Notes to Schedule of Investments (amounts in thousands*, except number of contracts):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- (a) When-issued security.
- (b) Coupon represents a weighted average rate.
- (c) The average amount of borrowings outstanding during the nine-months ended October 31, 2006 was \$113,779 at a weighted average interest rate of 5.07%. On October 31, 2006, securities valued at \$210,381 were pledged as collateral for reverse repurchase agreements. The Fund is authorized to borrow funds and utilize leverage in amounts not exceeding thirty-three and one-third percent of its total assets. The Fund sability to leverage creates an opportunity for increased net income, but at the same time poses special risks. If the income from the securities purchased with borrowed funds is not sufficient to cover the cost of borrowing, the net income of the Fund will be less than if borrowing had not been used, reducing the amount available for distribution to shareholders.
- (d) Securities with an aggregate market value of \$497 have been pledged as collateral for swap and swaption contracts on October 31, 2006.
- (e) As of October 31, 2006, portfolio securities with an aggregate value of \$11,018 were valued in good faith and pursuant to the guidelines established by the Board of Directors.
- (f) Securities with an aggregate market value of \$1,468 have been segregated with the custodian to cover margin requirements for the following open futures contracts on October 31, 2006:
