Form 424B3
December 05, 2007

PROSPECTUS SUPPLEMENT NO. 14
To Prospectus dated May 14, 2007

Filed Pursuant to Rule 424(b)(3)
Registration No. 333-129842

Computer Software Innovations, Inc.

14,435,472 SHARES OF COMMON STOCK

This Prospectus Supplement supplements the Prospectus dated May 14, 2007, as amended and supplemented, relating to the offer and sale by the selling stockholder identified in the Prospectus of up to 14,435,472 shares of common stock of Computer Software Innovations, Inc. (the Company).

This Prospectus Supplement includes the Company's Form 8-K filed with the Securities and Exchange Commission on December 5, 2007.

The information contained in the report included in this Prospectus Supplement is dated as of the period of such report. This Prospectus Supplement should be read in conjunction with the Prospectus dated May 14, 2007, as supplemented on May 25, 2007, June 1, 2007, June 27, 2007, August 14, 2007, September 14, 2007, October 3, 2007, October 5, 2007, October 11, 2007, October 24, 2007, November 13, 2007, November 20, 2007, and December 3, 2007, which supplements are to be delivered with this Prospectus Supplement. This Prospectus Supplement is qualified by reference to the Prospectus except to the extent that the information in this Prospectus Supplement updates and supersedes the information contained in the Prospectus dated May 14, 2007, including any supplements or amendments thereto.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this Prospectus Supplement No. 14 is December 5, 2007.

Investor Presentation

Safe Harbor
This
presentation
contains
forward-looking
statements

that
is,

statements

related

to

future,

not

past,

events. In this context, forward looking statements often address our expected future business and financial performance,

and

often

contain

words

such

as

may,

could,

should,

expect,

believe,

seek,

estimate,

predict,

or project.

Forward-looking statements by their nature address matters that are, to different degrees, uncertain. For us, particular uncertainties arise from economic health of the software and technology industry, demand for CSI s

products and engineering services, competitive pricing pressures and

the availability of necessary financing. In addition, other risks are more fully described in CSI s

2006 Form 10-

KSB and other filings with the Securities and Exchange Commission. These uncertainties may cause our actual results to be materially different from those expressed in our forward-looking statements. We do not undertake to update our forward-looking statements.

Company Overview

Computer Software Innovations, Inc. (OTCBB:CSWI), CSI: Technology Outfitters, is a full service software and technology solutions company working primarily with public sector organizations.

The software solutions include financial management, billing and revenue management, school activity accounting, lesson planning and automated workflow.

The technology solutions include IP telephony, IP video surveillance, visual communications, interactive classrooms, network security and traffic monitoring, infrastructure design, wireless solutions, network management, engineering services, disaster recovery and hardware solutions.

CSI's

client base includes school districts, higher education, municipalities, county governments, and other non-profit organizations. Currently, more than 600 public sector organizations utilize CSI's software systems and network integration services.

Financial Summary

Non-GAAP Financial Measure: Explanation and Reconciliation of EBITDA

EBITDA is a non-GAAP financial measure used by management, lenders and certain investors as a supplemental measure in the evaluation of some aspects of a corporation's financial position and core operating performance. Investors sometimes use EBITDA as it allows for some level of comparability of profitability trends between those businesses differing as to capital structure and capital intensity by removing the impacts of depreciation and amortization. EBITDA does not include changes in major working capital items such as receivables, inventory and payables, which can also indicate a significant need for, or source of, cash. Since decisions regarding capital investment and financing and changes in working capital components can have a significant impact on cash flow, EBITDA is not a good indicator of a business's cash flows. We use EBITDA for evaluating the relative underlying performance of the Company's core operations and for planning purposes, including a review of this indicator and discussion of potential targets in the preparation of annual operating budgets. We calculate EBITDA by adjusting net income or loss to exclude net interest expense, income tax expense or benefit and depreciation and amortization, thus the term "Earnings Before Interest, Taxes, Depreciation and Amortization" and the acronym "EBITDA."

EBITDA is presented as additional information because management believes it to be a useful supplemental analytic measure of financial performance of our core business, and as it is frequently requested by sophisticated investors. However, management recognizes it is no substitute for GAAP measures and should not be relied upon as an indicator of financial performance separate from GAAP measures (as discussed further below).

When evaluating EBITDA, investors should consider, among other things, increasing and decreasing trends in the measure and how it compares to levels of debt and interest expense, ongoing investing activities, other financing activities and changes in working capital needs. Moreover, this measure should not be construed as an alternative to net income (as an indicator of operating performance) or cash flows (as a measure of liquidity) as determined

in
accordance with GAAP.

While some investors use EBITDA to compare between companies with different investment and capital structures, all companies do not calculate EBITDA in the same manner. Accordingly, the EBITDA presented below may not be comparable to similarly titled measures of other companies.

A reconciliation of net income reported under GAAP to EBITDA is provided after the following two slides.

Management forecasted EBITDA for the year is \$4.3 million, most comparable GAAP measure of forecasted net income has been given as over \$1.0 million. Larger gap between the two measures than historical is anticipated due to increased depreciation and amortization from assets, tangible and intangible, acquired in the McAleer acquisition.
