Gilat's high-speed satellite equipment supports GlobalSat-Intelsat joint venture in Mexico Gilat's Skystar 360E(TM) VSAT product will power two-way satellite broadband Internet service in Mexico

Petah Tikva, Israel, February 21, 2003 Gilat Satellite Networks Ltd. (Nasdaq: GILTF) today announced it is providing broadband satellite communications equipment and services to support an important new joint venture in Mexico between GlobalSat and Intelsat Global Services Corporation.

GlobalSat is teaming with Intelsat to introduce two-way satellite broadband Internet service throughout Mexico. The service will target the small office/home office (SOHO) market, small to medium enterprises (SMEs) and remote offices of multinational corporations.

Intelsat's Broadband Services program offers service providers worldwide a turnkey broadband-via-satellite solution that combines satellite space segment and shared-hub services from Intelsat with broadband VSAT hub and earth station equipment from Gilat.

Gilat is a worldwide leader in satellite networking technology, providing end-to-end enterprise networking, rural telephony and broadband Internet solutions to corporations, consumers and governments worldwide. Intelsat offers a complete range of wholesale global satellite services to some of the world's largest telecom carriers, broadcasters, and corporate network and Internet service providers.

Gilat Chairman and Chief Executive Officer Yoel Gat said, "Our support of this important joint venture demonstrates our commitment to meet the VSAT equipment and services needs of the growing Mexican market, as well as other leading satellite broadband services worldwide. This initiative also represents our continued support of Intelsat's Broadband Services program, which offers service providers the opportunity to be successful in their own markets."

Background on Gilat's Skystar 360E VSAT Platform

The Skystar 360E offers a two-way, satellite-based solution to enable interactive broadband Internet Protocol (IP) and multicasting applications. Two-way functionality powers applications that enable high levels of interaction, feedback and access to resources. With DVB standard and extensive IP capabilities, the Skystar 360E supports virtually any data and IP multicast application. Leveraging the reach and power of satellite, the high-speed IP platform is designed for high-performance networking between a central hub and tens to thousands of locations across wide geographical areas.

About GlobalSat

GlobalSat is one of Mexico's leading providers of advanced satellite telecommunication services. The company is 100 percent Mexican-owned and has a strong foundation based on a decade of experience integrating satellite technology for important business groups within the country.

Edgar Filing: GILAT SATELLITE NETWORKS LTD - Form 6-K

With the help of its new technological partnership with Intelsat, GlobalSat has become Mexico's leading Internet service provider. For more information about GlobalSat, please visit www.globalsat.com.mx.

About Intelsat Ltd.

Intelsat, Ltd. offers telephony, corporate network, video and Internet solutions around the globe via capacity on 24 geosynchronous satellites in prime orbital locations.
