Prospectus

8,000,000 Shares

Common Stock

Symmetry Medical Inc. is offering 8,000,000 shares of common stock. This is our initial public offering, and no public market currently exists for our shares. We anticipate that the initial public offering price will be between \$13.00 and \$15.00 per share. After the offering, the market price for our shares may be outside this range.

Our common stock has been approved for listing, subject to official notice of issuance, on the New York Stock Exchange under the symbol SMA.

Investing in our common stock involves a high degree of risk. See Risk Factors beginning on page 9.

Financial Information

We operate on a 52- or 53- week year ending on the Saturday closest to December 31. Our fiscal years 1999, 2000, 2001, 2002 and 2003 ended on January 1, 2000, December 30, 2000, December 29, 2001, December 28, 2002 and January 3, 2004, respectively. Our fiscal years in 2000, 2001 and 2002 contained 52 weeks and our 1999 and 2003 fiscal years contained 53 weeks. Fiscal years are identified in this prospectus according to the calendar year that they most accurately represent. For example, the fiscal year ended January 3, 2004 is referred to herein as fiscal 2003 or fiscal year 2003. The first quarter of fiscal 2003 ended on March 29, 2003, and contained 13 weeks and the first quarter of fiscal 2004 ended on April 3, 2004 and contained 13 weeks. The second quarter of fiscal 2003 ended on June 28, 2003, and contained 13 weeks and the second quarter of fiscal 2004 ended on July 3, 2004 and contained 13 weeks. The third quarter of fiscal 2003 ended on October 4, 2003, and contained 14 weeks and the third quarter of fiscal 2004 ended on October 2, 2004 and contained 13 weeks.

Table of Contents

SUMMARY

This summary highlights information contained elsewhere in this prospectus. This summary does not contain all of the information that you should consider before investing in our common stock. You should read the entire prospectus carefully, including the section entitled "Risk Factors" and the consolidated financial statements and accompanying notes included elsewhere in this prospectus, before making an investment decision. Unless the context requires otherwise, as used in this prospectus (i) the terms "Symmetry," "Symmetry Medical," "we," "us" and "our" refer to Symmetry Medical Inc., a Delaware corporation, and all of its consolidated subsidiaries and (ii) the term "Mettis" refers to Mettis (UK) Limited, a United Kingdom corporation, and its consolidated subsidiaries, which we acquired on June 11, 2003. Unless the context otherwise requires, all pro forma data presented gives effect to the Mettis acquisition as if it occurred at the beginning of fiscal year 2003. Our statement of operations data for fiscal year 2003 only includes the results of Mettis since its acquisition date.

Our Business

We are the world's largest independent provider of implants and related instruments and cases to orthopedic device manufacturers. We also design, develop and produce these products for companies in other segments of the medical device market, including the dental, osteobiologic and endoscopy sectors, and we provide limited specialized products and services to non-healthcare markets, such as the aerospace market. Through our "Total Solutions" approach, we offer our customers a broad range of products, as well as comprehensive services and production capabilities to help them bring their implant systems to market quickly and efficiently. We believe that our Total Solutions approach will provide us with a competitive advantage in the market place.

We market our Total Solutions approach through our experienced sales force that operates in the United States, Europe and Japan. During fiscal year 2003, we generated pro forma revenues of \$158.4 million, serving approximately 500 customers, including 72 new customers added during the year. Our broad customer base includes every major orthopedic device company, such as Biomet Inc., DePuy Inc. (a subsidiary of Johnson & Johnson), Kyocera Corporation, Medtronic Sofamor Danek, Smith & Nephew plc, Stryker Corporation, Synthes, Inc. (formerly Synthes-Stratec, Inc.) and Zimmer Holdings, Inc. We typically serve several product teams and facilities within each of our largest customers, and during the nine months ended October 2, 2004 and fiscal 2003, no single customer represented more than 22.6% of our revenue.

We offer a broad range of products in the following categories:

implants, including forged, cast and machined products for the global orthopedic device market, which represented 36.3% and 27.3% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively;

instruments used in the placement and removal of orthopedic implants and in other surgical procedures, which represented 33.0% and 37.4% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively;

cases, including plastic, metal and hybrid cases used to organize, secure and transport medical devices for orthopedic and other surgical procedures, which represented 23.3% and 29.6% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively; and

other specialized products and services for non-healthcare markets, primarily the aerospace market, which represented 7.4% and 5.7% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

We believe that we are well positioned to grow our business as a result of the expected expansion of the overall orthopedic device market. In addition, we believe that our Total Solutions approach provides us with significant opportunities to increase our sales by expanding the types of products and services we provide to our existing customers and by adding new customers in other medical device market segments.

Table of Contents

Market Opportunity

The global medical device market was estimated to be approximately \$207 billion in 2003. The orthopedic device segment of the medical device market was estimated to be approximately \$16 billion in 2003, and is expected to grow approximately 12% annually to greater than \$25 billion by 2007.

Orthopedic devices principally consist of reconstructive implants used to replace or repair knees, hips, shoulders and other joints, as well as other orthopedic devices to repair bone fractures and the spine. There were approximately 1.5 million reconstructive orthopedic implant procedures performed globally in 2003, an increase of 13% over the previous year. We expect continued growth in the orthopedic device market to be driven by a number of trends including:

growing elderly population;

aging, affluent and active baby boomers ;

improving technologies that expand the market, including minimally invasive surgery;

successful clinical outcomes increasing patient confidence;

increasing patient awareness through orthopedic device companies' direct marketing programs;

increasing volume of procedures to replace older implants (or revision procedures); and

developing international markets.

Our Total Solutions Approach

We believe that we have created a distinctive competitive position in the orthopedic device market based upon our Total Solutions approach. Our acquisition of Mettis in June 2003 expanded our products and services, enabling us to offer an integrated outsourcing solution. Our Total Solutions approach presents our customers with a broad range of products, as well as comprehensive design, engineering and project management services and state of the art production capabilities to help them bring their implant systems to market quickly and efficiently. We believe that our Total Solutions approach will be an increasing competitive advantage in the future. Our Total Solutions offering is based on:

Comprehensive services. We can support our customers' new product offerings from product concept through market introduction and thereafter, by providing seamless design, engineering, prototyping and manufacturing services.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Single source for complete systems. We assist customers in developing new implants, and we design and produce instruments for implant-specific surgical procedures. We also provide customized cases that provide a secure, clearly labeled and well organized arrangement of instruments and devices.

Proprietary Symmetry instruments and cases. Our established lines of proprietary products allow our customers to complete their proprietary implant systems and bring them to market sooner.

Precision manufacturing expertise. Our extensive expertise and know-how enable us to produce large volumes of specialized products to our customers precise standards, which we believe makes us a supplier of choice to the largest orthopedic companies. Our core production competencies include net shaped forging, precision casting, thermo forming, precision sheet metal working and machining/finishing.

Quality and regulatory compliance. Our quality systems are based upon and in compliance with ISO requirements and, where applicable, United States Food and Drug Administration, or FDA, regulations. We believe our level of quality and regulatory compliance systems meet our customers expectations.

Table of Contents

Global reach. Our manufacturing capabilities in the United States and Europe allow us to offer single-source products and services to our multinational customers, and the geographic breadth of our experienced sales force effectively brings our Total Solutions approach to customers globally.

We believe that our Total Solutions approach offers a number of benefits to our customers, including:

Shorter time to market. Our design, engineering and prototyping skills, as well as our ability to transition seamlessly from product development to production of implants, instruments and cases, enable our customers to reduce time to market for their new products.

Reduced total product acquisition costs. Our comprehensive services, including design, engineering, prototyping, project management, production and inventory control, allow our customers to reduce their procurement costs and inventory levels, resulting in lower product acquisition costs.

Increased focus on marketing and research and development efforts. Our extensive production capabilities and comprehensive services offer a one-stop outsourcing solution and allow our customers to focus their resources on their design, development and marketing efforts.

Rationalized and reliable supply chain. Our scale, scope of products and services and Total Solutions approach allow large orthopedic companies to reduce the number of their independent suppliers and streamline their operations.

Enhanced product consistency on a global basis. Our extensive production platform, Total Solutions approach and international presence allow us to meet global demand for orthopedic devices, which is expected to increase.

Our Strategy

Our goal is to increase our share of the orthopedic device market and to leverage our strengths to expand in other medical device market segments. The key elements of our business strategy are to:

Develop strategic relationships with our customers through access to key decision makers. Our scale, scope of products and services and Total Solutions approach position us as an important partner to our customers. This position gives us access to key decision makers, with whom we intend to continue to build strategic relationships.

Capitalize on our Total Solutions approach. We believe that our Total Solutions approach shortens product development cycles, reduces design and manufacturing costs and simplifies purchasing and logistics, and we intend to aggressively market these benefits to our customers.

Increase sales to existing customers by cross selling products and services. Our cases are currently sold in nearly every segment of the medical device market. We believe that our diverse customer base offers us a natural entry point to new orthopedic and non-orthopedic customers for our implants and instruments.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Leverage manufacturing skills. We intend to leverage our investments in sophisticated equipment and manufacturing know-how to expand our existing customer relationships and to obtain new customers.

Increase new product development. Our Design and Development Center provides expertise and coordination for our design, engineering and prototyping services. We intend to use the dedicated expertise of our Design and Development Center to generate additional development projects with our customers and to expand our line of innovative and independently developed instruments and cases.

Collaborate with emerging companies. We believe that new and innovative medical device companies are creating a meaningful market presence and that our Total Solutions approach positions us to help these companies, many of which may have limited resources.

Table of Contents

History

We were established in 1976 as a supplier of instruments to orthopedic device manufacturers. During the 1990 s, we made several acquisitions, which expanded our customer base, enhanced our instrument product offerings and extended our product line to include cases designed for various medical devices and their related instruments. In October 2000, investment funds affiliated with Olympus Partners acquired control of our company through a recapitalization. In this transaction, the Olympus funds invested a total of \$40.5 million in cash to acquire securities representing approximately 94% of our then outstanding voting stock. At that time, all of our stockholders entered into a stockholders agreement that provided for, among other things, customary tag-along, drag-along, preemptive and registration rights. On June 11, 2003, we acquired Mettis, a leading manufacturer of forged, cast and machined implants for the global orthopedic device market. This acquisition significantly expanded our product offerings and increased our European presence, allowing us to develop and manufacture a broad range of implants, instruments and cases for orthopedic device manufacturers on a global basis. In connection with the Mettis acquisition, the Olympus funds collectively invested an additional \$63.0 million in equity and loaned us \$8.0 million through the purchase of senior subordinated notes and stock purchase warrants. See Certain Relationships and Related Transactions.

Olympus Partners

Olympus Partners is a private asset management firm headquartered in Stamford, Connecticut, with assets under management of approximately \$1.7 billion. Through its affiliated entity, OGP III, LLC, Olympus Partners is the general partner of Olympus Growth Fund III, L.P., a \$505 million private equity fund dedicated to leveraged buyouts, recapitalizations and growth capital investments in middle-market companies throughout the United States and Western Europe. Since 1989, Olympus Partners has invested in more than 50 portfolio companies. Olympus Co-Investment Growth Fund III, L.P. and Olympus Executive Fund, L.P., funds affiliated with Olympus Partners, are also investors in our company both directly and indirectly through Olympus/Symmetry Holdings LLC, an affiliate of Olympus Partners that directly holds common stock and preferred stock of our company. For ease of reference, we sometimes refer to Olympus Growth Fund III, L.P., Olympus Co-Investment Growth Fund III, L.P., Olympus Executive Fund, L.P. and Olympus/Symmetry Holdings LLC in this prospectus as the Olympus funds. Prior to this offering, the Olympus funds beneficially owned an aggregate of approximately 82.1% of our common stock. See Principal Stockholders.

Risks Affecting Us

Our business is subject to numerous risks, as discussed more fully in the section entitled Risk Factors immediately following this prospectus summary. We depend on a limited number of customers, and if we lost a significant customer we could lose a material portion of our revenue. In addition, we operate in an industry that presents potential regulatory and product liability risks.

Corporate and Other Information

Our principal executive offices are located at 220 West Market Street, Warsaw, Indiana 46580, and our telephone number is (574) 268-2252. Our website is located at www.symmetrymedical.com. The information contained in, or that can be accessed through, our website is not part of this prospectus.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Symmetry Medical Inc.[®] and PolyVac[®], among others, are registered trademarks of Symmetry Medical Inc. We have trademark rights in these marks in the United States and other countries. We have an application for trademark registration pending with respect to Total Solutions. This prospectus also refers to brand names, trademarks, service marks, and trade names of other companies and organizations, and these brand names, trademarks, service marks, and trade names are the property of their respective holders.

Table of Contents

Market, Ranking and Other Data

The data included in this prospectus regarding markets and ranking, including the size of certain markets and our position within these markets, are based on independent industry publications, security analyst research reports or other published industry sources and estimates based on our management's knowledge and experience in the markets in which we operate. Our management's estimates have been based on information obtained from our customers, distributors, suppliers, trade and business organizations and other contacts in the markets in which we operate. We believe these estimates to be accurate as of the date of this prospectus. However, this information may prove to be inaccurate because of the method by which some of the data were obtained or because this information cannot always be verified with complete certainty due to the limits on availability and reliability of raw data, the voluntary nature of the data gathering process and other limitations and uncertainties inherent in a survey of market size. Except as noted below, none of these publications, reports or other published industry sources were commissioned by us or prepared at our request and we have not sought or obtained the consent from any of these sources to include such market data in this prospectus.

Our belief that we are the world's largest independent developer of implants and related instruments and cases to orthopedic device manufacturers is supported by a report prepared in August 2004 by Knowledge Enterprises, Inc. at our request. Knowledge Enterprises is a strategic services firm focused on the global orthopedic market and has consented to our use of this report. This report identifies the key orthopedic suppliers and the total estimated 2003 orthopedic sales for such suppliers.

Table of Contents

The Offering

Common stock offered by Symmetry 8,000,000 shares

Common stock outstanding after this offering 32,792,318 shares

Use of proceeds We intend to use approximately \$36.4 million of the net proceeds from this offering to repay all of our existing subordinated indebtedness, of which \$8.0 million is held by the Olympus funds, and approximately \$45.0 million to repay a portion of our existing senior indebtedness. We also intend to use approximately \$16.2 million of the net proceeds to repurchase a portion of our outstanding preferred stock and preferred stock warrants, approximately 93% of which are held by our affiliates. In the aggregate, we expect that our affiliates will receive approximately \$23.0 million of the net proceeds from this offering, including \$0.1 million that will be paid to some of our directors and senior officers. See Use of Proceeds and Certain Relationships and Related Transactions.

Proposed NYSE symbol SMA

The number of shares of our common stock to be outstanding immediately after this offering excludes:

872,195 shares of our common stock issuable upon the exercise of outstanding warrants at a weighted average exercise price of \$0.01 per share;

830,955 shares of our common stock issuable upon the exercise of outstanding stock options at a weighted average exercise price of \$3.03 per share; and

2,293,526 shares of our common stock reserved for future issuance under our stock option and stock purchase plans.

Except as otherwise indicated, all of the information presented in this prospectus assumes the following:

the repurchase of 13,005 shares of our outstanding preferred stock and warrants to purchase 452 shares of our preferred stock, approximately 93% of which are held by our affiliates, including 11,000 shares and warrants held by the Olympus funds, in connection with this offering;

the conversion of the 88,583 shares of our outstanding preferred stock and warrants to purchase 3,078 shares of our preferred stock not repurchased into 9,002,832 shares of our common stock and warrants to purchase 286,818 shares of our common stock prior to the completion of the offering;

the effectiveness of a 7.241-for-1 stock split of our common stock, which will occur prior to the offering;

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

an initial public offering price of \$14.00 per share, the mid-point of the range set forth on the cover page of this prospectus;

the effectiveness of our restated certificate of incorporation and restated by-laws, which will become effective prior to the completion of the offering; and

no exercise of the underwriters' over-allotment option.

Table of Contents**Summary Consolidated Financial Data**

The following tables summarize our consolidated financial data for the periods presented. We have derived the summary consolidated financial data as of and for fiscal years 2001, 2002 and 2003 from our audited consolidated financial statements included elsewhere in this prospectus. Our consolidated financial statements as of and for fiscal years 2002 and 2003 have been audited by Ernst & Young LLP, and our consolidated financial statements as of and for fiscal year 2001 have been audited by Arthur Andersen LLP. For more information, see Experts. The financial data as of October 2, 2004 and for the nine months ended October 4, 2003 and October 2, 2004, are derived from our unaudited consolidated financial statements, which in the opinion of management, contain all adjustments necessary for a fair presentation of the consolidated financial data. Operating results for these periods are not necessarily indicative of the results of operations for a full year.

The summary pro forma as adjusted consolidated statement of operations data for the fiscal year 2003 and nine months ended October 4, 2003 give effect to the Mettis acquisition, the sale of 8,000,000 shares of our common stock and the application of the net proceeds therefrom as described under Use of Proceeds, the conversion of all of our remaining shares of preferred stock into common stock and the refinancing of our remaining senior indebtedness under a new senior credit facility as if such transactions occurred on December 29, 2002. The summary pro forma as adjusted consolidated statements of operations data for the nine months ended October 2, 2004 give effect to the same transactions, other than the Mettis acquisition, which is already reflected in such financial data.

You should read the following information together with the information under Selected Consolidated Financial Data, Unaudited Pro Forma Consolidated Statement of Operations, Management's Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and the related notes included elsewhere in this prospectus.

Total shareholders' equity	112,330	184,434

- (1) Includes the results of Mettis since its acquisition on June 11, 2003.
- (2) In fiscal 2003, we refinanced substantially all of our existing indebtedness as part of the financing of the acquisition of Mettis, resulting in a loss on debt extinguishment of \$1,436.
- (3) We enter into interest rate swap agreements to offset against changes in interest rates on our variable rate long-term debt. In accordance with Statement of Financial Accounting Standards (SFAS) No. 133, as amended, *Accounting for Derivative Instruments and Hedging Activities*, these agreements do not qualify for hedge accounting and accordingly, changes in the fair market value of these agreements are recorded each period in earnings.
- (4) For fiscal 2001, reflects the cumulative effect of change in accounting principles resulting in the adoption of SFAS No. 133. For fiscal 2002, reflects a write-off of goodwill in connection with the adoption of SFAS No. 142, *Goodwill and Other Intangible Assets*. Upon completion of the adoption of SFAS No. 142, we determined that the fair market value of the goodwill was lower than book value for one reporting unit, which resulted in an impairment charge.
- (5) The As Adjusted column in the consolidated balance sheet data as of October 2, 2004 gives effect to the sale of 8,000,000 shares of our common stock and the application of the net proceeds therefrom as described under "Use of Proceeds," the conversion of our outstanding shares of preferred stock not repurchased into 9,002,832 shares of our common stock and the refinancing of our remaining senior indebtedness under a new senior credit facility.

Table of Contents

RISK FACTORS

An investment in our common stock involves a high degree of risk. You should carefully consider the risks described below, together with all of the other information in this prospectus, before making a decision to invest in our common stock. If any of the following risks actually occur, our business, financial condition, results of operations and our future growth prospects could suffer. Under these circumstances, the trading price of our common stock could decline, and you may lose all or part of your investment in our common stock.

Risks Related to Our Business

We depend heavily on sales to our significant customers, and our business could be adversely affected if any of them reduced or terminated its purchases from us.

A limited number of large orthopedic device manufacturers, all of whom are our customers, control the predominate share of the orthopedic device market. We depend heavily on sales to these large companies. Sales to our ten largest customers represented approximately 77.7% and 68.3% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively. Our four largest customers accounted for approximately 22.6%, 15.2%, 14.7% and 10.3% of our revenue in the nine months ended October 2, 2004 and our three largest customers accounted for approximately 19.5%, 14.7% and 10.5% of our revenue in fiscal 2003.

We expect that we will continue to depend on a limited number of large companies for a significant portion of our revenue. In addition, our customer base could become more concentrated if, among other things, there is further consolidation among orthopedic device manufacturers. If a significant customer reduces or delays orders from us, terminates its relationship with us or fails to pay its obligations to us, our revenues could decrease significantly.

If we are unable to continue to improve our products and to develop new products, we may experience a decrease in demand for our products or our products could become obsolete, and our business would suffer.

We sell our products to customers in markets that are characterized by technological change, product innovation and evolving industry standards. We are continually engaged in product development and improvement programs, both in collaboration with our customers and independently. Our customers may engage in additional in-house development and manufacturing, and we may be unable to compete effectively with our independent competitors, unless we can continue to develop and assist our customers in developing innovative products. Our competitors' product development capabilities could become more effective than ours, and their new products may get to market before our products, may be more effective or less expensive than our products or render our products obsolete. If one or more of these events were to occur, our business, financial condition and results of operation could be adversely affected. See **Business Competition** for more information about our principal competitors.

We face competition from our customers' in-house capabilities, established independent suppliers and potential new market entrants, and if we lose customers it could have an adverse effect on our revenue and operating results.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Our customers have varying degrees of development and manufacturing capabilities and one or more of them may seek to expand their in-house capabilities in the future. Many of our customers are larger and have greater financial and other resources than we do and can commit significant resources to product development and manufacturing. Most of our independent competitors are smaller companies, many of which have close customer relationships and either a low cost structure or highly specialized design or production capabilities. Our independent competitors may consolidate and some of our current and future competitors, either alone or in conjunction with their respective parent corporate groups, may have financial resources and research and development, sales and marketing and manufacturing capabilities or brand recognition that are greater than ours. In addition, the innovative nature of our markets may attract new entrants to the field. Our products may not be able to compete successfully with the products of other companies, which could result in the loss of customers and, as a result, decreased revenue and operating results.

Table of Contents

If product liability lawsuits are brought against us or our customers our business may be harmed.

The manufacture and sale of our healthcare and other products, including our aerospace products, expose us to potential product liability claims and product recalls, including those which may arise from misuse or malfunction of, or design or manufacturing flaws in, our products, or use of our products with components or systems not manufactured by us. Future product liability claims or product recalls, regardless of their ultimate outcome, could require us to spend significant time or money in litigation or otherwise require us to pay significant damages, which could adversely affect our earnings and financial condition.

We carry product liability insurance which is limited in scope and amount and may not be adequate to protect us against product liability claims that arise in the future. We may be unable to maintain this insurance at reasonable costs and on reasonable terms, if at all.

Our business strategy is based on certain assumptions about the orthopedic device market and the acceptance by our customers of our Total Solutions offering, which, if incorrect, may adversely affect our growth and profitability.

We believe that the aging of the general population and increasingly active lifestyles and other trends in the industry will increase the need for orthopedic implant products, which we expect to increase demand for our products. Our expectations regarding demand for our products could materially differ from actual demand if our assumptions regarding these trends and continued acceptance of our products by orthopedic device manufacturers and the end-user market prove to be incorrect.

Prior to our acquisition of Mettis we provided instruments and cases. The acquisition of Mettis, on June 11, 2003, enabled us to offer our customers complete implant systems implants, instruments and cases. Our revenue to date have been derived primarily from the sale of implants, instruments and cases separately, or instruments and cases together, and we have derived relatively little revenue from sales of our Total Solutions offering. We cannot assure you that we will realize the expected benefits of our Total Solutions offering. Customers may not embrace our Total Solutions approach for a number of reasons, including a desire to maintain relationships with multiple outside suppliers or to rely on their in-house capabilities to develop and produce significant elements of their implant systems. In addition, we may not effectively implement our Total Solutions approach, including by not effectively managing our marketing, design, development or manufacturing activities across multiple product lines. Finally, if our competitors successfully replicate our products and services, then our Total Solutions approach may not provide us with a competitive advantage in the market. If we do not realize the expected benefits of our Total Solutions approach, we may not achieve our growth and profit goals.

Our operating results are subject to significant potential fluctuation and you should not rely on historical results as an indication of our future results.

Our operating results have fluctuated in the past and may vary significantly from quarter to quarter or year to year in the future due to a combination of factors, many of which are beyond our control. These factors include:

the timing of significant orders and shipments, including the effects of changes in inventory management practices by our customers;

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

the number, timing and significance of new products and product introductions and enhancements by us, our customers and our competitors;

changes in pricing policies by us and our competitors;

changes in treatment practices;

restrictions and delays caused by regulatory review of our customers' products;

recalls of our customers' products;

availability and cost of raw materials; and

general economic factors.

Table of Contents

Our recent acquisition of Mettis may make it more difficult for us to evaluate and predict our future operating performance because our historical results of operations as a combined entity are limited and our audited financial statements only reflect the operations of Mettis since we acquired it in June 2003. Consequently, our historical results of operations may not give you an accurate indication of how we, together with the former Mettis operations, will perform in the future.

Our quarterly revenue and operating results may vary significantly in the future and period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indications of our future performance. We cannot assure you that our revenue will increase or be sustained in future periods or that we will be profitable in any future period. Any shortfalls in revenue or earnings from levels expected by securities or industry analysts could have an immediate and significant adverse effect on the trading price of our common stock in any given period.

If we do not retain key individuals and retain and attract skilled manufacturing workers, we may not be able to operate successfully, and we may not be able to meet our strategic objectives.

Our success depends in part upon the retention of key managerial, sales and technical personnel, particularly skilled manufacturing workers. We compete for such personnel with other companies and other organizations, many of which are larger and have greater name recognition and financial and other resources than we do. There can be no assurance that we will be successful in retaining our current personnel or in hiring or retaining qualified personnel in the future. The loss of key personnel or the inability to hire or retain qualified personnel in the future could have a material adverse effect on our ability to operate successfully.

We compete with numerous precision manufacturing companies to attract and retain qualified and highly skilled manufacturing employees. Our Warsaw, Indiana facilities, in particular, face significant competition, including from certain of our customers and other companies located in or near Warsaw that are larger and have greater financial and other resources than we do, for skilled production employees. If we are not able to retain and attract skilled manufacturing employees, we may be unable to support our anticipated growth, which could adversely affect our profitability.

A significant shift in technologies or methods used in the treatment of damaged or diseased bone and tissue could make our products obsolete or less attractive.

The development of new technologies could reduce demand for our products. For example, pharmaceutical advances could result in non-surgical treatments gaining more widespread acceptance as a viable alternative to orthopedic implants. The emergence of new biological tissue-based or synthetic materials to regenerate damaged or diseased bone and to repair damaged tissue could increasingly minimize or delay the need for implant surgery and provide other biological alternatives to orthopedic implants. New surgical procedures could diminish demand for our instruments. A significant shift in technologies or methods used in the treatment of damaged or diseased bone and tissue could adversely affect demand for our products.

We depend on various third party suppliers, and in some cases a single third party supplier, for key components and raw materials used in our manufacturing processes and the loss of these sources could harm our business.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

We use a number of raw materials, including titanium, cobalt chrome, stainless steel and nickel alloys, and various other components in our products. Although we generally believe these materials are readily available from multiple sources, from time to time we rely on a limited number of suppliers and in some cases on a single source vendor. For example, we obtain patented Radel R plastic, which is designed to withstand intense heat produced during frequent sterilizations, for use in our instrument handles and plastic cases from a single supplier. Any supply interruption in a limited or sole-sourced component or raw material could materially harm our ability

Table of Contents

to manufacture our products until a new source of supply, if any, could be found. We may be unable to find a sufficient alternative supply channel in a reasonable time period or on commercially reasonable terms if at all. This could interrupt our business or reduce the quality of our products.

If we are unable to manage changes in our business and our anticipated growth, our business could be harmed.

Our acquisition of Mettis on June 11, 2003 significantly increased the size and scope of our operations. Our business has continued to grow at a fast pace since the acquisition, and we believe we will continue to grow at a significant rate. Rapid growth of our business may place a strain on our managerial, operational and financial resources and systems. We are still in the process of completing our integration of Mettis' business, and we cannot assure you that we will be successful in our integration efforts. We are also currently implementing new management information systems to assist us in consolidating our enterprise-wide operating and financial performance information. To execute our anticipated growth successfully, we must attract and retain qualified personnel and manage and train them effectively. Any failure by us to implement our new management information systems, to integrate Mettis successfully, to develop our management, expand our work force or otherwise manage our growth effectively could have an adverse effect on our ability to achieve our business strategy. Our growth may be impaired if we are unable to meet the demands of our customers, which could result in our customers turning to alternative suppliers.

We require a significant amount of cash to service our indebtedness, which reduces the cash available to finance our organic growth and strategic acquisitions, alliances and collaborations.

We have a significant amount of indebtedness. As of October 2, 2004, on an as adjusted basis giving effect to this offering and the application of proceeds herefrom, our total indebtedness, including current maturities, would have been \$62.7 million, and we would have been able to borrow an additional \$24.9 million under our new senior credit facility that we will enter into in connection with this offering. As of October 2, 2004, on an as adjusted basis, our required debt service obligations under the new senior credit facility would have been \$3.5 million, \$5.2 million, \$7.0 million, \$8.8 million and \$25.6 million during the following five fiscal years, respectively.

Our indebtedness could:

make us more vulnerable to unfavorable economic conditions;

make it more difficult to obtain additional financing in the future for working capital, capital expenditures or other general corporate purposes;

require us to dedicate or reserve a large portion of our cash flow from operations for making payments on our indebtedness, which would prevent us from using it for other purposes;

make us susceptible to fluctuations in market interest rates that affect the cost of our borrowings to the extent that our variable rate debt is not covered by interest rate derivative agreements; and

make it more difficult to pursue strategic acquisitions, alliances and collaborations.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Our ability to service our indebtedness will depend on our future performance, which will be affected by prevailing economic conditions and financial, business, regulatory and other factors. Some of these factors are beyond our control. We believe that, based upon current levels of operations, we will be able to meet our debt service obligations when due. Significant assumptions underlie this belief including, among other things, that we will continue to be successful in implementing our business strategy and that there will be no material adverse developments in our business, liquidity or capital requirements. If we cannot generate sufficient cash flow from operations to service our indebtedness and to meet our other obligations and commitments, we might be required to refinance our debt or to dispose of assets to obtain funds for such purpose. We cannot assure you that refinancings or asset dispositions could be effected on a timely basis or on satisfactory terms, if at all, or would be permitted by the terms of our debt instruments.

Table of Contents

Our new senior credit facility will contain restrictions that limit our ability to pay dividends, incur additional debt, make acquisitions and make other investments.

In connection with this offering, we will enter into a new senior credit facility. The new senior credit facility will contain covenants that restrict our ability to make distributions to stockholders or other payments unless we satisfy certain financial tests and comply with various financial ratios. If we do not satisfy these tests or comply with these ratios, our creditors could declare a default under our debt instruments, and our indebtedness could be declared immediately due and payable. Our ability to comply with the provisions of our new senior credit facility may be affected by changes in economic or business conditions beyond our control.

Our new senior credit facility will also contain covenants that limit our ability to incur indebtedness, acquire other businesses, make capital expenditures and impose various other restrictions. These covenants could affect our ability to operate our business and may limit our ability to take advantage of potential business opportunities as they arise. We may be unable to comply with the forgoing financial ratios or covenants and, if we fail to do so, we may be unable to obtain waivers from our lenders. See Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources.

Our future capital needs are uncertain and we may need to raise additional funds in the future.

Our future capital needs are uncertain and we may need to raise additional funds in the future through debt or equity offerings. Our future capital requirements will depend on many factors, including:

revenue generated by sales of our products;

expenses incurred in manufacturing and selling our products;

costs of developing new products or technologies;

costs associated with capital expenditures;

costs associated with our expansion;

costs associated with regulatory compliance, including maintaining compliance with the quality system regulations imposed by the FDA; and

the number and timing of acquisitions and other strategic transactions.

As a result of these factors, we may need to raise additional funds, and these funds may not be available on favorable terms, or at all. Furthermore, if we issue equity or convertible debt securities to raise additional funds, our existing stockholders may experience dilution, and the new equity or convertible debt securities may have rights, preferences and privileges senior to those of our existing stockholders. If we

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

cannot raise funds on acceptable terms, we may not be able to develop or enhance our products, execute our business strategy, take advantage of future opportunities, or respond to competitive pressures or unanticipated customer requirements.

We may not realize all of the sales expected from new product development programs.

We incur substantial expenses in developing and testing new products and related devices. The realization of additional revenue from new product development efforts is inherently subject to a number of important risks and uncertainties, including, directly or indirectly, end-user acceptance of the product, reimbursement approval of third-party payors such as Medicaid, Medicare and private insurers and, in some cases, FDA or comparable foreign regulatory approval of the product. In addition, our customers typically have no contractual requirement to purchase from us the products that we develop for their medical devices, and they could seek to have another supplier or in-house facilities manufacture products that we have developed for their medical devices. We also incur costs and make capital expenditures for new product development and production based upon certain estimates of production volumes for our existing and anticipated products. If the actual demand for our products is less than planned, our revenue and net income may decline.

Table of Contents

Our earnings could decline if we write off goodwill or intangible assets created as a result of our various acquisitions.

As a result of our various acquisitions we have accumulated a substantial amount of goodwill, amounting to \$125.5 million as of October 2, 2004, or approximately 43.7% of our total assets as of such date. Goodwill and certain intangible assets are not amortized but rather are tested for impairment by us annually or more frequently if an event occurs or circumstances develop that would likely result in impairment. Examples of such events or circumstances include, but are not limited to, a significant adverse change in legal or business climate, an adverse regulatory action or unanticipated competition. We completed annual impairment tests as of October 1, 2003 and 2002 and concluded at those dates that no impairment of goodwill or intangible assets existed. During 2002, in connection with the adoption of SFAS No. 142, *Goodwill and Other Intangible Assets*, we recognized impairment of approximately \$1.1 million, which is reflected as a cumulative effect of an accounting change in our statement of operations. In the future, we could recognize impairment of our goodwill or other intangible assets and that impairment could result in a charge to our results of operation and have an adverse effect on our financial condition.

We had net losses in fiscal years 2000 and 2001, and we may not be profitable in the future.

We experienced net losses of \$5.9 million and \$0.1 million in fiscal years 2000 and 2001, respectively. These net losses resulted primarily from interest expense on funds borrowed in connection with our 2000 recapitalization and other expenses related to the recapitalization. There can be no assurance that we will be profitable in the future.

We anticipate incurring a pre-tax charge of approximately \$9.3 million on the early extinguishment of debt in the quarter this offering is completed. As a result of this charge, it is likely we will report a net loss in that quarter.

If we are unable to protect our intellectual property and property rights, or are subject to intellectual property claims by third parties, our business could be harmed.

We rely on a combination of patents, trade secrets, copyrights, know-how, trademarks, license agreements and contractual provisions to establish and protect our proprietary rights to our technologies and products. We cannot guarantee that the steps we have taken or will take to protect our intellectual property rights will be adequate or that they will deter infringement, misappropriation or violation of our intellectual property. Litigation may be necessary to enforce our intellectual property rights and to determine the validity and scope of our proprietary rights. Any litigation could result in substantial expenses and may not adequately protect our intellectual property rights. In addition, the laws of some of the countries in which our products are or may be sold may not protect our products and intellectual property to the same extent as U.S. laws, or at all. We may be unable to protect our rights in trade secrets and unpatented proprietary technology in these countries. If our trade secrets become known, we may lose our competitive advantages.

We seek to protect our trade secrets, know-how and other unpatented proprietary technology, in part, with confidentiality agreements with our employees, independent distributors and customers. We cannot assure you, however, that:

these agreements will not be breached;

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

we will have adequate remedies for any breach; or

trade secrets, know-how and other unpatented proprietary technology will not otherwise become known to or independently developed by our competitors.

We hold licenses with third parties that are necessary to utilize certain technologies used in the design and manufacturing of some of our products. The loss of such licenses would prevent us from manufacturing, marketing and selling these products, which could harm our business.

Table of Contents

In addition, third parties may claim that we are infringing, misappropriating or violating their intellectual property rights. We could be found to infringe those intellectual property rights, which could affect our ability to manufacture any affected product. In addition, any protracted litigation to defend or prosecute our intellectual property rights could drain our financial resources, divert the time and effort of our management and cause customers to delay or limit their purchases of the affected product until resolution of the litigation.

Any litigation or claims against us, whether or not successful, could result in substantial costs and harm our reputation. In addition, intellectual property litigation or claims could force us to do one or more of the following:

cease selling or using any of our products that incorporate the challenged intellectual property, which could adversely affect our revenue;

obtain a license from the holder of the intellectual property right alleged to have been infringed, which license may not be available on reasonable terms, if at all; and

redesign or, in the case of trademark claims, rename our products to avoid infringing the intellectual property rights of third parties, which may not be possible and could be costly and time-consuming if it is possible to do so.

Efforts to acquire other companies or product lines may divert our managerial resources away from our business operations, and if we complete an acquisition, we may incur or assume additional liabilities or experience integration problems.

We may seek to acquire businesses or product lines for various reasons, including to provide new product manufacturing and service capabilities, add new customers, increase penetration with existing customers or expand into new geographic markets. Our ability to successfully grow through acquisitions depends upon our ability to identify, negotiate, complete and integrate suitable acquisitions and to obtain any necessary financings. These efforts could divert the attention of our management and key personnel from our business operations. If we complete acquisitions, we may also experience:

difficulties in integrating any acquired companies, personnel and products into our existing business;

delays in realizing the benefits of the acquired company or products;

diversion of our management's time and attention from other business concerns;

limited or no direct prior experience in new markets or countries we may enter;

higher costs of integration than we anticipated;

difficulties in retaining key employees of the acquired business who are necessary to manage these businesses;

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

difficulties in maintaining uniform standards, controls, procedures and policies throughout our acquired companies; or

adverse customer reaction to the business combination.

In addition, an acquisition could materially impair our operating results by causing us to incur debt or requiring us to amortize acquisition expenses and acquired assets.

We are subject to certain risks associated with our foreign operations.

We have significant international operations, specifically in the United Kingdom and France. Certain risks are inherent in international operations, including:

difficulties in enforcing agreements and collecting receivables through certain foreign legal systems;

foreign customers who may have longer payment cycles than customers in the United States;

Table of Contents

tax rates in certain foreign countries that may exceed those in the United States and foreign earnings that may be subject to withholding requirements or the imposition of tariffs, exchange controls or other restrictions including transfer pricing restrictions when products produced in one country are sold to an affiliated entity in another country;

general economic and political conditions in countries where we operate or where end-users of orthopedic devices reside may have an adverse effect on our operations;

difficulties associated with managing a large organization spread throughout various countries;

difficulties in enforcing intellectual property rights; and

required compliance with a variety of foreign laws and regulations.

If we continue to expand our business globally, our success will depend, in part, on our ability to anticipate and effectively manage these and other risks. We cannot assure you that these and other factors will not have a material adverse effect on our international operations or our business as a whole.

Currency exchange rate fluctuations could have an adverse effect on our revenue and financial results.

We generate a significant portion of our revenue and incur a significant portion of our expenses in currencies other than U.S. dollars. To the extent that we are unable to match revenue received in foreign currencies with costs incurred in the same currency, exchange rate fluctuations in any such currency could have an adverse effect on our financial results.

We may be adversely affected as a result of the long lead times required for sales of certain new products.

We often compete for business at the beginning of the development of new medical devices or upon customer redesign of existing medical devices. Our customers generally must obtain clearance or approval from the FDA before commercially distributing their products. Unless exempt, a new medical device must be approved for commercial distribution in the United States by the FDA through the 510(k) pre-market Notification Process or, in some cases, through the more burdensome pre-market approval, or PMA, process. It generally takes three to six months from the date of submission to the FDA to obtain 510(k) clearance and one to three years from the date of submission to the FDA to obtain approval through the PMA process, but in each case may take significantly longer. This results in long lead times for some of our customers' new products, which may make it difficult in the short term for us to obtain sales of new products to replace any unexpected decline in sales of existing products.

We may be adversely impacted by work stoppages and other labor matters.

Currently, none of our employees are unionized. However, from time to time some of our employees have attempted to unionize at two of our facilities. In addition, some of our orthopedic device customers have unionized work forces. While we have not experienced any adverse effects

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

from work stoppages or slow-downs at our customers' facilities, work stoppages or slow-downs experienced by us, our suppliers or our customers or their suppliers could result in slow-downs or closures of facilities where our products are made or used. We cannot assure you that we will not encounter strikes, further unionization efforts or other types of conflicts with labor unions or our employees, which could have an adverse effect on our financial results.

If a natural or man-made disaster strikes one or more of our manufacturing facilities, we may be unable to manufacture certain products for a substantial amount of time and our revenue could decline.

We have ten manufacturing facilities, which are located in the United States, the United Kingdom and France. These facilities and the manufacturing equipment and personnel know-how that we use to produce our products would be difficult to replace and could require substantial lead-time to repair or replace. Our facilities

Table of Contents

may be affected by natural or man-made disasters. In the event that one of our facilities was affected by a disaster, we would be forced to attempt to shift production to our other manufacturing facilities or rely on third-party manufacturers, and our other facilities or a third-party manufacturer may not have the capability to effectively supply the affected products. Although we have insurance for damage to our property and the interruption of our business, this insurance may not be sufficient in scope or amount to cover all of our potential losses and may not continue to be available to us on acceptable terms, or at all.

Our former independent public accountant, Arthur Andersen LLP, has ceased operations, and you may be unable to exercise effective remedies against it in any legal action.

Our former independent public accountant, Arthur Andersen LLP, provided us with auditing services for fiscal year 2001, including issuing an audit report with respect to our audited consolidated financial statements as of and for fiscal 2001 included elsewhere in this prospectus. On June 15, 2002, a jury in Houston, Texas found Arthur Andersen LLP guilty of a federal obstruction of justice charge arising from the federal government's investigation of Enron Corp. On August 31, 2002, Arthur Andersen LLP ceased practicing before the United States Securities and Exchange Commission, or SEC.

Arthur Andersen LLP has not reissued its audit report with respect to the audited consolidated financial statements included in this prospectus covered by such report. Furthermore, Arthur Andersen LLP has not consented to the inclusion or incorporation by reference of its audit report in the registration statement of which this prospectus forms a part or in any other filings we may make with the SEC. As a result, you may not have an effective remedy against Arthur Andersen LLP in connection with a material misstatement or omission with respect to our audited consolidated financial statements that are included elsewhere in this prospectus, the registration statement of which this prospectus forms a part or any other filing we may make with the SEC, including any claim under Sections 11 and 12 of the Securities Act of 1933, as amended, or the Securities Act. In addition, even if you were able to assert such a claim, as a result of its conviction and other lawsuits, Arthur Andersen LLP may fail or otherwise have insufficient assets to satisfy claims made by investors or by us that might arise under federal securities laws or otherwise relating to any alleged material misstatement or omission with respect to our audited consolidated financial statements. In addition, in connection with any future capital markets transaction in which we are required to include financial statements that were audited by Arthur Andersen LLP, as a result of the foregoing investors may elect not to participate in any such offering or, in the alternate, may require us to obtain a new audit with respect to previously audited financial statements. Consequently, our financing costs may increase or we may miss attractive capital market opportunities.

Risks Related to Our Industry

Orthopedic device manufacturers have significant leverage over their independent suppliers and consolidation could increase their leverage, which could result in the loss of customers or force us to reduce our prices.

We compete with many distributors and manufacturers to develop and supply implants, surgical instruments and cases to a limited number of large orthopedic device manufacturers. As a result, orthopedic device manufacturers have historically had significant leverage over their independent suppliers. For example, independent suppliers like us are subject to continuing pressure from the major orthopedic device manufacturers to reduce the cost of products and services while maintaining quality levels. In recent years, the medical device industry has experienced substantial consolidation. If the medical device industry, and the orthopedic device industry in particular, continues to consolidate, competition to provide products and services to orthopedic device manufacturers may become more intense. Orthopedic device manufacturers may seek to use their market power to negotiate price or other concessions for our products. If we are forced to reduce prices or if we lose customers because of competition, our revenue and results of operations would suffer.

Table of Contents

Our business is indirectly subject to healthcare industry cost containment measures that could result in reduced sales of or prices for our products.

Acceptance of our customers' products by hospitals, outpatient centers and physicians depend on, among other things, reimbursement approval of third-party payors such as Medicaid, Medicare and private insurers. The continuing efforts of government, insurance companies and other payors of healthcare costs to contain or reduce those costs could lead to lower reimbursement rates or non-reimbursement for medical devices that use our products. If that were to occur, medical device manufacturers might insist that we lower prices on products related to the affected medical device or they might significantly reduce or eliminate their purchases from us of these related products, which could affect our profitability.

We and our customers are subject to substantial government regulation that is subject to change and could force us to make modifications to how we develop, manufacture and price our products.

The medical device industry is regulated extensively by governmental authorities, principally the FDA and corresponding state and foreign regulatory agencies. Some of our manufacturing processes are required to comply with quality systems regulations, including current good manufacturing practice requirements that cover the methods and documentation of the design, testing, production, control, quality assurance, labeling, packaging and shipping of our products. Further, some of our facilities, records and manufacturing processes are subject to periodic unscheduled inspections by the FDA or other agencies. Failure to comply with applicable medical device regulatory requirements could result in, among other things, warning letters, fines, injunctions, civil penalties, repairs, replacements, refunds, recalls or seizures of products, total or partial suspensions of production, refusal of the FDA or other regulatory agencies to grant future pre-market clearances or approvals, withdrawals or suspensions of current clearances or approvals and criminal prosecution.

In addition, orthopedic implants and other medical devices produced by our customers are subject to intensive regulation and potential pre-approval requirements by the FDA and similar international agencies that govern a wide variety of product activities from design and development to labeling, manufacturing, promotion, sales and distribution. Compliance with these regulations may be time consuming, burdensome and expensive for our customers and, indirectly, for us to the extent that our customers' compliance depends on our operations. These regulations could negatively affect our customers' abilities to sell their products, which in turn would adversely affect our ability to sell our products. This may result in higher than anticipated costs or lower than anticipated revenue.

The regulations that we and our customers are subject to are complex, change frequently and have tended to become more stringent over time. Federal and state legislatures have periodically considered programs to reform or amend the U.S. healthcare system at both the federal and state levels. In addition, these regulations may contain proposals to increase governmental involvement in healthcare, lower reimbursement rates or otherwise change the environment in which healthcare industry participants operate. Foreign governmental authorities that regulate the manufacture and sale of medical devices have become increasingly stringent and, to the extent we sell our products in foreign countries, we may be subject to rigorous regulation in the future. Regulatory changes could result in restrictions on our ability to carry on or expand our operations, higher than anticipated costs or lower than anticipated revenue.

If our customers fail to obtain, or experience significant delays in obtaining, FDA clearances or approvals to commercially distribute our future products our ability to sell our products could suffer.

Some of our medical devices are subject to rigorous regulatory pre-approval by the FDA and other federal, state and foreign governmental authorities. Our customers are typically responsible for obtaining the applicable regulatory approval for the commercial distribution of our

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

products. The process of obtaining this approval, particularly from the FDA, can be costly and time consuming, and there can be no assurance that our customers will obtain the required approvals on a timely basis, if at all. The FDA, for example, assigns medical devices to one of three classes which determines, among other things, the type and degree of FDA approval required to

Table of Contents

commercially distribute the device in the United States. We produce Class I, II and III devices. Class I devices are deemed to present little risk to patients and are generally exempt from FDA approval requirements. Class II devices can generally be commercially distributed only after the device has received 510(k) clearance. The FDA will clear marketing of a medical device through the 510(k) process if certain design, testing and validation requirements are met and it is demonstrated that the device is substantially equivalent to a device that was legally marketed prior to May 28, 1976, or to another commercially available device subsequently cleared through the 510(k) Pre-Market Notification process. This process generally takes three to six months, but may take substantially longer. Before a Class III device can be commercially distributed in the United States, a pre-market approval, or PMA, must be obtained from the FDA. The PMA process can be expensive and uncertain, requires detailed and comprehensive scientific and other data and generally takes between one and three years, but may take significantly longer. The commercial distribution of any products we develop that require regulatory clearance may be delayed. In addition, because we cannot assure you that any new products or any product enhancements we develop for commercial distribution in the United States will be exempt from the FDA market clearance requirements or subject to the shorter 510(k) clearance process, the regulatory approval process for our products or product enhancements may take significantly longer than anticipated by us or our customers.

We may be adversely affected by the impact of environmental and safety regulations.

We are subject to foreign, federal, state, local and foreign laws and regulations governing the protection of the environment and occupational health and safety, including laws regulating air emissions, wastewater discharges, and the management and disposal of hazardous materials and wastes; and the health and safety of our employees. We are also required to obtain permits from governmental authorities for certain operations. If we violate or fail to comply with these laws, regulations or permits, we could incur fines, penalties or other sanctions, which could have a material adverse effect on us. Environmental laws tend to become more stringent over time, and we could incur material expenses in the future relating to compliance with future environmental laws. In addition, we could be held responsible for costs and damages arising from any contamination at our past or present facilities or at third-party waste disposal sites. Such costs could be material. We cannot completely eliminate the risk of contamination or injury resulting from hazardous materials, and we may incur material liability as a result of any contamination or injury.

Risks Relating to this Offering

The price of our common stock may be volatile and you may not be able to sell your shares at or above the initial offering price.

Prior to this offering, there has been no public market for our common stock. An active and liquid trading market for our common stock may not develop or be sustained following this offering. We will establish the initial public offering price through negotiations with the representatives of the underwriters. You should not view the price they and we establish as any indication of the price that will prevail in the trading market. The market price for our common stock may decline below the initial public offering price and our stock price is likely to be volatile. You may not be able to sell your shares at or above the initial public offering price.

There has been significant volatility in the market price and trading volume of securities of companies operating in the medical device industry, which has often been unrelated to the operating performance of particular companies. These broad market fluctuations may adversely affect the trading price of our common stock. Price declines in our common stock could result from general market and economic conditions and a variety of other factors, including:

actual or anticipated fluctuations in our operating results;

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

our announcements or our competitors' announcements regarding new products, significant contracts, acquisitions or strategic investments;

loss of any of our key management or technical personnel;

Table of Contents

conditions affecting orthopedic device manufacturers or the medical device industry generally;

clinical trial results with respect to our customers' medical devices;

changes in our growth rates or our competitors' growth rates;

developments regarding our patents or proprietary rights, or those of our competitors;

FDA and international actions with respect to the government regulation of medical devices and third-party reimbursement practices;

public concern as to the safety of our products;

changes in health care policy in the United States and internationally;

conditions in the financial markets in general or changes in general economic conditions;

our inability to raise additional capital;

changes in stock market analyst recommendations regarding our common stock, other comparable companies or the medical device industry generally, or lack of analyst coverage of our common stock;

sales of our common stock by our executive officers, directors and five percent stockholders or sales of substantial amounts of common stock; and

changes in accounting principles.

In the past, following periods of volatility in the market price of a particular company's securities, litigation has often been brought against that company. If litigation of this type is brought against us, it could be extremely expensive and divert management's attention and the company's resources.

If you purchase our common stock in this offering, you will incur immediate and substantial dilution in the book value of your shares.

If you purchase shares in this offering, the value of your shares based on our actual book value will immediately be less than the offering price you paid. This reduction in the value of your equity is known as dilution. This dilution occurs in large part because our earlier investors paid substantially less than the initial public offering price when they purchased their shares. Investors purchasing common stock in this offering will incur immediate dilution of \$12.73 in net tangible book value per share of common stock, based on an assumed initial public offering price of \$14.00 per share, the mid point of the range on the cover of this prospectus. Investors will incur additional dilution upon the exercise of outstanding stock options and outstanding warrants. In addition, if we raise funds by issuing additional securities, the newly issued shares will

further dilute your percentage ownership of our company.

Requirements associated with being a public company will require significant company resources and management attention.

Prior to this offering, we have not been subject to the reporting requirements of the Securities Exchange Act of 1934, as amended, or the Exchange Act, or the other rules and regulations of the SEC or any securities exchange relating to public companies. We are working with our independent legal, accounting and financial advisors to identify those areas in which changes should be made to our financial and management control systems to manage our growth and our obligations as a public company. These areas include corporate governance, corporate control, internal audit, disclosure controls and procedures and financial reporting and accounting systems. We have made, and will continue to make, changes in these and other areas. However, we cannot assure you that these and other measures we may take will be sufficient to allow us to satisfy our obligations as a public company on a timely basis.

Table of Contents

Following this offering, at the end of our 2005 fiscal year, we will be required to satisfy the requirements of Section 404 of the Sarbanes-Oxley Act, which requires annual management assessments of the effectiveness of our internal controls over financial reporting and a report by our independent auditors addressing these assessments. We may identify deficiencies which we may not be able to remediate in time to meet the deadline imposed by the Sarbanes-Oxley Act for compliance with the requirements of Section 404. In addition, if we fail to achieve and maintain the adequacy of our internal controls, as such standards are modified, supplemented or amended from time to time, we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal controls over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act. Moreover, effective internal controls, particularly those related to revenue recognition, are necessary for us to produce reliable financial reports and are important to helping prevent financial fraud. If we cannot provide reliable financial reports or prevent fraud, our business and operating results could be harmed, investors could lose confidence in our reported financial information, and the trading price of our stock could drop significantly.

In addition, compliance with the various reporting and other requirements applicable to public companies will create additional costs for us and will require the time and attention of management. We cannot predict or estimate the amount of the additional costs we may incur, the timing of such costs or the degree of impact that our management's attention to these matters will have on our business.

In addition, being a public company could make it more difficult or more costly for us to obtain certain types of insurance, including directors and officers' liability insurance, and we may be forced to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. The impact of these events could also make it more difficult for us to attract and retain qualified persons to serve on our board of directors, our board committees or as executive officers.

Our voting stock is controlled by one principal stockholder whose interests may conflict with those of our other stockholders.

Upon completion of this offering, the Olympus funds will own in excess of 50% of our outstanding shares of voting stock. As a result of this ownership, the Olympus funds will be able to direct our affairs and to approve any matter requiring the approval of our stockholders. Such matters include the election of directors, the adoption of amendments to our certificate of incorporation and by-laws and approval of mergers or sales of substantially all our assets. This concentration of ownership may also have the effect of delaying or preventing a change in control of our company or discouraging others from making tender offers for our shares, which could prevent stockholders from receiving a premium for their shares. The Olympus funds may cause corporate actions to be taken even if the interests of the Olympus funds conflict with the interests of our other stockholders. See Principal Stockholders.

We are a controlled company within the meaning of the New York Stock Exchange rules and as a result will qualify for, and intend to rely on, exemptions from certain corporate governance requirements.

Because the Olympus funds will own in excess of 50% of our outstanding shares of voting stock after the completion of this offering, we will be deemed a controlled company under the rules of the New York Stock Exchange, or the NYSE. As a result, we will qualify for, and intend to rely upon, the controlled company exception to the board of directors and committee requirements under the rules of the NYSE. Pursuant to this exception, we will be exempt from the rules that would otherwise require that our board of directors be comprised of a majority of independent directors, and that our compensation committee and nominating and corporate governance committee be comprised solely of independent directors (as defined under the rules of the NYSE), so long as the Olympus funds continue to own more than 50% of our outstanding shares of voting stock. Upon completion of this offering, our board of directors will be comprised of seven persons, three of which will be representatives of the Olympus funds and a fourth will be our current chief executive officer and, therefore, will not be independent. Furthermore, our compensation and nominating and corporate governance

Table of Contents

committees will not consist of a majority of independent directors. Accordingly, our stockholders will not have the same protections afforded to stockholders of companies that are subject to all of the NYSE corporate governance requirements. See Management Board and Committee Composition.

A significant portion of our total outstanding shares are restricted from immediate resale but may be sold into the market in the near future. If there are substantial sales of our common stock or the perception that these sales could occur, the price of our common stock could decline.

Sales of substantial amounts of our common stock in the public market after this offering, or the perception that these sales could occur, could adversely affect the price of our common stock and could impair our ability to raise capital through the sale of additional equity securities. Upon completion of this offering, we will have outstanding 32.8 million shares of common stock, assuming no exercise of the underwriters over-allotment option. Of these shares, the 8.0 million shares of common stock sold in this offering will be freely tradable, without restriction, in the public market. After the lockup agreements pertaining to this offering expire 180 days from the date of this prospectus, an additional 24.8 million shares will be eligible for sale in the public market, subject to applicable manner of sale and other limitations under Rule 144 under the Securities Act. Following the expiration of the lock up period, parties to our stockholders agreement holding more than 50% of the shares subject to that agreement will be entitled, subject to certain exceptions, to demand registration rights with respect to the registration of shares under the Securities Act. If this right is exercised, holders of all shares subject to the stockholders agreement will be entitled to participate in such registration. By exercising their registration rights, and selling a large number of shares, these holders could cause the price of our common stock to decline. An estimated 24.8 million shares of common stock will be subject to our stockholders agreement upon completion of the offering. See Shares Eligible for Future Sale, Principal Stockholders and Underwriting.

Our certificate of incorporation, our by-laws and Delaware law contain provisions that could discourage another company from acquiring us and may prevent attempts by our stockholders to replace or remove our current management.

Provisions of the Delaware General Corporation Law, our certificate of incorporation and our by-laws may discourage, delay or prevent a merger or acquisition that stockholders may consider favorable, including transactions in which you might otherwise receive a premium for your shares. In addition, these provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace or remove our board of directors. These provisions include:

providing for a classified board of directors with staggered terms;

requiring supermajority stockholder voting to effect certain amendments to our certificate of incorporation and by-laws;

eliminating the ability of stockholders to call special meetings of stockholders;

prohibiting stockholder action by written consent;

establishing advance notice requirements for nominations for election to the board of directors or for proposing matters that can be acted on by stockholders at stockholder meetings.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

limitations on the ability of stockholders to amend, alter or repeal the by-laws; and

the authority of the board of directors to issue, without stockholder approval, up to shares of preferred stock with such terms as the board of directors may determine and an additional shares of our common stock.

We will also be afforded the protections of Section 203 of the Delaware General Corporation Law, which would prevent us from engaging in a business combination with a person who becomes a 15.0% or greater stockholder for a period of three years from the date such person acquired such status unless certain board or stockholder approvals were obtained. See Description of Capital Stock.

CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements that are based on our management's beliefs and assumptions and on information currently available to us. These statements may be found throughout this prospectus, particularly under the headings Summary, Risk Factors, Dividend Policy, Management's Discussion and Analysis of Financial Condition and Results of Operations and Business, among others. Forward-looking statements typically are identified by the use of terms such as may, will, should, expect, anticipate, believe, could, estimate, intend, words, although some forward-looking statements are expressed differently. You should consider statements that contain these words carefully because they describe our expectations, plans, strategies and goals and beliefs concerning future business conditions, our results of operations, financial position, and our business outlook or state other forward-looking information based on currently available information. The factors listed above under the heading Risk Factors and in the other sections of this prospectus provide examples of risks, uncertainties and events that could cause our actual results to differ materially from the expectations expressed in our forward-looking statements. These factors include, among other things, the following:

changes in general economic conditions in the United States and Europe;

our ability to retain existing customers and attract new customers;

the competitive nature of the orthopedic device market;

the pursuit of strategic acquisitions or encountering unforeseen difficulties in integrating acquisitions;

the degree to which we are leveraged and our significant debt service obligations;

the impact of work stoppages and other labor matters;

general economic or business conditions affecting the orthopedic device market being less favorable than expected;

our ability to anticipate changes in technology and regulatory standards and to successfully develop and introduce new and enhanced products on a timely basis;

the unpredictability of intellectual property protection and maintenance and other intellectual property issues;

any future changes in management or loss of key personnel;

unforeseen problems associated with international sales and operations, including gains and losses from foreign currency exchange; and

implementation of or changes in laws, regulations or policies that could negatively affect the orthopedic device market.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

The forward-looking statements made in this prospectus relate only to events as of the date on which the statements are made. Except as required by law, we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events, even if new information becomes available in the future. We note that the safe harbor for forward-looking statements provided by the Private Securities Litigation Reform Act of 1995 does not apply to statements made in connection with an initial public offering.

Table of Contents

USE OF PROCEEDS

We estimate that our net proceeds from the sale of 8,000,000 shares of common stock in this offering, after deducting underwriting discounts and commissions and estimated offering costs payable by us, will be approximately \$97.7 million, assuming an initial public offering price of \$14.00 per share, the midpoint of the range set forth on the cover of this prospectus. We intend to use approximately \$36.4 million of the net proceeds from this offering to repay all of our existing subordinated indebtedness, \$45.0 million to repay a portion of our existing senior indebtedness and \$16.2 million to repurchase a portion of our outstanding shares of our preferred stock and preferred stock warrants. We are repurchasing these shares of preferred stock and preferred stock warrants in order to eliminate the liquidation preference and other rights of such shares and warrants and to provide additional liquidity to the holders of such shares and warrants. Our estimated offering costs include \$2.0 million that we will pay Olympus Advisory Partners, Inc. as compensation for financial advisory services rendered by Olympus Advisory Partners to us in connection with the offering. We intend to use the net proceeds from the underwriters' over-allotment option, to the extent exercised, to further reduce our borrowings under the new senior credit facility.

As of October 2, 2004, the existing indebtedness to be repaid from a portion of the net proceeds from this offering and the preferred stock and preferred stock warrants to be repurchased from a portion of the net proceeds consisted of the following:

approximately \$36.4 million of our subordinated indebtedness, which bears interest at a rate of 12.0% per annum and has a final maturity of June 11, 2011;

approximately \$45.0 million under our term loans, which bear interest at a variable rate (5.5% weighted average interest rate at October 2, 2004) and have a final maturity of March 31, 2008 and March 31, 2009; and

approximately \$16.2 million in aggregate liquidation value, including accrued but unpaid dividends which accrue at a rate of 8% per annum on the sum of the liquidation value plus all accumulated and unpaid dividends, of convertible preferred stock outstanding or issuable upon the exercise of preferred stock warrants.

As of October 2, 2004, the Olympus funds held subordinated indebtedness with an aggregate principal balance of \$8.0 million.

As of October 2, 2004, the number, aggregate liquidation value, including accrued but unpaid dividends, and holders of shares of our preferred stock outstanding or issuable upon the exercise of preferred stock warrants that we will repurchase with a portion of the net proceeds of this offering were as follows:

approximately 11,000 shares of preferred stock outstanding or issuable upon the exercise of preferred stock warrants with an aggregate liquidation value, including accrued but unpaid dividends, of \$13.5 million held by the Olympus funds;

approximately 696 shares of preferred stock outstanding or issuable upon the exercise of preferred stock warrants with an aggregate liquidation value, including accrued but unpaid dividends, of \$0.8 million held by Windjammer Mezzanine & Equity Fund II, L.P.;

approximately 1,334 shares of preferred stock with an aggregate liquidation value, including accrued but unpaid dividends, of \$1.5 million held by Mettis Group Limited;

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

approximately 79 shares of preferred stock with an aggregate liquidation value, including accrued but unpaid dividends, of \$0.1 million held by certain of our senior officers and directors; and

approximately 1,047 shares of preferred stock outstanding or issuable upon the exercise of preferred stock warrants with an aggregate liquidation value, including accrued but unpaid dividends, of \$1.1 million held by persons who are not affiliates of Symmetry.

In the aggregate, we expect that Olympus and its affiliates will receive approximately \$21.5 million of the net proceeds from this offering. See Certain Relationships and Related Transactions. All of our outstanding preferred stock and preferred stock warrants not repurchased will be converted into shares of our common stock or warrants to purchase our common stock prior to the completion of this offering.

Table of Contents**CAPITALIZATION**

The following table sets forth our consolidated capitalization as of October 2, 2004 on an actual basis and on a pro forma as adjusted basis giving effect to:

the sale of 8,000,000 shares of common stock pursuant to this offering and the application of proceeds therefrom as described in Use of Proceeds ;

the conversion of our outstanding shares of preferred stock not repurchased into an aggregate of 9,002,832 shares of our common stock; and

the refinancing of our remaining senior indebtedness under a new senior credit facility.

You should read the following table in conjunction with the Selected Consolidated Financial Data, Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and related notes included elsewhere in this prospectus.

	As of October 2, 2004	
	Actual	Pro Forma As Adjusted
	(dollars in thousands, except share and per share data)	
Long-term debt (including current maturities):		
Existing senior credit facility:

-
- (1) Our new senior credit facility will provide for a \$35 million term loan and a revolving credit facility that will provide for borrowings up to \$40 million. We intend to use the net proceeds from the underwriters' over-allotment option, to the extent exercised, to further reduce our borrowings under the new senior credit facility.
 - (2) See "Certain Relationships and Related Transactions - Repurchase of Preferred Stock, Subordinated Debt and Preferred Stock Warrants" for a description of the net proceeds being used to repay subordinated indebtedness and repurchase of shares of preferred stock or preferred stock warrants held by our directors, executive officers and principal stockholders.
 - (3) A charge of approximately \$9.3 million will be incurred upon the early extinguishment of debt. This charge includes \$5.2 million of unamortized discount recorded upon the issuance of the subordinated notes and \$4.1 million of deferred debt issuance costs.

Table of Contents

The number of shares of common stock to be outstanding after this offering is based on shares outstanding as of October 2, 2004. This number excludes, as of October 2, 2004 on an as adjusted basis:

872,195 shares of our common stock issuable upon the exercise of outstanding warrants at a weighted average exercise price of \$0.01 per share;

830,955 shares of our common issuable upon the exercise of outstanding options at a weighted average exercise price of \$3.03 per share; and

2,293,526 shares of our common stock reserved for future issuance under our stock option and stock purchase plans.

Table of Contents**DILUTION**

Our pro forma net tangible book value (deficit) as of October 2, 2004 was \$(30.4) million, or \$(1.23) per share of common stock. Pro forma net tangible book value per share represents, prior to the sale of the 8,000,000 shares of common stock offered in this offering, the amount of our total tangible assets less the amount of our total liabilities, divided by the pro forma number of shares of common stock outstanding at October 2, 2004 after giving effect to the conversion of our outstanding shares of preferred stock not repurchased in connection with this offering into 9,002,832 shares of our common stock. Dilution in pro forma net tangible book value per share represents the difference between the amount per share paid by investors in this offering and the pro forma net tangible book value per share of our common stock immediately after this offering.

After giving effect to our sale of the 8,000,000 shares of common stock offered in this offering, based upon an assumed initial public offering price of \$14.00 per share, the midpoint of the range set forth on the cover page of this prospectus, our pro forma as adjusted net tangible book value as of October 2, 2004 would have been approximately \$41.7 million, or \$1.27 per share of common stock. This represents an immediate increase in pro forma net tangible book value to our existing stockholders of \$2.50 per share and an immediate dilution to new investors in this offering of \$12.73 per share. The following table illustrates this per share dilution in pro forma net tangible book value to new investors:

Assumed initial public offering price per share	\$ 14.00
Pro forma net tangible book value (deficit) per share as of October 2, 2004 after giving effect to conversion of our outstanding shares of preferred stock not repurchased	(1.23)
Increase per share attributable to new investors	2.50
Pro forma as adjusted net tangible book value per share after this offering	1.27
Dilution per share to new investors	\$ 12.73

The following table summarizes, as of October 2, 2004 on an as adjusted basis, the differences between our existing stockholders and investors in this offering with respect to the total number of shares of common stock purchased from us, the aggregate cash consideration paid to us, the average price per share paid by existing stockholders and the average price per share paid by new investors purchasing shares of common stock in this offering before deducting estimated underwriting discounts and commissions and our estimated offering expenses. The calculation below is based on an offering price of \$14.00 per share, the midpoint of the range set forth on the cover page of this prospectus, before deducting estimated underwriting and offering expenses payable by us:

	Shares Purchased		Total Consideration		Average Price Per Share
	Number	Percent	Amount	Percent	
Existing stockholders	24,792,318	76%	\$ 138,285,000	55%	\$ 5.58
New public investors	8,000,000	24	112,000,000	45	14.00
Total	32,792,318	100%	\$ 250,285,000	100%	

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

The foregoing discussion and tables assume no exercise of the following warrants and options outstanding as of October 2, 2004 on an as adjusted basis:

872,195 shares of our common stock issuable upon the exercise of outstanding warrants at a weighted average exercise price of \$0.01 per share;

830,955 shares of our common issuable upon the exercise of outstanding options at a weighted average exercise price of \$3.03 per share; and

2,293,526 shares of our common stock reserved for future issuance under our stock option and stock purchase plans.

Table of Contents

To the extent that all outstanding options and warrants are exercised, your investment will be further diluted by an additional \$.06 per share. In that event, the total number of shares of common stock purchased from us by our existing stockholders would be 26,495,468 the aggregate cash consideration paid to us by our existing stockholders would be \$140,811,516 and the average price per share paid by existing stockholders would be \$5.31 per share. In addition, you will incur additional dilution if we grant more options or warrants in the future with exercise prices below the initial public offering price.

If the underwriters exercise their over-allotment option in full, our existing stockholders would own approximately 73% and our new investors would own approximately 27% of the total number of shares of our common stock outstanding after this offering.

DIVIDEND POLICY

We have not in the past paid, and do not expect for the foreseeable future, to pay dividends on our common stock. Instead, we anticipate that all of our earnings in the foreseeable future will be used in the operation and growth of our business. We expect that the payment of dividends by us to holders of our common stock will be prohibited by our new senior credit facility. Any future determination to pay dividends will be at the discretion of our board of directors and will depend upon, among other factors, our results of operations, financial condition, capital requirements and contractual restrictions.

Table of Contents**SELECTED CONSOLIDATED FINANCIAL DATA****Symmetry Medical Inc.**

The following table sets forth our selected consolidated financial data as of and for the periods indicated. We derived the consolidated statement of operations data for fiscal years 2001, 2002 and 2003 and the consolidated balance sheet data as of the last day of fiscal years 2002 and 2003 from our audited consolidated financial statements for such periods and dates, which appear elsewhere in this prospectus. Our consolidated financial statements as of and for fiscal years 2002 and 2003 have been audited by Ernst & Young LLP, and our consolidated financial statements as of and for fiscal year 2001 have been audited by Arthur Andersen LLP. For more information, see Experts. We derived the consolidated statement of operations data for fiscal years 1999 and 2000 and the consolidated balance sheet data as of the last day of fiscal years 1999, 2000 and 2001 from our audited consolidated financial statements for such periods and dates, which are not included in this prospectus. The financial information for the nine months ended October 4, 2003, and as of and for the nine months ended October 2, 2004, was derived from our unaudited consolidated financial statements for such periods and dates, which appear elsewhere in this prospectus, and in the opinion of management, contains all adjustments necessary for a fair presentation of the consolidated financial data. Our historical results are not necessarily indicative of the operating results that may be expected in the future. You should read the following information together with the information under Management's Discussion and Analysis of Financial Condition and Results of Operations, our consolidated financial statements and the related notes included elsewhere in this prospectus.

(1) Includes the results of Mettis since its acquisition on June 11, 2003.

(2) In fiscal 2003, we refinanced substantially all of our existing indebtedness as part of the financing of the acquisition of Mettis, resulting in a loss on debt extinguishment of \$1,436.

(3) We enter into interest rate swap agreements to offset against changes in interest rates on our variable rate long-term debt. In accordance with SFAS No. 133, as amended, *Accounting For Derivative Instruments and Hedging Activities*, these agreements do not qualify for hedge accounting and accordingly, changes in the fair market value of such agreements are recorded each period in earnings.

(4) For fiscal 2001, reflects the cumulative effect of change in accounting principles resulting in the adoption of SFAS No. 133. For fiscal 2002, reflects a write-off of goodwill in connection with the adoption of SFAS No. 142, *Goodwill and Other Intangible Assets*. Upon completion of the adoption of SFAS

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

No. 142, we determined that the fair market value of the goodwill was lower than book value for one reporting unit, which resulted in an impairment charge.

Table of Contents**Mettis (UK) Limited**

The following table sets forth selected consolidated financial data of Mettis as of and for the periods indicated. We derived the consolidated statements of operations data for the fiscal years ended March 31, 2001, 2002 and 2003 and the consolidated balance sheet data as of March 31, 2002 and 2003 from Mettis' audited consolidated and combined financial statements for such periods and dates, which appear elsewhere in this prospectus. Mettis' consolidated and combined financial statements as of March 31, 2002 and 2003 and for the fiscal years ended March 31, 2001, 2002 and 2003 have been audited by PricewaterhouseCoopers LLP. You should read the following together with Mettis' consolidated financial statements and the related notes included elsewhere in this prospectus.

UNAUDITED PRO FORMA CONSOLIDATED STATEMENTS OF OPERATIONS

We derived the following unaudited pro forma consolidated statements of operations by applying pro forma adjustments to our historical consolidated financial statements included elsewhere in this prospectus. The unaudited pro forma consolidated statements of operations for fiscal year 2003 and the nine months ended October 4, 2003 give effect to the acquisition of Mettis, the sale of 8,000,000 shares of common stock pursuant to this offering and the application of proceeds therefrom as described in Use of Proceeds, the conversion of our outstanding shares of preferred stock not repurchased into an aggregate of 9,002,832 shares of our common stock and the refinancing of our remaining senior indebtedness under a new senior credit facility, as if such transactions had been completed at the beginning of the earliest period presented. We completed the Mettis acquisition on June 11, 2003. The unaudited pro forma consolidated statement of operations for the nine months ended October 2, 2004, give effect to the same transactions other than the Mettis acquisition, which is already reflected in our consolidated statement of operations for such period. We describe the assumptions underlying the pro forma adjustments in the accompanying notes, which should be read in conjunction with these unaudited pro forma consolidated statements of operations.

The following unaudited pro forma consolidated statements do not give effect to an anticipated pre-tax charge of approximately \$9.3 million related to the early extinguishment of debt. This anticipated charge includes \$4.1 million from the write-off of unamortized debt issuance costs and \$5.2 million from the write-off of the unamortized amount of the discount recorded upon the issuance of our senior subordinated notes.

The unaudited pro forma consolidated statements of operations should not be considered indicative of actual results that would have been achieved had the acquisition of Mettis been consummated at the beginning of the periods indicated and do not purport to indicate consolidated results of operations as of any future period. The unaudited pro forma consolidated statements of operations should be read in conjunction with the information contained in Selected Historical Financial Data, Management's Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements of Symmetry and Mettis appearing elsewhere in this prospectus.

Table of Contents**SYMMETRY MEDICAL INC.****NOTES TO UNAUDITED PRO FORMA CONSOLIDATED STATEMENTS OF OPERATIONS**

The unaudited pro forma consolidated statements of operations give effect to the following adjustments:

- (a) Mettis fiscal year ended on March 31 of each year. The unaudited pro forma consolidated statement of operations for the nine months ended October 4, 2003 and the unaudited consolidated pro forma statements of operations for fiscal 2003 includes the results of operations for Mettis for the period from January 1, 2003 to March 31, 2003 and April 1, 2003 to June 11, 2003, the date of its acquisition.
- (b) Reflects the adjustment to cost of revenue to reflect the write-up of inventory and property, plant and equipment of Mettis related to the application of purchase accounting in connection with the Mettis acquisition.
- (c) Reflects the adjustment to historical selling, general and administrative expenses to reflect amortization expense related to the finite life intangible assets recorded in connection with the Mettis acquisition.
- (d) Reflects the net change in interest expense as a result of the new financing arrangements entered into to fund the Mettis acquisition including the incurrence of \$98.0 million of term loan indebtedness under our senior credit facility with a variable interest rate based upon LIBOR plus 400 to 450 basis points, as defined, the issuance of \$36 million of senior subordinated notes at a fixed interest rate of 12%, offset by the removal of historical interest expense related to Mettis and our prior senior credit facility and subordinated notes.

The individual components of the net change in interest expense are as follows:

	Nine Months Ended October 4, 2003	Fiscal Year 2003
	<u> </u>	<u> </u>
Interest expense as reported for Symmetry Medical Inc. and Mettis (UK) Limited	\$ 12,885	\$ 16,450
Removal of Mettis (UK) Limited historical interest expense	(6,278)	(6,278)
Removal of prior senior credit facility and subordinated note interest	(794)	(794)
Pro forma interest expense associated with the issuance of \$98.0 million of term debt (reduced for monthly principal payments) for the period from January 1 to June 11, 2003 at an assumed rate of 5.44%.	2,366	2,366
Pro forma interest expense associated with the issuance of \$36.0 million of senior subordinated notes for the period from January 1 to June 11, 2003 at a rate of 12% (including amortization of discount of \$0.2 million and \$0.2 million, respectively).	2,093	2,093
	<u> </u>	<u> </u>
Net adjustment	(2,613)	(2,613)
	<u> </u>	<u> </u>
Pro forma combined interest expense	\$ 10,272	\$ 13,837
	<u> </u>	<u> </u>

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

- (e) Reflects the income tax adjustment required to reflect the pro forma income tax provision at an effective tax rate of 33.8% for the nine months ended October 4, 2003 and the fiscal year 2003 and 34.1% for the nine months ended October 2, 2004.

- (f) The adjustment reflects the removal of interest expenses, including amortization of deferred debt issuance costs and discounts, associated with the \$36.0 million of senior subordinated notes and borrowings under the existing senior credit facility as these borrowings will be repaid from the net proceeds of the offering and borrowings under a \$35.0 million term loan under our new senior credit facility. This reduction of expense is offset by the inclusion of interest expense, including amortization of deferred debt issuance costs, related

Table of Contents

to the new \$35 million term loan. For fiscal year 2003, the net of these adjustments results in \$5.1 million of pro forma as adjusted interest expense, which consists of \$2.8 million of historical interest expense on capital leases, interest rate swaps and the revolving line of credit combined with the addition of interest expense on the new term loan and incremental borrowings on the revolving line of credit of \$2.3 million at an assumed annual interest rate of 4.29%.

The individual components of the net change in interest expense are as follows:

	Nine Months Ended	Fiscal Year	Nine Months Ended
	October 4, 2003	2003	October 2, 2004
Pro forma combined interest expense	\$ 10,272	\$ 13,837	\$ 10,852
Removal of prior senior credit facility and subordinated note interest	(7,891)	(11,030)	(8,202)
Pro forma interest expense associated with the new term loan and incremental borrowings on the revolving line of credit	1,735	2,295	1,594
Net adjustment	(6,156)	(8,735)	(6,608)
Pro forma as adjusted interest expense	\$ 4,116	\$ 5,102	\$ 4,244

- (g) Reflects the elimination of dividends associated with our Class A preferred stock. All of our existing Class A preferred stock will be repurchased or converted into shares of common stock in connection with this offering. Each share of preferred stock that is not repurchased will be converted into that number of shares of our new common stock determined by dividing its liquidation value of \$1,000 per share plus all accumulated and unpaid dividends through the conversion date by 85% of the initial public offering price. We intend to use approximately \$16.2 million of the net proceeds from this offering to repurchase a portion of our outstanding Class A preferred stock and preferred stock warrants. The per share purchase price for each share of Class A preferred stock or preferred stock warrant will be equal to the liquidation value of the preferred stock of \$1,000 per share plus all accumulated and unpaid dividends through the repurchase date minus, in the case of the preferred stock warrants, the exercise price thereof of \$.01 per share. Based on the foregoing, we expect that we will repurchase approximately 12.8% of the outstanding Class A preferred stock and preferred stock warrants on a combined basis. As of October 2, 2004, as adjusted to reflect the repurchase of 35 shares of our preferred stock from an employee who retired, there were outstanding 101,588 shares of Class A preferred stock and warrants to purchase 3,530 shares of Class A preferred stock. Based on an initial public offering price of \$14.00 per share, the mid-point of the range set forth on the cover page of this prospectus, and an estimated closing date of December 13, 2004, we expect that the Class A preferred stock and preferred stock warrants not repurchased will be converted into an aggregate of 9,002,832 shares of common stock and warrants to purchase 286,818 shares of common stock. The actual number of shares of common stock to be issued as a result of this conversion is subject to change based on the actual initial offering price.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

You should read the following discussion in conjunction with the Selected Consolidated Financial Data section and the Unaudited Pro Forma Consolidated Statements of Operations section of this prospectus and the consolidated financial statements of each of Symmetry and Mettis, and the notes to those statements, included elsewhere in this prospectus. The statements in this discussion regarding industry outlook, our expectations regarding our future performance, liquidity and capital resources and other non-historical statements in this discussion are forward-looking statements. These forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, the risks and uncertainties described in the Risk Factors and Cautionary Notice Regarding Forward Looking Statements sections of this prospectus. Our actual results may differ materially from those contained in or implied by any forward-looking statements.

Overview

We are the world's largest independent provider of implants and related instruments and cases to orthopedic device manufacturers. We also design, develop and produce these products for companies in other segments of the medical device market, including dental, osteobiologic and endoscopy sectors, and provide limited specialized products and services to non-healthcare markets.

We acquired Mettis on June 11, 2003 for aggregate consideration of approximately \$164 million. Mettis is a leading manufacturer of forged, cast and machined implants for global orthopedic device manufacturers. This acquisition added implants to our product offerings and increased our European presence. We now offer a comprehensive line of implants, surgical instruments and cases for orthopedic device manufacturers on a global basis. In fiscal 2003 on a pro forma basis for the Mettis acquisition, we had revenue of \$158.4 million, operating income of \$22.5 million and net income of \$5.9 million.

Our acquisition of Mettis enabled us to offer our customers Total Solutions for complete implant systems—implants, instruments and cases. While our revenue to date have been derived primarily from the sale of implants, instruments and cases separately, or instruments and cases together, our ability to provide Total Solutions for complete implant systems has already proven to be attractive to our customers and we expect this capability will provide us with growth opportunities. In addition, we expect that our Total Solutions capability will increase the relative percentage of value added products that we supply to our customers.

Our revenue from the sale of implants, instruments, cases and other products and services represented 36.3%, 33.0%, 23.3% and 7.4%, respectively, of our revenue in the nine months ended October 2, 2004 and 27.3%, 37.4%, 29.6% and 5.7%, respectively, of our revenue in fiscal 2003.

During fiscal 2003, we sold our products and services to approximately 500 customers, including 72 new customers. Our four largest customers accounted for approximately 22.6%, 15.2%, 14.7% and 10.3% of our revenue in the nine months ended October 2, 2004 and our three largest customers accounted for 19.5%, 14.7% and 10.5% of our revenue in fiscal 2003. Our ten largest customers collectively accounted for approximately 77.7% and 68.3% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively. Within each of our largest customers, we typically serve several product teams and facilities, which diminishes our reliance on any single purchasing decision. Approximately 67.6%, 12.5% and 19.9% of our revenue in the nine months ended October 2, 2004 and approximately 73.2%, 16.1% and 10.7% of our revenue in fiscal 2003 was from sales to customers in the United States, United Kingdom and other foreign countries, respectively.

We have well-established relationships with our major customers and these relationships to a significant extent involve the sale of products that we have developed or modified specifically for our customers' particular product lines. In connection with the launch of a new implant system, our customers typically provide a customized implant-specific instrument set in cases to end users (hospitals, outpatient centers and physicians) for use with the new implant system. As a result, our sales of instruments and cases in any particular period are significantly impacted by the amount of new product launch activity by our customers.

As a result of the Mettis acquisition, we have significant operations in the United Kingdom. Consequently, a significant portion of our operating results are generated in currencies other than the U.S. dollar, principally the

Table of Contents

pound sterling and euro. Our operating results are therefore impacted by exchange rate fluctuations to the extent we are unable to match revenue received in such currencies with costs incurred in such currencies. We intend to manage our exposure to exchange rate fluctuations through the use of foreign currency exchange contracts.

Historically, we have had a significant amount of variable rate long-term indebtedness. We have managed our exposure to changes in interest rates by entering into interest rate swap agreements. These agreements do not qualify for hedge accounting under the applicable accounting guidelines and, as a result, we are required to record changes to the fair market value of these agreements in our statement of operations for each period. We recorded interest rate swap valuation expense (income) of \$(0.8) million, (\$1.4) million, \$1.0 million and \$0.8 million for the nine months ended October 2, 2004, fiscal 2003, fiscal 2002 and fiscal 2001, respectively. For additional information regarding our interest rate swap agreements, see Quantitative and Qualitative Disclosures about Market Risks Interest Rate Risk.

Our management reviews and analyzes several trends and key performance indicators in order to manage our business. To assist us in evaluating our capacity, we monitor long-term trends in the orthopedic industry, which currently includes the growing elderly population, general aging of the population, affluent and active baby boomers, improving technologies that expand the market, including minimally invasive surgeries, and other factors. Further, we consider the information obtained from discussions with our customers on the upcoming demand for our products, including new product launches. We use this information to determine an appropriate level of capital expenditures to meet the anticipated demand for our products. To this end, we recently finished construction and began operations at our new UK facility and we are expanding our facility located in Avilla, Indiana.

On an ongoing basis, our management considers several variables associated with the ongoing operations of the business, including scheduled production, utilization of machinery and equipment, monitoring purchasing activity and inventory levels and associated costs, headcount, overhead costs, and selling and general and administrative expenses. Although we are currently focused on increasing the size, level and effectiveness of our sales force and marketing expenses, we do not expect these investments to negatively impact our ongoing operating margins or liquidity.

Our revenues are affected by changes in the number and size of orders and the timing of delivery dates. Our revenues have fluctuated in the past and may vary in the future due to the effects of changes in inventory management practices and new product introductions by our customers.

Results of Operations

The table below sets forth certain operating data expressed as a percentage of revenue for the periods indicated. Fiscal 2003 operating data in the table below includes the results of Mettis since its acquisition on June 11, 2003. The pro forma operating data shown in the table below for the nine months ended October 4, 2003 gives effect to the Mettis acquisition as if it had been consummated on December 29, 2002, the first day of such period. We have included this pro forma operating data for the nine months ended October 4, 2003 to better facilitate a comparison to our operating results for the nine months ended October 2, 2004, which include the results of operations for Mettis for the entire period. See

Unaudited Pro Forma Consolidated Statements of Operations for further information regarding the calculation of this pro forma financial information. Interest expense for the periods presented is primarily attributable to indebtedness incurred in connection with our October 2000 recapitalization and our June 2003 acquisition of Mettis. Our historical results are not necessarily indicative of the operating results that may be expected in the future.

We use the term Symmetry in this section to refer to Symmetry's business on a stand alone basis without giving effect to the Mettis acquisition, in order to distinguish changes in Symmetry's business on a stand alone basis without giving effect to the Mettis acquisition from changes in our

business attributable to the Mettis acquisition.

Net income (loss)	(0.1%)	0.3%	4.8%	5.3%	3.7%	7.7%	5.1%	8.2%

Quarter Ended October 2, 2004 Compared to Quarter Ended October 4, 2003

Revenue. Revenue increased \$13.5 million, or 33.3%, to \$54.1 million in the quarter ended October 2, 2004 from \$40.6 million in the quarter ended October 4, 2003. Revenue for each of our principal product categories in these periods were as follows:

	2003	2004
Product Category	(in millions)	
Implants	\$ 15.3	\$ 19.8
Instruments	13.3	18.4
Cases	9.1	12.1
Non-healthcare and other	2.9	3.8
Total	\$ 40.6	\$ 54.1

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

This \$13.5 million increase in revenue primarily resulted from increases of \$4.5 million of implant sales, \$5.1 million of instrument sales, and \$3.0 million of case sales in the quarter ended October 2, 2004 driven by increased demand from customers due primarily to their launches of new implant systems.

Gross Profit. Gross profit increased \$4.3 million, or 36.8%, to \$16.0 million in the quarter ended October 2, 2004 from \$11.7 million in the quarter ended October 4, 2003. This increase was primarily due to higher sales and comparable gross profit percentages. As a percentage of revenue, gross profit increased to 29.6% of revenues in the quarter ended October 2, 2004 from 28.9% of revenue in the quarter ended October 4, 2003. This increase reflects improved absorption of fixed costs due to higher volumes.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$0.2 million, or 4.2%, to \$5.6 million in the quarter ended October 2, 2004 from \$5.4 million in the quarter ended October 4, 2003. Approximately \$0.3 million of this increase was due to increases in selling expenses by

Table of Contents

Symmetry consistent with the overall increase in its revenue. As a percentage of revenue, selling, general and administrative expenses declined to 10.4% of revenues in the quarter ended October 2, 2004 from 13.3% of revenue in the quarter ended October 4, 2003. The decline in these expenses as a percentage of revenue is reflective of our distributing these costs over an increased revenue base.

Interest Expense. Interest expense decreased \$0.1 million, or 2.4%, to \$3.7 million in the quarter ended October 2, 2004 from \$3.8 million in the quarter ended October 4, 2003. This decrease primarily reflects lower average borrowings during the quarter ended October 2, 2004 as compared to the quarter ended October 4, 2003.

Provision for Income Taxes. Our effective tax rate was 34.0% in the quarter ended October 2, 2004 as compared to 33.8% in the quarter ended October 4, 2003. Provision for income taxes increased by \$1.2 million, or 115.2%, to \$2.3 million in the quarter ended October 2, 2004 from \$1.1 million in the quarter ended October 4, 2003. The increase in provision for income taxes in the third quarter of 2004 is primarily due to our higher pre-tax earnings in that period.

Nine Months Ended October 2, 2004 Compared to Nine Months Ended October 4, 2003

Revenue. Revenue increased \$68.3 million, or 80.6%, to \$153.1 million in the nine months ended October 2, 2004 from \$84.7 million in the nine months ended October 4, 2003. Revenue for each of our principal product categories in these periods was as follows:

	<u>2003</u>	<u>2004</u>
<u>Product Category</u>	(in millions)	
Implants	\$ 20.1	\$ 55.6
Instruments	33.0	50.6
Cases	27.7	35.6
Non-healthcare and other	3.9	11.3
	<u> </u>	<u> </u>
Total	\$ 84.7	\$ 153.1
	<u> </u>	<u> </u>

This \$68.3 million increase in revenue resulted primarily from implant, instrument and non-healthcare sales generated from the operations acquired in the Mettis acquisition. The sales from these operations are included in the full nine months for 2004, while the 2003 period only includes sales from the date of acquisition, June 11, 2003.

Gross Profit. Gross profit increased \$19.0 million, or 73.7%, to \$44.7 million in the nine months ended October 2, 2004 from \$25.7 million in the nine months ended October 4, 2003. The increase in gross profit is primarily attributable to the 80.6% increase in revenue over the comparable period in the prior year. As a percentage of revenue, gross profit decreased to 29.2% in the nine months ended October 2, 2004 compared to 30.4% in the nine months ended October 4, 2003. This decrease reflects lower margins being realized on certain revenue attributable to the Mettis acquisition, which was primarily due to unusually high start-up inefficiencies at a U.K. facility associated with a customer's new implant system launch as well as higher revenues from lower margin products.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$5.1 million, or 42.7%, to \$17.0 million in the nine months ended October 2, 2004 from \$11.9 million in the nine months ended October 4, 2003. As a percentage of revenue, selling, general and administrative expenses declined to 11.1% of revenue in the nine months ended October 2, 2004 from 14.1% of revenue in the nine months ended October 4, 2003. This 3.0% decrease as a percentage of revenue was attributable to a modest reduction in administrative overhead combined with a 80.6% increase in revenue.

Table of Contents

Interest Expense. Interest expense increased \$4.2 million, or 64.3%, to \$10.9 million in the nine months ended October 2, 2004 from \$6.6 million in the nine months ended October 4, 2003. This increase primarily reflects higher average borrowings under our senior credit facility during the nine months ended October 2, 2004 as compared to the nine months ended October 4, 2003 as a result of increased borrowings used primarily to finance a portion of the purchase price for Mettis.

Provision for Income Taxes. Our effective tax rate was 34.1% in the nine months ended October 2, 2004 as compared to 33.8% in the nine months ended October 4, 2003. Provision for income taxes increased by \$3.8 million, or 165.3% to \$6.1 million from \$2.3 million due primarily to our higher pre-tax earnings in that period.

Fiscal Year 2003 Compared to Fiscal Year 2002

Revenue. Revenue increased \$56.6 million, or 86.6%, to \$122.0 million in fiscal 2003 from \$65.4 million in fiscal 2002. Revenue for each of our principal product categories in these periods was as follows:

	<u>2002</u>	<u>2003</u>
<u>Product Category</u>	<u>(in millions)</u>	
Implants	\$ 32.3	\$ 33.3
Instruments	32.3	45.6
Cases	33.1	36.1
Non-healthcare and other		7.0
	<u> </u>	<u> </u>
Total	\$ 65.4	\$ 122.0
	<u> </u>	<u> </u>

This \$56.6 million increase was primarily due to \$33.3 million of implant sales, \$3.7 million of instrument sales and \$7.0 million of sales of other products and services after June 11, 2003 resulting from the Mettis acquisition. In addition, revenue from Symmetry's instruments and cases increased by approximately \$12.6 million in fiscal 2003 as compared to fiscal 2002. This increase in Symmetry's revenue was the result of increased demand from its customers due primarily to their launches of new implant systems.

Gross Profit. Gross profit increased \$18.4 million, or 104.8%, to \$35.9 million in fiscal 2003 from \$17.5 million in fiscal 2002. This increase in gross profit resulted from \$11.7 million of additional gross profit related to increased implant and instrument revenue resulting from the Mettis acquisition coupled with higher revenue by Symmetry. As a percentage of revenue, gross margin increased to 29.4% in fiscal 2003 from 26.8% in fiscal 2002. The increase in gross profit as a percentage of revenue primarily resulted from increased sales of metal cases and instruments, which led to improved leverage of our labor and overhead costs.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$7.7 million, or 81.3%, to \$17.1 million in fiscal 2003 from \$9.4 million in fiscal 2002. This increase in expenses primarily resulted from \$4.5 million of expenses attributable to the Mettis acquisition and increases in selling expenses on a stand-alone basis consistent with the overall increase in revenue. As a percentage of revenue, selling, general and administrative expenses decreased to 14.0% in fiscal 2003 from 14.4% in fiscal 2002.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Interest Expense. Interest expense increased \$5.2 million, or 104.8%, to \$10.2 million in fiscal 2003 from \$5.0 million in fiscal 2002. This increase primarily reflects higher average borrowings as debt and capital lease obligations increased \$85.0 million year over year primarily to finance the Mettis acquisition. This increase in debt included \$36.0 million of subordinated notes with an interest rate of 12.0% per annum, which increased interest expense by approximately \$2.2 million in fiscal 2003 with the remaining increase resulting from additional borrowings under our existing senior credit facility.

Loss on Debt Extinguishment. In fiscal 2003, we realized a \$1.4 million loss on debt extinguishment related to the write-off of unamortized debt issuance costs resulting from the extinguishment of substantially all of our existing debt obligations prior to the acquisition of Mettis.

Table of Contents

Provision for Income Taxes. Our effective tax rate was 33.8% in fiscal 2003 and 38.4% in fiscal 2002. Provision for income taxes increased by \$2.2 million, or 257.8%, to \$3.0 million in fiscal 2003 from \$0.8 million in fiscal 2002. The increase in provision for income taxes for fiscal 2003 is due to our higher pre-tax earnings in that period.

Cumulative Effect of Accounting Change. In fiscal 2002, we recorded a cumulative effect of change in accounting principle of \$1.1 million related to the adoption of SFAS No. 142, *Goodwill and Intangible Assets*. Upon adoption of SFAS No. 142, we completed the transitional goodwill impairment test, using a combination of valuation techniques, including the discounted cash flow approach and the multiple market approach. Upon completion of the required assessments under SFAS No. 142, it was determined that the fair market value of a reporting unit was lower than book value, resulting in a transitional impairment charge of approximately \$1.1 million.

Fiscal Year 2002 Compared to Fiscal Year 2001

Revenue. Revenue decreased \$1.1 million, or 1.7%, to \$65.4 million in fiscal 2002 from \$66.5 million in fiscal 2001. Revenue for each of our principal product categories in these periods was as follows:

	<u>2001</u>	<u>2002</u>
Product Category	(in millions)	
Implants	\$	\$
Instruments	36.5	32.3
Cases	30.0	33.1
Non-healthcare and other		
	<u> </u>	<u> </u>
Total	\$ 66.5	\$ 65.4
	<u> </u>	<u> </u>

This decrease resulted from reduced instrument sales due to the delay of customer product launches during 2002 partially offset by increased sales from the introduction in fiscal 2002 of metal cases to our product line and increased sales from plastic cases due to an overall increase in market demand.

Gross Profit. Gross profit decreased \$0.8 million, or 4.1%, to \$17.5 million in fiscal 2002 from \$18.3 million in fiscal 2001. As a percentage of revenue, gross profit decreased to 26.8% in fiscal 2002 from 27.5% in fiscal 2001. This decrease in gross margin resulted primarily from start up production costs related to the introduction of metal cases into our product line during 2002.

Selling, General and Administrative Expenses. Selling, general and administrative expenses decreased \$1.1 million, or 10.0%, to \$9.4 million in fiscal 2002 from \$10.5 million in fiscal 2001. This decrease primarily resulted from our discontinuance of goodwill amortization related to our adoption of SFAS 142 in fiscal 2002, as we recorded \$1.5 million of goodwill amortization expense in fiscal 2001 compared to none in fiscal 2002. This decrease was partially offset by increased employee compensation and other costs in fiscal 2002. As a percentage of revenue, selling, general and administrative expenses decreased to 14.4% in fiscal 2002 from 15.8% in fiscal 2001.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Provision for Income Taxes. Our effective tax rate was 38.4% in fiscal 2002 and 88.1% in fiscal 2001. Provision for income taxes decreased \$0.6 million, or 39.9%, to \$0.8 million in fiscal 2002 from \$1.4 million in fiscal 2001. In fiscal 2001, our effective tax rate and provision for income taxes was impacted by the recognition of \$0.4 million of a valuation allowance on foreign net operating loss carryforwards and \$0.4 million of non-

deductible amortization of intangible assets. Absent these items, our effective tax rate in fiscal 2001 would have been 36.8%.

Table of Contents

Cumulative Effect of Accounting Changes. In fiscal 2001, we recorded a cumulative effect of change in accounting principle of \$0.3 million related to the adoption of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended by SFAS No. 138, *Accounting for Derivative Instruments and Hedging Activities*. During all periods following the date of our adoption of SFAS No. 133, changes in the fair value of our derivatives have been recognized in our statement of operations.

Liquidity and Capital Resources

Our principal sources of cash have included cash generated from operations, the issuance of private debt and equity and bank borrowings. Principal uses of cash have included acquisitions, debt service, capital expenditures and the financing of working capital. We expect that our principal uses of cash in the future will be to finance working capital, capital expenditures and service debt.

Cash Flows

The following table summarizes our primary sources of cash in the periods presented:

	Fiscal Year Ended			Nine Months Ended	
	2001	2002	2003	October 4, 2003	October 2, 2004
	(in thousands)				
Cash provided by (used in):					
Operating activities	\$ (908)	\$ 4,875	\$ 13,151	\$ 12,886	\$ 16,568
Investing activities	(2,325)	(6,565)	(171,944)	(169,566)	(13,619)
Financing activities	3,429	1,654	160,212	162,820	(3,359)
Effect of exchange rates on changes in cash	(3)	(18)	148	36	42
Net Increase (decrease) in cash and cash equivalents	\$ 193	\$ (54)	\$ 1,567	\$ 6,176	\$ (368)

Operating Activities. We generated cash from operations of \$16.6 million in the nine months ended October 2, 2004 compared to \$12.9 million in the nine months ended October 4, 2003. This increase is primarily the result of a \$9.8 million increase in net income, adjusted for non-cash items and increased accounts payable. This increase was partially offset by increases in accounts receivable of \$6.1 million and inventory of \$3.4 million, which are in line with our growth in revenue over the prior period.

We generated cash from operations of \$13.2 million in fiscal 2003 compared to \$4.9 million in fiscal 2002. This increase is primarily the result of a \$5.7 million increase in net income, adjusted for non-cash items, including depreciation expense, deferred income tax provision and loss on debt extinguishment. This increase was partially offset by increases in working capital, due primarily to increases in accounts receivable of \$2.4 million and inventory of \$4.0 million, which are in line with our year over year growth in revenue. In fiscal 2001, we used cash in operating activities of \$0.9 million.

Investing Activities. Net cash used in investing activities was \$13.6 million for the nine months ended October 2, 2004 compared to \$169.6 million in the nine months ended October 4, 2003. This decrease was primarily due to the acquisition of Mettis in 2003.

Net cash used in investing activities was \$171.9 million for fiscal 2003 compared to \$6.6 million for fiscal 2002. This increase was due to the cash paid for the Mettis acquisition of \$163.1 million coupled with an increase in capital expenditures of \$2.3 million. In fiscal 2001, net cash used in investing activities was \$2.3 million.

Table of Contents

Financing Activities. Financing activities used \$3.4 million of cash in the nine months ended October 2, 2004 compared providing \$162.8 million of cash in the nine months ended October 4, 2003. This was primarily due to financing activities in 2003 related to the acquisition of Mettis and scheduled term loan debt service obligations in 2004.

Net cash provided by financing activities totaled \$160.2 million for fiscal 2003 compared to \$1.7 million in fiscal 2002. This increase was driven by cash generated to finance the Mettis acquisition, which included the issuance of \$134.0 million in long-term indebtedness consisting of \$98.0 million of borrowing under a senior credit facility and \$36 million of subordinated notes, together with warrants to purchase common stock and preferred stock, and the sale of common stock and preferred stock for approximately \$85.7 million. The per share purchase price for the common stock and preferred stock was \$3.04 and \$1,000, respectively. These items were partially offset by the extinguishment of our prior senior credit facility and scheduled debt maturities. In fiscal 2001, net cash provided by financing activities was \$3.4 million.

Capital Expenditures

Capital expenditures totaled \$13.6 million in the nine months ended October 2, 2004, compared to \$6.4 million in the nine months ended October 4, 2003, and were primarily used to expand and enhance production capacity in several of our facilities. Capital expenditures totaled \$8.8 million in fiscal 2003, \$6.6 million in fiscal 2002 and \$2.3 million in fiscal 2001 and were primarily for additional equipment used to increase production capacity and to implement process improvements, replace existing equipment and enhance our health, safety and environmental compliance. We expect capital expenditures for the remainder of fiscal 2004 to total approximately \$3.4 million.

Debt and Credit Facilities

Current Facilities. In connection with the Mettis acquisition, we entered into a senior credit facility and issued senior subordinated notes together with warrants to purchase our common stock and preferred stock. We used borrowings under the senior credit facility and senior subordinated notes, as well as proceeds from the issuance of additional equity to fund the acquisition purchase price, refinance existing indebtedness and provide funds for working capital and general corporate purposes. The aggregate purchase price for the Mettis acquisition was approximately \$163.9 million.

As of October 2, 2004, we had an aggregate of \$138.2 million of outstanding indebtedness, which consisted of the following:

\$2.3 million of revolving credit borrowings and an aggregate of \$92.0 million of term loan borrowings under our existing senior credit facility;

\$36.0 million of 12% senior subordinated notes due 2011, less unamortized discount on issuance of \$4.8 million; and

\$12.7 million of capital lease obligations.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Our existing senior credit facility provides for revolving credit facilities and letters of credit of \$15.0 million and two term loans. The revolving credit facility and term loans bear interest at floating rates, which can be either a base rate, or at our option, a LIBOR rate plus an applicable margin. As of October 2, 2004, an aggregate of \$92.0 million was outstanding under the term loans at a weighted average interest rate of 5.5%. As of October 2, 2004, there were \$2.3 million borrowings outstanding under the revolving credit facility at a weighted average interest rate of 7.25%. We had no outstanding letters of credit as of October 2, 2004.

The term loans require quarterly payments of scheduled principal and interest, with annual scheduled principal payments increasing each year. Borrowings under the revolving credit facility mature in June 2009. The

term loans mature in 2008 and 2009. Our obligations under our existing senior credit facility are secured by substantially all of our assets.

Table of Contents

Our existing senior credit agreement contains various financial covenants, including covenants requiring a maximum ratio of total indebtedness to EBITDA, as defined in the senior credit agreement, a maximum ratio of senior debt to EBITDA, a minimum EBITDA amount, a minimum ratio of EBITDA to interest expense, a minimum ratio of EBITDA to fixed charges and a maximum amount of annual capital expenditures. The senior credit agreement also contains covenants restricting certain corporate actions, including asset dispositions, acquisitions, paying dividends, changes of control, incurring indebtedness, making loans and investments and transactions with affiliates. We were in compliance with our financial and restrictive covenants under our existing senior credit facility at the end of fiscal 2003 and at October 2, 2004.

In connection with the acquisition of Mettis, we borrowed an aggregate of approximately \$36.0 million through the issuance of senior subordinated notes. We also issued to the purchasers of the senior subordinated notes warrants to purchase an aggregate of 585,377 shares of our common stock at a purchase price of \$0.01 per share and warrants to purchase an aggregate of 3,530 shares of our class A preferred stock at a purchase price of \$0.01 per share. The senior subordinated notes bear interest at 12% per annum and mature in 2011. The loan agreement relating to the senior subordinated notes contains various financial covenants, including covenants requiring a maximum ratio of total indebtedness to EBITDA, as defined in the loan agreement, a minimum EBITDA amount, a minimum ratio of EBITDA to interest expense, a minimum ratio of EBITDA to fixed charges and a maximum amount of annual capital expenditures. The loan agreement also contains covenants restricting certain corporate actions, including mergers and consolidations, additional indebtedness, liens, asset dispositions, investments, dividends, and other restricted payments and transactions with affiliates. In general, these financial covenants are less restrictive than the covenants contained in our existing senior credit facility. We were in compliance with our financial and restrictive covenants under the loan agreement related to senior subordinated notes at the end of fiscal 2003 and at October 2, 2004. Accrued interest under the senior subordinated notes is payable quarterly. The holders of our senior subordinated notes and warrants to purchase common stock and class A preferred stock include entities affiliated with Olympus Partners, which entities hold an aggregate of approximately \$8.0 million principal amount of our senior subordinated notes, as well as warrants to purchase shares of common stock and class A preferred stock. See *Certain Relationships and Related Transactions* *Sale of Senior Subordinated Notes and Warrants*.

We hold certain property and equipment pursuant to capital leases. As of October 2, 2004, these leases have future minimum lease payments of \$3.7 million, \$3.1 million, \$2.8 million, \$2.2 million and \$1.2 million in each of the next 5 fiscal years. At October 2, 2004, we had total capital lease obligations of \$12.7 million. We anticipate incurring additional capital lease obligations of \$3.5 million in 2004.

We anticipate repaying our existing senior credit facility and our senior subordinated notes with the net proceeds from this offering together with proceeds from a new senior credit facility that we intend to enter into in connection with the completion of this offering. In addition, we expect to use approximately \$16.2 million of the net proceeds from this offering to repurchase a portion of our outstanding shares of preferred stock and preferred stock warrants. Certain of our directors, executive officers and principal stockholders own shares of our preferred stock or preferred stock warrants and will receive a portion of these proceeds. See *Certain Relationships and Related Transactions* *Repurchase of Preferred Stock, Subordinated Debt and Preferred Stock Warrants*.

New Senior Credit Facility. In connection with this offering, we anticipate entering into a new \$75.0 million senior secured credit facility, consisting of a \$35.0 million five-year term loan and a \$40.0 million five-year revolving credit facility. Assuming the sale of 8.0 million shares of our common stock, at an assumed public offering price of \$14.00 per share, and the application of the net proceeds therefrom as described under *Use of Proceeds*, the amount of indebtedness outstanding under this new senior credit facility would have been approximately \$50.1 million as of October 2, 2004. Borrowings under the new senior credit facility will bear interest at a floating rate, which will be either a base rate, or at our option, a LIBOR rate, plus an applicable margin. The new senior credit agreement will contain various financial covenants, including covenants requiring a maximum total debt to EBITDA ratio, minimum EBITDA to interest ratio and a minimum EBITDA to fixed charges ratio. The new senior credit agreement will also contain covenants restricting certain corporate actions,

Table of Contents

including asset dispositions, acquisitions, paying dividends and certain other restricted payments, changes of control, incurring indebtedness, incurring liens, making loans and investments and transactions with affiliates. The new senior credit facility will be secured by substantially all of our assets. The new senior credit agreement will also contain customary events of default.

We believe that cash flow from operating activities, proceeds from this offering and borrowings under our new senior credit facility will be sufficient to fund currently anticipated working capital, planned capital spending and debt service requirements for the foreseeable future, including at least the next twelve months. We do not need the proceeds of this offering to continue operations for the next twelve months. We regularly review acquisitions and other strategic opportunities, which may require additional debt or equity financing. We currently do not have any pending agreements or understandings with respect to any acquisition or other strategic opportunity.

Contractual Obligations and Commercial Commitments

The following table reflects our contractual obligations as of October 2, 2004:

	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
	(dollars in millions)				
Long-term debt obligations(1)	\$ 125.5	\$ 7.2	\$ 42.5	\$ 44.6	\$ 31.2
Capital lease obligations	17.8	3.7	5.9	3.4	4.8
Operating lease obligations	2.9	1.6	1.1	0.2	
Total	\$ 146.2	\$ 12.5	\$ 49.5	\$ 48.2	\$ 36.0

(1) Represents principal maturities only and, therefore, excludes the effects of interest and interest rate swaps.

The following table reflects our long-term debt obligations as of October 2, 2004 after giving effect to this offering and the application of proceeds therefrom as set forth under Use of Proceeds and the new senior credit facility:

	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
	(dollars in millions)				
Long-term debt obligations	\$ 50.1	\$ 3.5	\$ 21.0	\$ 25.6	

Off-Balance Sheet Arrangements

Our off-balance sheet arrangements include our operating leases and letters of credit. We had no letters of credit outstanding as of October 2, 2004.

Certain Charges Related to this Offering

We anticipate incurring a pre-tax charge of approximately \$9.3 million on the early extinguishment of debt with the proceeds of this offering. This relates primarily to the write-off of unamortized debt issuance costs and the unamortized amount of the discount recorded upon the issuance of our senior subordinated notes.

Critical Accounting Policies and Estimates

Our discussion and analysis of results of operations and financial condition are based upon our audited consolidated financial statements and upon pro forma operating data for fiscal 2003 and the nine months ended

Table of Contents

October 4, 2003 that gives effect to our Mettis acquisition, which occurred on June 11, 2003, as if it had been consummated on December 29, 2002, the first day of such period. These audited financial statements and pro forma operating data have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and judgments that affect the amounts reported in those financial statements. On an ongoing basis, we evaluate estimates. We base our estimates on historical experiences and assumptions believed to be reasonable under the circumstances. Those estimates form the basis for our judgments that affect the amounts reported in the financial statements. Actual results could differ from our estimates under different assumptions or conditions. Our significant accounting policies, which may be affected by our estimates and assumptions, are more fully described in Note 2 to our consolidated financial statements that appear elsewhere in this prospectus.

Revenue Recognition

We recognize revenue in accordance with Staff Accounting Bulletin No. 101, as amended by Staff Accounting Bulletin No. 104, on orders received from customers when there is persuasive evidence of an arrangement with the customer that is supportive of revenue recognition, the customer has made a fixed commitment to purchase the product for a fixed or determinable sales price, collection is reasonably assured under our normal billing and credit terms and ownership and all risks of loss have been transferred to the buyer, which is normally upon shipment.

Inventory

Inventories are stated at the lower of cost (first-in, first-out) or market (net realizable value). Costs include material, labor and manufacturing overhead costs. We review our inventory balances monthly for excess products or obsolete inventory levels and write down, if necessary, the inventory to net realizable value.

Business Combinations, Goodwill and Intangible Assets

In July 2001, the Financial Accounting Standards Board, or FASB, issued SFAS No. 141, *Business Combinations*, and SFAS No. 142, *Goodwill and Intangible Assets*. SFAS No. 141 requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method of accounting. Under SFAS No. 142, goodwill and intangible assets with indefinite lives are no longer amortized, but reviewed annually, or more frequently if impairment indicators arise. Separable intangible assets that are not deemed to have indefinite lives will continue to be amortized over their useful lives. The amortization provisions of SFAS No. 142 apply to goodwill and intangible assets acquired after June 30, 2001. With respect to goodwill and intangible assets acquired prior to July 1, 2001, we adopted SFAS No. 142 effective January 1, 2002.

Upon adoption of SFAS No. 142, we completed step one of the transitional goodwill impairment test, using a combination of valuation techniques, including the discounted cash flow approach and the market multiple approach. Upon completion of the required assessments under SFAS No. 142, it was determined that the fair market value of one reporting unit was lower than book value, resulting in a transition impairment charge of approximately \$1.1 million in 2002. The write-off was recorded as a cumulative effect of a change in accounting in our consolidated statement of operations for fiscal 2002. Except for this transition impairment, we recorded no impairments as a result of the implementation of SFAS 142 during 2002 or 2003. We perform impairment tests annually and whenever events or circumstances occur indicating that goodwill or other intangible assets might be impaired. Examples of such events or circumstances include, but are not limited to, a significant adverse change in legal or business climate or an adverse regulatory action.

Environmental Liability

Governmental regulations relating to the discharge of materials into the environment, or otherwise relating to the protection of the environment, have had, and will continue to have, an effect on our operations and us. We have made and continue to make expenditures for projects relating to the protection of the environment.

Table of Contents

Any loss contingencies with respect to environmental matters are recorded as liabilities in the consolidated financial statements when it is both (1) probable or known that a liability has been incurred and (2) the amount of the loss is reasonably estimable, in accordance with Financial Accounting Standards Statement No. 5, *Accounting for Contingencies*. If the reasonable estimate of the loss is a range and no amount within the range is a better estimate, the minimum amount of the range is recorded as a liability. If a loss contingency is not probable or not reasonably estimable, a liability is not recorded in the consolidated financial statements. In the opinion of our management, there are no known environmental matters that are expected to have a material impact on our consolidated balance sheet or results of operations; however, the outcome of such matters are not within our control and are subject to inherent uncertainty.

Recent Accounting Pronouncements

In May 2003, the FASB issued SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity*. This statement establishes standards for how an issuer classifies and measures in its statement of financial position certain financial instruments with characteristics of both liabilities and equity. SFAS No. 150 requires issuers to classify as liabilities (or assets in some circumstances) three classes of freestanding financial instruments that embody obligations for the issuer. Generally, SFAS No. 150 is effective for us at the beginning of the first interim period beginning after June 15, 2003. The adoption of SFAS No. 150 did not have an impact on our consolidated balance sheet or results of operations.

In January 2003, the FASB issued FASB Interpretation No. 46 (FIN 46), *Consolidation of Variable Interest Entities*. FIN 46 addresses the consolidation of variable interest entities, including entities commonly referred to as special purposes entities. We were required to apply FIN 46 to any variable interest entities as of December 31, 2003. The adoption of FIN 46 did not have an impact on our consolidated balance sheet or results of operations.

In November 2002, the FASB issued FASB Interpretation No. 45 (FIN 45), *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. FIN 45 clarifies the requirement for a guarantor's accounting for and disclosure of certain guarantees issued and outstanding. The initial recognition and initial measurement provisions of FIN 45 are applicable to guarantees issued or modified after December 31, 2002. The disclosure requirements of FIN 45 were effective for financial statements of interim or annual periods ending after December 15, 2002. The adoption of FIN 45 did not have an impact on our consolidated balance sheet or results of operations.

In June 2002, the FASB issued SFAS No. 146, *Accounting for Exit or Disposal Activities*. SFAS No. 146 addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies Emerging Issues Task Force Issue (EITF) No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*. The principal difference between SFAS No. 146 and EITF No. 94-3 relates to the SFAS No. 146 requirements for the timing of recognizing a liability for a cost associated with an exit or disposal activity. SFAS No. 146 requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. Under EITF No. 94-3, a liability for an exit cost was recognized at the date of an entity's commitment to an exit plan. SFAS No. 146 must be applied prospectively for exit or disposal activities that are initiated after December 31, 2002. SFAS No. 146 also increased the disclosure requirements associated with exit or disposal activities. While the adoption did not affect our financial position or results of operations, should we initiate exit, disposal, or restructuring activities in the future, we would be required to follow this pronouncement.

In April 2002, the FASB issued SFAS No. 145, *Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections*. This statement eliminates the automatic classification of gain or loss on extinguishment of debt as an extraordinary item of income and requires that such gain or loss be evaluated for extraordinary classification under the criteria of Accounting Principles Board No. 30, *Reporting Results of Operations*. This statement also requires sales-leaseback accounting for certain

Table of Contents

transactions, and makes various other technical corrections to existing pronouncements. The statement is effective for financial statements issued on or after May 15, 2002. The adoption of this statement on January 1, 2003 resulted in classifying the loss from early extinguishment of debt in connection with the acquisition of Mettis as a separate component of net income before provision for income taxes.

Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

In June 2002, we ceased using Arthur Andersen LLP as our independent accountants. The reports of Arthur Andersen LLP on our consolidated financial statements for the year ended December 29, 2001 contained no adverse opinion or disclaimer of opinion, nor were the reports qualified or modified as to uncertainty, audit scope, or accounting principles. In connection with its audits of the fiscal 2001 financial statements and through June 2002, (a) there were no disagreements with Arthur Andersen LLP on any matter of accounting principles or practices, financial statement disclosure or auditing scope or procedure, which if not resolved to the satisfaction of Arthur Andersen LLP would have caused them to make reference thereto in their report on our consolidated financial statements for such year, and (b) there were no reportable events as described in Item 304(a)(1)(v) of Regulation S-K.

Effective November 21, 2002, we retained Ernst & Young LLP as our independent public accountants. Our decision to engage Ernst & Young LLP was approved by our board of directors. Prior to November 21, 2002, neither we nor anyone acting on our behalf consulted with Ernst & Young LLP regarding the application of accounting principles to a specified transaction, either completed or proposed, or the type of the audit opinion that might be rendered on our financial statements, nor did we or anyone acting on our behalf consult with Ernst & Young LLP regarding any other matter that was the subject of a disagreement (as defined in paragraph 304(a)(1)(iv) and the related instructions to Item 304 of Regulation S-K) or a reportable event (as described in paragraph 304(a)(1)(v) of Item 304 of Regulation S-K).

On August 31, 2002, Arthur Andersen ceased practicing before the SEC. We have not been able to obtain, after reasonable efforts, the re-issued report or consent of Arthur Andersen LLP related to the fiscal 2001 consolidated financial statements included elsewhere in this prospectus. Therefore, we have included a copy of their previously issued report.

Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Risk

We are exposed to market risk from fluctuations in interest rates. We manage our interest rate risk by balancing the amount of our fixed rate and variable rate debt and through the use of interest rate swaps. The objective of the swaps is to more effectively balance our borrowing costs and interest rate risk. For fixed rate debt, interest rate changes affect the fair market value of such debt but do not impact earnings or cash flows. Conversely for variable rate debt, interest rate changes generally do not affect the fair market value of such debt, but do impact future earnings and cash flows, assuming other factors are held constant. At October 2, 2004, we had approximately \$94.3 million of variable rate debt. Holding other variables constant (such as foreign exchange rates and debt levels), a one percentage point change in interest rates would be expected to have an impact on pre-tax earnings and cash flows for the next year of approximately \$0.9 million, before giving effect to the interest rate swap agreements described below. After giving effect to this offering and the application of net proceeds therefrom, we would have had \$55.0 million of variable rate debt at October 2, 2004, and, holding other variables constant, such change in interest rates would be expected to have an estimated impact on pre-tax earnings and cash flows for the next year of approximately \$0.5 million, before giving effect to the interest rate swap agreements described below. The interest rate swap agreements described below reduce our exposure to interest rate risk associated with our variable rate debt for the periods in which the swap agreements are in effect.

In 2000, we entered into an interest rate swap agreement that effectively converted \$19 million of a portion of our variable rate term loans into a fixed rate obligation for the five-year period commencing October 24, 2000.

Table of Contents

We receive payments at variable rates, while the swap agreement counterparty makes payments at a fixed rate (6.25% at October 2, 2004).

In 2003, we entered into a second interest rate swap agreement that effectively converted \$71.0 million of a portion of our variable rate term loans into a fixed rate obligation for an approximately three-year period ending June 30, 2006. We receive payments at variable rates, while the swap agreement counterparty makes payments at a fixed rate (2.285% at October 2, 2004).

At October 2, 2004, the fair value of these interest rate swap agreements were a net loss position for us of \$0.2 million, representing the estimated cost that would be incurred to terminate the agreement.

In connection with the execution of our new senior credit facility, we expect to terminate our 2000 interest rate swap agreement and modify our 2003 interest rate swap agreement to apply to our term loan indebtedness of our new senior credit facility.

Foreign Currency Risk

Foreign currency risk is the risk that we will incur economic losses due to adverse changes in foreign currency exchange rates. We do not hold or issue foreign exchange options or forward contracts for trading purposes at this time. However, we may utilize these tools to manage foreign exchange risk in the future.

Our primary exposures to foreign currency exchange fluctuations are pound sterling/U.S. dollar and euro/U.S. dollar. At October 2, 2004, the potential reduction in earnings from a hypothetical instantaneous 10% increase or decrease in quoted foreign currency spot rates applied to foreign currency sensitive instruments would be approximately \$0.2 million. The foreign currency sensitivity model is limited by the assumption that all of the foreign currencies to which we are exposed would simultaneously decrease by 10% because such synchronized changes are unlikely to occur. The effects of the forward exchange contracts have been included in the above analysis; however, the sensitivity model does not include the inherent risks associated with the anticipated future transactions denominated in foreign currency for which these forward contracts have been entered into for hedging purposes.

Commodity Price Risk

We are exposed to fluctuations in commodity prices through the purchase of raw materials that are processed from commodities, such as titanium, stainless steel, cobalt chrome and aluminum. Given the historical volatility of certain commodity prices, this exposure can impact product costs. Because we typically do not set prices for our products in advance of our commodity purchases, we can take into account the cost of the commodity in setting our prices for each order. To the extent that we are unable to offset the increased commodity costs in our product prices, our results would be affected. A 5% change in commodity prices would have an immaterial impact on our results of operations in fiscal 2003.

Effects of Inflation

Inflation potentially affects us in two principal ways. First, a significant portion of our debt is tied to prevailing short-term interest rates that may change as a result of inflation rates, translating into changes in interest expense. We have historically reduced our exposure to interest rate risk through interest rate swap agreements. Second, general inflation can impact material purchases, labor and other costs. In many cases, we have limited ability to pass through inflation-related cost increases due to the competitive nature of the markets that we serve. In the past few years, however, inflation has not been a significant factor.

Table of Contents

BUSINESS

Overview

We are the world's largest independent provider of implants and related instruments and cases to orthopedic device manufacturers. We also design, develop and produce these products for companies in other segments of the medical device market, including the dental, osteobiologic and endoscopy segments, and we provide limited specialized products and services to non-healthcare markets, such as the aerospace market. Through our Total Solutions approach, we offer our customers a broad range of products, as well as comprehensive services and production capabilities to help them bring their implant systems to market quickly and efficiently. We believe that our Total Solutions approach will give us a competitive advantage.

During fiscal year 2003, we generated pro forma revenue of \$158.4 million, derived primarily from the sale of products and services to the orthopedic device market. Our key products are implants, instruments and cases, and our core competencies include design, engineering, prototyping, net shaped forging, precision casting, thermo forming, precision sheet metal working and machining/finishing. Our Total Solutions approach is supported by our experienced team of designers, development engineers and logistics specialists that work with our customers to coordinate all of our products and services.

We market our Total Solutions approach through our experienced sales force that operates in the United States, Europe and Japan and targets orthopedic and other medical device companies. In fiscal 2003, we sold our products and services to over 500 customers, including 72 new customers added during the year. Our broad customer base includes every major orthopedic device company, such as Biomet Inc., DePuy Inc. (a subsidiary of Johnson & Johnson), Kyocera Corporation, Medtronic Sofamor Danek, Smith & Nephew plc, Stryker Corporation, Synthes, Inc. (formerly Synthes-Stratec, Inc.) and Zimmer Holdings, Inc. We typically serve several product teams and facilities within each of our largest customers, and during the nine months ended October 2, 2004 and fiscal 2003, no single customer represented more than 22.6% of our revenue.

We offer a broad range of products in the following categories:

implants, including forged, cast and machined products for the global orthopedic device market, which represented 36.3% and 27.3% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively;

instruments used in the placement and removal of orthopedic implants and in other surgical procedures, which represented 33.0% and 37.4% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively;

cases, including plastic, metal and hybrid cases used to organize, secure and transport medical devices for orthopedic and other surgical procedures, which represented 23.3% and 29.6% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively; and

other specialized products and services for non-healthcare markets, primarily the aerospace market, which represented 7.4% and 5.7% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

We believe that we are well positioned to grow our business as a result of the expected expansion of the overall orthopedic device market. In addition, we believe that our Total Solutions approach provides us with significant opportunities to increase our sales by expanding the types of products and services we provide to our existing customers and by adding new customers in other medical device market segments.

History

We were established in 1976 as a supplier of instruments to orthopedic device manufacturers. In 1996, we acquired a manufacturer of cases, which allowed us to extend our product offerings to include cases custom- designed for various medical devices and their related instruments. This acquisition and product line extension also allowed us to expand our customer base to medical device manufacturers beyond the orthopedic market. In

Table of Contents

1998 and 1999, we expanded our European presence by acquiring an instrument manufacturer in the United Kingdom and a cases manufacturer and distributor in France, respectively. In October 2000, investment funds controlled by Olympus Partners acquired control of our company through a recapitalization. In this transaction, the Olympus funds invested a total of \$40.5 million in cash to acquire securities representing approximately 94% of our then outstanding voting stock. In June 2003, we acquired Mettis, a leading manufacturer of forged, cast and machined implants for the global orthopedic device market. This acquisition significantly expanded our product offerings and increased our European presence, allowing us to develop and manufacture implants, instruments and cases for orthopedic device manufacturers on a global basis. In connection with the Mettis acquisition, the Olympus funds collectively invested an additional \$63.0 million in equity and loaned us \$8.0 million through the purchase of senior subordinated notes and stock purchase warrants. See Certain Relationships and Related Transactions.

Market Opportunity

The medical device market consists of a broad range of medical devices used in hospitals, clinics, physician practices, alternate sites and other provider sites for the diagnosis and treatment of diseases and medical conditions. The medical device market includes numerous market segments, such as orthopedics, cardiovascular, dentistry, ophthalmology and urology, among others. The global medical device market was estimated to be approximately \$207 billion in 2003. The orthopedic device segment of the medical device market was estimated to be approximately \$16 billion in 2003, and is expected to grow approximately 12% annually to greater than \$25 billion by 2007. The global orthopedic instruments and cases markets were estimated to be \$0.6 billion and \$0.2 billion, respectively in 2003, a combined increase of approximately 10% versus 2002.

Orthopedic devices principally consist of reconstructive implants used to replace or repair knees, hips, shoulders and other joints, as well as other orthopedic devices to repair bone fractures and the spine. Seven multinational companies, each with \$1 billion or more in annual orthopedic device sales, currently hold the predominant share of the orthopedic device market. These companies are Biomet Inc., DePuy Inc. (subsidiary of Johnson & Johnson), Medtronic Sofamor Danek, Smith & Nephew plc, Synthes, Inc. (formerly Synthes-Stratec, Inc.), Stryker Corporation and Zimmer Holdings, Inc. The ten largest orthopedic device manufacturers represented an estimated 87% of the market in 2003. These leaders maintain powerful sales and distribution networks and typically focus on marketing and research and development. They often rely on independent suppliers such as us for a portion of their implant manufacturing, instruments, cases and other elements of an implant system.

There were approximately 1.5 million reconstructive orthopedic implant procedures performed globally in 2003, an increase of 13% over the previous year. We expect continued growth in the orthopedic device market to be driven by a number of trends, including the following:

Growing elderly population. The vast majority of orthopedic implant procedures are performed on patients who are age 65 years and older. According to U.S. Census data, the total U.S. population is projected to grow approximately 9.5% from 2000 to 2010, while the number of individuals in the United States over the age of 65 years is projected to grow 14.8% during the same period. In addition to the growing U.S. elderly population, we believe the number of people in Europe and Japan who are age 65 years and older is expected to increase at a rate at least as fast as in the United States.

Aging, affluent and active baby boomer population. Baby boomers generally are affluent, exercise frequently and have active lifestyles. As baby boomers age, their active lifestyles, combined with a desire to maintain an active lifestyle, make them increasingly likely to suffer injuries that require joint reconstruction procedures.

Improving technologies that expand the market. Advances in technology and procedures have expanded the scope and applications of products sold in the orthopedic device market. New developments in minimally invasive surgical procedures, which cause less distress to the body and lead to faster patient recovery, are increasing the appeal of orthopedic implants to the overall patient population. In addition, new technologies that prolong the lives of implants, conserve patients' existing bone and reduce wear are prompting patients

and their surgeons to turn to implants at earlier stages in patients' lives.

Table of Contents

Successful clinical outcomes. Implant procedures have become increasingly common. For example, in 2003, there were approximately 1.4 million procedures performed to implant an artificial hip or knee worldwide, an increase of 12.7% from the prior year. Hip and knee replacements are now highly successful in relieving pain and restoring movement and we believe that the wider acceptance and high success rates of many orthopedic procedures are creating greater patient confidence in reconstructive and other orthopedic procedures. We expect this trend to continue as advances in technology and surgical procedures continue to improve clinical outcomes.

Increasing patient awareness through orthopedic device companies' direct marketing programs. Orthopedic device companies are using television, magazines and other direct to consumer marketing campaigns to make people more aware of orthopedic device alternatives. We believe that these direct marketing activities will create greater patient demand for orthopedic devices as more people learn about the potential benefits of orthopedic implant surgery.

Increasing volume of revision replacement implants. The average lifespan of reconstructive joint implants is 10 to 20 years, after which time revision replacement devices must be implanted. A revision procedure is the process whereby a surgeon replaces an implant that is currently in the body. Revision procedures represent a growing proportion of total reconstructive procedures, as the first large group of patients received reconstructive joint devices in the 1980's and these patients are outliving their original implants. Revision procedures require unique sets of instruments for the removal of the existing implant and the insertion of the new implant. In addition, replacing an implant is typically more challenging than inserting an initial implant and, as a result, revision replacement tends to require higher quality and specialized instruments and implants.

Developing international markets. The global orthopedic device market is largely concentrated in the United States, the United Kingdom, Germany, France and Japan. We believe that growth opportunities in the orthopedic device market exist in other countries in Western Europe. We also expect emerging countries in Asia, South America and the former Eastern Bloc to increasingly have the financial ability to seek advanced orthopedic procedures.

Our Total Solutions Approach

We believe that we have created a distinctive competitive position in the orthopedic device market based upon our Total Solutions approach. Our acquisition of Mettis in June 2003 enabled us to offer our customers Total Solutions for complete implant systems—implants, instruments and cases. While our revenue to date have been derived primarily from the sale of implants, instruments and cases separately, or instruments and cases together, our ability to provide Total Solutions for complete implant systems has already proven to be significant to customers, and we believe that it is a competitive advantage going forward. This approach seeks to provide our customers with a broad range of products related to orthopedic implants, as well as a range of services which help our customers bring these implant systems to market in a timely and cost efficient manner. Our Total Solutions offering is based on:

Comprehensive services. We can support our customers' new product offerings from product concept through market introduction and thereafter, by providing seamless design, engineering, prototyping, manufacturing, quality and regulatory compliance, and logistics services to our customers. Our knowledgeable sales personnel are technically trained and are supported by experienced designers and engineers to assist our customers in advancing concepts and technical file drawings into prototypes and complete systems. Our Design and Development Center can provide dedicated expertise as well as coordinate these activities, and we believe our close collaboration with customers throughout the product development cycle uniquely positions us to supply the customer with implants, instruments and cases when their new product is launched.

Single source for complete systems. Our extensive product lines and comprehensive services can provide our customers with a complete, integrated outsourcing solution. In addition to assisting customers in

Table of Contents

developing new implants, we also design and produce instruments for implant-specific surgical procedures, and we provide customized cases with graphics and thermo-formed tray pockets that provide a secure, clearly labeled and well organized arrangement of instruments and devices. We also offer other services, such as procurement of other instruments to be included in our cases, as well as packaging, labeling and quality compliance, which enables us to ship to our customers cases that include complete sets of instruments and that are ready to use.

Proprietary Symmetry instruments and cases. In addition to designing new, implant-specific instruments and cases for our customers, we offer an established line of instruments and cases that we have developed independently. By developing our proprietary products, we provide customers with complementary products that they can rely on to complete their own proprietary implant systems and bring them to market sooner. Our Design and Development Center is continuously developing and improving our proprietary products.

Precision manufacturing expertise. Our core production competencies include net shaped forging, precision casting, thermo forming, precision sheet metal working and machining/finishing. Our production processes are based on our extensive expertise and know-how, and enable us to produce products to tight tolerances and with precise detail. These core competencies allow us to produce large volumes of specialized products to our customers precise standards. We believe these competencies make us a supplier of choice to our customers.

Quality and regulatory compliance. Quality and regulatory compliance are imperative for the medical device market and can be a barrier to entry. We have a comprehensive quality assurance and quality control program including documentation of all material specifications, operating procedures, equipment maintenance and quality control methods. Our quality systems are based upon and in compliance with the ISO requirements for medical device manufacturers and the applicable regulations imposed by the FDA on medical device manufacturers. Likewise, as required by United States and foreign regulatory standards, we control and document certain design, development and testing activities and systems. These activities and systems are structured to ensure that all design, development and testing meet regulatory standards as well as our and our customers requirements. We believe that our quality and regulatory systems meet our customers expectations.

Global reach. Our established international infrastructure gives us a platform to serve large, global medical device manufacturers. Our manufacturing capabilities in the United States and Europe allow us to offer single-source products and services to our multinational customers, and our experienced sales force markets our Total Solutions approach globally.

We believe that our Total Solutions offer a number of benefits to our customers, including:

Shorter time to market. The innovative nature of the orthopedic device market has resulted in compressed product life cycles and made a shorter time to market critical. Our design, engineering and prototyping skills, as well as our ability to transition seamlessly from product development to production and to provide complete, integrated implants, instruments and cases, enables our customers to reduce time to market for their new products.

Reduced total product acquisition costs. Our comprehensive services, including design, engineering, prototyping, procurement, project management, production, inventory control and other logistic services, as well as our ability to provide complete implant, instrument and case systems, allow our customers to reduce their procurement costs and inventory levels, resulting in lower total acquisition costs.

Increased focus on marketing and research and development efforts. Many orthopedic device companies have increasingly emphasized marketing and research and development efforts and have sought outsourcing solutions that enable them to bring products to market faster and more efficiently. Our extended production capabilities and comprehensive services, encompassed in our Total Solutions concept, offers a one-stop outsourcing solution which reduces our customers total product acquisition costs and allows them to focus resources on their design, development and marketing efforts.

Table of Contents

Rationalized and reliable supply chain. Medical device manufacturers have undergone significant consolidation in recent years, and further consolidation in the industry may occur. Consolidation has resulted in larger orthopedic device manufacturers who often rely on fewer, more established suppliers to support their expansive operations. Our scale, the scope of our products and services, and our Total Solutions approach allow large companies to reduce the number of their independent suppliers. We believe this combination allows our customers to streamline their operations.

Enhanced product consistency on a global basis. Most leading medical device manufacturers are based in the United States, but have built extensive infrastructures in Europe. These companies are also seeking to capitalize on the development of markets in foreign countries with underdeveloped healthcare infrastructures. We believe that in order to enhance product consistency while expanding internationally, manufacturers increasingly desire suppliers that are well positioned to support U.S. and international operations. With our extensive production platform and Total Solutions approach, we believe that we can leverage our international presence to meet increasing demand for orthopedic devices abroad.

Business Strategy

Our goal is to increase our share of the orthopedic device market and to leverage our strengths to expand in other medical device market segments. The key elements of our business strategy are to:

Develop strategic relationships with our customers through access to key decision makers. Our size, scope of manufacturing capabilities and breadth of products and services position us as an important partner to our customers and provide us access to institutional decision makers. We intend to continue to develop these relationships which will continue to enhance our competitive position.

Capitalize on our Total Solutions approach. We believe that medical device manufacturers will increasingly seek to collaborate with suppliers who provide timely, integrated, single-source development and production capabilities. We believe that our Total Solutions approach provides manufacturers with the opportunity to create more efficient and functional implant systems, shorten product development cycles, reduce design and manufacturing costs, simplify purchasing and logistics and provide integrated implants, surgical instruments and cases. We intend to continue to aggressively market our Total Solutions approach to expand our relationships with existing customers and to attract new customers.

Increase sales to existing customers by cross selling products and services. Our cases are currently sold in nearly every segment of the medical device market. We believe that this diverse customer base offers us a natural entry point to new orthopedic and non-orthopedic customers for our implant and instrument product offerings. In addition, we believe that our machining, coating, packaging and logistics capabilities position us to supply a greater portion of our customers' needs. Accordingly, we intend to focus on expanding our sales to existing customers by cross selling our products and services.

Leverage manufacturing skills. We intend to leverage our manufacturing skills to expand our existing customer relationships and to obtain new customers. Our investments in sophisticated equipment and manufacturing know-how give us state-of-the-art manufacturing capabilities. Our ability to forge tight tolerance net shaped implants in large volumes, to efficiently produce high-precision instruments in various quantities, to manufacture a wide range of cases and to produce our products in quantities that can support large product launches distinguishes us in the market. In addition, we have well-established product quality and regulatory compliance systems and our customers can have confidence that our products and processes comply with regulatory requirements and our customers' precise standards.

Increase new product development. Our Design and Development Center provides expertise and coordination for our design, engineering and prototyping services. We intend to leverage our Design and Development Center to provide greater support for our customers' product development activities and to enhance our independent product development efforts. Our Design and Development

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Center enables us to better institutionalize our knowledge and ensure that we have the appropriate people and technology focused on our customers' product development projects. In addition, the Design and Development

Table of Contents

Center is engaged in ongoing independent product development. We believe that the dedicated expertise of our Design and Development Center will generate increased development projects with our customers and an expanded line of innovative and independently developed instruments and cases.

Collaborate with emerging companies. While we remain focused on providing our products and services to large orthopedic device customers, we believe that new and innovative companies are creating a meaningful market presence and becoming an important source of new product development in the medical device industry, particularly in Europe and in the spinal market segment in the United States. For example, one of our top ten customers in fiscal 2003 was a growing spinal and trauma implant company that was a small company and a new customer less than three years earlier. Many emerging companies have limited in-house capabilities, and our Total Solutions approach positions us to help them supply their products in a timely and cost-effective manner.

Products and Services

We design, develop and manufacture implants and related surgical instruments and cases for orthopedic device companies. We also design, develop and manufacture products for companies in other medical device markets, such as dental, osteobiologic and endoscopy, and we provide limited specialized products and services used in the aerospace and other non-healthcare markets.

Implants

Implant sales accounted for 36.3% and 27.3% of our total revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively. We design, develop and manufacture implants for use in specific implant systems developed by our customers. We make orthopedic implants used primarily in knee and hip implant systems. Our orthopedic implants are used in reconstructive surgeries to replace or repair hips, knees and other joints, such as shoulders, ankles and elbows, sometimes referred to as extremities, that have deteriorated as a result of disease or injury. An orthopedic implant system is generally comprised of several implants designed to work in concert to replicate the structure and function of a healthy joint.

We also manufacture implant products for trauma, spine and other implant systems. Trauma implant systems are used primarily to reattach or stabilize damaged bone or tissue while the body heals. Spinal implant systems are used by orthopedic surgeons and neurosurgeons in the treatment of degenerative diseases, deformities and injuries in various regions of the spine.

Our design, engineering and prototyping expertise is an integral part of our implant offering. Medical device companies, which typically focus their resources on developing new implant systems as well as sales and marketing, often rely on us and companies like us, to design, develop and manufacture the implants that comprise their implant systems. Our manufacturing capabilities, including our net shaped forging capabilities, technologically advanced casting facility and machining expertise, allow us to produce consistent, tight tolerance implants in large volumes for our customers.

We produce gross shaped, near-net shaped and net shaped implants for medical device manufacturers. Gross shaped implants require a significant amount of machining and hand processing post-forging. Near-net shaped implants are distinguished by geometric features that are thinner, more detailed and have tighter tolerances. Net shaped and near-net shaped implants require far fewer machine and hand operations post-forging. Net shaped implants typically require machining only on vital areas, such the taper segment of a hip where it is joined to the femoral head.

We have the machining expertise needed to provide finished implants to our customers. Some customers purchase finished implants from us while others purchase unfinished implants and machine them to final specifications.

Table of Contents

Our primary implant products and their applications are:

Knees. The knee joint includes the surfaces of three distinct bones: the lower end of the femur, the upper end of the tibia or shin bone, and the patella (knee cap). Cartilage on any of these surfaces can be compromised by disease or injury, leading to pain and inflammation that may require knee reconstruction. Our knee implants include a femoral component, a patella, a tibial tray and an articulating surface (placed on the tibial tray) and are used in total knee reconstruction, partial knee reconstruction and revision procedures. We provide one or more, and in some cases all, of these implants for our customers' knee implant systems. We use proprietary manufacturing know-how and advanced computer aided simulation techniques to produce tight tolerance near-net shaped to net shaped tibial implants that require minimal if any machining.

Hips. The hip joint consists of a ball-and-socket joint that enables a wide range of motion. The hip joint is often replaced due to degeneration of the cartilage between the head of the femur (the ball) and the acetabulum or hollow portion of the pelvis (the socket). This loss of cartilage causes pain, stiffness and a reduction in hip mobility. We produce tight tolerance femoral heads, hip stems, acetabular cups and spiked acetabular cups used in bone conservation, total-hip reconstruction and revision replacement procedures. Our hip stems are forged with tight tolerance details.

Extremities, Trauma and Spine. Extremity reconstruction involves the use of an implant system to replace or reconstruct injured or diseased joints, such as the finger, toe, wrist, elbow, foot, ankle and shoulder. Our forging capabilities allow us to produce thin cross sections of material to very tight tolerances for these smaller joint procedures. Trauma implant procedures commonly involve the internal fixation of bone fragments using an assortment of plates, screws, rods, wires and pins. Our spinal implant products consist primarily of plates and screws. We manufacture trauma and spinal plate implants to exact details to fit bone contours.

Instruments

Sales of surgical instruments accounted for 33.0% and 37.4% of our total revenue in the nine months ended October 2, of 2004 and fiscal 2003, respectively. We make high-precision surgical instruments used in hip, knee and shoulder reconstruction procedures, as well as in spinal, trauma and other implant procedures. We design, develop and manufacture implant-specific and procedure-specific instruments. We rarely manufacture general surgical instruments, but will procure them as a service to our customers in order to provide our customers with complete instrument sets.

We primarily make a wide range of knee cutting blocks (instruments that guide blades that cut bone), osteotome revision systems (instruments used to cut through bone), reamers (instruments used for shaping bone sockets or cavities) and retractors (instruments used to pull back tissue for clear sight during surgery). Our instrument handles are made of patented plastic procured from a third party, which is designed to withstand the intense heat produced during frequent sterilizations, that is attached to the instrument using our patented process. Our instruments are made to tight tolerances to ensure precise alignment and fitting of implants.

Each implant system typically has an associated instrument set that is used in the surgical procedure to insert that specific implant system. Instruments included in a set vary by implant system. For example, hip and knee implant procedure instrument sets often contain in excess of 100 instruments, whereas revision procedure sets contain approximately 50 instruments. Usually, instrument sets are sterilized after each use and then reused.

The instruments we produce are typically used in either open, minimally invasive, or revision implant procedures and can generally be categorized as:

Implant-specific instruments, which are used solely for a specific brand of implant, such as high-precision knee cutting blocks, certain reamers and broaches; and

Table of Contents

Procedure-specific instruments, which are designed for a particular type of procedure, such as a minimally invasive hip implant procedure, but can be used with the implant systems of multiple companies.

Implant-Specific Instruments. The size, shape and other features of each implant system are unique. Consequently, unique instruments must be used to ensure precise alignment and fitting during the surgical procedure to insert an implant system. Accordingly, when a medical device company develops a new implant system, it typically also develops instruments specifically designed to insert the implant system. Medical device companies typically provide complete, customized implant-specific instrument sets to end users (hospitals, outpatient centers and physicians) in order to facilitate use of the implant.

We seek to collaborate with our customers early in the development process to facilitate the concurrent design of the implant system and the instruments that will accompany the system. Our implant-specific instruments generally include customized reamers, cutting blocks, broaches, rasps, guides and other instruments designed to accommodate the unique size, shape and other features of our customers' implant systems. These instruments are used by the surgeon to cut and shape bone and cavities during the surgical procedure and to align and fit the implant system. We are recognized in the orthopedic community for constructing these instruments to extremely tight tolerances.

Procedure-Specific Instruments. We also manufacture independently developed instruments referred to as our Symmetry Products. We have developed these products through our years of experience serving the orthopedic market and our investments in research and development. Complete implant procedure instrument sets typically include certain instruments that are designed for a particular type of procedure but can be used with the implant systems of multiple companies. By purchasing our proven Symmetry Products, customers can leverage our extensive experience and expertise to complete their instrument sets more quickly and efficiently.

Our Symmetry Products include successful hip and knee revision systems. Instruments that make up revision systems, which are used to remove orthopedic implants, are typically designed for a specific type of procedure but can be used to remove various brands of implants. These self-contained systems include an assortment of osteotome blades that assist the surgeon in separating an implant from cement or bony in-growth where access is limited, while minimizing damage to the bone. Our established revision systems can also be readily modified for a customer by adding additional instruments. For example, we developed a hip revision system in 1996 that we currently sell to six different customers, with the system being customized for each customer.

Cases

Sales of cases accounted for 23.3% and 29.6% of our total revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively. We produce a wide range of plastic, metal and hybrid cases used in over 25 medical device markets, including orthopedic, arthroscopy, osteobiologic, endoscopy, cardiovascular, dental, ophthalmology, diagnostic imaging and ear, nose and throat surgical procedures. Cases are used to store, transport and arrange implant systems and other medical devices and related surgical instruments. Our cases are generally designed to allow for sterilization and re-use after an implant or other surgical procedure is performed. Our plastic cases are designed to withstand the intense heat produced during the sterilization process.

The majority of the cases we make are tailored for specific implant procedures so that the instruments, implants and other devices are arranged within the case to match the order of use in the procedure and are securely held in clearly labeled, custom-formed pockets. We seek to collaborate with our customers early in the development processes to facilitate the concurrent design of the case and related instruments.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

We also produce standard cases which are primarily used in those non-orthopedic market segments where the security or presentation of the instruments and devices is less important. Over the past two years, we have

Table of Contents

made a significant investment to obtain 510(k) clearance for our PolyVac line of standard cases through the FDA pre-market notification process. We believe this allows our customers to reduce time to market and to reallocate financial and human resources that would otherwise be spent on compliance efforts, which provides us with a significant competitive advantage in selling our standard cases. See Government Regulation.

We have more than 20 patents related to our case designs and manufacturing processes. We believe that our complete line of plastic, metal and hybrid product offerings strategically positions us in the case market.

Highlights of our case product offerings include:

Orthopedic Cases. We produce custom metal, plastic and hybrid cases designed to store, transport and arrange surgical instruments and related implant systems for orthopedic device manufacturers. Proper identification of instruments, such as reamers which are generally included in a range of sizes in one to two millimeter increments, is critical in orthopedic implant procedures. Our graphics and thermo formed tray pockets provide a secure and organized arrangement to assist surgeons during procedures.

Dental Cases. We produce cases used in dental implant and general dental procedures. Dental implant cases are typically complex and include many levels of trays, while cases used in general dental procedures tend to be smaller and less complex.

Other Cases. We also manufacture and sell cases for arthroscopy, osteobiologic, endoscopy, cardiovascular, ophthalmology, diagnostic imaging and ear, nose and throat procedures.

Specialized Non-healthcare Products and Services

We offer specialized non-healthcare products and services on a limited basis. Sales of non-healthcare products and services accounted for 7.4% and 5.7% of our total revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively.

One of our UK based facilities acquired as part of the Mettis acquisition produced a range of cutting tools, cutlery and surgical instruments in the 1950 s. This facility evolved to focus on net shaped forgings, which resulted in a business focusing on orthopedic instruments and aerospace products for jet engines in the late 1990 s. In 2002, this facility began focusing its net shaped forging capabilities on orthopedic implants and shifting its non-healthcare operations toward product development support and specialized products. Our core design, engineering and manufacturing competencies give us the expertise to offer specialized non-healthcare products and services. Our non-healthcare products primarily are net shaped aerofoils and non-rotating aircraft engine forgings produced for our aerospace customers.

Product Development

Our Design and Development Center provides dedicated expertise and greater coordination for our design, engineering and prototyping services. The Design and Development Center is located in Warsaw, Indiana, and brings together talented engineering and design personnel and provides them with state-of-the-art design software and prototyping equipment. The Design and Development Center serves to centralize and better institutionalize our company s design and engineering knowledge and creates a fertile environment for new product development. It can

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

coordinate the product development projects for our customers as well as the efforts of our engineers and designers in order to ensure that we have the appropriate people and technology focused on particular product development initiatives. Our engineering and development costs were approximately 3% of our revenue in fiscal 2003, and we expect a comparable level of costs in fiscal 2004.

We seek to collaborate with our customers' product development teams and to assist in the design, engineering and prototyping of new medical device systems from the beginning of the development process. Our sales staff is technically trained and works closely with the customer's staff. As new product concepts are formulated, our sales people bring in our design and engineering personnel and leverage the resources of our Design and Development Center to provide dedicated design teams with exceptional knowledge and experience.

Table of Contents

As a project evolves, we can rapidly create prototypes of the proposed implant. Working closely with our customers through the conceptual, planning and prototyping stages positions us to quickly scale up for manufacturing of the product.

In addition to supporting our customers' product development efforts, our Design and Development Center is continuously developing our own product lines, referred to as Symmetry Products. We develop our products by leveraging our years of experience and knowledge, investing in research and development and continually seeking to expand our knowledge of the marketplace by consulting surgeons and other end users of our products. We currently offer over 300 internally developed products, including instruments for minimally invasive surgical implant procedures and hip and knee revision systems.

Customers

We supply our products primarily to manufacturers in the medical device market. Our customers include all of the large orthopedic device manufacturers, including Biomet Inc., DePuy Inc. (a subsidiary of Johnson & Johnson), Kyocera Corporation, Medtronic Sofamor Danek, Smith & Nephew plc, Stryker Corporation, Synthes, Inc. (formerly Synthes-Stratec, Inc.) and Zimmer Holdings, Inc. We also have established relationships, primarily through our cases product offerings, with leading medical device manufacturers in numerous other medical device market segments, including Cardinal Health, Inc., Nobel Biocare AB and St. Jude Medical Inc. We sold to approximately 500 customers, including 72 new customers, in fiscal 2003.

Sales to our ten largest customers represented 77.7% and 68.3% of our revenue in the nine months ended October 2, 2004 and fiscal 2003, respectively. Our four largest customers accounted for 22.6%, 15.2%, 14.7% and 10.3% in revenue for the nine months ended October 2, 2004 and our three largest customers accounted for 19.5%, 14.7% and 10.5% of our revenue in fiscal 2003. Our four largest customers in alphabetical order for the nine months ended October 2, 2004 were DePuy, Smith & Nephew, Stryker and Zimmer and our three largest customers in alphabetical order for fiscal 2003 were DePuy, Smith & Nephew and Zimmer. No other customer accounted for more than 10% of our revenue in the nine months ended October 2, 2004 or fiscal 2003. We typically serve several product teams and facilities within each of our largest customers, which mitigates our reliance on any particular customer.

We sell our products to customers in a number of regions outside the United States. In addition, our customers often distribute globally products purchased from us in the United States. Set forth below is a summary of revenue by selected geographic locations in our last three fiscal years and the nine months ended October 2, 2004, based on the location to which we shipped our products:

Percent of Revenue by Geographic Location

Region	Fiscal Year			Nine Months Ended
	2001	2002	2003	October 2, 2004
United States	79.5%	80.7%	73.2%	67.6%
United Kingdom	14.1	10.1	16.1	12.5
Rest of World	6.4	9.2	10.7	19.9

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Total	100.0%	100.0%	100.0%	100.0%
-------	--------	--------	--------	--------

The acquisition of Mettis increased the geographic diversification of our revenue. For additional information regarding our historical revenue by geographic locations, see note 13 to our consolidated financial statements included elsewhere in this prospectus.

Sales and Marketing

Our sales and marketing efforts emphasize our industry leading design and engineering expertise, internally developed Symmetry Products, manufacturing capabilities, international distribution network and our ability to provide customers with a comprehensive product offering. We are increasingly presenting our products and

Table of Contents

services to customers in a Total Solutions concept which offers the customer a collaborator for developing complete implant, instrument and case solutions.

We have over 60 sales and marketing personnel worldwide. In addition to our internal sales efforts, we also sell standard cases through distributors. Our sales personnel are trained in all of our products and services in order to cross-sell and identify opportunities outside their immediate area of focus. We typically serve several product teams and facilities within each customer which diminishes our reliance on any one purchasing decision. Our customer base for cases extends into nearly every segment of the medical device market. We believe there is a significant opportunity to leverage our existing relationships among this customer base to achieve greater penetration of our customized instrument and implant products. We intend to increase our marketing of implants, instruments and our Total Solutions concept to these customers.

Our sales personnel are technically trained and are based in close proximity to or located at our largest customers' sites. This physical proximity allows our sales personnel to engage quickly with the marketing, design, engineering and purchasing staffs of these orthopedic device manufacturers. Our sales people are empowered to bring in design and engineering product development teams to facilitate a customer's efforts. Our goal is to collaborate with customers early in the development cycle and to continue through production, packaging, delivery and logistics.

Manufacturing

We have manufacturing facilities in the United States, the United Kingdom and France. We have made significant investments in recent years to modernize our production facilities, improve our production processes and develop superior technical skills that complement our manufacturing capabilities. These investments have allowed us to continue to improve the quality of our products, increase our manufacturing capacity and improve our efficiency. Our manufacturing processes include:

Forging. Our forging process uses presses to force heated metal between two dies (called tooling) that contain a precut profile of the desired implant. The forging process enhances the strength of an implant, which is important for hip stems and other implants that must withstand significant stress. Many customers prefer forging because it provides greater mechanical properties. We forge gross shaped, near-net shaped and net shaped implants. Our know-how enables us to produce precision net shaped forgings in large volumes.

Casting. In the casting process, metal is heated until it is liquid and then poured into an implant mold. Casting can be used to produce implants with intricate shapes. We have developed a technologically advanced, highly automated, casting facility in Sheffield, United Kingdom.

Plastic and Metal Forming. Our know-how and technology facilitates our extensive plastic and metal forming capabilities. We use thermo form processes to draw uniform plastic cases and specialized equipment to form metal. Our laser controlled metal working machines allow us to punch and shape metal in intricate and complex detail.

Machining / Finishing. Machining is used extensively to enhance our forged, cast and formed products. We use computer numerically controlled, multi-axis and wire electric discharge equipment to cut, bend, punch, polish and otherwise shape or detail metal or plastic. Our finishing processes include polishing, laser etch marking, graphics and other customer specific processes.

The majority of products that we produce are customized to the unique specifications of our customer. Our ability to maintain flexible operations is an important factor in maintaining high levels of productivity. We primarily use just-in-time manufacturing and flexible manufacturing cells in

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

our production processes. Just-in-time manufacturing is a production technique that minimizes work-in-process inventory and manufacturing cycles. Manufacturing cells are clusters of individual manufacturing operations and work stations grouped in a circular configuration, with the operators placed centrally within the configuration. Cell manufacturing provides

Table of Contents

flexibility by allowing efficient changes to the number of operations each operator performs, which enhances our ability to maintain product volumes that are consistent with our customers' requirements and reduce our level of inventory. For more information on our manufacturing facilities, see Properties.

We use a number of raw materials, including titanium, cobalt chrome, stainless steel and nickel alloys, and various other components in the manufacture of our products. Although we generally believe these materials are readily available from multiple sources, from time to time we rely on a limited number of suppliers and in some cases on a single source vendor. For example, we obtain patented plastic, which is designed to withstand intense heat produced during frequent sterilizations, from a single supplier for use in our instrument handles and plastic cases.

Quality Assurance

We maintain a comprehensive quality assurance and quality control program, which includes the control and documentation of all material specifications, operating procedures, equipment maintenance and quality control methods. Our quality systems are based upon FDA requirements and the ISO standards for medical device manufacturers. We believe that all of our facilities are currently in substantial compliance with regulations applicable to them. For example, in the United States these regulations include the current good manufacturing practice regulations and other quality system regulations imposed by the FDA. Our United States based facilities are registered with and audited by the FDA. Our line of PolyVac standard case received FDA 510(k) clearance, which can reduce our customers' burden in obtaining FDA approval. Our facilities have obtained numerous industry-specific quality and regulatory assurance certifications.

Competition

Our customers, to varying degrees, are capable of internally developing and producing the products we provide. While we believe that our comprehensive services and core production competencies allow medical device companies to reduce costs and shorten time to market, one or more of our customers may seek to expand their development and manufacturing operations which may reduce their reliance on independent suppliers such as us. We are not aware of any medical device manufacturers who currently sell products similar to the ones we produce to third parties, however, there can be no assurance that one or more of these companies will not begin to do so in the future.

We also compete with independent suppliers of implants, instruments and cases to medical device companies. The majority of these suppliers are privately owned and produce some, but not all, of the products required in orthopedic implant systems. We believe that we are the only independent supplier to offer a complete implant, instrument and case solution to orthopedic device manufacturers. We compete with other independent suppliers primarily on the basis of development capability, breadth of product offering, manufacturing quality, cost and service. We believe that we are the largest independent supplier of implants, instruments and cases to orthopedic device manufacturers. However, other independent suppliers may consolidate and some of our current and future competitors, either alone or in conjunction with their respective parent corporate groups, may have financial resources and research and development, sales and marketing, and manufacturing capabilities and brand recognition that are greater than ours.

Intellectual Property

Although we believe our patents are valuable, our knowledge, experience and proprietary and trade secret information with respect to manufacturing processes and product design and development, and our experienced, creative and technically trained design, engineering and

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

sales staffs have been equally or more important in maintaining our competitive position. We seek to protect our non-patented know-how, trade secrets, processes and other proprietary confidential information principally through confidentiality, non-compete and invention assignment agreements.

Table of Contents

We currently own 36 U.S. and 11 foreign patents related to our cases and instruments. These patents expire at various times beginning in 2006 and ending in 2020. We also have 19 U.S. and 4 foreign pending patent applications at various stages of approval. Our policy is to aggressively protect technology, inventions and improvements that we consider important through the use of patents, trademarks, copyrights and trade secrets in the United States and significant foreign markets.

While we do not believe that any of our products infringe any valid claims of patents or other proprietary rights held by third parties, we cannot assure you that we do not infringe any patents or other proprietary rights held by third parties. If our products were found to infringe any proprietary right of a third party, we could be required to pay significant damages or license fees to the third party or cease production, marketing and distribution of those products. Litigation may also be necessary to enforce our intellectual property rights, to protect our trade secrets or other proprietary information we own and to determine the validity and scope of our proprietary rights.

We cannot assure you that our existing or future patents, if any, will afford adequate protection, that any existing patent applications will result in issued patents, that our patents will not be circumvented, invalidated, or held unenforceable, that our proprietary information will not become known to, or be independently developed by, our competitors, or that the validity or enforceability of any patents or other intellectual property owned by or licensed to us will be upheld if challenged by others in litigation. Due to these and other risks, we do not rely solely on our patents and other intellectual property to maintain our competitive position. Although our intellectual property is important to our business operations and in the aggregate constitutes a valuable asset, we do not believe that any single patent, trade secret, trademark or copyright, or group of patents, trade secrets, trademarks or copyrights is critical to the success of our business.

Employees

As of October 2, 2004, we had 1,539 employees. Our employees are not represented by any unions. From time to time in the past, however, some of our employees have attempted to unionize at two of our facilities. We believe that we have a good relationship with our employees.

Properties

Our corporate office is located in Warsaw, Indiana. We have operations facilities, including warehouse, administrative and manufacturing facilities, located at nine sites throughout the world. We believe that these facilities are adequate for our current and foreseeable purposes and that additional space will be available if needed.

The lease on our approximately 112,000 square foot Manchester, New Hampshire facility is a capital lease that runs through October 1, 2016. The initial annual base rent under the lease, as amended, is \$0.6 million, payable in equal monthly installments. On October 31, 2001, and every five years thereafter, including extensions, the annual base rent will change based on the percentage increase, if any, in the Consumer Price Index for the Northeast U.S. region. The current annual base rent under the lease is \$0.7 million. We have an option to extend the lease for an additional five-year period and have a right of first opportunity to purchase the leased property.

Table of Contents

The table below provides selected information regarding our facilities.

Location	Use	Approximate Square Footage(1)	Own/ Lease	Number of Employees
Warsaw, Indiana	Instrument design and manufacturing	63,000	Own	346
Warsaw, Indiana	Design and Development Center; instrument design and manufacturing	17,000	Lease	28
Warsaw, Indiana	Corporate headquarters	10,000	Own	7
Claypool, Indiana(2)	Instrument design and manufacturing	22,500	Own	0
Cheltenham, United Kingdom	Instrument design and manufacturing	9,000	Lease	29
Manchester, New Hampshire	Plastic and metal case design and manufacturing	112,000	Lease	280
Villeneuve d Ascq, France	Case design and assembly	10,800	Lease	19
Lansing, Michigan	Implant design, forging and machining	65,000	Own	309
Sheffield, United Kingdom	Implant and specialized non-healthcare product design, forging, casting and machining	112,600	Own	272
Sheffield, United Kingdom	Implant forging and machining	43,400	Own	93
Avilla, Indiana	Instrument and implant design and manufacturing	26,000(3)	Lease	156

- (1) We own approximately 21 acres of land in Warsaw, Indiana and approximately 9 acres in Lansing, Michigan, that is available for future expansion.
- (2) This facility was acquired on October 5, 2004 and we have not yet begun operations at this facility.
- (3) We are in the process of adding 9,000 square feet to our Avilla, Indiana facility. This addition is expected to be completed by the end of November, 2004.

Table of Contents

Legal Proceedings

From time to time we may be involved in various disputes and litigation matters that arise in the ordinary course of business. We are not aware of any legal proceedings pending or threatened against us that we expect would have a material adverse affect on our financial condition or results of operations.

Environmental Matters

Our facilities and operations are subject to extensive federal, state, local and foreign environmental and occupational health and safety laws and regulations. These laws and regulations govern, among other things, air emissions; wastewater discharges; the generation, storage, handling, use and transportation of hazardous materials; the handling and disposal of hazardous wastes; the cleanup of contamination; and the health and safety of our colleagues. Under such laws and regulations, we are required to obtain permits from governmental authorities for some of our operations. If we violate or fail to comply with these laws, regulations or permits, we could be fined or otherwise sanctioned by regulators. We could also be held responsible for costs and damages arising from any contamination at our past or present facilities or at third-party waste disposal sites. We cannot completely eliminate the risk of contamination or injury resulting from hazardous materials, and we may incur material liability as a result of any contamination or injury.

To avoid the need for certain potentially restrictive air permits, we recently replaced a furnace at our Sheffield, U.K. facility and replaced dust collectors at our Lansing, Michigan facility. We estimate that we will incur approximately \$0.6 million in capital expenditures for environmental, health and safety in 2004. This includes approximately \$0.2 million to upgrade air control systems at our facilities. Environmental laws tend to become more stringent over time, and we could incur material expenses in the future relating to compliance with future environmental laws. Our Sheffield, U.K. facility may be required to obtain an Integrated Pollution Prevention Control (IPPC) permit prior to 2007. Although the requirements of the IPPC permit are not yet known, because the facility is currently operating in substantial compliance with applicable U.K. permit requirements and has, as described above, recently completed upgrades to a furnace and other equipment, we do not expect to have to make material capital expenditures to obtain or comply with the IPPC permit.

In connection with our 2000 recapitalization and our 2003 acquisition of Mettis, environmental assessments were conducted at our primary manufacturing facilities. These assessments identified certain environmental issues, the majority of which we have addressed or are in the process of addressing. In 2004, the Indiana Department of Environmental Management conducted an inspection of our Avilla, Indiana facility and identified certain environmental regulatory compliance issues. We have corrected these issues and we did not receive any fines. The cost to correct these issues was not material to the company's results of operations or financial condition. We are in the process of certifying our manufacturing facilities according to the environmental management standards established by the International Standardization Organization (ISO). We have implemented environmental management systems (EMS) at all our facilities; the EMS at two of these facilities have obtained ISO 14001 certification, and we anticipate obtaining ISO 14001 certification for the remainder of the facilities in the near future.

In 2000, we purchased pollution legal liability insurance that covers certain environmental liabilities that may arise at our Warsaw, Indiana facility, at a former facility located in Peru, Indiana, and at certain non-owned locations that we used for the disposal of wastes. The insurance has a \$5.0 million aggregate limit and is subject to a deductible and certain exclusions. The policy period expires in 2010. While the insurance may mitigate the risk of certain environmental liabilities, we cannot guarantee that a particular liability will be covered by this insurance.

Government Regulation

The medical device industry is extensively regulated by governmental authorities, principally the Food and Drug Administration, or FDA, and corresponding state and foreign regulatory agencies. In the United States, the

Table of Contents

FDA regulates the commercial distribution of medical devices by our customers and governs the design, testing, manufacturing, labeling, storage, record keeping and other activities that we and our customers perform. Similar foreign regulations govern the commercial marketing, safety, quality, development and production of medical devices distributed or produced in European and other foreign countries.

FDA Market Clearance. Our customers are currently generally considered by the FDA to be the manufacturer and the design authority with respect to the products that we sell to them and, accordingly, are required to obtain appropriate market clearance from the FDA before commercially distributing the implants, instruments and cases that we produce for them. At times however, we agree with our customers to share the regulatory burden of obtaining FDA market clearance. For some of our products, now or in the future, we alone may be considered to be the manufacturer and thus bear the responsibility of obtaining appropriate FDA or other clearances or approvals before commencing any commercial distribution of the product.

Under the Food, Drug and Cosmetic Act, as amended, or FDC Act, medical devices are classified into one of three classes based on the degree of perceived risk imparted to patients by the device's intended use. We produce Class I, II and III medical device products for our customers. The class to which our products are assigned determines, among other things, the type and degree of FDA market clearance required in order to commercially distribute our products. Class I devices are those for which it has been determined that safety and effectiveness can be assured by adherence to General Controls, as defined in the FDC Act, which require facility registration, device listing and compliance with the good manufacturing practices and labeling regulations. Most Class I devices have been exempted by the FDA from the market clearance requirements otherwise applicable to medical devices.

Class II medical devices are subject to General Controls and other special controls as specified by the FDA and, unless exempt, require pre-market clearance by the FDA prior to commercial distribution. Special controls may include special labeling requirements, mandatory performance standards and post-market surveillance requirements. Pre-market clearance of most Class II devices by the FDA is accomplished through the 510(k) Pre-market Notification process. To obtain 510(k) clearance for commercial distribution, extensive information regarding items such as usage, method of action, the design, testing and validation of the device must be submitted to the FDA demonstrating that the device is substantially equivalent to a device that was legally marketed prior to May 28, 1976, or to another commercially available device subsequently cleared through the 510(k) Pre-market Notification process. It generally takes three to six months from the date of a 510(k) Pre-Market Notification submission to obtain 510(k) clearance, but the process may take longer. If the device is not eligible for clearance through the 510(k) procedure, a pre-market approval, or PMA, must be obtained as described below.

Class III is the most stringent regulatory category for medical devices. A Class III device is a device that has a new intended use or is based on advances in technology for which, generally speaking, the device's safety and effectiveness cannot be assured solely by the General Controls and special controls applied to Class I and II devices. Before a Class III device can be commercially marketed, a PMA must be obtained from the FDA. The PMA process can be expensive, uncertain and lengthy, requires detailed and comprehensive data and generally takes significantly longer than the 510(k) Pre-Market Notification process. To obtain a PMA, an application must be submitted to the FDA supported by extensive data including, but not limited to, technical, preclinical, clinical trials in certain cases, manufacturing methods, quality systems as well as proposed labeling. Before the PMA application can be approved, the application must demonstrate to the FDA's satisfaction the safety and effectiveness of the device for its intended use. After the PMA application is complete, the FDA begins in-depth review of the submitted information, which generally takes between one and three years, but may take significantly longer.

It is possible that 510(k) clearance or PMA approval may not be obtained by us, if we are required to obtain it, or our customers or that such clearance may be delayed for an extensive period of time. Our inability or the inability of our customers to obtain timely clearance, if at all, could materially affect our operating results.

Table of Contents

Quality System Regulations. In addition to approving our products for commercial distribution, the FDA regulates certain of our development, marketing and production processes. Many of the products we produce are, or may in the future be, considered finished medical devices. Processes used in the development and production of finished medical devices are subject to various government regulatory requirements including the quality systems regulations and the current good manufacturing practice requirements, promulgated under the FDC Act. These regulations seek to ensure the safety and effectiveness of medical devices by governing, among other things, the design, testing, production, control, quality assurance, labeling, packaging and shipping of finished medical devices. Certain of our facilities, records and manufacturing processes are subject to periodic unscheduled inspections by the FDA to ensure compliance with these quality system regulations. Other products that we produce, including the majority of our implant products, undergo further processing upon delivery to our customer and are therefore not deemed to be finished medical devices. In the case of these products, the FDA regulatory scheme also places responsibility on our customers to assure that products obtained from us are produced using appropriate manufacturing processes and quality procedures.

Our medical devices may be subject to a number of other regulatory requirements including import and export requirements and restrictions, medical device tracking requirements and post market surveillance requirements. In addition, medical device manufacturers are required to have an effective complaint handling system and corrective and preventive action system. In certain cases, the manufacturer is obliged to report deaths, serious injuries or malfunctions related to the device to the FDA and other regulatory agencies.

It is possible that the FDA or other regulatory bodies may require that a clinical trial be completed before the agency clears or approves a product for commercial distribution. The FDA and other bodies regulate such trials and such trials generally cannot begin until the FDA approves the clinical trial and there is appropriate reviews and approvals by the clinical trial sites. Such trials can be lengthy and expensive and there is no guarantee that the results of such clinical trials will be positive.

In the event of a product malfunction or problem or regulatory issue, we may conduct a product recall or withdrawal. The FDA and other agencies may also compel such a recall or withdrawal. Any such recall or withdrawal could result in adverse publicity, regulatory enforcement action, loss of sales or delays in approvals. In addition, any such recall could give rise to product liability lawsuits.

Accordingly, our customers frequently audit our facilities to evaluate our manufacturing processes and quality systems.

International Regulations. The medical device industry is subject to extensive regulations in foreign countries where we and our customers operate. These regulations govern, among other things, the design, testing, manufacturing, packaging, and labeling of medical devices. Certain countries require medical devices, including certain of our products, to be qualified or approved by national health or social security organizations before they may be commercially marketed by our customers in those countries. For example, our customers must obtain a CE mark certification for our products before they can be commercially distributed in the member countries of the European Union. A CE mark certification is an international symbol of adherence to quality assurance standards and compliance with applicable European device directives. Although these requirements are often similar to those imposed by the FDA, regulations vary from country to country and with respect to the nature of the medical device and it may require more time and resources to comply with these regulations than that required in the U.S.

Compliance with applicable U.S. and foreign medical device regulations can be time consuming, burdensome and expensive for us and, to a larger degree, for our customers. These regulations may affect our ability and the ability of our customers to sell medical device products. This may result in higher than expected costs or lower than expected revenues.

Failure to comply with applicable U.S. or foreign medical device regulatory requirements could result in, among other things, warning letters, fines, injunctions, civil penalties, repairs, replacements, refunds, recalls or

Table of Contents

seizures of products, total or partial suspensions of production, refusal of the FDA or other agencies to grant future applicable market approvals, withdrawals or suspensions of current clearances or approvals and criminal prosecution. Currently, we have no adverse regulatory compliance issues or actions pending with the FDA or other medical device regulatory agency, and no FDA quality systems regulation audits conducted at our facilities have resulted in any adverse compliance enforcement actions. There can be no assurance that regulatory compliance issues, actions or audits resulting in enforcement actions may not arise in the future however. Any such actions brought against us could result in higher than expected costs, loss of revenue, delayed approvals, fines or penalties. Any such action against one or more of our customers could cause them to decrease or stop purchasing our products or services.

The FDA and other agencies such as Health and Human Resources regulate certain of our promotional activity and customer interactions. Failure to comply with these requirements could give rise to the FDA enforcement actions or actions by federal or state health care payors, including actions under the False Claims Act and anti-kickback requirements.

The regulations that we and our customers are subject to are complex, change frequently and have tended to become more stringent over time. Federal and state legislatures have periodically considered programs to reform or amend the U.S. healthcare system at both the federal and state levels. In addition, these programs may contain proposals to increase governmental involvement in healthcare, lower reimbursement rates or otherwise change the environment in which healthcare industry participants operate. Any such changes could result in restrictions on our ability to carry on or expand our operations, higher than anticipated costs or lower than anticipated revenues.

Third-Party Reimbursement

We do not rely directly on reimbursement from third-party payors, such as Medicaid, Medicare and private insurers, for any of our products. Our business, however, is indirectly impacted by the ability of our customers to obtain third-party reimbursement coverage for their products. The primary end users of medical devices are hospitals, outpatient centers and physicians' offices, all of whom rely on third-party reimbursement programs for payment. Consequently, the demand for a medical device, and indirectly the demand for our products that are associated with that device, is often dependent on the customer's ability to obtain coverage under such third-party reimbursement programs.

We believe that orthopedic implants have been well received by third-party payors because of their ability to greatly reduce long-term health care costs for sufferers of musculoskeletal ailments. However, reimbursement policies vary from program to program and are subject to change. We can not assure that any of our customers' products will be covered under any third-party reimbursement program.

Table of Contents**MANAGEMENT****Directors, Director Designees, Executive Officers and Other Key Employees**

Set forth below are the name, age, position and a brief account of the business experience of each of our executive officers, directors, director designees and key employees, as of October 2, 2004. The persons listed as director designees will join our board of directors upon completion of this offering.

Name	Age	Position
<i>Directors, Director Designees and Executive Officers:</i>		
Brian Moore	58	President, Chief Executive Officer and Director
Fred Hite	36	Senior Vice President and Chief Financial Officer
Andrew Miclot	49	Senior Vice President, Marketing, Sales & Business Development
D. Darin Martin	52	Senior Vice President, Quality Assurance/Regulatory Affairs
Richard J. Senior	40	Senior Vice President and General Manager, Europe
Robert S. Morris	50	Director
James A. Conroy	44	Director
Manu Bettegowda	31	Director
Frank Turner	61	Director
Francis T. Nusspickel	63	Director Designee
Stephen B. Oresman	72	Director Designee
<i>Other Key Employees:</i>		
D. Alec McPherson, Jr.	58	Vice President and General Manager
Matthew R. Rudd	41	Vice President and General Manager
Michael W. Curtis	50	Vice President and General Manager

Directors, Director Designees and Executive Officers

Brian Moore has served as our President and Chief Executive Officer and a member of our board of directors since our acquisition of Mettis in June 2003. From April 1999 to June 2003, Mr. Moore served as the Chief Executive Officer of Mettis Group Limited, the parent company of Mettis. From April 1994 to March 1999, Mr. Moore held various positions with EIS Group plc, including Chairman of the Aircraft and Precision Engineering Division, and from 1987 to 1999, Mr. Moore served as Chief Executive Officer of AB Precision (Poole) Limited. Prior thereto, Mr. Moore served in various management positions at Vanderhoff plc, Land Rover Vehicles, Bass Brewing and Prudential Insurance, and as the Financial Director for a subsidiary of GEC Ltd. (UK). Mr. Moore has qualified as a Graduate Mechanical Engineer by the Institution of Mechanical Engineers (the qualifying body for mechanical engineers in the United Kingdom) and as an Accountant with the U.K. Chartered Institute of Management Accountants.

Fred Hite has served as our Chief Financial Officer since March 2004. From 1997 to 2004, Mr. Hite served in various capacities at General Electric Industrial Systems, including Finance Manager of General Electric Motors and Controls from 2001 to 2004, Manufacturing Finance Manager from 2000 to 2001, and Finance Manager of Engineering Services from 1997 to 2000. From 1995 to 1997, Mr. Hite served as Sourcing Finance Manager and Commercial Finance Analyst at General Electric Industrial Control Systems. From 1990 to 1995, Mr. Hite served in various finance positions at General Electric Appliances. Mr. Hite received a B.S. in Finance at Indiana University.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Andrew Miclot has served as our Senior Vice President of Sales, Marketing and Business Development since June 2003 and as our Vice President of Marketing, Sales & Business Development since 1994. From 1992 to 1994, Mr. Miclot served as the Director of the Medical Products Group of DePuy Inc. From 1987 to 1992, Mr. Miclot served as Marketing Manager for Zimmer, Inc. and from 1986 to 1987, Mr. Miclot served as Director of Marketing for Ulti-Med, Inc. Mr. Miclot received a B.A. and M.A. in Speech and Hearing Sciences and Audiology from Indiana University and a M.B.A. from Lake Forest Graduate School of Management.

Table of Contents

D. Darin Martin has served as our Senior Vice President of Quality Assurance and Regulatory Affairs since June 2003. From 1994 to 2003, Mr. Martin served as our Vice President of Quality Assurance and Regulatory Affairs. Mr. Martin joined the Company in 1990 as Director of Quality Assurance. From 1984 to 1990, Mr. Martin served as Quality Assurance Supervisor for Owens-Illinois Inc.'s Kimble HealthCare Division. Mr. Martin has been a member in various medical device industry associations, including a 20 year membership with the American Society of Quality, Biomedical Devices-NE Indiana Division. Mr. Martin received a B.S. in Business Management from Ball State University, a S.P.C. Instructor Certification from Baldwin-Wallace College and a M.B.A. from Kennedy-Western University.

Richard J. Senior has served as Senior Vice President and General Manager of our European Operations since our acquisition of Mettis in June 2003. He previously served in various capacities at Mettis in the Thornton Precision Components operating unit, including Managing Director from 1999 to 2003, Director and General Manager from 1997 to 1998, Operations Director from 1995 to 1996, Production Manager during 1995, CMR Operations Manager from 1993 to 1994 and Orthopaedic Sales Manager (UK) from 1990 to 1995. Mr. Senior attended Myers Grove Comprehensive School in the United Kingdom.

Robert S. Morris has served as a member of our board of directors since October 2000. Mr. Morris founded Olympus Partners in 1989 and currently serves as the Managing Partner of Olympus Partners and its affiliated investment partnerships. Mr. Morris serves as a director of Homax Holdings, Inc., Shemin Holdings Corp., Client Distribution Services, and Club Staffing and has served on the boards of directors of multiple other Olympus portfolio companies. From 1978 to 1988, Mr. Morris held a variety of management positions in various manufacturing and financial services businesses at General Electric Corporation, the last of which was Senior Vice President of General Electric Investment Corporation, where he managed General Electric Pension Trust's private equity portfolio. Mr. Morris received his A.B. from Hamilton College and his M.B.A. from the Amos Tuck School of Business at Dartmouth College.

James A. Conroy has served as a member of our board of directors since October 2000. Mr. Conroy has been a partner at Olympus Partners since 1991. Mr. Conroy serves as a director of Club Staffing and Shemin Holdings Corp. and has served on the board of directors of numerous other portfolio companies including Eldorado Baneshares, AMN Healthcare, FrontierVision Partners, and American Residential Holding Corporation. Prior to joining Olympus, Mr. Conroy served as a management consultant at Bain & Company, and prior thereto, Mr. Conroy worked at General Electric Investment Corporation. Mr. Conroy received his B.A. from the University of Virginia and his M.B.A. from the Amos Tuck School of Business at Dartmouth College.

Manu Bettgowda has served as a member of our board of directors since October 2000. Mr. Bettgowda joined Olympus Partners in 1998 and has served as a Vice President at Olympus Partners since 2003. Mr. Bettgowda serves as a director of Homax Holdings Inc. Prior to joining Olympus, Mr. Bettgowda worked at Bowles Hollowell Conner & Co., where he focused on mergers and acquisitions, leveraged buyouts and refinancings of middle market companies. He received his A.B. from Duke University.

Frank Turner has served as a member of our board of directors since August 2003. Mr. Turner served as Chief Executive Officer of British Midland Aviation Services Limited from 1996 to 1999 as well as a director of British Midland plc from 1997 to 1999. He served as Managing Director of Lucas Aerospace Limited as well as a director of Lucas Industries plc from 1992 to 1995. Prior thereto, Mr. Turner spent 33 years at Rolls-Royce plc during which he was a Main Board Member from 1987 to 1991. Mr. Turner currently serves as Chairman of the Board of Potenza Enterprises Ltd., which provides corporate support through non-executive and advisory board roles. He also serves as Chairman for Potenza Group, Aero Inventory plc and SRTechnics Holding, as a director for Mott MacDonald plc and Mettis Group Limited, the former parent company of Mettis, and as an advisor on the aerospace and aviation industry to 3i plc and Star Capital Partners. Over the past 17 years, Mr. Turner has sat on the boards of directors of 13 companies, including among others, Rolls-Royce Inc., Rolls-Royce plc, Allied Steel & Wire plc, Apollo Metals Ltd, Cooper Rolls Inc., International Aero Engines AG and Wagon plc. He received his BSc in mechanical and production engineering from the University of Salford in the United Kingdom and his business education from the International Executive Program at Columbia University.

Table of Contents

Francis T. Nusspickel will be elected as a member of our board of directors upon completion of this offering. Mr. Nusspickel is a retired audit partner of Arthur Andersen LLP. Mr. Nusspickel spent the majority of his 35 years of public accounting expertise in Arthur Andersen's Transportation Industry Group and was the worldwide Industry Head for the Ocean Shipping Segment. Mr. Nusspickel is a certified public accountant and currently serves as Chairman of the Professional Ethics Committee of the New York State Society of Certified Public Accountants. Mr. Nusspickel was a former member of the Council of the American Institute of Certified Public Accountants and a former President of the New York State Society of Certified Public Accountants. Mr. Nusspickel serves as a director for Tsakos Energy Navigation Limited. Mr. Nusspickel received his B.A. from Manhattan College.

Stephen B. Oresman will be elected as a member of our board of directors upon completion of this offering. Since 1991, Mr. Oresman has served as President of Saltash, Ltd., a management consulting firm. From 1988 to 1991, he was a partner and Vice President of The Canaan Group consulting firm. Mr. Oresman's early career included ten years in the manufacturing sector, including Bausch & Lomb, Inc. and Interlake Steel Corp. Subsequently, Mr. Oresman joined Booz-Allen Hamilton, Inc., where he served various positions, including Managing Officer of the firm's Eastern Region and Chairman of Booz-Allen Hamilton International. Mr. Oresman later joined BBDO International as President of the firm's independent marketing companies. Mr. Oresman currently serves as Chairman of the Board of Technology Solutions Company and as a director of Cleveland-Cliffs Inc. and numerous conservation and ornithology institutions. Mr. Oresman received his B.A. from Amherst College and his M.B.A. from the Harvard Business School.

The board of directors has the power to appoint executive officers. Each executive officer will hold office for the term determined by the board of directors and until such person's successor is chosen and qualified or until such person's death, resignation or removal.

Other Key Employees

D. Alec McPherson, Jr. has served as our Vice President and General Manager since 2002. Mr. McPherson joined us in 2001 as General Manager/Vice President of Operations of our PolyVac operating unit. From 1996 to 2001, Mr. McPherson served as President and Chief Operations Officer of Pemco Die Cast Corporation. Prior thereto, he served in various capacities at Allied Signal, including General Manager, Plant Manager and Director of Manufacturing. Mr. McPherson earned his B.S.M.E. from Michigan State University, a M.A. in Industrial Administration and Statistics from Central Michigan University and a M.B.A. from Penn State University. Mr. McPherson has been a member of 360 Associates, Inc., a team of executives that focuses on coaching and consulting, since 2001.

Matthew R. Rudd has served as our Vice President and General Manager since our acquisition of Mettis in June 2003. He previously served in various capacities at Mettis, including Chief Operations Officer of Jet Engineering and Ultraxx from 2000 to 2003, Senior Vice President/General Engineering of Jet Engineering from 1996 to 2000, Manager of Program Development/ Engineering Manager of Jet Engineering from 1993 to 1996, Machining & Tooling Operations Manager of Jet Engineering from 1991 to 1993 and Floor Supervisor/CNC Programmer/Machinist of Jet Engineering from 1988 to 1991. Mr. Rudd earned his Associates Degree through Lansing Community College.

Michael W. Curtis has served as our Vice President and General Manager since November 2002. Prior to joining us, Mr. Curtis served as Vice President of Operations for Lightchip, Inc. from May 2000 to 2002, and from 1998 to 2000, Mr. Curtis served as Vice President/General Manager of Communications Products at Thomas & Betts Corporation. From 1994 to 1997, Mr. Curtis was employed at Amphenol Aerospace Amphenol Corporation, initially as a Business Unit Manager and subsequently as Director of Filter Products. From 1976 through 1994, Mr. Curtis served in various capacities at Hamilton Standard Division of United Technologies Corporation, the last of which was Product Line Manager. Mr. Curtis received his B.S., M.B.A. and M.S. in Engineering Management from Western New England College.

Table of Contents

Family Relationships

There are no family relationships between any of the executive officers or directors of the Company.

Board and Committee Composition

Our restated certificate of incorporation, which will be in effect prior to this offering, will provide for a classified board of directors consisting of three staggered classes of directors, as nearly equal in number as possible. At each annual meeting of stockholders, a class of directors will be elected for a three-year term to succeed the directors of the same class whose terms are then expiring. The terms of the directors will expire upon election and qualification of successor directors at the annual meeting of stockholders to be held during the years 2005 for the Class I directors, 2006 for the Class II directors and 2007 for the Class III directors.

Effective upon the closing of this offering, our board of directors will consist of seven members, classified as follows:

Our Class I directors will be Brian Moore and Francis T. Nusspickel.

Our Class II directors will be Frank Turner and Stephen B. Oresman.

Our Class III directors will be Robert S. Morris, James A. Conroy and Manu Bettegowda.

Following the consummation of this offering, we will be deemed to be a controlled company under the rules of the NYSE, and we will qualify for, and intend to rely upon, the controlled company exception to the board of directors and committee composition requirements under the rules of the NYSE. Pursuant to this exception, we will be exempt from the rules that would otherwise require that our board of directors be comprised of a majority of independent directors, that our compensation committee be comprised solely of independent directors, and that our nominating and corporate governance committee be comprised solely of independent directors as defined under the rules of the NYSE. The controlled company exception does not modify the independence requirements for the audit committee, and we intend to comply with the requirements of the Sarbanes-Oxley Act and the NYSE rules which require that our audit committee be comprised of independent directors exclusively.

Our restated by-laws to be in effect prior to the completion of this offering provide that the authorized number of directors will be seven and may be changed by a resolution adopted by at least two-thirds of our directors then in office. Any additional directorships resulting from an increase in the number of directors may only be filled by the directors and will be distributed among the three classes so that, as nearly as possible, each class will consist of one-third of the directors. This classification of our board of directors could have the effect of delaying or preventing changes in control or changes in our management.

Board Committees

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Prior to the completion of this offering, our board of directors will have established an audit committee, a compensation committee and a corporate governance and nominating committee.

Audit Committee. The audit committee is responsible for (1) selecting the independent auditors, (2) approving the overall scope of the audit, (3) assisting the board in monitoring the integrity of our financial statements, the independent accountant's qualifications and independence, the performance of the independent accountants and our internal audit function and our compliance with legal and regulatory requirements, (4) annually reviewing an independent auditors' report describing the auditing firm's internal quality-control procedures, any material issues raised by the most recent internal quality-control review, or peer review, of the auditing firm, (5) discussing the annual audited financial and quarterly statements with management and the independent auditor, (6) discussing earnings press release, as well as financial information and earnings guidance provided to analysts and rating agencies, (7) discussing policies with respect to risk assessment and risk

Table of Contents

management, (8) meeting separately, periodically, with management, internal auditors and the independent auditor, (9) reviewing with the independent auditor any audit problems or difficulties and management's response, (10) setting clear hiring policies for employees or former employees of the independent auditors, (11) handling such other matters that are specifically delegated to the audit committee by the board of directors from time to time and (12) reporting regularly to the full board of directors.

Upon the completion of this offering, our audit committee will consist of Messrs. Nusspickel, Oresman and Turner, each of whom will be independent members. Messrs. Nusspickel and Oresman will be determined to be audit committee financial experts as such term is defined in Item 401(h) of Regulation S-K. Our board of directors will adopt a written charter for the audit committee, which will be available on our website.

Compensation Committee. The compensation committee is responsible for (1) reviewing key employee compensation policies, plans and programs, (2) reviewing and approving the compensation of our executive officers, (3) reviewing and approving employment contracts and other similar arrangements between us and our executive officers, (4) reviewing and consulting with the chief executive officer on the selection of officers and evaluation of executive performance and other related matters, (5) administration of stock plans and other incentive compensation plans and (6) such other matters that are specifically delegated to the compensation committee by the board of directors from time to time. Upon the completion of this offering, our compensation committee will consist of Messrs. Turner, Conroy and Oresman.

Corporate Governance and Nominating Committee. Our corporate governance and nominating committee's purpose will be to assist our board by identifying individuals qualified to become members of our board of directors consistent with criteria set by our board and to develop our corporate governance principles. This committee's responsibilities will include: (1) evaluating the composition, size and governance of our board of directors and its committees and make recommendations regarding future planning and the appointment of directors to our committees, (2) establishing a policy for considering stockholder nominees for election to our board of directors, (3) recommending ways to enhance communications and relations with our stockholders, (4) evaluating and recommending candidates for election to our board of directors, (5) overseeing our board of directors performance and self-evaluation process and developing continuing education programs for our directors, (6) reviewing our corporate governance principles and providing recommendations to the board regarding possible changes, and (7) reviewing and monitoring compliance with our code of ethics and our insider trading policy. Upon the completion of this offering, our corporate governance and nominating committee will consist of Messrs. Bettgowda, Nusspickel and Morris.

Other Committees. Our board of directors may establish other committees as it deems necessary or appropriate from time to time.

Compensation Committee Interlocks and Insider Participation

No member of our compensation committee is currently an officer or employee of our company. There is no interlocking relationship between any of our executive officers and compensation committee, on the one hand, and the executive officers and compensation committee of any other companies, on the other hand, nor has any such interlocking relationship existed in the past.

Director Compensation

Frank Turner currently receives a \$40,000 annual retainer paid in equal quarterly installments to serve as a member of our board of directors. All other directors who are not our employees or who are not otherwise affiliated with us or our principal stockholders are currently not entitled to

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

receive any compensation for serving on the board. All directors are reimbursed for their out-of-pocket expenses incurred in connection with such services.

Table of Contents

Following this offering, directors who are not our employees or who are not otherwise affiliated with us or our principal stockholders will receive compensation that we believe is commensurate with arrangements offered to directors of companies that are similar to us. At this time, we have not finalized the compensation arrangements that we intend to offer to our non-affiliated directors. We expect that such compensation arrangements will include an annual cash payment of \$25,000 and a one-time grant of common stock having a value of \$25,000 upon being elected to the board. Compensation arrangements for independent directors established by our board may be in the form of cash payments and/or option grants.

Executive Compensation

The following table sets forth compensation information for fiscal year 2003 for our Chief Executive Officer and our four other most highly compensated executives whose total compensation exceeded \$100,000 in such fiscal year. These five officers are referred to as the named executive officers in this prospectus.

Summary Compensation Table

Name and Principal Position	Annual Compensation			Long-Term Compensation	All Other Compensation \$(4)
	Salary (\$)	Bonus (\$)	Other Annual Compensation \$(2)	Securities Underlying Options (#)	
Brian Moore President and Chief Executive Officer(1)	\$ 177,779	\$ 88,889	\$ 32,374(3)	318,480	\$
Andrew Miclot Senior Vice President, Marketing, Sales & Business Development	175,000	142,692		26,067	4,196
D. Darin Martin Senior Vice President, Quality Assurance/Regulatory Affairs	135,000	110,077			3,472
Richard J. Senior Senior Vice President and General Manager, Europe(5)	100,244	9,113		90,513	8,020
D. Alec McPherson, Jr. Vice President and General Manager	153,000	62,377		72,410	3,740
Richard Riel Senior Vice President, Operations(6)	185,000	150,846		26,067	3,501

- (1) The compensation amounts in this table represent compensation for Mr. Moore since June 11, 2003, the date on which he commenced employment with us as President and Chief Executive Officer. Mr. Moore earned a salary of \$142,221 and a bonus of \$71,111 from December 29, 2002 through June 10, 2003 as an employee of Mettis.
- (2) In accordance with the rules of the SEC, the other annual compensation disclosed in this table does not include various prerequisites and other personal benefits received by a named executive officer that does not exceed the lesser of \$50,000 or 10% of such officers salaries and bonus disclosed in this table.
- (3) Includes \$30,000 reimbursement for relocation expenses.
- (4)

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Represents our matching contributions under our 401(k) plans for all named executive officers other than Mr. Senior. For Mr. Senior, represents contributions to his pension plan.

- (5) The compensation amounts in this table represent compensation for Mr. Senior since June 11, 2003, the date on which he commenced employment with us as Senior Vice President and General Manager, Europe. Mr. Senior earned a salary of \$80,376, a bonus of \$7,307 and contributions to his pension plan of \$6,340 from December 29, 2002 through June 10, 2003 as an employee of Mettis.
- (6) Richard Riel retired from Symmetry as of May 28, 2004. Under our current organizational structure, the heads of all manufacturing facilities report directly to Brian Moore, President and Chief Executive Officer, and accordingly, we will not name a new Senior Vice President, Operations.

Table of Contents**Option Grants**

The following table sets forth information regarding options granted to each of our named executive officers during fiscal year 2003. Potential realizable value is based upon the assumed initial public offering price of \$14.00 per share, which is the midpoint of the range on the cover of this prospectus, and is net of the exercise price. These assumed 5% and 10% rates of appreciation comply with the rules of the SEC and do not represent our estimate of future stock price. Actual gains, if any, on stock option exercises will be dependent on the future performance of our common stock. No stock appreciation rights were granted to the named executive officers during 2003. Each of the outstanding options listed below may be exercised only upon the vesting of such options. These options vest ratably over a four year period as of the end of each of our fiscal years during that period. The percentage of total options is based upon options to purchase an aggregate of 740,624 shares of common stock granted to employees under our 2003 Stock Option Plan during fiscal year 2003. All options were granted at the fair market value of our common stock, as determined by our board of directors, on the date of grant.

Option Grants in Fiscal 2003

Name	Individual Grants				Potential Realizable Value of Assumed Annual Rates of Stock Price Appreciation for Option Term	
	Number of Securities Underlying Options Granted	% of Total Options Granted to Employees in Fiscal Year	Exercise Price	Expiration Date	5%	10%
Brian Moore	318,480	43.0%	\$ 3.04	July 29, 2013	6,297,519	10,605,665
Andrew Micolot	26,067	3.5%	\$ 3.04	July 29, 2013	515,440	868,053
D. Darin Martin						
Richard J. Senior	90,513	12.0%	\$ 3.04	July 29, 2013	1,789,774	3,014,160
D. Alec McPherson, Jr.	53,582	7.2%	\$ 3.04	July 29, 2013	1,059,513	1,784,326
Richard Riel	26,067	3.5%	\$ 3.04	July 29, 2013	515,440	868,053

Aggregated Option Exercises in Last Fiscal Year and Fiscal Year-End Value

The following table shows information concerning the number and value of unexercised options held by each of our named executive officers at December 29, 2003. The fiscal year-end value of unexercised in-the-money options listed below has been calculated based on an assumed initial public offering price of \$14.00 per share, which is the midpoint of the range on the cover of this prospectus, less the applicable exercise price per share, multiplied by the number of shares underlying such options. Our named executive officers did not exercise any stock options during fiscal year 2003.

Aggregated Fiscal 2003 Year-End Option Values

Name	Shares Acquired on Exercise	Value Realized (\$)	Number of Securities Underlying Unexercised Options		Value of Unexercised in-the-Money Options	
			Exercisable	Unexercisable	Exercisable	Unexercisable

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

	(#)				
Brian Moore		79,622	238,858	\$ 872,657	\$ 2,617,884
Andrew Micolot		6,517	19,550	71,426	214,268
D. Darin Martin					
Richard J. Senior		22,628	67,884	248,003	744,009
D. Alec McPherson, Jr.		22,809	49,600	249,987	543,616
Richard Riel		6,517	19,550	71,426	214,268

Employment Agreements

In June 2003, we entered into an employment agreement with Brian Moore to serve as our President and Chief Executive Officer and a member of our board of directors until June 11, 2006, subject to a one year

Table of Contents

automatic renewal. Mr. Moore's current annual salary is \$320,000, subject to annual review and potential increase by our board of directors. In addition, Mr. Moore is eligible to receive an annual cash bonus, based upon the satisfaction of certain performance criteria. Pursuant to a recent board of directors decision, this bonus may be up to 80% of his annual salary. Pursuant to the agreement, Mr. Moore was reimbursed for up to \$30,000 of moving and related expenses in connection with his relocation to Warsaw, Indiana. If Mr. Moore's employment is terminated by us without cause, or by Mr. Moore for good reason (as those terms are defined in his agreement) during the employment term, then Mr. Moore will be entitled to continue to receive his base salary for twelve months after the date of such termination. He will also be entitled to receive a pro rata portion of his performance bonus for the year in which such termination occurs. Mr. Moore has agreed not to compete with us during the term of his employment and for 24 months following termination.

In June, 2003, we entered into an employment agreement with Richard J. Senior to serve as the managing director of Thornton Precision Components Ltd. for a continuous period, subject to twelve months prior notice of termination. Pursuant to his contract, Mr. Senior also serves as the Senior Vice President and General Manager, Europe of Symmetry Medical Inc. If Mr. Senior's employment is terminated by us with less than twelve months prior notice, Mr. Senior is entitled to receive a payment equal to his base salary and benefits for 12 months, or the unexpired portion of the notice period, if less. Mr. Senior's current salary is \$218,400 per year, subject to annual review in April of each year. In addition, Mr. Senior is eligible to receive an annual cash bonus of up to 25% of his base salary, which amount will be determined by our board of directors. Mr. Senior has agreed not to compete with us during the term of his employment and for 6 months following termination.

In January 2004, we and Fred Hite signed an offer letter outlining the terms of employment for Mr. Hite as our Chief Financial Officer commencing on March 1, 2004. Mr. Hite's current annual salary is \$200,000, subject to annual review beginning in January 2005. In addition, Mr. Hite will receive an annual bonus, based upon the satisfaction of certain performance criteria, of up to 40% of his annual salary. If Mr. Hite's employment terminates in the event of our sale, he will be entitled to continue to receive his base salary for 12 months after the date of such termination and he will be entitled to receive an average of 12 months bonus. Mr. Hite was granted 72,410 stock options at \$4.83 per share under the 2003 Stock Option Plan. Pursuant to the terms of the offer letter, the benefits of these options are capped under certain circumstances.

Stock Option and Stock Purchase Plans

2002 Stock Option Plan

The 2002 Stock Option Plan provides for the grant of nonqualified stock options to our directors, officers and employees and other persons who provide services to us. A total of 52,315 shares of common stock are reserved for issuance under this plan. Options for 52,315 shares of common stock have been granted to three of our employees, none of whom is a named executive officer. These options vest ratably over a four year period as of the end of each of our fiscal years during that period, subject to us achieving certain minimum EBITDA targets in each fiscal year, and, if those targets are not met, on the seventh anniversary of the grant date so long as the optionee is still an employee. Options granted under the 2002 Stock Option Plan are generally not transferable by the optionee, and such options must be exercised within 30 days after the end of an optionee's status as an employee, director or consultant of ours (other than a termination by us for cause, as defined in the 2002 Stock Option Plan), within 180 days after such optionee's termination by death or disability, or within 90 days after such optionee's retirement, but in no event later than the expiration of the option term. All options were granted at the fair market value of our common stock, as determined by our board of directors, on the date of grant. The term of all options granted under the 2002 Stock Option Plan may not exceed ten years.

2003 Stock Option Plan

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

The 2003 Stock Option Plan provides for the grant of nonqualified stock options to our directors, officers and employees and other persons who provide services to us. A total of 907,167 shares of common stock are reserved for issuance under this plan. Options for 778,640 shares of common stock have been granted to certain of our employees, including three of the named executive officers as described above. These options vest ratably

Table of Contents

over a four year period as of the end of each of our fiscal years during that period. Options granted under the 2003 Stock Option Plan are generally not transferable by the optionee, and such options must be exercised within 30 days after the end of an optionee's status as an employee, director or consultant of ours (other than a termination by us for cause, as defined in the 2003 Stock Option Plan), within 180 days after such optionee's termination by death or disability, or within 90 days after such optionee's retirement, but in no event later than the expiration of the option term. All options were granted at the fair market value of our common stock, as determined by our board of directors, on the date of grant. The term of all options granted under the 2003 Stock Option Plan may not exceed ten years.

2004 Equity Incentive Plan

A copy of our 2004 Equity Incentive Plan (the "2004 Incentive Plan") is attached as an exhibit to the registration statement of which this prospectus is a part. The following description of the 2004 Incentive Plan is a summary and is therefore qualified in its entirety by reference to the complete text of the 2004 Incentive Plan.

General. Prior to the closing of this offering, our board of directors plans to adopt and submit to our stockholders for approval our 2004 Incentive Plan, which will be effective upon the closing of this offering. The 2004 Incentive Plan is designed to enable us to attract, retain and motivate our directors, officers, employees and consultants, and to further align their interests with those of our stockholders, by providing for or increasing their ownership interests in our company.

Administration. The 2004 Incentive Plan will be administered by the compensation committee of our board of directors. Our board may, however, at any time resolve to administer the 2004 Incentive Plan. Subject to the specific provisions of the 2004 Incentive Plan, the compensation committee is authorized to select persons to participate in the 2004 Incentive Plan, determine the form and substance of grants made under the 2004 Incentive Plan to each participant, modify the terms of grants made under the 2004 Incentive Plan, and otherwise make all determinations for the administration of the 2004 Incentive Plan.

Participation. Individuals who will be eligible to participate in the 2004 Incentive Plan will be directors (including non-employee directors), officers (including non-employee officers) and employees of, and other individuals performing services for, or to whom an offer of employment has been extended by, us or our subsidiaries.

Type of Award. The 2004 Incentive Plan will provide for the issuance of stock options, stock appreciation rights ("SARs"), restricted stock, deferred stock, dividend equivalents, other stock-based awards and performance awards. Performance awards will be based on the achievement of one or more business or personal criteria or goals, as determined by the compensation committee.

Available Shares. An aggregate of 1,673,333 shares of our common stock will be reserved for issuance under the 2004 Incentive Plan, subject to certain adjustments reflecting changes in our capitalization. If any grant under the 2004 Incentive Plan expires or terminates unexercised, becomes unexercisable or is forfeited as to any shares, or is tendered or withheld as to any shares in payment of the exercise price of the grant or the taxes payable with respect to the exercise, then such unpurchased, forfeited, tendered or withheld shares will thereafter be available for further grants under the 2004 Incentive Plan unless, in the case of options granted under the 2004 Incentive Plan, related SARs are exercised. The 2004 Incentive Plan will provide that the compensation committee shall not grant, in any one calendar year, to any one participant awards to purchase or acquire a number of shares of common stock in excess of 15% of the total number of shares authorized for issuance under the 2004 Incentive Plan.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Option Grants. Options granted under the 2004 Incentive Plan may be either incentive stock options within the meaning of Section 422 of the Internal Revenue Code of 1986, as amended (the Code) or non-qualified stock options, as the compensation committee may determine. Incentive stock options may only be granted to our employees. The exercise price per share for each option will be established by the compensation committee,

Table of Contents

except that in the case of the grant of any incentive stock option, the exercise price may not be less than 100% of the fair market value of a share of common stock as of the date of grant of the option. In the case of the grant of any incentive stock option to an employee who, at the time of the grant, owns more than 10% of the total combined voting power of all of our classes of stock, the exercise price may not be less than 110% of the fair market value of a share of common stock as of the date of grant of the option.

Terms of Options. The term during which each option may be exercised will be determined by the compensation committee, but if required by the Code and except as otherwise provided in the 2004 Incentive Plan, no option will be exercisable in whole or in part more than ten years from the date it is granted, and no incentive stock option granted to an employee who at the time of the grant owns more than 10% of the total combined voting power of all of our classes of stock will be exercisable more than five years from the date it is granted. All rights to purchase shares pursuant to an option will, unless sooner terminated, expire at the date designated by the compensation committee. The compensation committee will determine the date on which each option will become exercisable and may provide that an option will become exercisable in installments. The shares constituting each installment may be purchased in whole or in part at any time after such installment becomes exercisable, subject to such minimum exercise requirements as may be designated by the compensation committee. Prior to the exercise of an option and delivery of the shares represented thereby, the optionee will have no rights as a stockholder, including any dividend or voting rights, with respect to any shares covered by such outstanding option. If required by the Code, the aggregate fair market value, determined as of the grant date, of shares for which an incentive stock option is exercisable for the first time during any calendar year under all of our equity incentive plans may not exceed \$100,000.

Stock Appreciation Rights. SARs entitle a participant to receive the amount by which the fair market value of a share of our common stock on the date of exercise exceeds the grant price of the SAR. The grant price and the term of an SAR will be determined by the compensation committee. However, no SAR may have a term exceeding ten years. A SAR may be granted either alone or in tandem with an option. A SAR granted in tandem with an option will be exercisable to the extent that such related option is exercisable. The exercise of an option will result in an immediate forfeiture of any related SAR to the extent the option is exercised, and the exercise of a SAR will cause an immediate forfeiture of any related option to the extent that the SAR is exercised.

Termination of Options and SARs. Unless otherwise determined by the compensation committee, and subject to certain exemptions and conditions, if a participant ceases to be a director, officer or employee of, or to otherwise perform services for us for any reason other than death, disability, retirement or termination for cause, all of the participant's options and SARs that were exercisable on the date of such cessation will remain exercisable for, and will otherwise terminate at the end of, a period of 90 days after the date of such cessation; provided that the participant does not compete with us during such 90-day period without the written consent of the board of directors or compensation committee. In the case of death or disability, all of the participant's options and SARs that were exercisable on the date of such death or disability will remain so for a period of 180 days from the date of such death or disability; provided that the participant does not compete with us during such 180-day period without the written consent of the board of directors or compensation committee. In the case of retirement, all of the participant's options and SARs that were exercisable on the date of retirement will remain exercisable for, and shall otherwise terminate at the end of, a period of 90 days after the date of retirement; provided that the participant does not compete with us during such 90-day period without the written consent of the board of directors or compensation committee. In the case of a termination for cause, or if a participant does not become a director, officer or employee of, or does not begin performing other services for us for any reason, all of the participant's options and SARs will expire and be forfeited immediately upon such cessation or non-commencement, whether or not then exercisable.

Restricted Stock and Deferred Shares. Restricted stock is a grant of shares of our common stock that may not be sold or disposed of, and that may be forfeited in the event of certain terminations of employment, prior to the end of a restricted period set by the compensation committee. A participant granted restricted stock generally has all of the rights of a stockholder, unless the compensation committee determines otherwise. An award of deferred shares confers upon a participant the right to receive shares of our common stock at the end of a deferral

Table of Contents

period set by the compensation committee, subject to possible forfeiture of the award in the event of certain terminations of employment prior to the end of the deferral period. Prior to settlement, an award of deferred shares carries no voting or dividend rights or other rights associated with share ownership, although dividend equivalents may be granted in connection with restricted stock or deferred shares.

Dividend Equivalents. Dividend equivalents confer the right to receive, currently or on a deferred basis, cash, shares of our common stock, other awards or other property equal in value to dividends paid on a specific number of shares of our common stock. Dividend equivalents may be granted alone or in connection with another award, and may be paid currently or on a deferred basis. If deferred, dividend equivalents may be deemed to have been reinvested in additional shares of our common stock.

Other Stock-Based Awards. The compensation committee is authorized to grant other awards that are denominated or payable in, valued by reference to, or otherwise based on or related to shares of our common stock, under the 2004 Incentive Plan. These awards may include convertible or exchangeable debt securities, other rights convertible or exchangeable into shares of common stock, purchase rights for shares of common stock, awards with value and payment contingent upon our performance as a company or any other factors designated by the compensation committee. The compensation committee will determine the terms and conditions of these awards.

Performance Awards. The compensation committee may subject a participant's right to exercise or receive a grant or settlement of an award, and the timing of the grant or settlement, to performance conditions specified by the compensation committee. Performance awards may be granted under the 2004 Incentive Plan in a manner that results in their qualifying as performance-based compensation exempt from the limitation on tax deductibility under Section 162(m) of the Internal Revenue Code for compensation in excess of \$1,000,000 paid to our chief executive officer and our four highest compensated officers. The compensation committee will determine performance award terms, including the required levels of performance with respect to particular business criteria, the corresponding amounts payable upon achievement of those levels of performance, termination and forfeiture provisions and the form of settlement. In granting performance awards, the compensation committee may establish unfunded award pools, the amounts of which will be based upon the achievement of a performance goal or goals based on one or more business criteria. Business criteria might include, for example, total stockholder return, net income, pretax earnings, EBITDA, earnings per share, or return on investment.

Amendment of Outstanding Awards and Amendment/Termination of Plan. The board of directors or the compensation committee generally will have the power and authority to amend or terminate the 2004 Incentive Plan at any time without approval from our stockholders. The compensation committee generally will have the authority to amend the terms of any outstanding award under the plan, including, without limitation, the ability to reduce the exercise price of any options or SARs or to accelerate the dates on which they become exercisable or vest, at any time without approval from our stockholders. No amendment will become effective without the prior approval of our stockholders if stockholder approval would be required by applicable law or regulations, including if required for continued compliance with the performance-based compensation exception of Section 162(m) of the Code, under provisions of Section 422 of the Code or by any listing requirement of the principal stock exchange on which our common stock is then listed. Unless previously terminated by the board or the compensation committee, the 2004 Incentive Plan will terminate on the tenth anniversary of its adoption. No termination of the 2004 Incentive Plan will materially and adversely affect any of the rights or obligations of any person, without his or her written consent, under any grant of options or other incentives theretofore granted under the 2004 Incentive Plan.

Transfer of Awards. Unless the compensation committee determines otherwise or unless a transfer meets certain requirements set forth in the 2004 Incentive Plan, no option, SAR, performance award or restricted stock granted under the 2004 Incentive Plan may be transferred by a participant. In the event an award is transferred in accordance with the requirements of the 2004 Incentive Plan, all provisions of the 2004 Incentive Plan will continue to apply to such award and the transferee of such award shall be bound thereby.

Table of Contents

Change of Control. Unless otherwise determined by the compensation committee, if certain events occur which constitute a change of control of the Company as defined in the plan and a participant's employment or service as a director, officer or employee is terminated within 12 months thereafter without cause, by reason of death, disability or retirement, or by the participant after certain changes in the nature of that participant's employment or failure by the Company to fulfill their obligations towards the participant: (i) any awards carrying a right to exercise that was not previously vested and exercisable shall be fully vested and exercisable for 180 days after the date of such termination and (ii) with respect to other awards, any restrictions, deferrals of settlement or other conditions, with certain exceptions, will be deemed lapsed and such awards deemed fully vested and (iii) the performance goals and conditions relating to any performance awards, in the discretion of the committee, shall be deemed met as of the date of the change in control. In the event of a merger or consolidation in which our capital stock outstanding immediately prior thereto does not represent 50% of the outstanding capital stock of the surviving entity, the compensation committee may cancel any or all outstanding options under the 2004 Incentive Plan in consideration for payment to the holders of those options the net consideration they would have received in such transaction if their options had been fully exercised immediately prior thereto.

2004 Employee Stock Purchase Plan

A copy of our 2004 Employee Stock Purchase Plan (the "2004 Stock Purchase Plan") is attached as an exhibit to the registration statement of which this prospectus is a part. The following description of the 2004 Stock Purchase Plan is a summary and is therefore qualified in its entirety by reference to the complete text of the 2004 Stock Purchase Plan.

General. Prior to the closing of this offering, our board of directors plans to adopt and submit to our stockholders for approval our 2004 Stock Purchase Plan. The purpose of the plan is to provide an incentive for our employees (and employees of our subsidiaries designated by our board of directors) to purchase our common stock and acquire a proprietary interest in us.

Administration. A committee designated by our board will administer the plan. The plan vests the committee with the authority to interpret the plan, to prescribe, amend, and rescind rules and regulations relating to the plan, and to make all other determinations necessary or advisable for the administration of the plan, although our board of directors may exercise any such authority in lieu of the committee. In all cases, the plan will be required to be administered in such a manner as to comply with applicable requirements of Rule 16b-3 of the Exchange Act, and Section 423 of the Code.

Eligibility and Participation. As of the date of this offering, each person who is employed either by us or by one of our designated subsidiaries and is expected on a regularly-scheduled basis to work more than 20 hours per week for more than five months per calendar year, automatically will be enrolled in the plan. Persons who subsequently become employed by us or one of our designated subsidiaries will be eligible once they have completed three months of service, provided they are expected on a regularly-scheduled basis to work more than 20 hours per week for more than five months per calendar year.

Options to Purchase/Purchase of Shares. Each participant will be granted an option to purchase shares of our common stock at the beginning of each 24-month offering period under the plan, on each exercise date, during the offering period. Exercise dates will occur on each June 30 and December 31. Participants will purchase the shares of our common stock through after-tax payroll deductions, not to exceed 10% of the participant's total base salary on each payroll date. No participant may purchase more than 750 shares of common stock on any one exercise date, or more than \$25,000 of common stock in any one calendar year. The purchase price for each share will generally be the lower of 85% of the fair market value of a share on the first day of the offering period, or 85% of the fair market value on the exercise date. If the fair market value on any exercise date during an offering period is lower than it was on the first day of the offering period, that offering period will automatically terminate and a new 24-month offering period will commence on the next July 1 or January 1, as applicable. If a participant's employment with us or one of our designated subsidiaries terminates, any outstanding option of that participant also will terminate.

Table of Contents

Share Reserve. 500,000 shares of our common stock will be reserved for issuance over the term of the plan. That amount will be increased each year by the lowest of 100,000 shares, 1% of all shares outstanding at the end of the previous year, or a lower amount determined by our board. If any option to purchase reserved shares is not exercised by a participant for any reason or if the option terminates, the shares that were not purchased shall again become available under the plan. The number of shares available under the plan also will be subject to periodic adjustment for changes in the outstanding common stock occasioned by stock splits, stock dividends, recapitalizations or other similar changes affecting our outstanding common stock.

Amendment and Termination. Our board or the compensation committee generally will have the power and authority to amend the plan from time to time in any respect without the approval of our stockholders. However, no amendment will become effective without the prior approval of our stockholders if stockholder approval would be required by applicable law or regulation, including Rule 16b-3 under the Exchange Act, Section 423 of the Code, or any listing requirement of the principal stock exchange on which our common stock is then listed. Additionally, no amendment may make any change to an option already granted that adversely affects the rights of any participant. The plan will terminate at the earliest of the tenth anniversary of its implementation, the time when there are no remaining reserved shares available for purchase under the plan, or an earlier time that our board may determine.

Change of Control. In the event of a proposed sale of all or substantially all of our assets, or the merger with or into another corporation, each option under the plan shall be assumed or an equivalent option shall be substituted by such successor corporation or a parent or subsidiary of such successor corporation, unless the compensation committee determines, in lieu of such assumption or substitution, to set a new exercise date upon 10 days prior notice, in which case each participant's options will be automatically exercised on the new exercise date unless the participant has withdrawn from the plan prior thereto.

401(k) Plans

We sponsor two qualified employee savings and retirement plans, or 401(k) plans, that cover most of our employees who satisfy certain eligibility requirements relating to minimum age and length of service. Under the 401(k) plan, eligible employees may elect to contribute up to a maximum amount equal to 25% of their annual compensation up to a statutorily prescribed annual limit. We may also elect to make profit-sharing contributions and a matching contribution to the 401(k) plans in an amount equal to a discretionary percentage of the employee contributions, subject to certain statutory limitations and vesting requirements. We announce annually the amount of funds which we will match. Our expenses related to these plans amounted to approximately \$0.7 million, \$0.5 million and \$0.5 million in fiscal years 2003, 2002 and 2001, respectively.

Director and Officer Indemnification and Limitation on Liability

Our certificate of incorporation provides that, to the fullest extent permitted by the Delaware General Corporation Law and except as otherwise provided in our by-laws, none of our directors shall be liable to us or our stockholders for monetary damages for a breach of fiduciary duty. In addition, our certificate of incorporation provides for indemnification of any person who was or is made, or threatened to be made, a party to any action, suit or other proceeding, whether criminal, civil, administrative or investigative, because of his or her status as a director or officer of the Company, or service, while a director or officer of the Company, as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise at our request to the fullest extent permitted by applicable law against all expenses, liabilities and losses reasonably incurred by such person. Further, our certificate of incorporation provides that we may purchase and maintain insurance on our own behalf and on behalf of any other person who is or was a director, officer, employee or agent of the Company or was serving at our request as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise.

Table of Contents**CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS**

Since January 1, 2001, we have not engaged in any transactions involving amounts in excess of \$60,000 with any of our executive officers, directors, or holders of more than five percent of our outstanding voting securities, other than the transactions set forth below.

Repurchase of Preferred Stock, Subordinated Debt and Preferred Stock Warrants

We intend to use approximately \$16.2 million of the net proceeds from this offering to repurchase a portion of our outstanding preferred stock or warrants to purchase preferred stock. The following table sets forth the number of shares of preferred stock and warrants to purchase preferred stock held by certain of our directors, executive officers and security holders who beneficially own more than five percent of any class of our voting securities:

Name	Aggregate Number of Shares of Preferred Stock and Warrants	
	to Purchase Preferred Stock	Aggregate Purchase Price
Mettis Group Limited	1,333.70	\$ 1,478,967
Olympus/Symmetry Holdings LLC	10,899.65	\$ 13,370,654
Olympus Growth Fund III, L.P.	85.00	\$ 94,254
Olympus Growth Co-Investment Fund III, L.P.	14.72	\$ 16,319
Olympus Executive Fund	0.82	\$ 906
Windjammer Mezzanine & Equity Fund II, L.P.	695.89	\$ 771,686
Brian Moore	13.34	\$ 14,681
Andrew Miclot	24.90	\$ 33,475
D. Darin Martin	17.54	\$ 23,417
Richard J. Senior	6.67	\$ 7,340
Potenza Enterprises (owned by Frank Turner, a Director)	13.34	\$ 14,681

The per share purchase price for each share of preferred stock or warrant to purchase preferred stock to be repurchased by us will be equal to the liquidation value of the preferred stock of \$1,000 per share plus all accumulated and unpaid dividends through the repurchase date minus, in the case of the preferred stock warrants, the exercise price thereof of \$.01 per share. All of the shares of the preferred stock being repurchased by us was initially sold to the holders thereof at a price of \$1,000 per share and all preferred stock warrants were issued in connection with our sale of our 12.0% senior subordinated notes. See Issuances of Common Stock and Preferred Stock and Sale of Senior Subordinated Notes and Warrants below.

All of our outstanding shares of preferred stock and preferred stock warrants not repurchased will be converted into shares of common stock or warrants to purchase our common stock prior to the completion of this offering. Each share of preferred stock not repurchased will be converted into that number of shares of our new common stock determined by dividing its liquidation value of \$1,000 per share plus all accumulated and unpaid dividends through the conversion date by 85% of the initial public offering price.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

In addition, we intend to use approximately \$36.4 million of the net proceeds from this offering to repurchase all of our outstanding subordinated debt, including an aggregate of \$8.0 million of subordinated indebtedness held by Olympus Growth Fund III, L.P., Olympus Growth Co-Investment Fund III, L.P. and Olympus Executive Fund and \$20.0 million of subordinated debt held by Windjammer Mezzanine & Equity Fund II, L.P. See Sale of Senior Subordinated Notes and Warrants.

In the aggregate, we expect that Olympus and its affiliates will receive approximately \$21.5 million of the net proceeds from this offering.

Table of Contents**Issuances of Common Stock and Preferred Stock**

The following table summarizes the purchases of our common stock, Class A preferred stock and Class B preferred stock, since January 1, 2001, by our directors, executive officers and security holders who beneficially own more than five percent of any class of our voting securities in an amount that exceeds \$60,000.

Name	Type of Shares	Number of Shares	Aggregate	
			Purchase Price	Date of Purchase
Olympus/Symmetry Holdings LLC (1)	common	6,334,391	\$ 19,271,736	06/11/03
	Class A preferred	43,678	\$ 43,678,314	06/11/03
	Class B preferred	3,033	\$ 3,033,402	02/22 5/15/02
Brian Moore (President, Chief Executive Officer and Director)	common	15,097	\$ 45,922	07/15/03
	Class A preferred	104	\$ 104,079	07/15/03
Potenza Enterprises (owned by Frank Turner, a Director)	common	15,097	\$ 45,922	07/15/03
	Class A preferred	104	\$ 104,079	07/15/03
Windjammer Mezzanine & Equity Fund II, L.P.	common	503,126	\$ 1,530,716	06/11/03
	Class A preferred	3,469	\$ 3,469,000	06/11/03

- (1) A limited liability company controlled by the Olympus funds. Olympus Growth Fund III, L.P., Olympus Growth Co-Investment Fund III, L.P. and Olympus Executive Fund are investors in Olympus/Symmetry Holdings LLC.

In each case, the purchase price per share of common stock and preferred stock was based on our determination of the fair market value on the respective purchase dates.

Sale of Senior Subordinated Notes and Warrants

On June 11, 2003, we borrowed an aggregate of \$36.0 million through the issuance of senior subordinated notes bearing interest at 12% per annum and warrants to purchase an aggregate of 585,377 shares of our common stock at a purchase price of \$0.01 per share and warrants to purchase an aggregate of 3,530 shares of our Class A preferred stock at a purchase price of \$0.01 per share. Each purchaser of our senior subordinated notes received a fee equal to 1% of the principal amount of the senior subordinated notes purchased by such party. We used these proceeds to fund a portion of the purchase price for Mettis.

The purchasers of our senior subordinated notes and warrants to purchase common stock and Class A preferred stock included the following stockholders who beneficially own more than five percent of any class of our voting securities:

Five Percent Stockholder	Principal Amount of Senior Subordinated Notes	Shares of Common Stock Underlying Warrants	Shares of Class A Preferred Stock Underlying Warrants
Olympus Growth Fund III, L.P.	\$ 6,763,882	109,983	663
Olympus Growth Co-Investment Fund III, L.P.	1,171,118	19,043	115
Olympus Executive Fund.	65,000	1,057	6
Windjammer Mezzanine & Equity Fund II, L.P.	20,000,000	325,207	1,961
Total	\$ 28,000,000	455,290	2,745

Table of Contents

Transaction Fee Agreement

Pursuant to the terms of an amended and restated transaction fee agreement, dated June 11, 2003, Olympus Advisory Partners, Inc. agreed to provide financial and management consulting services to us. This transaction fee agreement was for an initial term of five years, automatically renewable after five years on a year-to-year basis unless either party gives 30 days prior written notice to the other party of its intent to terminate the agreement. We have paid Olympus Advisory Partners approximately \$375,000, \$250,000 and \$250,000 for services rendered under this agreement in fiscal years 2003, 2002 and 2001, respectively. In connection with this offering, we and Olympus Advisory Partners have agreed to terminate this agreement.

In addition, Olympus Advisory Partners, Inc. received a fee, including expense reimbursement, upon consummation of the acquisition of Mettis of approximately \$1.64 million for services provided in structuring, negotiating and financing that transaction.

Repurchase of Capital Stock from Former Executive Officers

Pursuant to the terms of a stock purchase agreement, dated as of June 11, 2003, we repurchased all of the common stock and Class A preferred stock held by certain former executive officers, including John B. Byrd III (former President and Chief Executive Officer) and his transferees, and James G. Hoffman (former Vice President and Chief Financial Officer). The purchase price for each share of common stock was \$3.04 and the purchase price for each share of Class A preferred stock was \$1,000 plus the accrued but unpaid dividends on such share for an aggregate purchase price of \$1,456,961 for Mr. Byrd and his transferees and \$287,079 for Mr. Hoffman.

Exchange of Class B Preferred Stock

Pursuant to the terms of an exchange agreement, dated as of June 11, 2003, we exchanged all of our outstanding 3,042 shares of Class B preferred stock for an aggregate of 383,852 shares of our common stock and 2,647 shares of our Class A preferred stock. Olympus/Symmetry Holdings LLC exchanged 3,033 shares of Class B preferred stock for 382,795 shares of our common stock and 2,640 shares of our Class A preferred stock. In such exchange, the aggregate liquidation value of the Class B preferred stock plus the aggregate accrued but unpaid dividends thereon were allocated 30.61433% to common stock and 69.38567% to Class A preferred stock (the same allocation as applied to the capital contributions by the investors who provided the equity portion of the funding for the acquisition of Mettis) with each share of common stock valued at \$3.04 and each share of Class A preferred stock valued at \$1,000.00 (the same value as paid by the investors who provided the equity portion of the funding for the acquisition of Mettis). We implemented the exchange in order to eliminate our Class B preferred stock and create a more appropriate capital structure.

Stockholders Agreement

On October 18, 2000, we and all our stockholders entered into a stockholders agreement, as amended or modified from time to time. All of our current stockholders are parties to the stockholders agreement. The agreement provides that, so long as Olympus/Symmetry Holdings LLC holds at least 50% of the outstanding shares of our common stock, if the holders of a majority of our common stock and our board of directors approve a sale of all or substantially all of the Company's assets or stock, we have a right to require certain stockholders that are party to this agreement to sell such stockholders' stock to the proposed purchaser.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

The agreement further provides that the holders of a majority of our stock held by the stockholders party to the agreement may request, at any time, an unlimited number of registrations of all or any portion of their stock on Form S-1 or any similar long-form registration statement or, if available, an unlimited number of registrations of all or any portion of their stock on Form S-2 or S-3 or any similar short-form registration statement, each at our expense. The agreement also grants to the parties thereto piggyback registration rights with respect to all

Table of Contents

registrations by us and we will pay all expenses related to such piggyback registrations. Pursuant to an amendment to this agreement executed in connection with this offering, the piggyback registration rights are not applicable to the offering of shares contemplated hereby. The agreement further provides for the following, which terminate upon the sale in an underwritten public offering registered under the Securities Act of shares of our common stock having an aggregate offering value of at least \$40 million: restrictions on the transfer of stock, participation rights, management stockholder repurchase rights and pre-emptive rights. The agreement also restricts the rights of holders of shares to make a public sale or distribution of such shares for the seven days prior to and the 180 day period beginning on the effective date of any initial public offering, or, in certain circumstances, piggyback registration, unless the underwriters of such offering otherwise agree.

The agreement also provides that a representative of Windjammer Mezzanine & Equity Fund II, L.P. has the right to attend all board meetings as an observer and has the right to inspect our books, records and facilities.

Financial Advisory Fee

We have agreed to pay \$2.0 million to Olympus Advisory Partners, Inc. as compensation for financial advisory services rendered by Olympus Advisory Partners, Inc. to us in connection with the offering. Such financial advisory services included extensive analysis of this offering as compared to other strategic alternatives, evaluation and selection of the managing underwriters for this offering, structuring advice as to the proposed terms of the offering, assistance in the preparation of the offering-related documentation and assistance in the structuring, preparation and negotiation of the terms of the new senior credit facility.

Other Related-Party Transactions

During fiscal 2003, we purchased contract manufacturing services totaling approximately \$283,000 from ADS Precision Limited, a company controlled by a relative of Mr. Richard J. Senior, a Senior Vice President and General Manager of our European Operations. We maintain an ongoing relationship with this vendor and believe all transactions have been executed on an arms-length basis. As of October 2, 2004, we had a payable to ADS Precision Limited of approximately \$0.3 million.

Table of Contents**PRINCIPAL STOCKHOLDERS**

The following table shows information with respect to the beneficial ownership of our common stock as of November 16, 2004, and as adjusted to reflect the sale of the common stock being offered in this offering, by:

each person, or group of affiliated persons, known by us to own beneficially 5% or more of our common stock;

each of our directors and director designees;

each of our named executive officers; and

all of our directors, director designees and executive officers as a group.

Each stockholder's percentage ownership before the offering is based on 24,920,037 shares of our common stock outstanding as of December 3, 2004 (as adjusted to reflect at that date the conversion of all shares of our preferred stock and preferred stock warrants that will not be repurchased.) Each stockholder's percentage ownership after the offering is based on shares of our common stock outstanding immediately after the completion of this offering. We have granted the underwriters an option to purchase up to 1,200,000 additional shares of our common stock to cover over-allotments, if any, and the table below assumes no exercise of that option.

Name of Beneficial Owner	Number of Shares Beneficially Owned(1)	Percentage Beneficially Owned	
		Before the Offering	After the Offering
Five Percent Stockholders:			
Olympus Partners Funds(2)	21,040,294	84.4%	63.9%

* Less than one percent.

- (1) Beneficial ownership is based on information furnished by the individuals or entities. Unless otherwise indicated and subject to community property laws where applicable, the individuals and entities named in the table above have sole voting and investment power with respect to all shares of our common stock shown as beneficially owned by them. Beneficial ownership and percentage ownership are determined in accordance with the rules of the SEC. In calculating the number of shares beneficially owned by an individual or entity and the percentage ownership of that individual or entity, shares underlying options and warrants held by that individual or entity that are either currently exercisable or exercisable within 60 days from December 3, 2004 are deemed outstanding. These shares, however, are not deemed outstanding for the purpose of computing the percentage ownership of any other individual or entity.

Table of Contents

- (2) Consists of: 20,845,569 shares beneficially owned by Olympus/Symmetry Holdings LLC, 164,638 shares beneficially owned by Olympus Growth Fund III, L.P., that are issuable upon exercise of currently exercisable warrants, 28,506 shares beneficially owned by Olympus Growth Co-Investment Fund III, L.P. that are issuable upon exercise of currently exercisable warrants, and 1,582 shares beneficially owned by Olympus Executive Fund that are issuable upon exercise of currently exercisable warrants. Mr. Robert S. Morris, a member of our board of directors, is the managing director of Olympus Partners, and, in such capacity, exercises voting and investment power with respect to the shares held by the Olympus entities and has a pecuniary interest in certain of those shares. Mr. James A. Conroy, a member of our board of directors, is a partner at Olympus Partners, and, as a result, has a pecuniary interest in certain of the shares held by the Olympus entities. Mr. Manu Bettegowda, a member of our board of directors, is a vice president at Olympus Partners, and, as a result, has a pecuniary interest in certain of the shares held by the Olympus entities. Each of Messrs. Morris, Conroy and Bettegowda disclaims beneficial ownership of the shares owned by these entities, except to the extent of his proportionate pecuniary interest therein. The address for Olympus Partners and the Olympus entities is Metro Center, One Station Place, Stamford, Connecticut, 06902.
- (3) Represents shares issued in connection with our acquisition of Mettis (UK) Limited, which shares are held in escrow and which have been sold to three investment funds managed by 3i Investments plc. 3i Investments plc, an indirect, wholly owned subsidiary of 3i Group plc, acting through its board of directors, exercises voting and investment control of the shares on behalf of investment funds that it manages. No individuals beneficially own the shares. 3i Investments plc will not have the power to dispose of the shares until December 11, 2004, at which time any shares that are not subject to any outstanding claims will be distributed to the funds. The address for 3i Investments plc is 91 Waterloo Road, London, SE1 8XP, United Kingdom.
- (4) Includes 486,814 shares of our common stock issuable upon exercise of currently exercisable warrants. Windjammer Mezzanine & Equity Fund II, L.P. is managed by its general partner, Windjammer Capital Investors, LLC. Under the Windjammer Capital Investors, LLC limited liability company agreement, the managing principals, Robert Bartholomew and Schuyler G. Lance, are entitled to make all decisions with respect to the control, management and direction of the business of Windjammer Capital Investors, LLC. The address for Windjammer Mezzanine & Equity Fund II, L.P. is 890 Winter Street, Suite 130, Waltham, Massachusetts 02451.
- (5) Includes 79,622 shares of our common stock issuable upon exercise of currently exercisable options.
- (6) Includes 6,517 shares of our common stock issuable upon exercise of currently exercisable options.
- (7) Includes 22,628 shares of our common stock issuable upon exercise of currently exercisable options.
- (8) Mr. Riel retired from our company as of May 28, 2004.
- (9) Consists of 23,607 shares beneficially owned by Potenza Enterprises Ltd. Mr. Turner is the chairman of Potenza Enterprises Ltd.
- (10) Includes 21,040,294 shares beneficially owned by the Olympus funds and attributed to Messrs. Morris, Conroy and Bettegowda, including 194,725 shares of our common stock that are issuable upon exercise of currently exercisable warrants, and 23,607 shares beneficially owned by Potenza Enterprises Ltd. and attributed to Mr. Turner. Also includes 108,767 shares of our common stock issuable upon exercise of currently exercisable options held by the executive officers.

Table of Contents

DESCRIPTION OF CAPITAL STOCK

General Matters

Upon completion of this offering, our total amount of authorized capital stock will be 75,000,000 shares of common stock, \$0.0001 par value per share, and 5,000,000 shares of preferred stock, \$.01 par value per share. Upon completion of the offering, 32,792,318 shares of common stock will be issued and outstanding. Based on an initial public offering price of \$14.00 per share, the mid-point of the range set forth on the cover page of this prospectus, and an estimated closing date of December 13, 2004, we expect that the Class A preferred stock and preferred stock warrants not repurchased will be converted into an aggregate of 9,289,650 shares of common stock and warrants to repurchase shares of common stock. The actual number of shares of common stock to be issued as a result of this conversion is subject to change based on the actual initial offering price. The discussion set forth below describes the most important terms of our capital stock, certificate of incorporation and by-laws as will be in effect upon completion of this offering. Because it is only a summary, it does not contain all the information that may be important to you. For a complete description you should refer to our certificate of incorporation and by-laws, copies of which have been filed as exhibits to the registration statement of which this prospectus is a part, and to the applicable provisions of the Delaware General Corporation Law.

Common Stock

All of our existing common stock is, and the shares of common stock being offered by us in this offering will be, upon payment therefor, validly issued, fully paid and nonassessable. Set forth below is a brief discussion of the principal terms of our common stock.

Dividend Rights. Subject to preferences that may apply to shares of preferred stock outstanding at the time, holders of outstanding shares of common stock are entitled to receive dividends out of assets legally available at the times and in the amounts as the board of directors may from time to time determine. For more information, see [Dividend Policy](#).

Voting Rights. Each outstanding share of our common stock is entitled to one vote on all matters submitted to a vote of stockholders.

Preemptive or Similar Rights. Our common stock is not entitled to preemptive or other similar subscription rights to purchase any of our securities.

Conversion Rights. Our common stock is not convertible.

Right to Receive Liquidation Distributions. Upon our liquidation, dissolution or winding up, the holders of our common stock are entitled to receive pro rata our assets which are legally available for distribution, after payment of all debts and other liabilities and subject to the prior rights of any holders of preferred stock then outstanding.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

NYSE Listing. Our common stock has been approved for listing, subject to official notice of issuance, on the New York Stock Exchange under the symbol SMA.

Preferred Stock

As of October 2, 2004, there were 101,588 shares of Class A convertible preferred stock outstanding. On May 28, 2004, we repurchased 35 shares of our preferred stock from an employee who retired. We will use a portion of the net proceeds of this offering to repurchase a portion of our outstanding shares of preferred stock. See Use of Proceeds. Each share of preferred stock that is not repurchased will be converted into shares of new common stock. Each share of preferred stock not repurchased will be converted into that number of shares of our new common stock determined by dividing its liquidation value of \$1,000 per share plus all accumulated and unpaid dividends through the conversion date by 85% of the initial public offering price.

Following this offering, our board of directors may, without further action by our stockholders, from time to time, direct the issuance of up to 5,000,000 shares of preferred stock in series and may, at the time of issuance, determine the rights, preferences and limitations of each series. Satisfaction of any dividend preferences of

Table of Contents

outstanding shares of preferred stock would reduce the amount of funds available for the payment of dividends on shares of common stock. Holders of shares of preferred stock may be entitled to receive a preference payment in the event of our liquidation, dissolution or winding-up before any payment is made to the holders of shares of common stock. Under specified circumstances, the issuance of shares of preferred stock may render more difficult or tend to discourage a merger, tender offer or proxy contest, the assumption of control by a holder of a large block of our securities or the removal of incumbent management. Upon the affirmative vote of a majority of the total number of directors then in office, the board of directors, without stockholder approval, may issue shares of preferred stock with voting and conversion rights which could adversely affect the holders of shares of common stock. Upon consummation of the offering, there will be no shares of preferred stock outstanding, and we have no present intention to issue any shares of preferred stock.

Options

As of October 2, 2004, options to purchase a total of 830,955 shares of common stock were outstanding. Options to purchase a total of 128,527 shares remain available for future issuance as of October 2, 2004 under our 2002 and 2003 Stock Option Plans. We intend to adopt the 2004 Equity Incentive Plan in connection with this offering.

Warrants

As of October 2, 2004, there were outstanding warrants to purchase the following number of shares of capital stock as adjusted to give effect to the stock split, the repurchase of 452 preferred stock purchase warrants and conversion of the preferred stock purchase warrants not repurchased into common stock purchase warrants:

Description	Common Stock After the Offering
Preferred Stock	286,818
Common Stock	585,377
Total	872,195

The warrants to purchase preferred stock and the warrants to purchase common stock terminate June 11, 2013, and each have an exercise price of \$.01 per share. The warrants to purchase an aggregate of 3,078 shares of preferred stock not repurchased by us will automatically convert into warrants to purchase common stock prior to completion of the offering.

Registration Rights

Following the completion of this offering, stockholders holding approximately 24.8 million shares of our common stock will have the right, subject to various conditions and limitations, to include their shares in registration statements relating to our securities. The holders of more than 50% of the shares subject to these registration rights have the right, beginning no earlier than 180 days after the offering, on unlimited occasions, to demand that we register shares under the Securities Act, subject to certain limitations. In addition, these holders are entitled to piggyback

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

registration rights with respect to the registration under the Securities Act of shares of common stock. In the event that we propose to register any shares of common stock under the Securities Act either for our account or for the account of any stockholders, the holders of shares having piggyback registration rights are entitled to receive notice of such registration and include new shares in any such registration, subject to certain limitations. These registration rights are subject to conditions and limitations, among them the right of the underwriters of an offering to limit the number of shares of common stock held by such stockholders to be included in such registration. Holders who have the ability to demand registration rights agreed not to exercise their registration rights without the prior written consent of Banc of America Securities LLC and Credit Suisse First Boston LLC for a period of 180 days from the date of this prospectus. We are generally required to bear all

Table of Contents

expenses of such registrations. Registration of any of the shares of common stock held by stockholders with registration rights would result in such shares becoming freely tradable without restriction under the Securities Act immediately upon effectiveness of such registration.

Anti-takeover Effects of our Certificate of Incorporation and By-laws

Our certificate of incorporation and by-laws contain certain provisions that are intended to enhance the likelihood of continuity and stability in the composition of the board of directors and which may have the effect of delaying, deferring or preventing a future takeover or change in control of the company unless such takeover or change in control is approved by the board of directors.

These provisions include:

Classified Board of Directors. Upon completion of this offering, our board of directors will be divided into three classes of directors serving staggered three-year terms. As a result, approximately one-third of the board of directors will be elected each year. These provisions, when coupled with the provisions of our certificate of incorporation and bylaws authorizing the board of directors to fill vacant directorships or increase the size of the board of directors, may deter a stockholder from removing incumbent directors and simultaneously gaining control of the board of directors by filling the vacancies created by this removal with its own nominees.

Action by Written Consent; Special Meetings of Stockholders. Our certificate of incorporation provides that stockholder action can be taken only at an annual or special meeting of stockholders and cannot be taken by written consent in lieu of a meeting. Our certificate of incorporation and the by-laws provide that, except as otherwise required by law, special meetings of the stockholders can only be called by the chairman of the board or our chief executive officer, or pursuant to a resolution adopted by a majority of the board of directors. Stockholders are not permitted to call a special meeting or to require the board of directors to call a special meeting.

Advance Notice Procedures. Our by-laws establish an advance notice procedure for stockholder proposals to be brought before an annual meeting of our stockholders, including proposed nominations of persons for election to the board of directors. Stockholders at an annual meeting may only consider proposals or nominations specified in the notice of meeting or brought before the meeting by or at the direction of the board of directors or by a stockholder who was a stockholder of record on the record date for the meeting, who is entitled to vote at the meeting and who has given our Secretary timely written notice, in proper form, of the stockholder's intention to bring that business before the meeting.

In the case of an annual meeting of stockholders, notice by a stockholder, in order to be timely, must be received at our principal executive offices not less than 90 days prior to the anniversary date of the immediately preceding annual meeting of stockholders. In the event that the annual meeting is called for a date that is not within 30 days before or 60 days after the anniversary date, in order to be timely, notice by a stockholder must be received not later than the later of 90 days prior to the annual meeting of stockholders or the tenth day following the date on which notice of the annual meeting was mailed or public disclosure of the date of the annual meeting was made.

In the case of a special meeting of stockholders called for the purpose of electing directors, notice by the stockholder, in order to be timely, must be received not later than the tenth day following the date on which notice of the date of the special meeting was mailed or public disclosure of the date of the special meeting was made.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Although the by-laws do not give the board of directors the power to approve or disapprove stockholder nominations of candidates or proposals regarding other business to be conducted at a special or annual meeting, the by-laws may have the effect of precluding the conduct of certain business at a meeting if the proper procedures are not followed or may discourage or defer a potential acquiror from conducting a solicitation of proxies to elect its own slate of directors or otherwise attempting to obtain control of the company.

Table of Contents

Authorized but Unissued Shares. Our authorized but unissued shares of common stock and preferred stock are available for future issuance without stockholder approval. These additional shares may be utilized for a variety of corporate purposes, including future public offerings to raise additional capital, corporate acquisitions and employee benefit plans. The existence of authorized but unissued shares of common stock and preferred stock could render more difficult or discourage an attempt to obtain control of a majority of our common stock by means of a proxy contest, tender offer, merger or otherwise.

Anti-takeover Effects of Delaware Law

Upon completion of this offering, we will be governed by the provisions of Section 203 of the Delaware General Corporation Law. Section 203 provides that, subject to exceptions specified therein, an interested stockholder of a Delaware corporation shall not engage in any business combination, including general mergers or consolidations or acquisitions of additional shares of the corporation, with the corporation for a three-year period following the time that such stockholder becomes an interested stockholder unless:

prior to such time, the board of directors of the corporation approved either the business combination or the transaction which resulted in the stockholder becoming an interested stockholder;

upon consummation of the transaction which resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced (excluding specified shares); or

on or subsequent to such time, the business combination is approved by the board of directors of the corporation and authorized at an annual or special meeting of stockholders, and not by written consent, by the affirmative vote of at least 66²/₃% percent of the outstanding voting stock not owned by the interested stockholder.

Under Section 203, the restrictions described above also do not apply to specified business combinations proposed by an interested stockholder following the announcement or notification of one of specified transactions involving the corporation and a person who had not been an interested stockholder during the previous three years or who became an interested stockholder with the approval of a majority of the corporation's directors, if such transaction is approved or not opposed by a majority of the directors who were directors prior to any person becoming an interested stockholder during the previous three years or were recommended for election or elected to succeed such directors by a majority of such directors.

Except as otherwise specified in Section 203, an interested stockholder is defined to include:

any person that is the owner of 15% or more of the outstanding voting stock of the corporation, or is an affiliate or associate of the corporation and was the owner of 15% or more of the outstanding voting stock of the corporation at any time within three years immediately prior to the date of determination; and

the affiliates and associates of any such person.

Under some circumstances, Section 203 makes it more difficult for a person who would be an interested stockholder to effect various business combinations with a corporation for a three-year period. We have not elected to be exempt from the restrictions imposed under Section 203.

Transfer Agent and Registrar

Upon the closing of this offering, the transfer agent and registrar for our common stock will be EquiServe Trust Company, N.A.

Table of Contents

**MATERIAL U.S. FEDERAL TAX CONSIDERATIONS FOR
NON-U.S. HOLDERS OF OUR COMMON STOCK**

The following discussion of certain U.S. federal income and estate tax considerations relevant to Non-U.S. Holders of our common stock is for general information only.

As used in this prospectus, the term **Non-U.S. Holder** is a beneficial owner of our common stock other than:

a citizen or individual resident of the United States;

a corporation or other entity taxable as a corporation under U.S. federal income tax laws created or organized in or under the laws of the United States, of any state of the United States or the District of Columbia;

an estate the income of which is includable in gross income for U.S. federal income tax purposes regardless of its source; or

a trust subject to the primary supervision of a U.S. court and the control of one or more U.S. persons, or a trust that has validly elected to be treated as a domestic trust under applicable Treasury regulations.

If a partnership, including any entity treated as a partnership for U.S. federal income tax purposes, is a holder of our common stock, the tax treatment of a partner in the partnership will generally depend upon the status of the partner and the activities of the partnership. A holder that is a partnership, and partners in such partnership, should consult their own tax advisors regarding the tax consequences of the purchase, ownership and disposition of our common stock.

This discussion does not consider:

U.S. federal income, estate or gift tax consequences other than as expressly set forth below;

any state, local or foreign tax consequences;

the tax consequences to the stockholders, beneficiaries or holders of other beneficial interests in a Non-U.S. Holder;

special tax rules that may apply to selected Non-U.S. Holders, including without limitation, partnerships or other pass-through entities for U.S. federal income tax purposes, banks or other financial institutions, insurance companies, dealers in securities, traders in securities, tax-exempt entities and certain former citizens or residents of the United States;

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

special tax rules that may apply to a Non-U.S. Holder that holds our common stock as part of a straddle, hedge or conversion transaction; or

a Non-U.S. Holder that does not hold our common stock as a capital asset within the meaning of the Code (generally property held for investments).

The following discussion is based on provisions of the Code, applicable Treasury regulations and administrative and judicial interpretations thereof, all as of the date of this prospectus, and all of which are subject to change, retroactively or prospectively. We have not requested a ruling from the U.S. Internal Revenue Service or an opinion of counsel with respect to the U.S. federal income tax consequences of the purchase or ownership of our common stock to a Non-U.S. Holder. There can be no assurance that the U.S. Internal Revenue Service will not take a position contrary to such statements or that any such contrary position taken by the U.S. Internal Revenue Service would not be sustained.

YOU ARE URGED TO CONSULT YOUR TAX ADVISOR WITH RESPECT TO THE APPLICATION OF THE U.S. FEDERAL INCOME TAX LAWS TO YOUR PARTICULAR SITUATION AS WELL AS ANY

Table of Contents

TAX CONSEQUENCES ARISING UNDER THE U.S. FEDERAL ESTATE OR GIFT TAX RULES OR UNDER THE LAWS OF ANY STATE, LOCAL, FOREIGN OR OTHER TAXING JURISDICTION OR UNDER ANY APPLICABLE TAX TREATY.

Dividends

We do not anticipate paying cash dividends on our common stock in the foreseeable future. See Dividend Policy. If distributions are paid on shares of our common stock, such distributions will constitute dividends for U.S. federal income tax purposes to the extent paid from our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. If a distribution exceeds our current and accumulated earnings and profits, it will constitute a return of capital that is applied against and reduces, but not below zero, a Non-U.S. Holder's adjusted tax basis in our common stock. Any remainder will constitute gain on the common stock. See Gain on Disposition of Common Stock. The dividends on our common stock paid to a Non-U.S. Holder generally will be subject to withholding of U.S. federal income tax at a 30% rate on the gross amount of the dividend or such lower rate as may be provided by an applicable income tax treaty.

Dividends that are effectively connected with a Non-U.S. Holder's conduct of a trade or business in the United States or attributable to a permanent establishment or fixed base in the United States under an applicable income tax treaty, known as U.S. trade or business income, are generally not subject to the 30% withholding tax if the Non-U.S. Holder files the appropriate U.S. Internal Revenue Service form with the payor. However, such U.S. trade or business income, net of specified deductions and credits, generally is taxed at the same graduated rates as applicable to U.S. persons. Any U.S. trade or business income received by a Non-U.S. Holder that is a corporation may also, under certain circumstances, be subject to an additional branch profits tax at a 30% rate or such lower rate as specified by an applicable income tax treaty.

A Non-U.S. Holder who claims the benefit of an applicable income tax treaty generally will be required to satisfy applicable certification and other requirements prior to the distribution date. Non-U.S. Holders should consult their tax advisors regarding their entitlement to benefits under a relevant income tax treaty.

A Non-U.S. Holder that is eligible for a reduced rate of U.S. federal withholding tax or other exclusion from withholding under an income tax treaty but that did not timely provide required certifications or other requirements, or that has received a distribution subject to withholding in excess of the amount properly treated as a dividend, may obtain a refund or credit of any excess amounts withheld by timely filing an appropriate claim for refund with the U.S. Internal Revenue Service.

Gain on Disposition of Common Stock

A Non-U.S. Holder generally will not be subject to U.S. federal income tax (or withholding thereof) in respect of gain recognized on a disposition of our common stock unless:

the gain is U.S. trade or business income, in which case such gain generally will be taxed in the same manner as gains of U.S. persons, and such gains may also be subject to the branch profits tax in the case of a corporate Non-U.S. Holder;

the Non-U.S. Holder is an individual who is present in the United States for more than 182 days in the taxable year of the disposition and meets certain other requirements; or

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

we are or have been a U.S. real property holding corporation for U.S. federal income tax purposes at any time during the short of the five-year period ending on the date of disposition or the period that the Non-U.S. Holder held our common stock.

Generally, a corporation is a U.S. real property holding corporation if the fair market value of its U.S. real property interests equals or exceeds 50% of the sum of the fair market value of its worldwide real property

Table of Contents

interests plus its other assets used or held for use in a trade or business. The tax relating to stock in a U.S. real property holding corporation generally will not apply to a Non-U.S. Holder whose holdings, direct and indirect, at all times during the applicable period, constituted 5% or less of our common stock, provided that our common stock was regularly traded on an established securities market. We believe we have never been, are not currently and are not likely to become a U.S. real property holding corporation for U.S. federal income tax purposes in the future.

Federal Estate Tax

Common stock owned or treated as owned by an individual who is a Non-U.S. Holder at the time of death will be included in such individual's gross estate for U.S. federal estate tax purposes, unless an applicable estate tax or other treaty provides otherwise.

Information Reporting and Backup Withholding Tax

We must report annually to the U.S. Internal Revenue Service and to each Non-U.S. Holder the amount of dividends paid to that holder and the tax withheld with respect to those dividends. Copies of the information returns reporting those dividends and the amount of tax withheld may also be made available to the tax authorities in the country in which the Non-U.S. Holder is a resident under the provisions of an applicable income tax treaty.

U.S. federal backup withholding, currently at a 28% rate, generally will not apply to payments of dividends made by us or our paying agents, in their capacities as such, to a Non-U.S. Holder if the holder has provided the required certification that it is not a U.S. person or certain other requirements are met. Notwithstanding the foregoing, backup withholding may apply if either we or our paying agent has actual knowledge, or reason to know, that the holder is a U.S. person that is not an exempt recipient.

Payments of the proceeds from a disposition or a redemption effected outside the United States by or through a non-U.S. broker generally will not be subject to information reporting or backup withholding. However, information reporting, but generally not backup withholding, will apply to such a payment if the broker has certain connections with the United States unless the broker has documentary evidence in its records that the beneficial owner thereof is a Non-U.S. Holder and specified conditions are met or an exemption is otherwise established.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules from a payment to a Non-U.S. Holder that result in an overpayment of taxes generally will be refunded, or credited against the holder's U.S. federal income tax liability, if any, provided that the required information is timely furnished to the U.S. Internal Revenue Service.

Non-U.S. Holders should consult their own tax advisors regarding application of backup withholding in their particular circumstance and the availability of, and procedure for obtaining, an exemption from backup withholding under current U.S. Treasury regulations.

Table of Contents

SHARES ELIGIBLE FOR FUTURE SALE

Prior to this offering, there has been no public market for our common stock. We can make no predictions as to the effect, if any, that sales of shares of common stock or the availability of shares of common stock for sale will have on the market price prevailing from time to time. Nevertheless, sales of significant amounts of our common stock in the public market, or the perception that such sales may occur, could adversely affect prevailing market prices.

Sale of Restricted Shares

Upon completion of this offering, we will have 32.8 million shares of common stock outstanding, assuming no exercise of the underwriters over-allotment option. Of these shares of common stock, the 8.0 million shares of common stock being sold in this offering, plus any shares issued upon exercise of the underwriters' over-allotment option, will be freely tradable without restriction under the Securities Act, except for any such shares which may be held or acquired by an affiliate of ours, as that term is defined in Rule 144 promulgated under the Securities Act, which shares will be subject to the volume limitations and other restrictions of Rule 144 described below. The remaining shares of common stock held by our existing stockholders upon completion of the offering will be restricted securities, as that phrase is defined in Rule 144, and may be resold only after registration under the Securities Act or pursuant to an exemption from such registration, including among others, the exemptions provided by Rule 144, 144(k) or 701 under the Securities Act, which rules are summarized below. Taking into account the lock-up agreements described in Underwriting and the provisions of Rules 144, 144(k) and 701, these remaining 24.8 million shares of common stock held by our existing stockholders upon completion of the offering will be available for sale in the public market 180 days after the date of this prospectus, subject to a potential extension of up to an additional 34 days under certain circumstances for shares subject to the lock-up agreements.

Rule 144

In general, under Rule 144 as currently in effect, beginning 90 days after the date of this prospectus, a person or persons whose shares are aggregated, who has beneficially owned restricted shares for at least one year, including persons who may be deemed to be our affiliates, would be entitled to sell within any three-month period a number of shares that does not exceed the greater of:

1.0% of the number of shares of common stock then outstanding, which will equal approximately _____ shares immediately after this offering; or

the average weekly trading volume of our common stock on the NYSE during the four calendar weeks before a notice of the sale on Form 144 is filed.

Sales under Rule 144 are also subject to certain manner of sale provisions and notice requirements and to the availability of certain public information about us.

Rule 144(k)

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Under Rule 144(k), a person who is not deemed to have been one of our affiliates at any time during the 90 days preceding a sale, and who has beneficially owned the shares proposed to be sold for at least two years, including the holding period of any prior owner other than an affiliate, is entitled to sell these shares without complying with the manner of sale, public information, volume limitation or notice provisions of Rule 144.

Rule 701

Securities issued in reliance on Rule 701 are also restricted and may be sold by stockholders other than affiliates of ours subject only to the manner of sale provisions of Rule 144 and by affiliates under Rule 144 without compliance with its one-year holding period requirement.

Table of Contents

Lock-up Agreements

We will enter into, and our directors and executive officers, Olympus Partners, most of our existing stockholders and most of our option holders have entered into or have agreed to enter into, lock-up agreements with the underwriters. Under these agreements, subject to exceptions, we may not issue any new shares of common stock, and those holders of stock and options may not, directly or indirectly, offer, sell, contract to sell, pledge or otherwise dispose of or hedge any common securities convertible into or exchangeable for shares of common stock, or publicly announce the intention to do any of the foregoing, without the prior written consent of Banc of America Securities LLC and Credit Suisse First Boston LLC for a period of 180 days from the date of this prospectus. This consent may be given at any time without public notice. In addition, during this 180 day period, we will also agree not to file any registration statement for, and each of the persons who have executed lock-up agreements as described above has agreed not to make any demand for, or exercise any right of, the registration of any shares of common stock or any securities convertible into or exercisable or exchangeable for common stock without the prior written consent of Banc of America Securities LLC and Credit Suisse First Boston LLC.

Registration Rights

As described above in Description of Capital Stock Registration Rights, following the completion of this offering, subject to the 180 day lock-up period described above, parties to our stockholder agreement holding more than 50% of the shares subject to that agreement will be entitled, subject to certain exceptions, to demand the filing of and include their shares in registration statements relating to our securities. If this right is exercised, holders of up to 24.8 million shares will be entitled to participate in such a registration. By exercising their registration rights and causing a large number of shares to be registered and sold in the public market, these holders could cause the price of the common stock to fall. In addition, any demand to include such shares in our registration statements could have a material adverse effect on our ability to raise needed capital.

Options and Warrants

In addition to the 32.8 million shares of common stock outstanding immediately after this offering, as of October 2, 2004, there were outstanding employee stock options to purchase 830,955 shares of our common stock and outstanding warrants to purchase 585,377 shares of our common stock and 3,530 shares of our preferred stock, of which warrants to purchase 452 shares of preferred stock will be repurchased and the remaining warrants to purchase 3,078 shares of preferred stock will be converted into warrants to purchase 286,818 shares of our common stock upon completion of this offering.

As soon as practicable after the completion of this offering, we intend to file a registration statement on Form S-8 under the Securities Act covering shares of our common stock reserved for issuance under our 2002, 2003 and 2004 stock option and stock purchase plans. Accordingly, 3,132,815 shares of our common stock registered under such registration statement will be available for sale in the open market upon exercise by the holders, subject to vesting rules with us, Rule 144 limitations applicable to our affiliates and the lock-up agreements described above.

Table of Contents**UNDERWRITING**

Symmetry Medical Inc. is offering the shares of common stock described in this prospectus through a number of underwriters. Banc of America Securities LLC, Credit Suisse First Boston LLC, Piper Jaffray & Co. and Wachovia Capital Markets, LLC are the representatives of the underwriters. We have entered into a firm commitment underwriting agreement with the representatives. Subject to the terms and conditions of the underwriting agreement, we have agreed to sell to the underwriters, and each underwriter has agreed to purchase, the number of shares of common stock listed next to its name in the following table:

Underwriters	Number of Shares
Banc of America Securities LLC	
Credit Suisse First Boston LLC	
Piper Jaffray & Co.	
Wachovia Capital Markets, LLC	
Total	8,000,000

The underwriting agreement is subject to a number of terms and conditions and provides that the underwriters must buy all of the shares if they buy any of them. The underwriters will sell the shares to the public when and if the underwriters buy the shares from us.

The underwriters initially will offer the shares to the public at the price specified on the cover page of this prospectus. The underwriters may allow a concession of not more than \$ _____ per share to selected dealers. The underwriters may also allow, and those dealers may re-allow, a concession of not more than \$ _____ per share to some other dealers. If all the shares are not sold at the public offering price, the underwriters may change the public offering price and the other selling terms. The common stock is offered subject to a number of conditions, including:

receipt and acceptance of the common stock by the underwriters; and

the underwriters' right to reject orders in whole or in part.

Over-Allotment Option. We have granted the underwriters an over-allotment option to buy up to additional 1,200,000 shares of our common stock at the same price per share as they are paying for the shares shown in the table above. These additional shares would cover sales of shares by the underwriters that exceed the total number of shares shown in the table above. The underwriters may exercise this option at any time within 30 days after the date of this prospectus. To the extent that the underwriters exercise this option, each underwriter will purchase additional shares from us in approximately the same proportion as it purchased the shares shown in the table above. If purchased, the additional shares will be sold by the underwriters on the same terms as those on which the other shares are sold. We will pay the expenses associated with the exercise of this option.

Discount and Commissions. The following table shows the per share and total underwriting discounts and commissions to be paid to the underwriters by us. These amounts are shown assuming no exercise and full exercise of the underwriters' option to purchase additional shares.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

We estimate that the expenses of the offering to be paid by us, not including underwriting discounts and commissions, will be approximately \$6.5 million.

	Paid by Us	
	No Exercise	Full Exercise
	<u> </u>	<u> </u>
Per Share	\$	\$
Total	\$	\$
	<u> </u>	<u> </u>

Table of Contents

We will pay Olympus Advisory Partners, Inc., an affiliate of Olympus/Symmetry Holdings, LLC, \$2.0 million as compensation of financial services rendered by Olympus Advisory Partners, Inc. to us in connection with the offering. The NASD Inc. has deemed this payment to constitute underwriters' compensation in connection with this offering.

Listing. Our common stock has been approved for listing, subject to official notice of issuance, on the New York Stock Exchange under the symbol SMA. In order to meet one of the requirements for listing our common stock on the New York Stock Exchange, the underwriters will undertake to sell 100 or more shares of our common stock to a minimum of 2,000 beneficial holders.

Stabilization. In connection with this offering, the underwriters may engage in activities that stabilize, maintain or otherwise affect the price of our common stock, including:

stabilizing transactions;

short sales;

syndicate covering transactions;

imposition of penalty bids; and

purchases to cover positions created by short sales.

Stabilizing transactions consist of bids or purchases made for the purpose of preventing or retarding a decline in the market price of our common stock while this offering is in progress. Stabilizing transactions may include making short sales of common stock, which involves the sale by the underwriters of a greater number of shares of common stock than they are required to purchase in this offering, and purchasing shares of common stock from us or on the open market to cover positions created by short sales. Short sales may be covered shorts, which are short positions in an amount not greater than the underwriters' over-allotment option referred to above, or may be naked shorts, which are short positions in excess of that amount. Syndicate covering transactions involve purchases of our common stock in the open market after the distribution has been completed in order to cover syndicate short positions.

The underwriters may close out any covered short position either by exercising their over-allotment option, in whole or in part, or by purchasing shares in the open market. In making this determination, the underwriters will consider, among other things, the price of shares available for purchase in the open market compared to the price at which the underwriters may purchase shares through the over-allotment option.

A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the common stock in the open market that could adversely affect investors who purchased in this offering. To the extent that the underwriters create a naked short position, they will purchase shares in the open market to cover the position.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

The representatives also may impose a penalty bid on underwriters and dealers participating in the offering. This means that the representatives may reclaim from any syndicate members or other dealers participating in the offering the underwriting discount, commissions or selling concession on shares sold by them and purchased by the representatives in stabilizing or short covering transactions.

These activities may have the effect of raising or maintaining the market price of our common stock or preventing or retarding a decline in the market price of our common stock. As a result of these activities, the price of our common stock may be higher than the price that otherwise might exist in the open market. If the underwriters commence the activities, they may discontinue them at any time. The underwriters may carry out these transactions on the New York Stock Exchange, in the over-the-counter market or otherwise.

Table of Contents

Discretionary Accounts. The underwriters have informed us that they do not expect to make sales to accounts over which they exercise discretionary authority in excess of 5% of the shares of common stock being offered.

IPO Pricing. Prior to this offering, there has been no public market for our common stock. The initial public offering price will be negotiated between us and the representatives of the underwriters. Among the factors to be considered in these negotiations are:

the history of, and prospects for, our company and the industry in which we compete;

our past and present financial performance;

an assessment of our management;

the present state of our development;

the prospects for our future earnings;

the prevailing conditions of the applicable United States securities market at the time of this offering;

market valuations of publicly traded companies that we and the representatives of the underwriters believe to be comparable to us; and

other factors deemed relevant.

The estimated initial public offering price range set forth on the cover of this preliminary prospectus is subject to change as a result of market conditions and other factors.

Lock-up Agreements. We, our directors and executive officers, Olympus Partners, most of our existing stockholders and most of our option holders have entered into or have agreed to enter into lock-up agreements with the underwriters. Under these agreements, subject to exceptions, we may not issue any new shares of common stock, and those holders of stock and options may not, directly or indirectly, offer, sell, contract to sell, pledge or otherwise dispose of or hedge any common securities convertible into or exchangeable for shares of common stock, or publicly announce the intention to do any of the foregoing, without the prior written consent of Banc of America Securities LLC and Credit Suisse First Boston LLC for a period of 180 days from the date of this prospectus related to this offering. This consent may be given at any time without public notice. In addition, during this 180 day period, we have also agreed not to file any registration statement for, and each of the persons who have executed lock-up agreements as described above has agreed not to make any demand for, or exercise any right of, the registration of, any shares of common stock or any securities convertible into or exercisable or exchangeable for common stock without the prior written consent of Banc of America Securities LLC and Credit Suisse First Boston LLC.

Indemnification. We will indemnify the underwriters against some liabilities, including liabilities under the Securities Act. If we are unable to provide this indemnification, we will contribute to payments the underwriters may be required to make in respect of those liabilities.

Electronic Version of Preliminary Prospectus. A preliminary prospectus in electronic format may be made available on the web sites maintained by one or more of the underwriters participating in this offering. A final prospectus in electronic format may be distributed electronically by Credit Suisse First Boston or made available on a web site maintained by Credit Suisse First Boston. Other than the preliminary and final prospectus in electronic format, the information on any such web site, or accessible through any such web site, is not a part of the preliminary or final prospectus, as applicable.

Conflicts/Affiliates. The underwriters and their affiliates have provided, and may in the future provide, various investment banking, commercial banking and other financial services for us and our affiliates for which services they have received, and may in the future receive, customary fees. An affiliate of one of the

Table of Contents

underwriters, Wachovia Bank, National Association, is a lender under our senior credit facility and as such is owed approximately \$10 million of the aggregate outstanding amount under the terms of that agreement. Wachovia Bank, National Association will also be a lender and act as administrative agent under our new senior credit facility.

Selling Restrictions. The underwriters have acknowledged and agreed that the shares have not been and will not be registered under the Securities and Exchange Law of Japan and are not being offered or sold and may not be offered or sold, directly or indirectly, in Japan or to or for the account of any resident of Japan, except that the underwriters may offer and sell such shares (i) pursuant to an exemption from the registration requirements of the Securities and Exchange Law of Japan and (ii) in compliance with any other applicable requirements of Japanese law. As used in this paragraph, resident of Japan means any person residing in Japan including any corporation or other entity organized under the laws of Japan.

Each of the underwriters severally represents and agrees that:

it has not offered or sold and prior to the expiry of a period of six months from the closing date, will not offer or sell any shares to persons in the United Kingdom except to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of their businesses or otherwise in circumstances which have not resulted and will not result in an offer to the public in the United Kingdom within the meaning of the Public Offers of Securities Regulations 1995;

it has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000 (the FSMA)) received by it in connection with the issue or sale of any shares in circumstances in which section 21(1) of the FSMA does not apply to Symmetry; and

it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the shares in, from or otherwise involving the United Kingdom.

This prospectus is not being distributed pursuant to a public offer in France within the meaning of Article L. 411-1 of the French Monetary and Financial Code (*Code monétaire et financier*), and as a result this prospectus has not been and will not be submitted to the *Autorité des Marchés Financiers* for approval in France. The shares offered have not been offered or sold, and will not be offered or sold, directly or indirectly, to the public in France, and this prospectus and any other offering related material has not been distributed and will not be distributed to the public in France. Any offers, sales and distributions have only been and will only be made in France to qualified investors (*investisseurs qualifiés*) and/or to a restricted group of investors (*cercle restreint d'investisseurs eurs*), in each case, acting for their own account, all as defined in, and in accordance with, Articles L. 411-1 and L.411-2 of the French Monetary and Financial Code and Decree no. 98-880 dated October 1, 1998. This prospectus is not to be further distributed or reproduced (in whole or in part) in France by the recipients hereof and this prospectus will be distributed on the understanding that any recipients will only participate in the issue or sale of the shares for their own account and undertake not to transfer, directly or indirectly, the shares to the public in France, other than in compliance with all applicable laws and regulations and in particular with Articles L. 411-1 and L. 411-2 of the French Monetary and Financial Code.

LEGAL MATTERS

The validity of the common stock offered hereby will be passed upon for Symmetry Medical Inc. by Kirkland & Ellis LLP (a partnership that includes professional corporations), Chicago, Illinois. Certain partners of Kirkland & Ellis LLP are partners in a partnership that has an investment in an affiliate of Olympus Growth Fund III, L.P., and certain partners of Kirkland & Ellis LLP are partners in a partnership that has an investment in limited liability company units of Olympus/Symmetry Holdings LLC, which is an investor in Symmetry. Kirkland & Ellis LLP has provided legal services to us and to Olympus Partners and its affiliates from time to time and may continue to do so in the future. Certain legal matters in connection with this offering will be passed upon for the underwriters by Shearman & Sterling LLP, New York, New York.

EXPERTS

Ernst & Young LLP, independent registered public accounting firm, have audited our consolidated financial statements at January 3, 2004 and December 28, 2002, and for each of the two years in the period ended January 3, 2004, as set forth in their report. We've included our financial statements in the prospectus and elsewhere in the registration statement in reliance on Ernst & Young LLP's report, given on their authority as experts in accounting and auditing.

The consolidated and combined financial statements of Mettis (UK) Limited as of March 31, 2003 and March 31, 2002 and for each of the three years in the period ended March 31, 2003 included in this Prospectus have been so included in reliance on the report (which contains an explanatory paragraph relating to the Company's ability to continue as a going concern as described in Note 1 to the Financial Statements) of PricewaterhouseCoopers LLP, independent accountants, given on the authority of said firm as experts in auditing and accounting.

The consolidated financial statements of Symmetry Medical Inc. as of December 29, 2001 and for the fiscal year ended December 29, 2001 included in this prospectus have been audited by Arthur Andersen LLP. Arthur Andersen LLP has not reissued its report with respect to those consolidated financial statements and we have not been able to obtain, after reasonable efforts, Arthur Andersen LLP's written consent to the inclusion in this prospectus of said report. As a result, you may not have an effective remedy against Arthur Andersen LLP in connection with any material misstatement or omission in the consolidated financial statements to which its audit report relates. In addition, even if you were able to assert such a claim, as a result of its recent conviction of federal obstruction of justice charges and other lawsuits, Arthur Andersen LLP may fail or otherwise have insufficient assets to satisfy claims made by investors that might arise under federal securities laws or otherwise with respect to its audit report.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the SEC a registration statement on Form S-1 under the Securities Act with respect to the shares to be sold in this offering. This prospectus does not contain all of the information set forth in the registration statement, certain parts of which are omitted in accordance with the rules and regulations of the SEC. For further information about us and the shares to be sold in this offering, please refer to the registration statement. Statements contained in this prospectus as to the contents of any contract, agreement or other document referred to, are not necessarily complete, and in each instance please refer to the copy of the contract, agreement or other document filed as an exhibit to the registration statement, each statement being qualified in all respects by this reference.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

You may read and copy all or any portion of the registration statement or any reports, statements or other information we file with the SEC at the public reference facility maintained by the SEC at Room 1024, Judiciary

Table of Contents

The following report is a copy of a report previously issued by Arthur Andersen LLP (Andersen), which report has not been reissued by Andersen. Certain financial information for the fiscal year in the period ended December 29, 2001 was not reviewed by Andersen and includes:

(i) reclassifications to conform to our fiscal 2003 financial statement presentation and

(ii) additional disclosure to conform with new accounting pronouncements and SEC rules and regulations issued during such fiscal year.

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

To the Board of Directors

Symmetry Medical Inc.:

We have audited the accompanying consolidated balance sheet of SYMMETRY MEDICAL INC. as of December 29, 2001, and the related consolidated statements of income, shareholders' investment and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of Symmetry Medical Inc. as of December 30, 2000 were audited by other auditors whose report dated February 2, 2001, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Symmetry Medical Inc. as of December 29, 2001, and the consolidated results of their operations and their cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States.

As explained in Note 1 to the financial statements, effective December 31, 2000, the Company changed its method of accounting for derivative instruments.

Report of Independent Registered Public Accounting Firm

To the Board of Directors

Symmetry Medical Inc.

We have audited the accompanying consolidated balance sheets of Symmetry Medical Inc. as of January 3, 2004 and December 28, 2002, and the related consolidated statements of operations, shareholders' equity (deficit) and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. The consolidated financial statements of Symmetry Medical Inc. for the year ended December 29, 2001, were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements in their report dated May 15, 2002.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Symmetry Medical Inc. as of January 3, 2004 and December 28, 2002, and the consolidated results of its operations and its cash flows for the years then ended, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 2 to the consolidated financial statements, effective January 1, 2002, the Company adopted Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets.

Symmetry Medical Inc.

Notes to Consolidated Financial Statements

(In Thousands, Except Share Data)

Notes to the Consolidated Financial Statements for the years ended January 3, 2004, December 28, 2002 and December 29, 2001 and the unaudited three and nine months ended October 2, 2004 and October 4, 2003

1. Description of the Business

The consolidated financial statements include the accounts of Symmetry Medical Inc. and its wholly-owned subsidiaries (collectively referred to as the Company), Symmetry Medical USA Inc., Jet Engineering, Inc. (Jet), Ultrexx, Inc. (Ultrexx), Othy Limited, Poly-Vac S.A. and Mettis UK Limited, including its wholly-owned subsidiary, Thornton Precision Components Limited (TPC).

The Company is a global supplier of integrated products and services consisting of surgical implants, instruments and cases to orthopedic and other medical device companies.

During 2003, the Company acquired Mettis (UK) Limited, including Jet, Ultrexx and TPC from the Mettis Companies (the Mettis Acquisition). Refer to note 3 for further discussion.

The October 2, 2004 and October 4, 2003 condensed consolidated financial statements of Symmetry Medical Inc. have been prepared without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the accompanying condensed consolidated financial statements contain all material adjustments (consisting only of normal recurring adjustments), necessary to present fairly the consolidated financial position of the Company, its results of operations and cash flows.

2. Summary of Significant Accounting Policies

Principles of Consolidation

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. Significant intercompany accounts and transactions have been eliminated in consolidation. Certain prior period amounts have been reclassified to conform to the current year presentation. Such reclassifications had no impact on net income previously reported.

Year End

The Company's year end is the 52 or 53 week period ending the Saturday closest to December 31, resulting in fiscal 2003 (ending January 3, 2004) being 53 weeks, fiscal 2002 (ending December 28, 2002) and fiscal 2001 (ending December 29, 2001) being 52 weeks. References in these consolidated financial statements to 2003, 2002 and 2001 refer to these fiscal years, respectively.

Use of Estimates

Preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates, but management does not believe such differences will materially affect the Company's financial position or results of operations.

Table of Contents**Symmetry Medical Inc.****Notes to Consolidated Financial Statements (continued)***(In Thousands, Except Share Data)***Cash and Cash Equivalents**

Cash and cash equivalents include all highly liquid investments with a maturity of three months or less at the time of purchase.

Inventories

Inventories are stated at the lower of cost, determined on the first-in, first-out (FIFO) method, or market. Costs include material, labor and manufacturing overhead costs. Inventory balances are reviewed monthly for excess products or obsolete inventory levels and written down, if necessary, the inventory to net realizable value.

Inventories consist of the following:

	December 28, 2002	January 3, 2004	October 2, 2004
	<u> </u>	<u> </u>	<u> </u>
Raw material and supplies	\$ 1,503	\$ 3,678	\$ 5,965

Property and Equipment

Property and equipment are stated on the basis of cost. Depreciation is calculated on the straight-line method over the estimated useful lives of the respective assets or lease terms. Repair and maintenance costs are charged to expense as incurred.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

Property and equipment, including depreciable lives, consists of the following:

	December 28, 2002	January 3, 2004	October 2, 2004
	<u> </u>	<u> </u>	<u> </u>
Land	\$ 341	\$ 1,284	\$ 1,286
Buildings and improvements (20 to 40 years)	9,705	14,865	15,270
Machinery and equipment (5 to 15 years)	21,647	56,964	65,402
Office equipment (3 to 5 years)	2,214	3,954	4,508
Construction-in-progress	352	1,337	9,184
	<u> </u>	<u> </u>	<u> </u>
	34,259	78,404	95,650

Table of Contents**Symmetry Medical Inc.****Notes to Consolidated Financial Statements (continued)***(In Thousands, Except Share Data)***Goodwill**

The changes in the carrying amounts of goodwill for the years ended January 3, 2004, December 28, 2002 and December 29, 2001 are as follows:

Balance as of December 29, 2001	\$ 24,305
Effects of foreign currency	(19)
Goodwill impaired	(1,146)
	<hr/>
Balance as of December 28, 2002	23,140
Goodwill acquired	100,009
Effects of foreign currency	2,264
	<hr/>
Balance as of January 3, 2004	\$ 125,413
	<hr/>

In accordance with Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets, goodwill is no longer amortized but is subject to an annual impairment test in accordance with this statement. Goodwill is defined by the Company as the excess of purchase cost over the fair value of the net tangible and identifiable intangible assets acquired. Statement No. 142 requires the Company to test goodwill for impairment using a two-step process. The first step is a screen for potential impairment, while the second step measures the amount of impairment. Potential impairment is determined by comparing estimated fair value to the net book value of the reporting unit. Fair value is calculated as the present value of estimated future cash flows using a risk-adjusted discount rate commensurate with the Company's weighted-average cost of capital. The Company has multiple operating segments as defined by SFAS 131. The Company has defined its reporting units at the operating segment level as this is the lowest level for which discrete financial information is available and the operating results of that component are regularly reviewed by management. The Company completed its annual impairment test as of October 1, 2003 and 2002 and concluded that no impairment of goodwill existed. During 2002, in connection with the adoption of SFAS 142, the Company completed the two-step impairment process. As a result, the Company recognized impairment of \$1,146 as a component of the cumulative effect of an accounting change.

The following table presents, on a pro forma basis, earnings and earnings per share as if SFAS No. 142 had been in effect for all years presented.

Years Ended

Table of Contents

Symmetry Medical Inc.

Notes to Consolidated Financial Statements (continued)

(In Thousands, Except Share Data)

Other Intangible Assets

Intangible assets subject to amortization consist of technology and customer related intangible assets acquired in connection with the Mettis Acquisition. These assets (\$13,912 at January 3, 2004 and \$0 at December 28, 2002) are being amortized using the straight-line method over 9 to 25 years. The accumulated amortization related to these assets is \$326 at January 3, 2004. Amortization expense for the next 5 fiscal years approximates \$607 per year. Each reporting period, the Company reassesses the expected useful lives of existing intangible assets and adjusts the lives if appropriate. The Company also evaluates the recoverability of intangible assets subject to amortization based on undiscounted operating cash flows when factors indicate impairment may exist. In the event of impairment, the Company makes appropriate write-downs of recorded costs to fair value.

In accordance with Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets, intangible assets with an indefinite life are no longer amortized but are subject to review each reporting period to determine whether events and circumstances continue to support and indefinite useful life as well as an annual impairment test in accordance with this statement. The Company has \$3,765 of indefinite lived intangible assets at January 3, 2004 and \$0 at December 28, 2002.

The Company reviewed its intangible assets in accordance with SFAS No. 142 and has not recorded any impairments related to these assets.

Foreign Currency Accounting

The financial statements of the Company's foreign subsidiaries are accounting for and have been translated into U.S. dollars in accordance with Financial Accounting Standards Board (FASB) Statement No. 52, Foreign Currency Translation. Foreign currency transaction gains and losses resulting from a subsidiary's foreign currency denominated assets and liabilities included in other income were a \$267 gain and \$227 gain for the nine months ended October 2, 2004 and October 4, 2003, respectively and a \$384 gain, \$46 gain and \$12 loss in 2003, 2002 and 2001, respectively. Assets and liabilities have been translated using the exchange rate in effect at the balance sheet date. Revenues and expenses have been translated using a weighted-average exchange rate for the period. Currency translation adjustments have been recorded as a separate component of shareholders' equity.

Revenue Recognition

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

The Company recognizes revenue on orders received from its customers when there is persuasive evidence of an arrangement with the customer that is supportive of revenue recognition, the customer has made a fixed commitment to purchase the product for a fixed or determinable revenues price, collection is reasonably assured under the Company's normal billing and credit terms, all of the Company's obligations related to the product have been fulfilled and ownership and all risks of loss have been transferred to the buyer, which is normally upon shipment.

Shipping and Handling Costs

In accordance with EITF 00-10: Accounting for Shipping and Handling Fees and Costs, the Company reflects freight costs associated with shipping its products to customers as a component of cost of revenues.

Advertising Costs

Advertising costs are expensed as incurred. Advertising costs were \$208, \$191 and \$76 for the years ending January 3, 2004, December 28, 2002 and December 29, 2001, respectively.

Table of Contents**Symmetry Medical Inc.****Notes to Consolidated Financial Statements (continued)***(In Thousands, Except Share Data)***Allowance for Doubtful Accounts**

The Company performs periodic credit evaluations of customers' financial condition and generally does not require collateral. Receivables are generally due within 30 to 60 days. The Company maintains an allowance for doubtful accounts for estimated losses in the collection of accounts receivable. The Company makes estimates regarding the future ability of its customers to make required payments based on historical credit experience and expected future trends. The activity in the allowance for doubtful accounts was as follows:

	December 29, 2001	December 28, 2002	January 3, 2004
Beginning Balance	\$ 47	\$ 37	\$ 109
Provision	13	88	244
Acquired allowance			324
Write-offs, net	(23)	(16)	(31)
Ending Balance	\$ 37	\$ 109	\$ 646

New Accounting Pronouncements

In January 2003, the FASB issued Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities and was effective for the Company beginning in the year ending January 1, 2005. FIN 46 defines a variable interest entity (VIE) as a corporation, partnership, trust or any other legal structure that does not have equity investors with a controlling financial interest or has equity investors that do not provide sufficient financial resources for the entity to support its activities. The adoption of FIN 46 did not have a material impact on the Company's financial position or results of operations.

In April 2003, the FASB issued SFAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities and was effective for the Company in fiscal year 2003. This statement amends and clarifies financial accounting and reporting for derivative instruments and hedging activities under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, by requiring contracts with similar characteristics to be accounted for comparably. The adoption of SFAS No. 149 did not have a material effect on the Company's financial position or results of operations.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

In May 2003, the FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity. This statement changes the accounting for certain financial instruments that, under previous guidance, could be accounted for as equity. SFAS No. 150 may require that those instruments be classified as liabilities. SFAS No. 150 was effective for financial instruments entered into or modified after May 31, 2003, and otherwise was effective after June 15, 2003. The adoption of SFAS No. 150 did not have an impact on the Company's financial position or results of operation.

In June of 2002, the FASB issued Statement of Financial Accounting Standards No. 146, Accounting for Costs Associated with Exit or Disposal Activities (SFAS No. 146). SFAS No. 146 nullifies Emerging Issues Task Force (EITF) Issue No, 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). SFAS No. 146 generally requires companies to recognize costs associated with exit activities when they are incurred rather than at the date of a commitment to an exit or disposal plan and is to be applied prospectively to exit or disposal activities initiated after December 31, 2002. The adoption of SFAS No. 146 did not have a material impact on the Company's financial position or results of operations.

F-12

Table of Contents

Symmetry Medical Inc.

Notes to Consolidated Financial Statements (continued)

(In Thousands, Except Share Data)

In April 2002, the FASB issued SFAS No. 145, Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections. This statement eliminates the automatic classification of gain or loss on extinguishment of debt as an extraordinary item of income and requires that such gain or loss be evaluated for extraordinary classification under the criteria of Accounting Principles Board No. 30, Reporting Results of Operations. This statement also requires sales-leaseback accounting for certain transactions, and makes various other technical corrections to existing pronouncements. The statement is effective for financial statements issued on or after May 15, 2002. The adoption of this statement on January 1, 2003 resulted in classifying the loss from early extinguishment of debt in connection with the acquisition of Mettis (UK) Limited as a separate component of net income before provision for income taxes.

Derivative Financial Instruments

SFAS No. 133, as amended, requires recognition of every derivative instrument in the balance sheet as either an asset or liability measured at its fair value. Changes in the fair value of derivatives are to be recorded each period in earnings or comprehensive income, depending on whether the derivative is designated and effective as part of a hedge accounting transaction. The Company's derivatives discussed below do not qualify for hedge accounting and accordingly, adjustments to fair value are recorded in earnings.

The Company enters into interest rate swap agreements (SWAP) to offset against changes in interest rates on the Company's variable rate long-term debt. The SWAP agreements are contracts to exchange variable rate obligations for fixed interest payments to be made periodically over the life of the SWAP agreement. Effective October 2000, the Company entered into a SWAP agreement to economically hedge \$19,000 of outstanding long-term debt which fixed the variable portion of the payment obligation at 6.25% per annum for the five-year period commencing October 24, 2000.

Effective July 2003, the Company entered into a second SWAP agreement to economically hedge an additional \$71,000 of outstanding long-term debt which fixed the variable portion of the payment obligation at 2.285% per annum for the period commencing on July 21, 2003 and ending on June 30, 2006.

As of December 28, 2002, the Company had a derivative liability of \$2,323, which is included in non-current liabilities in the consolidated balance sheets. The full portion of net loss on valuation liability in 2002 of \$979 was included in earnings.

As of January 3, 2004, the Company had a derivative liability of \$965, which is included in non-current liabilities in the consolidated balance sheets. The full portion of the net gain on valuation liability in 2003 of \$1,358 was included in earnings.

As of October 2, 2004, the Company had a derivative liability of \$156, which is included in non-current liabilities in the consolidated balance sheets. The full portion of the net gain on valuation liability for the nine months ended October 2, 2004 of \$809 was included in earnings.

Stock-Based Compensation

The Company has elected to follow APB No. 25, Accounting for Stock Issued to Employees, in accounting for its stock options and; accordingly, no compensation cost has been recognized for stock options in the consolidated financial statements. However, SFAS 123, Accounting for Stock-Based Compensation, as amended by SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure, requires pro-forma presentation as if compensation costs had been expensed under the fair value method of SFAS No. 123. For

Table of Contents**Symmetry Medical Inc.****Notes to Consolidated Financial Statements (continued)***(In Thousands, Except Share Data)*

purposes of pro forma disclosure, the estimated fair value of the options at the date of grant is amortized to expense over the vesting period. The following table illustrates the effect on net income as if compensation expense had been recognized as follows:

	Fiscal Year			Nine months ended	
	December 29, 2001	December 28, 2002	January 3, 2004	October 4, 2003	October 2, 2004

3. Mettis Acquisition

On June 11, 2003, the Company acquired 100% of the ownership interests of Mettis UK Limited which included Jet, Ultrex and TPC in exchange for aggregate consideration of \$163,942 consisting of approximately \$146,000 of cash, \$15,000 of stock and acquisition costs, net of liabilities assumed. The acquisition provides the Company with a new product line, orthopedic implants which are forged as well as additional

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

production capacity for instruments. The purchase price of the Mettis acquisition exceeded the fair value of identifiable tangible and intangible assets which reflects the synergistic and strategic fit of this acquisition into the Company's business. Results of the Mettis acquisition are included in the statement of operations from the acquisition date.

The aggregate purchase price of \$163,942 was allocated to the opening balance sheet as follows:

Current assets	\$ 33,970
PP&E	30,789
Acquired technology (amortized over 9 years)	445
Acquired customers (amortized over 25 years)	13,672
Acquired manufacturing processes (indefinite-lived)	3,626
Goodwill	100,009
Current liabilities	(11,025)
Non-current liabilities	(7,544)
	<hr/>
Purchase price, net	\$ 163,942
	<hr/>

Earnings (loss) per share diluted	(0.67)	(0.10)	(0.03)

4. Debt Arrangements

Long-term debt consists of the following:

	<u>December 28, 2002</u>	<u>January 3, 2004</u>
Bank Term Loan payable in quarterly installments, plus interest at a variable rate (5.6875% at January 3, 2004), through March 31, 2009 at which time the remaining principal is due.	\$	\$ 95,800
12% Senior Subordinated Notes due 2011, with quarterly interest payments.		36,000
Discount on subordinated notes		(5,111)
Revolving line of credit, paid off in 2003	13,682	
Term loan, paid off in 2003	32,300	
Subordinated debenture, paid off in 2003	1,039	
Installment Loan	10	7
	<u>47,031</u>	<u>126,696</u>
Less current portion	(4,278)	(5,377)

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

	<u>\$ 42,753</u>	<u>\$ 121,319</u>
--	------------------	-------------------

During 2003, the Company refinanced substantially all of its debt arrangements as part of financing the Mettis Acquisition resulting in a loss on debt extinguishment of \$1,436.

The Company's Bank Revolving Line of Credit has a total capacity of up to \$15 million and the Company pays a .50% annual commitment fee for the average unused portion of the revolving line of credit facility. There are no borrowings under this line of credit at January 3, 2004.

The Company is required to prepay the principal indebtedness of the Bank Term Loan in an amount equal to 75% of excess cash flow, as defined in the agreement, for the then most recently ended fiscal year. Any such payments are due ninety days after year end and first reduce scheduled maturities for the immediate following year and then in the inverse order of maturity. The Company was not required to make an excess cash flow prepayment for 2003 or 2002. Substantially all of the assets of the Company collateralize the term loan and the revolving line of credit.

F-15

Table of Contents**Symmetry Medical Inc.****Notes to Consolidated Financial Statements (continued)***(In Thousands, Except Share Data)*

These agreements require the Company to meet various debt covenants including a total leverage ratio, senior leverage ratio, minimum consolidated EBITDA levels, interest coverage ratio, fixed charge ratio and maximum capital expenditure limitations. The Company was in compliance with all debt covenants as of January 3, 2004.

On June 11, 2003, the Company issued \$36,000 of 12% senior unsecured subordinated notes due 2011. A portion of these notes are held by related parties. These notes have financial covenants less restrictive than the Bank Term Loan and Line of Credit. Additionally, these notes were issued with detachable warrants exercisable for an aggregate of 585,377 shares of common stock, par value \$0.01 per share and 3,530 shares of Class A Preferred Stock par value \$0.01 per share at any time prior to June 2013 at an exercise price of \$0.01 per share. In accordance with Accounting Principles Board Opinion 14 (APB 14), Accounting for Convertible Debt and Debt Issued with Stock Purchase Warrants, the Company has recorded a discount equal to the fair value of the warrants of \$5,311. This discount, which is reflected as a reduction to long-term debt on the consolidated balance sheet, is being amortized to interest expense using the effective interest method.

Maturities of long-term debt for the five years succeeding January 3, 2004 are as follows:

2004	\$ 5,377
2005	7,254
2006	9,150
2007	11,050
2008 and thereafter	98,976
	<hr/>
	\$ 131,807
	<hr/>

5. Preferred Stock

The Class A convertible preferred stock has a liquidation value of \$1,000 per share, is nonvoting, and accrues cumulative dividends at 8% per annum on the sum of the liquidation value plus all accumulated and unpaid dividends. Holders of the Class A convertible preferred stock have liquidation preference rights, including the right in the event of an initial public offering of the Company's common stock to convert Class A convertible preferred stock into common stock, at a conversion price equal to 85% of the per share price paid by the public for the common stock in the initial public offering. In June, 2003, the Company sold 59,486 shares of Class A convertible preferred stock for \$1,000 per share. Of these shares, 44,499 were sold to related parties including Olympus Partners and employees of the Company.

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

In connection with a debt amendment, on February 22, 2002 the Company issued 3,000 shares of Class B Redeemable Convertible Preferred Stock (Class B Preferred Stock) for \$1,000 per share. The Class B Preferred Stock was senior to all other outstanding equity securities issued by the Company and did not have voting rights. The Class B shareholders were entitled to a dividend of 18% per annum which is cumulative. All shares of the Class B Preferred Stock were converted into 2,652 shares of the Company's Class A Preferred Stock and 383,773 shares of Common Stock during 2003.

6. Leases

The Company has a capital lease arrangement through October 1, 2016 for its New Hampshire plant facility. On October 1, 2001, and every five years thereafter, including extensions, the annual base rent will change based on the Consumer Price Index. The Company has an option to extend the lease for an additional five-year period and has a right of first opportunity to purchase the leased property. Additionally, the Company has entered into capital leases for various machinery and equipment.

F-16

Table of Contents

Symmetry Medical Inc.

Other	(506)	622
	<u>2,604</u>	<u>(4,140)</u>
Valuation allowance	(716)	(620)
	<u>\$ 1,888</u>	<u>\$ (4,760)</u>

Significant components of the income tax provision are as follows:

	December 29, 2001	December 28, 2002	January 3, 2004
Current:			
Federal	\$ 1,460	\$ 758	\$ 205
State	229	161	60
Foreign	11	74	931
	<u>1,700</u>	<u>993</u>	<u>1,196</u>
Deferred	(300)	(152)	1,813
	<u>\$ 1,400</u>	<u>\$ 841</u>	<u>\$ 3,009</u>

Edgar Filing: Symmetry Medical Inc. - Form S-1/A

The provision for income taxes differs from that computed at the Federal statutory rate of 34% as follows:

	December 29, 2001	December 28, 2002	January 3, 2004
	<u> </u>	<u> </u>	<u> </u>
Tax at Federal statutory rate	\$ 540	\$ 745	\$ 3,031
State income taxes	78	88	257
Foreign taxes	(82)	(352)	43
Valuation allowance	393	323	(96)
Nondeductible goodwill amortization	422		
Other	49	37	(226)
	<u> </u>	<u> </u>	<u> </u>
	\$ 1,400	\$ 841	\$ 3,009
	<u> </u>	<u> </u>	<u> </u>

At January 3, 2004, the Company had state and foreign net operating loss carryforwards of approximately \$6,665 and \$1,314 for tax purposes. The state carryforwards have an expiration period of up to twenty years, which expire beginning December 31, 2019 and ending December 31, 2023, while the foreign carryforwards have no expiration date. However, due to the uncertainty of the realization of the full benefit of the foreign net operating loss carryforwards and certain other foreign deferred tax assets, the Company has established a

Table of Contents

Symmetry Medical Inc.

Notes to Consolidated Financial Statements (continued)

(In Thousands, Except Share Data)

valuation allowance of \$620. No provision has been made for United States federal and state or foreign taxes that may result from future remittances of undistributed earnings of foreign subsidiaries because it is expected that such earnings will be reinvested in these foreign operations indefinitely.

8. Profit Sharing Plan

The Company maintains two qualified profit sharing plans, which qualify under Section 401(k) of the Internal Revenue Code. Contributions by the Company are based upon both discretionary and matching nondiscretionary amounts. The matching amounts represent a 50% match of employees' contributions, up to a maximum of \$1 per participant per year. Expense recorded for the plans was \$686, \$493 and \$504 for 2003, 2002 and 2001, respectively.

9. Restricted Stock Plan

In January 2001 certain members of management were awarded a total of 677,758 shares of common stock which vest on December 31, 2007 or earlier in increments of 25% per year, if the Company's EBITDA, as defined, meets specified levels as outlined in the agreement. However, 263,572 shares have been forfeited as of January 3, 2004. Compensation expense is charged to the income statement as earned over the vesting period. The unearned compensation resulting from this agreement is reflected as a reduction to shareholder equity. For the years ended January 3, 2004, December 28, 2002 and December 29, 2001, the Company recognized approximately \$24, \$8 and \$25, respectively.

10. Stock Option Plan

2002 Stock Option Plan The 2002 Stock Option Plan provides for the grant of nonqualified stock options to our directors, officers and employees and other persons who provide services to us. A total of 52,135 shares of common stock are reserved for issuance under this plan. Options for 52,135 shares of common stock have been granted. These options vest ratably over a four year period as of the end of each of our fiscal years during that period, subject to us achieving certain minimum EBITDA targets in each fiscal year, and, if those targets are not met, on the seventh anniversary of the grant date so long as the option is still an employee. Options granted under the 2002 Stock Option Plan are generally not transferable by the optionee, and such options must be exercised within 30 days after the end of an optionee's status as an employee, director or consultant of ours (other than a termination by us for cause, as defined in the 2002 Stock Option Plan), within 180 days after such optionee's termination by death or disability, or within 90 days after such optionee's retirement, but in no event later than the expiration of the option term. All options were granted at the fair market value of our common stock, as determined by our board of directors, on the date of grant. The term of all options granted under the 2002 Stock Option Plan may not exceed ten years.

2003 Stock Option Plan The 2003 Stock Option Plan provides for the grant of nonqualified stock options to our directors, officers and employees and other persons who provide services to us. A total of 907,167 shares of common stock are reserved for issuance under this plan. Options for 778,640 shares of common stock have been granted. These options vest ratably over a four year period as of the end of each of our fiscal years during that period. Options granted under the 2003 Stock Option Plan are generally not transferable by the optionee, and such options must be exercised within 30 days after the end of an optionee's status as an employee, director or consultant of ours (other than a termination by us for cause, as defined in the 2003 Stock Option Plan), within 180 days after such optionee's termination by death or disability, or within 90 days after such optionee's retirement, but in no event later than the expiration of the option term. All options were granted at the fair market value of our common stock, as determined by our board of directors, on the date of grant. The term of all options granted under the 2003 Stock Option Plan may not exceed ten years.

Table of Contents**Symmetry Medical Inc.****Notes to Consolidated Financial Statements (continued)***(In Thousands, Except Share Data)*

A summary of stock option activity and weighted-average exercise prices for the periods indicated are as follows:

	<u>Number of Options</u>	<u>Weighted-Average Exercise Price</u>
Outstanding at December 29, 2001		\$
Granted	52,135	0.28
Exercised		
Cancelled		
Outstanding at December 28, 2002	52,135	\$ 0.28
Granted	740,624	3.04
Exercised		
Cancelled		
Outstanding at January 3, 2004	792,759	\$ 2.86

The following table summarizes information about stock options outstanding at January 3, 2004:

Range of Exercise	Number Outstanding	Weighted Average Remaining Life	Weighted Average Exercise Price	Number Exercisable at January 3, 2004	Weighted Average Exercise Price
\$ 0.28	52,135	8.0 years	\$ 0.28	26,068	\$ 0.28
3.04	740,624	9.6 years	3.04	185,160	3.04

Using the Minimum Value option valuation model, the estimated fair values of options granted during 2003 and 2002 were \$1.13 and \$0.11 per option, respectively. Principal assumptions used in applying the Minimum Value model were as follows:

	<u>2002</u>	<u>2003</u>
Minimum Value Model Assumptions		
Risk-free interest rate	5.09%	4.65%
Expected dividend yield	0.00%	0.00%
Expected term	10 years	10 years

11. Related Party Transactions

During the year ended January 3, 2004, the Company purchased contract manufacturing services totaling \$283 from ADS Precision Limited (ADS), a company controlled by a relative of the general manager of the European operations. The Company maintains an ongoing relationship with this vendor and believes all transactions have been executed on an arms length basis. As of October 2, 2004, the Company has a payable to ADS of \$263.

During 2003, 2002 and 2001, the Company paid management fees to a related party of \$375, \$250 and \$250, respectively. These fees are included in selling, general and administrative expenses. Additionally, the Company paid a transaction fee upon the completion of the Mettis acquisition and the sale of our senior subordinated notes to this related party of \$1,717.

12. Fair Value of Financial Instruments

Financial instruments consist of cash and cash equivalents, accounts receivable, and long-term debt, including interest-rate swap agreements. The carrying value of these financial instruments approximates fair value.

Table of Contents**Symmetry Medical Inc.****Notes to Consolidated Financial Statements (continued)***(In Thousands, Except Share Data)***13. Segment Reporting**

The Company primarily designs, develops and manufactures implants and related surgical instruments and cases for orthopedic device companies and companies in other medical device markets such as dental, osteobiologic and endoscopy. The Company also has a special services business serving primarily aerospace customers, which does not meet the quantitative disclosure requirements of SFAS 131. The Company manages its business and operates as a single reportable business segment. Because of the similar economic characteristics of the operations, including the nature of the products, comparable level of FDA regulations, same or similar customers, the Company's operations have been aggregated following the provisions of SFAS 131 for segment reporting purposes.

The Company is a multi-national corporation with operations in the United States, the United Kingdom and France. As a result, the Company's financial results can be impacted by currency exchange rates in the foreign markets in which the Company sells its products. While exposure to variability in foreign currency exists, the Company does not believe it is significant to its operations and any variability is somewhat offset through the location of its manufacturing facilities. Revenues are attributed to geographic locations based on the location to which we ship our products.

A substantial portion of the Company's net revenues is derived from a limited number of customers. Revenues include sales to customers of the Company which individually account for 10% or more of net revenues as follows:

2004- Four customers representing approximately 23%, 15%, 15% and 10% of revenues, respectively

2003- Three customers representing approximately 19%, 15% and 11% of revenues, respectively

2002- Two customers representing approximately 17% and 16% of revenues, respectively

2001- Two customers representing approximately 17% and 16% of revenues respectively

The customers listed above, which are orthopedic device companies, comprised approximately 31% and 30% of the accounts receivable balance at January 3, 2004 and December 28, 2002, respectively.
