Message from the Managements

We are pleased to present the outline of operation and financial results for Makita's 97th interim period, ended September 30, 2008.

n Consolidated Operating Result as Interim Period

For the six months (the period) ended September 30, 2008, the world's economy has been characterized by financial instability caused in part by the sub-prime loan problems in the United States and by a steep rise in raw material prices, those have spilled over into the global economy, and the business climate is rapidly decelerating.

What is more, the decrease in demand in the housing market is affecting Japan and the United States and also Western European countries, adding to the intensity of the market downturn.

In such conditions, Makita has expanded our product lines through the development of power tools such as hammer drills that are equipped with the low-vibration mechanisms which have an established reputation in technology, rechargeable tools that utilize lithium-ion batteries, and gardening equipment outfitted with mini 4-stroke engines.

In production, we are moving forward with the expansion of the Romanian plant in Eastern Europe and construction of the second plant in Brazil in South America in order to reinforce global capacity and balance.

In sales, we are also improving and developing sales and after-service networks by establishing and operating local subsidiaries in India and Colombia.

n Consolidated Net Sales Reached a Record High for Fourth Consecutive Terms as Interim Period

In our consolidated financial results for the period, sales declined in the United States and Japan, but increased 3.6% over the same period of the previous year, to 175,558 million yen, because demand in emerging countries in Eastern Europe, Russia, Southeast Asia, Central and South America, and the Middle East remained strong.

For the period, sales have risen continuously to a new record for the fourth consecutive period and sales have increased for eight consecutive period.

In terms of earnings, operating income rose 6.3% compared to the same period of the previous year, to 36,047 million yen (ratio of operating income to net sales; 20.5%), income before income taxes amounted to 34,453 million yen, a 0.04% decline from the same period of the previous year (ratio of income before income taxes to net sales; 19.6%), and net income for the period amounted to 24,851 million yen (ratio of net income to net sales; 14.2%), up 5.3% from the same period of the previous year.

Net sales by geographic area were as follows:

In Japan, despite a recovery in the number of housing starts, the market environment continues to remain bleak, contributing to a decrease in sales to 24,378 million yen, down 5.0% from the same period of the previous year.

In Europe, although sales in Western Europe fell into a downward trend, sales in Eastern Europe and Russia continued to expand, marking a 5.4% increase over the same period of the previous year to 83,131 million yen.

In North America, sales via the home improvement channel remained steady in persistent stagnation in the U.S. housing market, thanks to having established a partnership with Home Depot U.S.A., Inc., the largest home improvement retailer in the United States, in March 2008. However, sales declined to 25,836 million yen, for a 10.7% decrease, due to a significantly weaker dollar versus the yen in foreign exchange markets for the same period of the previous year.

In Asia, sales remained robust at 13,163 million yen in Southeast Asia, a 19.4% increase over the same period of the previous year.

In other regions such as those in Central and South America which are growth countries with abundant resources,

1

English Translation of CHUKAN-KI JIGYOU NO GOHOUKOKU originally issued in Japanese language

Table of Contents

sales amounted to 10,579 million yen, a 30.1% increase compared to the same period of the previous year; while sales in the Middle East and Africa rose 15.2% to 9,964 million yen, and sales in Oceania climbed 2.8%, to 8,507 million yen.

As a result above, the foreign sales ratio in the period ended September 30, 2008, rose to 86.1%, up 1.2 points from 84.9% in the same period of the previous year.

n Issue to be Addressed

Regarding the outlook for the future, since the financial instability resulting from a U.S. subprime loan problem has been affecting not only advanced nations but the real economy of the emerging countries which are continuing high growth, our critical concern is that the real economy may enter into a global recessionary phase.

Moreover, the environment which surrounds the company is becoming still opaquely and severer due to a rising of material cost and a transition to strong yen phase.

n Acquisition of Own Shares

For the implementation of flexible capital policies in response to changes in the economic environment and gains in shareholder return through an increase in capital efficiency, the Company repurchased 3 million shares of its own common stock at a total cost of 11,923 million yen from May 1, 2008 until May 26, 2008, based on the board of directors resolution of April 30, 2008.

At the meeting of its board of directors on October 31, 2008, the Company further resolved to repurchase up to 3 million additional shares of its own common stock, at a total cost of up to 6,000 million yen, from November 4, 2008 until December 12, 2008.

n The Interim Dividends of 30 Yen Per Share

Makita's basic policy on the distribution of profits is to maintain a dividend payout ratio of at least 30%, with a lower limit on annual cash dividends of 18 yen per share.

For the interim period under review, Makita declared to pay a dividend of 30 yen per share of the same amount as the interim period of 2007, as announced in April 2008.

Based on its dividend policy, Makita's board of directors will decide on proposals for the dividend for the end of the fiscal year at their meeting to approve the financial statements after they are finalized near the end of April 2009.

Their proposals will be presented for discussion and final approval at the Ordinary General Meeting of Shareholders.

We look forward to the continuing support and cooperation of our shareholders.

November 2008

Masahiko Goto
President and Representative Director

Table of Contents

Feature Section

n Establishment of Local Subsidiaries in India and Colombia

The Company established new local subsidiaries in the city of Bangalore in India in April 2008 and in the suburbs of Bogota in the Republic of Colombia in June 2008. The establishment of these local subsidiaries will enable the Makita Group to boost sales and to provide quality after-care service in these two countries. As one of the BRICs, India has the second largest population in the world after China and has been demonstrating spectacular economic growth in recent years. Colombia, a country rich in mineral resources and boasting the second largest population in South America after Brazil, is also expected to achieve sound economic growth in the future.

This brings the number of overseas local subsidiaries to 45.

n Leading the World in Anti-Vibration Technology

In EU countries where many electric tool makers compete in the market, strict standards have been adopted for regulations that apply to the health and safety of workers. Out of concern for the effects electrical tools with powerful vibrations have on the human body, the EU has established regulations which govern the length of time tools of this nature may be used.

Makita's proprietary anti-vibration technology (AVT) achieves excellent vibration suppression in rock material processes where the loading on electric tools is significant and our AVT tools are highly regarded as products that significantly reduce work fatigue.

As high value-added products, Makita's AVT tools are not only attracting attention among users in the industry but are also being featured on TV and in other media.

Basic policy regarding profit distribution

Makita's basic policy on the distribution of profits is to maintain a dividend payout ratio of 30% or greater, with a lower limit on annual cash dividends of 18 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on consolidated net income after certain adjustments. With respect to repurchases of its outstanding shares, Makita aims to implement a flexible capital policy, augment the efficiency of its capital employment, and thereby boost shareholder profit. Also Makita continues to consider execution of own share repurchases in light of trends in stock prices.
