelated to the operating performance of such companies. These market fluctuations have adversely impacted the price of our common stock in the past and may do so in the future.

**Your ability to sell your shares may be restricted because there is a limited trading market for our common stock.**

An active trading market in our stock has been limited. Accordingly, you may not be able to sell your shares when you want or at the price you want.

**We do not expect to pay any cash dividends on our common stock in the foreseeable future.**

We do not anticipate paying cash dividends on our common stock in the foreseeable future. Accordingly, our common stock shareholders must rely on sales of their shares of common stock after price appreciation, which may never occur, as the primary means to realize any future gains on an investment in our common stock. Investors seeking cash dividends should not purchase our common stock.

**Item 1b. Unresolved Staff Comments**

None.

**Item 2. Properties**

As of December 31, 2014, all of our real estate properties are leased. Our principal offices are located in San Francisco, CA and New York City, NY. We believe the facilities we are now using are adequate and suitable for business requirements.

**Item 3. Legal Proceedings**

From time to time, the Company is involved in ordinary routine litigation incidental to our business. Currently, there are no litigations against the Company.

Certain conditions may exist as of the date the consolidated financial statements are issued, which may result in a loss to the Company, but which will only be resolved when one or more future events occur or fail to occur. The Company assesses such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company, or un-asserted claims that may result in such proceedings, the Company evaluates the perceived merits of any legal proceedings or un-asserted claims, as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company’s consolidated financial statements. If the assessment indicates that a potentially material loss contingency is not probable, but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability and an estimate of the range of possible losses, if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed, unless they involve guarantees, in which case the guarantees would be disclosed. There can be no assurance that such matters will not materially and adversely affect the Company’s business, financial position, and results of operations or cash flows.

**Item 4. Mine Safety Disclosures**

Not applicable.

## PART II

### Item 5. Market for Registrant's Common Stock and Related Stockholder Matters

Our common stock is listed on the OTCQX, where it currently trades under the symbol "MERR." The following table sets forth the range of the high and low sales prices per share of our common stock for the fiscal quarters indicated.

| | High | Low |
|---|---|---|
| 2014 | | |
| Fourth Quarter | $2.60 | $1.70 |
| Third Quarter | $4.00 | $2.55 |
| Second Quarter | $4.50 | $3.00 |
| First Quarter | $4.50 | $2.70 |
| 2013 | | |
| Fourth Quarter | $4.50 | $1.80 |
| Third Quarter | $6.00 | $3.00 |
| Second Quarter | $8.40 | $2.70 |
| First Quarter | $7.80 | $1.50 |

The closing sale price for the common stock on March 24, 2015 was $1.32. The market price of our common stock has fluctuated significantly and may be subject to significant fluctuations in the future. See Item 1A – "Risk Factors."

According to the records of our transfer agent, we had 195 shareholders of record as of December 31, 2014. Since many shares are held by brokers and other institutions on behalf of shareholders, we are unable to estimate the total number of beneficial shareholders represented by these record holders.

Our policy is to reinvest earnings in order to fund future growth. Therefore, we have not paid, and currently do not plan to declare, dividends on our common stock.

***Recent Issuance of Unregistered Securities***

None

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*The following discussion and analysis should be read in conjunction with our consolidated financial statements and the notes thereto in Part II, Item 8 to this Annual Report on Form 10-K. This discussion contains forward-looking statements reflecting our current expectations. Actual results and the timing of events may differ significantly from those projected in forward- looking statements due to a number of factors, including those set forth in Item 1A "Risk Factors" of this Annual Report on Form 10-K.*

**Overview**

Merriman Holdings, Inc. and subsidiaries (the Company) is a financial services holding company that provides capital markets advisory and research, corporate and investment banking services through its wholly-owned operating subsidiary, Merriman Capital, Inc. (hereafter MC). MC is an investment bank and securities broker-dealer whose clients are fast growing public and private companies and the entrepreneurs who manage those companies. MC facilitates efficient capital formation through a proprietary Digital Capital network (DCN). MC is registered with the Securities and Exchange Commission (SEC) as a broker-dealer and is a member of the Financial Industry Regulatory Authority (FINRA) and Securities Investor Protection Corporation (SIPC).

Our mission is to be the leader in advising, financing, trading and investing in fast-growing companies under $1 billion in market capitalization. We originate differentiated equity research, brokerage and trading services primarily to institutional investors, as well as investment banking and advisory services to our fast-growing corporate clients.

We recognize that there is an opportunity to build an institutional quality, fully compliant platform to streamline the incredibly inefficient process of fundraising for and advising emerging companies. We have since launched the DCN, an online capital marketplace. We are now a financial technology company focused on taking a significant role in changing how high growth emerging public and private companies are funded.

With DCN, we are creating a turnkey solution for investors to screen dozens of investment opportunities across multiple investment strategies, sectors, deal sizes and locations. By increasing the number of investment opportunities available to them, institutions and family offices will be able to focus on evaluating deals rather than sourcing them. As a result, they will be able to make better investment decisions and improve the diversification of their portfolios. DCN also enables issuers with the ability to have their deals viewed immediately by dozens of qualified investors, something that previously would have taken months of travel, lengthy conference calls, and expensive road shows.

MC's Financial Entrepreneur Platform (FEP) exclusively supports highly ethical, independent investment bankers, respected research professionals and wealth managers and their clients. Many of our FEP members have recently gained independence from large and mid-tier investment banks, and are now looking for a platform where they can grow their own practice and brand within a compliant, professional and synergistic financial service environment. We currently have 30 professionals with experience in the major verticals and can advise on most structures. This variable cost model allows us to service our clients while keeping our operational expenses down.

We are headquartered in San Francisco, CA with an additional office in New York, NY. As of December 31, 2014, we had 31 employees.

**Executive Summary**

Our total revenues increased by 60% to approximately $15,928,000 in 2014 from approximately $9,960,000 in 2013. Net loss for 2014 was 59% less than that of 2013. Our 2014 net cash provided by operating activities was approximately $356,000 primarily due to a reduction in net operating loss and decrease in our securities positions.

*Commissions* – Commission revenue from institutional brokerage business increased by 27% to approximately $5,319,000 in 2014 from approximately $4,202,000 in 2013. The increase was primarily due to the hiring of two producers and increased production of the existing producers as a result of favorable market conditions. The brokerage business continues to face increasing challenges, including the proliferation of electronic communication networks which have reduced commission rates and profitability in the brokerage industry. Many large investment banks have responded to lower margins within their equity brokerage divisions by reducing research coverage, particularly for smaller companies, consolidating sales and trading services, and reducing headcount of sales and trading professionals.

*Principal Transactions* – Principal transactions increased 354% to approximately $548,000 in 2014 from a net loss of approximately $215,000 in 2013. The increase was due to trading gains, increased trading volume and favorable mark to market as a result of favorable market conditions. Principal transaction revenues consist of customer principal trades, profits from our market making and proprietary trading activities, and unrealized gain / (loss) on trading inventory and securities received in connection with certain investment banking transactions.

Our marketable security positions are accounted for on a trade date basis and marked to market value daily. Returns from market making and proprietary trading activities tend to be more volatile than those from customer agency and principal activities.

*Investment Banking* – Our investment banking revenues, including FEP's, increased 106% to $7,994,000 in 2014 from $3,887,000 in 2013. The increase is comprised of a $2,979,000 or 150% increase in FEP's revenues and a $1,127,000 or 83% increase in internal investment banking revenues. Increase in investment banking revenues was primarily due to increased fees from two existing producers and the addition of two producing groups in 2014.

*Other Revenues* – MC offers services to sponsor companies on the Domestic and International OTCQX markets. This offering has been designed to enable domestic and non-U.S. companies to obtain greater exposure to U.S. institutional investors without the expense and regulatory burdens of listing on traditional U.S. exchanges. The Domestic and International OTCQX market tiers do not require full SEC registration or Sarbanes Oxley compliance. Listing on the market requires the sponsorship of a qualified investment bank called a Designated Advisor for Disclosure (DAD) for domestic companies or a Principal American Liaison (PAL) for non-U.S. companies. MC was the first U.S.

investment bank to achieve DAD and PAL designations. Revenues earned from these activities were flat from year to year.

*Employees* – At December 31, 2014 and 2013, the Company had 31 and 29 employees, respectively.

*Business Developments* – We continue to invest in business areas that we believe will increase the awareness of our franchise and contribute to future revenue opportunities such as hosting investor conferences, introducing management teams of fast-growing companies to institutional investors, marketing, and other business development activities. We continue to implement cost cutting measures in 2014. We expect significant improvements in our operating results to be primarily driven by increases in our various revenue sources.

**Results of Operations**

The following table sets forth the results of operations for the years ended December 31, 2014 and 2013:

| | Year Ended December 31, 2014 | 2013 |
|---|---|---|
| Revenues | | |
| Commissions | $5,319,002 | $4,201,980 |
| Principal transactions | 547,702 | (215,347 ) |
| Investment banking | 7,993,533 | 3,887,147 |
| Advisory and other | 2,067,959 | 2,086,127 |
| Total revenues | 15,928,196 | 9,959,907 |
| Operating expenses | | |
| Compensation and benefits | 12,411,925 | 8,024,014 |
| Brokerage and clearing fees | 442,590 | 440,098 |
| Professional services | 501,821 | 383,989 |
| Occupancy and equipment | 1,102,984 | 1,385,377 |
| Communications and technology | 813,830 | 727,286 |
| Depreciation and amortization | 217,044 | 82,664 |
| Travel and entertainment | 290,767 | 231,122 |
| Legal services and litigation settlement expense | 51,207 | 520,200 |
| Cost of underwriting capital | 10,770 | 49,600 |
| Other | 1,016,946 | 1,345,572 |
| Total operating expenses | 16,859,884 | 13,189,922 |
| Operating loss | (931,688 ) | (3,230,015 ) |
| Interest expense | (383,002 ) | (340,381 ) |
| Amortization of debt discount | (41,914 ) | (128,326 ) |
| Loss on early extinguishment of debt | (271,322 ) | (293,347 ) |
| Net loss before income taxes | (1,627,926 ) | (3,992,069 ) |
| Income tax expense | - | - |
| Net loss | $(1,627,926 ) | $(3,992,069 ) |

Our total revenues increased by 60% to approximately $15,928,000 in 2014 from approximately $9,960,000 in 2013. Net loss for 2014 was 59% less than that of 2013.

23

***Investment Banking Revenues***

Our investment banking activities include the following:

- *Capital Raising* – Capital raising activities include private placements of equity and debt instruments and underwritten public offerings.

- *Financial Advisory* – Financial advisory activities include advisory assignments with respect to mergers and acquisitions, divestures, restructurings and spin-offs.

The following table sets forth our revenues and transaction volumes from our investment banking activities for the years ended December 31:

| | 2014 | 2013 |
|---|---|---|
| Revenues: | | |
| Capital raising | $7,184,537 | $3,196,419 |
| Financial advisory | 808,996 | 690,728 |
| Total investment banking revenues | $7,993,533 | $3,887,147 |
| Transaction Volumes: | | |
| Public offerings: | | |
| Capital underwritten participations | $2,925,000 | $93,500,000 |
| Number of transactions | 1 | 4 |
| Private placements: | | |
| Capital raised | $134,270,282 | $159,180,000 |
| Number of transactions | 19 | 14 |
| Financial advisory: | | |
| Transaction amounts | $10,000,000 | $- |
| Number of transactions | 2 | 3 |

Our investment banking revenues, including FEP's, increased 106% to $7,994,000 in 2014 from $3,887,000 in 2013. The increase is comprised of a $2,979,000 or 150% increase in FEP's revenues and a $1,127,000 or 83% increase in internal investment banking revenues. Increase in investment banking revenues was primarily due to increased fees from two existing producers and the addition of two producing groups in 2014.

During the year ended December 31, 2014, one investment banking client accounted for more than 10% of our total revenues. During the year ended December 31, 2013, no one investment banking client accounted for more than 10% of our total revenues.

***Commissions and Principal Transactions Revenue***

Our broker-dealer activities include the following:

- *Commissions* – Commissions include revenues resulting from executing stock trades for exchange-listed securities, over-the-counter securities and other transactions as agent.

- *Principal Transactions* – Principal transactions consist of a portion of dealer spreads attributed to our securities trading activities as principal in NASDAQ-listed and other securities, and include transactions derived from our activities as a market-maker. Principal transactions also include gains and losses resulting from market price fluctuations that occur while holding positions in our trading security inventory.

The following table sets forth our revenues and losses and several operating metrics which we utilize in measuring and evaluating performance and the results of our trading operations:

| | 2014 | 2013 |
|---|---|---|
| Commissions: | | |
| Commissions on institutional equities | $5,319,002 | $4,201,980 |
| | | |
| Principal transactions: | | |
| Customer principal transactions, proprietary trading and market making | $1,017,666 | $67,313 |
| Investment portfolio | (469,964) | (282,660) |
| Total principal transaction revenues | $547,702 | $(215,347) |
| Transaction volumes: | | |
| Number of shares traded | 422,024,137 | 271,991,648 |

Commission revenues were approximately $5,319,000 or 33% of total revenues in 2014, representing a $1,117,000 or 27% increase from those in 2013. The increase was primarily due to the hiring of two producers and increased production of the existing producers as a result of favorable market conditions.

Principal transaction revenues consist of four different activities – customer principal trades, market making, realized and unrealized gains and losses in our investment portfolio. As a broker-dealer, we account for all of our marketable

security positions on a trade date basis and as a result, all security positions are marked to fair market values. Returns from market making activities tend to be more volatile than acting as agent or principal for customers.

For the year ended December 31, 2014, principal transaction revenues were approximately $548,000, consisting of a $1,018,000 gain from customer principal transactions and proprietary trading and market making, partially offset by a $470,000 net loss in our investment portfolios.

For the year ended December 31, 2014, one sales professional accounted for more than 10% of total revenues (approximately $3,230,000), and no customer accounted for more than 10% of total revenues. For the year ended December 31, 2013, one sales professional accounted for more than 10% of total revenues (approximately $2,490,000), and no customer accounted for more than 10% of total revenues.

***Compensation and Benefit Expenses***

Compensation and benefits expenses represent the majority of our operating expenses and include commission payout, draws, base salaries, discretionary bonuses and stock-based compensation. Sales professionals are paid commissions based on their production. Incentive compensation varies primarily based on revenue production. Investment banking, research and support staff and executives are paid base salaries and may participate in the discretionary bonus plans. Discretionary bonuses paid to investment bankers and research analysts vary with revenue production, but also include other qualitative factors and are determined by management. Salaries, payroll taxes and employee benefits vary based primarily on overall headcount.

The following table sets forth the major components of our compensation and benefits for the years ended December 31, 2014 and 2013:

| | 2014 | 2013 |
|---|---|---|
| Incentive compensation and discretionary bonuses | $8,898,444 | $4,614,822 |
| Salaries and wages | 2,136,062 | 2,079,128 |
| Stock-based compensation | 665,680 | 642,436 |
| Payroll taxes, benefits and other | 712,350 | 687,628 |
| Total compensation and benefits | $12,412,536 | $8,024,014 |
| Total compensation and benefits as a percentage of revenues | 78 % | 81 % |
| Cash compensation and benefits as a percentage of revenues | 74 % | 74 % |

Total compensation and benefits were approximately $12,413,000 and $8,024,000 for the years ended December 31, 2014 and 2013, respectively, an increase of approximately $4,389,000 or 55%. The increase mostly consisted of a $4,284,000 or 93% increase in incentive compensation and discretionary bonuses which directly relates to the increase in revenues.

Of the total compensation and benefits for the years ended December 31, 2014 and 2013, $3,962,000 and $1,577,000 were for FEP personnel, respectively.

Incentive compensation directly correlates to commission revenues earned and discretionary bonuses primarily correlate to investment banking revenues earned. Cash compensation and benefits exclude stock-based compensation which is a non-cash expense.

26

***Operating Expenses***

Brokerage and clearing fees include trade processing expenses paid to our clearing broker, and execution fees paid to floor brokers and electronic communication networks. MC is a fully-disclosed broker-dealer which contracts a third party clearing broker to perform all of the clearance functions. The clearing broker-dealer processes and settles all of MC's customer transactions and maintains the detailed customer records. These expenses are almost entirely variable, and are based on commission revenues and trade volumes. Brokerage and clearing fees in 2014 were flat as compared to 2013 despite increases in trading volumes and commission revenues due to (a) 2013 expenses included a rebate per the clearing contract and (b) 2014 expenses included the reversal of an over-accrual in past year.

Professional service expenses include audit and accounting fees, expenses related to investment banking transactions, and various consulting fees. Professional service expenses in 2014 increased by $118,000 or 31% as compared to 2013 primarily due to (a) an employee hired in 2014 worked as a consultant for two months prior to becoming a regular employee and (b) the Company outsourced its information technology need commencing in June 2014.

Occupancy and equipment expenses include rents and related costs of our office premises, equipment, software and hardware. Occupancy expense is largely fixed in nature while equipment expense can vary somewhat in relation to our business operations. Occupancy and equipment expenses in 2014 decreased by $282,000 or 20% as compared to 2013. The decrease is comprised of (a) a $372,000 or 29% decrease in rent, office equipment and facilities related maintenance due to lower rent and facilities related maintenance expenses at the new premises, and (b) partially offset by a $89,000 or 88% increase in software expenses as a direct result of a monthly software platform licensing fee commencing in August 2014.

Communications and technology expenses include market data and quote services, voice, data and internet service fees, and data processing costs. Communications and technology expenses in 2014 increased by $87,000 or 12% as compared to 2013 due to higher market data service expenses resulting from new hires, partially offset by a prior year rebate.

Depreciation and amortization relate to the depreciation of our fixed assets and amortization of capital leases. Depreciation and amortization are mostly fixed in nature. The increase in 2014 of approximately $134,000, or 163% as compared to 2013 was due to a number of capital equipment leases entered into in the third quarter of 2013 and the amortization of capitalized software beginning in July 2014.

Travel and business development expenses include business development costs by our sales professionals, investment bankers and non-deal road show expenses. Non-deal road shows are meetings in which management teams of our corporate clients present directly to our institutional investors. The increase of approximately $60,000 or 26% on a

year over year basis directly related to higher investment banking revenues as more deals were closed in 2014.

Legal services and litigation settlement expenses relate to our ongoing litigations. The decrease of $469,000 in 2014 or 90% as compared to 2013 is comprised of (a) $390,000 legal settlements incurred in 2013 and (b) $79,000 decrease in legal fees due the fact that in 2014, there were no litigations against the Company.

Cost of underwriting capital in 2014 represents borrowing cost of capital to supplement MC's net capital to enable it to underwrite banking deals. Cost of underwriting capital decreased by $39,000 or 78% as compared to 2013 due to the fact that only one banking deal closed in 2014 required underwriting capital.

The following expenses are included in other operating expenses for the years ended December 31, 2014 and 2013:

| | 2014 | 2013 |
|---|---|---|
| Insurance | $328,806 | $520,518 |
| Regulatory & filing fees | 227,124 | 203,615 |
| Provision for uncollectible accounts receivable | 209,750 | 277,308 |
| Other | 250,655 | 344,131 |
| Total other operating expenses | $1,016,335 | $1,345,572 |

Other operating expenses include insurance, regulatory & filing fees, provision for uncollectible accounts receivable, investor conference and other miscellaneous expenses. The decrease of approximately $329,000 or 24% on a year over year basis was comprised of (a) a $192,000 decrease in insurance due to lower coverage and higher deductibles, (b) a $68,000 decrease in provision for uncollectible accounts receivable, (c) a $93,000 decrease in other miscellaneous expenses due to a non-recurring expense and office moving costs in 2013, partially offset by a $24,000 increase in regulatory fees due to new hires in 2014.

***Interest Income***

Interest income represents interest earned on our cash balances maintained at financial institutions.

***Amortization of Debt Discounts***

We issued various debts with stocks or warrants, for which total proceeds were allocated to individual instruments based on the relative fair values of each instrument at the time of issuance. The value of the stocks or warrants was recorded as discount on the debt and amortized over the term of the respective debt using the effective interest method.

For the years ended December 31, 2014 and 2013, amortizations of debt discounts for the remaining debt and related warrants were $42,000 and $128,000, respectively.

***Income Tax Expense***

Income tax expenses of $0 were recorded in 2014 and 2013 resulting in zero effective tax rates. The effective tax rate differs from the statutory rate primarily due to the net operating loss carry-forwards offset by a 100% valuation allowance resulting in a tax provision equal to our expected current benefit for the year.

The Company accounts for income taxes under the provisions of Accounting Standards Codification ("ASC") 740 - Income Taxes. ASC 740 requires the recognition of deferred tax assets and liabilities for both the expected impact of differences between the financial statements and tax basis of assets and liabilities and the expected future tax benefit to be derived from tax loss and tax credit carry-forwards. ASC 740 additionally requires the establishment of a valuation allowance to reflect the likelihood of realization of deferred tax assets.

**Critical Accounting Policies and Estimates**

The consolidated financial statements are prepared in accordance with U. S. GAAP, which require us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to the valuation of securities owned and deferred tax assets. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates. We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

***Revenue Recognition***

Investment banking revenue includes underwriting and private placement agency fees earned through the Company's participation in public offerings and private placements of equity and convertible debt securities and fees earned as financial advisor in mergers and acquisitions and similar transactions. Underwriting revenue is earned in securities offerings in which the Company acts as an underwriter and includes management fees, underwriting fees and selling concessions. Fee revenue relating to underwriting commitments is recorded when all significant items relating to the underwriting cycle have been completed and the amount of the underwriting revenue has been determined.

Syndicate expenses related to securities offerings in which the Company acts as underwriter or agent are deferred until the related revenue is recognized or we determine that it is more likely than not that the securities offerings will not ultimately be completed. Underwriting revenue is recorded net of related expenses. As co-manager for registered equity underwriting transactions, management must estimate the Company's share of transaction related expenses incurred by the lead manager in order to recognize revenue. Transaction-related expenses are deducted from the underwriting fee and therefore reduce the revenue that is recognized as co-manager. Such amounts are adjusted to reflect actual expenses in the period in which the Company receives the final settlement, typically 90 days following the closing of the transaction.

Merger and acquisition fees and other advisory service revenue are generally earned and recognized only upon successful completion of the engagement. Unreimbursed expenses associated with private placement and advisory transactions are recorded as expenses as incurred.

Commission revenues and related clearing expenses are recorded on a trade-date basis as security transactions occur. Principal transactions in regular-way trades are recorded on the trade date, as if they had settled. Profit and loss arising from all securities transactions entered into for the account and risk of our Company are recorded on a trade-date

basis.

***Fair Value of Financial Instruments***

Substantially all of the Company's financial instruments are recorded at fair value or contract amounts that approximate fair value. The carrying amounts of the Company's financial instruments, which include cash and cash equivalents, securities owned, restricted cash, due from clearing broker, accounts receivable, accounts payable, commissions and bonus payable, accrued expenses and other, securities sold, not yet purchased, deferred revenue, and capital lease obligations, approximate their fair values.

***Fair Value Measurement—Definition and Hierarchy***

The Company follows the provisions of Accounting Standards Codification (ASC) 820, *Fair Value Measurement and Disclosures,* for its financial assets and liabilities. Under ASC 820, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.*, the "exit price") in an orderly transaction between market participants at the measurement date.

Where available, fair value is based on observable market prices or parameters, or derived from such prices or parameters. Where observable prices or inputs are not available, valuation models are applied. These valuation techniques involve some level of management estimation and judgment, the degree of which is dependent on the price transparency for the instruments or market and the instruments' complexity. Assets and liabilities recorded at fair value in the consolidated statement of financial condition are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels, defined by ASC 820 and directly related to the amount of subjectivity associated with the inputs to fair valuation of these assets and liabilities, are as follows:

Level 1 — Unadjusted, quoted prices are available in active markets for identical assets or liabilities at the measurement date. The types of assets and liabilities carried at Level 1 fair value generally are G-7 government and agency securities, equities listed in active markets, investments in publicly traded mutual funds with quoted market prices and listed derivatives.

Level 2 — Pricing inputs (other than quoted prices included in Level 1) are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life. Fair valued assets which are generally included in this category are stock warrants for which market-based implied volatilities are available, and unregistered common stock.

Level 3 — Pricing inputs are both significant to the fair value measurement and unobservable. These inputs generally reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs to the model. Fair valued assets which are generally included in this category are stock warrants for which market-based implied volatilities are not available.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

***Stock-Based Compensation***

The Company measures and recognizes compensation expense based on estimated fair values for all stock-based awards made to employees and directors, including stock options, restricted stock and warrants. The Company estimates fair value of stock-based awards on the date of grant using the Black-Scholes option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as expense in the Company's consolidated statements of operations over the requisite service periods. Because stock-based compensation expense is based on awards that are ultimately expected to vest, stock-based compensation expense has been reduced to account for estimated forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

To calculate stock-based compensation resulting from the issuance of options, and warrants, the Company uses the Black-Scholes option pricing model, which is affected by its stock price as well as assumptions regarding a number of subjective variables. These variables include, but are not limited to the Company's expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. No tax benefits were attributed to the stock-based compensation expense because a valuation allowance was maintained for all net deferred tax assets.

***Fair Value Accounting of Equity-Based Compensation***

The Company used the Market Approach to arrive at an estimated fair value of the Company's common stock used in the Black-Scholes option pricing model to determine the fair value of the option grants made during the years ended December 31, 2014 and 2013.

The Market Approach (for determining the fair market value of the Company's common stock) is based on the economic principle of competition (i.e., in a free market, forces of demand and supply will direct the values of businesses to a particular balance). Valuation under the Market Approach entails both the application of appropriate market-based multiples selected from guideline public companies (GPCs) to parameters such as level of earnings, cash flow, revenues, invested capital or other financial factors (financial metrics) that represent the subject company's future financial performance and from cash transactions related to the sale of securities of the Company. This method is based on the idea of determination of the price at which the company will be exchanged in the public market, and is particularly useful for valuing companies that are currently profitable and expected to continue making profits in the foreseeable future.

Under the Market Approach, the Company used the following methods:

- Observable inputs from the trading of its common stock on OTCQX;

- Guidelines Public Companies' Trading Multiples Method ("GPC");

- Back Solve approach (derived from the Company's actual security transactions).

As of December 31, 2014 and 2013, the fair market value of the Company's common stock was $1.46 and $0.90 per share, respectively.

***Deferred Tax Valuation Allowance***

The Company accounts for income taxes in accordance with the provision of ASC 740, *Income Taxes*, which requires the recognition of deferred tax assets and liabilities at tax rates expected to be in effect when these balances reverse. Future tax benefits attributable to temporary differences are recognized to the extent that the realization of such benefits is more likely than not. The Company has concluded that it is not more likely than not that it will be able to realize the benefit of its deferred tax assets as of December 31, 2014 and 2013, based on the scheduling of deferred tax liabilities and projected taxable income. The amount of the deferred tax assets actually realized, however, could vary if there are differences in the timing or amount of future reversals of existing deferred tax liabilities or changes in the actual amounts of future taxable income. Should the Company determine that it will be able to realize all or part of the deferred tax asset in the future, an adjustment to the deferred tax asset will be recorded in the period such determination is made.

**Liquidity/Going Concern**

The Company incurred substantial losses in 2014 and 2013 of $1,628,000 and $3,992,000, respectively. As of December 31, 2014, the Company had an accumulated deficit of $150,537,000 and a shareholders' deficit of $102,000. These facts raise substantial doubt as to the Company's ability to continue as a going concern.

The consolidated financial statements have been prepared assuming the Company will continue on a going concern basis which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business and do not include any adjustments that might result from uncertainty about the Company's ability to continue as a going concern.

Management's plan to alleviate the going-concern uncertainty includes, but is not limited to, the issuance of equity and debt instruments for working capital. The Company's continued existence is also dependent upon its ability to increase revenues generated from operations which will enable the Company to achieve a profitable level of operations.

If anticipated operating results are not achieved, management has the intent, and believes it has the ability, to further delay or reduce expenditures. In such case, the further reduction in operating expenses might need to be substantial. Failure to generate sufficient cash flows from operations, raise additional capital, or reduce certain discretionary spending would have a material adverse effect on the Company's ability to achieve its intended business objectives. The Company can give no assurance that it will be successful in its plans and can give no assurance that additional financing will be available on terms advantageous to the existing terms or that additional financing will be available at all. Should the Company not be successful in obtaining the necessary financing to fund its operations, the Company would need to curtail certain or all of its operational activities and/or contemplate the sale of its assets if necessary.

**Contractual Obligations**

The following is a table summarizing our significant contractual obligations as of December 31, 2014, consisting of long term debt and non-cancellable payments under office, operating leases and capital leases with initial or remaining terms in excess of one year.

| Notes Payable | | Leases | | | |
|---|---|---|---|---|---|
| Unrelated | Related | Office | Operating | Capital | Total |

| | | | | | | |
|---|---|---|---|---|---|---|
| 2015 | $770,000 | $2,316,600 | $1,343,760 | $635,700 | $129,885 | $5,195,945 |
| 2016 | 50,000 | 35,000 | 1,353,354 | 37,200 | 100,499 | 1,576,053 |
| 2017 | - | 464,000 | 1,421,854 | 37,200 | 47,902 | 1,970,956 |

**Off-Balance Sheet Arrangements**

We were not a party to any off-balance sheet arrangements during the two years ended December 31, 2014. In particular, we do not have any interest in so-called limited purpose entities, which include special purpose entities and structured finance entities.

***Notes Payable –Related Party***

*Unsecured Promissory Notes*

Of the $2,065,600 Unsecured Promissory Notes, $840,000 was originally loaned from the Co Chairman of the Board of Directors, Ronald L. Chez. On September 29, 2013, the principal, together with $201,600 accrued interest were consolidated into an Unsecured Promissory Note maturing on March 29, 2014. The new note bears interest at nine percent (9%) per annum payable monthly and five percent (5%) per annum payable at maturity. On March 27, 2014, the terms of the $1,041,600 Unsecured Promissory Note were modified for the note to mature on December 31, 2014 at the same interest rates plus warrants to purchase 111,190 shares of the Company's common stock at $2.40 per share. On December 30, 2014, this note was further modified to mature on August 31, 2015 under the same terms.

The Company accounted for this transaction as a modification of debt, whereby a gain or loss was calculated as the difference between the fair value of the modified debt and net carrying value of the old debt. The fair value of the modified debt was determined as the sum of the face value of the debt and fair value of the warrants using the Black-Scholes fair value model. For the year ended December 31, 2014, a loss of approximately $262,000 was recorded on the transaction, representing the fair value of the warrants.

For the years ended December 31, 2014 and 2013, interest expenses incurred on this Unsecured Promissory Note were $146,000 and $146,000, respectively. Total interests of $73,000 and $21,000 remain outstanding as of December 31, 2014 and 2013, respectively, and are included in accrued expenses and other in the condensed consolidated statements of financial condition.

*Unsecured Convertible Promissory Notes*

On November 1, 2013, the Company's Chief Executive Officer loaned $30,000 to the Company in an unsecured convertible promissory note maturing on April 1, 2014. The note bears interest rate at five percent (5%) per annum payable at maturity. At any time following the date of issue and prior to repayment, the outstanding principal and accrued interest are convertible to common shares of the Company at $1.80 per share. On March 30, 2014, the maturity date was extended to December 31, 2014 under the same terms. On December 30, 2014, the maturity date was extended to August 31, 2015 under the same terms.

On January 15, 2014, a common shareholder who is also an employee loaned $35,000 to the Company in an unsecured convertible promissory note maturing on January 15, 2016. The note bears interest rate at five percent (5%)

per annum payable at maturity. At any time following the date of issue and prior to repayment, the outstanding principal and accrued interest are convertible to common shares of the Company at $1.80 per share.

*Secured Demand Notes*

On June 30, 2014, MC entered into two three-year secured demand notes with the Company's Chief Executive Officer and a director of the Company, Dennis G. Schmal, in the amount of $100,000 and $364,000, respectively. The notes bear interest at 8% per annum, payable quarterly. The notes comply with FINRA's prescribed regulations and are accounted for as equity subordination in accordance with SEC Rule 15c3-1(d). The notes are subordinated to the claims of present and future creditors of MC and cannot be repaid, if such repayment will cause MC to fail to meet its minimum net capital requirements in accordance with SEC Rule 15c3-1.

The notes and their corresponding liabilities are included notes receivable and notes payable to related parties, respectively, in the consolidated statements of financial condition.

For the years ended December 31, 2014 and 2013, interest expenses incurred on these secured demand notes were $19,000 and $0, respectively. Total interests of $9,000 remain outstanding as of December 31, 2014 and are included in accrued expenses and other in the consolidated statements of financial condition.

*Temporary Subordinated Borrowings*

On December 30, 2014, MC borrowed $495,000 from the Co-Chairman of the Company's Board of Directors. The loan was in the form of a temporary subordinated loan in accordance with Rule 15c3-1 of the Securities Exchange Act of 1934. Total fees incurred through December 31, 2014 were $2,970 and included in cost of underwriting capital in the consolidated statements of operations. The loan and related fees were paid in full on February 3, 2015.

On October 23, 2014, MC borrowed $300,000 from the Co-Chairman of the Company's Board of Directors. The loan was in the form of a temporary subordinated loan in accordance with Rule 15c3-1 of the Securities Exchange Act of 1934. Total fees incurred were $7,800 and were included in cost of underwriting capital in the consolidated statements of operations. The loan and related fees were paid in full on November 5, 2014.

*Equity Lending Note*

On August 31, 2012, the Company's Chief Executive Officer loaned $175,000 to the Company in a three year secured equity lending note (the "Equity Lending Note") at an interest rate of eight percent (8%) per annum payable quarterly in arrears. This note is secured by a security interest in and right of setoff against all of the Company's right, title and interest in and to all of the capital stock of Merriman Capital Inc., together with all proceeds, rents, profits and returns of and from any of the foregoing. Additional consideration in the form of 69,444 warrants to purchase common shares of the Company at $18.90 per share was issued to the lender. The warrants expire on August 31, 2015.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the Equity Lending Note was $13,000 which was recorded as a discount on the debt and applied against the Equity Lending Note. The note collateral has a carrying value of $175,000 and is included in other assets in the consolidated statement of financial condition as of December 31, 2014.

*Secured Promissory Notes*

On August 31, 2012, the Company's Co-Chairman of the Board of Directors loaned $250,000 to the Company in a three year secured promissory note (the "August 2012 Secured Promissory Note") at an interest rate of eight percent (8%) per annum payable quarterly in arrears. This note is secured by a security interest in and right of setoff against all of the Company's right, title and interest in and to all of the capital stock of Merriman Capital Inc., together with all proceeds, rents, profits and returns of and from any of the foregoing. Additional consideration in the form of 99,206 warrants to purchase common shares of the Company at $0.63 per share was issued to the lender. The warrants expire on August 31, 2015.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the August 2012 Secured Promissory Note was $19,000 which was recorded as a discount on the debt and applied against the August 2012 Secured Promissory Note.

On September 27, 2012, the Company's Co-Chairman of the Board of Directors loaned $125,000 to the Company in a three year secured promissory note (the "September 2012 Secured Promissory Note") at an interest rate of eight percent (8%) per annum payable quarterly in arrears. This note is secured by a security interest in and right of setoff against all of the Company's right, title and interest in and to all of the capital stock of Merriman Capital Inc., together with all

proceeds, rents, profits and returns of and from any of the foregoing. Additional consideration in the form of 236,250 warrants to purchase common shares of the Company at $0.63 per share was issued to the lender. The warrants expire on September 27, 2015.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the September 2012 Secured Promissory Note was $45,000 which was recorded as a discount on the debt and applied against the September 2014 Secured Promissory Note.

On December 13, 2012, the Co-Chairman of the Board of Directors loaned $200,000 to the Company in a secured promissory note (the "December 2012 Secured Promissory Note") maturing on September 13, 2013 and bearing interest rates at eight percent (8%) per annum payable at maturity. The December 2012 Secured Promissory Note was extended a few times maturing on August 31, 2015. Effective on September 26, 2013, interest rate increased to ten percent (10%) per annum payable at maturity. Additional consideration included 625,000 warrants to purchase the Company common stock at $2.40 per share.

On September 12, 2013 the Co-Chairman of the Board of Directors loaned $166,028 to the Company in a secured promissory note maturing on February 7, 2014, bearing interest rates at ten percent (10%) per annum payable at maturity. Principal amount and accrued interest were paid in full on January 23, 2014.

*Software Platform Purchase*

In December 2013, the Company purchased a software platform called Digital Capital Network (“DCN”), an online capital marketplace, from an entity owned by a member of the Board of Directors, Robert K. Ward. The purchase price consisted of $160,000 cash and 88,164 shares of the Company’s common stock valued at $1.80 per share at the time of issuance.  The Company also entered into a licensing agreement to pay the entity owned by Robert K. Ward $18,000 a month.

For the years ended December 31, 2014 and 2013, cash payments made to the entity owned by Robert K. Ward were $218,000 and $184,400, respectively.

*Other Related Party Transactions*

On June 17, 2014, MC sold 1 share of common stock each to the Company’s Chief Executive Officer and Chairman of the Audit Committee for $96.00 per share.

From time to time, officers and employees of the Company may invest in private placements which the Company arranges and for which the Company charges investment banking fees. The Company’s employees may, at times, provide certain services and supporting functions to its affiliate entities. The Company is not reimbursed for any costs related to providing those services.

**Item 7a. Quantitative and Qualitative Disclosures about Market Risk**

The following discussion about market risk disclosures involves forward-looking statements. Actual results could differ materially from those projected in the forward-looking statements. We may be exposed to market risks related to changes in equity prices, interest rates and foreign currency exchange rates. We do not use derivative financial instruments for speculative trading or any other purpose.

***Equity Price Risk***

The potential for changes in the market value of our trading positions is referred to as “market risk.” Our trading positions result from proprietary trading activities. These trading positions in individual equities and equity indices may be either long or short at any given time. Equity price risks result from exposures to changes in prices and volatilities of individual equities and equity indices. We seek to manage this risk exposure through diversification and limiting the size of individual positions within the portfolio. The effect on earnings and cash flows of an immediate 10% increase or decrease in equity prices generally is not ascertainable and could be positive or negative, depending on the positions we hold at the time. We do not establish hedges in related securities or derivatives. From time to time, we also hold equity securities received as compensation for our services in investment banking transactions. These equity positions are always long; however, as the prices of individual equity securities do not necessarily move in tandem with the direction of the general equity market, the effect on earnings and cash flows of an immediate 10% increase or decrease in equity prices generally is not ascertainable.

***Interest Rate Risk***

Our exposure to market risk resulting from changes in interest rates relates primarily to our investment portfolio and long term debt obligations. Our interest income and cash flows may be impacted by changes in the general level of U.S. interest rates. We do not hedge this exposure because we believe that we are not subject to any material market risk exposure due to the short-term nature of our investments. We would not expect an immediate 10% increase or decrease in current interest rates to have a material effect on the fair market value of our investment portfolio.

***Foreign Currency Risk***

We do not have any foreign currency denominated assets or liabilities or purchase commitments and have not entered into any foreign currency contracts. Accordingly, we are not exposed to fluctuations in foreign currency exchange rates.

**Item 8. Financial Statements and Supplementary Data**

The following financial statements are included in this report:

- Report of Independent Registered Public Accounting Firm
- Consolidated Statements of Operations
- Consolidated Statements of Financial Condition
- Consolidated Statements of Shareholders' Deficit
- Consolidated Statements of Cash Flows
- Notes to Consolidated Financial Statements

Schedules other than those listed above are omitted because of the absence of conditions under which they are required or because the required information is presented in the financial statements or notes thereto.

**Report of Independent Registered Public Accounting Firm**

To the Audit Committee of the

Board of Directors and Shareholders

of Merriman Holdings, Inc.

We have audited the accompanying consolidated statements of financial condition of Merriman Holdings, Inc. (the "Company") as of December 31, 2014 and 2013, and the related consolidated statements of operations, statements of shareholders' deficit and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal controls over financial reporting. Our audit included consideration of internal controls over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal controls over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Merriman Holdings, Inc. as of December 31, 2014 and 2013, and the results of its operations and cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2 to the consolidated financial statements, the Company has recurring losses, negative cash flows from operations and an accumulated deficit as of December 31, 2014 and 2013. These conditions raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 2. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

## 1. Description of Business

Merriman Holdings, Inc. and subsidiaries (the Company) is a financial services holding company that provides capital markets advisory and research, corporate and investment banking services through its wholly-owned operating subsidiary, Merriman Capital, Inc. (hereafter MC). MC is an investment bank and securities broker-dealer whose clients are fast growing public and private companies and the entrepreneurs who manage those companies. MC facilitates efficient capital formation through a proprietary digital network (DCN). MC is registered with the Securities and Exchange Commission (SEC) as a broker-dealer and is a member of the Financial Industry Regulatory Authority (FINRA) and Securities Investor Protection Corporation (SIPC).

The Company is a Delaware corporation incorporated on May 6, 1987. The Company’s common stock is listed on the OTCQX where it currently trades under the symbol “MERR.” The Company’s corporate office is located in San Francisco, CA with an additional office in New York, NY.

COR Clearing LLC became the Company’s clearing broker effective March 16, 2015.

## 2. Liquidity/Going Concern

The Company incurred substantial losses in 2014 and 2013, having net losses of $1,628,000 and $3,992,000, respectively. As of December 31, 2014, the Company had an accumulated deficit of $150,537,000 and a shareholders’ deficit of $102,000. These facts raise substantial doubt as to the Company’s ability to continue as a going concern.

The consolidated financial statements have been prepared assuming the Company will continue on a going concern basis which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business and do not include any adjustments that might result from uncertainty about the Company’s ability to continue as a going concern.

Management's plan to alleviate the going-concern uncertainty includes, but is not limited to, the issuance of equity and debt instruments for working capital. The Company's continued existence is also dependent upon its ability to increase revenues generated from operations which will enable the Company to achieve a profitable level of operations.

If anticipated operating results are not achieved, management has the intent, and believes it has the ability, to further delay or reduce expenditures. In such case, the further reduction in operating expenses might need to be substantial. Failure to generate sufficient cash flows from operations, raise additional capital, or reduce certain discretionary spending would have a material adverse effect on the Company's ability to achieve its intended business objectives. The Company can give no assurance that it will be successful in its plans and can give no assurance that additional financing will be available on terms advantageous to the existing terms or that additional financing will be available at all. Should the Company not be successful in obtaining the necessary financing to fund its operations, the Company would need to curtail certain or all of its operational activities and/or contemplate the sale of its assets if necessary.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**3. Summary of Significant Accounting Policies**

***Principles of Consolidation***

As of December 31, 2014 and 2013, the Company has two U.S. subsidiaries. The subsidiaries, MC and Merriman Asset Management, Inc. have been consolidated in the accompanying consolidated financial statements. All significant intercompany accounts and transactions have been eliminated.

***Segment Reporting***

Currently, the Company’s business results are categorized into three operating segments: MC, Financial Entrepreneurial Platform (FEP) and Capital Market Advisory Services (CMAG). FEP is an investment banking division assisting corporate issuers in raising capital through a network of independent investment bankers. CMAG is its capital market advisory services assisting clients to obtain listing on OTCQX, a tier of Pink Sheets.

The Company's reportable segments are strategic business units that offer products and services which are compatible with its core business strategy. The MC segment includes a broad range of services, such as capital raising and financial advisory services for corporate clients, and brokerage and equity research services for our institutional investor clients. The FEP segment includes capital raising services through a network of independent investment bankers and CMAG includes assisting corporate issuers in listing on OTCQX, the premier OTC Market tier, along with other services that facilitate the access to institutional capital markets.

The Company recognizes revenues earned by FEP on a gross basis in accordance with ASC 605-45, *Revenue Recognition: Principal Agent Considerations*, as the Company is the primary obligor in the arrangements entered into by FEP. Revenues earned by FEP are recognized consistent with the Company’s revenue recognition policies as disclosed herein.

***Use of Estimates***

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. Actual results could differ from those estimates. Significant estimates include stock-based compensation, allowance for the deferred tax asset and the Company’s Level 3 securities.

***Subsequent Events***

Under Accounting Standards Codification (ASC) 855, *Subsequent Events*, the Company has evaluated all subsequent events until the date these consolidated financial statements were filed with the SEC.

***Reclassifications***

Certain reclassifications have been made to the prior year’s consolidated financial statements to conform to the presentation of the current year’s consolidated financial statements. There were no changes to reported net loss.

***Reverse Stock Split***

The Company announced a reverse stock split which became effective on July 14, 2014. The ratio of the reverse stock split is 1-for-30 shares of the Company's issued and outstanding common stock. Accordingly, each 30 shares of common stock have been converted into one share of common stock. The consolidated financial statements have been restated to reflect the reverse stock split for all periods presented herein.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**3. Summary of Significant Accounting Policies (continued)**

***Cash and Cash Equivalents***

The Company considers all highly liquid investments purchased with original maturities of ninety days or less to be cash equivalents.

***Restricted Cash***

Restricted cash as of December 31, 2014 included cash on deposit with the Company’s clearing organization.

***Due From/To Clearing Broker***

The Company clears all of its brokerage transactions through a clearing broker on a fully disclosed basis. Due from clearing broker amount relates to the aforementioned transactions. The Company monitors the credit standing of the clearing organizations as deemed necessary.

COR Clearing LLC became the Company’s clearing broker effective March 16, 2015.

***Securities Owned***

Securities owned and securities sold, not yet purchased in the consolidated statements of financial condition consist of financial instruments carried at fair value with related unrealized gains or losses recognized in principal transactions in the consolidated statement of operations. The securities owned are classified into "Marketable" and "Non-marketable." Marketable securities are those that can readily be sold, either through a stock exchange or through a direct sales arrangement. Non-marketable securities are typically securities restricted under the Federal Securities Act of 1933 provided by SEC Rule 144 (Rule 144) or have some restriction on their sale whether or not a buyer is identified.

***Fair Value of Financial Instruments***

Substantially all of the Company's financial instruments are recorded at fair value or contract amounts that approximate fair value. The carrying amounts of the Company's financial instruments, which include cash and cash equivalents, restricted cash, due from clearing broker, accounts receivable, accounts payable, commission and bonus payable, accrued expenses and other, securities sold, not yet purchased, deferred revenue, and capital lease obligation, approximate their fair values.

***Fair Value Measurement—Definition and Hierarchy***

The Company follows the provisions of ASC 820, *Fair Value Measurement and Disclosures,* for its financial assets and liabilities. Under ASC 820, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.*, the "exit price") in an orderly transaction between market participants at the measurement date.

Where available, fair value is based on observable market prices or parameters, or derived from such prices or parameters. Where observable prices or inputs are not available, valuation models are applied. These valuation techniques involve some level of management estimation and judgment, the degree of which is dependent on the price transparency for the instruments or market and the instruments' complexity. Assets and liabilities recorded at fair value in the consolidated statement of financial condition are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels, defined by ASC 820 and directly related to the amount of subjectivity associated with the inputs to fair valuation of these assets and liabilities, are as follows:

Level 1 — Unadjusted, quoted prices are available in active markets for identical assets or liabilities at the measurement date. The types of assets and liabilities carried at Level 1 fair value generally are G-7 government and agency securities, equities listed in active markets, investments in publicly traded mutual funds with quoted market prices and listed derivatives.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**3. Summary of Significant Accounting Policies (continued)**

***Fair Value Measurement—Definition and Hierarchy (continued)***

Level 2 — Pricing inputs (other than quoted prices included in Level 1) are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life. Fair valued assets which are generally included in this category are stock warrants for which market-based implied volatilities are available, and unregistered common stock.

Level 3 — Pricing inputs are both significant to the fair value measurement and unobservable. These inputs generally reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs to the model. Fair valued assets which are generally included in this category are stock warrants for which market-based implied volatilities are not available.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

For further information on financial assets and liabilities that are measured at fair value on a recurring and nonrecurring basis, and a description of valuation techniques, see Note 6.

***Accounts Receivable, Allowance for Doubtful Accounts***

Accounts receivable are recorded at the invoiced amount and do not bear interest. To the extent deemed necessary, the Company maintains an allowance for estimated losses from the inability of clients to make required payments. The collectability of outstanding invoices is continually assessed. In estimating the allowance for doubtful accounts, the Company considers factors such as historical collections, a client's current creditworthiness, age of the receivable balance and general economic conditions that may affect a client's ability to pay.

At December 31, 2014 and 2013, the allowance for doubtful accounts was $132,750 and $0, respectively.

***Equipment and Fixtures***

Equipment and fixtures are reported at historical cost, net of accumulated depreciation and amortization. Depreciation and amortization are computed using the straight-line method over useful lives of three to five years. Leasehold improvements are amortized using the straight-line method over the lesser of the life of the lease or the service lives of the improvements. Maintenance and repairs are charged to expenses as incurred; costs of major additions and betterments that extend the useful lives of the assets are capitalized. When assets are retired or otherwise disposed of, the costs and related accumulated depreciation or amortization are removed from the accounts and any gain or loss on disposal is recognized.

***Long-Lived Assets***

The Company evaluates its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. When assets are considered to be impaired, the impairment to be recognized is measured as the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**3. Summary of Significant Accounting Policies (continued)**

***Commission and Principal Transaction Revenues***

Commission revenues include revenues resulting from executing stock exchange-listed securities, over-the-counter securities, and other transactions as agent for the Company's clients. Principal transactions consist of a portion of dealer spreads attributed to the Company's securities trading activities as principal in exchange-listed and other securities, and include transactions derived from activities as a market-maker. Additionally, principal transactions include gains and losses resulting from market price fluctuations that occur while holding positions in trading security inventory. Commission revenues and related clearing expenses are recorded on a trade-date basis as security transactions occur.

Principal transactions in regular-way trades (i.e., trades settled through normal channels in three business days) are recorded on the trade date, as if they had settled. Profits and losses arising from all securities transactions entered into for the account and at the risk of the Company are recorded on a trade-date basis.

***Investment Banking Revenues***

Investment banking revenues include underwriting and private placement agency fees earned through the Company's participation in public offerings and private placements of equity and convertible debt securities and fees earned as financial advisor in mergers and acquisitions and similar transactions. Underwriting revenues are earned in securities offerings in which the Company acts as an underwriter and includes management fees, underwriting fees and selling concessions. Fee revenues relating to underwriting commitments are recorded when all significant items relating to the underwriting cycle have been completed and the amount of the underwriting revenues has been determined.

Syndicate expenses related to securities offerings in which the Company acts as underwriter or agent are deferred until the related revenues are recognized or we determine that it is more likely than not that the securities offerings will ultimately not be completed. Underwriting revenues are recorded net of related expenses. As co-manager for

registered equity underwriting transactions, management must estimate the Company’s share of transaction related expenses incurred by the lead manager in order to recognize revenue. Transaction-related expenses are deducted from the underwriting fees and therefore reduce the revenues that are recognized as co-manager. Such amounts are adjusted to reflect actual expenses in the period in which the Company receives the final settlement, typically 90 days following the closing of the transaction.

Transaction-related expenses are deducted from the underwriting fee and, therefore, reduce the revenue that is recognized as co-manager. Such amounts are adjusted to reflect actual expenses in the period in which the Company receives the final settlement, typically 90 days following the closing of the transaction.

Merger and acquisition fees and other advisory service revenues are generally earned and recognized only upon successful completion of the engagement. Unreimbursed expenses associated with private placement and advisory transactions are recorded as expenses as incurred.

***Other Revenues and Deferred Revenues***

Other revenues consist primarily of revenues generated from capital market advisory services. The Company provides capital market advisory services in the form of assistance to its clients in listing on OTCQX, the premier OTC Market tier, along with other services that facilitate their access to institutional capital markets. Since 2013, the Company has repositioned its service offerings and fee structure for OTCQX. Capital market advisory service revenues are primarily recognized on a straight-line basis from the completion of the due diligence until the end of the engagement term, which is generally one year.

Deferred revenues mainly represent customer billings made in advance to certain clients for due diligence services, and annual support contract for providing services as their Principal American Liaison (PAL) if a non-U.S. company or a Designated Advisor for Disclosure (DAD), if a U.S. company.

In addition, other nominal amounts, which do not conform to the types described above, are also recorded as other revenues.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**3. Summary of Significant Accounting Policies (continued)**

***Stock-Based Compensation Expense***

The Company measures and recognizes compensation expense based on estimated fair values for all stock-based awards granted to employees and directors, including stock options, restricted stock, and warrants. The Company estimates fair value of stock-based awards on the date of grant using the Black-Scholes option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as expense in the Company's condensed consolidated statements of operations over the requisite service periods. Because stock-based compensation expense is based on awards that are ultimately expected to vest, stock-based compensation expense has been reduced to account for estimated forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

To calculate stock-based compensation resulting from the issuance of options and warrants, the Company uses the Black-Scholes option pricing model, which is affected by the Company's stock price as well as assumptions regarding a number of subjective variables. These variables include, but are not limited to the Company's expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. No tax benefits were attributed to the share-based compensation expense because a valuation allowance was maintained for all net deferred tax assets.

***Fair Value Accounting of Equity-Based Compensation***

The Company used the Market Approach to arrive at an estimated fair value of the Company's common stock used in the Black-Scholes option pricing model to determine the fair value of the option grants made during the years ended December 31, 2014 and 2013.

The Market Approach (for determining the fair market value of the Company’s common stock) is based on the economic principle of competition (i.e., in a free market, forces of demand and supply will direct the values of businesses to a particular balance). Valuation under the Market Approach entails both the application of appropriate market-based multiples selected from guideline public companies (GPCs) to parameters such as level of earnings, cash flow, revenues, invested capital or other financial factors (financial metrics) that represent the subject company's future financial performance and from cash transactions related to the sale of securities of the Company. This method is based on the idea of determination of the price at which the company will be exchanged in the public market, and is particularly useful for valuing companies that are currently profitable and expected to continue making profits in the foreseeable future.

Under the Market Approach, the Company used the following methods:

- Observable inputs from the trading of its common stock on OTCQX;

- Guidelines Public Companies’ Trading Multiples Method (“GPC”);

- Back Solve approach (derived from the Company’s actual security transactions).

As of December 31, 2014 and 2013, the fair market value of the Company’s common stock was $1.46 and $0.90 per share, respectively.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**3. Summary of Significant Accounting Policies (continued)**

***Cost of Underwriting Capital***

The Company incurs fees on financing arrangements entered into to supplement underwriting capacity and working capital for the broker-dealer subsidiary. These fees are recorded as cost of underwriting capital as incurred.

***Income Taxes***

The Company accounts for income taxes under the provisions of Accounting Standards Codification ("ASC") 740 - Income Taxes. ASC 740 requires the recognition of deferred tax assets and liabilities for both the expected impact of differences between the financial statements and tax basis of assets and liabilities and the expected future tax benefit to be derived from tax loss and tax credit carry-forwards. ASC 740 additionally requires the establishment of a valuation allowance to reflect the likelihood of realization of deferred tax assets.

The Company uses the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are determined based on temporary differences between the financial statement carrying amounts and the tax basis of assets and liabilities using enacted tax rates in effect in the years in which temporary differences are expected to reverse. A valuation allowance is recorded to reduce deferred tax assets to an amount whose realization is more likely than not. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the consolidated statements of operations in the period that includes the enactment date.

***Earnings (Loss) Per Share***

Basic earnings (loss) per share is computed by dividing net income (loss) by the weighted average number of common shares outstanding, excluding shares of non-vested stock. Diluted income per share is calculated by dividing net income by the weighted average number of common shares used in the basic income per share calculation plus the number of common shares that would be issued assuming exercise or conversion of all potentially dilutive common shares outstanding, including non-vested stock. Diluted loss per share is unchanged from basic loss per share because the addition of common shares that would be issued assuming exercise or conversion would be anti-dilutive. Interests for convertible debt are also not considered since including them in the calculation of diluted loss per share would be anti-dilutive.

The table below represents a list of potentially dilutive securities outstanding as of:

| | December 31, | |
|---|---|---|
| | 2014 | 2013 |
| Series D convertible preferred stock warrants | - | 112,927 |
| Series E convertible preferred stock warrants | 113,741 | 113,741 |
| Stock options | 865,704 | 425,029 |
| Warrants issued in connection with secured promissory notes | 13,495 | 13,495 |
| Warrants issued in connection with recapitalization | 1,164,530 | 1,164,530 |
| Other outstanding warrants | 274,236 | 33,661 |
| Potentially dilutive securities oustanding | 2,431,706 | 1,863,383 |

50

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**3. Summary of Significant Accounting Policies (continued)**

***Adoption of New Accounting Pronouncements***

In August 2014, the FASB issued a new accounting standard which requires management to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern for each annual and interim reporting period. If substantial doubt exists, additional disclosure is required. This new standard will be effective for the Company for annual and interim periods beginning after December 15, 2016. Early adoption is permitted. The Company expects to adopt this new standard for the fiscal year ending December 31, 2016 and the Company will continue to assess the impact on its consolidated financial statements.

The FASB has issued ASU No. 2014-12 Compensation – Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. This ASU requires that a performance target that affects vesting, and that could be achieved after the requisite service period, be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant date fair value of the award. This update further clarifies that compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. The amendments in this ASU are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Earlier adoption is permitted. The Company is currently evaluating the effect of the ASU on its financial position, results of operations and cash flows.

The FASB has issued ASU No. 2014-09, Revenue from Contracts with Customers. This ASU supersedes the revenue recognition requirements in Accounting Standards Codification 605 - Revenue Recognition and most industry-specific guidance throughout the Codification. The standard requires that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. This ASU is effective on January 1, 2017 and should be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying the ASU recognized at the date of initial application. The Company is currently evaluating the effect of the ASU on its financial position, results of operations and cash flows.

***Notes Payable – Unrelated Party***

*Unsecured Convertible Promissory Notes*

On December 12, 2013, a common shareholder loaned $120,000 to the Company in an unsecured convertible promissory note maturing on December 12, 2015. The note bears interest rate at five percent (5%) per annum payable at maturity. At any time following the date of issue and prior to repayment, the outstanding principal and accrued interest are convertible to common shares of the Company at $1.80 per share.

On January 10, 2014, a common shareholder loaned $50,000 to the Company in the form of an unsecured convertible promissory notes maturing on January 10, 2016. The note bears interest rates at five percent (5%) per annum payable at maturity. At any time following the date of issue and prior to repayment, the outstanding principal and accrued interest are convertible to common shares of the Company at $1.80 per share.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

***Notes Payable – Unrelated Party (continued)***

*Secured Promissory Notes*

On October 30, 2014, a common shareholder loaned $100,000 to the Company in a one year secured promissory note maturing on November 1, 2015. The October 2014 Secured Promissory Note bears interest rate at twelve percent (12%) per annum payable at maturity. Additional consideration in the form of 10,000 warrants to purchase common shares of the Company at $2.50 per share was issued to the lender. The warrants expire on October 30, 2017.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the October 2014 Secured Promissory Note was $12,000 which was recorded as a discount on the debt and applied against the October 2014 Secured Promissory Note.

On April 7, 2011, a common shareholder loaned $500,000 to the Company in a three year secured promissory note maturing on April 7, 2014. The April 7, 2011 Secured Promissory Note bears interest rate at ten percent (10%) per annum payable in arrears on a quarterly basis. Additional consideration in the form of 43,000 warrants to purchase common shares of the Company at $68.595 per share was issued to the lender. The warrants expired on April 7, 2014.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the April 7, 2011 Secured Promissory Note was $77,000 which was recorded as a discount on the debt and applied against the April 7, 2011 Secured Promissory Note. The discount was fully amortized as of April 7, 2014.

On April 7, 2014, the April 7, 2011 Secured Promissory Note was extended to mature on April 7, 2015 at an interest rate of 13.5% per annum, payable in arrears on a quarterly basis. On March 24, 2015, the April 7, 2011 Secured

Promissory Note was further extended to mature on April 7, 2016 at the same interest rate and terms.

On April 21, 2011, a common shareholder loaned $50,000 to the Company in a three year secured promissory note maturing on April 21, 2014. The April 21, 2011 Secured Promissory Note bears interest rate at ten percent (10%) per annum payable in arrears on a monthly basis. Additional consideration in the form of 4,300 warrants to purchase common shares of the Company at $68.595 per share was issued to the lender. The warrants expired on April 21, 2014.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the April 21, 2011 Secured Promissory Note was $7,000 which was recorded as a discount on the debt and applied against the April 21, 2011 Secured Promissory Note. The discount was fully amortized as of April 21, 2014.

On April 21, 2014, the April 21, 2011 Secured Promissory Note was extended to mature on August 31, 2015 at the same interest rate and terms.

On December 13, 2012, an unrelated party loaned $300,000 to the Company in a six month secured promissory note at an interest rate of eight percent (8%) per annum payable at maturity. The note was extended a few times. Principal amount and accrued interest were paid in full on April 17, 2014.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

***Notes Payable –Related Party***

*Unsecured Promissory Notes*

Of the $2,065,600 Unsecured Promissory Notes, $840,000 was originally loaned from the Co Chairman of the Board of Directors, Ronald L. Chez. On September 29, 2013, the principal, together with $201,600 accrued interest were consolidated into an Unsecured Promissory Note maturing on March 29, 2014. The new note bears interest at nine percent (9%) per annum payable monthly and five percent (5%) per annum payable at maturity. On March 27, 2014, the terms of the $1,041,600 Unsecured Promissory Note were modified for the note to mature on December 31, 2014 at the same interest rates plus warrants to purchase 111,190 shares of the Company's common stock at $2.40 per share. On December 30, 2014, this note was further modified to mature on August 31, 2015 under the same terms.

The Company accounted for this transaction as a modification of debt, whereby a gain or loss was calculated as the difference between the fair value of the modified debt and net carrying value of the old debt. The fair value of the modified debt was determined as the sum of the face value of the debt and fair value of the warrants using the Black-Scholes fair value model. For the year ended December 31, 2014, a loss of approximately $262,000 was recorded on the transaction, representing the fair value of the warrants.

For the years ended December 31, 2014 and 2013, interest expenses incurred on this Unsecured Promissory Note were $146,000 and $146,000, respectively. Total interests of $73,000 and $21,000 remain outstanding as of December 31, 2014 and 2013, respectively, and are included in accrued expenses and other in the condensed consolidated statements of financial condition.

*Unsecured Convertible Promissory Notes*

On November 1, 2013, the Company's Chief Executive Officer loaned $30,000 to the Company in an unsecured convertible promissory note maturing on April 1, 2014. The note bears interest rate at five percent (5%) per annum payable at maturity. At any time following the date of issue and prior to repayment, the outstanding principal and

accrued interest are convertible to common shares of the Company at $1.80 per share. On March 30, 2014, the maturity date was extended to December 31, 2014 under the same terms. On December 30, 2014, the maturity date was extended to August 31, 2015 under the same terms.

On January 15, 2014, a common shareholder who is also an employee loaned $35,000 to the Company in an unsecured convertible promissory note maturing on January 15, 2016. The note bears interest rate at five percent (5%) per annum payable at maturity. At any time following the date of issue and prior to repayment, the outstanding principal and accrued interest are convertible to common shares of the Company at $1.80 per share.

*Secured Demand Notes*

On June 30, 2014, MC entered into two three-year secured demand notes with the Company's Chief Executive Officer and a director of the Company, Dennis G. Schmal, in the amount of $100,000 and $364,000, respectively. The notes bear interest at 8% per annum, payable quarterly. The notes comply with FINRA's prescribed regulations and are accounted for as equity subordination in accordance with SEC Rule 15c3-1(d). The notes are subordinated to the claims of present and future creditors of MC and cannot be repaid, if such repayment will cause MC to fail to meet its minimum net capital requirements in accordance with SEC Rule 15c3-1.

The notes and their corresponding liabilities are included notes receivable and notes payable to related parties, respectively, in the consolidated statements of financial condition.

For the years ended December 31, 2014 and 2013, interest expenses incurred on these secured demand notes were $19,000 and $0, respectively. Total interests of $9,000 remain outstanding as of December 31, 2014 and are included in accrued expenses and other in the consolidated statements of financial condition.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**4. Issuance of Debt (continued)**

*Temporary Subordinated Borrowings*

On December 30, 2014, MC borrowed $495,000 from the Co-Chairman of the Company's Board of Directors. The loan was in the form of a temporary subordinated loan in accordance with Rule 15c3-1 of the Securities Exchange Act of 1934. Total fees incurred through December 31, 2014 were $2,970 and included in cost of underwriting capital in the consolidated statements of operations. The loan and related fees were paid in full on February 3, 2015.

On October 23, 2014, MC borrowed $300,000 from the Co-Chairman of the Company's Board of Directors. The loan was in the form of a temporary subordinated loan in accordance with Rule 15c3-1 of the Securities Exchange Act of 1934. Total fees incurred were $7,800 and were included in cost of underwriting capital in the consolidated statements of operations. The loan and related fees were paid in full on November 5, 2014.

*Equity Lending Note*

On August 31, 2012, the Company's Chief Executive Officer loaned $175,000 to the Company in a three year secured equity lending note (the "Equity Lending Note") at an interest rate of eight percent (8%) per annum payable quarterly in arrears. This note is secured by a security interest in and right of setoff against all of the Company's right, title and interest in and to all of the capital stock of Merriman Capital Inc., together with all proceeds, rents, profits and returns of and from any of the foregoing. Additional consideration in the form of 69,444 warrants to purchase common shares of the Company at $18.90 per share was issued to the lender. The warrants expire on August 31, 2015.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the Equity Lending Note was $13,000 which was recorded as a discount on the debt and applied against the Equity Lending Note. The note collateral has a carrying value of $175,000 and is included in other assets in the consolidated statement of financial condition as of

December 31, 2014.

*Secured Promissory Notes*

On August 31, 2012, the Company's Co-Chairman of the Board of Directors loaned $250,000 to the Company in a three year secured promissory note (the "August 2012 Secured Promissory Note") at an interest rate of eight percent (8%) per annum payable quarterly in arrears. This note is secured by a security interest in and right of setoff against all of the Company's right, title and interest in and to all of the capital stock of Merriman Capital Inc., together with all proceeds, rents, profits and returns of and from any of the foregoing. Additional consideration in the form of 99,206 warrants to purchase common shares of the Company at $0.63 per share was issued to the lender. The warrants expire on August 31, 2015.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the August 2012 Secured Promissory Note was $19,000 which was recorded as a discount on the debt and applied against the August 2012 Secured Promissory Note.

On September 27, 2012, the Company's Co-Chairman of the Board of Directors loaned $125,000 to the Company in a three year secured promissory note (the "September 2012 Secured Promissory Note") at an interest rate of eight percent (8%) per annum payable quarterly in arrears. This note is secured by a security interest in and right of setoff against all of the Company's right, title and interest in and to all of the capital stock of Merriman Capital Inc., together with all proceeds, rents, profits and returns of and from any of the foregoing. Additional consideration in the form of 236,250 warrants to purchase common shares of the Company at $0.63 per share was issued to the lender. The warrants expire on September 27, 2015.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the September 2012 Secured Promissory Note was $45,000 which was recorded as a discount on the debt and applied against the September 2014 Secured Promissory Note.

On December 13, 2012, the Co-Chairman of the Board of Directors loaned $200,000 to the Company in a secured promissory note (the "December 2012 Secured Promissory Note") maturing on September 13, 2013 and bearing interest rates at eight percent (8%) per annum payable at maturity. The December 2012 Secured Promissory Note was extended a few times maturing on August 31, 2015. Effective on September 26, 2013, interest rate increased to ten percent (10%) per annum payable at maturity. Additional consideration included 625,000 warrants to purchase the Company common stock at $2.40 per share.

On September 12, 2013 the Co-Chairman of the Board of Directors loaned $166,028 to the Company in a secured promissory note maturing on February 7, 2014, bearing interest rates at ten percent (10%) per annum payable at maturity. Principal amount and accrued interest were paid in full on January 23, 2014.

The Company's minimum debt payments are $3,086,600 in 2015, $85,000 in 2016 and $464,000 in 2017.

**5. Shareholders' Equity**

*Issuance of Common Stock Warrants for Letter of Credit Guaranty*

On June 26, 2014 and August 28, 2014, the Company issued to its Co-Chairman of the Board of Directors, Ronald L. Chez, warrants to purchase 16,042 and 15,901 shares of its common stock at $2.40 and $1.998 per shares, respectively. The warrants expire on the fifth anniversary of the original issue dates and were issued in consideration of Mr. Chez' guaranty of the Company's letter of credit supporting its San Francisco lease.

The warrants were valued at $46,000 using the Black-Scholes fair value model. The warrant value is amortized over the remaining term of the lease and included in other assets in the condensed consolidated statements of financial condition.

*Sale of Common Stock*

On March 12, 2014, the Company issued 27,777 shares of common stock at $1.80 per share and 6,944 warrants for total proceeds of $50,000. The total proceeds of $50,000 is accounted for as an issuance of common stock with warrants and was allocated to the individual instruments based on the relative fair value of each instrument at the time of issuance. Based on such allocation method, the values allocated to common stock and warrants were $40,000 and $10,000, respectively.

In April 2014, the Company issued 347,217 shares of common stock at $1.80 per share and 86,803 warrants for total proceeds of $625,000. The total proceeds of $625,000 is accounted for as an issuance of common stock with warrants and was allocated to the individual instruments based on the relative fair value of each instrument at the time of issuance. Based on such allocation method, the values allocated to common stock and warrants were $504,000 and $121,000, respectively.

**5. Shareholders' Equity (continued)**

*Sale of Common Stock (continued)*

On November16, 2013 and December 15, 2013, the Company issued an aggregate of 22,222 shares of common stock at $1.80 per share and 5,555 warrants for total proceeds of $40,000. The total proceeds of $40,000 is accounted for as an issuance of common stock with warrants and was allocated to the individual instruments based on the relative fair value of each instrument at the time of issuance. Based on such allocation method, the values allocated to common stock and warrants were $32,000 and $8,000, respectively.

On September 16, 2013, the Company entered into a definitive agreement (the "Stock Purchase Agreement") for the sale and issuance of 77,777 common shares at $1.80 per share, resulting in total proceeds to the Company of $140,000. For every 120 common shares purchased, the investors received a warrant to purchase one share of common stock at $2.40 per share, for a term of five years. A total of 19,444 warrants were issued. The total proceeds of $140,000 is accounted for as an issuance of common stock with warrants and was allocated to the individual instruments based on the relative fair value of each instrument at the time of issuance. Based on such allocation method, the values allocated to common stock and warrants were $113,000 and $27,000, respectively.

On March 28, 2013 and April 26, 2013, the Company entered into a definitive agreement (the "Stock Purchase Agreement") for the sale and issuance of 2,024,860 common shares at $0.90 per share, resulting in total proceeds to the Company of $1,822,375. For every 120 common shares purchased, the investors received a warrant to purchase one share of common stock at $1.2 per share, for a term of five years. A total of 506,214 warrants were issued. The total proceeds of $1,822,375 is accounted for as an issuance of common stock with warrants and was allocated to the individual instruments based on the relative fair value of each instrument at the time of issuance. Based on such allocation method, the values allocated to common stock and warrants were $1,466,000 and $356,000, respectively.

*Conversion of Series D and E Convertible Preferred Stock to Common Stock*

In connection with the sale of common stock described above, the Investors Rights Agreement dated September 9, 2009 by and among the Company and investors in its Series D Convertible Preferred Stock was terminated and a new Voting Agreement dated March 28, 2013 was entered into.

On March 28, 2013, all outstanding shares of Series D and Series E Convertible Preferred Stock of the Company were converted into shares of common stock. Each share of Series D Convertible Preferred Stock was converted into 0.34127 share of common stock. Each share of Series E Convertible Preferred Stock was converted into one share of common stock. At the time of the conversion, all dividends accumulated but not declared on the Series D and series E Convertible Preferred Stock were canceled.

On March 28, 2013, 17,001,579 shares of Series D Convertible Preferred Stock and 6,303,799 shares of Series E Convertible Preferred Stock were converted into 193,404 and 210,126 shares of common stock, respectively.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**6. Fair Value of Assets and Liabilities**

A description of the valuation techniques applied to the Company's major categories of assets and liabilities measured at fair value on a recurring basis follows.

***Securities Owned***

*Corporate Equities*

Corporate equities are comprised primarily of exchange-traded equity securities in which the Company takes selective proprietary positions based on expectations of future market movements and conditions.

Also, as compensation for investment banking services, the Company frequently receives common stock of the client as an additional compensation to cash fees. The common stock is typically issued prior to a registration statement is effective. The Company classifies these securities as "non-marketable securities" as they are restricted stock and may be freely traded only upon the effectiveness of a registration statement covering them or upon the satisfaction of the requirements to qualify under Rule 144, including the requisite holding period. Once a registration statement covering the securities is declared effective by the SEC or the securities have satisfied the Rule 144 requirements, the Company classifies them as "marketable securities."

Typically, the common stock is traded on stock exchanges and most are classified as Level 1 securities. The fair value is based on observed closing stock price at the measurement date. As of December 31, 2014 and 2013, the fair value of this type of securities included in securities owned in the consolidated statements of financial condition was approximately $210,000 and $1,176,000, respectively.

Certain securities are traded infrequently and therefore do not have observable prices based on actively traded markets. These securities are classified as Level 3 securities, if pricing inputs or adjustments are both significant to the fair value measurement and unobservable. As of December 31, 2014 and 2013, the fair value of this type of securities included in securities owned in the consolidated statements of financial condition was $282,000 and $79,000, respectively.

*Stock Warrants*

Also as partial compensation for investment banking services, the Company may receive stock warrants issued by the client. Stock warrants provide their holders with the right to purchase equity in a company. If the underlying stock of the warrants is freely tradable, the warrants are considered to be marketable. If the underlying stock is restricted, subject to a registration statement or to satisfying the requirements for a Rule 144 exemption, the warrants are considered to be non-marketable. Such positions are considered illiquid and do not have readily determinable fair values, and therefore require significant management judgment or estimation.

The fair value of the stock warrants is determined using the Black-Scholes model or similar valuation techniques. Valuation inputs used in the Black-Scholes model include observable inputs such as interest rate, expected term and market price of the underlying stock, in addition to unobservable inputs such as stock volatility. Generally, a change in stock volatility results in a directionally similar change in fair value. As these require significant management assumptions, they are classified as Level 3 securities.

As of December 31, 2014 and 2013, the fair value of this type of securities included in securities owned in the consolidated statements of financial condition was approximately $1,191,000 and $569,000, respectively.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**6. Fair Value of Assets and Liabilities (continued)**

*Underwriters' Purchase Options*

The Company may receive partial compensation for its investment banking services also in the form underwriters' purchase options (UPOs). UPOs are identical to warrants other than with respect to the securities for which they are exercisable. UPOs grant the holder the right to purchase a "bundle" of securities, including common stock and warrants to purchase common stock. UPOs grant the right to purchase securities of companies for which the Company acted as an underwriter to account for any overallotment of these securities in a public offering. Such positions are considered illiquid and do not have readily determinable fair values, and therefore require significant management judgment or estimation.

The fair value of the UPO is determined using the Black-Scholes model or similar technique, applied in two stages. The first stage is to determine the value of the warrants contained within the "bundle" which is then added to the fair value of the stock within the bundle. Once the fair value of the underlying "bundle" is established, the Black-Scholes model is used again to estimate a value for the UPO. The fair value of the "bundle" as estimated by Black-Scholes in the first stage is used instead of the price of the underlying stock as one of the inputs in the second stage of the Black-Scholes. Valuation inputs used in the Black-Scholes model include observable inputs such as interest rate; stock expected term and market price of the underlying stock, in addition to unobservable inputs such as stock volatility. Generally, a change in stock volatility results in a directionally similar change in fair value. The use of the valuation techniques requires significant management assumptions and therefore UPOs are classified as Level 3 securities.

As of December 31, 2014 and 2013, the fair value of this type of securities included in securities owned in the consolidated statements of financial condition was approximately $0 and $24,000, respectively.

*Preferred Stock*

Preferred stock represents preferred equity in companies. The preferred stock owned by the Company is convertible at the Company’s discretion. For these securities, the Company uses the exchange-quoted price of the common stock equivalents to value the securities. They are classified within Level 2 or Level 3 of the fair value hierarchy depending on the availability of an observable stock price on actively traded markets.

As of December 31 2014 and 2013, the fair value of this type of securities included in securities owned in the consolidated statements of financial condition was deemed de-minimis.

*Securities Sold, Not Yet Purchased*

Securities sold, not yet purchased are comprised primarily of exchange-traded equity securities that the Company sold short based on expectations of future market movements and conditions. They are generally valued based on quoted prices from the exchange. To the extent these securities are actively traded, valuation adjustments are not applied and they are categorized in Level 1 liability of the fair value hierarchy.

(a) Includes purchases of securities and securities received for services

Net gains and losses (both realized and unrealized) for Level 3 financial assets are a component of principal transactions in the consolidated statements of operations.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**7. Capital Leases**

During the third quarter of 2013, the Company entered into certain leases for a portion of its property and equipment with various financing institutions and equipment providers for periods ranging from three to four years.

The following is an analysis of the leased assets included in equipment and fixtures at December 31, 2014 and 2013.

| | December 31, | |
|---|---|---|
| | 2014 | 2013 |
| Property and equipment | $399,675 | $399,675 |
| Less: accumulated depreciation | (204,270) | (71,045 ) |
| Capital lease assets, net | $195,405 | $328,630 |

Capital lease liabilities to financial institutions and equipment providers are due in monthly installments totaling $10,000, including fixed interest rates varying from 8.00% to 9.00%. Maturity of the capital leases vary from May 2016 to May 2017. As of December 31, 2014 and 2013, the outstanding capital lease liabilities were and $270,000 and $361,000, respectively.

Interests related to these capital leases charged to interest expenses totaled $26,000 and $17,000, for the years ended December 31, 2014 and 2013, respectively.

The following is a schedule by years of future minimum payments required under the capital leases together with their present value as of December 31, 2014:

| | Amount |
|---|---|

| | |
|---|---|
| 2015 | $129,885 |
| 2016 | 100,499 |
| 2017 | 47,902 |
| Total minimum lease payments | 278,286 |
| Less: amount representing interest | (8,567 ) |
| Net commitments | $269,719 |

**8. Equipment and Fixtures**

Equipment and fixtures consisted of the following:

| | December 31, | |
|---|---|---|
| | 2014 | 2013 |
| Computer equipment | $435,442 | $549,655 |
| Furniture and equipment | 546,153 | 533,026 |
| Leasehold improvements | 774,833 | 761,763 |
| | 1,756,428 | 1,844,444 |
| Less accumulated depreciation | (1,469,617) | (1,503,186) |
| | $286,811 | $341,258 |

Depreciation and amortization expenses for the year ending December 31, 2014 were approximately $217,000 consisting of $84,000 of depreciation and amortization of equipment and fixtures and $133,000 of amortization of capital leases. Depreciation and amortization expenses for the year ending December 31, 2013 were approximately $83,000 consisting of $12,000 of depreciation and amortization of equipment and fixtures and $71,000 of amortization of capital leases.

***Stock Options***

The 2009 Plan, 1999 Stock Option Plan, 2000 Stock Option and Incentive Plan, 2001 Stock Option and Incentive Plan, 2003 Stock Option and Incentive Plan, 2004 Non-Qualified Stock Option and Inducement Plan and 2006 Directors' Stock Option and Incentive Plan, collectively the Option Plans, permit the Company to grant employees, outside directors, and consultants incentive stock options, nonqualified stock options or stock purchase rights to purchase shares of the Company's common stock.

As of December 31, 2014 and 2013, there were 778,189 and 225,852 shares authorized for issuance under the Option Plans, and 2,918 shares authorized for issuance outside of the Option Plans. There were no shares available for future option grants outside of the Option Plans.

On March 23, 2012, the Company's Board of Directors approved the 2012 Stock Incentive Plan (the 2012 Plan). Originally, 152,988 shares of the Company's common stock were reserved for issuance under the 2012 Plan. On June 3, 2013 shares reserved for issuance under the 2012 Plan were increased to 706,325.

Option grants were made during the years ended December 31, 2014 and 2013 under the 2012 Plan.

The following table is a summary of the Company's stock option activity for the years ended December 31, 2014 and 2013:

| | 2014 | | 2013 | |
|---|---|---|---|---|
| | | Weighted-Average | | Weighted-Average |

| | Shares | Exercise Price | Shares | Exercise Price |
|---|---|---|---|---|
| Outstanding at beginning of year | 426,549 | $ 7.74 | 100,184 | $ 22.80 |
| Granted | 472,927 | $ 1.80 | 332,833 | $ 3.60 |
| Exercised | - | $ - | - | $ - |
| Cancelled | (33,772 ) | $ (2.80 ) | (6,468 ) | $ (19.20 ) |
| Outstanding at end of year | 865,704 | $ 4.68 | 426,549 | $ 7.74 |
| Exercisable at end of year | 383,241 | $ 6.43 | 130,427 | $ 13.20 |
| Vested and expected to vest as of December 31, 2014 | 680,121 | | | |

63

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**9. Stock-Based Compensation Expense (continued)**

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions for 2014 and 2013:

| | 2014 | 2013 |
|---|---|---|
| Expected Volatility | 211.26% | 179.10% |
| Average expected term (years) | 3.74 | 4.07 |
| Risk-free interest rate | 1.25 % | 0.61 % |
| Dividend yield | - | - |

Consistent with ASC 718, *Stock Compensation*, the expected stock price volatility for the Company's stock options was determined by the historical volatilities for industry peers and an average of those volatilities. The Company found this metric to be reliable and determined that it reflects the best estimate of expected volatility. Since the Company does not have any traded options or other traded financial instruments such as convertible debt, implied volatilities are not available.

The expected life of employee stock options represents the weighted-average period the stock options are expected to remain outstanding. The Company calculated the expected term using the Black-Scholes model with specific assumptions about the suboptimal exercise behavior, post-vesting termination rates and other relevant factors.

The risk-free interest rate assumption is based upon observed interest rates appropriate for the term of the Company's employee stock options.

The dividend yield assumption is based on the Company's history and expectation of dividend payouts. The Company has not paid and currently does not plan to declare dividends on its common stock.

As stock-based compensation expense recognized is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures. Forfeitures were estimated based on the Company’s historical experience.

The weighted-average grant date fair value of stock options granted during 2014 and 2013 was $1.47 and $0.90, respectively. Compensation expense for stock options during the years ended December 31, 2014 and 2013 was $666,000 and $628,000, respectively. As of December 31, 2014, total unrecognized compensation expenses related to unvested stock options were $294,000. This amount is expected to be recognized as expense over a weighted-average period of 2.92 years.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**9. Stock-Based Compensation Expense (continued)**

***Restricted Stock***

At the date of grant, the recipients of restricted stock have most of the rights of a stockholder other than voting rights, subject to certain restrictions on transferability and a risk of forfeiture. Restricted shares typically vest over a two to four year period beginning on the date of grant. The fair value of each restricted stock award is based on the market value of the Company's stock on the date of grant. The Company recognizes the compensation expense for restricted stock on a straight-line basis over the requisite service period. Compensation expense for restricted stock during the years ended December 31, 2014 and 2013 was $0 and $19,000, respectively.

The following table is a summary of the Company's restricted stock activity, based on the Company's stock price on December 31, 2014 of $1.47 per share:

| | Restricted Stock Outstanding | Weighted-Average Grant Date Fair Value | Aggregate Intrinsic Value |
|---|---|---|---|
| Balance as of January 1, 2013 | 8,588 | $ 17.40 | $ 15,460 |
| Granted | - | $ - | |
| Vested | (153 ) | $ (81.60 ) | |
| Canceled | (8,333 ) | $ (15.30 ) | |
| Balance as of December 31, 2013 | 102 | $ 81.60 | $ 368 |
| Granted | - | $ - | |
| Vested | (102 ) | $ (81.60 ) | |
| Canceled | - | $ - | |
| Balance as of December 31, 2014 | - | $ - | $ - |

| Vested and expected to vest as of December 31, 2014 | - |
| --- | --- |

The total fair value of restricted stock that vested during the years ended December 31, 2014 and 2013 was de minimis. Cancelled shares were from one recipient who voluntarily cancelled the grants prior to vesting.

**10. Employee Benefit Plans**

The Company has a 401(k) defined contribution plan. The 401(k) plan allows eligible employees to contribute up to 15% of their compensation, subject to a statutory prescribed annual limit. Employee contributions and earnings thereon vest immediately. Although the Company may make discretionary contributions to the 401(k) plan, none were made during the years ended December 31, 2014 and 2013.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**11. Income Taxes**

The income tax provision consists of the following:

| | For the Year Ended December 31, | | | |
|---|---|---|---|---|
| | 2014 | | 2013 | |
| Current | | | | |
| Federal | $ - | | $ - | |
| State | - | | - | |
| Deferred | | | | |
| Federal | (442,000 | ) | (1,021,000 | ) |
| State | (76,000 | ) | (249,000 | ) |
| Total | (518,000 | ) | (1,270,000 | ) |
| Change in valuation allowance | 518,000 | | 1,270,000 | |
| Income tax provision | $ - | | $ - | |

The provision for income taxes using the statutory federal tax rate as compared to the Company's effective tax rate is summarized as follows:

| | For the Year Ended December 31, | | | |
|---|---|---|---|---|
| | 2014 | | 2013 | |
| Federal statutory income tax rate (benefit) | -34.0 | % | -34.0 | % |
| State income taxes, net of federal benefit | -4.7 | % | -6.2 | % |
| Stock-based compensation | 0.0 | % | 5.5 | % |
| Loss on early extinguishment of debt | 5.7 | % | 2.5 | % |
| Other permanent differences | 1.2 | % | 0.4 | % |
| Change in valuation allowance | 31.8 | % | 31.8 | % |
| Effective tax rate | 0.0 | % | 0.0 | % |

66

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**11. Income Taxes (continued)**

The Company's deferred tax assets consisted of the effects of temporary differences attributable to the following:

| | December 31, 2014 | 2013 |
|---|---|---|
| Current | | |
| Accruals | $91,000 | $- |
| Allowance for doubtful accounts | 56,000 | - |
| Total current deferred tax assets | 147,000 | - |
| | | |
| Non-current | | |
| Net operating loss carry-forwards | 33,389,000 | 33,673,000 |
| Unrealized loss | 4,911,000 | 4,677,000 |
| Stock-based compensation | 1,110,000 | 829,000 |
| Other | 698,000 | 558,000 |
| Total non-current deferred tax assets | 40,108,000 | 39,737,000 |
| | | |
| Total deferred tax assets | 40,255,000 | 39,737,000 |
| Valuation allowance | (40,255,000) | (39,737,000) |
| | | |
| Net deferred tax assets | $- | $- |

As of December 31, 2014 and 2013, the Company had approximately $86.1 and $86.7 million of U.S. federal net operating loss carryovers available to offset future taxable income, respectively. As of December 31, 2014 and 2013, the Company had approximately $64.6 and $65.8 million of state net operating loss carryovers available to offset future taxable income, respectively. These net operating losses which, if not utilized, begin expiring in the year 2028. In accordance with Section 382 of the Internal Revenue Code, deductibility of the Company's net operating loss carry over may be subject to an annual limitation in the event of a change of control.

In assessing the realization of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will be realized. The ultimate realization of deferred tax assets is dependent

upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. After consideration of all of the information available, management believes that significant uncertainty exists with respect to future realization of the deferred tax assets and has therefore established a full valuation allowance. For the years ended December 31, 2014 and 2013, the change in the valuation allowance was approximately $518,000 and $1,270,000, respectively.

The Company evaluated the provisions of ASC 740 related to the accounting for uncertainty in income taxes recognized in an enterprise’s financial statements. ASC 740 prescribes a comprehensive model for how a company should recognize, present, and disclose uncertain positions that the company has taken or expects to take in its tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. Differences between tax positions taken or expected to be taken in a tax return and the benefit recognized and measured pursuant to the interpretation are referred to as "unrecognized benefits." A liability is recognized (or amount of net operating loss carry forward or amount of tax refundable is reduced) for an unrecognized tax benefit because it represents an enterprise's potential future obligation to the taxing authority for a tax position that was not recognized as a result of applying the provisions of ASC 740.

Interest costs related to unrecognized tax benefits are required to be calculated (if applicable) and would be classified as "Interest expense, net" in the statements of operation. Penalties would be recognized as a component of "General and administrative expenses."

No interest or penalties were recorded during the years ended December 31, 2014 and 2013. As of December 31, 2014 and 2013, no liability for unrecognized tax benefits was required to be reported. The Company does not expect any significant changes in its unrecognized tax benefits in the next year.

The Company files U.S. federal and state income tax returns. These tax returns are subject to examination by tax authorities for years beginning in December 31, 2011.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**12. Segment Reporting**

The accounting policies of the segments are consistent with those described in the Significant Accounting Policies in Note 3. The Company evaluates segment results based on revenue and segment income. There are no revenue-generating activities between segments. Segment asset disclosures are not provided as no significant assets are separately determinable for FEP or CMAG. Revenue and expenses directly associated with each segment are included in determining segment income, which is also the internal performance measure used by management to assess the performance of each business in a given period.

Consolidation items and eliminations include the effects of eliminating transactions between operating segments, and certain non-allocated amounts. Consolidation items and elimination is not an operating segment. Rather, it is added to operating segment totals to reconcile to consolidated totals on the financial statements. Certain amounts included in consolidation items and elimination costs are not allocated to operating segments because they are excluded from the measurement of their operating performance for internal purposes. These include Board of Directors compensation, interest on general borrowings, litigation settlement costs and other charges.

Management believes that the following information provides a reasonable representation of each segment's contribution to revenue and loss or operating results:

| | Year Ended December 31, | |
|---|---|---|
| | 2014 | 2013 |
| Revenues | | |
| MC | $9,295,546 | $5,947,245 |
| FEP | 4,754,473 | 2,017,708 |
| CMAG | 1,878,177 | 1,996,119 |
| Total segment revenues | 15,928,196 | 9,961,072 |
| Consolidation items and elimination | - | (1,165 ) |
| Consolidated revenues | $15,928,196 | $9,959,907 |
| | | |
| Segment profit (loss) | | |
| MC | $(3,202,988 ) | $(4,738,706) |

| | | |
|---|---|---|
| FEP | 811,371 | 440,750 |
| CMAG | 1,206,238 | 1,363,571 |
| Total segment loss | (1,185,379 ) | (2,934,385) |
| Consolidation items and elimination | (442,547 ) | (1,057,684) |
| Consolidated net loss before income taxes | $(1,627,926 ) | $(3,992,069) |

Substantially all of our revenues are from customers located in the United States and all of our long-lived assets are located in the United States.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**13. Commitments and Contingencies**

The following is a table summarizing our significant contractual obligations as of December 31, 2014, consisting of non-cancellable payments under office and operating leases with initial or remaining terms in excess of one year.

| | Office Leases | Operating Leases | Total |
|---|---|---|---|
| 2015 | $1,343,760 | $635,700 | $1,979,460 |
| 2016 | 1,353,354 | 37,200 | 1,390,554 |
| 2017 | 1,421,854 | 37,200 | 1,459,054 |
| 2018 | 1,437,268 | - | 1,437,268 |
| 2019 | 1,447,599 | - | 1,447,599 |
| Thereafter | 742,063 | - | 742,063 |
| Total Contractual Obligations | $7,745,898 | $710,100 | $8,455,998 |

The Company's San Francisco corporate office lease expired on December 31, 2013. On August 22, 2013, the Company entered into an office lease for its San Francisco corporate office commencing in January 2014 and expiring in April 2020. The Company leases its New York office under a non-cancelable operating lease that expires in and July 2020.

For the years ended December 31, 2014 and 2013, rent expenses were approximately $770,000 and $1,035,000, net of $524,000 and $511,000 sublease rent received, respectively. The operating leases in the table above include non-cancelable contracts for operating services, such as market data services.

In connection with its underwriting activities, the Company enters into firm commitments for the purchase of securities in return for a fee. These commitments require it to purchase securities at a specified price. Securities underwriting exposes the Company to market and credit risk, primarily in the event that, for any reason, securities purchased by the Company cannot be distributed at anticipated price levels. As December 31, 2014 and 2013, the Company had no open underwriting commitments.

Marketable securities, restricted cash, and cash held by the clearing broker may be used to maintain margin requirements. At December 31, 2014 and 2013, the Company had $250,000 of cash on deposit with its clearing broker. Furthermore, the marketable securities owned may be hypothecated or borrowed by the clearing broker.

From time to time, the Company may obtain funds through capital leases to purchase furniture and equipment, to replace current ones or for expansion.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**13. Commitments and Contingencies (continued)**

***Concentrations and Credit Risk***

Substantially all of the Company's cash and cash equivalents are held at two major U.S. financial institutions. Deposits held with banks may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed upon demand.

As of December 31, 2014 and 2013, the Company held concentrated positions in one and three securities with total fair value of $206,000 and $1,092,000, respectively. The prices of these securities are highly volatile.

As of December 31, 2014 and 2013, the Company did not hold concentrated positions in accounts receivable with any one client which exceeded 10% of total accounts receivable.

For the year ended December 31, 2014, one sales professional accounted for more than 10% of total revenue (approximately $3,230,000) and no customer accounted for more than 10% of total revenue. For the year ended December 31, 2013, one sales professional accounted for more than 10% of total revenue (approximately $2,490,000) and no customer accounted for more than 10% of total revenue.

The Company is also exposed to credit risk as it relates to the collection of receivables from third parties, including lead managers in underwriting transactions and the Company's corporate clients related to private placements of securities and financial advisory services.

***Legal Proceedings***

From time to time, the Company is involved in ordinary routine litigation incidental to our business. Currently, there are no litigations against the Company.

Certain conditions may exist as of the date the consolidated financial statements are issued, which may result in a loss to the Company, but which will only be resolved when one or more future events occur or fail to occur. The Company assesses such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company, or un-asserted claims that may result in such proceedings, the Company evaluates the perceived merits of any legal proceedings or un-asserted claims, as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company's consolidated financial statements. If the assessment indicates that a potentially material loss contingency is not probable, but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability and an estimate of the range of possible losses, if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed, unless they involve guarantees, in which case the guarantees would be disclosed. There can be no assurance that such matters will not materially and adversely affect the Company's business, financial position, and results of operations or cash flows.

For the years ended December 31, 2014 and 2013, the Company incurred legal services and litigation settlement of $51,000 and $520,000, respectively. Of the $520,000 amount incurred in 2013, $390,000 was for settlement of certain litigations. There was no litigation settlement in 2014.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**14. Financial Instruments, Off-Balance Sheet Arrangements and Indemnification**

***Financial Instruments***

The Company's broker-dealer entity trades securities that are primarily traded in United States markets. As of December 31, 2014 and 2013, the Company had not entered into any transactions involving financial instruments, such as financial futures, forward contracts, options, swaps or derivatives that would expose the Company to significant related off-balance-sheet risk.

In addition, the Company, from time to time, has sold securities it does not currently own in anticipation of a decline in the fair value of that security (securities sold, not yet purchased). When the Company sells a security short and borrows the security to make a delivery, a gain, limited to the price at which the Company sold the security short, or a loss, unlimited in size, is realized as the fair value of the underlying security decreases or increases, respectively.

Market risk is primarily caused by movements in market prices of the Company's trading and investment account securities. The Company's trading securities and investments are also subject to interest rate volatility and possible illiquidity in markets in which the Company trades or invests. The Company seeks to control market risk through monitoring procedures. The Company's principal transactions are primarily long and short equity transactions.

***Off-Balance Sheet Arrangements***

The Company was not a party to any off-balance sheet arrangements during the two years ended December 31, 2014. In particular, the Company does not have any interest in so-called limited purpose entities, which include special purpose entities and structured finance entities.

***Indemnification***

The Company’s broker-dealer subsidiary functions as an introducing broker that places and executes customer orders. The orders are then settled by an unrelated clearing organization that maintains custody of customers’ securities and provides financing to customers. Through indemnification provisions in agreements with clearing organizations, customer activities may expose the Company to off-balance-sheet credit risk. Financial instruments may have to be purchased or sold at prevailing market prices in the event a customer fails to settle a trade on its original terms or in the event cash and securities in customer margin accounts are not sufficient to fully cover customer obligations. The Company seeks to control the risks associated with customer activities through customer screening and selection procedures, as well as through requirements on customers to maintain margin collateral in compliance with various regulations and clearing organization policies.

**15. Regulatory Requirements**

MC is a broker-dealer subject to Rule 15c3-1 of the SEC, which specifies uniform minimum net capital requirements, as defined, for its registrants. As of December 31, 2014, MC had regulatory net capital, as defined, of $901,000, which exceeded the amount required by $651,000. MC complies with the alternative net capital requirement allowed in Appendix E of Rule 15c3-1. MC is exempt from Rules 15c3-3 and 17a-13 under the Securities Exchange Act of 1934 because it does not carry customer accounts, nor does it hold customer securities or cash.

As of February 28, 2015, MC was in net capital deficiency of approximately $40,000. MC filed the deficiency notification under SEA Rule 17a-11(c)(2) with the SEC and FINRA on March 24, 2015. The net capital deficiency was cured on the same day. MC is in the process of obtaining additional funding in order to ensure continuous net capital compliance.

Under its rules, FINRA may prohibit a member firm from expanding its business or paying dividends if resulting net capital would be less than 5 percent of aggregate debit balances. Advances to affiliates, repayment of subordinated debt, dividend payments and other equity withdrawals by MC are subject to certain notification and other provisions of the SEC and FINRA rules. In addition, MC is subject to certain notification requirements related to withdrawals of excess net capital.

**MERRIMAN HOLDINGS, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**16. Related Party Transactions**

***Notes Payable –Related Party***

*Unsecured Promissory Notes*

Of the $2,065,600 Unsecured Promissory Notes, $840,000 was originally loaned from the Co Chairman of the Board of Directors, Ronald L. Chez. On September 29, 2013, the principal, together with $201,600 accrued interest were consolidated into an Unsecured Promissory Note maturing on March 29, 2014. The new note bears interest at nine percent (9%) per annum payable monthly and five percent (5%) per annum payable at maturity. On March 27, 2014, the terms of the $1,041,600 Unsecured Promissory Note were modified for the note to mature on December 31, 2014 at the same interest rates plus warrants to purchase 111,190 shares of the Company's common stock at $2.40 per share. On December 30, 2014, this note was further modified to mature on August 31, 2015 under the same terms.

The Company accounted for this transaction as a modification of debt, whereby a gain or loss was calculated as the difference between the fair value of the modified debt and net carrying value of the old debt. The fair value of the modified debt was determined as the sum of the face value of the debt and fair value of the warrants using the Black-Scholes fair value model. For the year ended December 31, 2014, a loss of approximately $262,000 was recorded on the transaction, representing the fair value of the warrants.

For the years ended December 31, 2014 and 2013, interest expenses incurred on this Unsecured Promissory Note were $146,000 and $146,000, respectively. Total interests of $73,000 and $21,000 remain outstanding as of December 31, 2014 and 2013, respectively, and are included in accrued expenses and other in the condensed consolidated statements of financial condition.

*Unsecured Convertible Promissory Notes*

On November 1, 2013, the Company's Chief Executive Officer loaned $30,000 to the Company in an unsecured convertible promissory note maturing on April 1, 2014. The note bears interest rate at five percent (5%) per annum payable at maturity. At any time following the date of issue and prior to repayment, the outstanding principal and accrued interest are convertible to common shares of the Company at $1.80 per share. On March 30, 2014, the maturity date was extended to December 31, 2014 under the same terms. On December 30, 2014, the maturity date was extended to August 31, 2015 under the same terms.

On January 15, 2014, a common shareholder who is also an employee loaned $35,000 to the Company in an unsecured convertible promissory note maturing on January 15, 2016. The note bears interest rate at five percent (5%) per annum payable at maturity. At any time following the date of issue and prior to repayment, the outstanding principal and accrued interest are convertible to common shares of the Company at $1.80 per share.

*Secured Demand Notes*

On June 30, 2014, MC entered into two three-year secured demand notes with the Company's Chief Executive Officer and a director of the Company, Dennis G. Schmal, in the amount of $100,000 and $364,000, respectively. The notes bear interest at 8% per annum, payable quarterly. The notes comply with FINRA's prescribed regulations and are accounted for as equity subordination in accordance with SEC Rule 15c3-1(d). The notes are subordinated to the claims of present and future creditors of MC and cannot be repaid, if such repayment will cause MC to fail to meet its minimum net capital requirements in accordance with SEC Rule 15c3-1.

The notes and their corresponding liabilities are included notes receivable and notes payable to related parties, respectively, in the consolidated statements of financial condition.

For the years ended December 31, 2014 and 2013, interest expenses incurred on these secured demand notes were $19,000 and $0, respectively. Total interests of $9,000 remain outstanding as of December 31, 2014 and are included in accrued expenses and other in the consolidated statements of financial condition.

**16. Related Party Transactions (continued)**

***Notes Payable –Related Party (continued)***

*Temporary Subordinated Borrowings*

On December 30, 2014, MC borrowed $495,000 from the Co-Chairman of the Company’s Board of Directors. The loan was in the form of a temporary subordinated loan in accordance with Rule 15c3-1 of the Securities Exchange Act of 1934. Total fees incurred through December 31, 2014 were $2,970 and included in cost of underwriting capital in the consolidated statements of operations. The loan and related fees were paid in full on February 3, 2015.

On October 23, 2014, MC borrowed $300,000 from the Co-Chairman of the Company’s Board of Directors. The loan was in the form of a temporary subordinated loan in accordance with Rule 15c3-1 of the Securities Exchange Act of 1934. Total fees incurred were $7,800 and were included in cost of underwriting capital in the consolidated statements of operations. The loan and related fees were paid in full on November 5, 2014.

*Equity Lending Note*

On August 31, 2012, the Company’s Chief Executive Officer loaned $175,000 to the Company in a three year secured equity lending note (the “Equity Lending Note”) at an interest rate of eight percent (8%) per annum payable quarterly in arrears. This note is secured by a security interest in and right of setoff against all of the Company’s right, title and interest in and to all of the capital stock of Merriman Capital Inc., together with all proceeds, rents, profits and returns of and from any of the foregoing. Additional consideration in the form of 69,444 warrants to purchase common shares of the Company at $18.90 per share was issued to the lender. The warrants expire on August 31, 2015.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the Equity Lending Note was $13,000 which was recorded as a discount on the debt and applied against the Equity Lending Note. The note collateral has a carrying value of $175,000 and is included in other assets in the consolidated statement of financial condition as of December 31, 2014.

*Secured Promissory Notes*

On August 31, 2012, the Company's Co-Chairman of the Board of Directors loaned $250,000 to the Company in a three year secured promissory note (the "August 2012 Secured Promissory Note") at an interest rate of eight percent (8%) per annum payable quarterly in arrears. This note is secured by a security interest in and right of setoff against all of the Company's right, title and interest in and to all of the capital stock of Merriman Capital Inc., together with all proceeds, rents, profits and returns of and from any of the foregoing. Additional consideration in the form of 99,206 warrants to purchase common shares of the Company at $0.63 per share was issued to the lender. The warrants expire on August 31, 2015.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the August 2012 Secured Promissory Note was $19,000 which was recorded as a discount on the debt and applied against the August 2012 Secured Promissory Note.

***Notes Payable –Related Party (continued)***

*Secured Promissory Notes (continued)*

On September 27, 2012, the Company’s Co-Chairman of the Board of Directors loaned $125,000 to the Company in a three year secured promissory note (the “September 2012 Secured Promissory Note”) at an interest rate of eight percent (8%) per annum payable quarterly in arrears. This note is secured by a security interest in and right of setoff against all of the Company’s right, title and interest in and to all of the capital stock of Merriman Capital Inc., together with all proceeds, rents, profits and returns of and from any of the foregoing. Additional consideration in the form of 236,250 warrants to purchase common shares of the Company at $0.63 per share was issued to the lender. The warrants expire on September 27, 2015.

This transaction was accounted for as an issuance of debt with warrants and the proceeds were allocated to the individual instruments based on the relative fair values of each instrument at the time of issuance. Based on the fair value allocation method, the value of the warrants issued in connection with the September 2012 Secured Promissory Note was $45,000 which was recorded as a discount on the debt and applied against the September 2014 Secured Promissory Note.

On December 13, 2012, the Co-Chairman of the Board of Directors loaned $200,000 to the Company in a secured promissory note (the “December 2012 Secured Promissory Note”) maturing on September 13, 2013 and bearing interest rates at eight percent (8%) per annum payable at maturity. The December 2012 Secured Promissory Note was extended a few times maturing on August 31, 2015. Effective on September 26, 2013, interest rate increased to ten percent (10%) per annum payable at maturity. Additional consideration included 625,000 warrants to purchase the Company common stock at $2.40 per share.

On September 12, 2013 the Co-Chairman of the Board of Directors loaned $166,028 to the Company in a secured promissory note maturing on February 7, 2014, bearing interest rates at ten percent (10%) per annum payable at maturity. Principal amount and accrued interest were paid in full on January 23, 2014.

***Software Platform Purchase***

In December 2013, the Company purchased a software platform called Digital Capital Network ("DCN"), an online capital marketplace, from an entity owned by a member of the Board of Directors, Robert K. Ward. The purchase price consisted of $160,000 cash and 88,164 shares of the Company's common stock valued at $1.80 per share at the time of issuance.

The Company also entered into a licensing agreement to pay the entity owned by Robert K. Ward $18,000 a month.

For the years ended December 31, 2014 and 2013, cash payments made to the entity owned by Robert K. Ward were $218,000 and $184,000, respectively.

***Other Related Party Transactions***

On June 17, 2014, MC sold 1 share of common stock each to the Company's Chief Executive Officer and Chairman of the Audit Committee for $96 per share.

From time to time, officers and employees of the Company may invest in private placements which the Company arranges and for which the Company charges investment banking fees. The Company's employees may, at times, provide certain services and supporting functions to its affiliate entities. The Company is not reimbursed for any costs related to providing those services.

**17. Subsequent Events**

The Company evaluated subsequent events through the date these financial statements were issued. The Company determined the following to be material subsequent events that require disclosure.

As of February 28, 2015, MC was in net capital deficiency of approximately $40,000. MC filed the deficiency notification under SEA Rule 17a-11(c)(2) with the SEC and FINRA on March 24, 2015. The net capital deficiency was cured on the same day. MC is in the process of obtaining additional funding in order to ensure continuous net capital compliance.

COR Clearing LLC became the Company’s clearing broker effective March 16, 2015.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

The financial statements included in this report have been audited by Marcum LLP ("Marcum"), independent registered public accounting firms, as stated in their audit reports appearing herein.

During the year ended December 31, 2014 and through the date of this Annual Report on Form 10-K, there were no disagreements with Marcum on any matter of accounting principles or practice, financial statement disclosures, or auditing scope or procedures which, if not resolved to Marcum's satisfaction, would have caused them to make reference to the subject matter in connection with their report on the Company's consolidated financial statements; and there were no reportable events as set forth in applicable SEC regulations.

**Item 9a. Controls and Procedures**

***Disclosure Controls and Procedures*** **–** We carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Based upon our evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective, as of December 31, 2014, in ensuring that material information that we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms.

***Changes in Internal Control over Financial Reporting*** **–** There were no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(d) and 15d-15(d) of the Exchange Act) occurred during the year ended December 31, 2014, that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

***Management's Annual Report on Internal Control over Financial Reporting*** **–** Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act as a process designed by, or under the supervision of, a company's principal executive and principal financial officers and effected by a company's board of directors, management and other personnel to provide reasonable assurance regarding the reliability of financial

reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control — Integrated Framework in 1992. Based on our assessment, our management has concluded that, as of December 31, 2014, our internal control over financial reporting is effective based on those criteria.
