**Item 12. Results of Operations and Financial Condition.**

On April 19, 2004, Aviall, Inc. (the Company ) issued the following press release (the Press Release ) announcing its financial results for the first quarter of 2004.

The Press Release contains non-GAAP financial measures as defined in Item 10 of Regulation S-K of the Securities Exchange Act of 1934, as amended (the Exchange Act ). In the Press Release, the Company has provided reconciliations of the non-GAAP financial measures to the most directly comparable financial measures calculated and presented in accordance with generally accepted accounting principles ( GAAP ) in the United States. In addition, the Company has provided in the Press Release the reasons why the Company believes that the non-GAAP financial measures provide useful information to investors and the additional purposes, if any, for which the Company uses the non-GAAP financial measures.

The information in this Form 8-K shall not be deemed filed for purposes of Section 18 of the Exchange Act, and is not incorporated by reference into any filing of the Company, whether made before or after the date hereof, regardless of any general incorporation language in such filing.

**First Quarter Results**

Aviall, Inc. net earnings for the first quarter of 2004 were \$10.0 million, an increase of 39% over net earnings of \$7.2 million in the comparable 2003 period. Aviall earned \$0.30 per share (diluted) in the first quarter of 2004 versus \$0.22 per share (basic and diluted) in the first quarter of 2003.

First quarter 2004 net sales increased 13% to \$283.5 million compared to last year's first quarter net sales of \$251.5 million. Aviall Services strong sales growth reflects a continued increase in parts sales from the military product lines, the incremental impact of new Honeywell product lines added last year, and a general strengthening in sales across all major markets served (military, general aviation and commercial airlines). Inventory Locator Service's net sales continued to show positive growth.

Gross profit of \$47.1 million for the first quarter of 2004 was up \$4.8 million, or 11% higher than the \$42.3 million earned in the first quarter 2003 largely based on higher volume. Gross profit as a percentage of net sales was 16.6% in the first quarter of 2004, reflecting a balanced contribution of the strengthened commercial market sales and continuing demand by the U.S. military for T56 parts. Selling and administrative expenses, as a percentage of sales, fell to 9.7% from 10.0% on increased expenses of \$2.4 million year over year, reflecting the continued favorable ratio of expense to sales leverage generated by the Aviall business model.

Operating income from continuing operations for the first quarter of 2004 increased by \$2.4 million, or 14%, to \$19.5 million, yielding an operating income margin of 6.9% in the first

quarter of 2004, slightly higher than the 6.8% generated in the first quarter in 2003. Interest expense was lower year over year due to the refinancing completed at the end of the second quarter of 2003, and the provision for income taxes returned closer to the statutory rate.

**Review and Outlook**

The Company's first quarter is a very good beginning for 2004, said Paul E. Fulchino, Aviall's chairman, president and chief executive officer. Our success with the Rolls-Royce and Honeywell product lines validates the statements we have made about our growing momentum. Our objective has been to capture the first call when anyone wants to buy an aftermarket aircraft part, and I believe we are beginning to succeed in this area. Despite industry conditions and remaining uncertainty over the pace of the global economic recovery, earnings for the quarter exceeded our expectations largely as a result of increased sales from new Honeywell product lines; increases from military-based sales; and across-the-board growth in our other major markets and product lines.

Fulchino added, Notwithstanding the challenges facing the aerospace industry, Aviall will continue to push forward aggressively with its market penetration programs and business development initiatives.

## PRO FORMA CONSOLIDATED STATEMENTS OF OPERATIONS

(In Thousands)

The unaudited Pro Forma Consolidated Statements of Operations for the three months ended March 31, 2003 and the twelve months ended March 31, 2004 present our consolidated results of operations assuming that the following events, all of which were completed in June 2003, were completed prior to January 1, 2003: (i) the sale of \$200 million of our 7 5/8% Senior Notes due 2001, or the Senior Notes, and the related discharge of Aviall Services 14% Senior Notes due 2007, or the 14% Notes, and reduction of the outstanding balance on Aviall Services revolving credit facility, or the Debt Discharge, and (ii) the lowering of the conversion price of our Series D Senior Convertible Participating Preferred Stock, or the Series D Preferred Stock, and the subsequent conversion of all of the outstanding shares of Series D Preferred Stock into 11,100,878 shares of our common stock, or the Conversion Event. The Debt Discharge and Conversion Event in June 2003 significantly changed our debt and capital structure. The Conversion Event resulted in significant dilution to our common shares outstanding due to the issuance of 11,100,878 shares of common stock and the Debt Discharge lowered our net interest expense. Management believes this pro forma financial information provides it with a mechanism to evaluate year-over-year operating performance on a comparable basis without including the costs associated with the Debt Discharge or Conversion Event. We believe this pro forma presentation is beneficial to investors to provide information on how these consummated transactions would have affected the historical financial statements had they occurred at an earlier time. The adjustments required to reflect such assumptions are set forth in the Pro Forma Adjustments columns.

- (a) We define Variable Working Capital as receivables plus inventories less accounts payable. In no event should Variable Working Capital be considered as an alternative to working capital or any other GAAP measure as an indicator of our performance, nor should Variable Working Capital be considered as an alternative to working capital as an indicator of our relative liquidity to meet our obligations within an ordinary business cycle. We believe that Variable Working Capital is a useful measure, along with measurements under GAAP, in evaluating our financial performance and our ability to leverage sales and earnings. In addition, we use Variable Working Capital as a financial measure to evaluate our management of working capital and as a metric to measure contract and supplier performance. The following table reconciles Variable Working Capital to working capital for the periods presented:

- (b) EBITDA represents earnings from continuing operations before depreciation, amortization, interest and related expense and tax expense. For the twelve months ended December 31, 2003, interest and related expense includes the loss on extinguishment of debt of \$17.3 million in connection with refinancing our debt. In no event should EBITDA be considered as an alternative to net earnings or any other GAAP measure as an indicator of our performance, nor should EBITDA be considered as an alternative to cash flows provided by operating activities as an indicator of cash flows or a measure of liquidity. We believe that EBITDA is a useful measure, along with measurements under GAAP, in evaluating our financial performance and our ability to service our debt and is a conventionally used financial indicator. In addition, management uses EBITDA as a financial measure to evaluate our operating performance. The following table reconciles net earnings to EBITDA for the periods presented:
