PRESENTATION OF CERTAIN INFORMATION

AEGON N.V. is referred to in this Annual Report on Form 20-F as AEGON, we, us or the Company and AEGON N.V. together with its member companies are together referred to as the AEGON Group. For such purposes, member companies means, in relation to AEGON N.V., those companies that are required to be consolidated in accordance with legislative requirements of the Netherlands relating to consolidating accounts. References to the NYSE are to the New York Stock Exchange. References to the SEC are to the Securities and Exchange Commission.

In this Annual Report on Form 20-F, references to EUR and euro are to the lawful currency of the member states of the European Monetary Union that have adopted the single currency in accordance with the Treaty establishing the European Community, as amended by the Treaty on European Union. References to \$, USD, US\$ and US dollars are to the lawful currency of the United States of America, references to GBP, pound sterling and the UK pound are to the lawful currency of the United Kingdom, references to CAD and Canadian dollars are to the lawful currency of Canada and references to CNY are to the lawful currency of the People's Republic of China.

FORWARD LOOKING STATEMENTS

The statements contained in this Report that are not historical facts are forward-looking statements as defined in the US Private Securities Litigation Reform Act of 1995. The following are words that identify such forward-looking statements: *believe*, *estimate*, *target*, *intend*, *may*, *expect*, *anticipate*, *predict*, *project*, *counting on*, *plan*, *continue*, *want*, *forecast*, *should*, *would*, *is confident*, *will* and similar expressions as they relate to our company. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. We undertake no obligation to publicly update or revise any forward-looking statements. Readers are cautioned not to place undue reliance on these *forward-looking statements*, which merely reflect company expectations at the time of writing. Actual results may differ materially from expectations conveyed in *forward-looking statements* due to changes caused by various risks and uncertainties. Such risks and uncertainties include, but are not limited to the following:

Changes in general economic conditions, particularly in the United States, the Netherlands and the United Kingdom;

Changes in the performance of financial markets, including emerging markets, such as with regard to:

The frequency and severity of defaults by issuers in our fixed income investment portfolios; and

The effects of corporate bankruptcies and/or accounting restatements on the financial markets and the resulting decline in the value of equity and debt securities we hold;

The frequency and severity of insured loss events;

Changes affecting mortality, morbidity and other factors that may impact the profitability of our insurance products;

Changes affecting interest rate levels and continuing low or rapidly changing interest rate levels;

Changes affecting currency exchange rates, in particular the EUR/USD and EUR/GBP exchange rates;

Increasing levels of competition in the United States, the Netherlands, the United Kingdom and emerging markets;

Changes in laws and regulations, particularly those affecting our operations, the products we sell, and the attractiveness of certain products to our consumers;

Regulatory changes relating to the insurance industry in the jurisdictions in which we operate;

Acts of God, acts of terrorism, acts of war and pandemics;

Changes in the policies of central banks and/or governments;

Edgar Filing: AEGON NV - Form 20-F

Litigation or regulatory action that could require us to pay significant damages or change the way we do business;

Customer responsiveness to both new products and distribution channels;

Competitive, legal, regulatory, or tax changes that affect the distribution cost of or demand for our products;

Our failure to achieve anticipated levels of earnings or operational efficiencies as well as other cost saving initiatives; and

The impact our adoption of the International Financial Reporting Standards may have on our reported financial results and financial condition.

Table of Contents**ITEM 3. KEY INFORMATION****3A Selected financial data**

A summary of historical financial data is found in the table below. Our consolidated financial statements are prepared in accordance with International Financial Reporting Standards as adopted by the European Union and with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS). Financial data for 2003 has been omitted due to the unavailability of IFRS data for that period.

It is important to read this summary in conjunction with the consolidated financial statements and related notes included elsewhere in this Report.

All per share amounts have been calculated based on the weighted average number of common shares outstanding after giving effect to all stock dividends through December 31, 2007.

Consolidated income statement information

In million EUR (except per share amount) Amounts based upon IFRS ¹	Years ended December 31,			
	2007	2006 ⁴	2005 ⁴	2004 ⁴
Premium income	26,900	24,570	18,882	18,329
Investment income	10,457	10,376	9,937	9,339
Total revenues ²	39,271	36,615	30,336	29,300
Income before tax	3,077	3,971	2,796	2,441
Net income	2,551	3,169	2,147	2,010
Net income per common share ³				
Basic	1.47	1.87	1.25	1.22
Diluted	1.47	1.86	1.25	1.22

¹ Our consolidated financial statements are prepared in accordance with IFRS.

² Excluded from the income statements prepared in accordance with IFRS are receipts related to investment-type annuity products and investment contracts.

³ Per share data has been calculated based on the weighted average number of common shares outstanding after giving effect to all stock dividends, stock splits and share repurchases through December 31, 2007. Diluted per share data gives effect to all dilutive securities.

⁴ Information for 2006, 2005 and 2004 have been adjusted to reflect a change in accounting principles. Please refer to Note 18.2 of the notes to our consolidated financial statements in Item 18 of this Annual Report for further information.

Consolidated balance sheet information

Dividends

AEGON has declared interim and final dividends for the years 2003 through 2007 in the amounts set forth in the table below. Dividends in US dollars are calculated based on the foreign exchange reference rate (the rate based on the daily concertation procedure between central banks as published each working day at 14:15 hours by the European Central Bank) on the business day following the announcement of the interim dividend or on the business day following the shareholder meeting approving the relevant final dividend.

Year	EUR per common share ¹			USD per common share ¹		
	Interim	Final	Total	Interim	Final	Total
2003	0.20	0.20	0.40	0.22	0.24	0.46
2004	0.21	0.21	0.42	0.26	0.27	0.53
2005	0.22	0.23	0.45	0.27	0.29	0.56
2006	0.24	0.31	0.55	0.31	0.42	0.73
2007	0.30	0.32 ₂	0.62 ₂	0.41	NA	NA

¹ Paid, at each shareholder's option, in cash or in stock.

² Proposed.

On August 10, 2007, AEGON declared an interim dividend for 2007 of EUR 0.30 per common share. AEGON repurchased 13.6 million shares to neutralize the dilutive effect of the interim dividend. AEGON has proposed to its annual General Meeting of Shareholders, scheduled to occur on April 23, 2008, that the full year 2007 dividend be set at EUR 0.62 per common share, resulting in a final dividend for 2007 of EUR 0.32 per common share. To the extent shareholders elect to receive their final dividend in the form of new shares rather than cash, AEGON will purchase an equivalent amount of shares on the open market to neutralize the effect of the stock dividend.

Annual dividends on AEGON's preferred shares are calculated as a percentage of the paid-in capital on the preferred shares using a rate equal to the European Central Bank's fixed interest percentage for basic refinancing transactions plus 1.75% (as determined on the first Euronext Amsterdam working day of the financial year to which the dividend relates) resulting in a rate of 5.25% for 2007. Applying this rate to the weighted average paid-in capital of our preferred shares during 2007, the annual dividend on our preferred shares payable for 2007 is EUR 112 million. The rate for annual dividends on preferred shares in 2008, as determined on January 2, 2008, is 5.75% and the annual dividend on preferred shares for 2008, based on the paid-in capital on the preferred shares on January 2, 2008, will be EUR 122 million.

Exchange rates

Fluctuations in the exchange rate between the euro and the US dollar will affect the dollar equivalent of the euro price of our common shares traded on Euronext Amsterdam and, as a result, are likely to impact the market price of our common shares in the United

Table of Contents

States. Such fluctuations will also affect any dollar amounts received by holders of common shares upon conversion of any cash dividends paid in euros on our common shares.

As of February 29, 2008 the USD exchange rate ¹ was EUR 1 = USD 1.5187

The high and low exchange rates ¹ for the US dollar per euro for each of the last six months through February 2008 are set forth below:

	Sept. 2007	Oct. 2007	Nov. 2007	Dec. 2007	Jan. 2008	Feb. 2008
High (USD per EUR)	1.4219	1.4468	1.4862	1.4759	1.4877	1.5187
Low (USD per EUR)	1.3606	1.4092	1.4435	1.4344	1.4574	1.4495

The average exchange rates¹ for the US dollar per euro for the five years ended December 31, 2007, calculated by using the average of the exchange rates on the last day of each month during the period, are set forth below:

	Year ended December 31,	Average rate
2003		1.1411
2004		1.2478
2005		1.2400
2006		1.2661
2007		1.3797

¹ The US dollar exchange rates are the noon buying rates in New York City for cable transfers in euros as certified for customs purposes by the Federal Reserve Bank of New York.

3C Reasons for the offer and use of proceeds

Not applicable

3D Risk factors**i Risks relating to our business*****Interest rate risk***

Interest rate volatility or sustained low interest rate levels may adversely affect our profitability and shareholders' equity.

In periods of rapidly increasing interest rates, policy loans, surrenders and withdrawals may increase and usually do increase. Premiums in flexible premium policies may decrease as policyholders seek investments with higher perceived returns. This activity may result in cash payments by us requiring the sale of invested assets at a time when the prices of those assets are adversely affected by the increase in market interest rates, potentially resulting in realized investment losses. These cash payments to policyholders result in a decrease in total invested assets and a decrease in net income. Among other things, early withdrawals may also prompt us to accelerate amortization of policy acquisition costs, which reduces net income.

Table of Contents

During periods of sustained low interest rates, life insurance and annuity products may be relatively more attractive to consumers, resulting in increased premium payments on products with flexible premium features, and a higher percentage of insurance policies remaining in force from year to year. During such a period, investment earnings may be lower because the interest earnings on new fixed income investments are likely to have declined with the market interest rates. In addition, mortgages and redeemable bonds in the investment portfolio are more likely to be repaid as borrowers seek to borrow at lower interest rates and we may be required to reinvest the proceeds in securities bearing lower interest rates. Also, in a period of low interest rates, we may not be able to reduce crediting rates on policies and still preserve margins as a result of minimum guaranteed crediting rates provided on policies. Accordingly, during periods of sustained low interest rates, net income may decline as a result of a decrease in the spread between returns on the investment portfolio and the interest rates either credited to policyholders or assumed in reserves.

If interest rates rise, there may be unrealized losses on some of our assets that will be recorded as negative income under IFRS. This is inconsistent with the IFRS accounting on much of the company's liabilities, where corresponding unrealized gains when interest rates rise do not affect income in the shorter term. Over time, the short-term reduction in income due to rising interest rates would be offset by higher income in later years, all else being equal. Therefore, rising interest rates are not considered a long-term risk to the company.

The profitability of spread-based business depends in large part upon the ability to manage interest rate spreads, credit risk and other risks inherent in the investment portfolio. We may not be able to successfully manage interest rate spreads or the potential negative impact of those risks. Investment income from general account fixed income investments for the years 2005, 2006 and 2007 was EUR 6.6 billion, EUR 7.0 billion and EUR 7.1 billion, respectively. The value of the related general account fixed income investment portfolio at the end of the years 2005, 2006 and 2007 was EUR 136 billion, EUR 126 billion and EUR 126 billion, respectively.

See Item 11, **Quantitative and Qualitative Disclosure about Market Risk**, of this Annual Report for detailed sensitivity analyses.

Credit risk

Defaults in our bonds, private placements and mortgage loan portfolios may adversely affect profitability and shareholders' equity.

As premiums and deposits are received, these funds are invested to pay for future policyholder obligations. For general account products, we typically bear the risk for investment performance (return of principal and interest). We are exposed to credit risk on our general account fixed income portfolio (bonds, mortgages and private placements), derivatives and reinsurance contracts. Some issuers have defaulted on their financial obligations for various reasons, including bankruptcy, lack of liquidity, downturns in the economy, downturns in real estate values, operational failure and fraud. In the past, poor economic and investment climates in our major markets resulted in significant investment impairments on our investment assets due to defaults and overall declines in the securities markets. Impairments on bonds held by us were low in 2005, 2006 and 2007. However, a return to excessive defaults or other reductions in the value of these securities and loans could have a materially adverse effect on our business, results of operations and financial condition.

Equity market risk

A decline in equity markets may adversely affect our profitability and shareholders' equity, sales of savings and investment products and the amount of assets under management.

Fluctuations in equity markets have adversely affected our profitability, capital position and sales of equity related products in the past and may do so again in the future. Exposure to equity markets exists in both assets and liabilities. Asset exposure stems from direct equity investment where we bear all or most of the volatility in returns and investment performance risk. General economic conditions, as well as significant events like terrorist actions, have led to and may again result in significant decreases in the value of our equity investments. In 2005, 2006 and 2007, declines in the value of equity securities held in the general account resulted in the recognition of impairment losses of EUR 20 million, EUR 36 million and EUR 45 million, respectively.

Some products sold by AEGON contain minimum return or accumulation guarantees. We are at risk if equity market returns do not meet or exceed these guarantee levels and may need to set up additional reserves to fund these future guaranteed benefits. If equity markets decline, fee income will fall on these products as a result of reduced fund balances. We are also at risk if returns are not sufficient to allow amortization of deferred policyholder acquisition costs. It is possible under certain circumstances that we would need to accelerate amortization of DPAC and to establish additional provisions for minimum guaranteed benefits, which would reduce net income and shareholders' equity. Volatility or poor market conditions may also significantly reduce the popularity of some of our savings and investment products, which could lead to lower sales and net income.

Table of Contents

Underwriting risk

Differences between actual claims experience and underwriting and reserve assumptions may require liabilities to be increased.

Our earnings depend upon the extent to which actual claims experience is consistent with the assumptions used in setting the prices for products and establishing the technical provisions and liabilities for claims. To the extent that actual claims experience is less favorable than the underlying assumptions used in establishing such liabilities, income would be reduced. Furthermore, if these higher claims were part of a trend, we may be required to increase our liabilities, which may also reduce income. In addition, certain acquisition costs related to the sale of new policies and the purchase of policies already in force have been recorded as assets on the balance sheet and are being amortized into income over time. If the assumptions relating to the future profitability of these policies (such as future claims, investment income and expenses) are not realized, the amortization of these costs may be accelerated and may require write-offs due to unrecoverability. This may have a materially adverse effect on our business, results of operations and financial condition.

Currency exchange rate risk

Fluctuations in currency exchange rates may affect our reported results of operations.

As an international group, we are subject to currency risk. Currency risk also exists for any policy denominated in currencies other than the policy's local currency. In the Netherlands, AEGON invests the majority of its equity holdings in an internationally diversified portfolio, rather than solely in Dutch equities. Capital held in subsidiaries is kept in local currencies to the extent shareholders' equity is required to satisfy regulatory and self-imposed capital requirements. Therefore, currency exchange rate fluctuations may affect the level of shareholders' equity as a result of translation into euros. AEGON holds the remainder of its capital base (capital securities, subordinated and senior debt) in various currencies in amounts that are targeted to correspond to the book value of its country units. This balancing mitigates currency translation impacts to equity and leverage ratios.

Currency risk in the investment portfolios is managed using asset liability matching principles. AEGON does not hedge the income streams from the main non-euro units and, as a result, earnings may fluctuate due to currency translation. As we have significant business segments in the Americas and in the United Kingdom, the principal sources of exposure from currency fluctuations are from the differences between US dollar and euro and between UK pound and euro. We may experience significant changes in net income and shareholders' equity because of these fluctuations.

For the Americas segment, which primarily conducts its business in US dollars, total revenues and net income in 2007 amounted to EUR 16.3 billion and EUR 1,596 million, respectively. For the United Kingdom segment, which primarily conducts its business in UK pounds, total revenues and net income in 2007 amounted to EUR 13.7 billion and EUR 267 million, respectively. On a consolidated basis, these two segments represented 76% of the total revenues and 73% of the net income for the year 2007. Additionally, we borrow in various currencies to hedge the currency exposure arising from our operations. On December 31, 2007 we have borrowed or swapped amounts in proportion to the currency mix of capital in units, which was denominated approximately 59% in US dollars, 22% in Euro, 14% in UK pounds and 5% in Canadian dollars.

Liquidity risk

Illiquidity of certain investment assets may prevent us from selling investments at fair prices in a timely manner.

Liquidity risk is inherent to much of our business. Each asset purchased and liability sold has liquidity characteristics that are unique. Some liabilities are surrenderable while some assets, such as privately placed loans, mortgage loans, real estate and limited partnership interests, have low liquidity. The latter half of 2007 was characterized by adverse market conditions generally affecting the value and liquidity of assets and in particular asset-backed securities. Due to the current reduced liquidity in capital markets, we may be unable to sell or buy significant volumes of assets at quoted prices. In addition, any securities we issue of significant volume may be issued at higher financing costs due to these current impaired liquidity conditions. Although AEGON manages its liquidity position for extreme events including greatly reduced liquidity in capital markets, if these conditions were to persist for an extended period of time, we may need to sell assets to meet our insurance obligations while still in this impaired liquidity market.

Approximately 30% of our general account investments are less liquid.

Risk related to general economic conditions

General economic conditions may affect our results of operations and financial conditions.

Edgar Filing: AEGON NV - Form 20-F

Our result of operations and financial condition may be materially affected from time to time by general economic conditions, such as levels of employment, consumer lending or inflation in the countries in which we operate.

Table of Contents**Other risks**

US Regulations XXX and AXXX may have an adverse effect on our financial condition and results of operations by requiring us to increase our statutory reserves for term and universal life insurance or incur higher operating costs.

The Model Regulation entitled Valuation of Life Insurance Policies, commonly known as Regulation XXX, requires insurers in the United States to establish additional statutory reserves for term life insurance policies with long-term premium guarantees. In addition, Valuation of Life Insurance Policies Regulation, commonly known as Regulation AXXX requires insurers to establish additional statutory reserves for certain universal life insurance policies with secondary guarantees. Virtually all of our newly issued term and universal life insurance products are now affected by Regulations XXX and AXXX, respectively.

In response to this regulation, AEGON has implemented reinsurance and capital management actions to mitigate the impact of Regulations XXX and AXXX. However, AEGON may not be able to implement actions to mitigate the impact of Regulation XXX and AXXX on future sales of term or universal life insurance products, potentially resulting in an adverse impact on these products and our market position in the life insurance market. Additionally, any change to or repeal of Regulation XXX or AXXX could also reduce the effectiveness of our reinsurance and capital management actions, adversely affecting our life insurance operations.

A downgrade in our ratings may increase policy surrenders and withdrawals, adversely affect relationships with distributors and negatively affect our results.

Claims paying ability and financial strength ratings are factors in establishing the competitive position of insurers. A rating downgrade (or the potential for such a downgrade) of AEGON or any of its rated insurance subsidiaries may, among other things, materially increase the number of policy surrenders and withdrawals by policyholders of cash values from their policies. The outcome of this may be cash payments requiring the sale of invested assets, including illiquid assets, at a price that may result in realized investment losses. These cash payments to policyholders would result in a decrease in total invested assets and a decrease in net income. Among other things, early withdrawals may also cause us to accelerate amortization of policy acquisition costs, reducing net income.

In addition, a downgrade may adversely affect relationships with broker-dealers, banks, agents, wholesalers and other distributors of our products and services, which may negatively impact new sales and adversely affect our ability to compete. This would have a materially adverse effect on our business, results of operations and financial condition.

The current S&P, Moody's and Fitch insurance financial strength ratings and ratings outlook of our primary life insurance companies in our major country units are as follows:

	AEGON USA	AEGON NL	AEGON Scottish Equitable
S&P rating	AA	AA	AA
S&P outlook	Stable	Stable	Stable
Moody's rating	Aa3	Not rated	Not rated
Moody's outlook	Stable	Not rated	Not rated
Fitch rating	AA+	Not rated	Not rated
Fitch outlook	Stable	Not rated	Not rated

Negative changes in credit ratings may also increase our cost of funding. During 2007, Standard and Poor's maintained the credit ratings of AEGON N.V. at A+ with a stable outlook. Moody's Investor Service maintained the senior debt rating of AEGON N.V. at A2, with a stable outlook. Fitch Ratings assigned AA- (double A minus) ratings to AEGON NV's senior debt. On June 22, 2007, Moody's Investors Service withdrew the A1 insurance financial strength rating (stable outlook) of AEGON Scottish Equitable for business reasons.

Changes in government regulations in the countries in which AEGON operates may affect profitability.

Our insurance business is subject to comprehensive regulation and supervision in all countries in which we operate. The primary purpose of such regulation is to protect policyholders, not holders of securities. Changes in existing insurance laws and regulations may affect the way in which we conduct business and the products offered. Changes in pension and employee benefit regulation, social security regulation, financial services regulation, taxation and the regulation of securities products and transactions may adversely affect our ability to sell new policies or claims exposure on existing policies. Additionally, the insurance laws or regulations adopted or amended from time to time may be more restrictive or may result in higher costs than current requirements.

Edgar Filing: AEGON NV - Form 20-F

Litigation and regulatory investigations may adversely affect our business, results of operations and financial condition.

AEGON faces significant risks of litigation and regulatory investigations and actions in connection with activities as an insurer, securities issuer, employer, investment advisor, investor and taxpayer. In recent years, the insurance industry has increasingly been the subject of litigation, investigation and regulatory activity by various governmental and enforcement authorities concerning common industry practices such as the disclosure of contingent commissions and the accounting treatment of finite reinsurance or other non-traditional insurance products. Lawsuits, including class actions and regulatory actions, may be difficult to assess or quantify, may seek recovery of very large and/or indeterminate amounts, including punitive and treble damages, and their existence and magnitude may remain unknown for substantial periods of time. A substantial legal liability or a significant regulatory action could have a materially adverse effect on our business, results of operations and financial condition.

Table of Contents

AEGON may be unable to manage our risks successfully through derivatives.

AEGON is exposed to currency fluctuations, changes in the fair value of its investments, the impact of interest rate, equity markets and credit spread changes and changes in mortality and longevity. AEGON uses common financial derivative instruments such as swaps, options, futures and forward contracts to hedge some of the exposures related to both investments backing insurance products and company borrowings. AEGON may not be able to manage the risks associated with these activities successfully through the use of derivatives. In addition, a counterparty may fail to honor the terms of its derivatives contracts with us. Our inability to manage risks successfully through derivatives or a counterparty's failure to honor its obligations could have a materially adverse effect on our business, results of operations and financial condition.

State statutes and foreign country regulators may limit the aggregate amount of dividends payable by subsidiaries of AEGON NV, thereby limiting the company's ability to make payments on debt obligations.

Our ability to make payments on debt obligations and pay certain operating expenses is dependent upon the receipt of dividends from subsidiaries. Certain of these subsidiaries have regulatory restrictions that can limit the payment of dividends.

Changes in accounting policies may affect our reported results and shareholders' equity.

Since 2005, our financial statements have been prepared and presented in accordance with IFRS as adopted by the European Union and with International Financial Reporting Standards as issued by the International Accounting Standards Board. Any future change in these accounting principles may have a significant impact on our reported results, financial condition and shareholders' equity. This includes the level and volatility of reported results and shareholders' equity.

Tax law changes may adversely affect our profitability, as well as the sale and ownership of AEGON's products.

Insurance products enjoy certain tax advantages, particularly in the United States and the Netherlands, which permit the tax deferred accumulation of earnings on the premiums paid by the holders of annuities and life insurance products under certain conditions and within limits. Taxes on this inside build-up of earnings may not be payable at all and, if payable, generally are due only when the earnings are actually paid.

The US Congress has, from time to time, considered possible legislation that could make our products less attractive to consumers, including legislation that would reduce or eliminate the deferral of taxation on the accretion of value within certain annuities and life insurance products. In addition, the United States Congress passed legislation in 2001 that provided for reductions in the estate tax and the possibility of permanent repeal of the estate tax continues to be discussed; this could have an impact on insurance products and sales in the United States.

The US Government, as well as state and local governments, also considers from time to time tax law changes that could increase the amount of taxes that we pay. For example, the US Treasury Department and the Internal Revenue Service are expected to propose new regulations regarding the methodology to determine the dividends received deduction (DRD) related to variable life insurance and annuity contracts. The DRD reduces the amount of dividend income subject to tax and is a significant component of the difference between our effective tax rate and the federal statutory tax rate of 35%. A change in the DRD, including the possible elimination of this deduction, could reduce our consolidated net income.

Changes to tax laws in the Netherlands at the end of 2005 have reduced the attractiveness of early retirement plans, but tax advantages have been granted from January 1, 2006 for savings products known as Levensloop. Any changes in United States or Dutch tax law affecting similar products could have a materially adverse effect on AEGON's business, results of operations and financial condition.

Competitive factors may adversely affect our market share.

Competition in our business segments is based on service, product features, price, commission structure, financial strength, claims paying ability, ratings and name recognition. We face intense competition from a large number of other insurers, as well as non-insurance financial services companies such as banks, broker-dealers and asset managers, for individual customers, employers, other group customers and agents and other distributors of insurance and investment products. Consolidation in the global financial services industry can enhance the competitive position of some of our competitors by broadening the range of their products and services, and increasing their distribution channels and their access to capital. In addition, development of alternative distribution channels for certain types of insurance and securities products, including through the internet, may result in increasing competition as well as pressure on margins for certain types of products. These competitive pressures could result in increased pricing pressures on a number of products and services, particularly as competitors seek to win market share; this may harm our ability to maintain or increase profitability.

Table of Contents

AEGON USA ranked ninth in individual term life sales, fourth in individual universal life sales (source: Internal Research for the nine months ended September 30, 2007) and tenth in variable life sales (source: Tillinghast survey for nine months ended September 30, 2007). AEGON USA ranked fifth in sales of fixed annuities sold through banks, fifteenth in variable annuities sold through banks and tenth overall in annuity sales through banks (source: internal research for the nine months ended September 30, 2007) and first in Synthetic Guaranteed Investment Contracts (source: internal research for the nine months ended September 30, 2007). Our major insurance competitors in the United States include American International Group (AIG), Hartford, ING, Manulife, Metropolitan Life, Nationwide, New York Life and Prudential.

In Canada, AEGON ranks fifth in overall individual life insurance sales (new business premiums), fourth in the universal life market, (source: LIMRA study Fourth Quarter 2007, issued February 2008) and fifth in the segregated funding insurance market based on net assets (source: Investor Economics Insight December 2007). AEGON's primary competitors in Canada are: Manulife, Sun Life, Industrial-Alliance, RBC Life, Canada Life, AIG Life, Empire Life and Equitable.

In the Netherlands, AEGON is the fifth largest life insurer. AEGON is the largest pension insurer and sixth largest individual life insurer based on gross life premium income (source: Regulatory Returns 2006). AEGON also owns the largest insurance broker in the Netherlands (source: Yearly Report Assurantie Magazine 2007). AEGON's major competitors in the Netherlands include Delta Lloyd, Eureko, Fortis, ING and SNS Reaal (which includes Zwitserleven and AXA NL). In the United Kingdom, AEGON faces strong competition in all its markets from three key sources: life and pension companies, investment management houses and independent financial adviser firms. AEGON's key competitors in the United Kingdom life and pension market include Aviva, AXA, Friends Provident, Legal and General, Prudential UK and Standard Life. AEGON's main competitors in the UK retail investment market are typically the investment management houses (e.g., Fidelity, Henderson, Merrill Lynch etc). The independent financial advisor market is fragmented, with a large number of relatively small firms. In Hungary, AEGON's major competitors include Allianz, Generali-Providencia, ING and OTP-Garancia. AEGON Spain's main competitors are Santander Seguros, Mapfre, Ibercaja, Vidacaixa, Adeslas, Sanitas and Asisa. In Taiwan, AEGON agency channel's major competitors are AIG, ING and Prudential UK. In the bank and broker channels, the major competitors are Allianz, Cardiff, Hon Tai Life and Fubon Life.

The default of a major market participant could disrupt the markets.

The failure of a major market participant could disrupt securities markets or clearance and settlement systems in our markets, which could cause market declines or volatility. Such a failure could lead to a chain of defaults that could adversely affect us. In addition, such a failure could impact future product sales as a potential result of reduced confidence in the insurance industry.

We may be unable to retain personnel who are key to the business.

As a global financial services enterprise with a decentralized management structure, AEGON relies, to a considerable extent, on the quality of local management in the various countries in which AEGON operates. The success of AEGON's operations is dependent, among other things, on AEGON's ability to attract and retain highly qualified professional personnel. Competition for key personnel in most countries in which AEGON operates is intense. AEGON's ability to attract and retain key personnel, and in particular senior officers, experienced portfolio managers, mutual fund managers and sales executives, is dependent on a number of factors, including prevailing market conditions and compensation packages offered by companies competing for the same talent; this competition may offer compensation packages that include considerable equity-based incentives through stock option or similar programs.

Judgments of US courts are not enforceable against AEGON in Dutch courts.

The United States and the Netherlands do not currently have a treaty providing for the reciprocal recognition and enforcement of judgments (other than arbitration awards) in civil and commercial matters. Judgments of US courts, including those predicated on the civil liability provisions of the federal securities laws of the United States, may not be enforceable in Dutch courts. Therefore, AEGON's shareholders that obtain a judgment against us in the United States may not be able to require us to pay the amount of the judgment unless a competent court in the Netherlands gives binding effect to the judgment. It may, however, be possible for a US investor to bring an original action in a Dutch court to enforce liabilities against AEGON, its affiliates, directors, officers or any expert named therein who reside outside the United States, based upon the US federal securities laws.

Reinsurers to whom AEGON has ceded risk may fail to meet their obligations.

AEGON's insurance subsidiaries cede premiums to other insurers under various agreements that cover individual risks, group risks or defined blocks of business, on a co-insurance, yearly renewable term, excess or catastrophe excess basis. These reinsurance agreements spread the risk and minimize the effect of losses. The amount of each risk retained depends on evaluation of the specific risk, subject, in certain circumstances, to maximum limits based on the characteristics of coverage. Under the terms of the reinsurance agreements, the reinsurer agrees to reimburse for

Edgar Filing: AEGON NV - Form 20-F

the ceded amount in the event the claim is paid. However, AEGON's insurance subsidiaries remain liable to their policyholders with respect to ceded insurance if any reinsurer fails to meet the obligations assumed by it. See Item 18, Financial Statements Schedule to Financial Statements Reinsurance of this Annual Report for a table showing life insurance in force amounts on a direct, assumed and ceded basis for 2005, 2006 and 2007. See also Item 18, Financial Statements, Note 18.10 of this Annual Report for the amount of reinsurance assets at each balance sheet date for reinsurance ceded.

Table of Contents

In accordance with industry practices, AEGON reinsures a portion of its life insurance exposure with unaffiliated insurance companies under traditional indemnity reinsurance arrangements. Approximately 31% of AEGON's total direct and assumed (for which AEGON acts as a reinsurer for others) life insurance in force is ceded to other insurers. In the United States, Transamerica Reinsurance retrocedes a significant portion of the risk it assumes. The major reinsurers of AEGON USA are Munich American Reassurance Company, American Long Term Care Reinsurance Group, RGA Reinsurance Company, Swiss Re and US Branch Sunlife Assurance Company of Canada. AEGON Canada's major reinsurers are Munich Re, RGA and Swiss Re. The major reinsurers of AEGON UK include GE Frankona, Munich Re, RGA, Swiss Re and XL Re. The major reinsurers for life insurance for AEGON The Netherlands is Swiss Re and for non-life insurance are Munich Re, Partners Re and Swiss Re. The major reinsurers of AEGON Hungary for non-life are Swiss Re, Munich Re and Hannover Re and for life insurance are Munich Re and RGA. AEGON Spain's major reinsurers are General Re, Nacional de Reaseguros, Scor Life, RGA and Swiss Re. AEGON Taiwan's major reinsurers are Swiss Re, Hannover Re, General Re and the local Central Reinsurance Corporation. AEGON China's major reinsurers are General Re, Munich Re and Swiss Re.

Reinsurance may not be available, affordable or adequate to protect us against losses.

As part of our overall risk and capacity management strategy, we purchase reinsurance for certain risks underwritten by our various business segments. Market conditions beyond our control determine the availability and cost of the reinsurance protection we purchase. Accordingly, we may be forced to incur additional expenses for reinsurance or may not be able to obtain sufficient reinsurance on acceptable terms, which could adversely affect our ability to write future business.

AEGON may have difficulty managing its expanding operations and AEGON may not be successful in acquiring new businesses or divesting existing operations.

In recent years we have made a number of acquisitions and divestitures around the world and may make further acquisitions and divestitures in the future. Growth by acquisition involves risks that could adversely affect our operating results and financial condition. These include the potential diversion of financial and management resources from existing operations, difficulties in assimilating the operations, technologies, products and personnel of the acquired company, significant delays in completing the integration of acquired companies, the potential loss of key employees or customers of the acquired company, potential losses from unanticipated litigation, and tax and accounting issues.

Our acquisitions could result in additional indebtedness, costs, contingent liabilities and impairment expenses related to goodwill and other intangible assets. In addition, they may divert management's attention and other resources. Divestitures of existing operations could result in us assuming or retaining certain contingent liabilities. All of the foregoing could adversely affect our businesses, results of operations and financial condition. Future acquisitions may also have a dilutive effect on the ownership and voting percentages of existing shareholders. There can be no assurance that we will successfully identify suitable acquisition candidates or that we will properly value acquisitions made. We are unable to predict whether or when any prospective acquisition candidate will become available or the likelihood that any acquisition will be completed once negotiations have commenced.

Catastrophic events, which are often unpredictable by nature, could result in material losses and abruptly and significantly interrupt AEGON's business activities.

Our operating results and financial position can be adversely affected by volatile natural and man-made disasters such as hurricanes, windstorms, earthquakes, terrorism, riots, fires and explosions. Over the past several years, changing weather patterns and climatic conditions have added to the unpredictability and frequency of natural disasters in certain parts of the world and created additional uncertainty as to future trends and exposure. Generally, we seek to reduce our exposure to these events through individual risk selection, monitoring risk accumulation and purchasing reinsurance. However, such events could lead to considerable financial loss to our business. Furthermore, natural disasters, terrorism and fires could disrupt our operations and result in significant loss of property, key personnel and information about our clients and us. If our business continuity plans have not included effective contingencies for such events they could adversely affect our business, results of operations, corporate reputation and financial condition for a substantial period of time.

We regularly develop new financial products to remain competitive in our markets and to meet the expectations of our clients. If clients do not achieve expected returns on those products, we may be confronted with legal claims, pressure groups and negative publicity.

We may face claims from customers and adverse negative publicity if our products result in losses or fail to result in expected gains, regardless of the suitability of products for customers or the adequacy of the disclosure provided to customers by us and by the intermediaries who distribute our products. New products that are less well understood and that have less of a historical performance track record may be more likely to be the subject of such claims. Any such claims could have a materially adverse effect on our results of operation, corporate reputation and financial condition.

Edgar Filing: AEGON NV - Form 20-F

Our operations support complex transactions and are highly dependent on the proper functioning of information technology and communication systems. Any failure of AEGON's information technology or communications systems may result in a material adverse effect on our results of operations and corporate reputation.

Table of Contents

While systems and processes are designed to support complex transactions and to avoid systems failure, fraud, information security failures, processing errors and breaches of regulation, any failure could lead to a materially adverse effect on our results of operation and corporate reputation. In addition, we must commit significant resources to maintain and enhance our existing systems in order to keep pace with industry standards and customer preferences. If we fail to keep up-to-date information systems, we may not be able to rely on accurate information for product pricing, risk management and underwriting decisions.

Inadequate or failed processes or systems, human factors or external events could adversely affect our profitability, reputation or operational effectiveness.

Operational risk is inherent in our business and can manifest itself in many ways including business interruption, poor vendor performance, information systems malfunctions or failures, regulatory breaches, human errors, employee misconduct, and/or internal and external fraud. These events can potentially result in financial loss, harm to our reputation and hinder our operational effectiveness. Management attempts to control these risks and keep operational risk at appropriate levels by maintaining a well-controlled environment and sound policies and practices. Notwithstanding these control measures, however, operational risk is part of the business environment in which we operate and a function of our size as well as our geographic diversity and the scope of the businesses we operate. Our risk management activities cannot anticipate every economic and financial outcome or the specifics and timing of such outcomes. We may incur losses from time to time due to these types of risks.

Table of Contents

ii Risks relating to AEGON's common shares

Our share price could be volatile and could drop unexpectedly making it difficult for investors to resell our common shares at or above the price paid.

The price at which our common shares trade will be influenced by a large number of factors, some of which will be specific to AEGON and its operations and some of which will be related to the insurance industry and equity markets in general. As a result of these factors, investors may not be able to resell their common shares at or above the price paid for them. In particular, the following factors, in addition to other risk factors described in this section, may have a material impact on the market price of AEGON's common shares:

Investor perception of AEGON as a company;

Actual or anticipated fluctuations in AEGON's revenues or operating results;

Announcement of intended acquisitions, disposals or financings, speculation about such acquisitions, disposals or financings;

Changes in AEGON's dividend policy, which could result from changes in AEGON's cash flow and capital position;

Sales of blocks of AEGON's shares by significant shareholders, including Vereniging AEGON;

A downgrade or rumored downgrade of AEGON's credit or financial strength ratings, including placement on credit watch;

Potential litigation involving AEGON or the insurance industry in general;

Changes in financial estimates and recommendations by securities research analysts;

Fluctuations in capital markets including foreign exchange rates, interest rates and equity markets;

The performance of other companies in the insurance sector;

Regulatory developments in the Netherlands, the United States, Canada, the United Kingdom and Other Countries;

International political and economic conditions, including the effects of terrorist attacks, military operations and other developments stemming from such events and the uncertainty related to these developments;

News or analyst reports related to markets or industries in which AEGON operates; and

Edgar Filing: AEGON NV - Form 20-F

General insurance market conditions.

The high and low prices of AEGON's common shares on Euronext Amsterdam were EUR 15.56 and EUR 12.17 respectively in 2006 and EUR 16.06 and EUR 11.46 respectively in 2007. The high and low sales prices of our common shares on the NYSE were USD 18.97 and USD 15.24 respectively in 2006 and USD 21.90 and USD 16.75 respectively in 2007. All share prices are closing prices.

AEGON and its significant shareholders may offer (additional) common shares in the future, and these and other sales may adversely affect the market price of the outstanding common shares.

It is possible that AEGON may decide to offer additional common shares in the future, for example, to effect an acquisition. In connection with Vereniging AEGON's refinancing in September 2002, it entered into an equity repurchase facility (Repo Facility) and a back-up credit facility (Back-up Facility) (both facilities were updated in April 2005). As is customary in these repurchase agreements, if sufficient collateral is not maintained by Vereniging AEGON (which in this case is based on the number of common shares and the prevailing share price) and amounts are not available under the Back-up Facility, the lenders under the Repo Facility may dispose of our common shares held by them under the Repo Facility in order to satisfy amounts outstanding. An additional offering of common shares by us, sales of common shares by significant shareholders or by lenders to Vereniging AEGON, or the public perception that an offering or such sales may occur, could have an adverse effect on the market price of our common shares. As of December 31, 2007, the total authorized share capital of AEGON consisted of 3,000,000,000 common shares, par value euro 0.12 per share, and 1,000,000,000 preferred shares A and B, par value euro 0.25 per share. All our outstanding common shares are freely tradable, and all shareholders, including large shareholders such as Vereniging AEGON, are free to resell their shares at any time.

Vereniging AEGON, AEGON's major shareholder, holds a large percentage of the voting shares and therefore has significant influence over AEGON's corporate actions.

Prior to September 2002, Vereniging AEGON, beneficially owned approximately 52% of the voting shares and thus held voting control over AEGON. In September 2002, Vereniging AEGON reduced its beneficial ownership to approximately 33% of the voting shares (excluding issued common shares held in treasury by AEGON). Pursuant to the 1983 Merger Agreement between AEGON and Vereniging AEGON, as amended, in case of an issuance of shares by AEGON, Vereniging AEGON may purchase as many class B preferred shares as would enable it to prevent or correct a dilution to below its actual percentage of the voting shares, unless Vereniging AEGON as a result of exercising these option rights would increase its voting power to more than 33%. The option granted to Vereniging AEGON permits it to purchase class B preferred shares up to a maximum of the non-issued part of the class B preferred shares included from time to time in AEGON's authorized capital if necessary to prevent or correct such dilution. The class B preferred shares would then be issued at par value (euro 0.25), unless a higher price is agreed. In the years 2003 through 2006 29,290,000 class B preferred shares were issued under these option rights. In 2007, Vereniging AEGON exercised its option rights to purchase in aggregate 5,880,000 class B preferred shares at par value to correct dilution caused by AEGON's stock dividend issuances during the year.

Table of Contents

In addition, we have implemented certain changes to our corporate governance structure and the relationship with Vereniging AEGON pursuant to which Vereniging AEGON has voluntarily waived its right to cast 25/12 vote per class A or class B preferred share. Consequently, under normal circumstances Vereniging AEGON's voting power, based on the current numbers of outstanding and voting shares, is reduced to approximately 23.94% of the votes exercisable in the General Meeting of Shareholders. However, this reduction in voting percentage is not applicable in all circumstances. In certain limited circumstances at the sole discretion of Vereniging AEGON (such as the acquisition of 15% of the voting shares, a tender offer for shares or a proposed business combination, each by any person or group of persons whether individually or acting as a group, other than in a transaction approved by the Executive Board and Supervisory Board), Vereniging AEGON's voting rights for a limited period of 6 months, will increase to a percentage that currently amounts to 34.02%. Consequently, Vereniging AEGON may have substantial influence on the outcome of corporate actions requiring shareholder approval, including:

Adopting amendments to the Articles of Incorporation;

Adopting the annual accounts;

Approving a consolidation or liquidation;

Approving a tender offer, merger, sale of all or substantially all of the assets or other business combination;

In particular during the periods when Vereniging AEGON is entitled to exercise its increased voting rights, it will generally have sufficient voting power to veto certain decisions presented to the General Meeting of Shareholders, including any proposal relating to the following matters:

- (1) Rejecting binding Supervisory Board nominations for membership on the Supervisory Board and Executive Board;
- (2) Appointing an Executive Board or Supervisory Board member other than pursuant to Supervisory Board nomination; and
- (3) Suspending or removing an Executive Board or Supervisory Board member other than pursuant to a Supervisory Board proposal.

Currency fluctuations may adversely affect the trading prices of AEGON's common shares and the value of any cash distributions made.

Because our common shares listed on Euronext Amsterdam are quoted in euros and our common shares listed on the New York Stock Exchange (NYSE) are quoted in US dollars, fluctuations in exchange rates between the euro and the US dollar may affect the value of AEGON shares. In addition, we declare cash dividends in euros, but pay cash dividends, if any, on our New York Shares in US dollars based on an exchange rate set the business day following the shareholder meeting approving the dividend. As a result, fluctuations in exchange rates may affect the value of any cash dividends paid.

Convertible securities (or other securities that permit or require AEGON to satisfy its obligations by issuing common shares) that AEGON may issue could influence the market price for AEGON's common shares.

Any market that develops for convertible securities or other securities that permit or require us to satisfy obligations by issuing common shares that we have issued or may issue in the future would be likely to influence, and be influenced by, the market for AEGON's common shares. For example, the price of AEGON's common shares could become more volatile and could be depressed by investors' anticipation of the potential resale in the market of substantial amounts of AEGON's common shares received at the maturity. Our common shares could also be depressed by the acceleration of any convertible securities (or other such securities) that AEGON has issued by investors who view such convertible securities (or other such securities) as a more attractive means of participation in AEGON's equity. Negative results could also be produced by hedging or arbitrage trading activity that may develop involving such convertible securities (or other such securities) and AEGON's common shares. Any

such developments could negatively affect the value of AEGON's common shares.

Table of Contents

ITEM 4. INFORMATION ON THE COMPANY

4A History and development of the AEGON Group

i General

AEGON N.V., domiciled in the Netherlands, is a limited liability stock company organized under Dutch law.

AEGON N.V. was formed in 1983 through the merger of AGO and Ennia, both of which were successors to insurance companies founded in the 1800 s.

AEGON N.V., through its member companies that are collectively referred to as AEGON or the AEGON Group, is one of the world's largest listed life insurance and pension companies as ranked by market capitalization and assets on December 31, 2007 (source: Bloomberg). AEGON is headquartered in the Netherlands and employs, through its subsidiaries, about 30,000 people worldwide. AEGON's common shares are listed on stock exchanges in Amsterdam (Euronext), New York (NYSE), London and Tokyo.

AEGON's businesses focus on life insurance, pensions, savings, and investment products. The AEGON Group is also active in accident, supplemental health, general insurance, and some limited banking activities. AEGON N.V. is a holding company. The operations described above are conducted through operating subsidiaries.

AEGON's established markets are the United States, the Netherlands and the United Kingdom. In addition, AEGON is present in over 20 other markets in the Americas, Europe and Asia.

AEGON encourages product innovation and fosters an entrepreneurial spirit within its businesses. New products and services are developed by local business units with a continuous focus on cost control. AEGON uses a multi-brand, multi-channel distribution approach to meet its customers' needs.

The AEGON Group has the following reportable geographic segments: the Americas (which include the United States, Canada and Mexico), the Netherlands, the United Kingdom and Other Countries, which includes Hungary, Spain, Taiwan, China, Poland, India and a number of other countries with smaller operations.

For information on our business segments, see Note 18.4 Segment Information, to our financial statements in Item 18 of this Annual Report. The business activities of our principal subsidiaries are more fully described within the country sections that follow.

Our headquarters are located at:

AEGONplein 50

PO Box 85

2501 CB The Hague

The Netherlands

Telephone number: +31.70.344.3210

Internet site: www.aegon.com

Table of Contents

ii Strategic framework

Commitment to core business

AEGON believes that by focusing on what it does best it can provide lasting value for customers and shareholders alike. AEGON remains focused on three core markets: life insurance, pensions and other long-term savings and investment products.

Serving local needs with global resources

AEGON stresses the importance of combining local management and local decision-making with the expanding resources of one of the world's leading life insurance and pension companies.

Pursuing sustainable, profitable growth

AEGON believes its core markets will deliver significant growth in the years ahead. But it wants that growth to be sustainable and profitable. AEGON's aim is to achieve long-term average earnings growth of 10 percent a year.

Aiming to be a market leader

Whatever business it is in and wherever that business is located, AEGON strives always to be a market leader. This is essential to realize benefits of scale and to attract and retain talented managers and strong local business partners.

Expand into new, high-growth markets

AEGON wants to strengthen its international presence by expanding into new markets that offer prospects for profitable, above-average, long-term growth. To achieve this, the Group seeks out opportunities both to grow existing businesses and branch out into new areas through carefully selected acquisitions and partnerships.

Table of Contents
iii Recent developments and capital expenditures and divestments

Taishin Financial Holding Co. Ltd. (Taishin) and AEGON N.V. (AEGON) have finalized a joint venture agreement to develop and distribute life insurance and pension products in Taiwan. The joint venture is expected to be operational by mid-2008, subject to final approval by regulatory authorities. Under the terms of a memorandum of understanding signed earlier this year, Taishin will hold 51% of the joint venture and AEGON the remaining 49%. The joint venture will distribute life insurance and pension products through Taishin's nationwide distribution network of 200 business locations, belonging to Taishin Bank, Taiwan Securities, Taishin Insurance Agency and Taishin Insurance Brokers. AEGON has also acquired an interest of approximately 2.5% in Taiwan's Chang Hwa Bank from Taishin.

In December 2007, AEGON USA acquired 100% of the shares of Merrill Lynch Life Insurance Company and ML Life Insurance Company of New York, companies that sell non-participation life insurance and annuity products such as variable life insurance, variable annuities, market value adjusted annuities and immediate annuities. The total purchase price amounted to EUR 849 million cash consideration. The opening balance sheet of the acquired business was recorded provisionally at December 31, 2007, as the acquisition occurred within a few days of year end. The provisionally determined opening balance sheet includes total assets of EUR 10.8 billion, including EUR 8.3 billion separate account assets, EUR 1.8 billion general account investments and EUR 149 million cash and cash equivalents. Total liabilities are EUR 9.9 billion and comprise separate account liabilities of EUR 8.3 billion and insurance contract liabilities of EUR 1.7 billion. Goodwill amounts to EUR 111 million reflecting the expected profitability of new business. The carrying amount of the assets and liabilities of the acquired companies amounted to EUR 10.8 billion and EUR 9.9 billion respectively, the estimated fair values are subject to adjustment at the initial allocation for a one year period as more information relative to the fair values as of the acquisition date become available. As the acquisition was completed at the end of December, the net income of the acquired operations was not material to the AEGON's consolidated net income. Had the acquisition taken place on 1 January 2007, the contribution of these companies to the Group's net income is estimated at EUR 75 million; contribution to revenues would have been approximately EUR 271 million.

In November 2007 AEGON announced that, in line with the share repurchase program announced on August 9, 2007, the EUR 1 billion program had been completed. The total number of common shares repurchased under the EUR 1 billion program was 74,569,902 shares. This represented 4.6% of AEGON's issued and outstanding common shares and 4.0% of AEGON's total issued and outstanding share capital. The common shares were repurchased at an average price of EUR 13.4102

In July 2007 AEGON announced an agreement to establish a jointly owned bancassurance partnership with the Spanish savings bank Caja de Ahorros de Santander y Cantabria (CAJA CANTABRIA). The new partnership will sell AEGON life insurance and pension products through CAJA CANTABRIA's network of branches, located primarily in the northern Spanish province of Cantabria (Santander). The agreement will further strengthen AEGON's bancassurance capabilities in Spain's rapidly growing life insurance and pension markets, and will allow CAJA CANTABRIA to extend the range of products it is able to offer its customers. The agreement will complement AEGON's existing partnerships in Spain with Caja de Ahorros del Mediterráneo, Caja de Ahorros y Monte de Piedad de Navarra and Caja de Badajoz. With this latest agreement, AEGON now has access to almost 1,800 bank branches across Spain.

In June 2007 AEGON-CNOOC Life Insurance Company Ltd., AEGON N.V.'s 50/50 joint venture with the Chinese National Offshore Oil Corporation (CNOOC), has received a license from the China Insurance Regulatory Commission (CIRC) to begin life insurance activities in the country's eastern Zhejiang province.

In June 2007 AEGON acquired OPTAS N.V., a Dutch life insurance company specializing in employee benefit products and services within the Dutch group pension market for EUR 1.5 billion. OPTAS N.V., the successor of Stichting Pensioenfonds voor de Vervoer- en Havenbedrijven (a pension fund for companies active in the transport and port industries) was converted into a public company in 1997. At the end of 2006, OPTAS had 60,000 policyholders and reported total gross written premiums of EUR 86 million, with total assets of EUR 4.5 billion. Assets held as investment amounted to EUR 3.4 billion, the insurance liabilities were EUR 2.9 billion. A portion of the shareholders' equity of OPTAS is subject to restrictions as set out in the articles of association of the company. These restrictions assure continued fulfillment of existing policy obligations and will remain in force after the acquisition. Since the acquisition, OPTAS has contributed EUR 11 million to AEGON's income before tax. Had the acquisition taken place on 1 January 2007, OPTAS' contribution to the Group's net income is estimated at EUR 22 million, contribution to revenues would have been approximately EUR 251 million.

In May 2007 AEGON and China's Industrial Securities agreed to establish an asset management joint venture. Under the agreement, AEGON will acquire a 49% interest in Industrial Fund Management Company (IFMC), a Chinese mutual fund manager with approximately EUR 1.7 billion in assets under management. Industrial Securities, one of China's leading securities companies, will retain the remaining 51% of IFMC. The transaction will be submitted to the China Securities Regulatory Commission for approval and is subject to normal closing requirements. The new partnership with Industrial Securities and the stake in IFMC represent an excellent opportunity for AEGON in entering the asset management market in China. The joint venture also offers Industrial Fund Management Company the possibility to extend its activities into the pension market.

Table of Contents

In May 2007 AEGON signed an agreement to merge its Polish pension fund management company PTE Ergo Hestia SA with BRE Bank's PTE Skarbiec-Emerytura SA. Under the agreement, BRE Bank has granted AEGON an option to acquire BRE Bank's shareholding in the combined pension fund, once the merger process is complete. The purchase price shall be approximately EUR 100 million, increased by the net current asset value of PTE Skarbiec-Emerytura, the exact amount of which shall have been determined at the time of the merger of the companies. Together, PTE Ergo Hestia and PTE Skarbiec-Emerytura will become the fifth largest pension fund management company in Poland, with a market share of approximately 5 percent. Combined, the two funds have more than 800,000 members and nearly EUR 1.7 billion assets under management. The agreement between AEGON and BRE Bank is subject to approval from the Polish regulators.

In March 2007, AEGON USA completed the acquisition of 100% of the shares of Clark Inc., a public company specializing in the sale of corporate-owned life insurance, bank-owned life insurance and other benefit programs. The total purchase price was EUR 263 million, consisting of EUR 207 million cash consideration, EUR 36 million of Clark debt assumed by AEGON and EUR 20 million cost basis of Clark common stock already owned by AEGON and transaction costs. Since the acquisition date, Clark has contributed EUR 4.6 million to the net income of AEGON. If the acquisition had taken place as of January 1, 2007, Clark would have contributed an amount of EUR 90 million to total revenues and EUR 4.7 million to net income of AEGON USA. AEGON has disposed operations for an amount of EUR 42 million regarding Clark business, not considered to be core to AEGON, to Clark's former management after the acquisition. As a result of the acquisition, assets and liabilities were recognized for EUR 549 million and EUR 325 million respectively, which included a cash position of EUR 14 million. Goodwill was recognized for an amount of EUR 84 million, reflecting the future commission revenue from inforce contracts. In addition an intangible asset was established for the present value of future commission receivables in the amount of EUR 365 million.

In March 2007, AEGON has completed the acquisition of the Polish pension fund management company PTE Ergo Hestia S.A. The company was renamed to PTE AEGON Poland. The cost of the acquisition amounted to EUR 72 million, which was paid in cash. Since the acquisition date, the company has contributed EUR 2 million to net income. If the acquisition had been as of January 1, 2007, contribution to net income and total revenues would amount to respectively EUR 3 million and EUR 12 million. Assets of EUR 81 million and liabilities of EUR 9 million were recognized due to the acquisition. Goodwill amounting to EUR 23 million reflects the future new business to be generated and potential synergies with existing businesses. By December 31, 2007 the accounting for PTE Ergo Hestia S.A. was not yet finalized.

4B Business overview

i Supervision

Individual companies in the AEGON Group are each subject to solvency supervision in their respective home countries. Based on European Union legislation (Directive 98/79/EC) adopted in 1998, the supervisory authority in the Netherlands (De Nederlandsche Bank, or DNB) is required, as a lead supervisor, to carry out supplementary supervision. The supplementary supervision of insurance companies in an insurance group enables the lead supervisors to make a detailed assessment of the financial position of the insurance companies that are part of that group. The Directive requires DNB to take into account the relevant financial affiliations between the insurance companies and other entities in the group. In this respect, AEGON is required to submit reports to DNB twice a year setting out all the significant transactions and positions between insurance and non-insurance companies in the AEGON Group.

Both the insurance and banking companies in the AEGON Group are required to maintain a minimum solvency margin based on local requirements. The required solvency margin is the sum of the margins of each of AEGON's insurance and banking subsidiaries, based on the requirements of European directives. Available liability capital includes shareholders' equity, capital securities, and subordinated loans.

Table of Contents

The Americas

1.1 Background

AEGON Americas comprises AEGON USA, AEGON Canada as well as the Group's operations in Mexico.

AEGON USA

AEGON USA¹ is one of the leading life insurance organizations in the United States and the largest of AEGON's country units. AEGON USA has more than twenty million customers and employs over 13,000 people. AEGON USA companies can trace their roots back as far as the mid-nineteenth century. AEGON USA includes some of the best known names in the US insurance business, including Transamerica and Monumental Life. AEGON USA's main offices are in Cedar Rapids, Iowa, and Baltimore, Maryland, but with many associate companies' offices located throughout the United States.

Through these subsidiaries and associate companies, AEGON USA provides a wide range of life insurance, pensions, long-term savings, investment and reinsurance products. In addition, AEGON USA has a significant asset management business, with almost USD 129 billion invested in bonds, equities, home loans, cash and treasuries.

Like other AEGON companies around the world, AEGON USA uses a variety of distribution channels to ensure customers can access the group's products in a way that best suits them. For many years, AEGON USA has had close relations with banks across the United States, but the group also distributes products and services via agents, brokers, dealers and specialized financial advisors, online as well as through direct and worksite marketing.

AEGON Canada

Based in Toronto, AEGON Canada offers a range of insurance products and financial services, primarily through its Transamerica Life Canada subsidiary, first established in 1927. Total employment of AEGON Canada on December 31, 2007 was 720.

AEGON Mexico

In 2006, AEGON acquired a 49 percent interest in Seguros Argos, one of Mexico's life insurance companies. As part of their joint venture, AEGON and Seguros Argos set up a jointly owned pension fund management company, Afore Argos.

1.2 Organizational structure

AEGON USA

AEGON USA, Inc., is a principal holding company of AEGON USA. AEGON USA was founded in 1989 when AEGON decided to bring all its operating companies in the United States under a single financial services holding company. Business is conducted through subsidiaries of two holding companies – AEGON USA, Inc. and Commonwealth General. AEGON has operating licenses in every US state, the District of Columbia, Puerto Rico, the Virgin Islands and Guam.

AEGON USA's primary insurance subsidiaries are:

Transamerica Life Insurance Company

Transamerica Occidental Life Insurance Company

Transamerica Financial Life Insurance Company

Life Investors Insurance Company of America

Monumental Life Insurance Company

Stonebridge Life Insurance Company

Stonebridge Casualty Insurance Company

Western Reserve Life Assurance Co. of Ohio.

AEGON's subsidiary companies in the United States contain four operating groups acting through one or more of the AEGON USA life insurance companies: Agency, Direct to Consumer, Institutional, and Pension and Asset Management.

AEGON USA companies are present in five main lines of business:

Life and protection

Individual savings and retirement

Pensions and asset management

Institutional

Reinsurance

These lines of business, which are described in further detail below, represent groups of products that are sold through our operating groups to the various distributions and sales channels. The group structure is designed to enable AEGON USA to manage the organization efficiently, to identify business synergies, to pursue cross-selling opportunities, and to improve operating efficiencies. Coordinated support services complement operations by providing functional support in systems technology, investment management, regulatory compliance, and various corporate functions. Products are offered and distributed through one or more of the AEGON USA licensed insurance or brokerage subsidiary companies.

¹ Throughout this report, "AEGON USA" refers to AEGON companies managed from the United States. Similarly, "AEGON Canada" refers to all AEGON companies operating in Canada. AEGON's operations in North America—the United States, Canada and Mexico—are referred to collectively as AEGON Americas.

Table of Contents

AEGON Canada

AEGON Canada's main operating subsidiaries are:

Transamerica Life Canada

Money Concepts (Canada) Ltd.

AEGON Dealer Services Inc.

AEGON Capital Management Inc.

AEGON Fund Management Inc.

AEGON Mexico

In Mexico, AEGON has a 49 percent interest in:

Seguros Argos S.A. de C.V.

Afore Argos S.A. de C.V.

1.3 Overview sales and distribution channels

1.3.1 AEGON USA

As in other countries, AEGON uses a variety of sales and distribution channels in the United States. These include:

independent and career agents

financial planners

registered representatives

independent marketing organizations

banks

regional and independent broker-dealers

benefit consulting firms

wirehouses

affinity groups

institutional partners

In addition, AEGON USA provides a range of products and services online and uses direct and worksite marketing. This approach allows AEGON USA customers to access products and services in a way that best suits them. Generally, AEGON USA companies are focused on particular products or market segments, ranging from lower income to high net worth individuals and large corporations.

AEGON USA has distribution agreements in place with a network of banks across the United States, giving the company access to millions of potential customers, particularly for individual savings, pension and retirement products as well as some institutional products. AEGON USA works closely with banks across the country to ensure its products are tailored to the individual and changing needs of the company's customers.

1.3.2 AEGON Canada

AEGON Canada uses a variety of sales channels to distribute its products and services, including, most notably, independent financial advisors. Other channels are:

independent general agencies

agencies owned by Transamerica Life Canada and operated as separate profit centers

bank-owned national broker-dealers

World Financial Group (WFG), part of AEGON Americas

other national, regional or local niche broker-dealers

1.4 Overview lines of business

1.4.1 United States

1.4.1.1 Life and protection

General description

AEGON USA provides permanent life, universal life, term life and variable universal life insurance and protection products. A number of subsidiaries offer life insurance products tailored to a specific segment of the US market. In 2007, Life and Protection accounted for more than 46 percent of AEGON USA's overall pre-tax operating earnings, making it the company's single most important line of business.

Table of Contents

Products

Permanent life

Permanent life insurance provides life-long financial protection. Most permanent policies have a cash value feature with implicit minimum interest rate guarantees prescribed by statutory requirements of between 4% and 5%. A customer may either withdraw the cash value, subject to withdrawal charges, or receive the benefit upon a predetermined event, such as the death of the insured.

Permanent life insurance is also known as whole life insurance in the United States. It can be participating or non-participating. Premiums are generally fixed and are payable over the life of the policy or for a limited time period. Participating policies allow the policyholder to receive policy dividends, as declared by the insurer's board of directors. These dividends are not guaranteed and are based on the insurer's experience for a given class of policies.

Universal life

Universal life insurance has either a flexible or single premium. The contract has a feature that allows the customer greater flexibility as to when to pay premiums and with regard to the amount of the premiums, subject to a minimum and a maximum. The interest rate at which the cash value accumulates is adjusted periodically.

Minimum interest rate guarantees exist in all generations of fixed universal life products, as they are required by non-forfeiture regulations. These are mostly at 4%, with newer products at 3%. No lapse guarantees were introduced in recent universal life products. The no lapse guarantee feature provides a policyholder the guarantee that the universal life policy will stay in force, even if the cash value becomes zero or less than zero, provided that a specified minimum premium payment is made when due or a shadow account remains positive. The guarantee period can vary from five years to the entire contract term.

Equity indexed universal life products have both interest rate guarantees of between 1 and 2% and equity index return guarantees, with a cap currently around 12%.

Term life insurance

Term life insurance provides protection for a certain period of time and allows the customer to select the duration of coverage and the amount of protection. The policy pays death benefits only if the customer dies during the specified term. Most term life policies do not accumulate a cash value. The policies can usually be renewed upon expiration and premiums normally increase upon renewal. Certain term life insurance products sold in the United States, such as mortgage insurance and credit life insurance, provide a death benefit that decreases over the term period, based on a stated method. The rate of decrease usually corresponds with the decrease in the principal balance of the loan. Some term life insurance products include a cash value feature designed to return premiums after a specified number of years.

Variable universal life

Variable universal life products in the United States are similar to universal life products, but include investment options and maintenance of investments for the account of policyholders. Some products contain minimum death benefit guarantees and the risk is that poor market performance may erode the policyholder account value to the extent that available cost of insurance charges prove inadequate. The fixed account has a minimum guaranteed interest rate of either 3% or 4% depending on the product. Newer products have a 2% guarantee. This product also contains a no lapse guarantee, which is an equity option. Under the no lapse guarantee, the contract is guaranteed to remain in force regardless of the level of underlying account value, provided the policyholder continues to meet minimum premium requirements. The value of this guarantee increases with higher cost of insurance charges and with lower minimum required premiums. This product is not sensitive to equity returns until the no lapse guarantee threshold is breached.

Other life

Life products also include life insurance sold as part of defined benefit pension plans, endowment policies, post-retirement annuity products and group risk products.

Health

Edgar Filing: AEGON NV - Form 20-F

AEGON USA offers accident, critical illness, cancer treatment, hospital indemnity and short-term disability policies. Some of these plans provide lump sum or specified income payments when hospitalized, disabled or diagnosed with a critical illness. Others pay scheduled benefits for specific hospital or surgical expenses and cancer treatments, hospice care and cover deductible, as well as co-payment amounts not covered by other health insurance.

Long Term Care (LTC) insurance products offered through the Long Term Care Division provide benefits to policyholders who require care due to chronic illness or cognitive impairment. Unexpected expenses associated with long term care may create an emotional and/or financial burden to individuals and families. LTC insurance may help to protect the insured's income and retirement savings and help a family better manage health, safety and financial issues associated with the need for LTC.

Table of Contents

Sales and distribution

Monumental Life Division targets chiefly the lower and middle-income market, essentially through three sales channels: independent marketing organizations (IMOs), Career Agency and Pre-Need². In 2006, Monumental Life Division expanded its final expense and funeral costs coverage for middle-income customers to the growing seniors markets, providing a range of simplified products with face values of up to USD 25,000. During 2007, Monumental Life Division added Humana Marketpoint as an IMO with over 1,000 licensed agents bringing the total IMO Final Expense licensed agents count to more than 2,500.

Independent Marketing Organizations have experienced strong growth in recent years, both in terms of their sales and their recruitment. IMOs focus on developing and strengthening relations between Monumental Life Division and the company's general agents throughout the United States. As part of the IMO sales channel, Monumental Life Division has approximately 500 general agents selling products and services predominantly life insurance to military families living on or near US armed forces bases both in the United States and abroad. Typically, agents have served in the US military.

Career Agency, part of Monumental Life Division, has almost 2,400 agents (including 400 managers) across 22 states, providing direct face-to-face sales and other services to policyholders.

Acting through marketing unit Transamerica Insurance and Investment Group, Transamerica Occidental Life Insurance Company (TOLIC) focuses on the upper-middle and affluent markets. In addition, TOLIC has a number of products and services designed for more specific niche markets, including small and mid-sized companies.

Similarly, Life Investors career agents sell primarily interest-sensitive and ordinary life insurance to the middle to upper income segments of the US market.

World Financial Group (WFG) targets the middle-income market in the United States. WFG has a fully owned broker-dealer, World Group Securities Inc. In recent years, the US middle income market has offered substantial growth opportunities. Typically, middle-income households earn between USD 25,000 and USD 100,000 a year. Approximately 40 percent of such households do not currently have life insurance cover. This is largely because, over the past several years, insurance brokers have focused on higher net worth individuals while many US companies have switched money out of employee life insurance contributions and into healthcare to meet rapidly climbing medical bills.

Western Reserve Life has been part of AEGON Group since 1991. Western Reserve Life provides a range of life insurance products and variable annuities, chiefly to individual savers and investors.

Through Transamerica Worksite Marketing, AEGON offers voluntary payroll deduction life and supplemental health insurance for companies ranging in size from just five employees to more than 100,000. Products and services are marketed to employees at their place of work and are designed to supplement employees' existing benefit plans.

AEGON Direct Marketing Services (ADMS) develops direct response campaigns for life, supplemental health, and specialty insurance products and fee-based programs to serve people who prefer to buy through alternative marketing channels. ADMS makes extensive use of database technology, develops niche markets and designs products to meet specific customer requirements. Using a variety of direct response techniques such as direct mail, point-of-sale, statement inserts and the internet, ADMS offers customers convenient alternatives for purchasing insurance.

ADMS uses the endorsements of business partners such as leading financial institutions, educational institutions, credit unions, associations, retailers, travel agents, dealerships, and employer groups through brokers, agents, and third party administrators responding to each partner's unique needs and developing customized programs for that partner.

ADMS is also active in a number of markets outside the United States, with operations in Europe, Asia Pacific, and Latin America. In these regions, ADMS has established strong relations with various business partners, using their endorsement to market products via telemarketing and direct mail.

AEGON USA offers different products and services aimed at meeting the long-term healthcare needs of its customers, an increasingly important area as life expectancy rates in the United States continue to rise. AEGON USA primarily provides coverage for the cost of care either at home, in assisted living facilities or nursing homes. Sales of long-term care insurance were temporarily discontinued in 2005, but new sales efforts

began in 2007.

1.4.1.2 Individual savings and retirement

General description

AEGON USA offers a wide range of savings and retirement products, including mutual funds, investment advice as well as fixed and variable annuities. In 2007, the company's individual savings and retirement line of business accounted for 25% of AEGON USA's total pre-tax operating profit.

In 2007, AEGON acquired Merrill Lynch Life Insurance Company and ML Life Insurance Company of New York and finalized an agreement to form a strategic business relationship with Merrill Lynch in the areas of insurance and investment products. The inclusion of the Merrill Lynch insurance companies more than doubled AEGON's sales efforts in the wire channel, from USD 478 million to USD 1,038 million.

² Pre-Need sells life insurance policies designed to meet funeral costs. Pre-Need markets its products and services mainly through funeral directors and their agents.

Table of Contents

Products

Fixed annuities

Fixed annuities include both deferred annuities and immediate annuities. A fixed deferred annuity exposes AEGON to interest rate risk and lapse risk. The insurer interest rate risk can be mitigated through product design, close asset/liability management and hedging, though the effects of policyholder behavior can never be fully mitigated. Surrender charges in early policy years serve as a deterrent to early duration lapses. Fixed annuities sold in the United States contain significant interest rate and longevity risks created by guaranteed annuity options and most also offer waiver of account value surrender charges upon the death of the insured. Immediate annuities contain interest rate risk and also longevity risk if annuity payments are life contingent.

In the United States, AEGON sells group and individual fixed annuities and retirement plan contracts to large financial institutions. Group fixed annuities are purchased with a single premium that funds the annuities for a group of employees. The single premium includes a fee for the administrative services which are provided by AEGON after the annuities are sold.

An immediate annuity is purchased with a single lump sum premium payment and the benefit payments generally begin within a year after the purchase. The benefit payment period can be for a fixed period, for as long as the beneficiary is alive, or a combination of the two. Some immediate annuities and payout options under deferred annuities may also offer the owner or beneficiaries the option to surrender the annuity to have access to the account value if needed for unexpected events.

Fixed deferred annuity contracts may be purchased on either a flexible or single premium basis. Deferred annuities are offered on a fixed interest crediting method or indexed basis. The customer can surrender the annuity prior to maturity and receive the cash value less surrender charges. Fixed deferred annuities have a specified crediting rate that can be reset periodically at the company's discretion after an initial guarantee period. Fixed deferred annuity contracts in the United States also offer guaranteed minimum surrender values and payout options. Upon maturity of the annuity, the customer can select payout options, including a lump sum payment or income for life, as well as payment for a specified period of time. Should the customer die prior to receiving the benefits of the policy, the beneficiary receives either an accumulated cash value death benefit or an enhanced death benefit in the event there are benefit riders attached to the base contract. A discontinued multi-strategy annuity allows a customer a choice of investment strategies to allocate funds and provides a cumulative minimum guaranteed interest rate. Early withdrawal by the customer of the cash value of the annuity is subject to surrender charges. These surrender charges are generally not a large form of revenue as policyholder surrender rates are typically lower when a surrender charge penalty is still present. Any surrender charges collected are typically used to recoup unamortized deferred acquisition costs.

Minimum interest rate guarantees exist in all generations of deferred annuity products, as they are required by state non-forfeiture regulations. The majority of the in-force business has minimum interest rate guarantees of 3%. In general, products issued in 2003 and after offer 1.5% minimum interest rate guarantees. Equity indexed annuities offer additional returns that are indexed to S&P 500, with a minimum cash value equal to a percentage of the premium increased at a minimum rate that varies, and a cap on the return. The cap is reset periodically based on the cost of hedging instruments and is currently between 6.5% and 8%.

Besides the minimum interest rate guarantee, certain fixed deferred annuity products also offer a bailout provision. Under the bailout provision, if the crediting rate falls below the bailout rate, policyholders can surrender their contracts without incurring any surrender charges. The bailout provision serves as additional insurance to the customers during the surrender charge period.

A structured settlement is a form of an immediate annuity. AEGON USA no longer issues these contracts, but continues to administer the closed block of business. These contracts were typically purchased as a result of a lawsuit or a claim and the injured party receives special tax treatment. Rather than paying the injured party a lump sum, the payments were structured as a lifetime annuity with mortality risk, a period certain annuity, or a combination of both.

Variable annuities

Variable annuities are sold to individuals and pension funds in the United States.

Variable annuities allow a customer to provide for the future on a tax-deferred basis and to participate in equity or bond market performance. Variable annuities allow a customer to select payout options designed to help meet the customer's need for income upon maturity, including lump sum payment or income for life or for a period of time.

Edgar Filing: AEGON NV - Form 20-F

Premiums paid on variable annuity contracts are invested in underlying funds, including bond and equity funds. A fixed account may also be available on most products. In most products, the investment options are selected by a client based on the client's preferred level of risk. The assets and liabilities related to this product are legally segregated for the benefit of particular policyholders in separate accounts of the insurance company. These separate accounts are classified as investments for the account of policyholders. Various riders are available on variable annuity contracts, providing guaranteed minimum death, maturity, withdrawal or income benefits.

The account value of variable annuities reflects the performance of the funds. AEGON USA earns mortality and expense charges as well as various types of rider fees for providing various guarantees and benefits. This category includes segregated fund products offered by AEGON Canada. Surrender charges are generally not a large form of revenue as policyholder surrender rates are typically lower when a surrender charge penalty is still present. Any surrender charges collected are typically used to recoup unamortized deferred acquisition costs.

A guaranteed minimum withdrawal benefit is offered on some variable annuity products AEGON USA either issued or assumed from a ceding company. This benefit guarantees a policyholder can withdraw a certain percentage of the account value, starting at a certain age or duration, for either a fixed period or the life of the policyholder.

Certain variable insurance contracts also provide guaranteed minimum death benefits and guaranteed minimum income benefits. Under a guaranteed minimum death benefit, the beneficiaries receive the greater of the account balance or the guaranteed amount upon the death of the insured. The guaranteed minimum income benefit feature provides for minimum payments if the contractholder elects to convert to an immediate payout annuity. The guaranteed amount is calculated using the total deposits made by the contractholder, less any withdrawals and sometimes includes a roll-up or step-up feature that increases the value of the guarantee with interest or with increases in the account value. These benefits subject the company to equity market risk, since poor market performance can cause the guaranteed benefits to exceed the policyholder account value.

Table of Contents

AEGON USA undertakes to address equity market risk through product design and by using hedging strategies. Variable products also contain a degree of interest rate risk and policyholder behavior risk, which are handled similarly to those in fixed annuities.

Retail mutual funds

AEGON's fee business comprises products that generate fee income by providing management, administrative or risk services related to off balance sheet assets (i.e., equity or bond funds, third party managed assets and collective investment trusts). Fee income is mainly sensitive to shareholder withdrawals and equity market movements.

AEGON's operations in the United States provide various investment products and administrative services, individual and group variable annuities, mutual funds, collective investment trusts and asset allocation (retirement planning) services.

The operations in the United States provide the fund manager oversight for the Transamerica Funds. AEGON USA selects, manages, and retains affiliated and non-affiliated managers from a variety of investment firms based on performance. The manager remains with the investment company and acts as a sub-adviser for AEGON USA's mutual funds. AEGON USA earns investment management fees on these investment products. AEGON USA also earns direct investment management fees through affiliated managers acting as sub-advisers, which are reported in the pensions and asset management line of business.

Sales and distribution

AEGON USA underwrites fixed and variable annuities through its various life insurance companies. Transamerica Capital Inc., (TCI), an affiliated broker-dealer, distributes fixed and variable annuities, mutual funds and single premium life products through major wirehouse firms, regional broker dealers, independent financial planners and the large bank network. TCI serves these distribution channels through company owned and external wholesalers.

InterSecurities Inc., part of AEGON USA, provides a range of financial and investment products, operating as a broker-dealer. These products include mutual funds, fixed and variable life insurance annuities and other securities.

1.4.1.3 Pensions and asset management

General description

AEGON USA offers pensions and related products and services through a number of different outlets:

Diversified Investment Advisors

Transamerica Retirement Services

Transamerica Retirement Management

Transamerica Investment Management

Through these subsidiaries, AEGON USA provides a variety of individual and group pensions, as well as retirement planning, investment, administration and technical services.

In addition, AEGON USA covers a range of different pension plans, including:

401 (k)

403 (b)

457 (b)

Non-qualified deferred compensation

Money purchase

Defined benefit

Defined contribution

Profit-sharing

Single premium group annuity contracts

As elsewhere in the developed world, people in the United States are, generally, living longer, healthier lives. As a result, more people are having to manage their pension assets for longer periods of time. As the baby boomer generation – those people born at the end or shortly after the Second World War – enters retirement, this is leading to a fundamental shift in the US pension market. Previously, people focused on asset accumulation. Now, with more people over the age of 65, there is a dual focus – on both asset accumulation and on dissaving, in other words managing those assets productively and efficiently during retirement. Transamerica Retirement Management provides its customers with comprehensive life and retirement planning. Its services also include the retirement management account, a one-stop shop that allows customers easy and effective management of their investments, income needs and asset growth opportunities.

The USD 22 trillion asset management industry in the United States is considered by many to be in a state of significant change. Asset managers are facing increased pressure to provide products addressing the evolving needs of both institutional and retail investors ranging from increased pension liabilities and other risk-management strategies to the search for higher and more consistent returns. Transamerica Investment Management (TIM) offers a wide range of investment products and strategies to meet these changing needs. Investment products include growth and value equity, fixed income securities, balanced portfolios, convertible securities and alternative investments. Through various investment vehicles including mutual funds for both retail and institutional clients, separate accounts for foundations/endowments, corporate clients, public funds and union/Taft Hartley clients, and investment vehicles for the separately managed account and broker-dealer industry, TIM offers a wide base of products both inside and outside the pension community.

Table of Contents

Products

Pensions include individual pension business, 401(k) and similar products, typically sponsored by or obtained through an employer. It comprises products in the accumulation phase as well as in the pay-out phase. In addition, asset management includes products and services provided to third parties.

Bundled retirement plans are sold to mid-sized and large employers. A manager of managers investment approach can be used for the retirement plans market, which allows clients access to institutional investment managers across the major asset classes. These funds are generally available in a core-and-feeder structure, in which the core is similar to a mutual fund and the feeder provides an institutional customer with a choice of products that are directly linked to the performance of the mutual fund, such as a registered or non-registered variable annuity, a collective investment trust (off balance sheet) or mutual funds (off balance sheet). Clients also have the flexibility to use funds from mutual fund families.

Transamerica Retirement Services offers fully bundled and partially bundled retirement plan solutions to small and medium size employers. These plans are predominantly supported by a group variable annuity product, where plan assets are invested primarily in separate account funds offered, including bond and equity funds. A fixed account fund may also be available on most plans. The investment options are selected by the client or by the client's financial advisor.

Single premium group annuities (Terminal Funding) are a non-participating group annuity product. This product is usually used for an insurance company takeover of a terminating defined benefit pension plan. The company receives a single deposit from the contractholder and in return guarantees the payment of benefits to participants. Usually these annuity payments are paid monthly for the life of the participant or participant and spouse, commencing immediately for retired participants or at some date in the future for deferred participants.

TIM's products include growth and value equity, fixed income securities, balanced portfolios, convertible securities and alternative investment products.

Sales and distribution

Diversified Investment Advisors provides a comprehensive and customized approach to retirement plan management, catering to the mid- to large-sized defined contribution, defined benefit and non qualified deferred compensation retirement plans market. Diversified Investment Advisors' clients are generally organizations with 250 to 100,000 employees and between USD 5 million and USD 2 billion in retirement assets.

Transamerica Retirement Services, meanwhile, serves more than 14,500 small to mid-sized companies across the United States. Transamerica Retirement Services offers a number of specialized services, including innovative plan design, wide investment choice, personal finance education programs and advice in the US Employee Retirement Income Security Act.

Transamerica Retirement Services is also a leading provider of single premium group annuities (Terminal Funding) in the United States, which is used by companies to defuse the liability of their defined benefit plans. This is a growing market segment as more employers look to reduce the cost and complexity of their pension liabilities, often driven by widespread economic and sector restructuring.

In 2006, AEGON USA created Transamerica Retirement Management, a subsidiary specifically dedicated to helping millions of baby-boomers now entering retirement. Transamerica Retirement Management, which adopted the consumer-facing brand known as SecurePath by Transamerica, became fully operational in the second quarter of 2007 with a dedicated staff of trained financial advisors and a website.

TIM offers its extensive range of investment management services through multiple channels including retail mutual funds, investment consultants for institutional clients such as foundations/endowments, public funds, union and corporate organizations; separately managed account platforms for many of the major broker-dealers and high-net-worth private client wealth management. TIM manages approximately USD 24 billion in assets in mutual funds, fund of funds, retirement plans, separately managed accounts, institutional accounts, pension funds and variable insurance accounts.

1.4.1.4 Institutional

General description

AEGON USA has a significant position in the highly competitive and relatively mature US market for institutional products and offers a range of sophisticated, and highly specialized financial products for leading institutions such as banks and pension and investment funds. AEGON

Edgar Filing: AEGON NV - Form 20-F

USA first entered this market in the early 1980s, with a distinctive floating rate guaranteed investment contract. Since then, the company's institutional guaranteed products business has expanded significantly. AEGON USA now offers traditional fixed rate guarantee investment contracts (GICs), funding agreements (FAs) and medium-term notes as well as fee-based products such as synthetic GICs, in which AEGON USA has a leading market position.

In addition, AEGON USA enters into structured product transactions, such as credit default swaps, synthetic collateralized debt obligations, affordable housing tax credit guarantees and hedge fund principal protection. New sales for AEGON USA's settlement annuity business were discontinued in 2003.

AEGON USA also offers through the Extraordinary Markets division both fixed and variable products to the rapidly growing bank and corporate owned life insurance (BOLI-COLI) market in the United States. In early 2007, AEGON USA completed its acquisition of Clark Inc., a company specializing in the sale of bank and corporate owned life insurance. BOLI-COLI is marketed to institutional customers to help them fund long-term employee benefits such as executive compensation and post-retirement medical plans. AEGON has provided insurance products to the BOLI-COLI market for more than a decade.

Table of Contents

Products

GICs and FAs

GICs are generally issued to tax qualified plans, while FAs and medium-term notes are typically issued to non-tax qualified institutional investors. These products are marketed through an internal sales force in the United States and Ireland.

These spread-based products are issued on a fixed-rate or floating-rate basis and provide the customer a guarantee of principal and a specified rate of return. Practically all of the fixed-rate contracts are swapped to floating-rate via swap agreements and contracts issued in foreign currencies are swapped at issuance to US dollars to eliminate currency risk. Credited interest on floating-rate contracts predominately resets on a monthly basis to various market indices. The term of the contract can be fixed, generally from six months up to ten years, or it can have an indefinite maturity. Market-indexed contracts provide a return based on the market performance of a designated index, such as the S&P 500. Futures or swap contracts are used to hedge the market risk on market-indexed contracts and effectively convert such contracts to a floating-rate. Indeterminate-maturity contracts allow the customer to withdraw funds without a withdrawal penalty by providing the customer with a put option whereby the contract may be terminated with advance written notice. Historically, this advance notice period would range from 3 to 12 months, however, a decision was made to eliminate practically all contracts with advance notice periods shorter than 12 months. Other contracts offer benefit-responsive withdrawal rights to the customer, but these withdrawals cannot be for economic reasons. The account balances at December 31, 2007 consisted of fixed-rate, fixed-maturity contracts (45%); floating-rate, fixed-maturity contracts (40%) and indeterminate-maturity contracts (15%).

Medium-term notes

AEGON USA utilizes consolidated special purpose entities to issue medium-term notes that are backed by FAs. The proceeds of each note series are used to purchase a FA from an AEGON insurance company, which is used to secure that particular series of notes. The payment terms of any particular series substantially match the payment terms of the FA that secures that series. AEGON also sells fixed-rate AAA-wrapped municipal debt securities to consolidated special purpose entities, which issue floating-rate notes. AEGON receives residual income from these entities and provides certain guarantees to the noteholders in the event of early termination. In addition, AEGON utilizes consolidated special purpose entities to issue commercial paper, that is backed by the issuance of certain FAs.

AEGON Global Institutional Markets plc (AGIM) is domiciled in Ireland for the purpose of issuing medium-term notes to non-US investors and investing in a diversified portfolio of eligible assets with the proceeds of the issued notes. AEGON Financial Assurance Ireland Limited (AFA), another AEGON Ireland entity, provides a financial guarantee for the medium-term notes issued by AGIM.

Synthetic GICs

Synthetic GICs are sold in the United States primarily to tax-qualified institutional entities such as 401(k) plans and other retirement plans, as well as college savings plans. AEGON provides a synthetic GIC wrapper around fixed-income invested assets, which are owned by the plan and managed by the plan or a third party money manager. A synthetic GIC is typically issued with an evergreen maturity and is cancelable by the plan sponsor under certain conditions. Such a contract helps to reduce fluctuations in the value of the wrapped assets for plan participants and provides book value benefit-responsiveness in the event that qualified plan benefit requests exceed plan cash flows. The periodically adjusted contract crediting rate is the means by which investment and benefit responsive experience is passed through to participants. In certain contracts, AEGON agrees to make advances to meet benefit payment needs and earns a market interest rate on these advances.

Structured products

AEGON USA's Structured Products group leverages existing strengths in investments, product structuring and risk management, as well as strong institutional relationships. Structured products are generally synthetic transactions that exist to provide guarantees for the client. In these transactions, AEGON USA undertakes contingent purchases/payments in return for a premium.

BOLI/COLI

BOLI/COLI is sold to corporations as a method of funding employee benefit liabilities. The corporation insures key employees and is the owner and beneficiary of the policies.

Sales and distribution

Issuances of GICs, FAs and medium-term notes are marketed to institutional investors, such as pension funds, retirement plans, college savings plans, money market funds, municipalities, United States investors and non-US investors.

AEGON USA distributes these institutional products through a multi-channel strategy involving consultants, investment bankers, bidding agents, and its own internal sales force.

1.4.1.5 Reinsurance

General description

The Transamerica Reinsurance Division, a unit of Transamerica Occidental Life Insurance Company, has provided reinsurance products and solutions to life insurance and financial services companies for over thirty years.

In the United States, Transamerica Reinsurance Division provides traditional reinsurance solutions for term, universal, variable universal and whole life mortality and morbidity risks. Reinsurance products include coinsurance as well as yearly renewable term and modified coinsurance agreements. As well as individual life, Transamerica Reinsurance Division also offers traditional and modified coinsurance programs for the annuity market, as well as reinsurance of general account guarantees on variable annuity products.

Table of Contents

Transamerica Reinsurance Division also provides reinsurance solutions in Europe, Asia Pacific and Latin America and offers risk and capital management solutions on a similar basis to those in the United States.

Products

The core life reinsurance offering, mortality risk transfer, is sold primarily through coinsurance and yearly renewable term arrangements. Under a coinsurance arrangement, reinsurance is ceded and assumed in the same form as the direct policy and the reinsurer shares proportionately in the product risks, including mortality, morbidity, persistency, investment, and capital requirements. Yearly renewable term reinsurance has premium rates that are not related to the original insurance product type and the ceding company only reinsures the mortality or morbidity risk.

Transamerica Reinsurance Division also assumes fixed annuity business on a coinsurance basis. Under a coinsurance arrangement, risk is ceded in the same form as the direct policy and the client company typically pays the reinsurer premiums equal to its share of the premiums that the client company receives on the underlying policies. The reinsurer will pay the client death or surrender benefits upon death or surrender of the policyholder and will reimburse the client specific allowances which are generally intended to cover its share of expenses.

Transamerica Reinsurance Division also reinsures fixed and variable annuity business on a modified coinsurance basis. Like coinsurance, modified coinsurance is ceded and assumed in the same form as the direct policy however, the reserves and assets backing the transaction remain with the ceding company in its accounts. Transamerica Reinsurance Division typically finances variable annuity acquisition costs in exchange for a fixed fee reinsurance premium that is based upon the account value. Lapse risk is a significant risk assumed by the reinsurer.

Transamerica Reinsurance Division assumes certain guaranteed minimum withdrawal, death and income benefits associated with variable annuity policies in exchange for a fee, typically expressed as a fixed percentage of the account value. With this type of cover, the reinsurer pays its share of the minimum benefits the policyholder's account value is unable to fund due to its underlying performance. Minimum underlying fund performance is a primary risk assumed by the reinsurer.

Furthermore, Transamerica Reinsurance Division also works with customers to develop, underwrite and administer specifically tailored products, as well as provide back-office services for life insurers, such as product development and private label creation.

Outside of the United States, Transamerica Reinsurance Division offers risk and capital management solutions on a similar basis to those in the United States. Primarily, this consists of risk premium (yearly renewable term) cover for mortality, accidental death, critical illness and group life and disability. Additionally, coinsurance structures are used to help finance acquisition costs as well as transferring other underwriting risks.

Sales and distribution

Transamerica Reinsurance Division writes business through various AEGON companies in the United States and through its own affiliates in Bermuda and Ireland:

Transamerica International Reinsurance Bermuda Ltd.

Transamerica International Reinsurance Ireland Ltd.

Additionally Transamerica Reinsurance Division writes some of its European business through AEGON Levensverzekering N.V.

Outside the United States, Transamerica Reinsurance Division has established local offices in a number of different countries, including France, Spain, Taiwan, South Korea, Hong Kong, Mexico, Chile and Brazil. In these countries, and many proximate countries Transamerica Reinsurance Division offers customized solutions, including coinsurance financing, product development with related quota share programs as well as traditional life reinsurance.

1.4.2 Overview Canada

1.4.2.1 Life and protection

Transamerica Life Canada (TLC) is AEGON Canada's principal operating unit. It offers a variety of universal and traditional life insurance products, predominantly term and permanent life insurance, as well as accidental death and out-of-the-country medical cover, serving both individual and corporate customers.

1.4.2.2 Individual savings and retirement

General description

AEGON Canada's current product offerings comprise the following: segregated funds, mutual funds, segregated funds offered through strategic alliances with investment management companies, guaranteed investment accounts and single premium immediate annuities. The imaxx brand of mutual funds is offered by AFM. TLC offers all of AEGON Canada's other investment products.

Transamerica Life Canada offers term and tax-sheltered universal life insurance, segregated funds, guaranteed investment accounts, and single premium immediate annuities. Money Concepts (Canada) Limited (MCC) is an independent Canadian financial planning company with an association of franchised planning centers that offers a diverse spectrum of planning products and services to investors. With 53 franchises across Canada, MCC is the only franchised financial planning company in Canada. MCC franchises and representatives benefit from AEGON Dealer Services Inc. (ADSCI), which provides advisors and distributors with mutual fund and segregated fund dealership capability. These services are also provided to TLC's and AEGON Fund Management Inc. (AFM) advisors

Table of Contents

across Canada, choosing to deal through an ADSCI branch of the dealer. AEGON Capital Management Inc. (ACM) was created in November 2001 from the spin-off of the investment management division of TLC. ACM's mandate is to develop products and services for the institutional, high net-worth individual, pension, and retail markets. AFM is the mutual fund subsidiary of AEGON Canada, which offers the imaxx brand of mutual funds as well as core fund portfolios featuring select investment managers from around the world to Canadian investors seeking customized portfolio solutions.

Products

Fixed annuity contracts in Canada have fixed rates for specified terms and contracts are sold as redeemable or non-redeemable. Most redeemable contracts are sold on the basis that a market value adjustment will apply for surrenders prior to maturity, while a small number use a fixed surrender charge. Contracts sold on a redeemable basis provide a lower rate of interest than the non-redeemable contracts. There are no minimum interest rate guarantees on these products.

In Canada, variable products sold are known as segregated funds. Segregated funds are similar to variable annuities, except that they include a capital protection guarantee for mortality and maturity benefits (guaranteed minimum accumulation benefits).

In Canada, fees are earned through several special service and fund management companies, by providing administrative back office services that facilitate the sale of mutual funds and segregated fund products. In addition, a national network of financial planning franchises and representatives earn fees when products of non-affiliated companies are sold. Investment management fees are also earned by providing portfolio management and investment advisory services.

1.5 Competition

AEGON USA faces significant competition in all of its businesses. Its competitors include other large and highly rated insurance carriers, as well as certain banks, securities brokerage firms, investment advisors, and other financial intermediaries marketing insurance products, annuities, and mutual funds. Some of these competitors have greater financial strength and resources and have penetrated more markets. Many of AEGON USA's competitors in the mutual fund industry are larger, have been established for a longer period of time, offer less expensive products, have deeper penetration in key distribution channels, and have more resources than AEGON USA.

The United States sales and marketing units of traditional life products focus on a variety of markets, including the middle, upper-middle and affluent markets. All the units face significant competition. Genworth, Pacific Life, Lincoln National, John Hancock, Sun Life, Metropolitan Life, Prudential, AIG, and ING are among the main competitors. The result is a highly competitive marketplace and increasing commoditization in some product categories. In this kind of environment, AEGON USA believes the best and most enduring competitive advantages are relationships and service. In the middle income and young family markets, AEGON USA has seen significant growth in demand for traditional life products, leading to an increase in the number of agents in this market. AEGON USA attempts to balance return and sales growth requirements when offering traditional life products to senior and more affluent markets. This is due to significant price competition for sales to these markets and for sales through brokerage distribution.

TOLIC's Bermuda company, Transamerica Life (Bermuda) Ltd. (TLB), has branches in Hong Kong and Singapore, where the focus is on high-net-worth individuals. The recent influx of new entrants in the market has increased TLB's competition in this segment. However, TLB believes there is significant opportunity in this region, and is well positioned for growth.

AEGON USA markets variable universal life, mutual funds, and variable annuities to middle-income clients with equity investment objectives. Sales are often driven by the competitiveness of the living benefits offered by our competitors, with most product development focusing on guaranteed lifetime withdrawal benefits, which guarantee lifetime withdrawals of a certain amount under certain conditions.

AEGON USA's primary competitors in the variable universal life market are IDS, Hartford Financial, John Hancock, Pacific Life, Metropolitan Life, Nationwide, Lincoln National, and AXA/Equitable.

The top five competitors in the mutual fund market are generally larger equity-based mutual fund families: American Funds, Franklin Templeton; Oppenheimer; Putnam; and Fidelity.

AEGON USA has built long-term relationships with many institutions, and these relationships have enabled AEGON USA to offer many product lines such as fixed annuities, variable annuities, life insurance, mutual funds, and 401(k) products through these institutions. Most fixed annuity sales occur at banks. AEGON USA's primary competitors for fixed annuity sales are AIG, Allstate, New York Life, Genworth, Hartford Financial, and Symetra.

Edgar Filing: AEGON NV - Form 20-F

Variable annuity sales have demonstrated solid growth over the past year. This sales growth is a result of both greater penetration in the market place by increasing the size of the wholesaling force and increased competitiveness of the product offerings. The market has shown a strong interest in guaranteed lifetime withdrawal products. AEGON USA expects continued growth in this product line through continued product development efforts, seasoned wholesaling support, and the strategic business relationship with Merrill Lynch. AEGON USA's primary competitors in the variable annuity market are Hartford Financial, AXA/Equitable, Metropolitan Life, John Hancock, Prudential/American Skandia, Lincoln National, ING, and Pacific Life.

In the institutional product market, AEGON USA's competitors include insurance companies, domestic and foreign banks, and investment advisors. Customers include investment managers, GIC managers, 401(k) and 457 plans, pension plans, 529 college savings plans, money market funds, municipalities, US and international banks, and other capital market sectors.

AEGON USA believes it is a leading issuer of synthetic GICs (source: reports from LIMRA International and the Stable Value Investment Association's Stable Value and Funding Agreement Products, 2007 Third Quarter Sales, Landmark Strategies' 2006 Stable Value Wrap Issuance Survey; AEGON USA's Market Research). AEGON USA pioneered the use of synthetic GICs in 1991 and competes against banks such as Bank of America, IXIS Financial Products Inc (IXIS), JP Morgan, Rabobank, State Street Bank, and Union Bank of Switzerland as well as insurance companies such as AIG and ING. AEGON USA is also among the top 10 traditional GIC providers (source: reports from LIMRA International and the Stable Value Investment Association's Stable Value and Funding

Table of Contents

Agreement Products, 2007 Third Quarter Sales; AEGON USA's Market Research). Other insurers in the traditional GIC segment include Hartford Financial, Metropolitan Life, Principal Financial, Prudential Financial, and New York Life (source: reports from LIMRA International and the Stable Value Investment Association, Stable Value and Funding Agreement Products, 2007 Third Quarter Sales, AEGON USA's Market Research).

Funding agreement-backed medium-term notes are marketed by AEGON in the United States and abroad. Monumental Life Insurance Company, the insurance company that issues the funding agreements backing these notes, is among the top ten issuers in this fast-growing segment (source: Standard & Poor's Funding Agreement Backed-Note Issuance totals USD 27 billion for the first three quarters of 2007, publication date October 18, 2007). AIG, Allstate, New York Life, John Hancock, Metropolitan Life, Principal Financial, and Pacific Life also have leading positions.

AEGON USA holds a leadership position among issuers of floating rate funding agreements sold directly to money market funds (source: reports from LIMRA International and the Stable Value Investment Association's Stable Value and Funding Agreement Products, 2007 Third Quarter Sales; company SEC filings; Money Fund Intelligence; AEGON USA's Market Research). Other leading competitors in this market are Genworth Financial, ING, Metropolitan Life, and New York Life.

AEGON USA manages a book of approximately USD 6.0 billion (book value) in funding agreements/investment contracts issued to municipalities, and is a top 10 provider in this segment. The leading competitors in the municipal GIC market are AIG, Bayerische Landesbank, Citibank, FSA, MBIA and Trinity Funding (source: reports from LIMRA International and the Stable Value Investment Association's Stable Value and Funding Agreement Products, 2007 Third Quarter Sales; company SEC filings; AEGON USA's Market Research).

Transamerica Reinsurance Division's major life reinsurance competitors vary based upon solutions and geographical markets. The main competitors are Reinsurance Group of America, Swiss Re, and Munich Re.

Within the United States, conditions continue to favor large, financially strong reinsurers such as Transamerica Reinsurance Division that can gain access to capital markets for reserve credit collateral and provide full-service solutions. Recent new entrants have had limited influence on the market.

The pension market continues to evolve rapidly and is facing growing regulatory compliance pressures, continuing demand for technological innovation, pricing pressures, and provider consolidation. AEGON USA's ability to achieve greater economies of scale in operations will be assisted if growth in key market segments continues, technology improves, and if process management increases efficiency.

In the defined contribution market, AEGON USA's main competitors are Fidelity, T. Rowe Price, Vanguard, Principal, Mass Mutual, New York Life, and AIG VALIC. AEGON USA's main competitors in the defined benefit segment are, Mass Mutual, New York Life, Principal Financial, and Prudential. In the small business retirement plan segment and the multiple employer plan segment, AEGON USA's main competitors are Principal Financial, John Hancock, American Funds, Hartford Financial, Fidelity, and ING. In the single premium group annuity market, AEGON USA's main competitors are Hartford Financial, John Hancock, Metropolitan Life, and Principal Financial.

Canadian life insurance marketplace

The top ten companies in Canada account for 89% of the life insurance sales (source: LIMRA study Third Quarter 2007, issued November 2007). AEGON's primary competitors in Canada are; Manulife, Sun Life, Industrial-Alliance, London Life, RBC Life, Canada Life, American International Group (AIG), Empire Life, Standard Life, and Desjardins Finance.

AEGON Canada ranks fifth in overall individual life insurance sales (new business premiums) with a market share of 8.9% as of September 2007, down from 9.7% at December 31, 2006. AEGON Canada ranks fourth in universal life sales representing 12.0% of the market and fifth in term life sales representing 8.2% of the market (source: LIMRA study Third Quarter 2007, issued November 2007).

1.6 Regulation

AEGON USA

AEGON USA's insurance subsidiaries are subject to regulation and supervision in the states in which they transact business. Supervisory agencies in each of those states have broad powers to do any of the following: grant or revoke licenses to transact business, regulate trade and marketing practices, license agents, approve policy forms and certain premium rates, set reserve and capital requirements, determine the form and content of required financial reports, examine the insurance companies, prescribe the type and amount of investments permitted, levy fines

Edgar Filing: AEGON NV - Form 20-F

and seek restitution for failure to comply with applicable regulations. The international businesses of AEGON USA are governed by the laws and regulations of the countries in which they transact business.

Insurance companies are subject to a mandatory audit every three to five years by their domestic regulatory authorities and every year by their independent auditors. In addition, examinations by non-domestic state insurance departments are conducted, both on a targeted and random or cyclical basis. Some State Attorneys General have also commenced investigations into certain insurers' business practices. Within the insurance industry, substantial liability has been incurred by insurance companies based on their past sales and marketing practices. AEGON USA has focused and continues to focus on these compliance issues, and costs continue to increase as a result of these activities.

States have adopted risk-based capital (RBC) standards for life insurance companies, established by the National Association of Insurance Commissioners (NAIC). The Risk-Based Capital (RBC) Model Act (Model Act) provides for various actions should an insurer's adjusted capital, based on statutory accounting principles, fall below certain prescribed levels (defined in terms of its risk-based capital). The adjusted capital levels of AEGON USA's insurance subsidiaries currently exceed all of the regulatory action levels as defined by the Model Act. Any modifications of these adjusted capital levels by the regulators or rating agency capital models may impact AEGON USA.

Table of Contents

US federal and state privacy laws and regulations impose restrictions on financial institutions' use and disclosure of customer information. Legislation has been introduced in the US Congress, and in the states from time to time that would either impose additional restrictions on the use and disclosure of customer information or would require financial institutions to enhance the security of personal information and impose new obligations in the event of data security breaches. States are also considering and the US Congress may again consider legislation that would restrict the ability of insurers to underwrite based on specified risks, such as travel to certain countries. These laws, regulations and legislation, if enacted, could impact AEGON's ability to market or underwrite its products or otherwise limit the nature or scope of AEGON's insurance and financial services operations in the United States.

Both, the Federal Trade Commission (FTC) and the Federal Communications Commission (FCC) previously revised their telemarketing rules, according to the Telemarketing and Consumer Fraud and Abuse Prevention Act and the Telephone Consumer Protection Act. The FTC and FCC rules prohibit telephone solicitations to customers who have placed their telephone numbers on the National Do-Not-Call Registry. Additional proposals to make the Do-Not-Call list permanent and to place restrictions on direct mail have been introduced in the US Congress and in the states. Some AEGON subsidiaries have seen a reduction in their telemarketing efforts because of the revised FTC and FCC rules.

Legislation has been introduced in the US Congress from time to time that would amend the McCarran-Ferguson Act to make the federal anti-trust laws applicable to the business of insurance. Applicability of the proposal is limited to the extent that insurance is not regulated by state law. If this legislation is enacted, the Federal Trade Commission and the US Department of Justice will have authority to enforce federal anti-trust laws against insurers. The insurance industry considers the involvement of the Federal Trade Commission and the Department of Justice in the business of insurance as burdensome and likely to be duplicative of state insurance regulation.

Insurance holding company statutes and the regulations of each insurer's domiciliary state in the United States impose various limitations on investments in affiliates and require prior approval of the payment of dividends above certain threshold levels by the registered insurer to AEGON or certain of its affiliates.

Some of AEGON USA's investment advisory activities are subject to federal and state securities laws and regulations. Mutual Funds managed, issued and distributed by AEGON USA companies are registered under the Securities Act of 1933, as amended (the Securities Act), and the Investment Company Act of 1940 (the Investment Company Act). With the exception of its investment accounts which fund private placement investment options that are exempt from registration, or support fixed rate investment options that are also exempt from registration, all of AEGON USA's separate investment accounts that fund retail variable annuity contracts and retail variable life insurance products issued by AEGON USA subsidiaries are registered both under the Securities Act and the Investment Company Act. Institutional products such as group annuity contracts, guaranteed investment contracts, and funding agreements are sold to tax qualified pension plans or to other sophisticated investors and are exempt from registration under both acts.

Some of AEGON USA's subsidiaries are registered as broker-dealers with the Securities Exchange Commission (SEC) under the Securities Exchange Act of 1934, referred to as the Securities Exchange Act and are associated with the Financial Industry Regulatory Authority (FINRA), formerly known as the National Association of Securities Dealers, Inc. or NASD). A number of AEGON USA's subsidiaries are also registered as investment advisors under the Investment Advisers Act of 1940. AEGON USA's insurance companies and other subsidiaries also own or manage other investment vehicles that are exempt from registration under the Securities Act and the Investment Company Act but may be subject to other requirements of those laws, such as anti-fraud provisions and the terms of applicable exemptions.

The financial services industry, which includes businesses engaged in issuing, administering, and selling variable insurance products, mutual funds, and other securities, as well as broker-dealers, has come under heightened scrutiny and increased regulation in various jurisdictions. Such scrutiny and regulations have included matters relating to so-called producer compensation arrangements, selling practices, revenue sharing, market timing, late trading, and valuation issues involving mutual funds and life insurance separate accounts and their underlying funds. AEGON USA subsidiaries, like other businesses in the financial services industry, have received inquiries, examinations, and requests for information from regulators and others relating to certain AEGON USA subsidiaries' historical and current practices with respect to these and other matters. Some of those inquiries have led to investigations, which remain open or have resulted in fines, corrective actions or restitution. AEGON USA subsidiaries continue to cooperate with these regulatory agencies. Since 2004, there has been an increase in litigation in the industry, legislation, new regulations, and regulatory initiatives aimed at curbing alleged abuse of annuity sales to seniors. As the first of the estimated 77 million baby boomers reached the age of sixty last year, the industry will likely see an increase in senior issues presented in various legal arenas. In addition, certain industry practices in respect of market conduct have been the subject of investigations by various state regulators.

In certain instances, AEGON subsidiaries modified business practices in response to inquiries or the findings thereof. Certain AEGON subsidiaries have paid or been informed that the regulators may seek restitution, fines or other monetary penalties or changes in the way we conduct our business. The impact of fines or other monetary penalties is not expected to have a material impact on AEGON's financial position, net income or cash flow.

Edgar Filing: AEGON NV - Form 20-F

Some of AEGON USA's subsidiaries offer products and services to pension and welfare benefit plans that are subject to ERISA. ERISA is administered by the Department of Labor (DOL) and Internal Revenue Service (IRS). Accordingly, the DOL and IRS have jurisdiction over these AEGON USA businesses.

Transamerica Reinsurance Division's reinsurance activities are subject to laws and regulations including those related to credit for reinsurance. Most states have implemented a Life and Health Reinsurance Agreement regulation, which specifies the time frames for completion of contracts and defines which risks must pass from cedant to reinsurer to constitute reinsurance. Transamerica International Re (Bermuda) Ltd. is subject to the laws and regulations governing the reinsurance business in Bermuda, as overseen by the Bermuda Monetary Authority.

Transamerica International Reinsurance Ireland Limited is subject to the laws and regulations governing the reinsurance business in Ireland, as overseen by the Irish Financial Services Regulatory Authority. AEGON Levensverzekering N.V. is subject to the laws and regulations governing insurance in The Netherlands as overseen by the Dutch Central Bank.

Table of Contents

Although the insurance business is regulated on the state level, the US federal tax preferences of life insurance products are governed by the US federal tax code. Proposals to remove or decrease the value of these tax preferences, both in and of themselves and relative to other investment vehicles, are often debated in the US Congress. This risk is heightened as the US Congress has reinstated the old pay as you go, or PAYGO, system, which requires any increases in program spending to be offset with increases in taxes or cuts in other programs.

Moreover, legislative proposals which impose restrictions on employment-based savings plans, such as pending legislative proposals imposing new restrictions on nonqualified deferred compensation, adversely impacts the sale of life insurance products used in funding those plans and their attractiveness relative to other investment products.

There are also a number of proposals that target foreign owned companies, including a proposal that would deny US shareholders of the preferential tax rate on dividends in certain circumstances. To the extent that any of these proposals would directly impact AEGON, they could adversely impact either US shareholders or investment in the US.

Pension reform legislation enacted in 2006 both increases funding obligations of defined benefit plans and creates opportunities for increased savings through defined contribution plans and other savings vehicles. AEGON companies administer and provide both asset management services and products used to fund defined contribution plans, 529 plans and other savings vehicles impacted by the pension reform legislation. AEGON companies also provide plans used to administer benefits distributed upon termination of defined benefit plans.

Pending regulations under the pension reform legislation will, among other matters, specify appropriate default investments for contributions to qualified employment-based plans under the legislation's new automatic enrollment provisions. These provisions provide plan sponsors certain liability protection for investment of new contributions automatically made to the plan if a plan participant has not otherwise designated the plan funds in which such contributions are to be invested. The Department of Labor's failure to include certain life insurance products, such as stable value products, as acceptable default investments will likely adversely impact the sale of those products to employment-based plans.

In addition, the US Congress is reviewing the fees charged to both sponsors of and participants in employment-based savings plans for plan services and investments, and is considering legislative proposals to increase the disclosure and transparency of such fees. In addition, the Department of Labor is expected to soon promulgate regulations on fee disclosure. Any proposals that seek to either restrict such fees and services or change the manner in which AEGON USA subsidiaries may charge for such services inconsistent with business practices will adversely impact AEGON subsidiaries that provide administration and investment services and products to employment based plans.

Many other federal tax laws affect the business in a variety of ways. Legislative proposals to repeal, substantially reform or permanently repeal the estate tax are being considered, but are not likely to be enacted in 2008. Under existing law, the federal estate, gift, and generation skipping taxes are temporarily repealed in 2011. AEGON believes a permanent repeal of the federal estate tax would have an adverse impact on sales and surrenders of life insurance in connection with estate planning; however, failure to permanently reform the estate tax to avoid its total repeal in 2011 and return to pre-2001 rates creates a lack of certainty that adversely impacts efficient estate planning.

AEGON Canada

Transamerica Life Canada is incorporated under the Canadian Business Corporation Act and is regulated under the Insurance Companies Act of Canada. In addition, TLC is subject to the laws, regulations and insurance commissions of each of Canada's ten provinces. The laws of these jurisdictions generally establish supervisory agencies with broad administrative powers that include the following: granting and revoking licenses to transact business, regulating trade practices, licensing agents, establishing reserve requirements, determining permitted investments and establishing minimum levels of capital. TLC's ability to continue to conduct its insurance business depends upon the maintenance of its licenses at both the federal and provincial levels. The primary regulator for TLC is the Office of the Superintendent of Financial Institutions. TLC is required under the Insurance Companies Act of Canada to have at least seven directors, 50% of whom must be residents of Canada and no more than two-thirds of whom can be affiliated with TLC.

The life insurance and securities operations of AEGON Canada are also governed by policy statements and guidelines established by industry associations such as the Canadian life & health insurance associations, mutual fund dealers association, and investment funds institute of Canada.

1.7 Asset liability management

AEGON USA's insurance subsidiaries are primarily subject to regulation under the laws of the states in which they are domiciled. Each state's laws prescribe the nature, quality, and percentage of various types of investments that may be made by the subsidiaries. Such laws generally permit investments in government obligations, corporate debt, preferred and common stock, real estate, and mortgage loans. Limits are generally

placed on other classes of investments.

The key investment strategy for traditional insurance-linked portfolios is asset/liability management, whereby predominately high-quality investment assets are matched in an optimal way to the corresponding insurance liability. This strategy takes into account currency, yield and maturity characteristics as well as asset diversification and quality considerations on the one hand and the policyholders' guaranteed or reasonably expected excess interest sharing on the other hand. Investment-grade fixed income securities are the main vehicle for asset/liability management, and AEGON USA's investment personnel are highly skilled and experienced in these investments.

The AEGON USA companies manage their asset/liability matching through the work of several committees. These committees review strategies, define risk measures, define and review asset/liability management studies, examine risk-hedging techniques, including the use of derivatives, and analyze the potential use of new asset classes. Cash flow testing analysis is performed using computer simulations, which model assets and liabilities under stochastically projected interest rate scenarios and commonly used stress-test interest rate scenarios. Based on the results of these computer simulations, the investment portfolio is structured to maintain a desired

Table of Contents

investment spread between the yield on the portfolio assets and the rate credited on the policy liabilities. Interest rate scenario testing is a continual process and the analysis of the expected values and variability for three critical risk measures (cash flows, present value of profits, and interest rate spreads) forms the foundation for modifying investment strategies, adjusting asset duration and mix, and exploring hedging opportunities. On the liability side, AEGON USA has some offsetting risks; some liabilities perform better in rising interest rate environments while others tend to perform well in falling interest rate environments. The amount of offset can vary depending on the absolute level of interest rates and the magnitude and timing of interest rate changes, but it generally provides some level of diversification. On the asset side, hedging instruments are continuously studied to determine whether their cost is commensurate to the risk reduction they offer.

1.8 Reinsurance ceded

1.8.1 United States

AEGON USA reinsures part of its life insurance exposure with third-party reinsurers under traditional indemnity, quota share reinsurance treaties, as well as, less frequently, excess-of-loss contracts. AEGON USA's reinsurance strategy is in line with typical industry practice.

These reinsurance contracts are designed to diversify AEGON USA's overall risk and limit the maximum loss on risks that exceed policy retention levels. The maximum retention limits vary by product and class of risk, but generally fluctuate between USD 3,000 and USD 3 million per life insured.

AEGON USA remains contingently liable with respect to the amounts ceded should the reinsurance company fail to meet its obligations. To minimize its exposure to such defaults, AEGON USA regularly monitors the creditworthiness of its reinsurers. AEGON USA has experienced no material reinsurance recoverability problems in recent years. Where appropriate, the company arranges additional cover through letters of credit or trust agreements. For certain agreements, funds are withheld for investment by the ceding company.

AEGON USA's insurance subsidiaries also enter into contracts with company-affiliated reinsurers, both within the United States and overseas, including Transamerica Reinsurance Division, a unit of Transamerica Occidental Life Insurance Company. These contracts have been excluded from the company's consolidated financial statements, except in certain circumstances that include profit-sharing arrangements.

1.8.2 Canada

In the normal course of business, AEGON Canada reinsures part of its mortality and morbidity risk with outside reinsurance companies. The maximum life insurance exposure retained is CAD 1.25 million per life insured.

Ceding reinsurance does not remove AEGON Canada's liability as the primary insurer. AEGON Canada could incur losses should reinsurance companies fail to meet their obligations. To minimize its exposure to the risk of such defaults, AEGON Canada regularly monitors the creditworthiness of its reinsurers. AEGON Canada only contracts business with reinsurance companies that are registered with Canada's Office of the Superintendent of Financial Institutions.

Table of Contents

2. The Netherlands

2.1. Background

AEGON was created by the merger of two Dutch insurance companies – AGO and Ennia – in 1983. AEGON’s history in the Netherlands, however, goes back more than 150 years. Today, AEGON The Netherlands³ is one of the country’s leading providers of life insurance and pensions, with millions of customers and more than 6,400 employees. The fully owned Unirobe Meeùs Group is one of the largest intermediaries in the Netherlands. AEGON The Netherlands has its headquarters in The Hague, but also has offices in Leeuwarden, Groningen and Nieuwegein.

2.2. Organizational structure

AEGON The Netherlands operates through a number of well-known brands, including TKP Pensioen, OPTAS, Meeùs and Unirobe. In addition, AEGON itself is one of the most widely recognized brand names in the Dutch financial services sector (source Tracking Report Motivation).

AEGON The Netherlands’ primary subsidiaries are:

AEGON Levensverzekering N.V.

AEGON Schadeverzekering N.V.

AEGON NabestaandenZorg N.V.

AEGON Spaarkas N.V.

AEGON Bank N.V.

Unirobe Meeùs Groep B.V.

TKP Pensioen B.V.

Nedasco B.V.

OPTAS N.V.

OPTAS Pensioenen N.V.

OPTAS Leven N.V.

OPTAS Schade N.V.

Edgar Filing: AEGON NV - Form 20-F

The business organization of AEGON The Netherlands is based on five service centers (SC s) and three sales organizations (SO s).

The SC s, which are responsible for all back office activities, are the following:

SC Pensions

SC Life insurance

SC Non-life insurance

SC Banking

SC Asset management

In recent years, AEGON The Netherlands has taken significant steps to reorganize its businesses as part of broader efforts to improve overall efficiency and customer service. In 2003, the company combined its various business units into a single, more centralized structure. By bringing product knowledge, administration, IT and other back office support under one roof, AEGON The Netherlands has created a more effective and better structured organization. Since 2006 a process of centralizing staff functions including HRM, Marketing and Finance has been effected in order to standardize processes and improve efficiency.

AEGON The Netherlands is present in five lines of business:

Life and protection

Individual savings and retirement products

Pensions and asset management

Distribution

General insurance

2.3. Overview sales and distribution channels

AEGON The Netherlands operates through three sales organizations, each focusing on a separate segment of the Dutch market. Corporate & Institutional Clients serves large corporations and financial institutions such as company and industry pension funds. AEGON Bank sells mainly to individuals both directly and through tied agents. Lastly, AEGON Intermediary focuses on independent agents and retail sales organizations in the Netherlands.

In the first half of 2007, AEGON The Netherlands launched AEGON Bank, grouping together four previously separate brands Spaarbeleg, SpaarAdvies, AXENT/AEGON and AEGON Spaarbeleg Op t Werk. In this manner products are clearly branded as AEGON services, enhancing brand recognition and sales power, and the solid reputation of AEGON Bank is promoted.

Edgar Filing: AEGON NV - Form 20-F

³ Throughout this report, "AEGON The Netherlands" refers to all AEGON companies operating in the Netherlands.

Table of Contents

2.4. Overview lines of business

2.4.1 Life and protection

General description

AEGON The Netherlands provides a range of life insurance and personal protection products and services, including traditional, universal and term life, funeral insurance as well as accident and health cover. Life and protection is AEGON The Netherlands' most important line of business, accounting for 63 percent of the company's overall operating earnings before tax in 2007.

Products

The life products of AEGON The Netherlands consist largely of endowment insurance and annuity insurance.

Endowment insurance

This category includes various products that accumulate a cash value. Premiums are paid at inception or over the term of the contract.

The accumulation products pay benefits on the policy maturity date, subject to survival of the insured. In addition, most policies also pay death benefits if the insured dies during the term of the contract. The death benefits may be stipulated in the policy or depend on the gross premiums paid to date. Premiums and amounts insured are established at inception of the contract. The amount insured can be increased as a result of profit sharing, if provided for under the terms and conditions of the product.

Minimum interest guarantees exist for all generations of accumulation products written, except for universal life type products for which premiums are invested solely in equity funds. Older generations contain a 4% guarantee; in recent years the guarantee has decreased to 3%.

There are different kinds of profit sharing arrangements. Bonuses are either paid in cash (mainly in pension business, as discussed in the following section) or used to increase the sum assured. For one common form of profit sharing, the bonus levels are set by reference to external indices that are based on predefined portfolios of Dutch government bonds. The bonds included in the portfolio have different remaining durations and interest rates and together are considered an approximation of the long-term rate of return on Dutch high quality financial investments. Another common form of profit sharing is via interest rebates, whereby policyholders receive a discount on single premium business which reflects the expectation that the actual rate of return on the contract will exceed the minimum interest guarantee used to determine the premiums and sums assured. Here too, the expected actual rate of return is based on a portfolio of Dutch government bonds.

Term and whole life insurance

Term life insurance pays out death benefits when the insured dies during the term of the contract. Whole life insurance pays out death benefits when the insured dies, regardless of the timing of this event. Premiums and amounts insured are established at inception of the contract and are guaranteed. The amount insured may be adjusted on request of the insured. In principle, term life insurance policies will not include profit sharing arrangements. Part of the portfolio of whole life insurance has profit-sharing features, which are based on external indices or return of related assets.

Annuity insurance

This category includes products in accumulation phase and in payout phase. Payout commences at a date determined in the policy and usually continues until death of the insured or the beneficiary. Premiums are paid at inception of the policy or during the accumulation phase of the policy. The contracts contain minimum guarantees of 3% or 4%.

Interest rebates are given on both single and regular premium annuity insurance and may be based on a portfolio of Dutch government bonds, although other calculation bases are also applied. There are also profit sharing schemes set by reference to external indices that are based on predefined portfolios of Dutch government bonds.

Tontine plans

Edgar Filing: AEGON NV - Form 20-F

Tontine plans in the Netherlands are linked endowment savings contracts with a specific bonus structure. Policyholders can choose from several AEGON funds to invest premiums paid. The main characteristic of a tontine system is that when the policyholder dies, the balance is not paid out to the policyholder's estate, but is distributed at the end of the year to the surviving policyholders of the specific series to which the deceased policyholder belonged. In general, a new series starts at the beginning of each calendar year, but there are also open ended tontine plans in the portfolio. When the policyholder dies before maturity, AEGON The Netherlands pays a death benefit equal to the premiums paid accumulated at a 4% compound interest, subject to a minimum of 110% of the fund value during the first half of the contract term.

Variable unit linked products

In the Netherlands, variable unit linked products are sold. These products have a minimum benefit guarantee if premiums are invested in certain funds. The initial guarantee period is 10 years. The 10-year period may be reset at the policyholder's option to lock in market gains. The reset feature cannot be exercised in the final decade of the contract and for many products can only be exercised a limited number of times per year. The management expense ratio (MER) charged to the funds is not guaranteed and can be increased at management's discretion.

Table of Contents

Accident and health insurance

AEGON The Netherlands offers sick leave products to employers that cover the sick leave payments to employees that are not covered by social security and where the employers bear the risk. Over the past several years, the Dutch government has gradually shifted responsibility for sick leave and workers' disability from the state to the private sector. This has helped stimulate demand for private health insurance. In 2006, AEGON The Netherlands introduced a new product providing companies with additional employee disability cover.

Sales and distribution

AEGON's traditional life insurance is sold primarily by AEGON Intermediary and AEGON Bank. The vast majority are standardized financial products.

Accident and health products are sold mainly through AEGON Intermediary, though Corporate & Institutional Clients also provides products for larger corporations in the Netherlands.

2.4.2 Individual savings and retirement products

General description

In addition to life insurance and pensions, AEGON The Netherlands also provides a variety of individual savings and retirement products. In 2007, these products did not contribute to AEGON The Netherlands' overall pre-tax operating earnings.

AEGON discontinued selling security lease products in early 2003. At the end of 2005, the Dutch government decided to reform its retirement legislation. As part of a wider policy of reducing state benefits, the government ended a pre-retirement savings plan, known as VUT, and replaced it with *Levensloop* or *Life cycle*.

Products

Saving products are only sold by AEGON The Netherlands and include savings accounts and investment contracts. Both products generate investment-spread income for AEGON. Savings accounts retain flexibility to withdraw cash with limited restrictions. Banking products also include investment products that offer index-linked returns and generate fee income on the performance of the investments.

Levensloop allows savers to put aside a certain amount each year, tax free, either to fund their retirement, retire early, or even finance a break in their careers. Many companies in the Netherlands have decided to include *Levensloop* in their overall employee benefit packages. Since its introduction, *Levensloop* has grown rapidly and AEGON is now one of the leading providers of *Levensloop* products in the Netherlands.

Sales and distribution

Individual savings and retirement products are sold through all three sales organizations. AEGON Intermediary and AEGON Bank sell the majority of the contracts. The *Levensloop* contracts that large organizations can offer to their employees are sold through our Corporate & Institutional Clients sales organization.

2.4.3 Pensions and asset management

General description

Pensions and asset management is one of AEGON The Netherlands' most important lines of business. In 2007, it accounted for 30 percent of the AEGON The Netherlands' total operating earnings before tax.

Products

For the majority of the company/industry pensions funds and some large companies, AEGON The Netherlands provides full service pension solutions and also administration-only services.

Edgar Filing: AEGON NV - Form 20-F

The full service pension products for account of policyholders are separate account group contracts with or without guarantees.

Separate account group contracts of AEGON The Netherlands are large group contracts that have an individually determined asset investment underlying the pension contract. The contracts are written with and without a guarantee. The guarantee given is that the profit sharing is the minimum of the technical interest of either 3% or 4% or the realized return (on an amortized cost basis). If there is a negative profit sharing, the minimum is effective, but the loss in any given year is carried forward to be offset against any future surpluses during the contract period. In general, a guarantee is given for the life of the underlying employees so that their pension benefit is guaranteed. Large group contracts also share technical results (mortality risk and disability risk). The contract period is typically five years and the premium tariffs are fixed over this period.

Separate account guaranteed group contracts provide a guarantee on the benefits paid. The longevity risk therefore lies with AEGON The Netherlands. Non-guaranteed separate account group contracts provide little guarantee on the benefits. AEGON The Netherlands has the option not to renew a contract at the end of the contract period.

For most large companies and some small and medium-sized enterprises, AEGON The Netherlands provides defined benefit products for which profit sharing is based upon a pre-defined benchmark. Benefits are guaranteed. Premium tariffs are fixed over the contract period and the longevity risk lies with AEGON The Netherlands. Minimum interest guarantees are given for nominal benefits, based on 3% actuarial interest (4% on policies sold before the end of 1999).

Table of Contents

For small and medium-sized enterprises, AEGON The Netherlands provides pensions that are defined contribution products with single and recurring premiums. Profit sharing is based on investment returns on specified funds. Premium tariffs are not fixed over the contract period. Minimum interest guarantees are given for nominal benefits, based on 0% or 3% actuarial interest (4% on policies sold before the end of 1999).

Both AEGON Asset Management (AEAM) and TKP Investments (TKPI, a 100% subsidiary of TKP Pensioen) provide asset management products with AEAM having strengths in in-house managed fixed income and Asian equities and TKPI providing fiduciary management using multi-manager investment pools. AEAM is also the main asset manager for AEGON The Netherlands insurance activities. Both AEAM and TKPI are able to tailor products to customers' needs, including hedging of liability risks.

Sales and distribution

Most of AEGON The Netherlands pensions are sold through two sales organizations: Corporate and Institutional Clients and AEGON Intermediary. Customers vary from individuals to company and industry pension funds and large, medium-sized and small corporations. AEGON The Netherlands is one of the country's leading providers of pensions.

For the majority of company and industry customers, AEGON The Netherlands provides a full range of pension products and services. In addition, TKP Pensioen specializes in pension administration.

Most of AEGON The Netherlands asset management products are channeled through the Corporate & Institutional Clients sales organization.

2.4.4 Distribution

AEGON The Netherlands offers financial advice and is involved in intercession activities in real estate. The financial advice activities include selling insurance, pensions, mortgages, financing, savings and investment products. The intercession activities in real estate comprise brokerage activities of residential as well as commercial real estate and real estate management business.

2.4.5 General insurance

AEGON The Netherlands offers a limited range of non-life insurance products through AEGON Intermediary. These are aimed at both the corporate and retail markets. They include house, car and fire insurance. In 2007, general insurance accounted for approximately 2 percent of AEGON The Netherlands overall operating earnings before tax.

2.5 Competition

AEGON The Netherlands faces strong competition in all of its markets from insurers, banks, and investment management companies. These competitors are nearly all part of international financial conglomerates, such as ING Group, Eureko (Achmea), Fortis and Aviva (Delta Lloyd).

AEGON The Netherlands has been a key player in the total life market for a long time. The life insurance market in the Netherlands, comprising both pensions and life insurance, is very concentrated. The top 6 companies account for approximately 84% of premium income in The Netherlands (source: DNB Regulatory Returns 2006). In the pensions market AEGON The Netherlands ranks first, whereas in the individual life insurance market AEGON The Netherlands takes sixth place behind ING, SNS Reaal, Eureko, Fortis and Delta Lloyd (based on premium income, source: DNB Regulatory Returns 2006).

AEGON The Netherlands is one of the smaller players on the non-life market. Achmea, Fortis, Delta Lloyd and ING have substantial market shares, whereas the rest of the market is very fragmented. The P&C market share of AEGON The Netherlands is around 3.4% (source: DNB Regulatory Returns 2006).

In recent years, several changes in regulations have limited opportunities in the Dutch insurance market, especially in the life insurance market (e.g. company savings plans and premiums of certain products are no longer tax deductible). Furthermore, the low economic growth and volatility of financial markets have created uncertainty among customers and a reluctance to commit to long-term contracts. These changed legal and market conditions have augmented competition. The result is competitive pricing, focus on service levels, client retention, and product innovation.

The pensions business has been affected by an increase in the number of new government regulations (e.g. the Surviving Relative Pension Act, the Non-Discriminatory Pensions Act and the new Pension Law). Timely compliance, flexibility in implementation and execution of these

regulations may give AEGON The Netherlands a competitive advantage and distinguish the company in this highly competitive market. IT activities are essential in realizing these goals.

In the non-life segment, opportunities are expected to grow as the Dutch government gradually withdraws from the subject market.

2.6. Regulation

Two institutions are responsible for the supervision of financial institutions in the Netherlands:

Autoriteit Financiële Markten (the Netherlands Authority for the Financial Markets) or AFM and

De Nederlandsche Bank (the Dutch Central Bank) or DNB.

Table of Contents

The AFM supervises the conduct of and the provision of information by all parties on the financial markets in the Netherlands. The objective of the AFM is to promote an orderly and transparent market process on the financial markets, the integrity of relations between market players and the protection of the consumer. DNB is responsible for safeguarding financial stability and supervises financial institutions and the financial sector.

New regulations pertaining to the supervision of financial institutions referred to as *Wet Financieel Toezicht* (Act on Supervision of the Financial System) took effect in January 2007. The new law pertains equally to banking and insurance operations and introduces a greater degree of consistency in both requirements and supervision.

2.6.1 Insurance companies

The European Union Insurance Directives issued in 1992 have been incorporated into Dutch law. The Directives are based on the home country control principle. This means that an insurance company that has a license issued by the regulatory authorities in its home country is allowed to conduct business, either directly or through a branch, in any country of the European Union. Separate licenses are required for each of the insurance company's branches in which it conducts business. The regulatory body that issued the license is responsible for monitoring the solvency of the insurer. However, the local regulatory body is responsible for monitoring market conduct and enforcing consumer protection laws.

Dutch law does not permit a company to conduct both life insurance and non-life insurance business within one legal entity. Nor is the company allowed to carry out both insurance and banking business within the same legal entity.

Insurance companies in the Netherlands are subject to the supervision of DNB. The relevant legal requirements are now comprised in the *Wet Financieel Toezicht* whereas previously supervision was pursuant to the Act on the Supervision of Insurance Companies 1993. Each and every life and non-life insurance company licensed by and falling under the supervision of DNB must file audited regulatory reports at least annually. These reports, primarily designed to enable DNB to monitor the solvency of the insurance company, include a (consolidated) balance sheet, a (consolidated) income statement, extensive actuarial information, and detailed information on the investments. As part of the process of modernization brought about by the introduction of IFRS in 2005 and the new supervisory legislation in 2006, DNB has revised the format of regulatory reporting. The new reporting with a single entity focus is designed to highlight risk assessment and risk management, and will take effect in 2008.

DNB may request any additional information it considers necessary and may conduct an audit at any time. DNB can also make recommendations for improvements and publish these recommendations if the insurance company does not follow them. Finally, DNB can appoint a trustee for an insurance company or, ultimately, withdraw the insurance company's license.

The following insurance entities of AEGON The Netherlands are subject to the supervision of DNB:

AEGON Levensverzekering N.V.

AEGON Schadeverzekering N.V.

AEGON NabestaandenZorg N.V.

AEGON Spaarkas N.V.

OPTAS Leven N.V.

OPTAS Pensioenen N.V.

OPTAS Schade N.V.

In 2007 the three legal entities Spaarbeleg Kas N.V., AXENT/AEGON Sparen N.V. and AEGON Spaarkas N.V. were merged together, resulting in the single licensed entity AEGON Spaarkas NV.

Life insurance companies are required to maintain certain levels of shareholders' equity in accordance with EU directives (approximately 5% of their general account technical provision, or, if no interest guarantees are provided, approximately 1% of the technical provisions with investments for the account of policyholders).

General insurance companies are required to maintain shareholders' equity equal to or greater than 18% of gross written premiums per year or 23% of the three-year average of gross claims.

2.6.2. Banking institutions

AEGON Bank N.V. falls under the supervision of the DNB, pursuant to the Wet Financieel Toezicht, and must file monthly regulatory reports and an annual report. The annual report and one of the monthly reports must be audited.

Banking institutions are required to maintain solvency and liquidity ratios in line with the requirements of the Wet Financieel Toezicht, which incorporate the requirements of the relevant EU directives.

2.7. Asset liability management

The investment strategy of AEGON The Netherlands is determined and monitored by the AEGON NL Risk and Capital Committee (AEGON NL RCC). The AEGON NL RCC meets at least on a quarterly basis. The focus of these meetings is, amongst other things, to ensure an optimal strategic asset allocation, to decide on interest rate hedging strategies to reduce interest rate risks, and to decide on the need for securitizations of residential mortgage portfolios to free funds for further business development.

Most (insurance) liabilities of AEGON The Netherlands are nominal and long-term. Based on their characteristics, a long-term liability-driven benchmark is derived. Scenarios and optimization analyses are conducted with respect to the asset classes fixed income, equities and real estate, but also for various sub-classes, for example commodities, hedge funds and private equity. The result is an optimal asset allocation representing different investment risk-return profiles. Constraints such as the minimum return on equity and the

Table of Contents

maximum solvency risk also determine alternative strategic asset allocations. Most of AEGON The Netherlands' investments are managed in-house by AEGON Asset Management. For certain specialized investments, such as hedge funds and private equity, AEGON The Netherlands hires external managers. Portfolio managers are allowed to deviate from the benchmark based on their short-term and medium-term investment outlook. Risk-based restrictions are in place to monitor and control the actual portfolio allocations compared to their strategic portfolio allocations. An internal framework limits investment exposure to any single counterparty.

AEGON The Netherlands and pension fund PGGM have a joint venture Amvest Vastgoed B.V. for their combined real estate investments. Furthermore, Amvest Vastgoed B.V. manages a separate real estate portfolio of AEGON The Netherlands.

2.8. Reinsurance ceded

Like other AEGON companies around the world, AEGON The Netherlands reinsures part of its insurance exposure with third-party reinsurers under traditional indemnity, quota share, and, in some instances, excess of loss contracts. This is in line with standard practices within the global insurance industry. Reinsurance helps AEGON manage, mitigate and diversify its insurance risks and limit the maximum loss it may incur on risks that exceed policy retention limits.

AEGON The Netherlands remains contingently liable with respect to the amounts ceded, should the reinsurance company fail to meet the obligations it has. To minimize its exposure to such defaults, AEGON The Netherlands regularly monitors the creditworthiness of its primary reinsurers. AEGON The Netherlands has experienced no material reinsurance recoverability problems in recent years. Where appropriate, additional reinsurance protection is contracted either through letters of credit or, alternatively, through trust arrangements. Under certain of these arrangements, funds are withheld for investment by the ceding company.

AEGON The Netherlands reinsures its life exposure through a profit-sharing contract between its subsidiary AEGON Levensverzekering N.V. and Swiss Re, one of the world's leading reinsurance companies. Under this arrangement, AEGON retains exposure of up to a maximum of EUR 900,000 per insured person with respect to death risk and EUR 25,000 a year for disability risk. Any amount in excess of this is transferred to the reinsurer.

For its fire insurance business, AEGON The Netherlands has in place an excess of loss contract with a retention level of EUR 3 million for each separate risk and EUR 20 million for each event. AEGON The Netherlands has reinsured its motor liability business on a similar basis with a retention level of EUR 2.5 million for each event.

Table of Contents

The United Kingdom

3.1. Background

AEGON UK is a leading provider of life insurance and pensions and also has a strong presence in both the asset management and financial advice markets. With offices located in the United Kingdom and Ireland, AEGON UK has some two million customers, more than 4,500 employees and nearly GBP 53 billion in revenue-generating assets under management. AEGON UK's main offices are in four locations: Edinburgh, London, Lytham St. Anne's and Dublin.

3.2. Organizational structure

AEGON UK plc. (AEGON UK) is AEGON UK's principal holding company. It was registered as a public limited company at the beginning of December 1998.

AEGON UK's leading operating subsidiaries are:

Scottish Equitable plc. (trading as AEGON Scottish Equitable)

AEGON Asset Management UK plc.

Origen Financial Services Ltd.

Positive Solutions (Financial Services) Ltd.

HS Administrative Services Ltd.

Guardian Assurance plc.

The company is organized into four distinct businesses:

AEGON Individual, which provides individual customers with pensions, protection, investments and annuities.

AEGON Corporate, which offers a range of products and services for companies and their employees, including pension and protection products, pension scheme administration, trustee support and worksite communication software.

AEGON Asset Management, which provides investment management services for AEGON UK itself, other institutional customers and private investors.

AEGON UK Distribution, which consists of intermediary distribution and advice businesses.

3.3. Overview sales and distribution channels

Edgar Filing: AEGON NV - Form 20-F

AEGON UK's principal means of distribution is through the intermediated financial advice channel, which is the main sales route for long-term savings and retirement products in the United Kingdom. These advisors provide their customers with access to various types of products depending on their regulatory status. They also advise them on the best solution to suit their financial needs.

In all, there are an estimated 35,000 registered financial advisors in the United Kingdom. These advisors may be classified as single-tied, multi-tied, whole of market or independent, depending on whether they are either restricted in the number of providers they deal with or are free to advise on all available products. AEGON UK maintains strong links with financial advisors in all segments of the market. Single-tie relationships have also been established with some advisors who have selected AEGON UK to be the sole provider of a particular product type.

AEGON UK is currently exploring new distribution opportunities including agreements with banks and affinity partnerships with other potential distributors.

3.4. Overview lines of business

AEGON UK has three lines of business:

Life and protection

Pensions and asset management

Distribution

Table of Contents

3.4.1. Life and protection

General description

The AEGON UK life business comprises primarily individual and group protection (group risk), as well as individual and bulk annuities. The protection business provides insurance on individual or groups of lives for major life events such as death, critical illness and total or permanent disability. Annuities are used to convert savings accumulated as part of a pension plan into a regular income throughout retirement. In 2007, the Life and protection line of business accounted for approximately 30 percent of AEGON UK's overall operating earnings before tax.

Products

Individual protection

AEGON UK offers a range of products for individual customers, including life cover, critical illness and income protection. In addition, it also provides products for companies wishing to insure key personnel. In 2007, the company also launched a simplified life-only product to take advantage of new distribution opportunities opening up in the UK market. AEGON UK is now established as one of the United Kingdom's five leading providers of individual financial protection, according to 2007 figures from the Association of British Insurers.

Group risk

Group risk products enable companies to insure benefits they provide employees. These benefits include life cover, critical illness and income protection. Usually, group risk products are sold on a standard basis. Employers are free to select the type of cover they wish. Recently, there has been growth in flexible benefits packages, which are designed to give employees more choice over their benefits packages. AEGON UK has established itself as a recognized specialist in this area.

Immediate annuity

In the United Kingdom, most of the funds in a pension plan must be converted into a source of income by the time the planholder reaches 75, usually through the purchase of an immediate annuity. Recently, the UK market for immediate annuities has become increasingly competitive. Many customers are no longer content simply to buy their annuities from the company that provided their pension. AEGON UK's aim is to ensure its annuity rates are consistently near the top of published rates tables.

Bulk annuities

AEGON UK entered the bulk annuity market in 2007, building on the company's established expertise in administering defined benefit plans. The group annuity market is growing rapidly as an increasing number of defined benefits plans in the United Kingdom are closed (see Corporate Pensions, below). Bulk annuities are designed specifically for trustees who wish to wind up already closed defined benefit plans. The contract includes a secured benefit product, under which all deferred and immediate pensions are bought out via a trustee policy prior to the plan being wound up. Once the winding-up process is complete, individual deferred and immediate annuity policies are then assigned to the plan's members.

Sales and distribution

Protection and annuity products are distributed predominantly through intermediated advice channels. Group risk, however, is distributed primarily through a small number of specialist employee benefit consultancies.

3.4.2. Pensions and asset management

General description

Pensions and asset management constitute AEGON UK's most important lines of business. In 2007, they accounted for more than 75 percent of the AEGON UK's overall operating earnings before tax.

Recent years have seen considerable change in the United Kingdom's pension market. In 2006, the UK government introduced a simpler and more unified tax regime for pensions. This new regime was part of a broader reform of pensions in the United Kingdom. AEGON UK has successfully adapted its products and services to meet the challenges posed by this changing environment. As a result, the company's pension

business has enjoyed a period of sustained sales growth.

Recent reform has also allowed AEGON UK to sell more specialized pensions. In particular, demand has been growing for phased retirement products that allow customers flexible access to pension income when they retire, without having to convert their savings into an annuity until they reach the age of 75.

Self-invested pensions are also becoming more popular in the United Kingdom, helped by changes to legislation and an increasing desire among many people to retain direct control over their investments and personal finances as they save for retirement. These products allow planholders to invest in a wider range of investment vehicles than was possible before.

Products

Individual pensions

AEGON UK provides a wide range of personal pensions as well as associated products and services. These include:

Flexible personal pensions

Table of Contents

Self-invested personal pensions (SIPPs), which provide a range of pre- and post-retirement investment options for high net worth customers, including insured funds and real estate

Transfers from other retirement plans

Phased retirement options and income drawdown

Stakeholder pensions (a type of personal pension specific to the United Kingdom which has a maximum limit on charges and low minimum contributions)

According to figures from the Association of British Insurers, AEGON UK is one of leading providers of SIPPs and specialist phased income pensions.

Corporate pensions

One of AEGON UK's largest businesses is providing pension plans for companies. In recent years, there has been a pronounced trend away from defined benefit (DB) arrangements, which provide a guaranteed percentage of salary on retirement, toward defined contribution (DC) plans. DC plans are similar to personal pensions with contributions being paid into a plan owned by individual employees and then invested. Generally, at retirement, employees can choose to take a predetermined percentage of tax-free cash from their pension plan, using the remainder either to purchase an annuity or else to invest in a separate drawdown policy until they reach the age of 75.

As a result of this trend, the market for new DB plans has shrunk dramatically in recent years, largely because of concerns over long-term liabilities. There are, however, opportunities for AEGON UK to take on the administration and management of existing plans.

AEGON UK has also recently launched a group self-invested personal pension designed to extend to group pension customers the benefits associated with individual SIPPs, such as greater investment choice.

Investment products

AEGON UK offers two types of investment bonds designed for customers residing in the United Kingdom: the onshore bond and offshore contracts⁴.

The onshore bond is a type of life contract, aimed primarily at pre- and post-retirement customers looking for either a source of income or a way of growing their savings. The bond offers a wide range of investment options and funds, managed by some of the world's leading asset managers.

While the onshore bond is aimed at a mass affluent market, AEGON UK's offshore contracts have traditionally been marketed to high net worth individuals. Offshore contracts offer considerable tax advantages and a wide choice of investment options. These contracts tend to form part of a broader retirement strategy, primarily because there are fewer restrictions on how and when benefits may be taken.

Through an offshore contract, AEGON UK also offers customers in the United Kingdom the Group's 5 for Life product. 5 for Life is an innovative variable annuity-style product that carries a guaranteed income for life. 5 for Life was first developed in the United States before being adapted for the UK market and launched there in 2006.

AEGON UK also offers a range of trusts designed to support inheritance tax planning. This is an area of growing demand as recent economic growth and rising wealth means more estates are falling under UK Inheritance Tax. Trusts help individuals manage and alleviate potential tax liabilities.

Asset management

With some GBP 53 billion in revenue generating investments, AEGON UK is one of the United Kingdom's leading institutional investors. AEGON Asset Management offers:

Institutional funds

A diverse range of pooled and segregated investment solutions

Retail funds

A range of fixed income solutions, including corporate bond funds

Equity investments with global market coverage, including a range of UK funds

Ethical funds investing in bonds and equities

Life and pensions

An extensive range of life and pension funds on behalf of AEGON UK

Sales and distribution

Investment products as well as individual and corporate pensions are distributed widely through independent financial advisors, tied distribution and, more recently, through partnerships with banks. In addition, AEGON UK also maintains close relations with a number of specialist advisors in these markets. For benefit solutions software, AEGON UK works with a select number of distributors in the corporate market.

⁴ The onshore bond is provided by AEGON Scottish Equitable. The offshore contracts are offered by AEGON Scottish Equitable International.

Table of Contents

AEGON Asset Management focuses on large employee consultancies that advise institutional clients, on fund supermarkets and on specialist discretionary investment advisors for retail clients.

3.4.3. Distribution

Through the company's Origen and Positive Solutions businesses, AEGON UK also provides financial advice directly to both individuals and companies.

Origen is a leading financial adviser firm, with strong positions in both the corporate and high net worth individual markets. It promotes its services through a variety of different sales channels, including face-to-face, media and worksite marketing, as well as accessing customers through professional contacts with accountants and lawyers.

Positive Solutions, meanwhile, is one of the largest and fastest-growing adviser networks in the United Kingdom.

3.5. Competition

AEGON UK faces competition in each of its markets from three main sources: life and pension companies, investment management companies, and financial advice firms.

Over the past few years, the life and pension market has been increasingly concentrated among the largest companies and those perceived to be financially strong.

The market for investment management services is more fragmented, but very competitive in certain specific segments and activities.

The financial advisor market in the United Kingdom is fragmented, with a large number of relatively small firms. The removal of polarization rules in the advice market in 2005 has led to advisors choosing to operate on a multi-tied, single-tied, whole of market, or independent basis. More recently, there has been significant consolidation in this market. Further consolidation is expected as a result of financial pressures in the market. Even so, fragmentation remains high. There are few firms with a genuine nationwide presence or a well-known brand outside specific local areas.

3.6. Regulation

All relevant AEGON UK companies are regulated by the Financial Services Authority under the United Kingdom's Financial Services and Markets Act 2000.

The Financial Services Authority acts both as a prudential and conduct of business supervisor. As such, it sets minimum standards for capital adequacy and solvency, and regulates the sales and marketing activities of regulated companies. New rules relating to capital requirements for life insurers were implemented in December 2004.

All directors and some senior managers of AEGON UK undertaking particular roles (e.g. finance/actuarial, fund managers, dealers, and salesmen) have responsibilities to the Financial Services Authority as Approved Persons. As such, they are subject to rigorous pre-appointment checks on their integrity and competence, and are subject to ongoing supervision throughout their mandate as Approved Persons and for a limited period afterwards.

The AEGON Scottish Equitable International business includes the Dublin-based life insurance company, Scottish Equitable International (Dublin) plc. (authorized by the Irish Financial Services Regulatory Authority and regulated by the United Kingdom's FSA for conduct of UK business), as well as a Dublin-based service company, Scottish Equitable International Services plc.

3.7. Asset liability management

Asset liability management (ALM) is overseen by the AEGON UK ALM Committee, which meets each month to monitor capital requirements and ensure appropriate matching of assets and liabilities.

For its with-profit business, AEGON UK's general philosophy is to match guarantees with appropriate investments. However, the nature of with-profit businesses typically prevents perfect matching, and the role of the committee is therefore to monitor the capital implications of any

Edgar Filing: AEGON NV - Form 20-F

mismatching. On an annual basis, detailed reports are produced for the relevant subsidiary Boards covering the impact of a range of possible investment scenarios on the solvency of each of the funds. These reports allow the central investment strategy for the with-profit funds to be discussed and are summarized for the Board of AEGON UK. During 2006, the investment strategies of the funds were reviewed using economic capital measures and some refinements were made as a result. This work continued in 2007 and further reviews will be carried out in the future.

For unit-linked business, the matching philosophy results in close matching of the unit liabilities with units in the relevant underlying funds. A proportion of the unit-linked assets is invested in funds managed by external investment managers. An investment committee, which reports to the relevant subsidiary Boards, meets each month to monitor the performance of the investment managers against fund benchmarks and, as appropriate, sets benchmarks/risk profiles for funds.

In addition to monitoring risk exposures in compliance with AEGON N.V.'s worldwide Risk Management strategies, investment exposure to any single counterparty is limited by an internal framework that reflects the limits set by the appropriate regulatory regime. This applies both within asset classes (equities, bonds and cash) and across all investments.

Table of Contents

With-profit funds

The invested assets, insurance and investment contract liabilities of AEGON UK's with-profit funds are included in for account of policyholder assets and liabilities. Assets and liabilities are always equal as any excess of assets over liabilities in respect of guaranteed benefits and constructive obligations are classified as an insurance or investment contract liability. The Scottish Equitable with-profit fund is a 100:0 fund, where all benefits are held for participating policyholders. The Guardian Assurance plc with-profit fund is a 90:10 fund where AEGON UK receives 10% of the surpluses distributed to policyholders. The amount of profit AEGON UK derives from the Guardian fund is driven by the level of declared bonuses.

The operation of with-profit funds is complex. What is set out below is a brief summary of our overall approach:

Guarantees

With the exception of 5 for Life, which is written in Dublin, all AEGON UK contracts with investment guarantees have been written in policyholder-owned funds (otherwise called with-profit funds). These funds contain free assets, which, as yet, have not been distributed to individual policyholders. Free assets help meet the cost of guarantees and provide a buffer to protect the fund from the impact of adverse events. AEGON UK has an exposure only once these assets have been exhausted. As outlined below, AEGON believes this exposure to be low.

In previous years, Scottish Equitable and Guardian Assurance sold guaranteed annuity products in the United Kingdom. Certain policies also have a guaranteed minimum rate of return or guaranteed death or other benefits. Any guaranteed rates of return only apply if the policy is kept in force to the dates specified, or on the events described in the policy conditions. The costs of all guarantees are borne by the with-profit funds and therefore impact the payouts to with-profit policyholders. AEGON UK's main with-profit classes are summarized in the following sections.

Scottish Equitable plc.

As part of its demutualization process before being acquired by AEGON N.V., on December 31, 1993, the business and assets of Scottish Equitable Life Assurance Society were transferred to Scottish Equitable plc. AEGON UK has no financial interest in Scottish Equitable plc's with-profit fund, apart from routine yearly fund management charges, as well as costs and expenses that the company agreed to accept at the time of demutualization.

Guaranteed rates of return on with-profit policies are typically in the range of 0% to 5.5% a year, with the highest rates closed to new premiums in 1999 and all funds closed to new business with investment guarantees from October 2002, except for a low level of increments.

Under a number of contracts written mainly in the 1970s and 1980s, Scottish Equitable also offered minimum pension guarantees (including guaranteed annuity options). As life expectancy rates have improved and interest rates have fallen over time, these minimum guarantees are now often valuable.

Guardian Assurance plc

The AEGON UK interest in Guardian Assurance plc's with-profit fund is 10% of profits in the fund, with the remaining 90% going to with-profit policyholders. In 1998, prior to Guardian Assurance's acquisition by AEGON UK, the with-profit fund was restructured and closed to new business, except for a low level of increments.

Guaranteed returns on policies without guaranteed cash options or annuity payments are typically 0% to 3.5% a year. On policies with guaranteed cash options or annuity payments, guaranteed returns depend on the value of the options at retirement.

Management of the with-profit funds

It has been AEGON UK's practice to have an investment strategy for each of its with-profit funds that reflects the nature of the underlying guarantees. Funds can invest in a variety of different asset types. The main categories are United Kingdom and overseas equities, United Kingdom fixed interest securities, property and cash. Each with-profit fund has a target range for the percentage of its assets that are invested in a combination of equities and property. These ranges may be varied. Within the target ranges, there is a policy of holding an appropriate mix of asset classes to reduce risk.

The results of the with-profit funds' investment performance is distributed to policyholders through a system of bonuses which depend on:

The guarantees under the policy, including previous annual bonus additions.

The investment returns on the underlying assets, with an allowance for smoothing to reduce volatility. Although smoothing means that investment profits are spread from one year to the next, the aim is to pay out all of the investment profits earned by the fund over the long term. On early withdrawals there are other measures to ensure that a fair share of total fund growth has been received. Indeed, a market value reduction may be applied under certain funds when, for cohorts of similar contracts, the face value of the benefits is greater than the value of the underlying assets. Policy conditions may state specific points at which a market value reduction will not apply.

As mentioned above, the free assets (i.e. assets which, as yet, have not been distributed to policyholders) help meet the cost of guarantees and provide a buffer to deal with adverse events. AEGON UK has an exposure only once these free assets have been exhausted. This has been assessed by AEGON UK to be immaterial (by applying the risk-based capital approach now required for solvency reporting in the United Kingdom).

Table of Contents

As all of AEGON UK's with-profit funds are now closed to new business with investment guarantees, the process has begun of gradually distributing free assets to with-profit policyholders through the bonus system outlined above. Part of the management of this process involves endeavoring to ensure that any surpluses in the with-profit fund from other (historic) business lines can be distributed to existing with-profit policyholders at a suitable rate. In particular, Guardian Assurance plc has reinsured blocks of immediate annuity business to another part of AEGON UK on terms that reflect prevailing market rates. This helps avoid a tontine effect building up in the fund, as the number of with-profit policyholders declines.

3.8 Reinsurance ceded

AEGON UK's reinsurance strategy is aimed at limiting overall mortality and morbidity volatility and maximizing any tax benefits that reinsurance can bring. The actual percentage of business which is reinsured of course varies, depending chiefly on the availability and price of reinsurance on the market.

Prior to 2002, AEGON UK adopted a similar approach to longevity risk. Since then, however, AEGON UK has considered the terms available in the reinsurance market for longevity risk to be relatively unattractive compared to the margins expected from this business and the diversification benefits available to the company by retaining this risk.

AEGON UK prefers to work only with reinsurance companies that have a credit rating of AA or above. Using a reinsurer with a lower credit rating would require the approval of AEGON UK's local risk and capital committee as well as prior discussion with AEGON's Group Risk division in The Hague. Over the past few years, AEGON UK has maintained its approach despite reinsurance companies suffering periodical downgrades.

Table of Contents

OTHER COUNTRIES

4.1. Background

In the past few years, AEGON has significantly expanded its international presence outside its three main established markets of the United States, the Netherlands and the United Kingdom. AEGON is now present in more than twenty markets in total in Europe, the Americas and in Asia.

In particular, AEGON has seen strong growth in its businesses in Central and Eastern Europe, as well as in other new, emerging markets such as China and Taiwan.

4.1.1 Central and Eastern Europe

AEGON first entered the Central and Eastern European market in 1992 when the Group bought a majority stake in Hungary's former state-owned insurance company, Állami Biztosító. Hungary remains AEGON's leading business in the region and a springboard for further expansion. Today, AEGON has operations in five Central and Eastern European countries: Hungary, Poland, the Czech Republic, Slovakia and Romania.

4.1.2. Asia

AEGON opened its first business in Asia in 1993 in Taiwan. Since then, the Group has expanded its operations in the region. AEGON today has businesses in China, India, Japan and Taiwan⁵.

AEGON Taiwan began operations in 1994 as a branch of Life Investors, part of AEGON USA. Over the following years, AEGON Taiwan rapidly expanded its activities, including the acquisition of the AFLAC and AXA portfolios in Taiwan, and the merger with Transamerica Taiwan. In December 2007, AEGON entered a joint venture agreement with Taishin Financial Holding Co., one of the leading private banks in Taiwan with a four million customer base, to extend bancassurance businesses.

In 2002, AEGON signed a joint venture with China National Offshore Oil Corporation (CNOOC), China's leading offshore oil and gas producer. AEGON-CNOOC began operations in May 2003. The joint venture is licensed to sell both life insurance and accident and health cover in mainland China.

Since 2003, AEGON-CNOOC has been steadily extending its network of offices and businesses in China. It now has licenses in six different locations—Shanghai, Beijing, Jiangsu, Shandong, Zhejiang and Guangdong. These locations give the joint venture access to a potential market of some 200 million people, most of them in the booming coastal provinces of eastern China.

In May 2007, AEGON agreed to form an asset management joint venture with China's Industrial Securities, one of the country's leading securities companies. Under the agreement, AEGON will take a 49 percent interest in Industrial Fund Management Company, a mutual fund manager with approximately EUR 1.7 billion in assets under management. The joint venture with Industrial Securities marked an important step for AEGON, further strengthening its commitment to the Chinese market and extending the Group's range of businesses in the country.

In addition to Taiwan and China, AEGON is also present in India and Japan. In 2006, AEGON agreed to form a new life insurance and asset management partnership in India with the Ranbaxy Promoter Group for which operations are expected to start in 2008. In early 2007, AEGON announced it had signed a new joint venture with Sony Life, one of Japan's leading insurance companies. This joint venture will initially focus on variable annuities, but the agreement also provides a platform for further cooperation between AEGON and Sony Life.

4.1.3. Western Europe (Spain and France)

In addition to the United Kingdom and the Netherlands, AEGON has a presence in two other western European countries: Spain and France.

AEGON first entered the Spanish market in 1980 when it bought local insurer, Seguros Galicia. In recent years, AEGON's activities in Spain have grown rapidly, mainly due to distribution partnerships with some of the country's leading savings banks. AEGON Spain operates through two subsidiaries: AEGON Seguros Salud and AEGON Seguros de Vida. Administration and operational services to all companies in Spain, including joint ventures with third parties, are provided by AEGON Administracion y Servicios A.I.E., a separate legal entity. In addition AEGON operates through partnerships with Caja Mediterraneo (CAM), Caja Navarra, and Caja Badajoz.

Edgar Filing: AEGON NV - Form 20-F

In July 2007, AEGON signed a partnership agreement with Caja Cantabria, one of the largest savings banks in northern Spain. AEGON's share in the new company will be 10% in the first year of its operation. After this period, AEGON has the option to acquire another 40% of Cantabria Vida, the new life insurance and pensions joint company. The transaction is subject to regulatory approval.

At the end of 2002, AEGON also agreed a partnership with mutual insurer La Mondiale, one of France's leading insurance and pension companies. AEGON has a 35 percent interest in La Mondiale's subsidiary company La Mondiale Participations. La Mondiale Participations offers a wide range of life insurance, pension, savings, investment, asset management and accident and health products to both corporations and individual retail customers.

⁵ This refers only to AEGON-owned operations and joint ventures. It does not include AEGON Direct Marketing Services or Transamerica Re.

Table of Contents

4.2. Organizational structure

AEGON's other international businesses operate through a number of subsidiaries and joint venture partnerships. These international businesses are referred to collectively as "Other Countries".

AEGON's main subsidiaries and affiliates are:

Central and Eastern Europe

AEGON Hungary Composite Insurance Company Limited by Shares

AEGON Hungary Investment Fund Management Company Limited by Shares

AEGON Hungary Pension Fund Management Company Limited by Shares

AEGON Hungary Mortgage Company Limited by Shares

AEGON Hungary Real Estate Limited Company

AEGON Poland Life Insurance Company

AEGON Slovakia Life Insurance Company

AEGON Partner Company (Slovakia)

AEGON Pension Fund Management Company (Slovakia)

AEGON Voluntary Pension Fund Management Company (Slovakia)

AEGON Life Insurance Company (Czech Republic)

AEGON Voluntary Pension Fund Company (Czech Republic)

BT-AEGON Pension Fund Management Company, 50% (Romania)

Asia

AEGON Life Insurance (Taiwan) Inc.

AEGON-CNOOC Life Insurance Co. Ltd.
Western Europe (Spain and France)

AEGON Seguros Salud

AEGON Seguros de Vida

AEGON Administracion y Servicios A.I.E

Mediterraneo Vida, 49.99%

Caja Badajoz Vida y Pensiones, 50%

CAN Vida y Pensiones, 50%

Cantabria Vida y Pensiones, 10%

La Mondiale Participations, 35%

4.3. Central and Eastern Europe

AEGON's activities in Central and Eastern Europe operate through a number of different sales channels. These include tied agents, insurance brokers and, particularly in Poland and Romania, retail banks. Through tied agents, brokers and call centers, AEGON sells primarily life and non-life insurance and pensions. Banks and loan centers are used to sell mainly life insurance, mortgages pensions and household.

4.3.1 Life and protection

AEGON companies in Central and Eastern Europe offer a range of life insurance and personal protection products. This range includes traditional life as well as unit-linked products. Sales of unit-linked products in the region have shown a considerably higher rate of growth than traditional general account products in recent years. Unit-linked products cover all types of life insurance, including pension, endowment and savings. In Poland, AEGON is the leading provider of single premium life insurance via its unit-linked products, offering a range of more than 100 different investment funds.

Traditional general account life insurance is a marginal product for most of the region's businesses. The exception is Hungary. Traditional general account includes mainly index life products that are not unit-linked but guaranteed rates of interest. AEGON Hungary no longer offers these products.

Group life and preferred life are also part of traditional general account life. Group life contracts are renewable each year. They also carry optional accident and health cover. AEGON offers savings products in Central and Eastern Europe as part of employee benefit programs. These products include guaranteed interest rate returns.

Edgar Filing: AEGON NV - Form 20-F

The main guarantee in Hungary is variable crediting rates with minimum interest guarantees between 0% and 4% for universal life type products, plus 100% participation in actual interest earned. Traditional non-profit share products have 5.5% technical interest rates, but this is a declining block of business. Profit share products mainly have a 3.5% technical interest rate and 85% participation in excess interest. The average minimum interest guarantee is about 3.4%.

In Hungary, a small part of the current new business provides a minimum interest guarantee of 2%. In Poland, an insurance fund with minimum rate reset quarterly and annually is offered on unit-linked products. In Slovakia the current minimum interest rate on universal life products is 3%. Universal life products in the Czech Republic have a guaranteed interest rate of 2.4%.

From 2006, AEGON Hungary has been offering mortgages to retail customers. Home loans are Swiss franc denominated and provided by AEGON Mortgage Co., a subsidiary of AEGON Hungary Composite Insurance Company. AEGON is targeting a share of between 5 and 10 percent of the Hungarian mortgage market in terms of new sales.

Table of Contents

4.3.2 Individual savings and retirement products

AEGON companies in Central and Eastern Europe offer a variety of individual savings and retirement products. AEGON Hungary Investment Fund Management Company, a subsidiary of AEGON Hungary Composite Insurance Company, offers a range of mutual funds to retail investors. Besides this AEGON Life Insurance offers unit-linked investment products in the Czech Republic.

4.3.3 Pensions and asset management

Pensions

AEGON's pension business in Central and Eastern Europe has experienced considerable growth in recent years. This is due mainly to the region's strong economic growth and widespread reform of the pension system in many countries. In four of the five countries in which AEGON has businesses, AEGON has introduced mandatory pension plans: in Hungary, Slovakia, Poland and Romania. Additionally in three countries, AEGON has launched voluntary pension plans: in Hungary, Slovakia and the Czech Republic.

The mandatory pension fund in Romania was launched in 2007, following a partnership agreement signed with Banca Transilvania, to set up a joint pension company ahead of the introduction of the country's new mandatory retirement system in early 2008. AEGON voluntary pension funds in Slovakia and in the Czech Republic also started to operate in 2007. In Hungary, Slovakia, Poland and Romania, AEGON now has a total of 1.3 million pension fund members.

AEGON's mandatory pension funds in Hungary and Slovakia, as well as the voluntary pension fund managed by AEGON Hungary, are among the largest in their countries in terms of both membership and assets under management⁶.

AEGON's ambition is to continue expanding its pension operations in Central and Eastern Europe both by growing its existing businesses and by searching out opportunities to extend its activities into new countries and new markets. By 2010, AEGON wants to attain a 10 percent share of Central and Eastern Europe's mandatory pension market and increase the overall membership of its pension funds in the region to at least 2 million.

At the same time, AEGON remains alert for possible acquisition opportunities, both in the Group's existing markets and in new countries. In particular, AEGON has made it clear it is looking to enter the Ukrainian market in the near future.

In 2007, AEGON purchased PTE Ergo Hestia, one of Poland's pension fund management companies. The company was renamed as AEGON PTE. Currently, AEGON is planning to merge with PTE Skarbiec-Emerytura, a pension fund management company belonging to Poland's BRE Bank. PTE Skarbiec-Emerytura manages the accounts of over 440,000 members. If successful, this transaction would increase the number of AEGON pension fund members in Central and Eastern Europe to 1.8 million.

Asset management

AEGON provides a range of asset management services through AEGON Hungary Investment Fund Management Company. Thus AEGON Hungary Investment Fund Management Company:

manages the general account assets, unit-linked portfolio and pension plans of AEGON Hungary;

manages the guaranteed fund and the special bearish fund of AEGON Poland;

provides asset management services to third parties in Hungary;

provides asset management services to AEGON Voluntary Pension Fund Company in the Czech Republic;

manages the assets of 15 AEGON mutual funds; and

oversees all AEGON investment activities in the Central and Eastern European region.

4.3.4 General insurance

In addition to life insurance and pensions, AEGON Hungary offers non-life cover (household, car insurance and some wealth industrial risk). Generally, these are products and services inherited from Állami Biztosító, the former state-owned insurance company acquired by AEGON in 1992. In recent years, margins on household insurance in Hungary have been attractive. Moreover, household insurance provides considerable opportunities for cross-selling life insurance. Property and car insurance are also included in AEGON Hungary's portfolio but neither are considered core businesses.

4.3.5 Competition

AEGON is among the biggest players on the life insurance markets in both Poland and Hungary. Based on 2006 premium income, it is the third largest in Poland and the fourth largest in Hungary (source: www.knf.gov.pl and Annual Report of Hungarian Insurance Association 2007). On the non life insurance market, AEGON is the fourth largest in Hungary based on premium income (source: Annual Report of Hungarian Insurance Association 2007). As AEGON Slovakia was incorporated in 2003 and AEGON Czech in 2004 only, AEGON is a less significant player in these countries.

On the Hungarian mandatory pension fund market, AEGON was ranked second in terms of the number of members and third in terms of its managed assets at the 2006 year-end. On Hungary's voluntary pension fund market, AEGON was ranked third in terms of the number of members and fifth in terms of its managed assets in 2006. (Source: www.pszaf.hu). Slovakia started a reform of its pensions system in January 2005. In terms of managed assets AEGON was ranked fifth on the Slovakian market at the end of 2006 (Source: Association of Pension Fund Management Companies).

⁶ Source: the Association of Pension Fund Management Companies, Slovakia (www.adss.sk) and Hungarian Financial Supervisory Authority (www.pszaf.hu).

Table of Contents

4.3.6 Regulation

In Central and Eastern Europe insurance companies can be licensed only for separate businesses; that is, a single company can conduct either life insurance or non-life insurance but not both together. However, in Hungary, insurance companies established before 1995, including AEGON Hungary, are exempt from this rule. All of the acts regulating the foundation, operation, and reporting obligations of insurance companies in this region comply with EU regulations.

State supervision and oversight of the insurance industry is conducted by the following bodies and institutions:

the Hungarian Financial Supervisory Authority (HFSA), which has a department dealing exclusively with the insurance sector;

the National Bank of Slovakia;

the Czech National Bank; and

the Polish Financial Supervisory Authority (PFSA).

The above-mentioned authorities promote consumer protection and have the right to investigate prudential activities and conduct, financial position and solvency, and compliance with all relevant laws.

In addition to legal regulation, insurance companies are subject to a number of self-regulatory bodies in their respective countries. These self-regulatory bodies are the main forums for discussion among insurance companies. Their specialized departments (e.g., actuarial, financial, and legal departments) meet periodically. They also engage in lobbying activities.

As one of the largest institutional investors in Hungary, the investment operations of AEGON Hungary are also regulated by the country's Capital Markets Act (CXX. 2001). This Act regulates the activity of brokerage houses, investment funds, fund managers, custodians, stock exchanges, settlement houses and the HFSA. Its main goal is to ensure the transparent operation of capital markets, to develop the regulation of market participants, and to enhance investment security. The Act conforms to relevant EU regulations. Effective from 8 May, 2006 AEGON Hungary Investment Fund Management Company was licensed for managing European investment funds and thus from this date it can manage UCITS funds. This activity is also regulated by the Capital Markets Act.

In Hungary, the foundation and operations of mandatory and voluntary pension funds are regulated by the country's Act on Private Pension and Private Pension Funds (LXXXII. 1997) and its Act on Voluntary Mutual Pension Funds (XCVI. 1993. respectively. Although, for AEGON, these activities are outsourced to AEGON Hungary Pension Fund Management Company, its operations must still comply with this legislation. This activity is also supervised by the HFSA. Slovakia's pensions market is regulated by Act 43/2004 on pension asset management companies and respective notices. In Romania the private pension system is regulated and supervised by the Private Pension System Supervisory Commission (PPSSC) and is subject to Act 411/2004 on Privately Administered Pension Funds. In Poland this activity is supervised by the Polish Financial Supervisory Authority (PFSA) and is governed by Act as of 28 August 1997 on Organization and Operation of Pension Funds. In the Czech Republic the voluntary pension funds fall under the supervision of the Czech National Bank and are regulated by Act 42/1994 on State-Contributory Supplementary Pension Insurance.

In Hungary, the Act on Credit Institutions and Financial Enterprises (CXII. 1996.) regulates the foundation, operation and reporting obligations of all the country's financial institutions (including AEGON Credit). In addition, AEGON Credit Finance Company falls under the supervision of the Hungarian Financial Supervisory Authority (HFSA).

As a joint stock institutional investor in Poland, the overall investment operations of AEGON Poland are regulated by the country's Commercial Code. The Commercial Code applies to all commercial activities in Poland.

4.3.7 Asset liability management

Asset liability management is overseen by the Regional Risk and Capital Committee that meets on a quarterly basis. AEGON CEE's asset liability management focuses on asset liability duration calculations. During these meetings the performance of portfolios is being evaluated.

4.3.8 Reinsurance ceded

AEGON takes out reinsurance for both its life and its non-life businesses in Central and Eastern Europe. As elsewhere, this strategy is aimed at mitigating insurance risk. AEGON's companies in the region work only through large reinsurers active in the European market with a Standard & Poor's rating of at least A.

The three most important reinsurance programs currently in force are (with retention levels indicated in parentheses):

Property catastrophe excess of loss treaty (EUR 5.9 million);

Motor third party liability excess of loss treaty (EUR 0.4 million);

Property per risk excess of loss treaty (EUR 1.2 million).

The majority of treaties in force for AEGON's operations in Central and Eastern Europe are non-proportional excess of loss programs.

4.4. Asia

As elsewhere around the world, AEGON operates through a number of different sales channels in Asia. In Taiwan, AEGON has a network of more than 700 professional agents. In addition, AEGON Taiwan works through independent brokers and banks, and uses group, worksite and direct marketing to ensure customers are able to receive the financial products they want in a way that suits them best. Each of these channels provides products tailored to customers' requirements and the market segments they serve.

Table of Contents

In December 2007, AEGON signed an agreement with Taishin Financial Holding Co. to establish a life insurance and pension joint venture in Taiwan. Taishin, one of Taiwan's leading financial institutions, will hold 51 percent of the joint venture and AEGON the remaining 49 percent. The joint venture will distribute AEGON products through the extensive Taishin network, which includes Taishin Bank, Taishin Securities, Taishin Insurance Agency and Taishin Insurance Brokers and has a customer base of four million. The joint venture is expected to be operational by mid-2008, subject to final agreement, licensing and regulatory approval.

Similarly, in China, AEGON works through agents, independent brokers, banks and direct marketing to sell the products. Agents and brokers in China distribute mainly life insurance. With the booming of China's stock market, variable life products have been the most important product for AEGON's bank partners. Personal accidental products are the main products sold through the direct marketing channel.

Banks are becoming increasingly important in Asia as a means for distributing pensions, life insurance and other long-term savings and investment products. For this reason, AEGON has been striving in recent years to extend its bank distribution agreements in the region. AEGON now has partnerships in place with many of China's national banks, including:

Industrial and Commercial Bank of China

Agricultural Bank of China

Communications Bank

China Merchants Bank

China Post

Bank of China

China CITIC Bank

China Construction Bank

Industrial Bank

AEGON's bancassurance network in China now totals 800 outlets.

In June 2007, AEGON signed a memorandum of understanding with Taishin Financial Holding Co. Ltd. to establish a life insurance and pension joint venture in Taiwan. Taishin, one of Taiwan's leading financial institutions, will hold 51 percent of the joint venture and AEGON the remaining 49 percent. The joint venture will distribute AEGON products through the extensive Taishin network, which includes Taishin Bank, Taishin Securities, Taishin Insurance Agency and Taishin Insurance Brokers and has a customer base of 4 million. The joint venture is expected to be operational by mid-2008, subject to final agreement, licensing and regulatory approval.

4.4.1 Life and protection

AEGON provides a broad range of life insurance products through its businesses in both Taiwan and China. These include unit-linked and traditional life products, as well as endowment, term, health, group life, accident and annuities.

Edgar Filing: AEGON NV - Form 20-F

Unit-linked products are now AEGON Taiwan's top-selling product lines after efforts were made in 2005 to improve the products and better adapt them to the needs of customers. These unit-linked products offer a wide variety of investment options, including access to AEGON's innovative stable value fund. AEGON Taiwan ranks number seven in the market in 2007 in terms of APE of unit-linked products.

The most significant guarantees in Taiwan relate to individual life products with fixed premiums. These products carry interest guarantees at various levels. The current new business provides interest guarantees mostly at 2%. The average in force guarantee rate is approximately 3.3%. Business issued in 2003 and prior also carries the Ministry of Finance Dividend that requires the insurance company to pay to the policyholder a dividend referring to industry mortality experience and the average two-year term deposit rates.

AEGON-CNOOC launched its first variable life product in April of 2007. In some cities like Shandong and Jiangsu AEGON-CNOOC was the first insurer providing variable life product through bank partners. Due to the bull stock market, the share of variable life product increased very quickly and it has been the top product with around 60% share of new business in 2007. The above mentioned variable life products do not offer any interest guarantee. The main products through the agency and broker channel are still universal life products with 2.5% minimum interest guarantee and participating life products with a 2.5% technical interest guarantee rate. With the coming variable life products sold through agents and independent brokers, the share of universal and traditional life products are expected to decline. The core products sold via the direct marketing channel are one year renewable personal accidental products and traditional endowment products with 2.5% technical interest rate.

4.4.2 Competition

Taiwan

Taiwan's life insurance market ranks number 9 in the world and number 4 in Asia in terms of total premiums in 2006 (Source: SwissRe Sigma Report No 4/2007). Between 2000 and 2006, life insurance premium income in Taiwan grew at an average 16.7% a year according to statistics released by the Life Insurance Association of the Republic of China. At the end of 2007, there were 29 life insurance companies in Taiwan, 13 of which were domestic companies and 16 of which were foreign company subsidiaries or branches of foreign companies. In 2007, up to November, insurance premiums totaled NTD 1,690 billion, with the top five companies accounting for around 63%.

The Taiwanese bancassurance channel has continued to develop very rapidly with the introduction of new regulations facilitating the formation of financial holding companies, which allow banks to broaden their activities to include insurance. Taiwan's low interest rate environment has propelled an increase in sales of variable, participating, and interest-sensitive life and annuity products, which now dominate the market. The retirement market is blooming due to the aging population and implementation of the Taiwan Pension Act in 2005.

Table of Contents

Among all the foreign companies, AEGON ranked sixth in terms of new business premium income for the year of 2007 up to November (Source: Life Insurance Association of the Republic Of China).

China

Since 1990, with the reform of China's economic system, China's insurance market is developing very quickly. At the end of 2007, there were 51 life insurers having business in China, among which 24 were foreign companies. China's life insurers collected premium of RMB 413.2 billion in 2006, a growth of 11.67% comparing to 2005. Foreign insurers accounted around 6% of total premium income, while in the cities where foreign insurers entered earliest like Beijing and Shanghai their shares are 21% and 19%.

Tied agents are still the main channel in selling life insurance. In 2006, more than 50% of the premiums were derived from tied agents. The bank channel is growing very quickly and in 2006 the premium income was RMB 8 billion, a growth of 30% comparing to the year before. With the introduction of new regulations to encourage the brokerage channel, this channel is also growing rapidly with a growth of 38% in 2006.

4.4.3 Regulation

Taiwan

AEGON Taiwan is subject to regulation and supervision by the Financial Supervisory Commission in Taiwan. Regulation covers the licensing of agents, the approval of insurance policies, the regulation of premium rates, the establishment of reserve requirements, the regulation of the type and amount of investments permitted, and the prescription of risk-based capital requirements.

China

China Insurance Regulatory Commission (CIRC) is the entity in regulating and supervising all insurance companies in China. CIRC promotes consumer protection, sets the regulation of premium rates and reserve requirements, and has the right to investigate the financial position and solvency of the life insurers.

4.4.4 Asset liability management

Taiwan

Asset liability management is an integral part of AEGON Taiwan's ongoing risk management process. AEGON Taiwan's asset liability management policy aims to achieve a reasonable match between the durations of assets and liabilities and to reduce total risk while achieving a reasonable investment yield. To achieve these objectives, specific risk limits are established for the investment portfolio. These take into account the general account liabilities as defined in AEGON Taiwan's investment policy statement.

China

A monthly asset liability management meeting is held to discuss duration and liquidity management. The duration of liabilities and assets are calculated separately by block and the duration-gap is analyzed. Considering that most insurance liability is derived from 5-year and whole life single-premium products, AEGON-CNOOC purchased corporate bonds, government bonds, and statutory deposits to match this liability while operating funds are invested in the short-term bond, money-market fund and bond repurchase markets in order to achieve higher investment returns.

The respective Risk and Capital Committees of AEGON Taiwan and AEGON-CNOOC meet every quarter to manage and monitor asset and liability matching using the result of stress-test scenarios based on Economic Capital Model, liquidity tests and duration mismatch tests.

4.4.5 Reinsurance ceded

Taiwan

AEGON Taiwan uses both local and international reinsurers to help cover its mortality and morbidity risks. All of the company's leading reinsurers have a credit rating of AA- or above, except for Central Reinsurance Company, or CRC. CRC is a formerly state-owned company that was recently successfully privatized. CRC's credit rating was upgraded in October 2006 from BBB+ to A-. AEGON Taiwan's reinsurance

Edgar Filing: AEGON NV - Form 20-F

contracts cover quota share reinsurance, excess surplus risks and catastrophe concentration risks. The retention limit on any one individual life is currently NTD 5,000,000 (approximately EUR 111,000) for mortality risk.

AEGON Taiwan remains contingently liable with respect to the amounts ceded if the reinsurer fails to meet the obligations it assumed. To minimize its exposure to reinsurer insolvencies, AEGON Taiwan monitors the creditworthiness of its reinsurers.

China

According to the CIRC regulations, AEGON-CNOOC cedes a quota share of accident and health business to the China Reinsurance Company. The quota share for the business written in 2003, 2004 and 2005 was 15%, 10% and 5% respectively and decreased to 0% for the business written in 2006. This compulsory reinsurance requirement ends thereafter.

In addition, AEGON-CNOOC entered into several commercial reinsurance arrangements to achieve a diversification of risk and to limit the maximum loss on risks that exceeded policy retention limits. AEGON-CNOOC entered into reinsurance programs with Munich Re, Swiss Re, and General Re. The retention limit on any one individual life is generally RMB 200,000.

Table of Contents

4.5. Western Europe (Spain and France)

AEGON Spain focuses primarily on retail customers. It offers both life insurance and accident and health cover. In particular, AEGON Spain offers pensions as well as both traditional life and unit-linked variable life products, a market traditionally dominated by the country's retail banks. In France, AEGON has a partnership with La Mondiale since 2002 and works together with La Mondiale in a number of areas including pensions, asset management and distribution.

4.5.1. Spain

In Spain, some 70 percent of life insurance policies – a high proportion – are sold through the country's retail banks. For this reason, Spain in recent years has been an important part of AEGON's efforts to expand its web of bank distribution partnerships. AEGON now has partnerships in place with four of Spain's leading savings banks, giving the Group access to nearly 1,800 branches across the country:

Caja de Ahorros del Mediterráneo

Caja Navarra

Caja de Badajoz

Caja Cantabria

AEGON's partnership with Caja de Ahorros del Mediterraneo (CAM) goes back to 2004. CAM is Spain's sixth largest savings bank by profit and by number of branches. CAM has a network of more than 1,000 branches across the Valencia, Murcia and Catalonia provinces, as well as in Madrid and on the Balearic and Canary Islands. AEGON and CAM have a 49.99 respectively 50.01 percent interest in Mediterraneo Vida, the life insurance and pensions company that has exclusive access to CAM's branch network.

AEGON's partnership with Caja Navarra was signed in November 2005. Caja Navarra has a total of 276 branches in the north of Spain, close to the border with France. Under the agreement, AEGON has acquired a 50 percent interest in Caja Navarra's pension and life insurance business. AEGON and Caja Navarra are also exploring other areas of possible cooperation, including health insurance.

Caja de Badajoz has a network of some 200 branches, chiefly in the western region of Extremadura, which adjoins Spain's border with Portugal. Under the partnership, also agreed in 2005, AEGON and Caja de Badajoz have set up a 50/50 joint company to sell life insurance and pensions.

AEGON signed its partnership with Caja Cantabria in July 2007. One of the largest savings banks in northern Spain, Caja Cantabria has a total of 170 branches, located primarily in its home province of Cantabria. AEGON's share in the new company will be 10% in the first year of its operation. After this period, AEGON has the option to acquire another 40% of Cantabria Vida, the new life insurance and pensions joint company. The transaction is subject to regulatory approval.

AEGON remains committed to further expanding its distribution network in Spain. The Group's current partnerships distribute a combination of life insurance and pension products. AEGON also uses specialized agents and brokers to distribute its products, particularly individual life insurance, throughout both urban and rural areas.

Competition

There is considerable competition in the Spanish market, major competitors are the bank-owned insurance companies for life and pension products, and foreign and local companies for health insurance products.

Regulation

Edgar Filing: AEGON NV - Form 20-F

The Dirección General de Seguros (DGS) is the regulatory authority for the Spanish insurance industry. Insurance companies are required to report to the DGS on a quarterly basis. Spanish regulations incorporate all the requirements of the relevant EU Directives. In terms of solvency margin, local regulations are based on a percentage of the reserves for the life insurance business and on a percentage of premiums for the health insurance business.

AEGON Spain's investment portfolio is regulated by Spanish law, which is based on the Third EU Directive (92/96/EEC). The regulation requires the appropriate matching of investments and technical provisions, and it also establishes the main characteristics of the assets that can be applied to asset liability management. There are limitations on the amounts that can be invested in unsecured loans, unquoted stocks, single investments in real estate, and a single loan or debtor.

Asset liability management

AEGON Spain's approach to asset liability management is to make projections of asset and liability cash flows, to calculate their present values using a market yield curve, and to compute the main parameters affecting these cash flows (e.g. duration and convexity, etc.). The goal is to lock in the spread by matching the duration of assets to the duration of liabilities.

Reinsurance ceded

AEGON Spain has proportional reinsurance protection in place for its individual risk policies and non-proportional protection for its group risk policies. This strategy is in line with standard practice within the insurance industry. With this approach, AEGON is seeking to diversify its insurance risk and limit the maximum possible losses on risks that exceed policy retention levels. Maximum retention levels vary by product and the nature of the risk being reinsured. Generally, however, the retention limit is between EUR 45,000 and EUR 60,000 per life insured. AEGON Spain remains contingently liable with respect to the amount ceded should the reinsurance company fail to meet its obligations.

Table of Contents

AEGON Spain, generally, works only with reinsurance companies that have a credit rating from Standard & Poor's of at least A-. To lessen its exposure to defaults, AEGON Spain regularly monitors the creditworthiness of its reinsurers. Where appropriate, additional protection is taken out through funds that are withheld for investment by the ceding company.

4.5.2. France

In 2002, AEGON signed a partnership with mutual insurer La Mondiale, one of France's largest providers of life insurance and pensions. AEGON and La Mondiale work together in a number of areas, including pensions, asset management and distribution. In 2005, the AEGON Pension Network was launched in collaboration with La Mondiale. As part of the partnership, AEGON took a 20 percent stake in La Mondiale's subsidiary La Mondiale Participations, increasing it later to 35 percent.

AEGON's partnership with La Mondiale gives the Group a foothold in Europe's second largest insurance market. As in Spain, most life insurance in France—more than 60 percent—is sold via retail banks or La Poste, France's post office.

In July 2007, La Mondiale and fellow insurer AG2R announced a merger. The merger—which won't affect AEGON's partnership with La Mondiale—will create the country's eighth largest life insurer, serving some 5.6 million customers. The new group will become operational at the start of 2008.

4C Organizational structure

AEGON N.V. is a holding company that operates through its subsidiaries. For a list of names and locations of the most important group companies, see Note 18.49 of the notes to our consolidated financial statements in Item 18 of this Annual Report on Form 20-F.

The main operating units of the AEGON Group are separate legal entities organized under the laws of their respective countries. The shares of those legal entities are directly or indirectly held by two intermediate holding companies incorporated under Dutch law: AEGON Nederland N.V., the parent company of the Dutch operations, and AEGON International B.V., which holds the Group companies of all countries except the Netherlands.

4D Description of property

In the United States, AEGON owns many of the buildings that the company uses in the normal course of its business, primarily as offices. AEGON owns 19 offices located throughout the United States with a total square footage of 2.3 million. AEGON also leases space for various offices located throughout the United States under long-term leases with a total square footage of 1.8 million. AEGON's principal offices are located in Baltimore, Maryland; Cedar Rapids, Iowa; Louisville, Kentucky; Los Angeles, California; Frazer, Pennsylvania; St. Petersburg, Florida; Plano, Texas; Purchase, New York; and Charlotte, North Carolina.

Other principal offices owned by AEGON are located in Budapest, Hungary and Madrid, Spain. AEGON leases its headquarters and principal offices in the Netherlands, the United Kingdom and Canada under long-term leases. AEGON believes that its properties are adequate to meet its current needs.

ITEM 4A. UNRESOLVED STAFF COMMENTS

Not applicable

Table of Contents

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

5.1 Introduction

AEGON is committed to providing information on key factors that drive its business and affect its financial condition, results and value. Our disclosure practices have been developed over many years with due consideration of the needs and requirements of our stakeholders, including regulators, investors and research analysts. We have substantive supplemental information in our annual and quarterly accounts to provide transparency of our financial results. We have provided insight into our critical accounting policies and the methodologies we apply to manage our risks. For a discussion of critical accounting policies see [Application of Critical Accounting Policies](#) [IFRS Accounting Policies](#) . For a discussion of our risk management methodologies see Item 11 [Quantitative and Qualitative Disclosure About Market Risk](#) .

5.2 Application of Critical Accounting Policies [IFRS Accounting Policies](#)

The Operating and Financial Review and Prospects are based upon AEGON's consolidated financial statements, which have been prepared in accordance with IFRS. Application of the accounting policies in the preparation of the financial statements requires management to employ their judgment involving assumptions and estimates concerning future results or other developments, including the likelihood, timing or amount of future transactions or events. There can be no assurance that actual results will not differ materially from these estimates. Senior management reviews these judgments frequently and an understanding of these judgments may enhance the reader's understanding of AEGON's financial statements in this Report. We have summarized in the following sections the IFRS accounting policies that are critical to the financial statement presentation and that require complex estimates or significant judgment.

i Valuation of assets and liabilities arising from life insurance contracts

General

The liability for life insurance contracts with guaranteed or fixed account terms is either based on current assumptions or on the assumptions established at inception of the contract, reflecting the best estimates at the time increased with a margin for adverse deviation. All contracts are subject to liability adequacy testing which reflects management's current estimates of future cash flows. To the extent that the liability is based on current assumptions, a change in assumptions will have an immediate impact on the income statement. Also, if a change in assumption results in the failure of the liability adequacy test, the entire deficiency is recognized in the income statement. To the extent that the failure relates to unrealized gains and losses on available-for-sale investments, the additional liability is recognized in the revaluation reserve in equity.

Some insurance contracts without a guaranteed or fixed contract term contain guaranteed minimum benefits. Depending on the nature of the guarantee, it may either be bifurcated and presented as a derivative or be reflected in the value of the insurance liability in accordance with local accounting principles. Given the dynamic and complex nature of these guarantees, stochastic techniques under a variety of market return scenarios are often used for measurement purposes. Such models require management to make numerous estimates based on historical experience and market expectations. Changes in these estimates will immediately affect the income statement.

In addition, certain acquisition costs related to the sale of new policies and the purchase of policies already in force are recorded as DPAC and VOBA assets respectively and are amortized to the income statement over time. If the assumptions relating to the future profitability of these policies are not realized, the amortization of these costs could be accelerated and may even require write offs due to unrecoverability.

Actuarial assumptions

The main assumptions used in measuring DPAC, VOBA and the liabilities for life insurance contracts with fixed or guaranteed terms relate to mortality, morbidity, investment return and future expenses. Depending on local accounting principles, surrender rates may be considered.

Mortality tables applied are generally developed based on a blend of company experience and industry wide studies, taking into consideration product characteristics, own risk selection criteria, target market and past experience. Mortality experience is monitored through regular studies, the results of which are fed into the pricing cycle for new products and reflected in the liability calculation when appropriate. For contracts insuring survivorship, allowance may be made for further longevity improvements. Morbidity assumptions are based on own claims severity and frequency experience, adjusted where appropriate for industry information.

Table of Contents

Investment assumptions are either prescribed by the local regulator or based on management's future expectations. In the latter case, the anticipated future investment returns are set by management on a countrywide basis, considering available market information and economic indicators. A significant assumption related to estimated gross profits on variable annuities and variable life insurance products in the United States, Canada and some of the smaller country units, is the annual long-term growth rate of the underlying assets. As equity markets do not move in a systematic manner, assumptions as to the long-term growth rate are made after considering the effects of short-term variances from the long-term assumptions (a reversion to the mean assumption). The reconsideration of this assumption may affect the original DPAC or VOBA amortization schedule, referred to as DPAC or VOBA unlocking. The difference between the original DPAC or VOBA amortization schedule and the revised schedule, which is based on estimates of actual and future gross profits, is recognized in the income statement as an expense or a benefit in the period of determination.

Assumptions on future expenses are based on the current level of expenses, adjusted for expected expense inflation if appropriate.

Surrender rates depend on product features, policy duration and external circumstances such as the interest rate environment and competitor and policyholder behavior. Credible own experience, as well as industry published data, are used in establishing assumptions. Lapse experience is correlated to mortality and morbidity levels, as higher or lower levels of surrenders may indicate future claims will be higher or lower than anticipated. Such correlations are accounted for in the mortality and morbidity assumptions based on the emerging analysis of experience.

Reserve for guaranteed minimum benefits

In the United States, a guaranteed minimum withdrawal benefit is offered directly on some variable annuity products AEGON issues and is also assumed from a ceding company. This benefit guarantees a policyholder can withdraw a certain percentage of the account value, starting at a certain age or duration, for either a fixed period or the life of the policyholder.

Certain variable insurance contracts also provide guaranteed minimum death benefits and guaranteed minimum income benefits. Under a guaranteed minimum death benefit, the beneficiaries receive the greater of the account balance or the guaranteed amount upon the death of the insured. The guaranteed minimum income benefit feature provides for minimum payments if the contractholder elects to convert to an immediate payout annuity. The guaranteed amount is calculated using the total deposits made by the contractholder, less any withdrawals and sometimes includes a roll-up or step-up feature that increases the value of the guarantee with interest or with increases in the account value. These benefits subject the company to equity market risk, since poor market performance will cause the guaranteed benefits to exceed the policyholder account value and thus become in the money.

In Canada, variable products sold are known as Segregated Funds. Segregated funds are similar to variable annuities, except that they include a capital protection guarantee for mortality and maturity benefits (guaranteed minimum accumulation benefits). The initial guarantee period is ten years. The ten-year period may be reset at the contractholder's option for certain products to lock in market gains. The reset feature cannot be exercised in the final decade of the contract and for many products can only be exercised a limited number of times per year. The management expense ratio charged to the funds is not guaranteed and can be increased at management's discretion.

Separate account group contracts of AEGON The Netherlands are large group contracts that have an individually determined asset investment underlying the pension contract. The guarantee given is that the profit sharing is the minimum of 0% or the realized return (on an amortized cost basis), both adjusted for the technical interest of either 3% or 4%. If there is a negative profit sharing, the 0% minimum is effective, but the loss in any given year is carried forward to be offset against any future surpluses. In general, a guarantee is given for the life of the underlying employees so that their pension benefit is guaranteed.

For AEGON The Netherlands, within individual unit-linked policies, the sum insured at maturity or upon the death of the beneficiary has a minimum guaranteed return (of 3% or 4%) if the premium has been paid for a consecutive period of at least ten years and is invested in a mixed fund and/or fixed-income funds. No guarantees are given for equity investments only.

Table of Contents

The following table provides information on the liabilities for guarantees for minimum benefits:

In million EUR	2007				2006			
	United States ¹	Canada ¹	The Netherlands ²	Total	United States ¹	Canada ¹	The Netherlands ²	Total
At January 1	(28)	492	275	739	(14)	586	378	950

¹ Guaranteed minimum accumulation and withdrawal benefits

² Fund plan and unit-linked guarantees

In addition AEGON reinsures the elective guaranteed minimum withdrawal benefit rider issued with a ceding company's variable annuity contracts. The rider is essentially a return of premium guarantee, which is payable over a period of at least fourteen years from the date that the policyholder elects to start withdrawals. At contract inception, the guaranteed remaining balance is equal to the premium payment. The periodic withdrawal is paid by the ceding company until the account value is insufficient to cover additional withdrawals. Once the account value is exhausted, AEGON pays the periodic withdrawals until the guaranteed remaining balance is exhausted. At December 31, 2007, the reinsured account value was EUR 6.9 billion (2006: EUR 8.4 billion) and the guaranteed remaining balance was EUR 4.5 billion (2006: EUR 5.5 billion).

The reinsurance contract is accounted for as a derivative and is carried in AEGON's balance sheet at fair value. At December 31, 2007, the contract had a value of EUR 1 million (2006: EUR 15 million). AEGON entered into a derivative program to mitigate the overall exposure to equity market and interest rate risks associated with the reinsurance contract. This program involves selling S&P 500 futures contracts to mitigate the effect of equity market movement on the reinsurance contract and the purchase of over-the-counter interest rate swaps to mitigate the effect of movements in interest rates on the reinsurance contracts.

Table of Contents

The following table provides information on the liabilities for guarantees that are included in the valuation of the host contracts.

In million EUR	2007				2006			
	GMDB ¹	GMIB ²	GMAB ³	Total	GMDB ¹	GMIB ²	GMAB ³	Total
At January 1	117	123	768	1,008	126	121	1,407	1,654

¹ Guaranteed minimum death benefit in the United States.

² Guaranteed minimum income benefit in the United States.

³ Guaranteed minimum accumulation benefit in the Netherlands.

⁴ Note that the variable annuity contracts with guarantees may offer more than one type of guarantee in each contract; therefore, the amounts listed are not mutually exclusive.

Amortization of Deferred Policy Acquisition Cost, including Value of Business Acquired

At December 31, 2007, the reversion to the mean assumptions for variable products, primarily variable annuities, were as follows in the United States: gross long-term equity growth rate of 9% (2006: 9%); gross short-term growth rate of 6% (2006: 4.75 %); gross short- and long-term fixed security growth rate of 6% (2006: 6%); and the gross short- and long-term growth rate for money market funds of 3.5% (2006: 3.5%). For Canada these assumptions, at December 31, 2007, were as follows: gross long-term equity growth rate of 9% (2006: 9%); and gross short-term growth rate of 10.75% (2006: 9%). For both countries the reversion period for the short-term rate is five years.

Sensitivity of DPAC and VOBA to Changes in Key Assumptions

A 1% decrease in the expected long-term equity growth rate with regards to our variable annuities and variable life insurance products in the United States and Canada would result in a decrease in DPAC and VOBA balances of approximately EUR 40 million after tax. A change in this assumption has the most significant impact on our DPAC and VOBA balances. A change in the short-term equity growth rate by 1% (increase or decrease) or a change in both the long-term and short-term equity growth rates to 8% would impact DPAC and VOBA balances by less than EUR 30 million after tax. The DPAC and VOBA balances for these products in the United States and Canada amounted to EUR 2.1 billion at December 31, 2007.

For the fixed annuities and fixed universal life insurance products, the EGP calculations include a net interest rate margin, which we assume will remain practically stable under any reasonably likely interest-rate scenario.

The impact of a 5% change in the mortality assumption would impact DPAC and VOBA balances by approximately EUR 50 million after tax. The impact of a 20% change in the lapse assumption would impact DPAC and VOBA balances by approximately EUR 40 million after tax.

Edgar Filing: AEGON NV - Form 20-F

The impact of any reasonably likely changes in the other assumptions we use to determine EGP margins (i.e. maintenance expenses, inflation and disability) would impact DPAC and VOBA balances by less than EUR 20 million after tax per assumption change.

Table of Contents

The movements in DPAC over 2007 compared to 2006 can be summarized and compared as follows:

In million EUR	2007	2006
At January 1	10,938	10,789

ii Fair value of investment contracts

Investment contracts issued by AEGON are either carried at fair value (if they are designated as financial liabilities at fair value through profit or loss) or amortized cost (with fair value being disclosed in the notes to the consolidated financial statements). These contracts are not quoted in active markets and their fair values are determined by using valuation techniques, such as discounted cash flow methods and stochastic modeling or in relation to the unit price of the underlying assets. All models are validated and calibrated. A variety of factors are considered, including time value, volatility, policyholder behavior, servicing costs and fair values of similar instruments. Changes in own credit risk are not considered when determining the fair value of insurance and investment liabilities as these contractholders have precedent over other creditors in case of default. Own credit risk is considered in measuring the fair value of borrowings and other liabilities.

iii Fair value of investments and derivatives determined using valuation techniques**Financial instruments**

In the absence of an active market, the fair value of non-quoted investments in financial assets is estimated by using present value or other valuation techniques. For example, the measurement of interests held in non-quoted investments funds is based on the fair value of the underlying assets. The fair value of non-quoted fixed interest debt instruments is estimated by discounting expected future cash flows using a current market rate applicable to financial instruments with similar yield, credit quality and maturity characteristics. For mortgage and other loans originated by the Group's interest rates currently being offered for similar loans to borrowers with similar credit ratings are applied. The fair value of floating interest rate debt instruments and assets maturing within a year is assumed to be approximated by their carrying amount.

Financial derivatives

Where quoted market prices are not available, other valuation techniques, such as option pricing or stochastic modeling, are applied. The valuation techniques incorporate all factors that market participants would consider and are based on observable market data when available. All models are validated before they are used and calibrated to ensure that outputs reflect actual experience and comparable market prices.

Fair values for exchange-traded derivatives, principally futures and certain options, are based on quoted market prices. Fair values for over-the-counter (OTC) derivative financial instruments represent amounts estimated to be received from or paid to a third party in settlement of these instruments. These derivatives are valued using pricing models based on the net present value of estimated future cash flows, directly

Edgar Filing: AEGON NV - Form 20-F

observed prices from exchange-traded derivatives, other OTC trades, or external pricing services. Most valuations are derived from swap and volatility matrices, which are constructed for applicable indices and currencies using current market data from many industry standard sources. Option pricing is based on industry standard valuation models and current market levels, where

Table of Contents

applicable. The pricing of complex or illiquid instruments is based on internal models. For long-dated illiquid contracts, extrapolation methods are applied to observed market data in order to estimate inputs and assumptions that are not directly observable. The values for OTC derivatives are verified using observed market information, other trades in the market and dealer prices, along with management judgment.

Derivatives embedded in insurance and investment contracts

Certain bifurcated embedded derivatives in insurance and investment products are not quoted in active markets and their fair values are determined by using valuation techniques. Because of the dynamic and complex nature of these cash flows, stochastic techniques under a variety of market return scenarios are often used. A variety of factors are considered, including expected market rates of return, market volatility, correlations of market returns, discount rates and actuarial assumptions.

The expected returns are based on risk-free rates, such as the current London Inter-Bank Offered Rate (LIBOR) forward curve or the current rates on local government bonds. Market volatility assumptions for each underlying index are based on observed market implied volatility data or observed market performance. Correlations of market returns across underlying indices are based on actual observed market returns and relationships over a number of years preceding the valuation date. The current risk-free spot rate is used to determine the present value of expected future cash flows produced in the stochastic projection process.

Assumptions on customer behavior, such as lapses, included in the models are derived in the same way as the assumptions used to measure insurance liabilities.

iv Impairment of financial assets

There are a number of significant risks and uncertainties inherent in the process of monitoring investments and determining if impairment exists. These risks and uncertainties include the risk that the Group's assessment of an issuer's ability to meet all of its contractual obligations will change based on changes in the credit characteristics of that issuer and the risk that the economic outlook will be worse than expected or have more of an impact on the issuer than anticipated. Also, there is a risk that new information obtained by the Group or changes in other facts and circumstances will lead the Group to change its investment decision. Any of these situations could result in a charge against the income statement in a future period to the extent of the impairment charge recorded.

Debt instruments

Debt instruments are impaired when it is considered probable that not all amounts due will be collected as scheduled. Factors considered include industry risk factors, financial condition, liquidity position and near-term prospects of the issuer, nationally recognized credit rating declines and a breach of contract.

The amortized cost and fair value of bonds, money market investments and other are as follows as of December 31, 2007 included in our available-for-sale (AFS) and held to maturity portfolios:

Of which held by AEGON Americas, NL and UK	52,773	(2,883)	39,046	(890)

AEGON regularly monitors industry sectors and individual debt securities for evidence of impairment. This evidence may include one or more of the following: 1) deteriorating market to book ratio, 2) increasing industry risk factors, 3) deteriorating financial condition of the issuer, 4) covenant violations, 5) high probability of bankruptcy of the issuer or 6) nationally recognized credit rating agency downgrades. Additionally, for asset-backed securities, cash flow trends and underlying levels of collateral are monitored. A security is impaired if there is objective evidence that a loss event has occurred after the initial recognition of the asset that has a negative impact on the estimated future cash flows. A specific security is considered to be impaired when it is determined that it is probable that not all amounts due (both principal and interest) will be collected as scheduled.

The composition by industry categories of bonds and money market investments in an unrealized loss position held by AEGON Americas, AEGON the Netherlands and AEGON UK at December 31, 2007 is presented in the table below. The following unrealized loss consists of 2,409 issuers.

Table of Contents**Unrealized losses – bonds and money market investments held by AEGON Americas, AEGON the Netherlands and AEGON UK**

Total AEGON Americas, NL and UK	52,773	(2,883)	39,046	(890)

The information presented above is subject to rapidly changing conditions. As such, AEGON expects that the level of securities with overall unrealized losses will fluctuate. The recent volatility of financial market conditions has resulted in increased recognition of both investment gains and losses, as portfolio risks are adjusted through sales and purchases.

As of December 31, 2007, there are EUR 1,531 million of gross unrealized gains and EUR 2,883 million of gross unrealized losses in the AFS bonds portfolio of AEGON Americas, AEGON The Netherlands and AEGON UK. No one issuer represents more than 4% of the total unrealized position.

AEGON generally has the intent and ability to hold all other securities in unrealized loss positions to full recovery or maturity. When AEGON has made the decision to sell a security in a loss position as of the balance sheet date, an impairment loss has been recognized to write the book value of the security down to fair value.

The multi-year period of credit and financial market complacency ended in 2007. The yield premium for credit risk rose dramatically for all borrowers, regardless of rating. The spark was the sub-prime mortgage market collapse, which served as the catalyst for the unwinding of excess leverage throughout the financial system in the U.S. and globally. Large segments of the structured finance market became severely stressed and illiquid, with new issuance becoming almost non-existent. Banks were forced to retain assets on their balance sheets that had previously been securitized, and at the same time they were forced to write down certain mortgage-related assets, placing great strain on their capital bases. These events triggered a rapid tightening of lending standards. Despite the market turmoil, corporate defaults remained low, except for those companies affected most directly by the sub-prime crisis. In the U.S., real economic growth slowed, in part due to the growing credit crunch, but also from slowing housing activity, and rising energy prices. Globally, long-term government bond yields fell somewhat, while short-term rates were mixed, reflecting differing economic momentum. Volatility rose in all markets and for all financial instruments.

Asset Backed Securities**ABS-Collateralized Bond Obligations:**

ABS-Collateralized Bond Obligations are primarily secured by pools of corporate bonds and leveraged bank loans. The unrealized loss is a function of decreased liquidity and increased credit spreads in the market for structured finance and monoline guaranteed securities. Where there have been rating downgrades to below investment grade, the individual bonds have been modeled to determine if an impairment was warranted and resulting impairments have been taken. Impairments on the CBO portfolio were immaterial in 2007.

There are no individual issuers rated below investment grade in this sector which have unrealized loss positions greater than EUR 15 million.

Table of Contents**ABS Housing related**

ABS Housing securities are secured by pools of residential mortgage loans primarily those which are categorized as sub prime. The unrealized loss is primarily due to decreased liquidity and increased credit spreads in the market combined with significant increases in expected losses on loans within the underlying pools. Expected losses within the underlying pools are generally higher than original expectations, primarily in certain later-vintage adjustable rate mortgage loan pools, which has led to some rating downgrades in these securities.

ABS Sub prime Mortgage Exposure

AEGON USA does not currently invest in or originate whole loan residential mortgages. AEGON USA categorizes asset backed securities issued by a securitization trust as having sub prime mortgage exposure when the average credit score of the underlying mortgage borrowers in a securitization trust is below 660. AEGON USA also categorizes asset backed securities issued by a securitization trust with second lien mortgages as sub prime mortgage exposure, even though a significant percentage of second lien mortgage borrowers may not necessarily have credit scores below 660.

As of December 31, 2007, the amortized cost of investments backed by subprime mortgage loans was EUR 2,866 million and the market value was EUR 2,524 million.

The following table provides the market values of the sub prime mortgage exposure by rating.

In EUR million	Market Value by Quality					Total
	AAA	AA	A	BBB	< BBB	
Sub-prime Mortgages - Fixed Rate	1,016	66	0			1,082
Sub-prime Mortgages - Floating Rate	314	528	9	1		852
Second Lien Mortgages (1)	539	32	13	3	4	590
Total	1,869	626	22	3	4	2,524
	74.0%	24.8%	0.9%	0.1%	0.2%	100.0%

(1) Second lien collateral primarily composed of loans to prime and Alt-A borrowers

The following table provides the market values of the sub prime mortgage exposure by vintage.

In EUR million	Market Value by Vintage					Total
	Pre-2004	2004	2005	2006	2007	
Sub-prime Mortgages - Fixed Rate	455	145	149	131	201	1,082
Sub-prime Mortgages - Floating Rate	69	26	232	295	230	852
Second Lien Mortgages (1)	122	42	66	147	213	590
Total	646	214	447	573	644	2,524
	25.6%	8.5%	17.7%	22.7%	25.5%	100.0%

(1) Second lien collateral primarily composed of loans to prime and Alt-A borrowers

Additionally, AEGON USA has exposure to asset backed securities collateralized by manufactured housing loans. The market value of these securities is EUR 200 million with an amortized cost balance of EUR 193 million. All but one position have vintages of 2003 or prior. These amounts are not included in our sub prime mortgage exposure tables above.

Where credit events may be impacting the unrealized losses, cash flows are modeled using effective interest rates. In cases where models indicate full recovery of principal and interest, AEGON does not consider those securities to be other-than-temporarily impaired. There are no individual issuers rated below investment grade in the ABS-housing sector which have unrealized loss positions greater than EUR 15 million.

ABS Credit cards

ABS- credit cards are bonds secured by pools of consumer credit card receivables, primarily originated by the largest U.S. financial institution issuers. The unrealized loss in the ABS credit card sector is a function of decreased liquidity and increased credit spreads in the structured finance and financial institution market. While the credit card ABS portfolios with large subprime segments may be negatively impacted by the slowing domestic economy and housing market, there has been no rating migration of any of the bonds held by AEGON USA. All of the ABS credit cards bonds held by AEGON USA are rated investment grade, and the overall market value as a percent of book value on those securities in an unrealized loss position is 95%.

Table of Contents**ABS - Other**

ABS-other includes debt issued by securitization trusts collateralized by various other assets including auto loans, student loans, loans to small businesses and other asset categories. The unrealized losses are a function of decreased liquidity and increased credit spreads in the market. Over 99% of the securities in an unrealized loss in this section are rated investment grade. The overall market value as a percent of book value on those securities in an unrealized loss position is 96%. Where ratings have declined to below investment grade, the individual bonds have been modeled to determine if an other-than-temporary impairment was warranted and resulting impairments have been taken.

There are no individual issuers rated below investment grade in this sector which have unrealized loss positions greater than EUR 15 million.

Residential mortgage backed securities

AEGON USA holds EUR 5,039 million of residential mortgage backed securities (RMBS).

RMBS are securitizations of underlying pools of non-commercial mortgages on real estate. The underlying residential mortgages have varying credit ratings and are pooled together and sold in tranches. The Company's RMBS includes collateralized mortgage obligations (CMOs), government sponsored enterprise (GSE) guaranteed passthroughs, whole loan passthroughs, Alt-A MBS and negative amortization MBS.

The unrealized loss on residential mortgage-backed securities is EUR 177 million. Of the RMBS unrealized losses, EUR 55 million is attributed to the generic shelf name, SASCO (Structured Asset Securities Corporation). When SASCO holdings in the RMBS sector are combined with SASCO holdings in the ABS - Housing sector, AEGON holds EUR 700 million of the issuer's securities with unrealized losses of EUR 70 million, all of which are rated A or above. AEGON owns several securities under the SASCO name, with each deal containing its own unique pool of collateral and representing a separate and distinct trust. The combination of low reset margin, slower prepayment speeds, illiquidity in the market, and general level of credit spread widening have pushed the overall market value as a percent of cost price on those RMBS bonds in an unrealized loss position to 92%. The unrealized loss on SASCO is not credit driven but rather a reflection of the move in interest rates and credit spreads relative to where these deals were originally priced.

For all securities in an unrealized loss position, the market to cost ratio is 95%. As the unrealized losses on AEGON's residential mortgage-backed securities are attributable to credit spread widening and not fundamental credit problems with the issuer or collateral, AEGON does not consider the underlying investments to be impaired as of December 31, 2007.

Alt-A Mortgage Exposure

AEGON USA's RMBS exposure includes exposure to securitized home equity loans (Alt-A positions). This portfolio totals EUR 844 million at December 31, 2007, with virtually all such securities rated AAA. Unrealized losses amount to EUR 18 million at December 31, 2007. Alt-A loans are made to borrowers whose qualifying mortgage characteristics do not meet the standard underwriting criteria established by the GSEs (Government-Sponsored Enterprises). The typical Alt-A borrower has a credit score high enough to obtain an A standing, which is especially important since the score must compensate for the lack of other necessary documentation related to borrower income and/or assets.

AEGON's investments in Alt-A mortgages are in the form of mortgage backed securities. AEGON's Alt-A investments are all backed by loans with fixed interest rates for the entire term of the loan. Additionally, one-third of the Alt-A portfolio is invested in super-senior tranches. Mortgage-backed securities classified as super-senior are those that substantially exceed the subordination requirements of AAA-rated securities. The tables below summarize the credit quality of the underlying loans backing the securities and the vintage year.

Negative Amortization (Option ARMs) Mortgage Exposure

As part of AEGON USA's RMBS Exposure, AEGON USA holds EUR 1.5 billion of Neg-Am mortgages, unrealized losses on this portfolio amount to EUR 73 million. Negative amortization mortgages (also known as option ARMs) are loans whereby the payment made by the borrower is less than the accrued interest due and the difference is added to the loan balance. When the accrued balance of the loan reaches the negative amortization limit (typically 110% to 125% of the original loan amount), the loan recalibrates to a fully amortizing level and a new minimum payment amount is determined. The homeowner's new minimum payment amount can be significantly higher than the original minimum payment amount. The timing of when these loans reach their negative amortization cap will vary, and is a function of the accrual rate on each loan, the minimum payment rate on each loan and the negative amortization limit itself. Typically, these loans are estimated to reach their negative amortization limit between 3 and 5 years from the date of origination.

AEGON's exposure to negative amortization mortgages is primarily AAA rated, with virtually all of these positions being super-senior AAA rated securities. The following table provides the market values of the Negative Amortization (Option ARMs) exposure by rating and by vintage.

in EUR million

Rating	Market Value	%

2007	308	20.7%
Grand Total	1,489	100.0%

Commercial mortgage backed securities

AEGON USA holds EUR 4,544 million of commercial mortgage backed securities (CMBS). The unrealized loss on CMBS is EUR 89 million. The fundamentals of the CMBS market are, on average, strong but are starting to show some signs of deterioration in some markets. The lending market remains virtually frozen as lenders continue to tighten their lending standards. A lack of liquidity in the market combined with a broad re-pricing of risk has led to increased credit spreads across the credit classes. The introduction of the 20% and 30% credit enhanced, super senior AAA classes provides an offset to these negative fundamentals. Of the CMBS unrealized loss, 16% is attributed to the Lehman Brothers and UBS origination platform (LBUBS) deal shelf which is collateralized by diversified mortgages. The unrealized losses are a function of the absolute size of our LBUBS holdings, EUR 613 million, and not due to credit related concerns. AEGON believes that the underlying investments are well underwritten and have performed relatively better than other comparable CMBS structures. The unrealized loss on LBUBS

Edgar Filing: AEGON NV - Form 20-F

is not credit driven but rather a reflection of the move in interest rates and credit spreads relative to where these deals were originally priced. For all securities in an unrealized loss position, the market to cost ratio is 97%. As the unrealized losses on AEGON's CMBS are attributable to credit spread widening and not fundamental credit problems with the issuer or collateral, AEGON does not consider the underlying investments to be impaired as of December 31, 2007.

Table of Contents

Financial

The financial sector can be further divided in the Banking, Brokerage, Insurance, REITs and Financial-Other sub-sectors. For all these sub-sectors, the fundamentals are weakening, but remain solid overall. These are high credit quality sectors and represent a large portion of the corporate debt market. The most significant of these sub-sectors from an unrealized loss perspective is Banking.

Banking

The absolute exposure to the banking sub-sector in AEGON's portfolio is large and of high quality. Because of the sub-sector's size, the absolute dollar amount of unrealized losses is large, but the overall market value as a percent of book value on all securities in an unrealized loss position is 93%. While the sector has some exposure to the sub prime market, the issuers are highly diversified and any impact is not expected to be material to their credit profile.

There is one individual issuer rated below investment grade in this sub-sector which has an unrealized loss position greater than EUR 15 million. AEGON's exposure to Northern Rock PLC bonds has an amortized cost of EUR 133 million as of December 31, 2007. The securities were rated B3 as of December 31, 2007 and have unrealized losses of EUR 73 million. Northern Rock PLC, a British mortgage bank, suffered a run on the bank in the fall of 2007. The Bank of England provided guarantees and liquidity support to stabilize this UK mortgage lender, and its support is expected to continue. Given the support provided by the Bank of England, AEGON does not consider Northern Rock PLC to be impaired as of December 31, 2007. Subsequent to year end, Northern Rock PLC, failed to find bids that suited the Bank of England's loan repayment requirements. As a result, Northern Rock PLC has been taken into temporary public ownership. One holding, with amortised cost of EUR 14 million and unrealized losses of EUR 9 million, is linked to preference shares that are subject to the Northern Rock plc Transfer Order 2008 and as a result this holding has been downgraded to C since the year end. This will result in either substitution of security or repayment of the proceeds as a result of the Northern Rock plc Compensation Scheme Order 2008, at this point there is no objective evidence of impairment of this holding. The rest of AEGON's bonds continue to remain as listed securities even under public ownership, and no impairment is warranted.

The overall market to book ratio on all the financial sector securities in an unrealized loss position is 94%. Since the securities with unrealized losses are trading so close to par, the market is indicating there is little or no risk of default. The unrealized losses are more a reflection of interest rate movements, general market volatility and duration rather than credit-related concerns. AEGON evaluated the near-term prospects of the issuers in relation to the severity and duration of the unrealized loss and does not consider those investments to be impaired as of December 31, 2007.

There are no other individual issuers rated below investment grade in this sub-sector which have unrealized loss positions greater than EUR 15 million.

Industrial

The Industrial sector is further sub divided in the Basic Industries/Capital Goods, Consumer Cyclical, Consumer Non-Cyclical, Energy, Technology, Transportation, Communications and Industrial other. For Technology, Transportation and Industrial other, the overall market value as a percent of book value on those securities in an unrealized loss position is 95%.

Basic Industries and Capital Goods

The Basic and Capital Goods industries encompass various sub-sectors ranging from aerospace/defense to packaging. The more significant of these sub-sectors from an unrealized loss perspective are building materials and chemicals. Building materials continue to be impacted by the slowdown in the U.S. housing market. Chemicals have been impacted by concerns of a slowing domestic economy and high cost feedstocks.

While the performance of some of the individual credits and sub-sectors was somewhat below expectations, overall, valuations remain largely stable. The overall market to book ratio on securities in an unrealized loss position is 96%. Since the securities with unrealized losses are trading close to par, the market is indicating there is little or no risk of default. The unrealized losses are more a reflection of interest rate movements, general market volatility and duration rather than credit related concerns. AEGON evaluated the near-term prospects of the issuers in relation to the severity and duration of the unrealized loss and does not consider those investments to be impaired as of December 31, 2007.

There are no individual issuers rated below investment grade in this sector which have unrealized loss positions greater than EUR 15 million.

Table of Contents

Consumer Cyclical

The consumer cyclical sub-sector covers a range of industries including autos, home construction, lodging, media, and retailers. These industries include some of the largest credit issuers in the market. As a result, AEGON's absolute exposure is large. In addition, many of the consumer sectors have been the target of leveraged buyouts and merger and acquisition activity, which has led to credit deterioration. The more significant of these sub-sectors from an unrealized loss perspective are Retailers, Automotive and Home Construction.

The slowing domestic economy combined with the impact of the housing market and moderating consumer sentiment have negatively affected the consumer spending.

The underlying fundamentals driving sales and earnings performance continue to be pressured as a result of a secular shift away from more profitable SUVs and pickups towards more fuel-efficient cars and crossovers. In addition, the combination of weak consumer confidence, tighter credit standards and growing unemployment has negatively impacted auto sales. On a positive side, the 2007 UAW labor contracts go a long way towards improving fundamental cost disadvantages and liquidity remains adequate across the sector.

Fundamentals in the home construction industry have weakened due to oversupply and tighter lending practices which have led to a decrease in order activity and high cancellation rates. Additionally, the sub-prime issues have had a dramatic effect on the home construction fundamentals, and have impacted the homebuyer's ability to finance a home purchase.

The overall market to book ratio on all securities in an unrealized loss position is 95%. Since the securities with unrealized losses are trading so close to par, the market is indicating there is little or no risk of default. The unrealized losses are more a reflection of interest rate movements, general market volatility and duration rather than credit-related concerns. AEGON evaluated the near-term prospects of the issuers in relation to the severity and duration of the unrealized loss and does not consider those investments to be impaired as of December 31, 2007.

There are no individual issuers rated below investment grade in this sector which have unrealized loss positions greater than EUR 15 million.

Consumer Non-Cyclical

The Consumer Non-Cyclical industry encompasses various sub-sectors ranging from consumer products to supermarkets. The more significant of these sub-sectors from an unrealized loss perspective are food and beverages and consumer products. Food and beverages and consumer products fundamentals have modestly weakened due to higher input costs and the industries' limited ability to pass along these higher costs to the customer. Additionally, shareholder friendly actions and related restructurings have been done at the expense of bondholders.

Overall, the sector represents a large portion of the corporate debt market. As a result, AEGON's absolute exposure is large and the absolute dollar amount of unrealized losses is also large, but the overall market to book ratio is 96% on all securities in an unrealized loss position. The vast majority of the unrealized losses in the consumer non-cyclical sector is not the result of fundamental problems with individual issuers, but is primarily due to increases in interest rates and credit spread widening; therefore, AEGON does not consider those investments to be impaired as of December 31, 2007.

There are no individual issuers rated below investment grade in this sector which have unrealized loss positions greater than EUR 15 million.

Energy

The energy sector includes independent oil and natural gas exploration and production companies, refiners, integrated energy companies active in both exploration/production and refining, and oil field service companies. Underlying fundamentals remain strong in the sector, bolstered by continued high commodity prices. Strong cash flow has largely been directed to increasing capital expenditure budgets and share repurchase programs. However, escalating costs are putting pressure on some companies' ability to find and produce oil and natural gas. Consolidation continues in the sector, although most transactions are funded conservatively.

The overall market to book ratio on all securities in an unrealized loss position is 97%. Since the securities with unrealized losses are trading so close to par, the market is indicating there is little or no risk of default. The unrealized losses are more a reflection of interest rate movements, general market volatility and duration rather than credit related concerns. AEGON evaluated the near-term prospects of the issuers in relation to the severity and duration of the unrealized loss and does not consider those investments to be impaired as of December 31, 2007.

There are no individual issuers rated below investment grade in this sector which have unrealized loss positions greater than EUR 15 million.

Table of Contents

Communications

The Communications sector can be further divided in the Media Cable, Media Non-Cable, Wireless and Wirelines sub-sectors. Many companies in the communications sector continue to focus on increasing shareholder returns. This has escalated event risk within the sector and caused many companies to increase financial leverage. The most significant of these sub-sectors from an unrealized loss perspective is non-cable media.

All media companies, but especially newspaper companies, are suffering from a tepid advertising environment, with advertising dollars shifting to new forms of media. This has led to lower returns on equity, historically low equity multiples, and poor stock performance. In some cases activist shareholders and private equity firms have forced management to respond by increasing financial leverage, consolidation or asset divestitures. The net effect is a weaker credit profile for many companies.

There is one individual issuer in this sub-sector which has an unrealized loss position greater than EUR 15 million. AEGON Canada owns, on an amortized cost basis, EUR 142 million of Bell Canada Enterprises Inc. (BCE) bonds which are under review for possible downgrade, and have unrealized losses of EUR 57 million. Most of these holdings are either 0% coupon strip bonds or 0% coupon residual bonds with a maturity date ranging from 2017 to 2054. The relatively large unrealized loss is impacted by the widening of credit spreads and the long maturity of the bonds, as well as the increase in leverage due to a potential LBO.

BCE announced on June 30th, 2007 that it had reached an agreement to sell all of the outstanding shares to a consortium headed by the Ontario Teachers Pension Plan. In so doing, the purchaser intends to substantially increase the debt level in the balance sheet of the company and, as a result, significantly increase the probability of a rating agency downgrade. The market value of the holdings of Bell Canada declined significantly over the course of 2007. The Plan of Arrangement was put before the Quebec Superior Court by BCE and the purchasers. The trustee for the bondholders brought legal action before the court claiming the transaction required their consent under the terms of the bond indentures and was also not a fair and reasonable transaction. The trial began on December 3, 2007 and concluded January 31, 2008. A Quebec Superior Court judge ruled on March 7, 2008 that the sale can continue dismissing the legal challenge brought forward by BCE's bondholders. The completion of the proposed privatization transaction is subject to a number of terms and conditions including regulatory approval and the resolution of any appeal filed by the debenture holders. Based on a review of the company at this time, the estimated future cash flows appear adequate to meet the payments under the terms of the debt instruments AEGON owns. AEGON will continue to closely monitor and re-evaluate the debt structure as it is established under the pending leverage buy out transaction.

Excluding Bell Canada, the overall market to book ratio on all securities in the communications sub-sector in an unrealized loss position is 95%. Since the securities with unrealized losses are trading so close to par, the market is indicating there is little or no risk of default. The unrealized losses are more a reflection of interest rate movements, general market volatility and duration rather than credit related concerns.

Based on the near-term prospects of the issuers in relation to the severity and duration of the unrealized loss, AEGON does not consider the remaining book values to be impaired as of December 31, 2007.

There are no other individual issuers rated below investment grade in this sector which have unrealized loss positions greater than EUR 15 million.

Utility

The utility sector is further sub divided in the Electric, Natural gas and Other. Electric is the most significant of these sub-sectors from an unrealized loss perspective.

Electric

Issues negatively impacting the sector include growing capital expenditures programs, the possibility of CO² legislation, a renewed interest in expanding riskier unregulated generation projects, and an increasingly uncertain state regulatory environment driven by rising energy prices. The overall market to book ratio on all securities in an unrealized loss position is 97%. Since the securities with unrealized losses are trading so close to par, the market is indicating there is little or no risk of default. The unrealized losses are more a reflection of interest rate movements, general market volatility and duration than credit related concerns. AEGON evaluated the near-term prospects of the issuers in relation to the severity and duration of the unrealized loss and does not consider those investments to be impaired as of December 31, 2007.

There are no individual issuers rated below investment grade in this sector which have unrealized loss positions greater than EUR 15 million.

Sovereign exposure

Edgar Filing: AEGON NV - Form 20-F

Sovereigns include government issued securities including Dutch government bonds, US Treasury, agency and state bonds; substantially all of the unrealized losses relate to A or higher rated securities. As the unrealized losses on AEGON's sovereign holdings are attributable to interest rate increases, the unrealized losses are not considered by AEGON to be impaired at December 31, 2007.

Table of Contents**Unrealized Loss by Maturity**

The table below shows the composition by maturity of all bonds in an unrealized loss position held by AEGON Americas, AEGON The Netherlands and AEGON UK at December 31, 2007.

Maturity Level

In million EUR	Carrying value of securities with gross unrealized losses	Gross unrealized losses
One year or less	2,224	(24)
Over 1 thru 5 years	15,681	(690)
Over 5 thru 10 years	17,602	(996)
Over 10 years	17,266	(1,173)
Total	52,773	(2,883)

Unrealized Loss by Credit Quality

The table below shows the composition by credit quality of bonds in an unrealized loss position held by AEGON Americas, AEGON The Netherlands and AEGON UK at December 31, 2007.

In million EUR	Carrying value of securities with gross unrealized losses	Gross unrealized losses
Treasury Agency	6,423	(203)
AAA	13,044	(548)
AA	6,113	(466)
A	11,967	(757)
BBB	12,598	(672)
BB	1,444	(85)
B	959	(111)
Below B	225	(41)
Total	52,773	(2,883)

The table below provides the length of time a security has been below cost and the respective unrealized loss at year-end.

In million EUR	Investment grade carrying value of securities with gross unrealized losses	Below investment grade carrying value of securities with gross unrealized losses	Investment grade unrealized loss	Below investment grade unrealized loss
0 -12 months	33,261	2,227	(1,698)	(185)

Total	50,145	2,628	(2,646)	(237)

Table of Contents

Realized gains and losses on bonds of AEGON Americas, AEGON The Netherlands and AEGON UK for the twelve months ended December 31, 2007:

In million EUR	Gross Realized Gains	Gross Realized Losses
Bonds	489	(413)

Gross realized gains include EUR 51 million of bond recoveries and gross realized losses include EUR 64 million of bond impairments.

The table below provides the length of time the security was below cost prior to the sale and the respective realized loss for assets not considered impaired at December 31, 2007.

Time period

In million EUR	0-12 months	>12 months	Total
Bonds	(245)	(104)	(349)

There are no securities which represented more than 5% of the EUR (349) million of realized losses on sales of fixed maturity securities, except for EUR 55 million losses on US Government Securities.

Impairment losses and recoveries

The composition of AEGON's bond impairment losses and recoveries by issuer for the twelve months ended December 31, 2007 is presented in the table below. Those issuers with impairments or recoveries above EUR 7 million are specifically noted.

In million EUR	(Impairment)/Recovery
Issuer Name	
Impairments:	
Residential Capital Corp.	(20)
Aerco	(11)
Lease Investment Flight Trust	(7)
Other Impairments (32 unique issuers)	(26)
Sub-total	(64)
Recoveries:	
Hoteloc	9
Litigation Recovery	9
Other Recoveries (58 unique issuers)	33
Sub-total	51
Net (Impairments) and Recoveries	(13)

In 2007, AEGON USA recognized EUR 51 million in recoveries on previously impaired securities. In each case where a recovery was taken on structured securities, improvements in underlying cash flows for the security were documented and modeling results improved significantly. Recoveries on non-structured securities were supported by documented credit events combined with significant market value improvements.

A EUR 20 million loss was realized on Residential Capital Corp. (ResCap) in 2007. The troubled housing and mortgage market environment resulted in severe constraints to market access for the funding of ResCap's operations, particularly new origination activity. AEGON made the decision to sell ResCap which resulted in an impairment loss in the third quarter of 2007.

Edgar Filing: AEGON NV - Form 20-F

In 2007, a EUR 11 million loss was realized on Aerco. The debt represents a beneficial interest in a portfolio of pooled aircraft leases. Cash flows were negatively impacted by a reduction in revenues, an increase in expenses, and a sizable reduction in reserve funds to cover minimum payments within the capital structure (in part due to a sale of aircraft in December). Due to an adverse change in discounted cash flows, AEGON USA realized an impairment loss in the first, second and fourth quarters of 2007.

Table of Contents

In the first and second quarters of 2007, AEGON USA recorded EUR 9 million in recoveries on Hoteloc. The underlying collateral (hotels) was sold and the notes paid out at par.

In the fourth quarter of 2007, AEGON USA received a cash settlement on a previously impaired debt holding. The settlement exceeded the book value of AEGON's debt holding by EUR 9 million which was recorded as an impairment recovery.

In 2007, an EUR 7 million loss was realized on Lease Investment Flight Trust (LIFT). The debt represents a beneficial interest in a portfolio of pooled aircraft leases. Cash flows were not sufficient to meet interest payments in May, but the Notes were brought current in June. Rising aircraft maintenance expenses and a devaluation in the annual appraised value of the airplanes has caused all remaining Trust cash flows to be directed to pay the Class A Notes. Due to intent to sell status, AEGON USA realized an impairment loss in the first, second, and third quarters of 2007.

Impairment losses and recoveries Commercial Paper

The composition of AEGON's commercial paper impairment losses and recoveries by issuer for the twelve months ended December 31, 2007 is presented in the table below. Those issuers with impairments above EUR 7 million are specifically noted.

In million EUR	Recovery
Issuer Name	
Impairments:	
Axon Financial	(10)
Other Impairments (1 unique issuer)	(2)
Sub-total	(12)
Recoveries:	0
Net (Impairments) and Recoveries	(12)

In 2007, AEGON USA did not recognize any recoveries on previously impaired commercial paper securities.

A EUR 10 million impairment was realized on Axon Financial in 2007. In late 2007 the commercial paper market essentially froze and Axon Financial was unable to access the capital markets along with the remainder of the SIV market. The securitized bond market continued to deteriorate and the market value of the underlying portfolio continued to decrease. The security defaulted on its November 2007 maturity date and AEGON USA realized an impairment loss in the fourth quarter of 2007.

Equity instruments classified as available for sale

Objective evidence of impairment of an investment in an equity instrument classified as available for sale includes information about significant changes with an adverse effect that have taken place in the technological, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered. A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost is also objective evidence of impairment.

Equity securities held in an unrealized loss position that are below cost for over six months or significantly below cost at the balance sheet date are evaluated for impairment. If an individual stock is considered to be impaired the value of the stock is written down to fair value. Additionally, as part of an ongoing process, the equity analysts actively monitor earnings releases, company fundamentals, new developments and industry trends for any signs of possible impairment.

These factors typically require significant management judgment. The impairment review process has resulted in EUR 45 million (2006: EUR 36 million; 2005: EUR 20 million) of impairment charges for the year ended December 31, 2007.

Table of Contents

As of December 31, 2007, there are EUR 461 million of gross unrealized gains and EUR 72 million of gross unrealized losses in the equity portfolio of AEGON. There are no securities held by AEGON with an unrealized loss of more than EUR 5 million. The table below represents the unrealized gains and losses on share positions held by AEGON Americas, AEGON The Netherlands and AEGON UK.

In million EUR	Cost basis	Carrying value	Net unrealized gains/ (losses)	Carrying value of securities with gross unrealized gains	Gross unrealized gains	Carrying value of securities with gross unrealized losses	Gross unrealized losses

v Valuation of defined benefit plans

The liabilities or assets recognized in the balance sheet in respect of defined benefit plans is the difference between the present value of the projected defined benefit obligation at the balance sheet date and the fair value of plan assets, together with adjustments for unrecognized actuarial gains or losses and past service costs. The present value of the defined benefit obligation is determined by discounting the estimated future cash flows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity that approximate the terms of the related pension liability. Actuarial assumptions used in the measurement of the liability include the discount rate, the expected return on plan assets, estimated future salary increases and estimated future pension increases. To the extent that actual experience deviates from these assumptions, the valuation of defined benefit plans and the level of pension expenses recognized in the future may be affected.

Refer to Note 18.24 of the notes to our consolidated financial statements in Item 18 of this Annual Report on Form 20-F for more details on assumptions.

vi Recognition of deferred tax assets

Deferred tax assets are established for the tax benefit related to deductible temporary differences, carryforwards of unused tax losses and carryforwards of unused tax credits when in the judgment of management it is more likely than not that AEGON will receive the tax benefits. Since there is no absolute assurance that these assets will ultimately be realized, management reviews AEGON's deferred tax positions periodically to determine if it is more likely than not that the assets will be realized. Periodic reviews include, among other things, the nature and amount of the tax income and expense items, the expected timing when certain assets will be used or liabilities will be required to be reported and the reliability of historical profitability of businesses expected to provide future earnings. Furthermore, management considers tax-planning strategies it can utilize to increase the likelihood that the tax assets will be realized. These strategies are also considered in the periodic reviews.

vii Valuation of share appreciation rights and share options

Because of the inability to measure the fair value of employee services directly, fair value is measured by reference to the fair value of the rights and options granted. This value is estimated using the binomial option pricing model, taking into account the respective vesting and exercise periods of the share appreciation rights and share options.

The volatility is derived from quotations from external market sources and the expected dividend yield is derived from quotations from external market sources and the binomial option pricing model. Future blackout periods are taken into account in the model in conformity with current blackout periods. The expected term is explicitly incorporated in the model by assuming that early exercise occurs when the share price is greater than or equal to a certain multiple of the exercise price. This multiple has been set at two based on empirical evidence. The risk free rate is the interest rate for Dutch government bonds.

viii Recognition of provisions

Provisions are established for contingent liabilities when it is probable that a past event has given rise to a present obligation or loss and the amount can be reasonably estimated. Management exercises judgment in evaluating the probability that a loss will be incurred. The estimate of the amount of a loss requires management judgment in the selection of a proper calculation model and the specific assumptions related to the particular exposure.

ix Non-consolidated group companies

All Group Companies are consolidated.

Table of Contents**5.4 Results of Operations 2007 compared to 2006**

This review of operations should be read in conjunction with the consolidated financial statements and related notes in Item 18 of this Annual Report.

Table of Contents

Overview

AEGON's businesses delivered a solid performance in 2007, as demonstrated by increased sales and deposits. In addition, AEGON continues to maintain its strong financial position.

Despite turbulence in world financial markets, AEGON experienced no material impairments to its investment portfolio during the year. AEGON's subprime portfolio, valued at EUR 2.9 billion, continues to be very high quality, with more than 99% rated either AA or AAA.

AEGON's net operating earnings declined as a result of a weaker US dollar and the impact of significant one-time tax benefits which had lifted earnings for 2006. Net income was down 20%, mainly due to the impact of exceptional gains in the Netherlands in 2006. During the year, revenue generating investments grew by 2% (or 11% at constant currency exchange rates), reflecting a continued overall expansion of the Group's businesses.

The completion of a EUR 1 billion share repurchase plan in November 2007 and a proposed 13% increase in the Group's full year dividend are further evidence of AEGON's continued strong cash flows and solid capital position. AEGON continues to have sufficient capital to support the organic growth of its businesses while at the same time pursuing acquisition opportunities consistent with the Group's disciplined approach to pricing.

During the year, AEGON took steps to further strengthen its distribution network, agreeing new partnerships with Barclays Bank in the United Kingdom, Taishin in Taiwan, Industrial Securities in China and the regional savings bank Caja Cantabria in Spain. In addition, AEGON's new partnership with Merrill Lynch in the United States will further enhance the Group's position as a leading provider of life insurance and variable annuity products to US brokers.

Investment portfolio AEGON USA

AEGON has a culture of strong and effective risk management. There are robust processes and controls in place throughout the asset management organization. Credit risks are mainly concentrated in AEGON USA's general account portfolio. Over the last few years AEGON has repositioned investments for its general account insurance portfolio, structuring them defensively in order to weather a stressed credit environment. The relative low level of impairments in the fourth quarter demonstrates the high quality of AEGON's investment portfolio and the limited impact the current stressed credit environment is having on expected cash flows from AEGON's fixed income assets.

Net impairments on investments for the Americas amounted to EUR 48 million. The current dislocation of credit markets, however, is characterized by price and/or spread volatility, low liquidity and, for certain segments of the market, may result in changes to credit ratings. Most assets contained in AEGON's general account portfolio are accounted for as Available for Sale under IFRS, and thus are held at fair value on the balance sheet. Any changes to the fair value of these assets are recorded on an after tax-basis in shareholders' equity.

AEGON USA's subprime mortgage-backed securities (subprime ABS) portfolio of EUR 2.9 billion experienced no impairments. The portfolio is currently valued at approximately 88%, or a fair value of EUR 2.5 billion. The total negative pre-tax revaluation of this portfolio amounts to EUR 348 million at the end of the year. Pricing of certain parts of the portfolio, such as AA-rated floating rate 2006 and 2007 securities, reflects price developments in the subprime ABS indices (ABX). The subprime ABS portfolio consists of 70% AAA-rated securities and 29% AA-rated securities. AEGON does not originate subprime mortgages.

AEGON USA's residential mortgage-backed securities (RMBS) portfolio includes securities of near prime residential mortgage loans, such as so-called Alt-A and negative amortization floaters. AEGON's EUR 862 million of Alt-A holdings are backed by fixed-rate loans and 99% of these securities are AAA. At the end of 2007 the Alt-A portfolio had total negative pre-tax revaluations of EUR 18 million, bringing the fair value of this portfolio to EUR 844 million, or approximately 98%. The negative amortization, or Option ARM floaters, is collateralized by affordability-type loan structures that allow for flexible monthly repayments. This EUR 1.6 billion portfolio is entirely AAA rated and consists of super-senior triple-A exposure. This means that subordination levels in the securitizations are 4 to 5 times what is typically required by rating agencies for a AAA rating. The total negative pre-tax revaluation of this portfolio was EUR 73 million bringing the fair value of the portfolio to EUR 1.5 billion, or approximately 95%.

AEGON's collateralized debt obligations (CDO) portfolio totals EUR 1.0 billion. Total negative pre-tax revaluations on AEGON's CDO portfolio amounted to EUR 48 million at the end of the year, with a fair value of approximately 95%. The majority of these investments is backed by leveraged bank loans, of which 92% was rated AAA and AA at the end of 2007. The portfolio includes an investment of EUR 21 million in CDOs backed by subprime mortgages assets purchased before 2002.

Edgar Filing: AEGON NV - Form 20-F

At the end of 2007, total negative pre-tax revaluations on subprime ABS, Alt-A RMBS, negative amortization floaters and CDOs totaled EUR 487 million, bringing the fair value of the portfolio to approximately 92%. For a fee, AEGON USA takes on credit exposure on a credit index, i.e. super-senior tranches of the CDX index, via a synthetic collateralized debt obligation program (synthetic CDO). This index is composed of a reference portfolio of 125 investment grade corporate credits. 84% of the exposure is to the most senior of the

Table of Contents

super-senior tranches, i.e. the 30%-100% tranche. This means that losses to AEGON occur only if cumulative net losses on the CDX index exceed 30%, where cumulative net loss is defined as bond defaults net of recoveries. The average duration of the outstanding transactions is 4.7 years. AEGON considers the probability of losses at these levels to be extremely remote and hence does not expect any cash losses to occur from these synthetic CDO positions. As these derivatives are marked to market through earnings, they may however cause substantial operating earnings volatility prior to maturity due to credit spread volatility. Assuming there are no cash losses from these positions, any mark to market effect on operating earnings will be reversed by maturity. At December 31, 2007, the notional amount of this program was EUR 4.5 billion with a negative market value of EUR 30 million.

Results

AEGON's operating earnings before tax amounted to EUR 2,692 million in 2007, down 19% from operating earnings before tax of EUR 3,341 million for the previous year (a decrease of 15% at constant currency rates). Lower operating earnings from the Americas and the Netherlands in 2007 more than offset increases in the United Kingdom and from Other countries. AEGON Americas saw its operating earnings before tax fall 3% to EUR 2,102 million (or increase of 5% at constant currency rates).

AEGON Netherlands operating earnings decreased by EUR 760 million or 68% to EUR 362 million. In 2006 EUR 648 million of guarantee provisions were released as a result of the positive impact of rising interest rates in the Netherlands. In 2007 the fair value movements of guarantees did not have an impact on operating earnings; the difference between fair value movements of certain guarantees and the fair value changes of derivatives that hedge certain risks of these guarantees are included in gains/losses on investment which are excluded from operating earnings. Excluding the effect of the guarantees on operating earnings for 2006, the 2007 operating earnings before tax were virtually unchanged (or 6% increase at constant currency rates).

Operating earnings can be significantly affected by movements in the value of financial assets carried at fair value, as well as total return annuity products and segregated fund guarantees. Earnings from these items exceeded expected returns by EUR 110 million in 2007, less than half the EUR 243 million seen in 2006. The decrease in operating earnings from AEGON The Netherlands was primarily due to movements in guarantee provisions and in fair value items. AEGON UK's operating earnings before tax rose as a result of a growth in profits from annuity products and increases in fund-related fees on pension business. The rise in operating earnings from Other countries mainly reflected continued growth in AEGON's businesses in both Central and Eastern Europe and Asia.

AEGON's net operating earnings declined to EUR 2,047 million in 2007, down from a figure of EUR 2,570 million the previous year, due mainly to the impact of the guarantee reserves discussed above and an increase in the Group's effective tax rate. In addition, net operating earnings in 2006 included significant one-off gains relating to tax payments in the Netherlands. In 2007, AEGON's effective tax rate on operating earnings decreased to 24%, down from 30% in 2006. The Group's effective tax rate was higher in the Other countries (primarily as a result of an increase in Taiwan), while it decreased in the Americas, the Netherlands and the United Kingdom.

Gains/(losses) on investments and impairment charges, totaled EUR 345 million in 2007, down from EUR 544 million the previous year. This decline was primarily the result of a decrease in the fair value of derivatives used to hedge guarantee provisions in the Netherlands, partly offset by a rise in net gains from the sale of bonds and shares in the Americas and the Netherlands.

Other non-operating income/(charges) amounted to EUR 40 million in 2007, compared to EUR 86 million in 2006. In 2007, this figure includes a one time gain related to the acquisition of the Dutch life insurer OPTAS, as well as the negative effect of a decision to refine the method for calculating unit-linked guarantees. As part of its acquisition of OPTAS, completed during the second quarter of 2007, AEGON gained net assets amounted to EUR 1.7 billion. This was higher than the original acquisition price of EUR 1.5 billion resulting in a one-off gain for the Group of EUR 212 million.

At the beginning of the second quarter of 2007, AEGON refined its method of calculating the fair value of the guarantees included in its unit-linked products to align them with the existing group pension contracts and traditional products. The impact of this change on net income before tax (recognized in the second quarter of 2007) was a negative EUR 181 million.

AEGON's net income decreased by 20% in 2007 to EUR 2,551 million as a result primarily of lower gains from investments and hedging operations. The Group's effective tax rate declined to 17% in 2007, down from 20% the previous year. Net income per share is EUR 1.47, down from EUR 1.87.

Commissions and expenses, fell 2% to EUR 5,939 million (an increase of 3% at constant currency exchange rates), reflecting a change in AEGON's overall business mix and lower DPAC amortization, offset partly by the underlying growth in the Group's businesses.

Edgar Filing: AEGON NV - Form 20-F

At the end of December 2007, total revenue generating investments stood at EUR 371 billion, up from EUR 363 billion twelve months previously. On a constant currency basis, the increase was 11%, reflecting net growth in AEGON's in-force portfolio (both deposits and premium business), improved market performance and the inclusion for the first time of OPTAS and two former Merrill Lynch life insurance companies in the United States, acquired in 2007.

Table of Contents

Sales

AEGON's overall new life sales increased 7% in 2007 to EUR 3,274 million (an increase of 11% at constant currency rates).

In the Americas, new life sales rose 2% to USD 1,276 million. Figures for 2006 had been lifted by USD 56 million from sales of investor-owned life insurance and a further USD 50 million from an assumed block of retail credit life insurance. In the course of 2006, sales of investor-owned life insurance were discontinued.

In the Netherlands, total new life sales increased by 5% in 2007, driven by a growth in pension sales, particularly via corporate and other financial institutions.

New life sales in the United Kingdom, rose 12% to GBP 1,183 million, following exceptionally strong sales in 2006 as a result of Pension A-Day.

New life sales in Other countries totaled EUR 353 million in 2007, an increase of 37% due mainly to continued strong growth in Central and Eastern Europe and higher sales of unit-linked products in Taiwan.

Deposits rose 14% in 2007. In the Americas, deposits from the Group's pension business were 28% higher than in 2006, while deposits from both fixed and variable annuities and mutual funds increased 8%. An overall increase in sales of institutional guaranteed products was driven by USD 6.6 billion in sales of synthetic CDOs, a new product in 2007.

In Central and Eastern Europe, deposits of pensions and asset management products, as well as retail mutual funds, showed continued strong growth. In the United Kingdom, sales of both retail and institutional asset management products increased, as did savings deposits in the Netherlands.

Operating earnings before tax

AEGON Americas reported operating earnings before tax of USD 2,876 million in 2007, an increase of 5% compared with the previous year, as a result of continued growth from most lines of business. Higher returns from hedge funds, as well as limited partnerships and convertible bond assets, also contributed significantly to the overall growth in earnings. There was, however, a decline in earnings from segregated funds in Canada and a significant decrease in the value of certain structured products.

Life and protection

Operating earnings before tax from AEGON America's life and protection business rose 15% in 2007 to USD 1,326 million. This increase was due mainly to the continued growth of existing in-force business, an update of mortality assumptions and reserve adjustments in Canada. Assets held at fair value through profit or loss (hedge funds and limited partnerships) again exceeded long-term performance expectations in 2007, contributing USD 51 million, unchanged from 2006.

Individual savings and retirement

Operating earnings before tax from AEGON America's individual savings and retirement business declined by 5% in 2007 to USD 713 million mainly due to fluctuations in fair value items during the year. Excluding the effect of fair value items, operating earnings increased 7% in 2007 to USD 674 million. Earnings from variable annuities fell by USD 61 million as a result of lower returns from segregated funds in Canada.

Pensions and asset management

AEGON America's pensions and asset management business reported operating earnings before tax of USD 188 million in 2007, an increase of 35%, due mainly to positive net cash flows and favorable equity markets during the year.

Institutional products

Operating earnings before tax from institutional products decreased by 4% in 2007 to USD 464 million. During the year, the decrease in the value of certain structured products more than offset the solid underlying growth of the business and the inclusion for the first time of Clark Inc., a distributor of bank-owned and corporate-owned life insurance. Overall earnings in both 2007 and 2006 reflect the strong outperformance of AEGON hedge fund and other fair value investments.

Reinsurance

Operating earnings before tax from AEGON America's reinsurance business fell by 10% in 2007 to USD 185 million. This decrease was primarily the result of a decision to strengthen reserves on a closed book of variable annuity guarantees by USD 25 million, combined with less favorable mortality results.

Table of Contents

Long term return expectations for fair-valued assets in operating earnings

AEGON Americas holds certain fair value assets, which can have a notable impact on operating earnings. These assets, valued at approximately USD 4.5 billion, include certain hedge funds, real estate limited partnerships and convertible bonds. The valuation of these assets contributed USD 571 million to AEGON Americas' operating earnings before tax in 2007, an increase from USD 524 million in 2006. The expected return before tax totaled USD 364 million, up from USD 260 million. The impact of these assets is particularly significant for the life, fixed annuity and institutional guaranteed products lines of business.

Net operating earnings

AEGON Americas' net operating earnings totaled USD 2,098 million in 2007, an increase of 6% compared with the previous year. The effective tax rate on operating earnings declined from 28% in 2006 to 27% in 2007.

Net income

Net income, which includes both impairment charges and net gains or losses on investments, rose 12% in 2007 to USD 2,184 million. Net gains on investments amounted to USD 376 million, compared with losses in 2006 of USD 28 million.

Net impairment charges, which totaled USD 66 million in 2007, continue to run well below long-term expectations, but were less favorable than the USD 15 million reported for 2006. The effective tax rate on net income rose to 31% in 2007, up from 27% the previous year.

Revenues

AEGON Americas reported revenues in 2007 of USD 22.4 billion, an increase of 9% compared with 2006. Life insurance gross premiums rose 12% to USD 10.9 billion. Recurring premiums were up 5%, due mainly to growth in the reinsurance business. Single premiums, meanwhile, grew by 30% compared with 2006, as a result of higher terminal funding sales. At USD 2.5 billion, accident and health premiums were stable compared with 2006. Investment income rose 4%, thanks to an increase in short-term rates and changes in AEGON Americas' asset mix, while fees and commissions were 18% higher, due principally to the inclusion for the first time of Clark Inc.

Commissions and expenses

AEGON Americas' commissions and expenses decreased by 1% in 2007 to USD 4,569 million. Operating expenses were 9% higher at USD 2,124 million a result of extra costs associated with the acquisition of Clark Inc. and the restructuring of AEGON Americas' Kansas City-based life insurance operations.

Production

New life sales increased 1% in 2007 to USD 742 million. Production in 2006 included USD 50 million from an assumed block of retail credit life insurance and USD 56 million in sales of investor-owned life insurance, discontinued in the third quarter. Excluding these items, retail life sales improved 18% in 2007.

Sales of accident and health cover fell USD 56 million in 2007, largely because of lower international sales from AEGON Americas' direct marketing business.

Fixed annuity sales, meanwhile, were 15% higher at USD 1,567 million, as a result of a steepening in the yield curve that helped make annuity credit rates more attractive towards the end of the year. Variable annuity sales also rose, up 10% at USD 3,723 million thanks to an increase towards the end of the year in overall wholesale capacity and the launch of a new product Income Select for Life.

Pension deposits totaled USD 11,862 million in 2007, 28% higher than the previous year. The increase was due primarily to higher single premium group annuities production, growth in terminal funding sales and the inclusion of significant takeover amounts received in 2007 against sales made in 2006. Managed assets were 10% higher in 2007 at USD 1,813 million.

Sales of institutional guaranteed spread-based products totaled USD 13,892 million in 2007, an increase of 11% compared with the previous year. This increase was the result mainly of higher medium-term note sales. Production of synthetic GICs and other off-balance sheet items grew 44%, due to the inclusion of synthetic CDOs. BOLI-COLI standardized production was 3% higher in 2007 at USD 207 million. Reinsurance

standardized life production was 4% higher in 2007 at USD 327 million.

*) Information for 2006 has been adjusted to reflect a change in accounting principles relating to guarantees in the Netherlands, the inclusion of net results from associate companies in operating earnings and AEGON's new lines of business format. Please refer to Note 18.2 of the notes to our consolidated financial statements in Item 18 of this Annual Report on Form 20-F for further information.

Table of Contents**Operating earnings before tax**

AEGON The Netherlands' operating earnings before tax decreased to EUR 362 million in 2007, compared with operating earnings of EUR 1,122 million 2006. 2006 included EUR 648 million of release of provisions related to the guarantees. Excluding the effect of the guarantees, operating earnings decreased by EUR 112 million. This decrease was due mainly to losses of EUR 40 million from financial assets carried at fair value (with no offsetting changes in the fair value of liabilities). In 2006, these fair value items had generated a gain of EUR 39 million. In addition, higher investment income was offset by losses on derivatives.

Operating earnings in 2007 also included a one-off charge of EUR 27 million related to two separate non-recurring items. Meanwhile, OPTAS, acquired at the end of June 2007, contributed EUR 11 million to operating earnings before tax. Earnings in 2006 included EUR 17 million in depreciation costs related to AEGON The Netherlands' group pension business—the result of a change in Dutch pension law no longer allowing surrender charges.

Life and protection

Operating earnings before tax from AEGON The Netherlands' life and protection business amounted to EUR 189 million in 2007, down from EUR 282 million the previous year due to EUR 125 million of fair value profits related to the guarantees. Excluding the effect of the guarantees, operating earnings increased thanks to higher investment income. Accident and health operating earnings totaled EUR 39 million, up from EUR 34 million—the result of an improved claim experience and lower expenses.

Individual savings and retirement products

AEGON The Netherlands' individual savings business reported operating earnings before tax of zero in 2007, compared with a profit of EUR 35 million the previous year. This decline was due primarily to a one-off charge of EUR 15 million related to the accelerated amortization of deferred expenses, as well as higher spending costs and lower interest margins. The increase in expenses related to the repositioning of AEGON Bank, increased sales activity and a higher allocation of distribution expenses.

Pensions and asset management

Operating earnings before tax from AEGON The Netherlands' pensions and asset management operations totaled EUR 107 million in 2007, down from operating earnings of EUR 720 million the previous year. 2006 included EUR 523 million of fair value profits related to the guarantees. Excluding the effect of the guarantees, operating earnings decreased by 46%. This decline can be attributed to fluctuations in fair value items during the year. The acquisition of OPTAS contributed EUR 11 million to overall operating earnings before tax from the pensions and asset management business line.

Distribution

Operating earnings before tax from AEGON The Netherlands' distribution business amounted to EUR 16 million in 2007, compared with EUR 18 million the year before. Increased operating earnings stemmed from the acquisition of Unirobe in the fourth quarter of 2006, offset by a EUR 12 million charge from the harmonization of clawback provisions at AEGON The Netherlands' Unirobe and Meeùs units.

General insurance

Operating earnings before tax from AEGON The Netherlands' general insurance operations fell to EUR 8 million in 2007, down from EUR 26 million the year before. The decrease was due mainly to additional provisioning following severe storms in the Netherlands during the first quarter of 2007.

Net operating earnings

AEGON The Netherlands' net operating earnings totaled EUR 283 million in 2007, a decrease from EUR 868 million the year before. The effective tax rate on operating earnings before tax decreased slightly to 22% in 2007, from 23% in 2006.

Net income

Edgar Filing: AEGON NV - Form 20-F

AEGON The Netherlands net income, which includes impairment charges and net gains/losses on investments, decreased by EUR 814 million to EUR 606 million. The fair value movements of guarantee provisions contributed EUR 648 million to earnings in 2006. In 2007, net gains on investments (before tax) amounted to EUR 140 million compared to EUR 513 million in 2006. The 2007 net gains on investments included EUR 325 million of losses on fair value movements in guarantees net of related swaps. Realized gains and losses on shares, bonds and real estate contributed EUR 794 million in 2007 (EUR 766 million in 2006). The gains and losses on investments (before tax) included a negative EUR 329 million from the decrease in market value of derivatives used for asset and liability management purposes in 2007, compared to a negative contribution of EUR 253 million in 2006.

Other income/(charges) of EUR 30 million included a one-time gain related to the acquisition of OPTAS and the effect of a refinement of the calculation of unit-linked guarantees. The acquisition of OPTAS was completed in the second quarter of 2007. The acquired net assets amounted to EUR 1.7 billion, EUR 212 million higher than the acquisition price of EUR 1.5 billion resulting in a one-time gain at acquisition. Starting with the second quarter of 2007, AEGON refined its method of calculating the fair value of guarantees included in its unit-linked products in order to align these calculations with the calculations currently used for group pension contracts and traditional products. This change in estimate has been applied prospectively. The cumulative impact on income before tax recognized in the second quarter of 2007 amounted to a loss of EUR 181 million.

Table of Contents

Revenues

Revenues of EUR 6,373 million increased by 6% in 2007 compared to 2006. Pension premiums increased by 4% reflecting the inclusion of OPTAS and increased recurring premiums. Life premiums increased by 6% to EUR 1,394 million. Accident & health premium income increased by EUR 12 million to EUR 203 million reflecting a full year of premiums from the disability product WIA. General insurance premiums remained stable. Investment income, which includes direct investment income of both general account and account of policyholder investments, increased by 6% compared to 2006. The increase reflects the inclusion of OPTAS.

Fees and commission income was 18% higher than in 2006 primarily reflecting the full-year impact of the consolidation of Unirobe in the fourth quarter of 2006.

Commissions and expenses

Commissions and expenses increased 9% to EUR 1,188 million in 2007. Operating expenses amounted to EUR 843 million in 2007 compared with EUR 708 million in 2006. The increase was mainly caused by the inclusion of Unirobe.

Production

New life sales in the Netherlands increased 5% to EUR 260 million, driven by a growth in pensions sales through the corporate and institutional sales channels. New life sales decreased primarily because of lower unit-linked sales.

Accident & health sales decreased by EUR 28 million to EUR 18 million reflecting lower sales of the WIA disability product that was successfully introduced in 2006. General insurance sales decreased by 21% to EUR 26 million reflecting AEGON's continued focus on writing profitable business in a competitive market.

Off balance sheet product sales amounted to EUR 390 million compared with EUR 408 million in 2006.

Table of Contents**Exchange rates**

Per 1 EUR	Weighted average		Year-end	
	2007	2006	2007	2006
GBP	0.6838	0.6809	0.7334	0.6715
Operating earnings before tax				

AEGON UK's operating earnings rose 21% in 2007 to GBP 186 million as a result of higher earnings from new business, particularly annuities, and an increase in fund related charges.

Life and protection

Operating earnings for the life and protection business totaled GBP 54 million in 2007, up from GBP 12 million the previous year. This significant increase was primarily the result of growth in AEGON UK's annuity business, which included a one-off gain of GBP 21 million resulting from a single block of inforce annuities during the year.

Pensions and asset management

AEGON UK's pensions and asset management business reported operating earnings of GBP 138 million in 2007, a decrease of 4% compared with 2006. Higher fund-related charges were offset by an increase in expenses during the year. The rise in expenses stemmed from the underlying growth of the business as well as additional investment and project costs.

Distribution

In 2007, AEGON's distribution business in the United Kingdom reported an operating loss of GBP 7 million, compared with a loss of GBP 4 million the year before. Earnings in 2007 included GBP 5 million in one-off additional incentive payments related to Positive Solutions.

Net operating earnings

Net operating earnings totaled GBP 188 million in 2007, an increase of 6% compared with the previous year after adjustment for one-time tax credit. From April 2008, UK corporation tax will be lowered to 28% from 30%. As a result, deferred tax liabilities have been reduced, resulting in a one-time tax credit in the second quarter of 2007 of GBP 38 million.

Revenues

Life insurance gross premiums amounted to GBP 7,393 million in 2007, up 18% compared with the previous year. Pension and asset management premiums increased by 15% to GBP 5,971 million, reflecting continued strong growth in pension sales, especially AEGON UK's Retirement Control product. Life and protection premiums rose 31% to GBP 1,422 million due to an increase in sales of protection products and continued strong sales of single premium annuities.

Commissions and expenses

Total commissions and expenses rose 7% in 2007 to GBP 647 million. This increase reflected growth in operating expenses and higher commissions from AEGON UK's distribution businesses. Operating expenses rose, meanwhile, by 4% to GBP 391 million. The increase in operating expenses was mainly the result of growth in the underlying business as well as additional project and investment costs.

Sales

AEGON UK's total new life sales increased by 12% to GBP 1,183 million - a result of continued strong sales of pensions and annuities. Sales of annuities, protection products and investment bonds represented 30% of total new life sales in 2007, a reflection of AEGON UK's strategy of diversification.

Edgar Filing: AEGON NV - Form 20-F

Sales of life and protection products totaled GBP 210 million, an increase of 32% from 2006. The increase was due to continued strong sales of annuities and a rise in sales of protection products.

Sales of pensions increased by 8% in 2007 to GBP 973 million, driven by strong sales of individual pensions. Sales of retail mutual funds and managed assets increased by 12% compared with 2007, thanks mainly to strong sales of both retail funds and institutional business.

Rin Min Bi Yuan (CNY)	10.4610	10.0080
Slovakian Koruna (SKK)	33.6890	37.005

Please note that AEGON's Other Countries segment is accounted for in the financial statements in euros, but that the operating results for individual country units are accounted for, and discussed, in local currency terms.

Operating earnings before tax

Operating earnings before tax from Other countries totaled EUR 142 million in 2007, an increase of EUR 81 million compared with 2006, primarily due to higher operating earnings from AEGON's businesses in Central and Eastern Europe. Earnings from all regions, Central and Eastern Europe, Spain, Asia and AEGON's 35% stake in French insurer La Mondiale Participations contributed to the increase.

Life and protection

Total operating earnings from life amounted to EUR 53 million in 2007, up from EUR 24 million the previous year. This increase was mainly the result of higher earnings from both Central and Eastern Europe and Taiwan. In Taiwan, the improvement in operating earnings reflects strong investment performance and higher sales volumes.

Pensions and asset management

AEGON Other countries' operating earnings from pensions and asset management increased significantly in 2007, primarily as a result of the expenses related to the expansion of the Group's pension business in Slovakia in 2006. Results in Poland also improved but were offset by start-up expenses of EUR 6 million related to AEGON's new mandatory pension fund in Romania and the launch of new voluntary pension funds in the Czech Republic and Slovakia.

General insurance

AEGON Hungary, the only unit within Other countries to sell general insurance, reported favorable technical results in both household and motor insurance in 2007. Earnings in 2006 included a strengthening in claim reserves. Combined, these two factors resulted in an increase in operating earnings of EUR 10 million for the general insurance business in 2007.

Associates

AEGON's share in the profit of associate companies increased by EUR 8 million (after tax) in 2007, split equally between the Group's partnership with Spanish regional savings bank Caja de Ahorros del Mediterráneo (in which AEGON holds a 49.99% interest) and its 35% stake in La Mondiale Participations in France.

Net operating earnings

Net operating earnings from Other countries totaled EUR 60 million in 2007, a sharp increase from EUR 20 million the year before. Earnings for both 2006 and 2007 were impacted by a reduction in deferred tax assets in Taiwan.

Net income

Edgar Filing: AEGON NV - Form 20-F

Net income amounted to EUR 73 million, compared with EUR 36 million in 2006, due mainly to the increase in net operating earnings. The effective tax rate was 53% in 2007 down from 56% in 2006.

Revenues

Total revenues rose 25% to EUR 2.8 billion - a reflection of the growth in single premium sales and higher income from fees and commissions in Poland, as well as higher single premiums at Caja Navarra in Spain and higher premium and investment income in Taiwan.

Commissions and expenses

Commissions and expenses increased 9% to EUR 372 million. This increase was driven largely by growth in the underlying business, resulting in higher commissions and expenses.

Table of Contents

Production

Life and protection

New life sales in Other countries totaled EUR 353 million in 2007, an increase of 37% compared with the previous year.

In Asia, new life sales in Taiwan rose 34% in 2007 to EUR 157 million, driven by strong sales of unit-linked products, which accounted for 58% of total new life sales. New life sales in China increased by EUR 5 million, driven mainly by unit-linked single premium sales through the bank channel.

In Central and Eastern Europe, new life sales totaled EUR 126 million in 2007, a 54% increase from 2006. Sales of single premium life insurance increased by EUR 248 to EUR 687 million in 2007 compared to the previous year, thanks mainly to higher sales from bank partnerships in Poland, supported by strong equity markets. Recurring premium sales increased 51% to EUR 58 million, a result of various successful distribution initiatives in the broker channel and the tied agent network across the region, particularly in Poland.

In 2007, new life sales in Spain increased to EUR 59 million, up from EUR 52 million in 2006, a year which included a large single premium group policy, which was more than offset in 2007 by exceptionally high single premium bancassurance sales through AEGON's joint venture with Caja Navarra.

The partnership with Caja de Ahorros del Mediterráneo (CAM) saw a decrease of 31% in new life sales to EUR 116 million (on a 100% basis), while premium income from the partnership with CAM amounted to EUR 404 million (on a 100% basis) in 2007. The partnership with CAM is not consolidated in AEGON's accounts. AEGON includes its share in the earnings from CAM in the line share in net results of associates.

Pensions and asset management

Pensions and asset management sales in Other countries amounted to EUR 579 million in 2007, up from EUR 361 million the previous year. This increase reflects the launch of a new variable annuity product in Taiwan, strong mutual fund sales in Hungary and the inclusion of the newly acquired Polish pension fund management company PTE AEGON Poland. By the end of 2007, the total number of pension fund participants in Central and Eastern Europe had increased to 1.3 million.

General insurance

General insurance new premium production increased by EUR 9 million to EUR 32 million in 2007, mainly the result of successful sales campaigns for motor and household insurance in Hungary.

Table of Contents

Overview

During the past year, we made significant progress in line with AEGON's strategy to increase profitability, enhance distribution and expand geographically into regions that offer long term growth potential for our core products and services.

Operating earnings before tax increased from EUR 1,348 million in 2005 to EUR 3,341 million in 2006. Fair value movements on guarantees in the Netherlands contributed EUR 648 million in 2006 compared to charges of EUR 984 million in 2005.

Excluding the impact of guarantees the increase in operating earnings reflects growth across all lines of business especially in the Americas, the Netherlands and the UK. The 48% increase in AEGON's net income for the year reflects higher operating earnings including the effect of the guarantees of the Netherlands, as well as lower gains on our investment portfolio and lower book gains.

In 2006, new life sales¹ increased 20% for the full year, reflecting record sales in AEGON UK which increased 54%, as well as a rebound in retail life sales in AEGON US and improved life sales in AEGON The Netherlands. AEGON Spain's new life sales more than doubled to EUR 52 million as a result of our recent partnerships with major savings banks. AEGON Central and Eastern Europe's new life sales were particularly strong in Poland during the year, with record sales in the fourth quarter of 2006. Our Taiwanese business made the transition to a more balanced product portfolio during 2006. Nearly half of the new business came from higher margin unit-linked products.

The opportunity for pensions growth globally continues to be an area of primary focus for AEGON. During the year, sales of pension-related products were the main driver behind the strong sales growth in AEGON UK. Membership in AEGON's pension funds in Hungary and Slovakia grew considerably during 2006, and in AEGON The Netherlands sales of individual and group pension products showed an increase. In the US, our pension business continues to experience good growth with over USD 9.3 billion in total sales during the year, a 3% increase from 2005. Both Diversified Investment Advisors and Transamerica Retirement Services received numerous industry awards in recognition of their customer service platform. Our agreement to acquire a top-ten pension fund management company in Poland and our newly-formed pension fund management joint venture in Mexico will add additional momentum to AEGON's leading pension position internationally.

We further broadened AEGON's distribution capability through our acquisition of a leading provider of bank-owned and corporate-owned life insurance in the United States and with our acquisition of the remaining 55% of Unirobe, a company of independent financial advisors in the Netherlands. Our two new joint ventures with Spanish savings banks began writing business mid-year, expanding AEGON's position in the bank channel in Spain.

During 2006, and early this year, we have fulfilled our intention to enter a number of key growth markets. In Mexico, we acquired 49% of Seguros Argos, a life insurance company specializing in worksite marketing. In India, we established a partnership with the financial services company Religare, a subsidiary of the Ranbaxy Promoter Group, to provide life insurance and asset management products across the country. AEGON's rollout in China continued with new operations in the Shandong province. At the beginning of this year, we announced our plans to form a mandatory pension company with Banca Transilvania in Romania where pension reforms are expected to be implemented next year. We have also established a new partnership with Sony Life to form a life insurance company that will initially provide variable annuity products through its extensive Lifeplanner[®] agent channel and through other financial institutions throughout Japan.

Results

Operating earnings before tax in 2006 increased from EUR 1,348 million to EUR 3,341 million, with increases in AEGON Americas, AEGON The Netherlands and AEGON UK. Operating earnings before tax in AEGON Americas were USD 2,732 million for 2006, an increase of USD 367 million or 16% compared to 2005. The return on hedge funds, limited partnership and convertible bond assets contributed significantly to the earnings growth. In addition, the earnings improvement in AEGON Americas is due to growth in most lines of business and improved mortality experience. The increase in operating earnings in AEGON The Netherlands reflects primarily the net positive impact of changes in interest rates on the fair value of guarantees and related hedges (2006: contribution before tax of EUR 648 million, 2005: charges before tax of EUR 984 million). In AEGON UK, the increase in operating earnings before tax mainly reflects the positive effect of higher equity and bond markets and growth of the businesses, partly offset by the impact of higher surrenders due to Pension A-day. The decrease of operating earnings before tax in Other countries primarily reflects investments to grow AEGON's businesses in Slovakia and China. This decrease was partly offset by higher earnings in Hungary and Spain.

¹ New life sales refers to standardized new premium production and is defined as new recurring premium + 1/10 of single premium.

Table of Contents

Net operating earnings in 2006 increased from EUR 1,118 million to EUR 2,570 million. Increase reflects 148% increase in operating earnings before tax, partially offset by a higher effective tax rate. The effective tax rate was 23% compared to 17% in 2005. The effective tax rate increased in Americas, the Netherlands and Other countries (primarily Taiwan) and decreased in the UK.

Net gains on investments (before tax) and impairment charges together amounted to EUR 544 million compared to a gain of EUR 1,171 million in 2005. The decline, partly offset by net gains on the sale of shares in the Netherlands, primarily reflects a negative fair value change in derivatives used for asset and liability management in the Netherlands and normal trading activity in the US in a higher interest rate environment.

Other non-operating income/(charges) amounted to EUR 86 million. The comparable figure in 2005 contained the book gain before tax on the sale of the general insurance activities in Spain of EUR 176 million.

Net income increased 48% to EUR 3,169 million in 2006. Higher operating earnings were offset by lower net gains on investments and lower other non-operating income. The effective tax rate decreased to 20% from 23% in 2005, mainly due to higher tax-exempt gains in the Netherlands and the impact of the reduction in 2007 of the corporate tax rate in the Netherlands from 29.6% to 25.5% ratified by the Dutch parliament in the fourth quarter of 2006 and resulting in a release of deferred tax liabilities. Net income per share was EUR 1.87 compared to EUR 1.25 in 2005.

Commissions and expenses increased 10% to EUR 6,085 million (11% at constant currency exchange rates) reflecting a change in business mix, growth in the businesses and higher DPAC amortization.

Total revenue generating investments amounted to EUR 363 billion at December 31, 2006, compared to EUR 358 billion at December 31, 2005.

Production

In 2006, new life sales increased 20% to EUR 3,051 million, primarily due to record sales in the United Kingdom. In the UK, new life sales increased 54% for the period as a result of strong pension sales, partly attributable to Pension A-Day, and growth in the sales of bonds, annuities and individual protection products. New life sales in the Americas increased 7% in 2006. Higher bank-owned and corporate-owned life insurance (BOLI/COLI) sales, reinsurance sales, as well as growth in the middle market were partly offset by lower retail sales within the Transamerica agency channel earlier in the year. New life sales in the Netherlands increased 7% to EUR 248 million, driven by growth of individual life sales through the intermediary channel and increased activity in the group pensions business. New life sales in Other countries in 2006 decreased 30% due to lower sales in Taiwan, but were partly offset by higher sales in Spain and Poland. The increase in new life sales in Spain mainly reflects the joint ventures with Caja Badajoz and Caja Navarra that became operational mid-year 2006.

On balance sheet production of annuity, pension and institutional guaranteed products in the Americas increased 11% to USD 21.3 billion, compared to 2005. Fixed annuity deposits declined 19% as sales continue to be challenged by the inverted yield curve and competition from other bank-sold products. Variable annuity deposits of USD 3.4 billion increased 15% over last year due to increased demand for variable annuity products and increased wholesaler distribution. Pension deposits increased 4% compared to 2005. Deposits in institutional guaranteed products increased 17%, primarily due to higher medium-term note issuance.

Off balance sheet production for the Group increased 14%, reflecting strong sales of synthetic Guaranteed Investment Contracts (GICs), strong sales in retail mutual funds in the US and the UK, and continued growth of AEGON's pension fund business in Central and Eastern Europe. The increase was partly offset by lower sales of managed assets.

Operating earnings before tax

Operating earnings before tax were USD 2,732 million for 2006, an increase of USD 367 million or 16% compared to 2005. The return on hedge funds, limited partnership and convertible bond assets contributed significantly to the earnings growth. The returns on these portfolios outperformed long term expectations in both 2006 and 2005, and strong returns were particularly noticeable in the fourth quarter of 2006. In addition, the year over year earnings improvement is due to growth in most lines of business and improved mortality experience.

Life and protection

Operating earnings before tax for life and protection increased USD 106 million, or 10%, to USD 1,158 million in 2006. The growth over last year is primarily attributable to improved mortality and claims experience, continued favorable performance in the hedge fund and limited partnership portfolios, and continued growth of the inforce. The earnings from assets held at fair value through profit and loss (hedge funds and limited partnerships) contributed USD 98 million in 2006 compared to USD 71 million in 2005.

Individual savings and retirement

Individual savings and retirement operating earnings before tax of USD 750 million has increased USD 174 million, or 30% compared to the results for 2005. The valuation of the Canadian Segregated funds, the total return annuity, and the fair value movements of certain financial assets carried at fair value had a significant effect on operating earnings before tax. These items contributed USD 196 million to operating earnings in 2006 compared to USD 126 million in 2005. Fixed annuity results reflected otherwise stable spreads on lower balances. The remainder of the increase reflects favorable equity markets and growth in assets under management in addition to favorable deferred policy acquisition costs (DPAC) amortization compared to 2005.

Table of Contents

Product spreads on the largest segment of the fixed annuity book were 247 basis points in 2006 on a pre-tax operating basis compared to 230 basis points in 2005. Product spreads in 2006 include 42 basis points from the impact of valuation of certain financial assets carried at fair value compared to 25 basis points in 2005. The expected long term return contribution to product spreads from the valuation of these assets is approximately 22 basis points.

Pensions and asset management

Pensions and asset management operating earnings before tax of USD 139 million for 2006 decreased USD 3 million or 2% compared to the results for 2005. The 2005 results include a one-time release of USD 20 million from a long-term deferred compensation plan. The valuation of certain financial assets carried at fair value contributed USD 37 million to operating earnings before tax in 2006 compared to USD 28 million in 2005. The remaining increase is primarily due to higher fees from variable products due to equity market growth and strong sales in late 2005.

Institutional products

Operating earnings before tax of institutional products increased 3% to USD 480 million compared to 2005. Higher earnings on certain assets carried at fair value, which amounted to USD 171 million compared to USD 88 million in 2005, growth due to strong sales as well as increased fees from growth in synthetic GICs and other assets under management were offset by reduced product spreads due to the continued rise of short-term interest rates early in 2006.

Reinsurance

Reinsurance operating earnings before tax of USD 205 million increased 56% compared to 2005. The increase in earnings primarily reflects continued growth in the inforce business due to strong sales and favorable mortality compared to 2005. In addition, earnings on certain assets carried at fair value and earnings from the total return annuity product amounted to USD 42 million in 2006 compared to USD 3 million in 2005.

Long term return expectations for fair-valued assets in operating earnings

AEGON provides long term return expectations for certain financial assets that are managed on a total return basis with no offsetting changes to the fair value of liabilities. Long term annual earnings on these assets, as described in more detail below, are based on long-term expected returns in financial markets, but should not be used as an explicit forecast for the year as actual results can and will deviate from these expectations.

These assets include certain hedge funds, real estate limited partnerships and convertible bonds, with assets totaling approximately USD 3.8 billion as of December 31, 2006. Operating earnings for 2006 include USD 499 million (USD 598 million before DPAC offsets) related to these asset classes, including fair valuation of assets of USD 452 million and cash income of USD 47 million. Based on current holdings and asset class returns consistent with long-term historical experience, the long-term expected return on an annual basis is 8-10%, including fair valuation and cash income, before tax and DPAC offsets. The impact of the fair valuation of assets is most notable in the life, fixed annuity and institutional guaranteed products lines of business.

Net operating earnings

Net operating earnings in 2006 of USD 1,978 million increased USD 194 million or 11% from USD 1,784 million in 2005. The effective tax rate on operating earnings increased from 26% in 2005 to 27% in 2006.

Net income

Net income, which includes net gains/losses on investments and impairment charges, decreased 3% to USD 1,951 million. Net gains/losses on investments amounted to a loss of USD 28 million in 2006 compared to a gain of USD 299 million in 2005. The loss in 2006 is primarily due to normal trading activity in the bond portfolio during the second quarter of 2006 in a rising interest rate environment.

Net impairment charges of USD 15 million in 2006 were well below long-term expectations, but less favorable than the net impairment recoveries of USD 53 million recorded during 2005.

The effective tax rate of 27% for 2006 is slightly higher than the effective rate of 26% in 2005.

Table of Contents

Revenues

Revenues of USD 20.6 billion increased 11% in 2006 compared to those in 2005.

Life insurance gross premiums of USD 9.7 billion increased 17%. Recurring premiums increased by 4% compared to 2005, primarily reflecting an increase in the reinsurance business. Single premiums increased by 75% compared to 2005, a result of a large single premium BOLI/COLI case in 2006. The 2006 figure includes USD 95 million of premiums from the acquisition of a block of credit life insurance.

Accident and health premiums of USD 2.5 billion remained stable compared to 2005.

Investment income increased 7% in 2006 compared to 2005, primarily due to rising short-term rates, higher volume and increased book yield from reinvestment of the portfolio.

Commissions and expenses

Commissions and expenses of USD 4,614 million increased 14% compared to 2005. Operating expenses of USD 1,957 million in 2006 were up 11% compared to 2005. This increase includes the impact of a one-time release of USD 20 million during 2005 from a long-term deferred compensation plan included in the pensions and asset management line of business.

Operating expenses increased primarily due to growth initiatives in variable annuities and asset management, as well as increased regulatory and compliance costs. On January 11, 2007 Transamerica announced that it will consolidate its Kansas City-based life insurance administrative operations in Cedar Rapids, Iowa by year-end 2007. Once consolidation is complete annual savings are expected to be USD 15 million to USD 20 million.

Production

Retail standardized life production for 2006 of USD 732 million was USD 68 million, or 9% lower than that for 2005. This decline is primarily due to a decline in non-recourse production as actions have been taken to stop accepting this type of business. Regular Transamerica agency production is also down due to tighter underwriting, rate increases and lower field compensation. The credit life reinsurance transaction provided USD 50 million of standardized life production in the fourth quarter 2006.

BOLI/COLI standardized production for 2006 of USD 202 million was USD 95 million, or 89% higher than that for 2005 due to a large single premium deposit in the third quarter of 2006.

Reinsurance standardized life production for 2006 of USD 315 million was USD 56 million, or 22% higher than that for 2005 due to continued strong international sales.

Health production for 2006 of USD 954 million was USD 4 million higher than in 2005. Production was slightly higher than last year due to a non-recurring USD 36 million sale reported as a result of an inforce indemnity reinsurance transaction which was mostly offset by a decline in international sales in the direct marketing business.

Individual savings and retirement deposits of USD 7,537 million increased by USD 1,112 million or 17% compared to those in 2005. Fixed annuity deposits of USD 1,365 million decreased 19% as a result of increased competition from bank CDs as short-term interest rates have risen substantially. Withdrawals from existing contracts are above last year's level. The decrement rate (lapses and deaths) on the largest block in the retail annuity segment has risen from 13.6% in 2005 to 22.8% in 2006 annualized. Variable annuity deposits of USD 3,396 million increased 15% primarily due to an increase in demand for variable annuity products and increased wholesaler distribution. The balances of variable annuities have increased 10% to USD 36.9 billion over the past year. Retail mutual fund sales of USD 2,776 million for 2006 increased 54% compared to those for 2005 as a result of strong markets and an increase in wholesaler distribution and fee planner channels.

Pension and asset management deposits of USD 10,941 million decreased 10% over 2005, primarily as a result of lower asset management sales. This was partially offset by an increase in pension deposits, which included several large takeover cases, higher written sales, and an increase in terminal funding sales.

Institutional deposits of USD 25,129 million for 2006 increased 33% over 2005. Institutional guaranteed product production in 2006 was USD 12,501 million, an increase of 17% compared to 2005. This increase is due primarily to higher medium-term note sales, including investor

Edgar Filing: AEGON NV - Form 20-F

demand for the new Ireland platform, replacement muni sales, and fixed GIC sales. The balance of GIC and funding agreements at December 31, 2006 consists of USD 32.3 billion general account and USD 2.0 billion separate account business. The combined balances have increased 4% over the past year. Synthetic GIC sales of USD 12,628 million in 2006 increased 53% compared to sales in 2005 primarily due to a significant contract sold in the fourth quarter of 2006.

* All information for 2006 and 2005 has been adjusted to reflect a change in accounting principles relating to guarantees in the Netherlands, the inclusion of net results from associate companies in operating earnings and AEGON's new lines of business format. Please refer to Note 18.2 of the notes of our consolidated financial statements in Item 18 of this Annual Report on Form 20-F for further information.

Table of Contents

Operating earnings before tax

Operating earnings before tax amounted to EUR 1,122 million in 2006, compared to a loss of EUR 493 million in 2005. Fair value movements of guarantees and related hedge instruments significantly influenced operating earnings. The net impact of guarantee provisions and related hedging results on operating earnings in 2006 was a positive EUR 648 million, whereas EUR 984 million was added to guarantee provisions in 2005.

Certain insurance products include minimum interest rate guarantees that are not offset by matching investments. In the second half of 2006, AEGON The Netherlands implemented a hedging program to extend and enhance its active risk management strategy. In addition to the established derivatives program of 2004 to lengthen the asset duration, AEGON The Netherlands has implemented a hedging strategy using derivative instruments to mitigate most of the interest rate risks related to guarantees embedded in traditional life, unit-linked and certain group pension products. Fair value movements of the guarantees and the derivatives hedging the guarantees are part of operating earnings.

Certain financial assets that are carried at fair value with no offsetting changes in the fair value of liabilities contributed EUR 43 million to operating earnings before tax, compared to a positive EUR 67 million in 2005. Operating earnings in 2005 included EUR 42 million in provisions for improvements of Spaarkas products, which were offset by provision releases for employee benefits and profits sharing in 2005. Earnings of 2006 contain an accelerated depreciation of deferred acquisition expenses of EUR 17 million related to group pension business, as a result of the new pension law which no longer allows surrender charges.

Life and protection

Operating earnings before tax from Life amounted to EUR 282 million, compared to a loss of EUR 24 million in 2005. This mainly reflects the net positive effect of changes in interest rates on provisions for guarantees and related hedges, and the absence of additions to provisions for Spaarkas products.

Accident and health operating earnings before tax were EUR 34 million compared to EUR 45 million in 2005. Technical results were lower compared to the favorable results in 2005, mainly as a result of more normalized claim experience and lapses in the sickness benefit market.

Individual savings and retirement products

Operating earnings before tax from banking activities amounted to EUR 35 million, compared to EUR 15 million in 2005. The increase primarily reflects the absence of additions to provisions for equity lease products and higher interest spreads.

Pensions and asset management

Operating earnings before tax for Pensions and asset management amounted to EUR 720 million in 2006, compared to a loss of EUR 568 million in 2005. This mainly reflects the net positive effect of changes in interest rates on provisions for guarantees and related hedges. Accelerated depreciation of deferred acquisition expenses and lower investment income, including a smaller contribution from assets carried at fair value, contributed negatively to operating earnings before tax.

Table of Contents

Distribution

Operating earnings before tax from Distribution amounted to EUR 18 million in 2006, compared to EUR 5 million in 2005. Meeùs improved its performance. For Unirobe, an independent distribution business of AEGON The Netherlands, as of the fourth quarter of 2006, 100% of the results were included compared to 45% before.

General insurance

General insurance operating earnings before tax amounted to EUR 26 million in 2006 compared to EUR 30 million in 2005. Better technical results were offset by lower investment income and pricing pressure due to increased competition in some markets.

Long term return expectations for fair-valued assets in operating earnings

AEGON provides long term return expectations for certain financial assets that are managed on a total return basis with no offsetting changes to the fair value of liabilities. Long term annual earnings on these assets, as described in more detail below, are based on long-term expected returns in financial markets, but should not be used as an explicit forecast for the year as actual results can and will deviate from these expectations.

These assets include an investment in a private equity fund and totaled EUR 243 million as of December 31, 2006. Operating earnings in 2006 include a gain of EUR 43 million related to these asset classes. Based on current holdings and asset class returns consistent with long-term historical experience, the long-term expected return on an annual basis is 8% before tax. The impact of the fair valuation of assets is notable in the traditional life and life for account of policyholders lines of business.

Net operating earnings

Net operating earnings increased from a loss of EUR 319 million in 2005 to a gain of EUR 868 million in 2006. The effective tax rate on operating earnings before tax decreased from 35% in 2005 to 23% in 2006 primarily reflecting the impact of the reduction of the corporate tax rate in the Netherlands from 29.6% to 25.5% resulting in a release of deferred tax liabilities.

Net income

Net income, which includes net gains/losses on investments and impairment charges, increased by EUR 992 million to EUR 1,420 million. Net gains on investments (before tax) amounted to EUR 513 million compared to EUR 985 million in 2005. The gains and losses on investments (before tax) include a negative EUR 352 million from the decrease in market value of derivatives used for asset and liability management purposes, compared to a positive contribution of EUR 306 million in 2005. The effective tax rate was 13% compared to 8% in the prior year.

Revenues

Revenues of EUR 6,034 million decreased by 2% in 2006 compared to 2005. Life insurance gross premiums of EUR 3,028 million and accident and health insurance premiums of EUR 191 million remained stable, general insurance premiums of EUR 434 million decreased 2%, investment income of EUR 2,006 million decreased by 8% and fees and commissions of EUR 375 million increased by 15%.

Single premiums increased by 20% compared to 2005, due to increases in immediate annuities and pension contracts.

Recurring premiums are 10% lower than in 2005 when a catch-up effect for a large co-insurance pension contract in the recurring segment was recognized.

Non-life premiums are 1% lower than in 2005. Accident and health insurance premiums are at the same level as in 2005 as decreased premium levels following legislative changes effective in 2006 have been fully compensated for by successful new income products (WIA). General insurance premiums decreased by 2% compared to 2005 as price pressure begins to be felt, particularly in the motor market.

Investment income, which includes direct investment income of both general account and account of policyholder investments, decreased 8% compared to 2005 primarily due to lower coupons. Other factors include lower deferred purchase price recognition in 2006, lower dividends as a consequence of the sale of shares and lower interest returns on loans offset by income generated on reinvestments and increased interest on mortgages.

Table of Contents

Fees and commission income were 15% higher than in 2005. The consolidation of Unirobe in the fourth quarter of 2006, securities lending activities, performance fees earned by TKP Pension and growth in the investment portfolios contributed to the higher fee income in 2006.

Commissions and expenses

Commissions and expenses amounted to EUR 1,087 million in 2006, equal to 2005. Operating expenses amounted to EUR 708 million, 6% lower than in 2005. This is primarily due to the absence of additional provisions for Spaarkas and equity lease products. This decrease was partly offset by the consolidation of Unirobe in the fourth quarter of 2006.

Production

New life sales in the Netherlands increased 7% to EUR 248 million, driven by the growth of individual life sales through the intermediary channel and increased activity in the group pensions business. Immediate annuities were an important driver for individual life sales. A larger number of smaller contracts were sold in the group pension business in 2006 as opposed to a relatively small number of large cases in 2005.

Accident & health sales increased from EUR 8 million in 2005 to EUR 46 million in 2006, due to successful sales of new disability products. Accident and health premiums amounted to EUR 191 million, equal to 2005, as premiums from new products offset the decline in income, resulting from lapses in the sickness benefits market following new legislation. Sales of the new WIA disability product developed favorably and represented 49% of all new non-life production in 2006. General insurance premiums decreased 2% to EUR 434 million.

During the first half of the year, employees of Dutch companies had the opportunity to establish a Levensloop (Live Cycle) account. New Levensloop (Live Cycle) deposits, largely recurring, amounted to EUR 107 million in 2006.

Off balance sheet product sales amounted to EUR 408 million compared to EUR 864 million in 2005. The comparable period in 2005 included a number of large asset management contracts.

Operating earnings before tax

Operating earnings before tax amounted to GBP 154 million, compared to GBP 111 million in 2005. The increase mainly reflects the positive effect of higher equity and bond markets and growth of the businesses, partly offset by a charge related to higher surrenders due to Pension A-day. Earnings in 2006 were impacted by a GBP 14 million charge for an incentive plan related to the accelerated acquisition of the remaining 40% of Positive Solutions. In 2005 earnings included a GBP 33 million charge related to this item. Excluding the effect of these charges, operating earnings before tax increased 17%.

Life and protection

Operating earnings before tax for Life and protection amounted to GBP 13 million, compared to GBP 1 million in 2005. Earnings increased due to higher annuity earnings, positive experience in the protection businesses and higher underlying assets.

Pensions and asset management

Operating earnings before tax from Pensions and asset management were GBP 144 million, compared to GBP 137 million in 2005. This mainly reflects business growth and the impact of the higher equity and bond markets on fund-related charges offset by higher surrenders due to Pension A-day.

Distribution

In AEGON's owned-distribution businesses in the UK, Positive Solutions' income increased in 2006, driven by higher adviser productivity. Operating earnings before tax from Distribution amounted to a loss of GBP 4 million, compared to a loss of GBP 27 million in 2005. Excluding the charges of GBP 14 million for the incentive plan related to Positive Solutions in 2006 and GBP 33 million in 2005, earnings of Distribution increased from GBP 6 million in 2005 to GBP 10 million in 2006.

Net operating earnings

Net operating earnings increased from GBP 96 million in 2005 to GBP 141 million in 2006. Effective tax rate on operating earnings before tax decreased from 13% in 2005 to 8% in 2006 primarily reflecting change in the mix of earnings.

Net income

Net income, which includes net gains/losses on investments and impairment charges, increased to GBP 158 million from GBP 98 million in 2005. Other non-operating income includes a gain of GBP 11 million in the first quarter of 2006 related to the sale of the Luxembourg-based subsidiary Scottish Equitable International to La Mondiale Participations. In the consolidated earnings for the Group, 35% of this gain has been eliminated to reflect AEGON's 35% share in La Mondiale Participations.

The effective tax rate in 2006 decreased from 15% to 9%. This primarily reflects the tax-exempt disposal of the Luxembourg subsidiary and the mix of earnings.

Table of Contents

Revenues

Revenues of GBP 8,106 million were up 57% from 2005. In comparison to 2005, single premiums increased by 122% to GBP 4,756 million due to continued strong growth in immediate annuity production and higher pension production primarily reflecting Pension A-Day activity. Recurring premiums increased by 10% reflecting the maturing of the individual protection business.

Investment income increased by 11% compared to 2005 reflecting the increase in investments from the growth in business.

Fees and commission income in 2006 increased by GBP 36 million due to strong growth in Positive Solutions and commission income on onshore and offshore bonds.

Commissions and operating expenses

Commissions and expenses increased 17% to GBP 607 million, reflecting growth in the protection and distribution businesses, and the impact of higher surrenders related to Pension A-day. Operating expenses increased by 8% to GBP 375 million, due to investments, growth of the businesses and strong new business in 2006.

Production

New life sales in 2006 increased 54%, following record sales in the fourth quarter of 2006. The increase was due to increased activity in almost all business lines and the pension business in particular. A portion of the higher pension sales can be attributed to exceptional activity due to Pension A-Day with single premium pension sales more than doubling. Compared to 2005, non-pension sales grew 25% to GBP 263 million in annualized premium equivalent.

In asset management, the retail business continued its strong performance. With the majority of sales coming from bond funds, this further emphasizes AEGON's fixed income capability. Institutional sales were lower as three large institutional mandates were won in 2005, compared to two major contracts in 2006. Total off balance sheet production amounted to GBP 808 million in 2006, compared to GBP 1,032 million in 2005.

Table of Contents**Exchange rates**

Weighted average exchange rates for the currencies of the countries included in the Other countries segment, and which do not report in euros, are summarized in the table below.

Per 1 EUR	2006	2005
Czech Republic Krona (CZK)	28.259	29.590
Hungarian Forint (HUF)	264.268	248.020
New Taiwan Dollar (NTD)	41.250	39.760
Polish Zloty (PLN)	3.8960	3.8600
Rin Min Bi Yuan (CNY)	10.0080	10.1000
Slovakian Koruna (SKK)	37.005	38.640

Please note that the Other countries segment is accounted for in the financial statements in euros, but the operating results for the individual country units within Other countries are accounted for, and discussed, in terms of the local currencies of those country units.

Operating earnings before tax

Operating earnings before tax in Other countries amounted to EUR 61 million, compared to EUR 60 million in 2005. Higher earnings in Hungary and Spain were offset by investments in growth in Slovakia and China. The increase in Spain is mainly driven by non-recurring expenses in 2005, related to the sale of the non-life business, and by the proportional inclusion of the joint ventures with Caja Badajoz and Caja Navarra since the second quarter of 2006.

Life

Operating earnings from life decreased from EUR 25 million in 2005 to EUR 24 million in 2006, primarily reflecting sales growth in China, where acquisition costs are not yet deferred.

Accident and health

Accident and health operating earnings before tax in Other countries amounted to EUR 3 million in 2006 compared to EUR 2 million in 2005.

Savings products

Operating earnings before tax from savings products were EUR 5 million negative in 2005 and 2006. Savings products are sold in the Czech Republic, where acquisition costs are not yet deferred.

Pensions and asset management

Total pensions and asset management operating earnings before tax from Other countries amounted to a negative EUR 17 million, against a positive EUR 2 million in 2005, reflecting acquisition costs of EUR 27 million in 2006 to grow the Slovakian pension business which are immediately expensed. The decline was partly offset by higher earnings in Hungary.

General insurance

General insurance operating earnings before tax increased to EUR 29 million from EUR 25 million in 2005 as a result of favorable claim experience in the Hungarian household insurance business.

Share in the profit of associates

AEGON's share in the profit of associates amounted to EUR 24 million, compared to EUR 16 million in 2005. This line represents the income from the partnership with CAM (49.99% interest) as well as the income from the 35% stake in La Mondiale Participations.

Net operating earnings

Net operating earnings decreased from earnings of EUR 51 million in 2005 to EUR 20 million in 2006. The effective tax rate in 2006 in Other countries was impacted by the reduction in the deferred tax assets in Taiwan in the fourth quarter.

Table of Contents

Net income

Net income amounted to EUR 36 million, compared to EUR 211 million in 2005. The 2005 figure included a book gain on the sale of the Spanish general insurance activities of EUR 176 million before tax. AEGON's share in the profit (and loss) of associates (after tax) amounted to EUR 24 million, compared to EUR 16 million in 2005. The effective tax rate in 2006 was 56% as a result of a reduction in the deferred tax asset in Taiwan in 2006.

Revenues

Total revenues increased by 36% to EUR 2.2 billion and primarily reflects the full year of revenues from AEGON Poland, the inclusion of the joint ventures with Caja de Badajoz and Caja Navarra and growth in the other markets.

AEGON Poland's revenues increased from EUR 88 million in 2005 (only fourth quarter) to EUR 485 million in 2006.

Commissions and expenses

Commissions and expenses increased 19% to EUR 342 million mainly due to lower deferral of commissions in Taiwan, following a change in business mix, and strong pension sales in Slovakia. Operating expenses increased 4% to EUR 148 million due to higher expenses in China, Hungary and new operations in Poland, offset by lower expenses in Spain.

Production

New life sales in Taiwan in 2006 decreased 61% to NTD 4.8 billion (EUR 117 million), reflecting the high levels of sales through the broker and bank channel in the first six months of 2005. Unit-linked sales accounted for 47% of total new life sales in 2006. The decline in traditional life sales is due to re-pricing of the products following the revised reserving requirements introduced in 2005. Total gross premiums increased 12% to NTD 39.8 billion (EUR 965 million) in 2006, mainly due to growth in premiums of the life for account of policyholders business.

New life sales in Central and Eastern Europe amounted to EUR 82 million. In Hungary, new life sales increased 5% to HUF 4.6 billion (EUR 17 million), due to the introduction of a new tax regulation, higher sales in the agency channel and the development of the broker channel. In Poland, new life sales amounted to PLN 232 million (EUR 60 million) in 2006, after record sales in the fourth quarter of 2006. Sales of single premium life insurance through the bank channel showed very strong momentum, due to a recovery in equity markets in the fourth quarter in 2006. In addition, recurring premium sales accelerated in the fourth quarter of 2006 as a result of the successful development of the broker channel and the tied agent network.

In Spain, new life sales increased 112% to EUR 52 million, reflecting the proportional inclusion of bancassurance sales through AEGON's joint ventures Caja de Badajoz and Caja Navarra. In addition, a large group life policy sold in the fourth quarter of 2006, after the approval of tax changes, contributed to the sales growth. Group sales have been adversely affected by uncertainty about changes in tax law in 2006. Also, the changes have removed tax advantages on certain individual life insurance products. AEGON Spain has developed several new products in anticipation of the new tax rules and will launch these in 2007.

The partnership with CAM experienced a decrease of 24% in new life sales to EUR 168 million (on a 100% basis). The return on the new business improved as the product mix continues to shift from single premium savings products to recurring premium risk and protection products. Premium income for the partnership with CAM amounted to EUR 492 million (on a 100% basis). The partnership with CAM is not consolidated in AEGON's accounts. AEGON includes its share in the results of the partnership in the line share in profit/(loss) of associates.

In Hungary, non-life premium income increased by 1% to HUF 34 billion (EUR 127 million) mainly as a result of solid sales growth and a high retention rate of household insurance. Non-life premiums in Spain, which only include health business, increased 2% to EUR 67 million.

In Hungary, pension fund and mutual fund sales amounted to HUF 93 billion (EUR 353 million). Sales in the pension fund business continued to grow, with the number of new members added in 2006 increasing by 32% to more than 60,000. Total pension fund membership amounted to more than 628,000 members at the end of 2006 compared to 583,000 at the year-end of 2005. Off balance sheet investments grew by 32% to HUF 373 billion (EUR 1.5 billion) compared to the year-end 2005 level.

In Slovakia, the pension fund business was very successful in attracting new pension fund members in 2006. Approximately 154,000 new members were registered in the mandatory pension fund, bringing the total to over 200,000.

Table of Contents

5.6 Liquidity and capital resources

General

AEGON conducts its capital and liquidity management processes at various levels within the organization, coordinated for the Group by Group Treasury, under the remit of the Group Risk and Capital Committee.

The main goals of AEGON's capital and liquidity management are to manage capital efficiently across the Group in order to maximize returns, facilitate access to money and capital markets at competitive prices to minimize the cost of capital. At the same time, capital and liquidity management aims to ensure high standards of liquidity during periods of severely impaired financial markets and to manage capital adequacy to competitive standards within leverage tolerances consistent with strong capitalization.

Capital adequacy

AEGON manages capital adequacy at the level of its country units and their operating companies. AEGON seeks to support its internal capital adequacy levels at whichever is the higher of local regulatory requirements, the relevant local Standard & Poor's requirements for very strong capitalization or internally imposed (economic) requirements. During 2007, the capital adequacy of AEGON's operating units continued to be very strong. All of AEGON's units were capitalized within these tolerances. In the United States, AEGON held approximately 336% of the minimum capital required by the National Association of Insurance Commissioners at December 31, 2007.

Capital base and leverage tolerances

AEGON applies leverage tolerances to its capital base. The capital base reflects the capital employed in core activities and consists of shareholders' equity (excluding revaluation reserve), capital securities, dated subordinated debt and senior debt. AEGON targets its capital base to comprise at least 70% shareholders' equity, 25% capital securities and a maximum of 5% dated subordinated and senior debt. At December 31, 2007, AEGON's capital base was within these prescribed tolerances. Shareholders' equity capital represented 71.5% of its total capital base, while perpetual capital securities comprised 21.7% of its total capital base. Senior and dated subordinated debt accounted for the remaining 6.8%. As part of its overall capital management strategy, AEGON successfully completed a EUR 1 billion share repurchase program in November 2007. The program has enabled AEGON to manage its capital base more efficiently without limiting AEGON's organic growth potential or its ability to carry out value-enhancing add-on acquisitions. During 2007, the ratio of shareholders' equity to total capital decreased, while capital leverage increased, mainly as a result of more efficient capital management. In September 2007, AEGON N.V. successfully issued USD 1,050 million of junior perpetual capital securities to further improve the quality of its capital base and reduce refinancing risk.

Shareholders' equity

Shareholders' equity was EUR 15,151 million at December 31, 2007, compared to EUR 18,605 million at December 31, 2006¹. Net income of EUR 2,551 million was offset mainly by a decrease in the revaluation reserve of EUR 2,164 million, a decrease due to foreign currency movements of EUR 1,445 million (largely due to a lower US dollar), the EUR 1 billion share repurchase program, dividend payments, repurchased shares issued as stock dividends and coupon payments on perpetual capital securities.

Debt funding and liquidity

AEGON's funding strategy continues to be based on assuring excellent access to international capital markets, while minimizing the cost of capital. As part of this strategy, AEGON aims to offer institutionally targeted debt securities and to maintain excellent access to retail investors, as witnessed by the successful issuance of junior perpetual capital securities during recent years. AEGON's focus on the fixed income investor base continues to be supported by an active investor relations program to keep investors well informed on AEGON's strategy and results.

AEGON's liquidity management strategy is aimed at maintaining sufficient liquidity to ensure that the company can meet its payment obligations as they fall due. This is achieved by dispersing day-to-day funding requirements, maintaining a broad base of funding sources and maintaining a well-diversified portfolio of highly liquid assets. Liquidity is managed at both Group and business and country unit level.

Most of AEGON's debt is issued by the parent company, AEGON N.V. In addition, a limited number of other AEGON companies whose securities are guaranteed by AEGON N.V. have issued debt securities. AEGON N.V. has regular access to the capital markets under its USD 6 billion Euro Medium Term Notes Program. Access to the US markets is facilitated by a separate US shelf registration. AEGON N.V.'s and AEGON Funding Corp.'s (guaranteed by AEGON N.V.) combined USD 4.5 billion Euro and US Commercial Paper Program provide access to

Edgar Filing: AEGON NV - Form 20-F

domestic and international money markets. AEGON maintains back-up credit facilities to support outstanding amounts under its commercial paper programs.

- ¹ 2006 information has been adjusted to reflect the retrospective application of the change in accounting principles relating to guarantees in the Netherlands, the change in definition of operating earnings to include our share in the net results of associates and a new line of business format. Refer to Note 18.2 in the financial statement for more information.

Table of Contents

The principal arrangement is a USD 5 billion syndicated facility including a USD 3 billion back-up facility maturing in 2011 and extendable until 2013. This arrangement also includes a USD 2 billion multicurrency revolving letter of credit facility maturing in 2014, extendable until 2017. In addition, AEGON maintains USD 375 million of shorter dated bilateral back-up facilities. At December 31, 2007, AEGON N.V. had no amounts outstanding under its commercial paper programs.

Internal sources of liquidity include distributions from operating subsidiaries. During 2007, distributions from units exceeded interest expense, other holding company expenses and dividend payments. Internal distributions may be subject to (local) regulatory requirements. Excess liquidity is invested in highly liquid, short-term assets in accordance with internal risk management policies.

The duration profile of AEGON's capital leverage is managed in line with the duration of surplus assets related to investments in its subsidiaries, subject to liquidity needs, capital and other requirements. Of AEGON's total capital leverage at December 31, 2007, approximately EUR 500 million matures within three years and EUR 5.7 billion is perpetual or matures after five years. AEGON considers its working capital, backed by the external funding programs and facilities, to be amply sufficient for the Group's present requirements.

Operational leverage is not part of the capital base. At December 31, 2007, operational leverage was EUR 3.6 billion (2006: EUR 2.3 billion). Operational debt primarily relates to mortgage warehousing and the funding of US regulation XXX and Guideline AXXX redundant reserves. In 2007, AEGON completed three innovative capital management transactions, including a private value of inforce (VIF) securitization of GBP 92 million by AEGON UK, a 30-year USD 550 million Regulation XXX securitization and a private, 30-year, USD 1.5 billion AXXX financing transaction with an initial size of USD 300 million. AEGON will continue to explore further opportunities for insurance-linked securitizations and other innovative capital market transactions as part of the Group's ongoing commitment to manage capital and reserve needs both efficiently and actively.

5.7 Research and development, patents and licences

Not applicable

5.8 Off-balance sheet arrangements

As part of the AEGON Levensverzekering N.V. funding program, the company regularly enters into securitization contracts for its mortgage loans. At December 31, 2007 a total of five publicly placed and one privately placed securitization contracts were outstanding with a total value of EUR 4.7 billion. Although no new securitizations took place in 2007, there were replenishments of SAECURE 6, the most recent publicly placed securitization. In the last quarter of 2007 the first of the publicly placed securitizations was called by the special purpose vehicle. In 2006, AEGON Levensverzekering N.V. terminated one of the two privately placed securitization transactions reported in prior years. Also, it completed one publicly placed securitization transaction in 2006, whereby the economic ownership of EUR 2.1 billion of aggregate mortgage receivables was conveyed to a special purpose company. The special purpose company funded this purchase with the issuance of mortgage-backed securities. The transfer of ownership title will take place only if the borrowers are duly notified by the special purpose company upon the occurrence of certain pre-defined notification events. At the same time AEGON entered into a fixed-to-floating swap agreement with the contract parties under which AEGON agreed to pay the floating rate (EURIBOR based) and receive the fixed rate (yield from the mortgage receivables). After a period of seven years, the interest of the notes issued by the special purpose company in respect of this transaction will step-up, together with a similar step-up in the fixed-to-floating swap agreement. At that same time, the special purpose company has the right to call the notes. A deferred purchase arrangement forming part of the contract to sell the mortgage loans to the special purpose company entitles AEGON Levensverzekering N.V. to any specified residual positive value of the special purpose entity at maturity. A 3.3% portion of securitized mortgage loans forming part of SAECURE 4 and amounting to EUR 18 million (2006: EUR 24 million and 2005: EUR 28 million) continues to be recognized as a financial asset on balance, representing the interest rate risk retained by AEGON in respect of the fourth publicly placed securitization contract.

In the year ending December 31, 2006, AEGON USA had sold EUR 105 million of AAA-wrapped municipal debt securities to SPEs. Due to AEGON's continuing involvement with the assets in these SPEs, it consolidates these entities. The fair value of all such debt securities reflected in investments and also measured at fair value through profit or loss is EUR 592 million as of December 31, 2007 (2006: EUR 678 million). The acquisition of these securities was financed by the SPEs through issuance of floating rate notes at par value to third parties and issuance of a de minimus residual investment to AEGON. Upon early termination of a SPE, up to 10% of the

Table of Contents

excess of the fair value of the securities over the notes value may be shared with the noteholders, with residual flowing to AEGON. In the event that the fair value of the securities is less than the notes value at early termination and the securities have maintained their investment grade rating, AEGON will reimburse the SPE liquidity provider for this shortfall. AEGON must pledge collateral to support these shortfall agreements. At December 31, 2007, the fair value of the bonds was in excess of the par value of the floating rate notes and no collateral was pledged. The maximum exposure to loss resulting from AEGON's involvement is the December 31, 2007 unpaid principal and accrued interest on the notes of EUR 578 million (2006: EUR 649 million) reflected in financial liabilities-investment contracts. Management does not anticipate any future funding requirements with respect to these guarantees that would have a material effect on reported financial results.

5.9 Contractual Obligations and Commitments**i Contractual obligations as per December 31, 2007**

In million EUR (payments due by period)	Less than 1 year	1 3 years	4 5 years	More than 5 years	Total
Insurance contracts ¹	6,646	10,442	9,272	130,461	156,821
Insurance contracts for account of policyholders ¹	5,717	14,370	13,519	95,410	129,016
Investment contracts ¹	11,590	12,554	5,595	15,581	45,320
Investment contracts for account of policyholders ¹	4,789	9,574	9,860	108,160	132,383
TRUPS, subordinated borrowings and borrowings ²	2,673	234	118	3,173	6,198
Scheduled interest payments on TRUPS, subordinated borrowings and borrowings	237	322	313	680	1,552
Operating leases ³	93	179	126	493	891

¹ The projected cash benefit payments are based on management's best estimates of the expected gross benefits and expenses partially offset by the expected gross premiums, fees and charges relating to the existing business in force. Estimated cash benefit payments are based on mortality, morbidity and lapse assumptions comparable with AEGON's historical experience, modified for recent observed trends. Actual payment obligations may differ if experience varies from these assumptions. The cash benefit payments are presented on an undiscounted basis and are before deduction of tax and before reinsurance. The liability amount in our consolidated financial statement reflects the discounting for interest as well as adjustments for the timing of other factors as described above. As a result, the sum of the cash benefit payments shown for all years in the table exceeds the corresponding liability amounts included in notes 18.18, 18.19, 18.20 and 18.21. More details on the products, terms and conditions are included in item 4B.

² Long-term debt represents principal repayment obligations relating to Trust pass-through securities (TRUPS), subordinated borrowings and borrowings; they are described further in Notes 18.16, 18.17 and 18.22 of the notes to our consolidated financial statements in Item 18 of this Report.

³ Operating leases are primarily related to agency and administration offices.

ii Investments contracted**Investments contracted**

In the normal course of business, the Group has committed itself through purchase and sale transactions of investments, mostly to be executed in the course of 2008. The amounts represent the future outflow and inflow, respectively, of cash related to these investment transactions that are not reflected in the consolidated balance sheet.

2007

2006

Edgar Filing: AEGON NV - Form 20-F

	Purchase	Sale	Purchase	Sale
Real estate	3	(4)	2	(1)
Mortgage loans	594		826	
Bonds		(1)	1	(2)
Private loans	555		679	
Other	1,240	(1)	1,346	(2)

Mortgage loan commitments represent undrawn mortgage loan facilities provided and outstanding proposals on mortgages. Other commitments include future purchases of interests in investment funds and limited partnerships.

Table of Contents**iii Other commitments and contingencies**

	2007	2006
Guarantees	225	166
Standby letters of credit	103	105
Share of contingent liabilities incurred in relation to interests in joint ventures	675	615
Other guarantees	33	70
Other commitments and contingent liabilities	44	57

Guarantees include those given on account of asset management commitments and guarantees associated with the sale of investments in low-income housing tax credit partnerships in the United States. Standby letters of credit amounts reflected above are the liquidity commitment notional amounts. In addition to the guarantees shown in the table, guarantees have been given for fulfillment of contractual obligations such as investment mandates related to investment funds.

AEGON N.V. has entered into a net worth maintenance agreement with its indirect subsidiary AEGON Financial Assurance Ireland Limited (AFA), pursuant to which AEGON N.V. will cause AFA to have a tangible net worth of at least 3% of its total liabilities under financial guaranty policies which it issues up to a maximum of EUR 3 billion.

AEGON N.V. has guaranteed and is severally liable for the following:

Due and punctual payment of payables due under letter of credit agreements applied for by AEGON N.V. as co-applicant with its subsidiary companies Transamerica Corporation, AEGON USA, Inc. and Commonwealth General Corporation (EUR 2,653 million). At December 31, 2007, there were no amounts due and payable;

Due and punctual payment of payables by the consolidated Group companies Transamerica Corporation, AEGON Funding Corp., Commonwealth General Corporation and Transamerica Finance Corp. with respect to bonds, capital trust pass-through securities and notes issued under commercial paper programs (EUR 985 million), as well as payables with respect to certain derivative transactions of Transamerica Corporation (nominal amount EUR 793 million);

Due and punctual payment of any amounts owed to third parties by the consolidated group company AEGON Derivatives N.V. in connection with derivative transactions. AEGON Derivatives N.V. only enters into derivative transactions with counterparties with which ISDA master netting agreements including collateral support annex agreements have been agreed; net (credit) exposure on derivative transactions with these counterparties was therefore minimal as at December 31, 2007.

AEGON is involved in litigation in the ordinary course of business, including litigation where compensatory or punitive damages and mass or class relief are sought. In particular, certain current and former customers, and groups representing customers, have initiated litigation and certain groups are encouraging others to bring lawsuits in respect of certain products in the Netherlands. The products involved include securities leasing products and unit linked products (so called beleggingsverzekeringen including the KoersPlan product). AEGON has established adequate litigation policies to deal with the claims defending when the claim is without merit and seeking to settle in certain circumstances. This and any other litigation AEGON has been involved in over the last twelve months have not had any significant effects on the financial position or profitability of AEGON N.V. or the Group. However, there can be no assurances that AEGON will be able to resolve existing litigation in the manner it expects or that existing or future litigation will not result in unexpected liability.

In addition, in recent years, the insurance industry has increasingly been the subject of litigation, investigations and regulatory activity by various governmental and enforcement authorities concerning certain practices. AEGON subsidiaries have received inquiries from local authorities in various jurisdictions including the United States, the United Kingdom and the Netherlands. In certain instances, AEGON subsidiaries modified business practices in response to such inquiries or the findings thereof. Certain AEGON subsidiaries have been informed that the regulators may seek fines or other monetary penalties or changes in the way AEGON conducts its business.

Table of Contents**iv Collateral****Assets subject to restrictions**

The following table reflects the carrying amount of non-cash financial assets that have been transferred to another party with the right to sell or repledge:

	2007	2006
Financial assets for general account		
Available-for-sale	13,804	15,775
Loans	1,236	1,292
Financial assets at fair value through profit or loss	113	129
Total	15,153	17,196

Financial assets for account of policyholders

9,214 9,214

The assets are transferred in light of security lending and repurchase activities, in return for cash collateral or other financial assets.

Assets pledged

AEGON pledges non-cash financial assets that are on its balance sheet in securities borrowing and lending transactions, in repurchase and reverse repurchase transactions, and against long-term borrowings. In addition, in order to trade derivatives on the various exchanges, AEGON posts margin as collateral.

Excluding cash collateral and repurchase agreements liabilities

AEGON has pledged EUR 3,723 million (2006: EUR 3,867 million) financial assets and EUR 39 million (2006: EUR 34 million) other assets as collateral for general account liabilities and contingent liabilities, regardless of whether the counterparty may sell or repledge the asset.

No financial assets and other assets were pledged as collateral for liabilities and contingent liabilities for account of policyholders in 2007 and 2006.

Cash collateral and repurchase agreements liabilities

In light of security lending and (reverse) repurchase activities, AEGON has liabilities of EUR 8,280 million (2006: EUR 8,987 million) and EUR 14 million (2006: EUR 806 million) respectively. The value of the assets transferred in these transactions approximates the carrying of the liabilities. To the extent that the counterparty has the right to sell or repledge the assets loaned, these have been included in the table above.

Assets accepted

AEGON receives collateral related to securities lending transactions. Non-cash collateral is not recognized in the balance sheet. The fair value of non-cash received is EUR 66 million (2006: EUR 4 million). AEGON cannot sell or repledge these assets and no assets have been sold or transferred.

Cash collateral is recorded on the balance sheet as an asset and an offsetting liability is established for the same amount as AEGON is obligated to return the collateral upon termination of the lending arrangement. Cash collateral is usually invested in pre-designated high quality investment strategies. Whether these subsequent investments are recorded on balance or off balance is subject to the same recognition rules as other asset types. The sum of cash and non-cash collateral is typically greater than the market value of the related securities loaned.

In addition, AEGON can receive collateral relative to derivative transactions that it enters into. Main counterparties to these transactions are investment banks and are typically rate AA or higher. The credit support agreement will normally dictate the threshold over which collateral needs to be pledged by AEGON or its counterparty. Transaction requiring AEGON or its counterparty to post collateral are typically the result of over-the-counter derivative trades, comprised mostly of interest rate swaps, currency swaps and credit swaps.

Table of Contents

Excluding cash collateral and reverse repurchase agreements receivables

Of the non-cash collateral accepted, EUR 9,648 million (2006: EUR 11,004 million) can be sold or repledged in absence of default of the counterparty. At the reporting date no amount (2006: EUR 47 million) has been sold or transferred.

Cash collateral and reverse repurchase agreements receivables

Non-cash financial assets that are borrowed or purchased under agreement to resell are not recognized in the balance sheet. To the extent that cash collateral is paid, a receivable is recognized for the corresponding amount. If other non-cash financial assets are given as collateral, these are not derecognized. AEGON pledges non-cash financial assets that are on its balance sheet in securities borrowing and lending transactions, in repurchase and reverse repurchase transactions, and against long-term borrowings. In addition, in order to trade derivatives on the various exchanges, AEGON posts margin as collateral.

5.10 Subsequent Events

On February 21, 2008 AEGON announced that AEGON Hungary has signed an agreement to purchase 100% of the registered capital of UNIQA Asset Management Company and Heller-Saldo 2000 Pension Fund Management Company, both Hungarian entities, from UNIQA Insurance Company. The shares will be transferred to AEGON by June 30, 2008, subject to the approval of regulatory authorities. This transaction is in line with AEGON's strategy to strengthen its position in the developing pension and asset management markets in Central & Eastern Europe. AEGON Hungary's assets under management for the pension business currently amount to EUR 1.6 billion. Following the acquisition, assets under management will increase by approximately EUR 300 million. After completion, AEGON will rank second in the Hungarian mandatory and third in the voluntary pension fund market.

On February 26, 2008 AEGON announced the acquisition of the Turkish life and pension company Ankara Emeklilik. Turkey, with its population of 74 million, has a low life insurance penetration and the private pensions market has an attractive growth potential. Ankara Emeklilik has a well-established presence in the Turkish life insurance and private pension market, with over 54,000 pension fund members and approximately EUR 35 million in assets under management. Ankara Emeklilik sells its products and services through a variety of different channels and has an agreement in place to distribute through a nationwide network of 236 branches belonging to Şekerbank.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

6.1 Introduction

AEGON N.V. is a public company under Dutch law and it is governed by three corporate bodies: the General Meeting of Shareholders, the Executive Board and the Supervisory Board.

6.2 General Meeting of Shareholders

A General Meeting of Shareholders is held at least once a year. Its main function is to decide matters such as the adoption of annual accounts, the approval of dividend payments and appointments to AEGON's Executive and Supervisory Boards. Meetings are convened by public notice. When deemed necessary, the Executive or Supervisory Board has the authority to convene an Extraordinary General Meeting of Shareholders.

Any shareholder may request items be added to the agendas of these meetings. Generally, in accordance with AEGON's Articles of Incorporation, requests are granted providing they are supported by shareholders representing either at least 0.1% of the company's issued capital or a block of shares worth at least EUR 50 million.

Every shareholder is entitled to attend the General Meeting of Shareholders, to speak and vote at the meeting, either in person or by proxy granted in writing (including electronically embedded proxies). In accordance with the applicable statutory requirements, any shareholder wishing to take part must provide proof of his or her identity and shareholding and notify the company ahead of time of his or her intention to attend the meeting.

When convening a General Meeting of Shareholders, AEGON's Executive Board can set a date (the record date), which is used to determine the entitlement of shareholders to take part and vote at the meeting.

AEGON is a member of the Stichting Communicatiekanaal Aandeelhouders, a Dutch foundation dedicated to improving communications between listed companies and their shareholders and to encourage greater shareholder participation at general meetings. Through the Communicatiekanaal participating shareholders can vote by proxy. In addition, AEGON solicits proxies from New York Registry shareholders in line with common practice in the United States.

At the General Meeting of Shareholders, each share carries one vote. However, the holder of preferred shares, Vereniging AEGON, may cast 25/12 votes per share in certain circumstances (for further details please refer to item 18 of this Annual Report on Form 20-F).

Resolutions are adopted by an absolute majority of valid votes cast, unless the law or AEGON's Articles of Incorporation stipulate otherwise.

6.3 Executive Board

The Executive Board is charged with the management of the company. Each member of the Board has duties related to his or her specific areas of expertise. The number of Executive Board members and the terms of their employment are determined by AEGON's Supervisory Board. Executive Board members are appointed by the General Meeting of Shareholders following nomination by the Supervisory Board.

Pension arrangements for Executive Board members are based on a retirement age of 62. Dutch members have the option of retiring earlier, at 60.

For certain decisions, set out in AEGON's Articles of Incorporation, the Executive Board must obtain the prior approval of the Supervisory Board. In addition, the Supervisory Board may subject other Executive Board decisions to its prior approval.

Table of Contents

6.4 Supervisory Board

AEGON's Supervisory Board oversees the management of the Executive Board as well as the overall course of the company's business and corporate strategy and shall take into account the relevant interests of AEGON's stakeholders. The Supervisory Board operates according to the principles of collective responsibility and accountability. The Supervisory Board may also assist the Executive Board by offering advice. Members are appointed by the General Meeting of Shareholders following nomination by the Supervisory Board.

AEGON's Supervisory Board currently consists of eleven non-executive members, one of whom is a former member of the company's Executive Board. The Supervisory Board also oversees the work of several committees composed of its members, dealing with specific issues linked to AEGON's accounts, corporate strategy and executive remuneration and appointments.

AEGON is eager to ensure the composition of its Supervisory Board is well balanced. With that in mind, a profile has been drawn up outlining the required qualifications of its members. Supervisory Board members are no longer eligible for reappointment after the age of 70, unless the Board itself decides to make an exception to this rule. Supervisory Board members' remuneration is determined by the General Meeting of Shareholders.

6.5 Exercise of Control

As a publicly-listed company, AEGON is required to provide the following, detailed information regarding structures and measures that might hinder or prevent a third party from acquiring the company or exercising effective control over it.

a. CAPITAL STRUCTURE

AEGON has authorized capital of EUR 610,000,000, divided into 3,000,000,000 common shares, each with a par value of EUR 0.12, and 1,000,000,000 class A and class B preferred shares, with a par value of EUR 0.25. As of December 31, 2007, 1,636,544,530 common shares and 246,850,000 preferred shares were issued, representing respectively 76.1% and 23.9% of AEGON's total issued and fully paid up capital.

The capital contribution made by class A preferred shares is a reflection of the market value of AEGON's common shares at the time this contribution was made. Preferred shares confer the right to receive a preferred dividend on the paid-in amount. No other dividend is paid on the preferred shares. In the event AEGON is liquidated, the paid-in amount on the preferred shares will be reimbursed before any payments on the common shares are made. Each share carries one vote. However, the holder of the preferred shares may cast 25/12 (approximately 2.08) votes per share in certain circumstances, as explained in more detail below, in line with the higher par value of the preferred shares.

b. TRANSFER OF SHARES

There are no restrictions on the transfer of common shares. As regards the transferability of preferred shares, please refer to clause 10.5 of the Amendment to the 1983 Merger Agreement, as published on AEGON's website.

c. SIGNIFICANT SHAREHOLDINGS

Vereniging AEGON holds 171,974,055 common shares, 211,680,000 class A preferred shares and 35,170,000 class B preferred shares. Together, this represents 34% of AEGON's voting capital, taking into account that the preferred shares are entitled to 25/12 votes per share. The 1983 Merger Agreement (as amended) provides that Vereniging AEGON has option rights to acquire additional class B preferred shares in order to prevent its voting power from being diluted by issues of common shares by AEGON N.V., unless Vereniging AEGON as a result of exercising these option rights increases its voting power to more than 33%.

d. SPECIAL CONTROL RIGHTS

AEGON's major shareholder, Vereniging AEGON, has voluntarily waived its right to cast 25/12 vote per preferred share, except in the event of a special cause as defined in greater detail in the Preferred Shares Voting Rights Agreement, published on AEGON's website. They include the

Edgar Filing: AEGON NV - Form 20-F

acquisition by a third party of an interest in AEGON N.V. amounting to 15% or more, a tender offer for AEGON N.V. shares or a proposed business combination by any person or group of persons, whether individually or as a group, other than in a transaction approved by the Executive and Supervisory Boards.

If, at its sole discretion, Vereniging AEGON determines that a special cause has occurred, it shall notify the General Meeting of Shareholders. In this event, Vereniging AEGON retains its full voting rights on the preferred shares for a period limited to six months. Based on its current shareholdings, Vereniging AEGON would for that limited period command 34% of the votes at a General Meeting of Shareholders. As a result of this and of the existence of certain qualified majority requirements specified in AEGON's Articles of

Table of Contents

Incorporation, Vereniging AEGON may effectively be in a position to block unfriendly actions by either a hostile bidder or others for a period of six months. In the absence of a special cause, Vereniging AEGON's share of AEGON's voting capital represents 23.9%.

For more information on Vereniging AEGON, please refer to item 7 of this Annual Report on Form 20-F.

e. EXERCISE OF OPTION RIGHTS

Senior executives at AEGON companies and other employees have been granted share appreciation rights and share options. For further details, please refer to note 18.37 of the financial statements as included in item 18 of this Annual Report on Form 20-F. Under the terms of the existing share option plans, AEGON cannot possibly influence the exercise of granted rights.

f. RESTRICTIONS ON VOTING RIGHTS

There are no restrictions whatsoever on the exercise of voting rights by holders of common shares, either with regard to the number of votes or to the time period in which they may be exercised. The voting rights attached to preferred shares held by Vereniging AEGON are limited as mentioned above. Depositary receipts for AEGON shares are not issued with the company's cooperation.

g. SHAREHOLDER AGREEMENTS

AEGON has no knowledge of any agreement between shareholders that might restrict the transfer of shares or the voting rights pertaining to shares.

h. AMENDMENT OF THE ARTICLES OF INCORPORATION AND BOARD APPOINTMENTS

The General Meeting of Shareholders may, with an absolute majority of votes cast, pass a resolution to amend AEGON's Articles of Incorporation or to dissolve the company in accordance with a proposal made by the Executive Board and approved by the Supervisory Board.

The General Meeting of Shareholders appoints members of both the Executive and Supervisory Boards, following nomination by the Supervisory Board. This nomination is binding if at least two candidates are nominated. However, the General Meeting of Shareholders may cancel the binding character of such nominations with a majority of two-thirds of the votes cast, representing at least one-half of AEGON's issued capital.

The General Meeting of Shareholders may bring forward a resolution to appoint a person other than in accordance with a nomination by the Supervisory Board, but such a resolution also requires a two-thirds majority of the votes cast, representing at least one-half of AEGON's issued capital.

Members of AEGON's Executive and Supervisory Boards may only be dismissed by the General Meeting with the same qualified majority, unless the dismissal is proposed by the Supervisory Board.

The provisions on appointing board members were included as part of a broader review of AEGON's corporate governance and were adopted at the Extraordinary General Meeting of Shareholders held on May 9, 2003. The qualified majority requirements were included to give AEGON temporary protection against unfriendly actions from, for example, a hostile bidder. In effect, major shareholder Vereniging AEGON may block any hostile attempts to replace AEGON's Executive or Supervisory Board for period of up to six months.

i. ISSUE AND REPURCHASE OF SHARES

New shares may be issued up to the maximum of the company's authorized capital pursuant to a resolution of the General Meeting of Shareholders. Shares may also be issued following a resolution of the Executive Board, if and to the extent that, the Board is empowered to do so by the General Meeting of Shareholders. An authorization to this end is usually presented to the annual General Meeting of Shareholders.

Edgar Filing: AEGON NV - Form 20-F

AEGON is entitled to acquire its own fully paid-up shares with due regard to the applicable legal requirements. The General Meeting of Shareholders usually authorizes the Executive Board to acquire shares of the company on conditions determined by the General Meeting of Shareholders.

j. **SIGNIFICANT AGREEMENTS AND CHANGE OF CONTROL**

AEGON is not party to any significant agreements which may take effect, alter, or terminate, conditional on a change of control following a public offer for the outstanding shares of the company, other than those customary in the financial markets (for example, financial arrangements, loan and joint venture agreements).

Table of Contents**k. SEVERANCE PAYMENTS IN EMPLOYMENT AGREEMENTS**

Executive Board members' employment agreements, as published on AEGON's website, contain provisions entitling members to severance payments should their employment be terminated as the result of a merger or takeover.

6.6 Dutch Corporate Governance Code

As a company based in the Netherlands, AEGON adheres to the Dutch Corporate Governance Code, which came into effect on January 1, 2004. AEGON endorses this Code and strongly supports its principles for sound and responsible corporate governance. AEGON regards the Code as an effective means of helping ensure that the interests of all stakeholders are duly represented and taken into account. The Code also promotes transparency in decision-making and helps strengthen the principles of good governance. Overseeing AEGON's overall corporate governance structure is the responsibility of both the Supervisory and Executive Boards. Any significant change to this structure is submitted for debate to the General Meeting of Shareholders. Generally, AEGON applies the best practice provisions set out in the Dutch Corporate Governance Code. Please refer to AEGON's website for an extensive review of the Group's compliance with this Code. The cases where AEGON does not fully apply the best practice provisions of the Code are dealt with and explained below (the recorded references are to the relevant provisions of the Code). In these few cases AEGON adheres, as far as possible, to the spirit of the Code.

CODE II.2.7: For members of the Executive Board the Dutch Corporate Governance Code recommends that the maximum compensation in the event of dismissal should be one year's salary, or two years' salary in the event a maximum of one year's salary would be manifestly unreasonable for a member who is dismissed in his or her first term of office. AEGON is committed to applying this best practice provision to all future Executive Board appointments. However, existing employment contracts with current members of the Board, in particular with reference to the severance payment arrangements, are not in line with this best practice provision. The employment agreements of the members of the Executive Board are disclosed on AEGON's website.

CODE II.3.3: The Code recommends that a member of the Executive Board should not take part in discussions or decision-making related to a subject or a transaction in which he or she has a conflict of interest. The fact that currently AEGON's CEO and CFO are also members of the Executive Committee of AEGON's largest shareholder, Vereniging AEGON, could be construed as a conflict of interest. In this connection it should be noted that the Articles of Association of Vereniging AEGON determine that AEGON's CEO and CFO are excluded from voting on certain issues directly related to AEGON or their position with AEGON. AEGON's Supervisory Board holds the view that, given the historic relationship between AEGON and Vereniging AEGON, it would not be in the Group's best interests to prevent the CEO and CFO from participating in discussions and decision-making related to Vereniging AEGON. For this reason, a protocol has been drafted specifically authorizing the CEO and CFO to continue their existing practice in dealings with Vereniging AEGON. The protocol is posted on AEGON's website.

CODE III.3.5: This provision of the Code stipulates that members of the Supervisory Board should serve no more than three consecutive four-year terms. For reasons of continuity, AEGON's Supervisory Board has asked Mr. O. John Olcay to complete his current term, which ends in 2008, though he had reached the maximum term stated in the Code in 2005.

CODE IV.1.1: The Dutch Corporate Governance Code recommends that the General Meeting of Shareholders may cancel the binding nature of nominations to the Executive and Supervisory Board with an absolute majority of votes and a limited quorum. AEGON's current Articles of Incorporation, however, provide for a much larger majority and a higher quorum than those advocated by the Code. AEGON's Supervisory Board is of the view that, in the absence of any specific anti-takeover measures, the current system is appropriate within the context of the 1983 Merger Agreement. In order to mitigate the possible negative effects of these more stringent requirements in the ordinary course of AEGON's businesses, the Supervisory Board has decided, in the absence of any unfriendly actions, that it will only make nominations to the Executive and Supervisory Board that are non-binding in nature.

For more detailed information, please see AEGON's corporate website.

Table of Contents

6.7 Executive Board

i Members

DONALD J. SHEPARD

Chief Executive Officer

Chairman, Executive Board

(1946, Nationality: US citizen)

Don Shepard began his career in 1970 with Life Investors Inc., an insurance holding company based in Cedar Rapids, Iowa. He held various management and executive positions before becoming Life Investors' executive vice-president and chief operating officer in 1985. In 1989, when Life Investors was consolidated with AEGON's other US businesses, Mr. Shepard was appointed President and CEO of the newly created AEGON USA. In 1992, he became a member of AEGON's Executive Board and in April 2002 was appointed Chairman. In addition to his position at AEGON, Mr. Shepard also serves as a member of the boards of directors at CSX Corporation and PNC Financial Services Group.

JOSEPH B.M. STREPPEL

Chief Financial Officer

Member, Executive Board

(1949, Nationality: Dutch)

Jos Streppel started his career in 1973, occupying treasury and investment positions at one of AEGON's predecessor companies in the Netherlands. In 1986, he became the Chief Financial Officer of FGH Bank, joining the bank's Executive Board the following year. In 1991, Mr. Streppel was appointed Chairman and CEO of the merchant bank Labouchère. Four years later, he also became Chairman of FGH Bank. Mr. Streppel was named as AEGON's Chief Financial Officer in 1998. In 2000, he was appointed to the Group's Executive Board. In addition to his positions at AEGON, Mr. Streppel is a member of the supervisory boards of both Royal KPN N.V and Van Lanschot Bankiers N.V.

ALEXANDER R. WYNAENDTS

Chief Operating Officer

Member, Executive Board

(1960, Nationality: Dutch)

Alex Wynaendts began his career in 1984 with ABN Amro, working in Amsterdam and London, in the Dutch bank's capital markets, asset management, corporate finance and private banking operations. In 1997, Mr. Wynaendts joined AEGON as Senior Vice-President for Group Business Development. Since 2003, he has been a member of AEGON's Executive Board, overseeing the Group's international growth strategy. In April 2007, Mr. Wynaendts was named AEGON's new Chief Operating Officer and in April 2008, Mr. Wynaendts will take over from Mr. Shepard as Chairman of AEGON's Executive Board.

Table of Contents**ii Ownership of AEGON N.V. shares**

At December 31, 2007, members of the Executive Board held an aggregate number of 390,644 AEGON common shares and 340,000 options and share appreciation rights on AEGON common shares. Refer to Note 18.50 of the notes to our consolidated financial statements in Item 18 of this Annual Report on Form 20-F.

Share options, including share appreciation rights, and interests in AEGON held by active members of the Executive Board are provided in the following table:

	Grant date	Number of rights per January 1, 2007	Number of rights granted in 2007	Number of rights exercised in 2007	Number of rights expired/forfeited in 2007	Number of rights per Dec. 31, 2007	Number of exercisable rights	Exercise price EUR	Shares held in AEGON at Dec. 31, 2007
Donald J. Shepard	10-Mar-02	50,000				50,000	50,000	26.70	
	16-Mar-04	50,000				50,000	50,000	10.56	346,323
Joseph B.M. Streppel	10-Mar-02	50,000				50,000	50,000	26.70	
	16-Mar-04	50,000				50,000	50,000	10.56	26,004
Alexander R. Wynaendts	10-Mar-02	40,000 ¹				40,000 ¹	40,000	26.70	
	10-Mar-03	50,000 ¹				50,000 ¹	50,000	6.30	
	16-Mar-04	50,000				50,000	50,000	10.56	18,317

¹ The share appreciation rights were granted before becoming a member of the Executive Board. The above rights have been granted under the LTI plan in force until December 31, 2003. Details of the exercise period is provided in note 18.37 of the notes to our consolidated financial statements in Item 18 of this Annual Report on Form 20-F.

For each of the members of the Executive Board, the shares held in AEGON as shown in the above table do not exceed 1% of total outstanding share capital at the balance sheet date.

Table of Contents

6.8 Supervisory Board

i Members

Dudley G. Eustace

Chairman of the Supervisory Board

Chairman of the Supervisory Board's Nominating and Strategy Committees

(1936, Nationality: joint British and Canadian)

Dudley G. Eustace is a former chairman of London-based Smith & Nephew PLC. He also served as vice-chairman of Royal Philips Electronics N.V. Mr. Eustace was appointed to AEGON's Supervisory Board in 1997. His current term will end in 2009. In addition to AEGON, Mr. Eustace also serves on the Supervisory Board of Royal KPN N.V. He is a member of the European Advisory Council for Rothschilds, Chairman of the Supervisory Board of the unlisted company The Nielsen Company and sits on the Council of the University of Surrey in the United Kingdom.

O. John Olcay

Vice-Chairman of the Supervisory Board

Chairman of the Supervisory Board's Risk Committee and member of the Nominating and Strategy Committees

(1936, Nationality: US citizen)

O. John Olcay is Vice-Chairman and Managing Director of Fischer, Francis, Trees and Watts Inc., based in New York. Mr. Olcay was appointed to AEGON's Supervisory Board in 1993. His term will end in 2008. Mr. Olcay is also chairman of the investment funds FFTW Funds Selection in Luxembourg and FFTW Funds in Dublin.

Irving W. Bailey II

Member of the Supervisory Board

Member of the Supervisory Board's Audit, Risk and Strategy Committees

(1941, Nationality: US citizen)

Irving W. Bailey is a senior advisor to Chrysalis Ventures. He is also a former chairman and CEO of Providian Corp., a former managing director of Chrysalis Ventures, as well as a former chairman of the board of directors at AEGON USA. Mr. Bailey has been a member of AEGON's Supervisory Board since 2004. His current term will end in 2008. In addition to his position at AEGON, Mr. Bailey is also a member of the boards of directors at Computer Sciences Corp. and at Hospira Inc.

Antony Burgmans

Member of the Supervisory Board

Member of the Supervisory Board's Audit Committee

(1947, Nationality: Dutch)

Antony Burgmans is a retired Chairman of the Anglo-Dutch group Unilever. He was appointed to AEGON's Supervisory Board in 2007. His current term ends in 2011. In addition to his position at AEGON, Mr. Burgmans is also a member of the Supervisory Board of Akzo Nobel N.V. and a member of the board of directors of BP PLC.

René Dahan

Member of the Supervisory Board

Chairman of the Supervisory Board's Compensation Committee and member of the Nominating Committee

(1941, Nationality: Dutch)

René Dahan was formerly Executive Vice-President and director of Exxon Corporation. He was appointed to AEGON's Supervisory Board in 2004. His current term will end in 2008. Mr. Dahan is also Chairman of the Supervisory Board of Ahold N.V. and a member of the Supervisory Board of TNT N.V. in the Netherlands as well as a member of the International Advisory Board of the Guggenheim Group.

Table of Contents

Shemaya Levy

Member of the Supervisory Board

Chairman of the Supervisory Board's Audit Committee and member of the Risk Committee

(1947, Nationality: French)

Shemaya Levy is a retired Executive Vice-President and CFO of Renault Group. He was appointed to AEGON's Supervisory Board in 2005. His current term will end in 2009. In addition to his position at AEGON, Mr. Levy is a non-executive director of Nissan Motor Company, Renault Spain and Safran. He is also a member of the Supervisory Boards of Segula Technologies Group and of TNT N.V.

Karla M.H. Peijs

Member of the Supervisory Board

Member of the Supervisory Board's Compensation Committee

(1944, Nationality: Dutch)

Karla M.H. Peijs is Queen's Commissioner for the province of Zeeland in the Netherlands. She was appointed to AEGON's Supervisory Board in 2007. Her current term will end in 2011. Ms. Peijs has served as a senior provincial government representative in Utrecht, a member of the European Parliament and from 2003 to 2007 was the Netherlands' Minister for Transport, Public Works and Water Management.

Toni Rembe

Member of the Supervisory Board

Member of the Supervisory Board's Audit Committee

(1936, Nationality: US citizen)

Toni Rembe is a former partner and senior advisor at Pillsbury Winthrop Shaw Pittman. She was appointed to AEGON's Supervisory Board in 2000. Her current term will end in 2008. Ms. Rembe is also a member of the board of directors of AT&T Inc. in the United States.

Willem F. C. Stevens

Member of the Supervisory Board

Member of the Supervisory Board's Audit and Compensation Committees

(1938, Nationality: Dutch)

Willem F. C. Stevens is a retired partner of Baker & McKenzie and, until June 2003, served as a senator in the Dutch upper house. He joined AEGON's Supervisory Board in 1997. His current term ends in 2009. Mr. Stevens is also a member of the Supervisory Boards of N.V. Luchthaven Schiphol, TBI Holdings B.V., AZL N.V., Goedland N.V. and Ermenegildo Zegna International N.V.

Kornelis J. Storm

Member of the Supervisory Board

Member of the Supervisory Board's Strategy Committee

Edgar Filing: AEGON NV - Form 20-F

(1942, Nationality: Dutch)

Kornelis J. Storm is a former chairman of AEGON's Executive Board. He was appointed to the Group's Supervisory Board in 2002 when he stepped down from his executive role. His current term ends in 2010. In addition to AEGON, Mr. Storm is also chairman of the Supervisory Board of KLM Royal Dutch Airlines N.V., Vice-Chairman of the Supervisory Board of Pon Holdings B.V. and a non-executive director of Unilever N.V. and Unilever PLC. Mr. Storm also serves as a member of the boards of directors of InBev SA and Baxter International Inc.

Leo M. Van Wijk

Member of the Supervisory Board

Member of the Supervisory Board's Compensation Committee

(1946, Nationality: Dutch)

Leo M. van Wijk is Vice-Chairman of Air France-KLM S.A. He has been a member of AEGON's Supervisory Board since 2003. Mr. Van Wijk was re-elected to the Supervisory Board in 2007. His term will end in 2011. He is also a member of the Supervisory Boards of Randstad Holding N.V. and Martinair.

Table of Contents**ii Ownership of AEGON N.V. shares****Common shares held by Supervisory Board members**

Shares held in AEGON at December 31

	2007	2006	2005
Irving W. Bailey, II	29,759	29,759	29,759
René Dahan	25,000	25,000	25,000
Karla M.H. Peijs (as of April 25, 2007)	900		
Toni Rembe	6,658	6,658	6,658
Kornelis J. Storm	276,479	276,479	276,479
Total	338,796	337,896	337,896

The shares held by Supervisory Board members have the same voting rights as the other shares outstanding in the same class.

6.9 Supervisory Board Committees

The Supervisory Board relies on its four committees, each made up of members selected from the Supervisory Board, to prepare specific issues for decision-making by the Board. In accordance with its Charter, each Committee reports its findings to the Supervisory Board during a subsequent Supervisory Board meeting.

In its December meeting the Board decided that the increasing importance of risk management warranted a separate committee to strengthen supervision of the Group's overall risk management strategy. This committee, called the Risk Committee, will initially consist of Messrs. Olcay (Chairman), Bailey and Levy. It will meet for the first time in March 2008. At the same time, it was decided that the tasks of the Strategy Committee would be taken over by the full Board.

i Audit Committee

The Audit Committee held eight meetings in 2007, which also were attended by AEGON's Chief Financial Officer as well as other members of the Executive Board, the Director of Group Finance & Information and representatives of Ernst & Young, AEGON's independent auditor. AEGON's Group Internal Auditor, the Group Risk Officer and the Group Actuarial Officer also periodically attended Audit Committee meetings.

Discussions focused on the following topics:

Quarterly results

AEGON's annual accounts and the audit process

Actuarial analyses

Accounting principles as defined by IFRS and US GAAP

Financial reports filed with the Securities and Exchange Commission

AEGON's Capital Plan

Reports on currency exposure

Internal control systems

Risk management

External Auditor's Engagement Letter for 2007

Integrated Audit Plan

The Audit Committee also discussed the publication of AEGON's 2006 Embedded Value Report and the Group's annual VNB figures. In July, the Audit Committee convened to discuss a proposed change to the accounting principles used in the Netherlands (see above).

External auditor

The Audit Committee recommended that Ernst & Young be reappointed for the 2007 financial year. It also discussed the role of independent auditors and the consequences of recent changes to the regulatory environment in both the United States and the Netherlands.

Table of Contents

Financial expert

The Committee confirmed that Shemaya Levy qualifies as a financial expert within the terms and conditions of both the Dutch Corporate Governance Code and the Sarbanes Oxley legislation in the United States.

Pre-approval Policy

In accordance with legal requirements, the Audit Committee approved and recommended to the Supervisory Board to amend the Pre-approval Policy.

Internal auditor

Each quarter, the Audit Committee received an update on the activities of the Group's Internal Auditor as well as AEGON's compliance with US SOX 404 legislation and an overview of fraud and general compliance issues. During these meetings, the Audit Committee held separate sessions with the Group's Internal Auditor as well as with external auditors, to discuss their findings. Members of the Executive Board were not present at these sessions.

SEC filings

Two separate meetings, in March and September, were devoted to AEGON's filings during the year with the US Securities and Exchange Commission. These comprise the Group's:

2006 Annual Report (Form 20-F); and

Results for the first six months of 2007 (Form 6-K).

Risk management, capital and budget

During its meeting in December, the Audit Committee discussed AEGON's Risk Management Report with the Group Risk Officer. The Committee also conducted a review of the Group's 2008 budget, as well as the Group's Capital Plan. It conveyed its findings and recommendations to the Supervisory Board. The Audit Committee also advised the Board to authorize members of AEGON's Executive Board to provide for the Group's funding requirements as set out in the 2008 Capital Plan.

ii Strategy Committee

The Strategy Committee held two meetings in 2007, which were also attended by the members of AEGON's Executive Board. The purpose of the Strategy Committee is to review AEGON's overall business strategy, in addition to considering alternative strategies and material aspects relating to the realization of the Group's strategic objectives.

The Strategy Committee held extensive discussions on AEGON's corporate strategy and prepared a framework for the agenda of the Supervisory Board strategy meeting held in Shanghai in May. As required, all proceedings of the Strategy Committee's meetings were reported to the Supervisory Board. During 2007, these minutes were a regular item on the agenda of the Supervisory Board meetings. As mentioned above, the Strategy Committee was discontinued at the end of 2007.

iii Nominating Committee

AEGON's Nominating Committee held four meetings in 2007. The Chairman of the Executive Board attended all meetings. During the year, the Nominating Committee discussed the composition of the Supervisory Board and its committees as well as existing and forthcoming vacancies. It also advised the Supervisory Board on nominations for two appointments and one reappointment. In addition, the Nominating Committee reviewed the composition of the Executive Board and subsequently advised the Supervisory Board on Mr. Wynaendts' proposed new title of Chief Operating Officer.

Edgar Filing: AEGON NV - Form 20-F

During the year, the Nominating Committee also discussed Mr. Shepard's succession. At its meeting on November 6, the Committee decided to recommend the Supervisory Board to appoint Mr. Wynaendts as chairman of the Executive Board, effective April 23, 2008.

iv Compensation Committee

The Compensation Committee held four meetings in 2007, also attended at certain moments by either the chairman of the Executive Board or the Group's CFO. During the year, the Compensation Committee discussed Executive Board members' 2006 Short-Term and Long-Term Incentive Plans and advised the Supervisory Board on incentive payments in 2007. In February and March, the main item of discussion during the Committee's meetings was the new Remuneration Policy for the Executive Board. This new Remuneration Policy was proposed to and adopted by shareholders during the 2007 AGM in April and entered into effect January 1, 2007.

The Committee also discussed AEGON's worldwide stock option plan. In December, the Committee reviewed Supervisory Board remuneration, comparing AEGON's arrangements with other leading Amsterdam-listed companies. The Committee decided to organize a benchmark assessment of AEGON's executive remuneration based on the Group's Dutch and international peers for the end of 2008. The Committee made use of the advice of Towers Perrin, external independent advisors.

Table of Contents

v Supervisory Board Composition

All members of the Supervisory Board are considered independent according to the terms of the Dutch Corporate Governance Code with the exception of Mr. Storm. Mr. Storm is not regarded as independent within the definition of the Code since he served as Chairman of AEGON's Executive Board prior to his retirement in April 2002. Mr. Storm joined the Supervisory Board in July 2002.

In April 2007, shareholders appointed Ms. Peijs and Mr. Burgmans to the Supervisory Board. In addition, Mr. Van Wijk was reappointed to another four-year term of office after his previous mandate expired in 2007.

In 2008, the mandates of both Ms. Rembe and Mr. Olcay will expire. Neither is eligible for reappointment. Members of the Supervisory Board wish to thank both Ms. Rembe and Mr. Olcay for their long and distinguished service to AEGON. Also in 2008, the four-year term of Irving W. Bailey II and René Dahan will expire. During the 2008 AGM, the Board will propose that shareholders reappoint Mr. Bailey for another four-year term. Mr. Dahan has informed the Board that, for personal reasons, he will not be available for reappointment. Following the advice of the Nominating Committee, the Supervisory Board has decided to nominate Cecelia Kempler, Rob Routs, Dirk Verbeek and Ben van der Veer for appointment. Their biographies will be provided together with the agenda for the 2008 AGM. These appointments bring the number of Supervisory Board members to twelve.

vi Executive Board composition

In compliance with the Dutch Corporate Governance Code, members of the Executive Board are appointed by shareholders for a term of four years, with the possibility of reappointment for subsequent, additional four-year terms. A schedule for all members of the Executive Board is included in the Group's Executive Board Rules and posted on AEGON's corporate website.

In 2007, Mr. Wynaendts' mandate expired. He was elected to another term of four years by shareholders at the AGM in April 2007.

In 2006, it was decided to establish a separate Management Board to strengthen and coordinate the management of AEGON's business activities around the world. The Management Board came into effect on January 1, 2007.

Under this structure, the Executive Board continues as the Group's statutory executive body and legal representative of AEGON N.V., entrusted with the overall management and strategic direction of the company. The Management Board, meanwhile, oversees a broad range of other issues that affect AEGON's international business and growth objectives.

Throughout 2007, AEGON's Management Board comprised:

Members of the Executive Board (Messrs. Shepard, Streppel and Wynaendts);

The CEOs of AEGON USA, AEGON The Netherlands and AEGON UK (Messrs Baird, Van der Werf and Thoresen respectively). The chairman of the Executive Board also acts as chairman of the Management Board. In January 2008, Mr. Van der Werf resigned as CEO of AEGON The Netherlands. Members of the Supervisory Board would like to express their appreciation for the valuable contribution Mr. Van der Werf has made to AEGON during his 26 years of service with the Group.

Table of Contents

6.10 Compensation of Directors and Officers

i General

AEGON's Compensation Committee is responsible for designing, developing, implementing and reviewing the Group's Remuneration policy. This policy outlines:

The terms and conditions for employment of Executive Board members;

Remuneration for members of the Group's Supervisory Board.
The Compensation Committee has four members:

René Dahan (chairman)

Karla M. H. Peijs

Willem F.C. Stevens

Leo M. van Wijk

Each year, AEGON's Compensation Committee reviews the Remuneration Policy based on information provided by the Group's independent external advisors Towers Perrin. This Committee may recommend changes in the Policy to the Supervisory Board. Any material changes must be referred to the General Meeting of Shareholders for approval.

ii Remuneration policy

Supervisory Board remuneration

Members of AEGON's Supervisory Board are entitled to:

A base fee for membership of the Supervisory Board itself;

A fee for membership of each of the Supervisory Board's committees;

An attendance fee for each committee meeting Supervisory Board members attend in person.

Each of these fees is a fixed amount. Members of AEGON's Supervisory Board do not receive any performance or equity-related compensation and do not accrue pension rights with the Group. These measures are designed to guarantee the independence of Supervisory Board deliberations and strengthen the overall effectiveness of AEGON's corporate governance.

The structure of Supervisory Board fees is as follows:

Edgar Filing: AEGON NV - Form 20-F

Base fee

For membership of the Supervisory Board, amounts in EUR (per annum)

Chairman	60,000
Vice-chairman	50,000
Member	40,000
<i>Committee fee</i>	

For membership of a Supervisory Board committee¹, amounts in EUR (per annum)

Chairman of the Audit Committee	10,000
Member of the Audit Committee	8,000
Chairman of other committees	7,000
Member of other committees	5,000

¹ AEGON has four committees in total: Audit, Nominating, Compensation and Strategy. AEGON pays a premium to members of its Audit Committee because of the additional workload involved.

Attendance fee

For committee meetings attended in person, amounts in EUR

Audit Committee	3,000
Other committees ²	1,250

² In case of intercontinental travel, this fee is doubled to EUR 2,500. Information on the members of AEGON's Supervisory Board may be found in Item 6.8.

Table of Contents

Executive Board remuneration

AEGON has a clear and well-defined policy toward executive remuneration. This policy is reviewed and assessed each year by the Group's Compensation Committee. If necessary, this Committee will recommend amendments to AEGON's Supervisory Board. Any material changes are then submitted by the Supervisory Board to the General Meeting of Shareholders for approval.

AEGON's Remuneration Policy has four main objectives:

To enhance the simplicity, transparency and credibility of executive remuneration;

To ensure AEGON is able to attract and retain highly qualified members for its Executive Board;

To provide competitive, performance-related remuneration consisting of both fixed and variable components;

To ensure the interests of Executive Board members are closely aligned with those of shareholders by linking remuneration directly to company performance.

The policy applies to all members of AEGON's Executive Board. Executive Board members are appointed for an initial term of four years and may be reappointed for successive mandates also of four years. AEGON's current Remuneration Policy took effect January 1, 2007. It was approved by the General Meeting of Shareholders on April 25, 2007.

Ensuring competitive remuneration

As part of its overall remuneration policy, AEGON regularly compares the Group's levels of executive remuneration with those at selected peers. Two separate peer groups have been established, one for US-based Executive Board members and a second for European-based members.

Companies included in these two peer groups were chosen according to the following criteria:

Industry: preferably life insurance;

Size: companies with similar levels of assets, revenue and market capitalization;

Geographic scope: preferably companies operating globally;

Location: companies based in the United States and Europe.

AEGON's objective is to create stable and consistent peer groups. The Supervisory Board periodically reviews the composition of these two groups to ensure they continue to provide a reliable basis for comparison.

The two peer groups are made up of the following companies:

United States

Edgar Filing: AEGON NV - Form 20-F

American International Group (AIG) (United States)

Genworth Financial (United States)

Hartford Financial Services (United States)

Lincoln National (United States)

Manulife Financial Corporation (Canada)

Metlife (United States)

Prudential Financial Inc. (United States)

Sun Life Financial Group (Canada)

Europe

Allianz (Germany)

Aviva (United Kingdom)

Axa (France)

Fortis (Belgium/the Netherlands)

ING Group (the Netherlands)

Legal & General Group (United Kingdom)

Munich Re (Germany)

Prudential PLC (United Kingdom)

Swiss Re (Switzerland)

Zurich Financial (Switzerland)

Ensuring transparent remuneration

For each member of its Executive Board, AEGON sets a so-called Target Total Compensation . This reflects the particular responsibilities and expertise of each Executive Board member and is entirely at the discretion of the Group s Supervisory Board.

Table of Contents

When determining Target Total Compensation levels, the Supervisory Board uses a range between the 40th and 60th percentile of the relevant peer group as an objective. Each year, AEGON's Supervisory Board reviews Target Total Compensation levels to ensure they remain competitive and continue to provide proper incentives to members of the Group's Executive Board. Target Total Compensation for Executive Board members comprises a fixed component, as well as both short-term and long-term incentive compensation. This structure ensures a balance between fixed and performance-related pay.

The table below gives a target breakdown for each of these three components. AEGON's long-term aim is to ensure that compensation for future members of the Group's Executive Board matches these targets as closely as possible. Current members of the Executive Board, however, have employment contracts that pre-date AEGON's existing Remuneration Policy. Terms and conditions of these contracts cannot be altered. As a result, the compensation breakdown for current members of the Executive Board may differ from the numbers below.

	Target % of fixed compensation	Target % of variable compensation	
		Short-term	Long-term
Executive Board position			
Chief Executive Officer	25%	25%	50%
Chief Financial Officer	40%	20%	40%
Member of the Executive Board	35%	25%	40%
Fixed compensation			

It is the responsibility of AEGON's Supervisory Board to determine fixed salaries for each member of the Group's Executive Board, based on his or her qualifications, experience and expertise.

Variable compensation

AEGON believes that variable compensation is an effective way of strengthening the commitment of individual Executive Board members to the Group's short-term and long-term objectives. Variable compensation under this plan is granted once the Group's annual accounts have been formally approved by the General Meeting of Shareholders.

Short-Term Incentive Compensation, or STI, is paid in cash. The Long-Term Incentive Compensation, or LTI, on the other hand, is paid in the form of conditional shares. The value of these shares is calculated using the fair market value of a single share at the start of the financial year.

Fifty percent of shares granted under AEGON's LTI plan vest four years after the grant date. The remaining 50% vest after a period of eight years.

Vesting shall occur automatically unless the Supervisory Board makes use of its discretionary right to annul the grant, in case of

Termination of employment before the vesting date:

For reasons other than death or disability of the participant;

For any acts by a participant which the Supervisory Board considers exceptionally detrimental to the company. Variable compensation is only granted if the company's performance matches a series of pre-determined performance indicators. Together, these indicators provide an accurate and reliable reflection of AEGON's overall performance during the year in question.

These indicators are:

Edgar Filing: AEGON NV - Form 20-F

Real net growth in operating earnings after tax¹;

Growth in the value of new business¹;

Total shareholder return.

At the beginning of every financial year, a target is set for each of the three indicators. A comparison is made at the end of the year between these targets and actual company performance. Entitlements for variable compensation are then calculated accordingly²:

Members of the Executive Board qualify for 100% of their entitlements if AEGON matches the pre-set performance targets;

If AEGON's performance exceeds the targets, however, Executive Board members may receive up to 150% of their entitlement.

¹ As publicly disclosed in AEGON's financial statements.

² For this calculation, the additive method is used, i.e. targets are set and performance assessed for each separate indicator, independently of the targets and performances of other indicators.

In addition, AEGON's Supervisory Board may make discretionary adjustments to Executive Board members' variable compensation, but must adhere to the following procedure:

If the Supervisory Board considers that AEGON's short-term or long-term business is being impacted by significant and exceptional circumstances that are not reflected in the pre-determined performance indicators, it may set up an ad hoc committee to consider possible adjustments;

Table of Contents

This committee will consist of the chairman of the Supervisory Board, the chairman of the Audit Committee and members of the Compensation Committee;

This ad hoc committee will review all circumstances in detail and document its findings. The committee may then put forward a proposal to the Supervisory Board assuming, of course, that the committee's conclusions coincide in principle with those of the Supervisory Board;

To reflect exceptional circumstances, variable compensation may be adjusted, but only to a level between 75% and 125% of the originally calculated entitlement¹.

¹ The absolute maximum for the adjusted variable compensation as a percentage of the target is therefore 187.5% (in other words, 150% multiplied by 125%). While it is also theoretically possible under this system to arrive at a variable compensation of zero, AEGON's Supervisory Board has the authority, if justified by the circumstances, to grant a discretionary payment. It should also be noted that these discretionary adjustments concern variable compensation only, not fixed compensation.

Pension and other benefits

Members of AEGON's Executive Board are offered pensions and other benefits in line with local practices in their countries of residence. Executive Board members may also receive other benefits based on their contracts of employment, local practices and comparable arrangements for executives at other similar, multinational companies. AEGON does not grant Executive Board members personal loans, financial guarantees or the like, unless in the normal course of business and on terms applicable to all personnel. All such arrangements must have the prior approval of the Supervisory Board.

Termination

Employment contracts for new members of AEGON's Executive Board contain a notice period of three months for the Executive Board member and six months for the Group. Termination arrangements conform to the Dutch Corporate Governance Code and to Dutch law. Existing rights of current Executive Board members will be respected. For further information, please refer to the agreements published on AEGON's website (www.aegon.com).

iii Remuneration report

Composition of the Executive Board

In 2007, AEGON's Executive Board had three members:

Donald J. Shepard, Chief Executive Officer, Chairman Executive Board;

Joseph B.M. Streppel, Chief Financial Officer, member Executive Board;

Alexander R. Wynaendts, Chief Operating Officer, member Executive Board.

Mr. Shepard will retire as Chief Executive Officer and chairman of the Executive Board, with effect from the General Meeting of Shareholders scheduled for April 23, 2008. He will be succeeded by Mr. Wynaendts.

In April 2007, Mr. Wynaendts was reappointed to the Executive Board for another four-year term. Mr. Streppel's term as Executive Board member expires in 2010.

Edgar Filing: AEGON NV - Form 20-F

Johan G. van der Werf resigned from AEGON's Executive Board at the beginning of 2007 after being appointed to the Group's Management Board. He stepped down as Chief Executive Officer of AEGON The Netherlands in January 2008.

Total compensation

AEGON sets a so-called Target Total Compensation for each member of its Executive Board. This comprises both fixed and variable compensation. Please refer to Item 6.10 ii for full details of AEGON's Remuneration Policy.

Fixed compensation provides Executive Board members with a base salary. The amount is paid each year. Variable compensation, on the other hand, is based on the company's financial performance and amounts paid each year may vary as a result.

Table of Contents**Fixed compensation**

Base salaries for the three members of AEGON's Executive Board in 2007 can be found in the following table:

Base salaries

	2006 ¹	2007 ¹
Executive Board member		
Donald J. Shepard (in USD)	1,000,000	1,000,000
Joseph B.M. Streppel (in EUR)	679,409	721,313
Alexander R. Wynaendts (in EUR)	575,086	676,313

¹ For Dutch members of the Board, amounts include base salary, the customary employee profit sharing bonus as well as a tax-deferred employee savings plan.

Messrs. Wynaendts and Streppel were both granted base salary increases at the beginning of 2007. These increases amounted to 17.6% and 6.2% respectively. Mr. Shepard's base salary remained unchanged despite a significantly weaker US dollar-euro exchange rate. AEGON expects Mr. Wynaendts' base salary to be reviewed again during 2008 following his appointment as chairman of the Executive Board.

Variable compensation

In April 2007, shareholders approved a new Remuneration Policy for Executive Board members. This changed AEGON's previous policy in three important respects:

First, all LTI payments now take the form of AEGON shares, rather than shares and stock options which had been the case previously;

Second, for variable compensation, the performance period is now one year, rather than three.

Third, fifty percent of the shares granted under the LTI plan shall vest four years after grant date. The remaining fifty percent shall vest after a period of eight years.

Short-term incentives

STI bonuses for members of the Executive Board determined in accordance with the 2006 and 2007 STI Plans and paid in 2007 may be found in the table below.

STI bonuses

Amounts in EUR	STI amount 2006 (paid in 2007)	STI amount 2007 (due in 2008) ¹	Decrease
Executive Board member Donald J. Shepard	1,502,467	609,516	(59.4)%
Joseph B.M. Streppel	542,477	237,500	(56.2)%
Alexander R. Wynaendts	717,216	301,000	(58.1)%

¹ Bonuses for the 2007 financial year are based on earnings figures released on March 6, 2008. 2007 bonuses will be paid in 2008 after adoption of the annual accounts by shareholders. Full details will be published as part of AEGON's Item 182008 Annual Report.

Edgar Filing: AEGON NV - Form 20-F

Please note that the 2006 plan was part of AEGON's former Remuneration Policy. The 2007 Plan, on the other hand, was formulated under the Group's new Remuneration Policy.

In addition to his short-term incentive bonus, Mr. Shepard also received EUR 2,789,000 in 2007 as an additional bonus related to AEGON's net income for the 2006 financial year. This represents a rise of 2.1% from EUR 2,732,000 in 2006 in line with the increase in AEGON's net income for the year. This STI bonus for Mr. Shepard will amount to EUR 2,551,000 for the financial year 2007, to be paid in 2008, subject to the adoption of the 2007 annual accounts by the General Meeting of Shareholders on April 23, 2008. This is a decrease of 9% as compared to the bonus paid for the year 2006.

Long-term incentives

There are two separate LTI compensation plans still running under the terms and conditions of AEGON's previous Remuneration Policy. They are:

The 2005 Long-Term Incentive Plan, which matured at the start of 2008;

The 2006 Long-Term Incentive Plan, which will mature at the start of 2009.

Table of Contents***The 2004 long-term incentive plan***

AEGON's 2004 Long-Term Incentive Plan, agreed under the Group's former Remuneration Policy, matured at the beginning of 2007. Share rights under this Plan, however, did not vest as AEGON failed to reach its financial targets for the three-year period 2004-2006. Therefore, no LTI payments were made under this Plan.

The 2005 long-term incentive plan

AEGON's 2005 Long-Term Incentive Plan, also formulated under AEGON's pre-2007 Remuneration Policy, matured at the beginning of 2008. All share rights under this Plan vested as targeted. Grants due in 2008 as part of the 2005 LTI Plan can be found in the following table.

2005 LTI plan

	Number of shares vested	Number of options vested ¹
<i>Executive Board member</i>		
Donald J. Shepard	38,542	77,084
Joseph B.M. Streppel	20,169	40,338
Alexander R. Wynaendts	17,066	34,132

¹ Exercise price EUR 9.91

The 2007 long-term incentive plan

AEGON's 2007 Long-Term Incentive Plan, agreed under the Group's current Remuneration Policy, also matured at the beginning of 2008. Based on AEGON's financial performance, the Group expects, as part of this 2007 plan, to:

Pay in full the portion of variable compensation linked to the Group's target for value of new business;

Pay nothing with respect either to the targets for real net growth in operating earnings after tax or total shareholder return. While AEGON reported 19.6% growth in its value of new business in 2007, operating earnings after tax were 4.3% lower than in 2006. Total shareholder returns were also lower as concerns over international credit markets weighted on AEGON's stock price during the year.

For grants expected in 2008 as part of the 2007 LTI Plan please refer to the table below.

2007 LTI plan

Amounts in EUR

	LTI amount (expected 2008)
<i>Executive Board member</i>	
Donald J. Shepard	730,834
Joseph B.M. Streppel	237,500
Alexander R. Wynaendts	270,000

Long-Term Incentive awards to Executive Board members under the 2005 and 2007 Long-Term Incentive Plans will mature and be determined in 2008. Full details will be published as part of AEGON's 2008 Annual Report.

Pension arrangements

Edgar Filing: AEGON NV - Form 20-F

Mr. Shepard's pension benefits are based on 55% of his final average earnings calculation, equivalent to his five highest complete and consecutive calendar years of pensionable earnings. For Messrs. Wynaendts and Streppel, their benefits are equal to 70% of their final base salary, provided they have completed 37 years of service.

Table of Contents**6.11 Employees and labor relations**

At the end of 2007, AEGON had 30,414 employees of which were 4,968 agent-employees. Approximately 50% are employed in the Americas, 20% in the Netherlands, 16% in the United Kingdom and 13% in Other Countries. All of AEGON's employees in the Netherlands, other than senior management, are covered by collective labor agreements, which are generally renegotiated annually on an industry wide basis. Individual companies then enter into employment agreements with their employees based on the relevant collective agreement. Since its founding, AEGON has participated in collective negotiations in the insurance industry and has based its employment agreements with its employees on the relevant collective agreement. The collective agreements are generally for a duration of one year. AEGON has experienced no significant strike, work stoppage or labor dispute in recent years.

Under Dutch law, members of the Central Works Council responsible for AEGON in the Netherlands are elected by AEGON The Netherlands employees. The Central Works Council has certain defined powers at the level of the Dutch subsidiary company AEGON Nederland N.V., including the right to make non-binding recommendations for appointments to its Supervisory Board and the right to enter objections against proposals for appointments to that Supervisory Board. Moreover, the Central Works Council of AEGON The Netherlands is to be consulted as regards a nomination for appointment pertaining to one seat on the Supervisory Board of AEGON.

The average number of employees per geographical area was:

	2007	2006	2005
Americas	14,887	14,104	14,139
The Netherlands	6,479	5,908	5,962
United Kingdom	4,777	4,553	4,520
Other countries	3,549	2,894	2,597
	29,692	27,459	27,218
Of which agent-employees	4,978	5,057	5,323

See Note 18.37 of the notes to our consolidated financial statements in Item 18 of this Annual Report on Form 20-F for a description of share-based payments to employees.

Table of Contents**ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS****General**

As of December 31, 2007, our total authorized share capital consisted of 3,000,000,000 common shares with a par value of EUR 0.12 per share and 1,000,000,000 class A and class B preferred shares, each with a par value of EUR 0.25 per share. At the same date, there were 1,636,544,530 common shares, 211,680,000 class A preferred shares and 35,170,000 class B preferred shares issued. Of the issued common shares 133,827,535 common shares were held by AEGON N.V. as treasury shares and 2,503,447 common shares were held by its subsidiaries.

All of our common shares and preferred shares are fully paid and not subject to calls for additional payments of any kind. All of our common shares are registered shares and held by shareholders worldwide either through Euroclear Netherlands as Deposit Shares or directly registered in the Register of Shareholders kept by the Company. Holders of New York Registry shares hold their common shares in registered form issued by our New York transfer agent on our behalf. New York Registry shares and Deposit Shares are exchangeable on a one-to-one basis and are entitled to the same rights, except that cash dividends are paid in US dollars on New York Registry shares.

As of December 31, 2007, 213 million common shares were held in the form of New York Registry shares. As of December 31, 2007, there were approximately 27,000 record holders, resident in the United States, of our New York Registry shares.

7A Major shareholders**i Vereniging AEGON**

Vereniging AEGON is the continuation of the former mutual insurer AGO. In 1978, AGO demutualized and Vereniging AGO became the only shareholder of AGO Holding N.V., which was the holding company for its insurance operations. In 1983, AGO Holding N.V. and Ennia N.V. merged into AEGON N.V. Vereniging AGO initially received approximately 49% of the common shares (which was reduced gradually to less than 40%) and all of the preferred shares in AEGON N.V., giving it voting majority in AEGON N.V. At that time Vereniging AGO changed its name into Vereniging AEGON.

The objective of Vereniging AEGON is the balanced representation of the interests of AEGON N.V. and all of its stakeholders, including shareholders, AEGON Group companies, insured parties, employees and other relations of the companies.

In accordance with the 1983 Merger Agreement, Vereniging AEGON had certain option rights on preferred shares to prevent dilution of voting power as a result of share issuances by AEGON N.V. This enabled Vereniging AEGON to maintain voting control at the General Meeting of Shareholders of AEGON N.V. In September 2002, AEGON N.V. effected a non-dilutive capital restructuring whereby Vereniging AEGON sold 350,000,000 of its common shares, of which 143,600,000 common shares were sold directly by Vereniging AEGON in a secondary offering outside the United States and 206,400,000 common shares were purchased by AEGON N.V. from Vereniging AEGON. AEGON N.V. subsequently sold these common shares in a global offering. The purchase price for the 206,400,000 common shares sold by Vereniging AEGON to AEGON N.V. was EUR 2,064,000,000, which amount (less EUR 12,000,000 related costs) Vereniging AEGON contributed as additional paid-in capital on the existing AEGON N.V. preferred shares, all held by Vereniging AEGON. As a result of these transactions, Vereniging AEGON's beneficial ownership interest in AEGON N.V.'s common shares decreased from approximately 37% to approximately 12% and its beneficial ownership interest in AEGON N.V.'s voting shares (excluding issued common shares held in treasury by AEGON N.V.) decreased from approximately 52% to approximately 33%.

On May 9, 2003, AEGON's shareholders approved certain changes to AEGON's corporate governance structure and AEGON's relationship with Vereniging AEGON in an extraordinary General Meeting of Shareholders. AEGON's Articles of Incorporation were subsequently amended on May 26, 2003. The relationship between Vereniging AEGON and AEGON N.V. was changed as follows:

The 440,000,000 preferred shares with nominal value of EUR 0.12 held by Vereniging AEGON were converted into 211,680,000 new class A preferred shares with nominal value of EUR 0.25 and the paid-in capital on the preferred shares was increased by EUR 120,000 to EUR 52,920,000. The voting rights pertaining to the new preferred shares (the class A preferred shares as well as the class B preferred shares which may be issued to Vereniging AEGON under the option agreement as described in the following sections) were adjusted accordingly to 25/12 vote per preferred share.

Edgar Filing: AEGON NV - Form 20-F

AEGON N.V. and Vereniging AEGON have entered into a preferred shares voting rights agreement, pursuant to which Vereniging AEGON has voluntarily waived its right to cast 25/12 vote per class A or class B preferred share. Instead, Vereniging AEGON has agreed to exercise one vote only per preferred share, except in the event of a special cause, such as the acquisition of a 15% interest in AEGON N.V., a tender offer for AEGON N.V. shares or a proposed business combination by any person or group of persons

Table of Contents

whether individually or as a group, other than in a transaction approved by the Executive Board and the Supervisory Board. If, in its sole discretion, Vereniging AEGON determines that a special cause has occurred, Vereniging AEGON will notify the General Meeting of Shareholders and retain its right to exercise the full voting power of 25/12 vote per preferred share for a limited period of six months.

AEGON N.V. and Vereniging AEGON have amended the option arrangements under the 1983 Merger Agreement. Under the amended option arrangements Vereniging AEGON, in case of an issuance of shares by AEGON N.V., may purchase as many class B preferred shares as would enable Vereniging AEGON to prevent or correct dilution to below its actual percentage of voting shares, unless Vereniging AEGON as a result of exercising these option rights would increase its voting power to more than 33 percent. Class B preferred shares will then be issued at par value (EUR 0.25), unless a higher issue price is agreed. In the years 2003 through 2006 29,290,000 class B preferred shares were issued under these option rights. In 2007, Vereniging AEGON exercised its option rights to purchase in aggregate 5,880,000 class B preferred shares at par value to correct dilution caused by AEGON's stock dividend issuances and treasury stock sales during the year.

Development of shareholding in AEGON N.V.

Number of shares	Common	Preferred A	Preferred B
At January 1, 2007	171,974,055	211,680,000	29,290,000
Exercise option right Preferred B shares			5,880,000
At December 31, 2007	171,974,055	211,680,000	35,170,000

Accordingly, under normal circumstances the voting power of Vereniging AEGON, based on the number of outstanding and voting shares (excluding issued common shares held in treasury by AEGON N.V.) at December 31, 2007, amounts to approximately 23.94%. In the event of a special cause, Vereniging AEGON's voting rights will increase, currently to 34.02%, for up to six months per special cause.

At December 31, 2007, the General Meeting of Members of Vereniging AEGON consisted of seventeen members. The majority of the voting rights is with the fifteen members not being employees or former employees of AEGON N.V. or one of the AEGON group companies, nor current or former members of the Supervisory Board or the Executive Board of AEGON N.V. The two other members are both elected by the General Meeting of Members of Vereniging AEGON from among the members of the Executive Board of AEGON N.V.

Vereniging AEGON has an Executive Committee consisting of seven members, five of whom, including the chairman and the vice-chairman, are not nor have ever been, related to AEGON. The other two members are also members of the Executive Board of AEGON N.V. Resolutions of the Executive Committee, other than with regard to amendment of the Articles of Association, are made with an absolute majority of the votes. When a vote in the Executive Committee results in a tie, the General Meeting of Members has the deciding vote. With regards to the amendment of the Articles of Association of Vereniging AEGON, a special procedure is in place to provide for the need of a unanimous proposal from the Executive Committee, thereby including the consent of the representatives of AEGON N.V. at the Executive Committee. Following the amendment of the Articles of Association as effected on September 13, 2005, this requirement does not apply in the event of a hostile change of control at the General Meeting of Shareholders of AEGON N.V., in which event Vereniging AEGON may amend its Articles of Incorporation without the cooperation of AEGON N.V.

Other major shareholders

To AEGON's knowledge there are no other parties holding a capital/voting interest in AEGON N.V. in excess of the thresholds established under Dutch securities law.

Table of Contents

7B Related party transactions

Related party transactions for the period under review include transactions between AEGON N.V. and Vereniging AEGON.

On July 23, 2007 and September 17, 2007, Vereniging AEGON exercised its option rights to purchase 2,690,000, respectively 3,190,000 class B preferred shares at par value to correct dilution caused by AEGON's stock dividend issuances and treasury stock sales during the year.

On November 24, 2006, Vereniging AEGON exercised its option rights to purchase in aggregate 5,440,000 class B preferred shares at par value to correct dilution caused by AEGON's stock dividend issuances during the year.

On December 21, 2006, Vereniging AEGON sold at intrinsic value and transferred to AEGON International N.V. all shares of its subsidiary company Albidus B.V. for an immaterial amount.

In both 2001 and 2002, AEGON N.V. entered into total return swaps with Vereniging AEGON in order to hedge the share option plan for each respective year. On April 15, 2005, these total return swaps were terminated, resulting in a positive impact on shareholders' equity of EUR 115 million. The amount has been added to retained earnings.

On May 17, 2005, AEGON N.V. purchased 3,821,645 of its common shares from Vereniging AEGON at a purchase price of EUR 9.847.

On December 5, 2005, Vereniging AEGON exercised its option rights to purchase in aggregate 6,950,000 class B preferred shares at par value to correct dilution caused by AEGON's stock dividend issuances and treasury stock sales during the year.

AEGON provides reinsurance, asset management and administrative services for employee benefit plans relating to pension and other post-employment benefits of AEGON employees. Certain post-employment insurance benefits are provided to employees in the form of insurance policies issued by affiliated insurance subsidiaries.

In the Netherlands, AEGON employees may make use of financing and insurance facilities for prices which are equivalent to the price available for agents. The benefit for AEGON employees is equivalent to the margin made by agents.

In 2006, AEGON sold its 100% interest in Scottish Equitable International S.A. for EUR 29 million to La Mondiale Participations S.A., a 35% associate.

At January 1, 2007, AEGON established a Management Board comprising the members of the Executive Board and the CEOs of AEGON USA, AEGON the Netherlands and AEGON UK. The total remuneration for the members of the Management Board over 2007 was EUR 15.6 million, consisting of EUR 5.7 million salary and other short term benefits, EUR 7.1 million cash performance payments, EUR 1.3 million pension premiums, EUR 0.8 million share-based payments and EUR 0.7 million other long-term benefits. Additional information on the remuneration and share-based compensation of members of the Executive Board and the Supervisory Board are disclosed in Item 6.

Interest of management in certain transactions

At the balance sheet date, the following members of the Executive Board had loans with AEGON or any AEGON related company: Mr. Streppel had a 5% mortgage loan of EUR 608,934; and Mr. Wynaendts had two mortgage loans totaling EUR 635,292, with interest rates of 4.1% and 4.4% respectively. In accordance with the terms of the contracts, no principal repayments were received on the loans in 2007. The terms of the board members' loans have not been amended in 2007, with the exception of the interest rates for Mr. Wynaendts.

Table of Contents**ITEM 8. FINANCIAL INFORMATION****8A Consolidated Statements and Other Financial Information**

This Annual Report contains the audited consolidated financial statements of AEGON for the fiscal year ended December 31, 2007. The consolidated financial statements in Item 18 of this Annual Report contain a Report of Independent Registered Public Accounting Firm dated March 25, 2008, consolidated balance sheets as at December 31, 2007 and 2006, consolidated income statements for the three years ended December 31, 2007, consolidated statement of changes in equity for the three years ended December 31, 2007, consolidated cash flow statements for the three years ended December 31, 2007 and notes to the financial statements, including the disclosures on pages 150 to 164 in Item 11.

Legal Proceedings

AEGON is involved in litigation in the ordinary course of business, including litigation where compensatory or punitive damages and mass or class relief are sought. In particular, certain current and former customers, and groups representing customers, have initiated litigation and certain groups are encouraging others to bring lawsuits in respect of certain products in the Netherlands. The products involved include securities leasing products and unit linked products (so called *beleggingsverzekeringen* including the KoersPlan product). AEGON has established adequate litigation policies to deal with the claims defending when the claim is without merit and seeking to settle in certain circumstances. This and any other litigation AEGON has been involved in over the last twelve months have not had any significant effects on the financial position or profitability of AEGON N.V. or the Group. However, there can be no assurances that AEGON will be able to resolve existing litigation in the manner it expects or that existing or future litigation will not result in unexpected liability.

In addition, in recent years, the insurance industry has increasingly been the subject of litigation, investigations and regulatory activity by various governmental and enforcement authorities concerning certain practices. AEGON subsidiaries have received inquiries from local authorities in various jurisdictions including the United States, the United Kingdom and the Netherlands. In certain instances, AEGON subsidiaries modified business practices in response to such inquiries or the findings thereof. Certain AEGON subsidiaries have been informed that the regulators may seek fines or other monetary penalties or changes in the way AEGON conducts its business.

Dividend policy

Under Dutch law and our Articles of Incorporation, holders of our common shares are entitled to dividends paid out of the profits remaining, if any, after the creation of a reserve account. First of all a fixed dividend is paid on the preferred shares, as described below. The Company may determine the dividend payment date and the dividend record date for the common shares, which may vary for the various kinds of registered shares. The Company may also determine the currency or currencies in which the dividends will be paid. We have declared interim and final dividends on our own common shares annually.

The Company may make one or more interim distributions to the holders of common shares and/or to the holders of preferred shares, the latter subject to the maximum dividend amount set forth below.

Interim dividends have traditionally been paid (usually in September) after the release of our six-month results. Each year a final dividend is paid, usually in May, upon adoption of the annual accounts at the annual General Meeting of Shareholders.

Holders of common shares historically have been permitted to elect to receive dividends in cash or in common shares, except for the final dividend for 2002, as distributed in May 2003, which was made in common shares only. For dividends, which holders may elect to receive in either cash or common shares, the value of the stock alternative may differ slightly from the value of the cash option. We pay cash dividends on New York Registry Shares in US dollars through Citibank, N.A., our NYSE paying agent, based on the foreign exchange reference rate (the rate based on the daily concertation procedure between central banks as published each working day at 14:15 hours by the European Central Bank) on the business day following the announcement of the interim dividend or on the second business day following the shareholder meeting approving the relevant final dividend.

The annual dividend on our class A and class B preferred shares is calculated on the basis of the paid-in capital on the preferred shares using a rate equal to the European Central Bank's fixed interest percentage for basic refinancing transactions plus 1.75%, as determined on Euronext Amsterdam's first working day of the financial year to which the dividend relates. Apart from this, no other dividend is to be paid on the preferred shares.

Table of Contents**ITEM 9. THE OFFER AND LISTING****9A Offer and listing details**

The principal market for our common shares is Euronext Amsterdam. Our common shares are also listed on the NYSE and the London and Tokyo stock exchanges.

The table below sets forth, for the calendar periods indicated, the high and low sales prices of our common shares on Euronext Amsterdam and the NYSE as reported by Bloomberg and is based on closing prices. Share prices have been adjusted for all stock splits and stock dividends through December 31, 2007.

ITEM 10. ADDITIONAL INFORMATION

10A Share capital

Not applicable

10B Memorandum and articles of incorporation

AEGON is registered under number 27076669 in the Commercial Register of the Chamber of Commerce and Industries for Haaglanden, The Hague, the Netherlands.

Certain provisions of AEGON's current Articles of Incorporation are discussed below.

Objects and purposes

- (1) The objects of AEGON are to incorporate, acquire and alienate shares and interests in, to finance and grant security for commitments of, to enter into general business relationships with, and to manage and grant services to legal entities and other entities, in particular those involved in the insurance business, and to do all that is connected therewith or which may be conducive thereto, all to be interpreted in the broadest sense.
- (2) In achieving the aforesaid objects due regard shall be taken, within the scope of sound business operations, to provide fair safeguards for the interests of all the parties directly or indirectly involved in AEGON.

Provisions related to directors

For information with respect to provisions in the Articles of Incorporation relating to members of the Supervisory Board and Executive Board, see Item 6, Directors, Senior Management and Employees .

Description of AEGON's capital stock

AEGON has two types of shares: Common shares (par value EUR 0.12) and (class A and class B) Preferred shares (par value EUR 0.25).

Common Characteristics of the Common and Preferred Shares

- (1) All shares are in registered form.
- (2) All shares have dividend rights except for those shares (if any) held by AEGON as treasury stock. Dividends which have not been claimed within five years lapse to AEGON.
- (3) Each currently outstanding share is entitled to one vote except for shares held by AEGON as treasury stock. There are no upward restrictions.

However, Vereniging AEGON, the sole holder of preferred shares may cast 25/12 votes per preferred share in line with their higher par value. Vereniging AEGON and AEGON have entered into a preferred shares voting rights agreement, pursuant to which Vereniging AEGON has voluntarily waived its right to cast 25/12 votes per class A or class B preferred share. Instead, Vereniging AEGON has agreed to exercise one vote only per preferred share, except in the event of a special cause, such as the acquisition of a 15% interest in AEGON N.V., a tender offer for AEGON N.V. shares or a proposed business combination by any person or group of persons, whether individually or as a group, other than in a transaction approved by the Executive Board and Supervisory Board). If, at its sole discretion, Vereniging AEGON determines that a special cause has occurred, Vereniging AEGON shall notify the General Meeting of Shareholders and retain its right to exercise the full voting power of 25/12 votes per preferred share for a limited period of six months.

- (4) All shares have the right to participate in AEGON's net profits. Net profits is the amount of profits after contributions, if any, to a reserve account.

Table of Contents

- (5) In the event of liquidation, all shares have the right to participate in any remaining balance after settlement of all debts.
- (6) The General Meeting of Shareholders may, at the proposal of the Executive Board, as approved by the Supervisory Board, resolve to reduce the outstanding capital either by (i) repurchasing shares and subsequently canceling them, or (ii) by reducing their nominal share value.
- (7) There are no sinking fund provisions.
- (8) All issued shares are fully paid-up; so there is no liability for further capital calls.
- (9) There are no provisions discriminating against any existing or prospective holder of shares as a result of such shareholder owning a substantial number of shares.

Differences between common and preferred shares

- (1) The common shares are listed; the preferred shares are not listed.
- (2) Preferred shares under certain circumstances are entitled to cast 25/12 votes per share in line with their higher nominal value.
- (3) Preferred shares are entitled to a preferred dividend on the paid-in amount, restricted to the fixed rate set by the European Central Bank for basic refinancing transactions plus 1.75%. No additional dividend is paid on the preferred shares and the remaining profit is available for distribution to the holders of common shares.
- (4) Any remaining balance after settlement of all debts in the event of liquidation, will first be allocated (to the extent possible) to repaying the paid-in capital on the preferred shares.
- (5) Holders of common shares have pre-emptive rights in relation to any issuance of common shares, while holders of preferred shares have no such pre-emptive rights.

Actions necessary to change the rights of shareholders

A change to the rights of shareholders would require an amendment to the Articles of Incorporation. The General Meeting of Shareholders (annual General Meeting or extraordinary General Meeting) may only pass a resolution to amend the Articles of Incorporation pursuant to a proposal of the Executive Board with the approval of the Supervisory Board. The resolution requires a majority of the votes cast at the meeting in order to pass. The actual changes to the text of the Articles of Incorporation will be executed by a civil law notary upon certification that the Minister of Justice does not object.

Furthermore, a resolution of the General Meeting of Shareholders to amend the Articles of Incorporation which has the effect of reducing the rights attributable to holders of preferred shares of a specific class shall be subject to the approval of the meeting of holders of preferred shares of such class.

Conditions under which meetings are held

Edgar Filing: AEGON NV - Form 20-F

Annual General Meetings and extraordinary General Meetings of Shareholders shall be convened by an announcement in one or more Dutch daily newspapers and in the official price list of Euronext Amsterdam. Notice must be given no later than the fifteenth day prior to the date of the meeting. The notice in the newspaper must contain a summary agenda and indicate the place where the complete agenda together with the documents pertaining to the agenda may be obtained. The agenda is also sent to shareholders registered with the Company Register and New York Registry shareholders at their addresses or to their brokers.

For admittance to and voting at the meeting, shareholders must produce evidence of their shareholding as of the record date set by the Executive Board. Shareholders must notify AEGON of their intention to attend the meeting.

Limitation on the right to own securities

There are no limitations, either under the laws of the Netherlands or in AEGON's Articles of Incorporation, on the rights of non-residents of the Netherlands to hold or vote AEGON common shares.

Provisions that would have the effect of delaying a change of control

A resolution of the General Meeting of Shareholders to suspend or dismiss a member of the Executive Board or a member of the Supervisory Board, other than pursuant to a proposal by the Supervisory Board, shall require at least two-thirds of the votes cast representing more than one-half of the issued capital.

Table of Contents

In the event a special cause occurs (such as the acquisition of 15% of AEGON's voting shares, a tender offer for AEGON's shares or a proposed business combination by any person or group of persons, whether individually or as a group, other than in a transaction approved by the Executive Board and Supervisory Board), Vereniging AEGON will be entitled to exercise its full voting rights of 25/12 votes per preferred share for up to six months per special cause, thus increasing its current voting rights to 34.02%.

Threshold above which shareholder ownership must be disclosed

There are no such provisions in the Articles of Incorporation. Dutch law requires public disclosure to a supervising government agency with respect to the ownership of listed shares when the following thresholds are met: 5%, 10%, 15%, 20%, 25%, 30%, 40%, 50%, 60%, 75% and 95%.

Material differences between Dutch law and US law with respect to the items above

Dutch company law is different from US law in the following respects:

AEGON, like other large Dutch public companies, has a two-tier governance system involving an executive board and a supervisory board. The Executive Board is the executive body and its members are employed by the Company. Members of the Executive Board are appointed and dismissed by the General Meeting of Shareholders, as inside directors are in the United States. The remuneration policy as regards the members of the Executive Board is adopted by the General Meeting of Shareholders. The number of the Executive Board members and the terms of their employment are determined by the Supervisory Board within the scope of the adopted remuneration policy. The Supervisory Board performs supervisory and advisory functions only and its members are outsiders that are not employed by the Company. The Supervisory Board has the duty to supervise the performance of the Executive Board, the Company's general course of affairs and the business connected with it. The Supervisory Board also assists the Executive Board by giving advice. Other powers of the Supervisory Board include the prior approval of certain important resolutions of the Executive Board. Members of the Supervisory Board are appointed for a four-year term and may be dismissed by the General Meeting of Shareholders. The remuneration of Supervisory Board members is fixed by the General Meeting of Shareholders. Resolutions entailing a significant change in the identity or character of the Company or its business require the approval of the General Meeting of Shareholders.

For more detailed information with respect to AEGON's Supervisory Board and Executive Board, see Item 6, Directors, Senior Management and Employees.

Special Conditions Governing Changes in the Capital

There are no conditions more stringent than what is required by law.

10C Material contracts

There are no material contracts.

10D Exchange controls

There are no legislative or other legal provisions currently in force in the Netherlands or arising under AEGON's Articles of Incorporation restricting remittances to holders of AEGON's securities that are not resident in the Netherlands. Cash dividends payable in euros on AEGON's common shares may be officially transferred from the Netherlands and converted into any other convertible currency.

10E Taxation

i Taxation in the Netherlands

Certain Dutch Tax Consequences for holders of common shares in AEGON

This section describes the principal tax consequences that will generally apply to holders of common shares in AEGON under Dutch tax law, Dutch tax treaties, published case law, regulations and judicial interpretations thereof, in each case as in force and in effect as of the date hereof. This description is subject to changes in Dutch law including changes that could have retroactive effect. No assurance can be given that authorities or courts in the Netherlands will agree with the description below. Not every potential tax consequence of such investment under the laws of the Netherlands will be addressed and the description below should not be read as extending by implication to matters not specifically referred to herein. Each holder or prospective investor should therefore consult their own tax advisor with respect to the tax consequences in relation to the acquiring, owning and disposing of common shares in AEGON (hereafter referred to as: common shares).

Dutch taxation of resident shareholders

The description of certain Dutch taxes set out in this section Dutch taxation of resident shareholders is only intended for the following investors:

- (1) individuals who are resident or deemed to be resident in the Netherlands and, with respect to personal income taxation, individuals who opt to be taxed as a resident of the Netherlands for purposes of Dutch taxation and who invest in the common shares (Dutch Individuals), excluding individuals:
 - (a) who derive benefits from the common shares that are taxable as benefits from miscellaneous activities , which includes activities that exceed normal active portfolio management;
 - (b) for whom the common shares or any payment connected therewith may constitute employment income; or
 - (c) who have a substantial interest, or a deemed substantial interest, in AEGON; and
- (2) corporate entities (including associations which are taxed as corporate entities) that are resident or deemed to be resident in the Netherlands for purposes of Dutch taxation and who invest in the common shares (Dutch Corporate Entities), excluding:
 - (a) corporate entities that are not subject to Dutch corporate income tax;
 - (b) pension funds and other entities that are exempt from Dutch corporate income tax;
 - (c) corporate entities that hold common shares, the benefits derived from which are exempt under the participation exemption (as laid down in the Dutch Corporate Income Tax Act 1969); and
 - (d) investment institutions as defined in the Dutch Corporate Income Tax Act 1969.

Generally, an individual who holds common shares will have a substantial interest if he or she holds, alone or together with his or her partner, whether directly or indirectly, the ownership of, or certain other rights relating to, shares representing 5% or more of the total issued and outstanding capital in AEGON (or the issued and outstanding capital of any class of shares), or rights to acquire shares, whether or not already

Edgar Filing: AEGON NV - Form 20-F

issued, that represent at any time 5% or more of the total issued and outstanding capital in AEGON (or the issued and outstanding capital of any class of shares), or the ownership of certain profit participating certificates that relate to 5% or more of our annual profit and/or to 5% or more of our liquidation proceeds. A holder of common shares will also have a substantial interest in AEGON if certain relatives (including foster children) of that holder or of his or her partner have a substantial interest in AEGON. If a holder of common shares does not have a substantial interest, a deemed substantial interest will be present if (part of) a substantial interest has been disposed of, by this holder, or is deemed to have been disposed of, on a non-recognition basis.

Personal and corporate income tax

Dutch individuals not engaged or deemed to be engaged in an enterprise. Generally, a Dutch individual who holds common shares that are not attributable to an enterprise from which it derives profits as an entrepreneur or pursuant to a co-entitlement to the net worth of such enterprise other than as an entrepreneur or a shareholder (a Dutch Private Individual), will be subject to a fictitious yield tax. Irrespective of the actual income or capital gains, the annual taxable benefit of all the assets and liabilities of a Dutch individual that are taxed under such regime including, as the case may be, the common shares, is set at a fixed percentage. This percentage is 4% of the average fair market value of these assets and liabilities at the beginning and at the end of every year (minus a tax-free amount). The tax rate applicable under the fictitious yield tax is 30%.

Table of Contents

Dutch individuals engaged or deemed to be engaged in an enterprise and Dutch Corporate Entities. Any benefits derived or deemed to be derived from the common shares (including any capital gains realized on the disposal thereof) that are attributable to an enterprise from which a Dutch Individual derives profits, whether as an entrepreneur or pursuant to a co-entitlement to the net worth of such enterprise (other than as an entrepreneur or a shareholder), are generally subject to personal income tax in its hands. Any benefits derived or deemed to be derived from the common shares (including any capital gains realized on the disposal thereof) that are held by a Dutch Corporate Entity are generally subject to corporate income tax in its hands.

Withholding tax

Dividend distributions are subject to a withholding tax imposed by the Netherlands at a rate of 15%, unless reduced under a relevant tax treaty. The concept dividends we distribute used in this section includes, but is not limited to:

- (1) distributions in cash or in kind, deemed and constructive distributions, and (partial) repayments of paid-in capital not recognized for Dutch dividend withholding tax purposes;
- (2) liquidation proceeds in excess of the qualifying average paid-in capital for Dutch dividend withholding tax purposes;
- (3) consideration for the redemption of the common shares, or, as a rule, consideration for the repurchase of common shares by AEGON (including a purchase by a direct or indirect subsidiary of AEGON) in excess of the qualifying average paid-in capital of these specific class of shares for Dutch dividend withholding tax purposes, unless such repurchase is made for temporary investment purposes or is exempt by law;
- (4) the par value of common shares issued to a holder of the common shares or an increase of the par value of common shares (unless distributed out of qualifying paid-in capital for Dutch dividend withholding tax purposes), to the extent that it does not appear that a contribution, recognized for Dutch dividend withholding tax purposes, has been made or will be made; and
- (5) partial repayment of paid-in capital, recognized for Dutch dividend withholding tax purposes, if and to the extent that AEGON has (cumulative) net profits, or can expect to derive such profits (anticipated profits), unless:
 - (a) a general meeting of the AEGON shareholders has resolved in advance to make such repayment; and
 - (b) prior to the repayment the par value of the common shares concerned has been reduced by an equal amount by way of an amendment of the articles of association.

Dutch Individuals and Dutch Corporate Entities can generally credit the withholding tax against their personal income tax or corporate income tax liability and are generally entitled to a refund of dividend withholding taxes exceeding their aggregate personal income tax or corporate income tax liability.

With retroactive effect as from April 27, 2001, provisions against dividend stripping were introduced in Dutch tax law. In the case of dividend stripping, dividend withholding tax cannot be credited or refunded. Dividend stripping is deemed to be present if the recipient of a dividend is not the beneficial owner thereof and is entitled to a larger reduction or refund of dividend withholding tax than the beneficial owner of the dividends. Under the anti-dividend stripping provisions, a recipient of dividends will not be considered the beneficial owner thereof if as a consequence of a combination of transactions, a person other than the recipient wholly or partly benefits from the dividends, whereby such person retains, whether directly or indirectly, an interest in the shares on which the dividends were paid comparable with his position in similar shares before such combination of transactions, including the sole acquisition of one or more dividend coupons and the establishment of short-term rights of enjoyment on common shares, while the transferor retains the ownership of the common shares. The provisions apply to the transfer of the common shares and dividend coupons and also to transactions that have been entered into in the anonymity of a regulated stock

market.

Currently AEGON may, with respect to certain dividends received from qualifying non-Netherlands subsidiaries, credit taxes withheld from those dividends against the Netherlands withholding tax imposed on certain qualifying dividends that are redistributed by AEGON, up to a maximum of the lesser of:

3% of the amount of the qualifying dividends redistributed by AEGON and

3% of the gross amount of certain qualifying dividends received by AEGON.

The reduction is applied to the Dutch dividend withholding tax that AEGON must pay to the Dutch tax authorities and not to the Dutch dividend withholding tax that AEGON must withhold.

Table of Contents

Gift and inheritance taxes

A liability to gift tax will arise in the Netherlands with respect to an acquisition of the common shares by way of a gift by an individual who is resident in the Netherlands or a corporate entity that is established in the Netherlands. A liability to inheritance tax will arise in the Netherlands with respect to an acquisition or deemed acquisition of the common shares by way of an inheritance or bequest on the death of an individual who is resident in the Netherlands.

For purposes of Dutch gift and inheritance taxes, an individual who holds Dutch nationality will, inter alia, be deemed to be resident in the Netherlands if he has been resident in the Netherlands at any time during the ten years preceding the date of the gift or his death. For purposes of Dutch gift tax, an individual not holding Dutch nationality will be deemed to be resident in the Netherlands if he has been resident in the Netherlands at any time during the 12 months preceding the date of the gift.

Dutch taxation of non-resident shareholders

This section describes certain Dutch tax consequences for a holder of common shares who is neither resident nor deemed to be resident in the Netherlands (a Non-Resident Shareholder). This section does not describe the tax consequences for Non-Resident Shareholders that hold the common shares as a participation under the participation exemption as laid down in the Dutch Corporate Income Tax Act 1969.

It is noted that a Non-Resident Shareholder will not become resident, or be deemed to become resident, in the Netherlands solely as a result of holding the common shares, or of the performance, execution, delivery and/or enforcement of rights in respect of the common shares.

Taxes on income and capital gains

A Non-Resident Shareholder will not be subject to any Dutch taxes on income or capital gains in respect of dividends AEGON distributes (other than withholding tax described below) or in respect of any gain realized on the disposal of common shares, provided that:

- (1) such Non-Resident Shareholder does not derive profits from an enterprise, whether as an entrepreneur or pursuant to a co-entitlement to the net worth of such enterprise (other than as an entrepreneur or a shareholder) which enterprise is, in whole or in part, carried on through a (deemed) permanent establishment or a permanent representative in the Netherlands and to which permanent establishment or permanent representative, as the case may be, the common shares are attributable;
- (2) such Non-Resident Shareholder does not have a substantial interest or a deemed substantial interest in AEGON, or, if such holder does have such an interest, it forms part of the assets of an enterprise;
- (3) if such Non-Resident Shareholder is an individual, the benefits derived from the shares are not taxable in the hands of such holder as a benefit from miscellaneous activities in the Netherlands, which includes activities that exceed normal active portfolio management;
- (4) such Non-Resident Shareholder is not entitled to a share in the profits of an enterprise effectively managed in the Netherlands, other than by way of the holding of securities or through an employment contract, to which enterprise the common shares or payments in respect of the common shares are attributable;
- (5) such Non-Resident Shareholder does not carry out and has not carried out employment activities in the Netherlands, does not serve and has not served as a director or a board member of an entity resident in the Netherlands and does not serve and has not served as civil servant of a Dutch public entity with which the holding of or income derived from the common shares is connected; and
- (6) if such Non-Resident Shareholder is an individual, he or she does not opt to be taxed as a resident of the Netherlands for purposes of Dutch taxation.

Edgar Filing: AEGON NV - Form 20-F

See the section "Dutch taxation of resident shareholders" for a description of the circumstances under which your common shares form part of a substantial interest or may be deemed to form part of a substantial interest in AEGON. It is noted that both non-resident individuals and non-resident corporate entities can hold a substantial interest.

Table of Contents

Withholding tax

Dividends we distribute are subject to a withholding tax imposed by the Netherlands at a rate of 15%, unless reduced under a relevant tax treaty. Reference is made to the section *Dutch taxation of resident shareholders Withholding tax* for a description of the concept dividends we distribute .

Entities that are resident of a country which is a member of the European Union and that qualify for the application of the EU Parent Subsidiary Directive are eligible for an exemption of dividend withholding tax, provided certain conditions are met (one of the conditions is that the parent company that is resident in the European Union must have a shareholding of at least 5%).

If a holder of common shares, whether an individual or an entity, is resident in a country other than the Netherlands and if a treaty for the avoidance of double taxation with respect to taxes on income is in effect between the Netherlands and that country, and the holder is a qualifying resident for purposes of such treaty, such holder may, depending on the terms of that particular treaty, qualify for full or partial relief at source or for a refund (in whole or in part) of the Dutch dividend withholding tax.

In the section *Dutch taxation of resident shareholders Withholding tax* , certain legislation is discussed that was introduced with retroactive effect from April 27, 2001. This legislation may also be applied to deny reduction or a refund of Dutch dividend withholding tax under double taxation conventions or the EU Parent Subsidiary Directive.

Currently AEGON may, with respect to certain dividends received from qualifying non-Netherlands subsidiaries, credit taxes withheld from those dividends against the Netherlands withholding tax imposed on certain qualifying dividends that are redistributed by AEGON, up to a maximum of the lesser of:

3% of the amount of the qualifying dividends redistributed by AEGON and

3% of the gross amount of certain qualifying dividends received by AEGON.

The reduction is applied to the Dutch dividend withholding tax that AEGON must pay to the Dutch tax authorities and not to the Dutch dividend withholding tax that AEGON must withhold.

Both the European Free Trade Association Court of Justice as well as the European Court of Justice (ECJ) issued judgments concerning outbound dividend payments to foreign shareholders. According to both courts, it is in breach with the European freedom of capital and the freedom of establishment to treat outbound dividend payments less favorably than dividend payments to domestic shareholders. As of January 1, 2007, in general, dividend payments to certain qualifying EU resident corporate shareholders are treated the same as dividend payments to certain qualifying Dutch resident corporate shareholders. Dividend payments to corporate shareholders residing outside the EU are, in general, still treated less favorably as opposed to dividend payments to certain qualifying Dutch resident corporate shareholders. The above stated court cases may have significant implications for certain non-EU resident shareholders that receive dividends that are subject to Netherlands dividend withholding tax (i.e. the aforementioned different treatment may be a breach of the European freedom of capital).

Although the freedom of capital generally also applies to capital movements to and from third countries, such as the United States, it cannot be ruled out that the freedom of capital movements to and from third countries must be interpreted more stringent as opposed to the freedom of capital movements to EU member states. Furthermore, the freedom of capital movements to and from third countries is generally subject to grandfathering (stand-still) provisions in the EC-Treaty (i.e. the restriction of the freedom of capital movements is allowed if these stand-still provisions apply). However, based on case law of the ECJ it may be held that these stand-still provisions do not apply in the specific case of claiming a refund of the Netherlands dividend withholding tax by a shareholder who did not acquire the shares in AEGON with a view to establishing or maintaining lasting and direct economic links between the shareholder and AEGON which allow the shareholder to participate effectively in the management of the company or in its control.

Especially the following non-EU resident shareholders may be affected and may as a result be entitled to a refund of Netherlands dividend withholding tax.

Edgar Filing: AEGON NV - Form 20-F

Legal entities that could have invoked the participation exemption with respect to the dividends received in case they would have been a resident of the Netherlands for tax purposes. In general, the participation exemption applies in case of shareholdings of 5% or more. In case of legal entities resident in the Netherlands, in effect no Dutch dividend withholding tax is due with respect to dividends on shareholdings that apply for the participation exemption.

Individuals if the shares do not belong to the assets of a business enterprise or do not belong to a substantial interest. In case such a natural person would have been a resident of the Netherlands, the dividend as such would not be subject to individual income tax. In stead, the individual would be taxed on a deemed income, calculated at 4% of his net equity, whereas the dividend tax withheld would have been credited in full against the individual income tax due.

Table of Contents

Legal entities that, if they had been based in the Netherlands, would not have been subject to corporate income tax, or would have qualified as an investment institution for the purposes of this tax, and that would, because of this, be eligible for a refund of dividend withholding tax withheld at their expense.

In addition, subject to certain conditions as well, a legal entity resident in a member state of the European Union, that is not subject to a profit based tax in that member state, and, should that entity be a resident in the Netherlands, would not be subject to Dutch corporate income tax, is also entitled to a refund of the Dutch dividend withholding tax withheld. Such legal entities that are not a resident of the European Union, are not entitled to a refund of Dutch dividend withholding tax.

Residents of the United States that qualify for, and comply with the procedures for claiming benefits under, the income tax convention between the Netherlands and the United States (the US/NL Income Tax Treaty) are generally eligible for a reduction of the Dutch withholding tax on dividend income to 15%, which rate may, under various specified conditions, be reduced to 5% if the beneficial owner is a company which holds directly at least 10% of the voting power in AEGON. The US/NL Income Tax Treaty provides, subject to certain conditions, for a complete exemption from, or refund of, Dutch dividend withholding tax for dividends received by exempt pension trusts and exempt organizations, as defined therein.

Subject to compliance with the procedures for claiming benefits, a holder of common shares will generally qualify for benefits under the US/NL Income Tax Treaty (an eligible U.S. holder), if the holder:

is the beneficial owner of the dividends paid on the common shares;

is resident in the United States according to the US/NL Income Tax Treaty;

is not restricted in claiming the benefits of the US/NL Income Tax Treaty under article 26 of the US/NL Income Tax Treaty (limitation on benefits);

does not carry on business in the Netherlands through a permanent establishment of which the common shares form part of the business property;

does not perform independent personal services from a fixed base in the Netherlands to which the holding of the common shares pertains; and is an individual, an exempt pension trust or exempt organization as defined in the US/NL Income Tax Treaty, an estate or trust whose income is subject to U.S. taxation as the income of a resident, either in its hands or in the hands of its beneficiaries, or a corporation that is not excluded from treaty benefits under the limitation on benefits provision of the US/NL Income Tax Treaty.

Gift and inheritance taxes

No liability for gift or inheritance taxes will arise in the Netherlands with respect to an acquisition of the common shares by way of a gift by, or on the death of, a Non-Resident Shareholder, unless:

- (1) such Non-Resident Shareholder at the time of the gift has or at the time of his death had an enterprise or an interest in an enterprise that is or was, in whole or in part, carried on through a permanent establishment or a permanent representative in the Netherlands and to which permanent establishment or permanent representative, as the case may be, the common shares are or were attributable; or
- (2) in the case of a gift of the common shares by an individual who at the time of the gift was a Non-Resident Shareholder, such individual dies within 180 days after the date of the gift while (at the time of his death) being resident or deemed to be resident in the Netherlands.

Edgar Filing: AEGON NV - Form 20-F

For purposes of Dutch gift and inheritance tax, an individual who holds Dutch nationality will, inter alia, be deemed to be resident in the Netherlands if he has been resident in the Netherlands at any time during the ten years preceding the date of the gift or his death. For purposes of Dutch gift tax, an individual not holding Dutch nationality will be deemed to be resident in the Netherlands if he has been resident in the Netherlands at any time during the 12 months preceding the date of the gift.

Furthermore, in exceptional circumstances the deceased or the donor will be deemed to be a resident in the Netherlands for purposes of Dutch gift and inheritance taxes if the heirs jointly, or the recipient of the gift, as the case may be, elect the deceased or the donor, as the case may be, to be treated as a resident of the Netherlands for purposes of Dutch gift and inheritance taxes.

Table of Contents

Other taxes and duties

No Dutch capital contribution tax, registration tax, transfer tax, stamp duty or any other similar documentary tax or duty will be payable in the Netherlands by the investors in respect of or in connection with the subscription, issue, placement, allotment or delivery of the common shares.

Value Added Tax

No Dutch value added tax will arise in respect of payments in consideration for the acquisition or the disposition of common shares, or in respect of payments by AEGON under common shares.

ii Taxation in the United States

This section describes certain US Federal income tax consequences to beneficial holders of common shares that are held as capital assets. This section does not address all US Federal income tax matters that may be relevant to a particular holder. Each investor should consult their tax advisor with respect to the tax consequences of an investment in the common shares. This section does not address tax considerations for holders of common shares subject to special tax rules including, without limitation, the following:

financial institutions;

insurance companies;

dealers or traders in securities or currencies;

tax-exempt entities;

regulated investment companies;

persons that will hold the common shares as part of a hedging or conversion transaction or as a position in a straddle or as part of a synthetic security or other integrated transaction for US Federal income tax purposes;

holders that own (or are deemed to own for US Federal income tax purposes) 10% or more of the voting shares of AEGON;

partnerships or pass-through entities or persons who hold common shares through partnerships or other pass-through entities; and

holders that have a functional currency other than the US dollar.

Further, this section does not address alternative minimum tax consequences or the indirect effects on the holders of equity interests in a holder of common shares. This section also does not describe any tax consequences arising under the laws of any taxing jurisdiction other than the Federal income tax laws of the US Federal government.

This section is based on the US Internal Revenue Code of 1986, as amended, US Treasury regulations and judicial and administrative interpretations, in each case as in effect and available on the date of this Annual Report on Form 20-F. All of the foregoing is subject to change, which change could apply retroactively and could affect the tax consequences described below.

Edgar Filing: AEGON NV - Form 20-F

For the purposes of this section, a US holder is a beneficial owner of common shares that is, for US Federal income tax purposes:

a citizen or individual resident of the United States;

a corporation or other entity that is treated for US Federal income tax purposes as a corporation, created or organized in or under the laws of the United States or any state of the United States (including the District of Columbia);

an estate, the income of which is subject to US Federal income taxation regardless of its source; or

a trust, if a court within the United States is able to exercise primary supervision over its administration and one or more US persons have the authority to control all of the substantial decisions of such trust.

A non-US holder is a beneficial owner of common shares that is not a US holder.

Table of Contents

Tax Consequences to US Holders

Distributions

The gross amount of any distribution (including any amounts withheld in respect of Dutch withholding tax) actually or constructively received by a US holder with respect to common shares will be taxable to the US holder as a dividend to the extent of AEGON's current and accumulated earnings and profits as determined under US Federal income tax principles. Such dividends will not qualify for the dividends received deduction otherwise allowable to corporations. Distributions in excess of current and accumulated earnings and profits are treated under US tax law as non-taxable return of capital to the extent of the US holder's adjusted tax basis in the common shares. Distributions in excess of earnings and profits and such adjusted tax basis will generally be taxable to the US holder as capital gain from the sale or exchange of property. However, AEGON does not maintain calculations of its earnings and profits under US Federal income tax principles. Therefore, US holders of AEGON shares will generally be taxed on all distributions as dividends, even if some portion of the distributions might otherwise be treated as a non-taxable return of capital or as capital gain if the amount of US earnings and profits was known. The amount of any distribution of property other than cash will be the fair market value of that property on the date of distribution.

Certain qualified dividend income received by individual US holders is taxed at a maximum income tax rate of 15%. Only dividends received from US corporations or from a qualified foreign corporation and on shares held by an individual US holder for a minimum holding period (generally, 61 days during the 121-day period beginning 60 days before the ex-dividend date) can qualify for this reduced rate. AEGON is eligible for benefits under the comprehensive income tax treaty between the Netherlands and the US; therefore, AEGON should be considered a qualified foreign corporation for this purpose. Accordingly, dividends paid by AEGON to individual US holders on shares held for the minimum holding period may qualify for a reduced income tax rate. The reduced rate for qualified dividends is currently scheduled to expire on December 31, 2010, unless further extended by Congress. Each US holder should consult their tax advisor regarding the reduced rate.

Distributions paid in currency other than US dollars (a foreign currency), including the amount of any withholding tax thereon, must be included in the gross income of a US holder in an amount equal to the US dollar value of the foreign currency calculated by reference to the exchange rate in effect on the date of receipt. This is the case regardless of whether the foreign currency is converted into US dollars. If the foreign currency is converted into US dollars on the date of receipt, a US holder generally should not be required to recognize foreign currency gain or loss in respect of the dividend. If the foreign currency received in the distribution is not converted into US dollars on the date of receipt, a US holder will have a basis in the foreign currency equal to its US dollar value on the date of receipt. Any gain or loss on a subsequent conversion or other disposition of the foreign currency will be treated as ordinary income or loss.

Dividends received by a US holder with respect to common shares will be treated as foreign source income for foreign tax credit limitation purposes. Subject to certain conditions and limitations, any Dutch income tax withheld on dividends may be deducted from taxable income or credited against a US holder's Federal income tax liability. For taxable years beginning after December 31, 2006, the limitation on foreign taxes eligible for the US foreign tax credit is calculated separately with respect to passive category income and general category income. Dividends distributed by AEGON generally will constitute passive category income, or, in the case of certain US holders, financial services income, which is treated as general category income. Each US holder should consult their tax advisor regarding the availability of the foreign tax credit under their particular circumstances.

The amount of the qualified dividend income paid by AEGON to a US holder that is subject to the reduced dividend income tax rate and that is taken into account for purposes of calculating the US holder's US foreign tax credit limitation must be reduced by the rate differential portion of such dividend (which, assuming a US holder is in the highest income tax bracket, would generally require a reduction of the dividend amount by approximately 57.14%). Each US holder should consult their tax advisor regarding the implications of the rules relating to qualified dividend income on the calculation of US foreign tax credits under their particular circumstances.

In general, upon making a distribution to shareholders, AEGON is required to remit all Dutch dividend withholding taxes to the Dutch tax authorities. The full amount of the taxes so withheld should (subject to certain limitations and conditions) be eligible for the US holder's foreign tax deduction or credit as described above. Investors are urged to consult their tax advisors regarding the general creditability or deductibility of Dutch withholding taxes.

AEGON generally affords shareholders an option to receive dividend distributions in cash or in stock. A distribution of additional common shares to US holders with respect to their common shares that is made pursuant to such an election will generally be taxable in the same manner as a cash dividend under the rules described above.

Sale or Other Disposition of Shares

Edgar Filing: AEGON NV - Form 20-F

Upon the sale or exchange of common shares, a US holder will generally recognize gain or loss for US Federal income tax purposes on the difference between the US dollar value of the amount realized from such sale or exchange and the tax basis in those common shares. This gain or loss will be a capital gain or loss and will generally be treated as from sources within the United States, except that certain US holders may be subject to dividend recapture rules under which such losses could be treated as foreign source to the extent

Table of Contents

the US holder received dividends during the 24-month period prior to the sale. Investors should consult their tax advisors with respect to the treatment of capital gains (which may be taxed at lower rates than ordinary income for taxpayers who are individuals, trusts or estates that have held the common shares for more than one year) and capital losses (the deductibility of which is subject to limitations).

If a US holder receives foreign currency upon a sale or exchange of common shares, gain or loss, if any, recognized on the subsequent sale, conversion or disposition of such foreign currency will be ordinary income or loss, and will generally be income or loss from sources within the United States for foreign tax credit limitation purposes. However, if such foreign currency is converted into US dollars on the date received by the US holder, the US holder generally should not be required to recognize any gain or loss on such conversion.

Redemption of Common Shares

The redemption of common shares by AEGON could be treated as a sale of the redeemed shares by the US holder (taxable as described above under *Sale or Other Disposition of Shares*) or as a distribution to the US holder (taxable as described above under *Distributions*).

Passive Foreign Investment Company Considerations

Based on the nature of AEGON's gross income, the average value of AEGON's gross assets, and the active conduct of AEGON's insurance business, AEGON does not believe that it could be classified as a PFIC. If AEGON were treated as a PFIC in any year during which a US holder owns common shares, certain adverse tax consequences could apply. Investors should consult their tax advisors with respect to any PFIC considerations.

Tax Consequences to Non-US Holders

A non-US holder generally will not be subject to US Federal income tax on dividends received on common shares or on any gain realized on the sale or exchange of common shares unless the gain is connected with a trade or business that the non-US holder conducts in the United States or unless the non-US holder is an individual, such holder was present in the United States for at least 183 days during the year in which such holder disposes of the common shares, and certain other conditions are satisfied. Non-US holders should consult their tax advisors with respect to the US Federal income tax consequences of dividends received on, and any gain realized from the sale or exchange of, the common shares.

Tax Consequences to US Holders and Non-US Holders

Backup Withholding and Information Reporting

Backup withholding and information reporting requirements may apply to certain payments on the common shares and to proceeds of a sale or redemption of the common shares to US holders made within the United States. AEGON, its agent, a broker, or any paying agent, as the case may be, may be required to withhold tax from any payment that is subject to backup withholding if a US holder fails to furnish the US holder's taxpayer identification number, fails to certify that such US holder is not subject to backup withholding, or fails to otherwise comply with the applicable requirements of the backup withholding rules. Certain US holders (including, among others, corporations) are not subject to the backup withholding and information reporting requirements.

Non-US holders that provide the required tax certifications of exempt or foreign status will generally be exempt from US information reporting requirements and backup withholding. However, sales proceeds a non-US holder receives on a sale of common shares through a broker may be subject to information reporting and backup withholding if the non-US holder is not eligible for an exemption.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules from a payment to a US holder or a non-US holder generally may be claimed as a credit against such holder's US Federal income tax liability provided that the required information is furnished to the US Internal Revenue Service. Investors should consult their tax advisors as to their qualification for exemption from backup withholding and the procedure for obtaining an exemption. Non-US holders should consult their tax advisors concerning the applicability of the information reporting and backup withholding rules.

Table of Contents
**ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK
FINANCIAL AND INSURANCE RISKS¹**
General

As an insurance company, AEGON is in the risk business and as a result is exposed to a variety of risks. A description of our risk management and control systems is given below on the basis of significant identified risks for us. Some risks, such as currency translation risk, are related to the international nature of AEGON's business. Other risks include insurance related risks, such as changes in mortality and morbidity. However, our largest exposures are to changes in financial markets (e.g. interest rate, credit and equity market risks) that affect the value of the investments, liabilities from products that we sell, deferred expenses and value of business acquired.

AEGON manages risk at local level where business is transacted, based on principles and policies established at the Group level. AEGON's integrated approach to risk management involves common measurement of risk and scope of risk coverage to allow for aggregation of the Group's risk position. In addition, this integrated framework facilitates the sharing of best practices and the latest research on methodologies. The risk management functions are applied locally and are tied to the speed of business, while corporate oversight remains independent of the business activity providing oversight and peer review.

To manage its risk exposure, AEGON has risk policies in place. Many of these policies are group wide while others are specific to the unique situation of local businesses. The group level policies limit the Company's exposure to major risks such as equity, interest rates, credit and currency. The limits in these policies in aggregate remain within the Company's overall tolerance for risk and the Company's financial resources. Operating within this policy framework, AEGON employs risk management programs including asset liability management (ALM) processes and models, hedging programs (which are largely conducted via the use of derivatives) and insurance programs (which are largely conducted through the use of reinsurance). These risk management programs are in place in each country unit and are not only used to manage risk in each unit, but are also part of overall Group Risk Management.

AEGON operates a Derivative Use Policy and a Reinsurance Use Policy to govern its usage of derivatives and reinsurance. These policies establish the control, authorization, execution and monitoring requirements of the usage of such instruments. In addition, these policies stipulate necessary mitigation of credit risk created through these derivatives and reinsurance risk management tools. For derivatives, credit risk is normally mitigated by requirements to post collateral via credit support annex agreements. For reinsurance, credit risk is normally mitigated by downgrade triggers allowing AEGON's recapture of business, funds withheld by treaties (when AEGON owns the assets) and assets held in trust for the benefit of AEGON (in the event of reinsurer insolvency).

As part of these risk management programs, AEGON takes inventory of its current risk position across risk categories. We also measure the sensitivity of net income and shareholders' equity under both stochastic and deterministic scenarios. Management uses the insight gained through these 'what if?' scenarios to manage the Group's risk exposure and capital position. The models, scenarios and assumptions used are reviewed regularly and updated as necessary.

Results of AEGON's sensitivity analyses are presented throughout this section to show the estimated sensitivity of net income and equity to various scenarios. For each type of market risk, the analysis shows how IFRS net income and equity would have been affected by changes in the relevant risk variable that were reasonably possible at the reporting date. For each sensitivity test the impact of a reasonably possible change in a single factor is shown. The analysis considers the interdependency between interest rates and lapse behavior for products sold in the Americas where there is clear evidence of dynamic lapse behavior. Management action is taken into account to the extent that it is part of AEGON's regular policies and procedures, such as established hedging programs. However, incidental management actions that would require a change in policies and procedures are not considered.

Each sensitivity analysis reflects the extent to which the shock tested would affect management's critical accounting estimates and judgment in applying AEGON's accounting policies. Market-consistent assumptions underlying the measurement of non-listed assets and liabilities are adjusted to reflect the shock tested. The shock may also affect the measurement of assets and liabilities based on assumptions that are not observable in the market. For example, a shock in interest rates may lead to changes in the amortization schedule of deferred policy acquisition costs or to

¹ The information in this section (page 151-166) has been prepared in accordance with IFRS 7 Financial Instruments- Disclosure

² Please refer to Note 18.3 of the financial statements for a description of the critical accounting estimates and judgments.

Table of Contents

increased impairment losses on equity investments. Although management's short-term assumptions may change if there is a reasonable change in a risk factor, long-term assumptions will generally not be revised unless there is evidence that the movement is permanent. This fact is reflected in the sensitivity analyses provided below.

Being based on IFRS, the accounting mismatch inherent in IFRS is also apparent in the reported sensitivities. A change in interest rates has an immediate impact on the carrying amount of assets measured at fair value. However the shock will not have a similar effect on the carrying amount of the related insurance liabilities that are measured based on prudent assumptions or on management's long term expectations. Consequently, the different measurement bases for assets and liabilities lead to increased volatility in IFRS net income and equity. AEGON has classified a significant part of its investment portfolio as available for sale, which is one of the main reasons why the economic shocks tested have a different impact on net income than on equity. Unrealized gains and losses on these assets are not recognized in the income statement but are booked directly to the revaluation reserves in equity, unless impaired. As a result, economic sensitivities predominantly impact equity but leave net income unaffected. The effect of movements of the revaluation reserve on capitalization ratios and capital adequacy are minimal. AEGON's target ratio for the composition of its capital base is based on shareholders' equity excluding the revaluation reserve (see also Item 5.6).

The sensitivities do not reflect what the net income for the period would have been if risk variables had been different because the analysis is based on the exposures in existence at the reporting date rather than on those that actually occurred during the year. Nor are the results of the sensitivities intended to be an accurate prediction of AEGON's future equity or earnings. The analysis does not take into account the impact of future new business, which is an important component of AEGON's future earnings. It also does not consider all methods available to management to respond to changes in the financial environment, such as changing investment portfolio allocations or adjusting premiums and crediting rates. Furthermore, the results of the analyses cannot be extrapolated for wider variations since effects do not tend to be linear. No risk management process can clearly predict future results.

Currency exchange rate risk

As an international group, AEGON is subject to foreign currency translation risk. Foreign currency exposure exists when policies are denominated in currencies other than the issuer's functional currency. Currency risk in the investment portfolios backing insurance and investment liabilities are managed using asset liability matching principles. Assets allocated to equity are kept in local currencies to the extent shareholders' equity is required to satisfy regulatory and self-imposed capital requirements. Therefore, currency exchange rate fluctuations may affect the level of shareholders' equity as a result of translation of subsidiaries into euro, the Group's presentation currency. AEGON holds the remainder of its capital base (capital securities, subordinated and senior debt) in various currencies in amounts that are targeted to correspond to the book value of the country units. This balancing mitigates currency translation impacts on equity and leverage ratios. AEGON does not hedge the income streams from the main non-euro units and, as a result, earnings may fluctuate due to currency translation. As AEGON has significant business segments in the Americas and in the United Kingdom, the principal sources of exposure from currency fluctuations are from the differences between the US dollar and the euro and between the UK pound and the euro. AEGON may experience significant changes in net income and shareholders' equity because of these fluctuations.

AEGON operates a Currency Risk Policy under which direct currency speculation or program trading by country units is not allowed unless explicit approval has been granted by the Group Risk and Capital Committee. Assets should be held in the functional currency of the business written or hedged back to that currency. Where this is not possible or practical, remaining currency exposure is subject to documentation requirements and limits are placed on the total exposure at both group level and for individual country units.

Information on AEGON's 3-year historical net income and equity in functional currency on an IFRS basis are shown in the table below:

	2007	2006	2005

¹ The effect of currency exchange movements is reflected as a one-time shift up or down in the value of the non-euro currencies relative to the euro on December 31, 2007

Interest rate risk

AEGON bears interest rate risk with many of its products. In cases where cash flows are highly predictable, investing in assets that closely match the cashflow profile of the liabilities can offset this risk. For some AEGON country units, local capital markets are not well developed, which prevents the complete matching of assets and liabilities for those businesses. For some products, cash flows are less predictable as a result of policyholder actions that can be affected by the level of interest rates.

In periods of rapidly increasing interest rates, policy loans, surrenders and withdrawals may and usually do increase. Premiums in flexible premium policies may decrease as policyholders seek investments with higher perceived returns. This activity may result in cash payments by AEGON requiring the sale of invested assets at a time when the prices of those assets are adversely affected by the increase in market interest rates; this may result in realized investment losses. These cash payments to policyholders result in a decrease in total invested assets and a decrease in net income. Among other things, early withdrawals may also require accelerated amortization of DPAC, which in turn reduces net income.

During periods of sustained low interest rates, AEGON may not be able to preserve margins as a result of minimum interest rate guarantees and minimum guaranteed crediting rates provided on policies. Also, investment earnings may be lower because the interest earnings on new fixed-income investments are likely to have declined with the market interest rates. Mortgages and redeemable bonds in the investment portfolio are more likely to be repaid as borrowers seek to borrow at lower interest rates and AEGON may be required to reinvest the proceeds in securities bearing lower interest rates. Accordingly, net income declines as a result of a decrease in the spread between returns on the investment portfolio and the interest rates either credited to policyholders or assumed in reserves.

Edgar Filing: AEGON NV - Form 20-F

AEGON manages interest rate risk closely taking into account all of the complexity regarding policyholder behavior and management action. AEGON employs sophisticated interest rate measurement techniques and actively uses derivatives and other risk mitigation tools to closely manage its interest rate risk exposure. All derivative use is governed by AEGON Derivative Use Policy.

Table of Contents

The table that follows shows interest rates at the end of each of the last five years.

	2007	2006	2005	2004	2003
3-month US LIBOR	4.70%	5.36%	4.54%	2.56%	1.15%
3-month EURIBOR	4.69%	3.73%	2.49%	2.16%	2.12%
10-year US Treasury	4.03%	4.70%	4.39%	4.22%	4.25%
10-year Dutch government	4.32%	3.97%	3.29%	3.68%	4.29%

The sensitivity analysis in the table below shows an estimate of the effect of a parallel shift in the yield curve on net income and equity.

Increases in interest rates have a negative effect on IFRS equity and net income in the current year because it results in unrealized losses on investments that are carried at fair value. The offsetting economic gain on the insurance and investment contracts is however not fully reflected in the sensitivities because many of these liabilities are not measured at fair value. Over time, the short-term reduction in net income due to rising interest rates would be offset by higher net income in later years, all else being equal. Therefore, rising interest rates are not considered a long-term risk to the company.

The sensitivity analysis reflects the assets and liabilities held at year end. This does not necessarily reflect the risk exposure during the year as significant events do not necessarily occur on January 1. Changes in sensitivities between 2006 and 2007 arise from the completion of the hedging program of guarantees valued at fair value of AEGON The Netherlands.

Parallel Movement of Yield Curve In million EUR	Estimated approximate effects on net income	Estimated approximate effects on equity
2007		
Shift up 100 basis points	(222)	(2,598)
Shift down 100 basis points	142	2,697
2006		
Shift up 100 basis points	(454)	(2,376)
Shift down 100 basis points	414	2,496
Credit risk		

As premiums and deposits are received, these funds are invested to pay for future policyholder obligations. For general account products, AEGON typically bears the risk for investment performance equaling the return of principal and interest. AEGON is exposed to credit risk on its general account fixed-income portfolio (bonds, mortgages and private placements), OTC derivatives and reinsurance contracts. Some issuers have defaulted on their financial obligations for various reasons, including bankruptcy, lack of liquidity, downturns in the economy, downturns in real estate values, operational failure and fraud. In the past, poor economic and investment climates in AEGON's major markets resulted in significant investment impairments on AEGON's investment assets due to defaults and overall declines in the securities markets. Impairments on bonds held by AEGON have been low in recent years. However, a return to excessive defaults or other reductions in the value of these securities and loans could have a materially adverse effect on AEGON's business, results of operations and financial condition.

The table that follows shows the Group's maximum gross credit exposure from investments (credit protection not taken into account) in general account financial assets, as well as general account derivatives and reinsurance assets. Refer to note 18.46 and note 18.47 of the notes to our consolidated financial statements in Item 18 of this Annual Report on Form 20-F for further information on capital commitments and contingencies and on collateral given, which may expose the Group to credit risk.
