PART I

ITEM 1. - BUSINESS

Golden Enterprises, Inc. (the "Company") is a holding company which owns all of the issued and outstanding capital stock of Golden Flake Snack Foods, Inc., a wholly-owned operating subsidiary company ("Golden Flake"). Golden Enterprises is paid a fee by Golden Flake for providing management services for it.

The Company was originally organized under the laws of the State of Alabama as Magic City Food Products, Inc. on June 11, 1946. On March 11, 1958, it adopted the name Golden Flake, Inc. On June 15, 1963, the Company purchased Don's Foods, Inc. a Tennessee corporation which was merged into the Company on December 10, 1966. The Company was reorganized December 31, 1967 as a Delaware corporation without changing any of its assets, liabilities or business. On January 1, 1977, the Company, which had been engaged in the business of manufacturing and distributing potato chips, fried pork skins, cheese curls and other snack foods, spun off its operating division into a separate Delaware corporation known as Golden Flake Snack Foods, Inc. and adopted its present name of Golden Enterprises, Inc.

The Company owns all of the issued and outstanding capital stock of Golden Flake Snack Foods, Inc.

Golden Flake Snack Foods, Inc.

General

Golden Flake Snack Foods, Inc. ("Golden Flake") is a Delaware corporation with its principal place of business and home office located at One Golden Flake Drive, Birmingham, Alabama. Golden Flake manufactures and distributes a full line of salted snack items, such as potato chips, tortilla chips, corn chips, fried pork skins, baked and fried cheese curls, onion rings and puff corn. These products are all packaged in flexible bags or other suitable wrapping material. Golden Flake also sells a line of cakes and cookie items, canned dips, pretzels, peanut butter crackers, cheese crackers, dried meat products and nuts packaged by other manufacturers using the Golden Flake label. No single product or product line accounts for more than 50% of Golden Flake's sales, which affords some protection against loss of volume due to a crop failure of major agricultural raw materials.

Raw Materials

Golden Flake purchases raw materials used in manufacturing and processing its snack food products on the open market and under contract through brokers and directly from growers. A large part of the raw materials used by Golden Flake consists of farm commodities which are subject to precipitous change in supply and price. Weather varies from season to season and directly affects both the quality and supply available. Golden Flake has no control over the agricultural aspects and its profits are affected accordingly.

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

Distribution

Golden Flake sells its products through its own sales organization and independent distributors to commercial establishments which sell food products in Alabama and in parts of Tennessee, Kentucky, Georgia, Florida, Mississippi, Louisiana, North Carolina, South Carolina, Arkansas, Missouri and Texas. The products are distributed by approximately 470 route salesmen and independent distributors who are supplied with selling inventory by the Company's trucking fleet which operates out of Birmingham, Alabama, Nashville, Tennessee, and Ocala, Florida. All of the route salesmen are employees of Golden Flake and use

3

the direct-store delivery system. Golden Flake is not dependent upon any single customer, or a few customers, the loss of any one or more of which would have a material adverse effect on its business. No single customer accounts for more than 10% of its total sales. Golden Flake has a fleet of 821 company owned vehicles to support the route sales system, including 45 tractors and 122 trailers for long haul delivery to the various company warehouses located throughout its distribution areas, 591 store delivery vehicles and 63 cars and miscellaneous vehicles.

Competition

The snack foods business is highly competitive. In the area in which Golden Flake operates, many companies engage in the production and distribution of food products similar to those produced and sold by Golden Flake. Most, if not all, of Golden Flake's products are in direct competition with similar products of several local and regional companies and at least one national company, the Frito Lay Division of Pepsi Co., Inc., which are larger in terms of capital and sales volume than is Golden Flake. Golden Flake is unable to state its relative position in the industry. Golden Flake's marketing thrust is aimed at selling the highest quality product possible and giving good service to its customers, while being competitive with its prices. Golden Flake constantly tests the quality of its products for comparison with other similar products of competitors and maintains tight quality controls over its products.

Employees

Golden Flake employs approximately 970 employees. Approximately 584 employees are involved in route sales and sales supervision, approximately 274 are in production and production supervision, and approximately 112 are management and administrative personnel.

Golden Flake believes that the performance and loyalty of its employees are two of the most important factors in the growth and profitability of its business. Since labor costs represent a significant portion of Golden Flake's expenses, employee productivity is important to profitability. Golden Flake considers its relations with its employees to be excellent.

Golden Flake has a 401(k) Profit Sharing Plan and an Employee Stock Ownership Plan designed to reward the long term employee for his/her loyalty. In addition, the employees are provided medical insurance, life insurance, and an accident and sickness salary continuance plan. Golden Flake believes that its employee wage rates are competitive with those of its industry and with prevailing rates in its area of operations.

Other Matters

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

The Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and amendments to these reports, are available via the Company's website. The website address is www.goldenflake.com. All required reports are made available on the website as soon as reasonably practicable after they are electronically filed with the Securities and Exchange Commission.

Environmental Matters

There have been no material effects of compliance with government provisions regulating discharge of materials into the environment.

Recent Developments

No significant changes have occurred in the kinds of products manufactured or in the markets or methods of distribution, and no material changes or developments have occurred in the business done and intended to be done by Golden Flake.

ITEM 1A. - RISK FACTORS

Important factors that could cause the Company's actual business results, performance or achievements to differ materially from any forward looking statements or other projections contained in this Annual Form 10-K Report include, but are not limited to the principal risk factors set forth below. Additional risks and uncertainties, including risks not presently known to the Company, or that it currently deems immaterial, may also impair the Company's business and or operations. If the events, discussed in these risk factors occur, the Company's business, financial condition, results of operations or cash flow could be adversely affected in a material way and the market value of the Company's common stock could decline.

Competition

Price competition and consolidation within the Snack Food industry could adversely impact the Company's performance. The Company's business requires significant marketing and sales effort to compete with larger companies. These larger competitors sell a significant portion of their products through discounting and other price cutting techniques. This intense competition increases the possibility that the Company could lose one or more customers, lose market share and/or be forced to increase discounts and reduce pricing, any of which could have an adverse impact on the Company's business, financial condition, results of operation and/or cash flow.

Commodity and Energy Cost Fluctuations

Significant commodity price fluctuations for certain commodities purchased by the Company, particularly potatoes, could have a material impact on results of operations. In an attempt to manage commodity price risk, the Company, in the normal course of business, enters into contracts to purchase pre-established quantities of various types of raw materials, at contracted prices based on expected short term needs. The Company can also be adversely impacted by changes in the cost of natural gas and other fuel costs. Long term increases in the cost of natural gas and fuel costs could adversely impact the Company's cost of sales and selling, marketing and delivery expenses.

There are other risks and factors not described above that could also cause actual results to differ materially from those in any forward looking statement made by the Company.

ITEM 2. - PROPERTIES

The headquarters of the Company are located at One Golden Flake Drive, Birmingham, Alabama 35205. The properties of the subsidiary are described below.

Golden Flake

Manufacturing Plants and Office Headquarters

The main plant and office headquarters of Golden Flake are located at One Golden Flake Drive, Birmingham, Alabama, and are situated on approximately 40 acres of land which is serviced by a railroad spur track. This facility consists of three buildings which have a total of approximately 300,000 square feet of floor area. The plant manufactures a full line of Golden Flake products. Golden Flake maintains a garage and vehicle maintenance service center from which it services, maintains, repairs and rebuilds its fleet and delivery trucks. Golden Flake has adequate employee and fleet parking.

Golden Flake also has a manufacturing plant in Ocala, Florida. This plant was placed in service in November 1984. The plant consists of approximately 100,000 square feet, with allowance for future expansion, and is located on a 28-acre site on Silver Springs Boulevard. The Company manufactures tortilla chips and potato chips from this facility.

The manufacturing plants, office headquarters and additional lands are owned by Golden Flake free and clear of any debts.

Distribution Warehouses

Golden Flake owns branch warehouses in Birmingham, Montgomery, Midfield, Demopolis, Fort Payne, Muscle Shoals, Huntsville, Phenix City, Tuscaloosa, Mobile, Dothan and Oxford, Alabama; Gulfport and Jackson, Mississippi; Knoxville and Memphis, Tennessee; Decatur, Marietta and Macon, Georgia; Jacksonville, Panama City, Tallahassee and Pensacola, Florida and New Orleans, Louisiana. The warehouses vary in size from 2,400 to 8,000 square feet. All distribution warehouses are owned free and clear of any debts.

Vehicles

Golden Flake owns a fleet of 821 vehicles which includes 591 route trucks, 45 tractors, 122 trailers and 63 cars and miscellaneous vehicles. There are no liens or encumbrances on Golden Flake's vehicle fleet. Golden Flake also owns a 1987 Cessna Citation II aircraft.

ITEM 7. - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GOLDEN ENTERPRISES, INC. AND SUBSIDIARY

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion provides an assessment of the Company's financial condition, results of operations, liquidity and capital resources and should be read in conjunction with the accompanying consolidated financial statements and notes.

OVERVIEW

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

The Company manufactures and distributes a full line of snack items, such as potato chips, tortilla chips, corn chips, fried pork skins, baked and fried cheese curls, onion rings and puff corn. The products are all packaged in flexible bags or other suitable wrapping material. The Company also sells a line of cakes and cookie items, canned dips, pretzels, popcorn, peanut butter crackers, cheese crackers, dried meat products and nuts packaged by other manufacturers using the Golden Flake label.

No single product or product line accounts for more than 50% of the Company's sales, which affords some protection against loss of volume due to a crop failure of major agricultural raw materials. Raw materials used in manufacturing and processing the Company's snack food products are purchased on the open market and under contract through brokers and directly from growers. A large part of the raw materials used by the Company consists of farm commodities which are subject to precipitous changes in supply and price. Weather varies from season to season and directly affects both the quality and supply available. The Company has no control of the agricultural aspects and its profits are affected accordingly.

The Company sells its products through its own sales organization and independent distributors to commercial establishments that sell food products primarily in the Southeastern United States. The products are distributed by approximately 470 route representatives and independent distributors who are supplied with selling inventory by the Company's trucking fleet. All of the route representatives are employees of the Company and use the Company's direct-store delivery system.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company's discussion and analysis of its financial condition and results of operations are based upon the Company's consolidated financial statements, the preparation of which in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that in certain circumstances affect amounts reported in the consolidated financial statements. In preparing these financial statements, management has made its best estimates and judgments of certain amounts included in the financial statements, giving due considerations to materiality. The Company does not believe there is a great likelihood that materially different amounts would be reported under different conditions or using different assumptions related to the accounting policies described below. However, application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ materially from these estimates.

12

Revenue Recognition

The Company recognizes sales and related costs upon delivery or shipment of products to its customers. Sales are reduced by returns and allowances to customers.

In November 2001, the Emerging Issues Task Force reached a consensus on Issue No. 01-09 Accounting for Consideration given by a Vendor to a Customer (Including a Reseller of the Vendor's Products) effective for annual or interim periods beginning after December 15, 2001. The issue addresses the recognition, measurement and income statement classification for certain sales incentives. The Company implemented this new accounting policy in the fourth quarter of

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

fiscal 2002. The effect of this accounting change is to adopt this policy as of the beginning of the fiscal 2002 (June 1, 2001). Certain of these expenses, including slotting fees, previously classified as selling, general, and administrative expenses, are now characterized as offsets to net sales. Reclassifications have been made to prior period financial statements to conform to current year presentation. Total vendor sales incentives now characterized as reductions of net sales that previously would have been classified as selling, general and administrative expenses were approximately \$8.8 million, \$10.5 million and \$11.6 million for the years ended 2007 2006 and 2005, respectively. There was no resulting impact on net operating results from adopting EITF 01-09.

Accounts Receivable

The Company records accounts receivable at the time revenue is recognized. Amounts for bad debt expense are recorded in selling, general and administrative expenses on the Consolidated Statements of Operations. The amount of the allowance for doubtful accounts is based on management's estimate of the accounts receivable amount that is uncollectible. The Company records a general reserve based on analysis of historical data. In addition, the Company records specific reserves for receivable balances that are considered high-risk due to known facts regarding the customer. The allowance for bad debts is reviewed quarterly, and it is determined whether the amount should be changed. Failure of a major customer to pay the Company amounts owed could have a material impact on the financial statements of the Company. At June 1, 2007 and June 2, 2006, the Company had accounts receivables in the amount of \$8.5 million and \$8.4 million, net of an allowance for doubtful accounts of \$0.1 million and \$0.1 million, respectively.

The following table summarizes the Company's customer accounts receivable profile as of June 1, 2007:

Amount Range -----	No. of Customers -----
Less than \$1,000.00	1,189
\$1,001.00-\$10,000.00	581

Inventories

Inventories are stated at the lower of cost or market. Cost is computed on the first-in, first out method.

Accrued Expenses

Management estimates certain expenses in an effort to record those expenses in the period incurred. The most significant estimates relate to insurance-related expenses, including self-insurance and a salary continuation plan for certain

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

key executives of the Company. The Company is self-insured for certain casualty losses relating to automobile liability, general liability, workers' compensation, property losses and medical claims. The Company also has stop loss coverage to limit the exposure arising from these claims. Automobile liability, general liability, workers' compensation, and property losses costs are covered by letters of credit with the company's claim administrators.

The Company uses a third-party actuary to estimate the casualty insurance obligations on an annual basis. In determining the ultimate loss and reserve requirements, the third-party uses various actuarial assumptions including compensation trends, health care cost trends and discount rates. The third-party actuary also uses historical information for claims frequency and severity in order to establish loss development factors.

The actuarial calculation includes a margin of error to account for changes in inflation; health care costs, compensation and litigation cost trends as well as estimated future incurred claims. The Company utilized a 75% confidence level for estimating the ultimate outstanding casualty liability. Approximately 75% of each claim should be equal to or less than the ultimate liability recorded based on the historical trends experienced by the Company. If the Company chose a 50% factor, the liability would have been reduced by approximate \$0.2 million. If the Company chose a 90% factor, the liability would have increased by approximately \$0.2 million.

The Company used a 5% investment rate to discount the estimated claims based on the historical payout pattern during 2007 and 2006. A one percentage point change in the discount rate would have impacted the liability by approximately \$51,300.

Actual ultimate losses could vary from those estimated by the third-party actuary. The Company believes the reserves established are reasonable estimates of the ultimate liability based on historical trends.

As of June 1, 2007, the Company's casualty reserve was \$1.9 million and at June 2, 2006 the casualty reserve was \$1.9 million.

Employee medical insurance accruals are recorded based on medical claims processed as well as historical medical claims experienced for claims incurred but not yet reported. Differences in estimates and assumptions could result in an accrual requirement materially different from the calculated accrual.

OTHER MATTERS

Transactions with related parties, included in Note 12 of the Notes to Consolidated Financial Statements, are conducted on an arm's-length basis in the ordinary course of business.

LIQUIDITY AND CAPITAL RESOURCES

Working capital was \$4.3 million at June 1, 2007 compared to \$4.1 million at June 2, 2006. Net cash provided by operations amounted to \$4.6 million in fiscal year 2007, \$2.6 million in fiscal year 2006 and \$2.4 million in fiscal year 2005. During 2007, the principal source of liquidity for the Company's operating needs was provided from operating activities, credit facilities and cash on hand.

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

Additions to property, plant and equipment are expected to be about \$1.5 million in 2008.

Cash dividends of \$1.5 million were paid each of the fiscal years 2007, 2006, and 2005, respectively.

No cash was used to purchase treasury shares in fiscal 2007 and 2006.

During fiscal 2007, the Company's debt proceeds net of re-paid debt was (\$0.4) million.

The following table summarizes the significant contractual obligations of the Company as of June 1, 2007:

Other Commitments

The Company had letters of credit in the amount of \$2,668,846 outstanding at June 1, 2007 to support the Company's commercial self-insurance program.

The Company has a line-of-credit agreement with a local bank that permits borrowing up to \$2 million. The line-of-credit is subject to the Company's continued credit worthiness and compliance with the terms and conditions of the advance application. The Company's line of credit debt at June 1, 2007 was \$622,950 with an interest rate of 8.25%.

The Company's current ratio at year end was 1.37 to 1.00.

Available cash, cash from operations and available credit under the line of credit are expected to be sufficient to meet anticipated cash expenditures and normal operating requirements for the foreseeable future.

OPERATING RESULTS

Net sales increased by 4% in fiscal year 2007, 3% in fiscal year 2006, and 6% in fiscal year 2005. Fiscal 2005 included an extra week of sales. If the extra week is excluded, the increase in net sales for fiscal 2006 would have been 5%.

Cost of sales as a percentage of net sales amounted to 52.3%, 53.5% and 53.7% in 2007, 2006 and 2005 respectively.

Selling, general and administrative expenses were 46.5% of net sales in 2007, 46.1% in 2006 and 46.5% in 2005.

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

The Company's effective tax rates for 2007, 2006 and 2005 were 39.8%, 58.0% and 115.7%, respectively. Note 7 to the Consolidated Financial Statements provide additional information about the provision for income taxes.

MARKET RISK

The principal market risks (i.e. the risk of loss arising from adverse changes in market rates and prices) to which the Company is exposed are interest rates on its cash equivalents and bank loans, and commodity prices affecting the cost of its raw materials.

The Company's cash equivalents consist of short-term marketable securities. Presently these are variable rate money market funds. Its bank loans also carry variable rates. Assuming year end 2007 variable rate investment levels and bank loan balances, a one-point change in interest rates would impact interest income by \$2,538 and interest expense by \$2,706.

The Company is subject to market risk with respect to commodities because its ability to recover increased costs through higher pricing may be limited by the competitive environment in which it operates. The Company purchases its raw materials on the open market, under contract through brokers and directly from growers. Futures contracts have been used occasionally to hedge immaterial amounts of commodity purchases, but none are presently being used.

INFLATION

Certain costs and expenses of the Company are affected by inflation, and the

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

Company's prices for its products over the past several years have remained relatively flat. The Company will contend with the effect of further inflation through efficient purchasing, improved manufacturing methods, pricing, and by monitoring and controlling expenses.

Higher fuel and commodity costs continue to be a challenge.

ENVIRONMENTAL MATTERS

There have been no material effects of compliance with government provisions regulating discharge of materials into the environment.

FORWARD-LOOKING STATEMENTS

This report contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results could differ materially from those forward-looking statements. Factors that may cause actual results to differ materially include price competition, industry consolidation, raw material costs and effectiveness of sales and marketing activities, as described in the Company's filings with Securities and Exchange Commission. You are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date which they are made.

RECENT DEVELOPMENTS

The Company continues to review and analyze its internal audit program and has directed senior management to dedicate resources and take steps to strengthen controls. The company engaged the services of a third party consultant to assist in its review and analysis. The Company is identifying and implementing actions to improve the effectiveness of procedures and internal controls, including enhanced training with respect to financial reporting and disclosure responsibilities.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In November 2004, the FASB issued SFAS No. 151, "Inventory Cost or Amendment of ARB No. 43, Chapter 4." This Statement amends AR 13 No. 43, to clarify abnormal amounts of facility expense, freight, handling costs and waste material should be recognized in current-period charges. In addition, this Statement requires that allocation of fixed production overhead to the costs on conversion be based on the normal capacity of the production facilities. This provision is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. SFAS No. 151 did not have an impact on the Company's financial position, results of operations or cash flows.

In December 2004, the FASB revised its SFAS No. 123 (SFAS No. 123R), "Accounting for Stock Based Compensation." The revision established standards for the accounting of transactions in which an entity exchanges its equity instruments for goods or services particularly transaction in which an entity obtains employee services in share based payment transactions. The revised statement requires a public entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. That cost is to be recognized over the period during which the employee is required to provide service in exchange for the award. Changes in fair value during the requisite service period are to be recognized as compensation cost over that period. In addition the revised statement amends SFAS No. 95, "Statement of Cash Flows," to require that excess tax benefits be reported as a financing cash flow rather than as a reduction of taxes paid. Beginning June 3, 2006, we adopted SFAS No. 123R "Share Based Payment". We adopted the "modified prospective method" in adopting SFAS 123R. The adoption of SFAS 123R did not have a material effect on the current period financial position results of operations, or cash flows.

In June 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement 109" (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in financial statements in accordance with FASB Statement No. 109, "Accounting for Income Taxes". This interpretation prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of a tax position taken. FIN 48 is not expected to have a material impact on our results of operations or financial positions.

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20 and FASB Statement No. 3." This statement carries forward without change the guidance contained in APB Opinion No. 20 for reporting the correction of an error in previously issued financial statements and changes the requirements for the accounting for and reporting of a change in accounting principle. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. The adoption of SFAS No. 154 did not have a significant impact on the Company's results of operations or financial position.

In September 2005, FASB issued its consensus on EITF Issue No. 04-13, Accounting for Purchases and Sales of Inventory with the Same Counterparty. This consensus concludes that an entity is required to treat sales and purchases of inventory between the entity and the same counterparty as one transaction for purposes of applying APB Opinion No. 29, Accounting for Nonmonetary Transactions, when the transactions are entered into in contemplation of each other. The consensus should be applied to new arrangements entered into, or modifications or renewals of existing arrangements, in the first interim or annual reporting period beginning after March 15, 2006. This consensus did not have a material effect on the Company's financial position, results of operation or cash flows.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements." SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. The adoption of SFAS No. 157 is not expected to have a material impact on our financial condition, results of operations or cash flows.

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

To the Stockholders and
Board of Directors of
Golden Enterprises, Inc.

We have audited the accompanying consolidated balance sheets of Golden Enterprises, Inc. and subsidiary as of June 1, 2007 and June 2, 2006, and the related consolidated statements of operations, changes in stockholders' equity and cash flows for each of the three years in the three year period ended June 1, 2007. Our audits also included the financial statement schedule listed at Item 15(a) Schedule II. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Golden Enterprises, Inc. and subsidiary as of June 1, 2007 and June 2, 2006, and the consolidated results of their operations and their cash flows for each of the three years in the three year period ended June 1, 2007, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, such financial statement schedule, when considering in relation to the basic consolidated financial statements, taken as a whole, presents fairly, in all material respects, the information set forth therein.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies of Golden Enterprises, Inc. and subsidiary ("Company") conform to accounting principles generally accepted in the United States of America and to general principles within the snack foods industry. The following is a description of the more significant accounting policies:

Nature of the Business

The Company manufactures and distributes a full line of snack items that are sold through its own sales organization and independent distributors to commercial establishments that sell food products primarily in the Southeastern United States.

Consolidation

The consolidated financial statements include the accounts of Golden Enterprises, Inc. and its wholly-owned subsidiary, Golden Flake Snack Foods, Inc., (the "Company"). All significant inter-company transactions and balances have been eliminated.

Revenue Recognition

The Company recognizes sales and related costs upon delivery or shipment of products to its customers. Sales are reduced by returns and allowances to customers.

Accounts Receivable

The Company records accounts receivable at the time revenue is recognized. Amounts for bad debt expense are recorded in selling, general and administrative expenses on the consolidated statements of income. The determination of the allowance for doubtful accounts is based on management's estimate of uncollectible accounts receivables. The Company records a general reserve based on analysis of historical data. In addition, management records specific reserves for receivable balances that are considered at higher risk due to known facts regarding the customer.

Fiscal Year

The Company ends its fiscal year on the Friday closest to the last day in May. The years ended June 1, 2007, June 2, 2006 and June 3, 2005 included 52, 52, and 53 weeks, respectively.

Fair Value of Financial Instruments

The carrying amount of cash and cash equivalents, receivables, accounts payable and short and long-term debt approximate fair value.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with a maturity of three months or less to be cash equivalents.

Inventories

Inventories are stated at the lower of cost or market. Cost is computed on the first-in, first-out method.

Property, Plant and Equipment

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

Property, plant and equipment are stated at cost. For financial reporting purposes, depreciation and amortization have been provided principally on the straight-line method over the estimated useful lives of the respective assets. Accelerated methods are used for tax purposes.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - CONTINUED

Expenditures for maintenance and repairs are charged to operations as incurred; expenditures for renewals and betterments are capitalized and written off by depreciation and amortization charges. Property retired or sold is removed from the asset and related accumulated depreciation accounts and any profit or loss resulting therefrom is reflected in the statements of operations.

Self-Insurance

The Company is self-insured for certain casualty losses relating to automobile liability, general liability, workers' compensation, property losses and medical claims. The Company also has stop loss coverage to limit the exposure arising from these claims. Automobile liability, general liability, workers' compensation, and property losses costs are covered by letters of credit with the company's claim administrators.

The Company uses a third-party actuary to estimate the casualty insurance obligations on an annual basis. In determining the ultimate loss and reserve requirements, the third-party uses various actuarial assumptions including compensation trends, health care cost trends and discount rates. The third-party actuary also uses historical information for claims frequency and severity in order to establish loss development factors. The actuarial calculation includes a margin of error to account for changes in inflation; health care costs, compensation and litigation cost trends as well as estimated future incurred claims.

Advertising

The Company expenses advertising costs as incurred. These costs are included in selling, general and administrative expenses in the Consolidated Statement of Operations. Advertising expense amounted to \$6,030,702, \$5,970,393 and \$5,503,641 for the fiscal years 2007, 2006 and 2005, respectively.

Income Taxes

Deferred income taxes are provided using the liability method to measure tax consequences resulting from differences between financial accounting standards and applicable income tax laws. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Segment Information

The Company does not identify separate operating segments for management

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

reporting purposes. The results of operations are the basis on which management evaluates operations and makes business decisions. The Company's sales are generated primarily within the Southeastern United States.

Stock Options

The Company adopted SFAS 123R as of June 3, 2006. SFAS 123R establishes standards for accounting of transactions in which an entity exchanges its equity instruments for goods or services, such as when an entity obtains employee services in share-based payment transactions. The revised statement requires a public entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. The cost is to be recognized over the period during which the employee is required to provide service in exchange for the award. Changes in fair value during the required service period are to be recognized as compensation cost over the period. In addition, SFAS 123R amends SFAS No. 95, "Statement of Cash Flows," to require that excess tax benefits be reported as a financing cash flow rather than as a reduction of taxes paid. When we adopted

SFAS 123R, we elected the modified prospective application method and prior period amounts have not been restated. As of June 3, 2006, all outstanding options were fully vested. Additionally, no options were granted during the fifty-two week period ended June 1, 2007. The adoption of SFAS 123R did not have a material effect on the current period financial position, results of operations, or cash flows.

Prior to the effective date of SFAS 123R, we followed Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretation for stock options granted to employees and directors. Because the exercise price of our stock options was equal to or more than fair market value of the underlying stock on the date of grant, no compensation expense was recognized. We adopted the disclosure-only provisions of SFAS No. 123, "Accounting for Stock-Based Compensation," as amended by SFAS No. 148, "Accounting for Stock-Based Compensation-Transition and Disclosure."

The following illustrates the pro-forma information, as required under SFAS No. 123, determined as if we had applied the fair value method of accounting for stock options, during the years ended June 2, 2006 and June 3, 2005:

Basic - Pro-forma	\$ 0.02	\$ -
Diluted - as reported	\$ 0.02	\$ -
Diluted - Pro-forma	\$ 0.02	\$ -

Shipping and Handling Costs

Shipping and handling costs, which include salaries and vehicle operations expenses relating to the delivery of products to customers by the Company are classified as Selling, General and Administrative (SG&A) expenses. Shipping and handling costs classified as SG&A amounted to \$3,257,608 million, \$2,991,430 million and \$2,788,746 million for the fiscal years 2007, 2006 and 2005, respectively.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recently Issued Accounting Pronouncements

In November 2004, the FASB issued SFAS No. 151, "Inventory Cost or Amendment of ARB No. 43, Chapter 4." This Statement amends AR 13 No. 43, to clarify abnormal amounts of facility expense, freight, handling costs and waste material should be recognized in current-period charges. In addition, this Statement requires that allocation of fixed production overhead to the costs on conversion be based on the normal capacity of the production facilities. This provision is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. SFAS No. 151 did not have an impact on the Company's financial position, results of operations or cash flows.

In December 2004, the FASB revised its SFAS No. 123 (SFAS No. 123R), "Accounting for Stock Based Compensation." The revision established standards for the accounting of transactions in which an entity exchanges its equity instruments for goods or services particularly transaction in which an entity obtains employee services in share based payment transactions. The revised statement requires a public entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

of the award. That cost is to be recognized over the period during which the employee is required to provide service in exchange for the award. Changes in fair value during the requisite service period are to be recognized as compensation cost over that period. In addition the revised statement amends SFAS No. 95, "Statement of Cash Flows," to require that excess tax benefits be reported as a financing cash flow rather than as a reduction of taxes paid. Beginning June 3, 2006, we adopted SFAS No. 123R "Share Based Payment". We adopted the "modified prospective method" in adopting SFAS 123R. The adoption of SFAS 123R did not have a material effect on the current period financial position results of operations, or cash flows.

In June 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement 109" (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in financial statements in accordance with FASB Statement No. 109, "Accounting for Income Taxes". This interpretation prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of a tax position taken. FIN 48 is effective for fiscal years beginning after December 15, 2006. FIN 48 is not expected to have a material impact on our results of operations or financial positions.

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20 and FASB Statement No. 3." This statement carries forward without change the guidance contained in APB Opinion No. 20 for reporting the correction of an error in previously issued financial statements and changes the requirements for the accounting for and reporting of a change in accounting principle. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. The adoption of SFAS No. 154 did not have a significant impact on the Company's results of operations or financial position.

In September 2005, FASB issued its consensus on EITF Issue No. 04-13, Accounting for Purchases and Sales of Inventory with the Same Counterparty. This consensus concludes that an entity is required to treat sales and purchases of inventory between the entity and the same counterparty as one transaction for purposes of applying APB Opinion No. 29, Accounting for Nonmonetary Transactions, when the transactions are entered into in contemplation of each other. The consensus should be applied to new arrangements entered into, or modifications or renewals of existing arrangements, in the first interim or annual reporting period beginning after March 15, 2006. This consensus did not have a material effect on the Company's financial position, results of operation or cash flows.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements." SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. The adoption of SFAS No. 157 is not expected to have a material impact on our financial condition, results of

NOTE 9- LONG-TERM INCENTIVE PLANS

The Company has a long-term incentive plan currently in effect under which future stock option grants may be issued. This Plan (the 1996 Plan) is administered by the Stock Option Committee of the Board of Directors, which has sole discretion, subject to the terms of the Plan, to determine those employees, including executive officers, eligible to receive awards and the amount and type of such awards. The Stock Option Committee also has the authority to interpret the Plan, formulate the terms and conditions of award agreements and make all other determinations required in the administration thereof. All options outstanding at the end of the 2007, 2006, and 2005 are exercisable.

The 1996 Plan provides for the granting of the Incentive Stock Options as

Pro forma information regarding net income and earnings per share is presented as if the Company had accounted for its employee stock options under the fair value method. The per share weighted average fair value of the stock options granted during fiscal 2002 was \$.25. The fair value of these options was estimated at the date of the grant using the Black-Scholes option pricing model with the following weighted average assumptions: risk-free interest rate 5.05 percent; dividend yield 6.56 percent; expected option life of 5 years; and expected volatility of 15 percent.

The Black-Scholes options pricing model was developed for use in estimating the fair value of traded options which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because the Company's employee stock options have characteristics significantly

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

different from those of traded options, and because changes in the subjective input assumptions can materially affect an option's fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of the employee stock options.

NOTE 10 - NET INCOME PER SHARE

Basic earnings per common share are computed by dividing earnings available to stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects per share amounts that would have resulted if dilutive potential common stock equivalents had been converted to common stock, as prescribed by Statement of Financial Accounting Standards No. 128, "Earnings per Share". At June 1, 2007, options on all 369,000 shares were not included in the computation of diluted earnings per share because the options' exercise price was greater than the average market price of the common shares and, therefore, the effect would be antidilutive. At June 1, 2006, the effect of options was computed on the 40,000 shares of common stock that were dilutive at that time. Options on the remaining 329,000 shares were antidilutive. At June 3, 2005 options on all 369,000 common shares were antidilutive. The following reconciles the information used to compute basic and diluted earnings per share:

	Average Common Stock Shares -----		
	2007	2006	2005
	-----	-----	-----
Basic weighted average shares outstanding	11,835,330	11,835,330	11,846,419
Effect of options	-	329	-
	-----	-----	-----
	11,835,330	11,835,659	11,846,419

NOTE 11 - DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

The Statement of Financial Accounting Standards No. 107, Disclosures About Fair Value of Financial Instruments requires disclosure of fair value information about financial instruments, whether or not recognized on the face of the balance sheet, for which it is practical to estimate that value. SFAS 107 defines fair value as the quoted market prices for those instruments that are actively traded in financial markets. In cases where quoted market prices are not available, fair values are estimated using present value or other valuation techniques. The fair value estimates are made at a specific point in time, based on available market information and judgments about the financial instruments, such as estimates of timing and amount of expected future cash flows. Such estimates do not reflect any premium or discount that could result from offering

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

for sale at one time the Company's entire holdings of a particular financial instrument, nor do they consider the tax impact of the realization of unrealized gains or losses. In many cases, the fair value estimates cannot be substantiated by comparison to independent markets, nor can the disclose value be realized in immediate settlement of the instrument.

The carrying amounts for cash and cash equivalents approximate fair value because of the short maturity, generally less than three months, of these instruments.

The fair value of notes receivable is estimated by using a discount rate that approximates the current rate for comparable notes. At June 1, 2007 and June 2, 2006 the aggregate fair value was approximately \$2,015,145 and \$2,090,955 compared to a carrying amount of \$1,716,756 and \$1,770,428, respectively.

NOTE 11 - DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS -CONTINUED

The interest rate on the Company's long-term debt is reset monthly to reflect the 30 day LIBOR rate. Consequently, the carrying value of the bank debt approximates fair value.

The carrying value of the Company's salary continuation plan and accrued liability approximates fair value because present value is used in accruing this liability.

The Company does not hold or issue financial instruments for trading purposes and has no involvement with forward currency exchange contracts.

NOTE 12 - COMMITMENTS AND CONTINGENCIES

Rental expense was \$443,752 in 2007, \$354,261 in 2006 and \$316,724 in 2005.

In August 2006, the Company entered into various operating lease agreements to replace aging route vans. The current annual obligation under this agreement is \$109,713. Future minimum lease commitments for operating leases at June 1, 2007 were as follows:

2008	\$109,713
2009	109,713
2010	109,713
2011	109,713
2012	40,679

The Company leases its airplane to a major shareholder of the Company for approximately \$20,000 per month. The lease provides for their personal use of the airplane for up to 100 flight hours per year and is for a term of one year with automatic renewal at the option of either party.

Edgar Filing: GOLDEN ENTERPRISES INC - Form 10-K

The Company had letters of credit in the amount of \$2,668,846 outstanding at June 1, 2007 to support the Company's commercial self-insurance program. The Company pays a commitment fee of 0.50% to maintain the letters of credit.

The Company has entered into various other short term purchase commitments with suppliers for raw materials in the normal course of business.

The Company is subject to routine litigation and claims incidental to its business. In the opinion of management, such routine litigation and claims should not have a material adverse effect upon the Company's consolidated financial statements taken as a whole.

NOTE 13 - CONCENTRATIONS OF CREDIT RISK

The Company's financial instruments that are exposed to concentrations of credit risk consist primarily of cash equivalents and trade receivables.

The Company maintains deposit relationships with high credit quality financial institutions. The Company's trade receivables result primarily from its snack food operations and reflect a broad customer base, primarily large grocery store chains located in the Southeastern United States. The Company routinely assesses the financial strength of its customers. As a consequence, concentrations of credit risk are limited.

The Company's notes receivable require collateral and management believes they are well secured.
