This Current Report on Form 6-K is being filed to be incorporated by reference into Registration Statement No. 333-07140 on Form F-3.

Non-consolidated Financial Statements for the Nine Months Ended September 30, 2005

The non-consolidated financial information set forth below has been derived from our unaudited (in the case of information as of and for the nine months ended September 30, 2004 and 2005) and non-consolidated financial statements as of December 31, 2004 and September 30, 2005 and for the nine-month periods ended September 30, 2004 and 2005 included in this Current Report on Form 6-K (the Non-consolidated Financial Statements). You should read the selected non-consolidated financial data below with the Non-consolidated Financial Statements. Results of operations in the first nine months of 2005 may not be indicative of results of operations for the remainder of 2005 or the full year 2005.

The financial information set forth below is non-consolidated, and therefore does not reflect the assets and liabilities and results of operations of our subsidiaries other than as equity method investees. As a result, the non-consolidated interim information set forth below is not comparable with the consolidated financial information presented in our latest annual report on Form 20-F or the consolidated financial information as of and for the six months ended June 30, 2004 and 2005 included in our Current Report on Form 6-K furnished to the Securities and Exchange Commission (the Commission) on October 18, 2005.

In addition, our non-consolidated interim financial statements have been prepared in accordance with accounting principles generally accepted in the Republic of Korea (Korean GAAP), which differ in certain significant respects from accounting principles generally accepted in the United States (U.S. GAAP). See Note 32 of Notes to Consolidated Financial Statements included in our Current Report on Form 6-K furnished to the Commission on October 18, 2005 for a description of these differences and a reconciliation of certain Korean GAAP items to U.S. GAAP.

Any discrepancies in any table between totals and the sums of the amounts listed are due to rounding.

Table of Contents**Operating Results**

Our non-consolidated sales for the nine months ended September 30, 2005 increased by 16.3% to Won 16,492 billion from Won 14,184 billion for the nine months ended September 30, 2004, reflecting an increase of 18.6% in the average unit sales price per ton of our steel products, which more than offset a 1.6% decrease in the non-consolidated sales volume of our steel products.

Our non-consolidated domestic sales for the nine months ended September 30, 2005 increased by 18.5% in terms of non-consolidated domestic sales revenues and decreased by 1.2% in terms of non-consolidated domestic sales volume of steel products compared to the corresponding period in 2004. For the nine months ended September 30, 2005, our non-consolidated domestic sales volume accounted for approximately 74.7% of our non-consolidated total sales volume of steel products, compared to 74.4% for the nine months ended September 30, 2004. The increase in non-consolidated domestic sales revenues in the nine months ended September 30, 2005 compared to the corresponding period in 2004 was attributable primarily to an increase in the price of steel products sold in Korea, which more than offset the overall decrease in non-consolidated domestic sales volume of steel products.

Our non-consolidated export sales for the nine months ended September 30, 2005 increased by 11.2% in terms of non-consolidated export sales revenues and decreased by 2.7% in terms of non-consolidated export sales volume of steel products compared to the nine months ended September 30, 2004. Exports as a percentage of non-consolidated total sales volume of steel products decreased to 25.3% of such sales volume for the nine months ended September 30, 2005 compared to 25.6% for the corresponding period in 2004. The increase in non-consolidated export sales revenues in the nine months ended September 30, 2005 compared to corresponding period in 2004 was primarily attributable to an increase in the price of steel products sold abroad, which more than offset the overall decrease in non-consolidated export sales volume of steel products.

Non-consolidated gross profit for the nine months ended September 30, 2005 increased by 34.2% to Won 5,637 billion from Won 4,199 billion for the nine months ended September 30, 2004. Non-consolidated gross margin for the nine months ended September 30, 2005 increased to 34.2% from 29.6% for the nine months ended September 30, 2004. This increase in non-consolidated gross margin reflected the 16.3% increase in non-consolidated sales, which outpaced an 8.7% increase in non-consolidated cost of goods sold for the nine months ended September 30, 2005 to Won 10,855 billion from Won 9,984 billion for the corresponding period in 2004. Our non-consolidated cost of goods sold rose primarily due to increases in both volume and price of raw materials purchased. Non-consolidated raw materials costs for the nine months ended September 30, 2005 increased primarily as a result of a general increase in the unit costs of coal, iron ore, nickel and scrap metal. The average price of coal per ton (including all associated costs such as customs duties and transportation costs) increased from \$79.43 for the nine months ended September 30, 2004 to \$105.85 for the nine months ended September 30, 2005. The average price of iron ore per ton (including all associated costs such as customs duties and transportation costs) increased from \$32.68 for the nine months ended September 30, 2004 to \$41.19 for the nine months ended September 30, 2005.

Table of Contents

Non-consolidated operating profit for the nine months ended September 30, 2005 increased by 40.3% to Won 4,824 billion compared to Won 3,440 billion for the corresponding period in 2004. Non-consolidated operating margin for the nine months ended September 30, 2005 increased to 29.3% from 24.3% for the nine months ended September 30, 2004, reflecting the 34.2% increase in non-consolidated gross profit, which outpaced a 7.0% increase in non-consolidated selling and administrative expenses for the nine months ended September 30, 2005 to Won 813 billion from Won 759 billion for the corresponding period in 2004. The increase in non-consolidated selling and administrative expenses resulted principally from increases in non-consolidated advertising expenses and non-consolidated fees and charges. Our non-consolidated advertising expenses increased by 126.0% for the nine months ended September 30, 2005 to Won 64 billion from Won 28 billion for the nine months ended September 30, 2004, primarily reflecting certain adjustments related to internal accounting for advertising expenses. Our non-consolidated fees and charges for the nine months ended September 30, 2005 increased by 37.4% to Won 94 billion from Won 68 billion for the nine months ended September 30, 2004, primarily as a result of fees and charges incurred in connection with the outsourcing of certain peripheral administrative functions.

Our non-consolidated net income for the nine months ended September 30, 2005 increased by 37.2% to Won 3,631 billion from Won 2,647 billion for the corresponding period in 2004. Non-consolidated net income increased primarily as a result of the increase in non-consolidated operating profit, which more than offset the impact of:

- a 29.0% increase in non-consolidated income tax expense to Won 1,296 billion for the nine months ended September 30, 2005 from Won 1,005 billion for the corresponding period in 2004, due to the increase in our taxable income; and

- a 50.5% decrease in non-consolidated net non-operating income to Won 103 billion for the nine months ended September 30, 2005 from Won 208 billion for the corresponding period in 2004.

The decrease in non-consolidated net non-operating income primarily reflected:

- a 42.9% decrease in net earnings of equity method investees for the nine months ended September 30, 2005 to Won 89 billion from Won 156 billion for the corresponding period in 2004, principally attributable to losses from Zhangjiagang Pohang Stainless Steel Co., Ltd. and Qingdao Pohang Stainless Steel Co., Ltd.; and

- a more than two-fold increase in non-consolidated net loss on disposal of property, plant and equipment to Won 59 billion for the nine months ended September 30, 2005 from Won 19 billion for the corresponding period in 2004, primarily resulting from losses on disposals of equipment at Pohang Works and Kwangyang Works.

Our effective tax rate for the nine-month period ended September 30, 2005 was 26.30% compared to 27.52% in the corresponding period in 2004. Commencing January 1, 2005, the

Table of Contents

statutory tax rate applicable to us decreased to 27.5% from 29.7%. See Note 24 of Notes to Non-consolidated Financial Statements.

The following table sets forth the summary of our non-consolidated cash flows for the periods indicated:

Tax Audit

From June 13, 2005 to December 12, 2005, the Korean National Tax Service (the NTS) is conducting a tax audit on our tax filings made during the period from fiscal year 2000 to fiscal year 2004. Such tax audits are generally conducted by the NTS on a regular basis once every five years for Korean companies, since there is a five year statute of limitations on corporate tax claims. We expect that, after completion of the tax audit, additional taxes may be assessed against us, the exact amount of which we expect would be advised to us by the NTS in January 2006. The amount of additional taxes that may be assessed against us by the NTS is currently unknown but may be substantial.

2. Summary of Significant Accounting Policies

The significant accounting policies followed by the Company in the preparation of its interim non-consolidated financial statements for the three-month and nine-month periods ended September 30, 2005, are summarized below:

Basis of Financial Statement Presentation

The Company maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in conformity with accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying financial statements have been condensed, restructured and translated into English from the Korean language non-consolidated financial statements. Certain information attached to the Korean language financial statements, but not required for a fair presentation of the Company's financial position, results of operations or cash flows, is not presented in the accompanying non-consolidated financial statements.

Accounting Estimates

The preparation of the non-consolidated financial statements requires management to make estimates and assumptions that affect amounts reported therein. Although these estimates are based on management's best knowledge of current events and actions that the Company may undertake in the future, actual results may differ from those estimates.

Application of the Statements of Korean Financial Accounting Standards

The Korean Accounting Standards Board has published a series of Statements of Korean Financial Accounting Standards (SKFAS), which will gradually replace the existing financial accounting standards established by the Korean Financial Supervisory Commission. As SKFAS Nos. 10, 12 and 13 became applicable to the Company on January 1, 2004, the Company adopted these Standards in its financial statements covering periods beginning January 1, 2004.

In addition, as SKFAS Nos. 15 through 17 became effective for the Company on January 1, 2005, the Company adopted these Standards in its financial statements for the nine-month period ended September 30, 2005.

In accordance with SKFAS No. 15, *Investments in Associates*, equity in earnings and losses of the investees are shown in the income statement as a gross amount. Likewise, positive and negative capital adjustments are shown in the balance sheets as a gross amount. In addition, in accordance with SKFAS No. 16, *Deferred Income Taxes*, deferred tax assets and liabilities are classified into current and non-current and within each classification deferred tax assets and liabilities are offset and recorded as a net amount. Deferred tax effects applicable to items in shareholders' equity are directly reflected in the shareholders' equity account.

Revenue Recognition

Revenue from the sales of products is recognized when significant risks and rewards of ownership of the goods are transferred.

Allowance for Doubtful Accounts

The Company provides an allowance for doubtful accounts based on management's estimate of the collectibility of individual accounts and historical collection experience.

Inventories

The quantity of inventory on hand is verified using the perpetual inventory system, which continuously updates the quantity of the inventory during the period, and by physical count as of the balance sheet date. Inventories are stated at the lower of cost or market, with cost being determined using the moving-average method, except for materials-in-transit, which are stated at actual cost using the specific identification method. No physical count of inventory has been conducted as of September 30, 2005. If the net realizable value of inventories (current replacement cost for raw materials) is lower than its cost, the carrying amount is reduced to the net realizable value and the difference between the cost and revalued amount is charged to current operations.

Investments in Securities

The Company accounts for equity and debt securities under the provision of SKFAS No. 8, *Investments in Securities*. This statement requires investments in equity and debt securities to be classified into three categories: trading, available-for-sale and held-to-maturity.

Securities that are bought and held principally for near-term sale to generate profits from short-term price differences are classified into trading. Trading generally involves active and frequent buying and selling. Debt securities that have fixed or determinable payments and fixed maturity shall be classified as held-to-maturity only if the reporting entity has both the positive intent and ability to hold those securities to maturity. Securities that are not classified as either held-to-maturity securities or trading securities are classified as available-for-sale.

Securities are initially carried at cost, including incidental expenses, with cost being determined using the gross average method or moving-average method. Debt securities, which the Company has the intent and ability to hold to maturity, are generally carried at cost, adjusted for the amortization of discounts or premiums. Premiums and discounts on debt securities are amortized over the term of the debt using the effective interest rate method. Trading and available-for-sale securities are carried at fair value, except for non-marketable securities classified as available-for-sale securities, which are carried at cost. Non-marketable debt securities are carried at a value using the present value of future cash flows, discounted at a reasonable interest rate determined considering the credit ratings by the independent credit rating agencies.

(Unaudited)

Unrealized valuation gains or losses on trading securities are charged to current operations, and those resulting from available-for-sale securities are recorded as a capital adjustment, the accumulated amount of which shall be charged to current operations when the related securities are sold, or when an impairment loss on the securities is recognized. Impairment losses are recognized in the statement of income when the recoverable amounts are less than the acquisition costs of securities or adjusted costs of debt securities for the amortization of discounts or premiums.

Investments in Affiliates

Investments in equity securities of companies, over which the Company exercises a significant control or influence, are recorded using the equity method of accounting. Under the equity method, the Company records changes in its proportionate ownership in the book value of the investee in current operations, as capital adjustment or as adjustments to retained earnings, depending on the nature of the underlying change in the book value of the investee. The Company discontinues the equity method of accounting for investments in equity method investees when the Company's share in the accumulated losses equals the cost of the investments, and until the subsequent cumulative changes in its proportionate net income of the investees equals its cumulative proportionate net losses not recognized during the periods when the equity method was suspended. . If the book value of the investee has changed due to the capital increase of the investee, net losses not recognized in the prior periods are reflected in equity method investment securities as an adjustment to retained earnings.

Differences between the initial purchase price and the Company's initial proportionate ownership in the net book value of the investee are amortized over the period, not to exceed 20 years, using the straight-line method. However, in case of the investee which is also a subsidiary of the Company, if the additional investment results in the change in the ownership percentage, the difference between the change in the proportionate ownership in the book value of the investee and additional investment is recorded as capital adjustment.

The Company's proportionate unrealized profit arising from sales by the Company to equity method investee, sales by the equity method investees to the Company or sales between equity method investees are eliminated. Only unrealized profit arising from sales by the Company to subsidiaries is fully eliminated.

If the Company has provided allowance for doubtful accounts for receivables due from an equity method investee which is also a subsidiary of the Company, bad debt expenses recognized during the current period should be included in equity method investment securities and reflected in current operations as gain on investments using the equity method.

Table of Contents**POSCO****Notes to Non-Consolidated Financial Statements****September 30, 2005 and 2004, and December 31, 2004****(Unaudited)**

Foreign currency financial statements of equity method investees are translated into Korean won using the exchange rates in effect as of the balance sheet date for assets and liabilities (the exchange rates on the acquisition date for capital accounts), and annual average exchange rates for income and expenses. Any resulting translation gain or loss is included in the capital adjustments account, a component of shareholders' equity.

The equity method of accounting is applied based on the most recent available unreviewed financial statements of subsidiaries and affiliates. The Company believes that if the financial statements were reviewed, differences between unreviewed and reviewed financial statements would not have a material effect on the financial statements of the Company.

Property, Plant and Equipment and Related Depreciation

Property, plant and equipment are stated at cost, net of accumulated depreciation, except for certain assets subject to upward revaluations in accordance with the Asset Revaluation Law. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, as follows:

	Estimated useful lives
Buildings and structures	20-40 years
Machinery and equipment	8 years
Vehicles	4-9 years
Tools	4 years
Furniture and fixtures	4 years

The acquisition cost of an asset is comprised of its purchase price and any directly attributable cost of bringing the asset to working condition for its intended use. When the estimated cost of dismantling and removing the asset and restoring the site, after the termination of the asset's useful life, meets the criteria for the recognition of provisions, the present value of the estimated expenditure shall be included in the cost of the asset.

Subsequent expenditure on property, plant and equipment shall be capitalized only when it increases future economic benefits beyond its most recently assessed standard of performance; all other subsequent expenditures shall be recognized as an expense in the period in which it is incurred.

Table of Contents**POSCO****Notes to Non-Consolidated Financial Statements****September 30, 2005 and 2004, and December 31, 2004****(Unaudited)****Intangible Assets**

Intangible assets are stated at acquisition cost, including incidental expenses, net of accumulated amortization. Amortization is computed using the straight-line method over the estimated useful lives as described below.

	Estimated useful lives
Intellectual property rights	5-10 years
Land usage rights	40 years
Port facilities usage rights	3-34 years
Other intangibles	4-20 years

Port facilities usage rights and land usage rights, which represent rights to use certain port facilities and land, are amortized over the term of exclusive rights.

The costs incurred in relation to the development of new products and new technologies, including the development cost of internally used software and related costs, are recognized and recorded as other intangible assets only if it is probable that future economic benefits that are attributable to the asset will flow into the Company, and the cost of the asset can be measured reliably. The useful life of other intangible assets (development cost) should be based on its estimated useful life, not to exceed 20 years from the date when the asset is available for use.

As of September 30, 2005, port facilities usage rights is related to the quay and inventory yard contributed by the Company, since April 1987, to the local bureaus of the Maritime Affairs and Fisheries in Gwangyang, Pohang, Pyoungtaek and Masan. The related amortization expense amounted to 14,040 million for the nine-month period ended September 30, 2005 (for the three-month period ended September 30, 2005: 4,635 million).

Discounts on Debentures

Discounts on debentures are amortized over the repayment period using the effective interest rate method. The discount is reported on the balance sheet as a direct deduction from the face amount of the debenture. Amortization is included in interest expense.

Valuation of Assets and Liabilities at Present Value

Long-term loans receivable and long-term trade accounts and notes receivable are valued at their present value as discounted at an appropriate discount rate. Discounts are amortized using the effective interest rate method and recognized as an interest income over the life of the related assets.

Accrued Severance Benefits

Employees and directors with at least one year of service are entitled to receive a lump-sum payment upon termination of their employment, based on their length of service and rate of pay at the time of termination. Accrued severance benefits represent the amount which would be payable assuming all eligible employees and directors were to terminate their employment as of the balance sheet date.

The Company has partially funded the accrued severance benefits through group severance insurance deposits with Samsung Life Insurance Company and others.

The contributions to the National Pension Fund in accordance with the National Pension Act in Korea and group severance insurance deposits are deducted from accrued severance benefit liabilities.

Derivative Instruments

All derivative instruments are accounted for at fair value, and unrealized gains and losses from derivative contracts are charged to current operations with resulting rights and obligations being accounted for as asset and liabilities of the Company.

Foreign Currency Translation

Monetary assets and liabilities denominated in foreign currencies are translated into Korean won at the exchange rates in effect at the balance sheet date (1,038.0: US\$1 as of September 30, 2005 and 1,043.8: US\$1 as of December 31, 2004), and resulting translation gains and losses are recognized in current operations.

Income Taxes

The Company recognizes deferred income taxes for anticipated future tax consequences resulting from temporary differences between amounts reported for financial reporting and income tax purposes. Deferred income tax assets and liabilities are computed on such temporary differences by applying enacted statutory tax rates applicable to the years when such differences are expected to reverse. Deferred tax assets are recognized when it is more likely that such deferred tax assets will be realized. Income tax effect of temporary differences is reflected as income tax expenses in the period incurred, and income tax effect of temporary differences in relation to item in shareholders equity is directly reflected in the related shareholders equity account. The total income tax provision includes the current income tax expense under applicable tax regulations and the change in the balance of deferred income tax assets and liabilities during the period.

Deferred tax assets and liabilities in the balance sheet are classified into current and non-current portion, and within each classification, deferred tax assets and deferred tax liabilities are offset and recorded.

Impairment of Assets

The Company assesses the potential impairment of assets which are not recorded at fair value when there is evidence that events or changes in circumstances have made the recovery of an asset's carrying value to be unlikely. The carrying value of the assets is reduced to the estimated realizable value, and an impairment loss is recorded as a reduction in the carrying value of the related asset and charged to current operations. However, the recovery of the impaired assets would be recorded in current operations up to the cost of the asset, net of accumulated depreciation or amortization, if any, before impairment, when the estimated value of the assets exceeds the carrying value after impairment.

Capitalization of Financing Expenses

Financing expense on borrowing associated with certain qualifying assets during the construction period that meet certain criteria for capitalization can be either capitalized or expensed as incurred. The Company has chosen to expense as a financing expense the cost of manufacturing, acquisition, and construction of property, plant, and equipment that require more than one year from the initial date of manufacture, acquisition, and construction to the date of the estimated completion of the manufacture, acquisition and construction.

The value of the land based on the posted price issued by the Korean tax authority amounted to ₩2,570,382 million as of September 30, 2005 (December 31, 2004: ₩2,498,414 million).

As of September 30, 2005, property, plant and equipment are insured against fire and other casualty losses up to ₩2,857,773 million (December 31, 2004: ₩2,996,483 million). In addition, the Company carries general insurance for vehicles and accident insurance for its employees.

In accordance with the Asset Revaluation Law, the Company revalued a substantial portion of its property, plant and equipment by ₩3,819 billion as of December 31, 1989. The remaining revaluation increments amounting to ₩3,173 billion, net of revaluation tax, were credited to revaluation surplus, a component of shareholders' equity (Note 16).

Construction-in-progress includes capital investments in Gwangyang No. 2 Minimill. Through a resolution of the Board of Directors in May 1998, the construction on the Minimill was temporarily suspended due to the economic situation in the Republic of Korea and the Asia Pacific region. The continuing unstable economic condition and related decrease in the selling price of products, resulting in the deterioration in profitability, drove the management's operation committee's decision in April 2002 to cease the construction on the No. 2 Minimill, and to use the buildings for the Tailor Welded Blank (TWB) project designed to manufacture custom-made automobile body panels. The Company previously recognized impairment losses on the construction-in-progress in Gwangyang

No. 2 Minimill amounting to ₩469,581 million and reclassified related machinery held to be disposed of in the future as other investment assets as of December 31, 2004.

On August 20, 2003, POSCO sold its 15,267,837 SK Telecom Co., Ltd. ADRs to Zeus (Cayman), a tax-exempted subsidiary formed under the laws of Cayman Islands. Zeus then issued zero-coupon, guaranteed and exchangeable bonds amounting to JPY51,622 million which are due in 2008, and are fully and unconditionally guaranteed by POSCO. POSCO may elect to pay the holder cash in lieu of delivering SK Telecom Co., Ltd. ADRs (the Cash Settlement Option). The number of ADRs such holder is entitled to receive will be calculated by dividing the aggregate principal amount of the Notes to be exchanged by the exchangeable price. Under the Cash Settlement Option, such holder is entitled to receive the cash equivalent of the market value of ADRs upon the exercise. These bonds are non-interest bearing and are exchangeable with SK Telecom Co., Ltd. ADRs at the option of the bondholder. The transaction between the POSCO and Zeus is deemed a borrowing transaction under the Korean generally accepted accounting principles. In 2004 and 2005, in compliance with the terms of the exchangeable bonds, the dividends earned by Zeus from the SK Telecom Co., Ltd. ADRs were used to purchase additional 951,350 ADRs which brought down the exchangeable bond price to JPY3,183/ADR.
