To the Participants and Administrator of

The Raytheon Savings and Investment Plan:

In our opinion, the accompanying statements of net assets available for benefits and the related statement of changes in net assets available for benefits present fairly, in all material respects, the net assets available for benefits of the Raytheon Savings and Investment Plan (the Plan ) at December 31, 2008 and 2007, and the changes in net assets available for benefits for the year ended December 31, 2008 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan s management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedule of assets (held at end of year) is presented for the purpose of additional analysis and is not a required part of the basic financial statements but is supplementary information required by the Department of Labor s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. This supplemental schedule is the responsibility of the Plan s management. The supplemental schedule has been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

**Raytheon Savings and Investment Plan**

**Notes to Financial Statements**

**December 31, 2008 and 2007**

**1. Description of Plan**

**General**

The following description of the Raytheon Savings and Investment Plan (the Plan) provides only general information. Participants should refer to the Plan document for a complete description of the Plan's provisions. The Plan is a defined contribution plan covering the majority of employees of Raytheon Company (the Company). Most employees are immediately eligible to enroll in the Plan on the first day of service. The purpose of the Plan is to provide participants with a tax-effective means of meeting both short-term and long-term investment objectives. The portion of the Plan that is invested in Raytheon Company stock is an employee stock ownership plan (ESOP) that is intended to constitute a stock bonus plan as defined in the Internal Revenue Service code of 1986 (the Code) and that includes a cash or deferred arrangement. The remaining portion of the Plan is a profit-sharing plan that includes a cash or deferred arrangement. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Plan's investments are principally held in the Raytheon Savings and Investment Plan Trust (the Trust).

In 2005, the Plan Sponsor acquired UTD, Incorporated. On April 15, 2008, the net assets of the UTD, Incorporated 401(k) Profit Sharing Plan, amounting to \$12,407,974, were merged into the Plan and those participants began participating in the plan on the same date.

In 2004, the Plan Sponsor acquired Photon Research Associates, Incorporated. On October 1, 2008, the net assets of the Photon Research Associates, Incorporated 401(k) Plan, amounting to \$30,803,786, were merged into the Plan and those participants began participating in the plan on the same date.

**Contributions and Deferrals**

Eligible employees may contribute to the Plan up to 50% of their compensation, as defined in the Plan document. The Code limits the compensation the Plan may take into account to \$230,000 for the 2008 plan year. Employee contributions, including rollovers, are invested based on participant elections. For 2008, the annual employee pre-tax elective deferral contributions for a participant cannot exceed \$15,500, except for catch-up contributions. Participants also may make after-tax contributions, but total employee (pre-tax and after-tax) contributions and employer contributions may not exceed \$46,000 for the 2008 plan year, except for catch-up contributions. A participant who is eligible to make elective pre-tax contributions and is at least age 50 by the end of 2008 may make pre-tax catch-up contributions up to \$5,000.

For most employees, the Company matches 100% of the first 4% of compensation that a participant contributes to the Plan each pay period. For most participants, matching Company contributions are made in cash and are invested based on the investment allocation elected by each participant.

Effective January 1, 2007, eligible employees hired or rehired on or after January 1, 2007 participate in the Retirement Income Savings Program (RISP) (subject to any applicable collective bargaining agreements), in addition to having the right to participate in the other features of the Plan. Under RISP, the Company contributes a percentage of each RISP-eligible participant's compensation to the participant's RISP account in the Plan. The percentage contribution varies according to a schedule based on the participant's age at the most recent date of hire and years of service since the most recent date of hire.

Before January 1, 2005, the Company also made an ESOP contribution equal to one-half of 1% of the participant's compensation up to the applicable IRS limitation. The Company ceased to make that contribution for most participants effective December 31, 2004.

## Edgar Filing: RAYTHEON CO/ - Form 11-K

Participants may invest contributions in increments of 1% in any combination of investment options available, subject to percentage limitations applicable to some funds. The investment options range from investments with an emphasis on preservation of capital to equity investments with an emphasis on capital gains. The underlying investments include cash and equivalents, investment contracts, registered investment companies, common collective trusts, common stock (including stock of Raytheon Company), bonds and other investments.

---

**Table of Contents**

**Raytheon Savings and Investment Plan**

**Notes to Financial Statements**

**December 31, 2008 and 2007**

**Participant Accounts**

Each participant account is credited with the participant's contributions, the Company's contributions and an allocation of Plan earnings (losses). Plan earnings (losses) are allocated based on account balances by investment option. Expenses payable by the Plan are charged to participant accounts.

Participants are not permitted to make a direct exchange from the Fixed Income Fund to any money market fund (a competing fund). All money being exchanged out of the Fixed Income Fund must first be exchanged to a non-competing fund for at least 90 days before being exchanged into a money market fund.

**Vesting**

With the exception of RISP participants and certain union groups, all employee and most employer contributions including ESOP contributions and earnings (losses) thereon are immediately 100% vested for each participant who performs an hour of service on or after January 1, 1999. Most RISP participants who did not perform an hour of service before January 1, 2007, become 100% vested in the employer RISP contributions after three years of service. Forfeitures of the non-vested portions of terminated participants' accounts are available to reduce Company contributions. At December 31, 2008 and 2007, unallocated Plan forfeitures were \$1,118,463 and \$1,484,727, respectively. During 2008, the total amount of forfeitures created was \$579,298. The Company used a portion of the excess forfeitures available to offset \$1,000,000 of Company contributions during the year.

**Distributions to Participants**

A participant may make certain in-service withdrawals, including all or a portion of participant after-tax contributions and related earnings at any time and all or a portion of participant pre-tax contributions, employer contributions and related earnings upon attainment of age 59 1/2. For reasons of financial hardship, a participant may withdraw all or a portion of participant pre-tax contributions and related earnings subject to a reduction in the maximum participant pre-tax contribution rate for the next six months. On termination of employment, a participant will receive a lump-sum distribution unless the vested account is valued in excess of \$1,000, and the participant elects to defer distribution. Otherwise, a terminated participant may defer the distribution until April 1 of the year following the year in which the participant reaches age 70 1/2.

Participants who have investments in the Raytheon Stock Fund may elect to reinvest dividends within the Plan or receive dividends in cash. Any dividends received in cash by participants will be subject to taxes in the year of receipt. In 2008, the Company's Board of Directors declared dividends of \$1.12 per share. Of the \$33,137,976 in dividends paid to the Plan, approximately \$1,213,176 was received in cash by participants who elected the cash payment option.

**Loans to Participants**

A participant may borrow a portion of the balance in the participant's account, other than the RISP account, subject to certain restrictions. The maximum amount of a loan is the lesser of one-half of the participant's account balance or \$50,000, minus the participant's highest outstanding loan balance over the previous 12 months. The minimum loan is \$500. Loans are secured by the balance in the participant's account and bear interest equal to the prime rate published in *The Wall Street Journal* on the first business day of the calendar quarter in which the loan is made. Loans must be repaid over a period of up to five years by means of payroll deductions, except that if the loan is used to acquire a dwelling which is to be used as a principal residence of the participant, the repayment period may extend to up to 15 years. Loan payments and interest payments are credited to the borrower's account in the investment fund or funds according to the participant's current investment election. Loans are valued at the principal outstanding plus accrued interest. As of December 31, 2008 and 2007, the interest rates on the outstanding loans ranged from

4.00% to 10.00% and 4.00% to 10.25%, respectively.

---

**Table of Contents**

**Raytheon Savings and Investment Plan**

**Notes to Financial Statements**

**December 31, 2008 and 2007**

**Administrative Expenses**

Substantially all expenses of administering the Plan, such as legal and other administration fees, are charged to participant accounts. Administrative expenses not paid by the Plan are paid by the Company.

**2. Summary of Significant Accounting Policies**

The accompanying financial statements are prepared on the accrual basis of accounting.

Plan investments are stated at fair value including the Plan's benefit-responsive investment contracts.

Investments in registered investment companies and common collective trusts are valued at the closing net asset value reported on the last business day of the year. Investments in securities (common stocks) traded on a national securities exchange are valued at the last reported sales price on the last business day of the year. Investments in fixed income securities (U.S. government, domestic and foreign bonds) are valued by a pricing service which determines valuations for normal institutional-size trading units of such securities using methods based upon market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders, or at fair value as determined in good faith by the trustee of the Trust. Future contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Cash equivalents are generally short-term money market instruments and are valued at cost, which approximates fair value. Investments denominated in foreign currencies are translated into U.S. dollars at the prevailing rates of exchange on each valuation date. Participant loans are valued at amortized cost, which approximates fair value. Swap contracts are valued at fair value as determined by independent third parties on behalf of investment managers using their propriety models and taking into consideration exchange quotations on underlying instruments, dealer quotations and other market information.

As described in Financial Accounting Standards Board Staff Position (the FASB), FSP AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans* (the FSP), investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan invests in investment contracts through the Raytheon Fixed Income Fund (the Fund), a stable value fund specifically managed for the Plan. As required by the FSP, the statements of net assets available for benefits presents the fair value of the fully benefit responsive investment contracts in the Fund and the adjustment from fair value to contract value relating to the investment contracts. The statement of changes in net assets available for benefits is prepared on a contract value basis.

A Synthetic Guaranteed Investment Contract (GIC) represents individual assets, usually a portfolio of high quality fixed income securities placed in a trust, with ownership by the Plan. Individual assets of the synthetic investment contract are valued at fair value. The Plan purchases a third party issued benefit-responsive wrapper contract that guarantees that participant transactions are executed at contract value. The fair value of the wrap contract for the GIC is determined using a discounted cash flow model which considers recent rebids as determined by recognized dealers, discount rate and the duration of the underlying portfolio.

Security transactions are recorded on the trade date. Payables and receivables for outstanding purchases and sales represent trades which have occurred but have not yet settled and are recorded on the statements of net assets available for benefits.

## Edgar Filing: RAYTHEON CO/ - Form 11-K

Counterparty credit risk is the risk that a counterparty to a financial instrument will fail on a commitment that it has entered into with the Plan. The Plan minimizes concentrations of counterparty credit risk by undertaking transactions with multiple counterparties. The Plan's Investment Manager has a credit policy in place and the exposure to counterparty credit risk, as well as the creditworthiness of these counterparties, is monitored on an ongoing basis.

---

**Table of Contents**

**Raytheon Savings and Investment Plan**

**Notes to Financial Statements**

**December 31, 2008 and 2007**

The Plan presents in the statement of changes in net assets available for benefits the net appreciation (depreciation) in the fair value of its investments, excluding fully benefit-responsive investment contracts, which consists of the realized gains (losses) and the unrealized appreciation (depreciation) on those investments.

Dividend income is recorded on the ex-dividend date. Income from other investments is recorded as earned on an accrual basis. Distributions are recorded when paid.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America, requires the Plan administrator to make estimates and assumptions that affect the reported amounts of net assets and liabilities and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from the estimates included in the financial statements.

The Plan provides for various investment options in any combination of stocks, mutual funds, common collective trusts, investment contracts and other investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risk. The Plan invests in certain common and collective trusts that participate in securities lending programs. In addition, the Raytheon Company Combined DB/DC Master Trust participates in a securities lending program. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in risks in the near term would materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits and the statement of changes in net assets available for benefits. Other investments consist of the Plan's interest in the Raytheon Company Combined DB/DC Master Trust, which primarily consists of domestic and international equities. Please refer to the Raytheon Company Defined Benefit Plan financials for further details.

The Plan invests in certain securities collateralized by residential and commercial mortgages, credit card receivables and other assets that may be affected by, among other things, changes in: interest rates, the quality of the underlying assets or the market's assessment thereof, factors concerning interests in and structure of the issuer or the originator of the receivables, or the creditworthiness of the entities that provide credit enhancements. Certain securities have experienced significant decreases in liquidity as well as declines in the market value of certain categories of collateral underlying the securities.

Certain reclassifications have been made to the presentation of prior year financial statements to conform to the current year presentation.

In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161 ( SFAS No. 161 ) *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133 ( SFAS No. 133 ), which expands the disclosure requirements in SFAS No. 133 about an entity's derivative instruments and hedging activities. SFAS No. 161 is effective for fiscal years and interim periods beginning after November 15, 2008. The adoption of SFAS No. 161 will not have an impact on the Plan's financial results.

In April 2009, the FASB issued FASB Staff Position ( FSP ) No. 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, ( FSP SFAS No. 157-4 ). FSP SFAS No. 157-4 amends FASB Statement No. 157, Fair Value Measurements ( SFAS No. 157 ) and provides additional guidance for estimating fair value in accordance with SFAS No. 157 when the volume and level of activity for the asset or liability have significantly decreased and also includes guidance on identifying circumstances that indicate a transaction is not orderly for fair value measurements. FSP SFAS No. 157-4 is effective for fiscal years ending after June 15, 2009. The adoption of this accounting pronouncement is not expected to have a material impact on the Plan's financial results.

Table of Contents**Raytheon Savings and Investment Plan****Notes to Financial Statements****December 31, 2008 and 2007****3. Fair Value Measurements**

In 2008, the Plan adopted SFAS No. 157. The adoption of SFAS No. 157 did not have a material impact on the statements of net assets available for benefits or changes in net assets available for benefits.

SFAS No. 157 provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. SFAS No. 157 defines fair value as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. SFAS No. 157 also establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs, where available. The following summarizes the three levels of inputs required by SFAS No. 157.

- Level 1:** Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2:** Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or have been corroborated by observable market data for substantially the full term of the related assets or liabilities.
- Level 3:** Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilities. Level 3 assets primarily consist of participant loans. The new issuance and repayment of loans is shown in the purchases, issuances, settlements line in the Level 3 Gains and Losses table below.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

	Fair Value of Investment Assets as of 12/31/2008			
	Level 1	Level 2	Level 3	Total
Investment contracts				
Fixed income	\$ 720,965,406	\$ 1,166,281,563	\$ 4,271,552	\$ 1,891,518,521

Open swap contracts		16,147,898		16,147,898

Edgar Filing: RAYTHEON CO/ - Form 11-K

Total Investments	\$ 6,776,703,196	\$ 1,923,565,633	\$ 219,680,302	\$ 8,919,949,131
-------------------	------------------	------------------	----------------	------------------

Although the Plan is tax exempt, certain of the Plan's investments are not and may be subject to income tax. We have reduced the estimated value of those investments based upon the expected fair value of the estimated future tax payments. This reduction was not significant to any individual investment. Because the determination and calculation of this potential tax is a complex process, actual future payments may vary from these estimates.

**Table of Contents****Raytheon Savings and Investment Plan****Notes to Financial Statements****December 31, 2008 and 2007**

**4. Investments**

The following presents investment funds that represent 5% or more of the Plan's net assets:

	2008	2007
Raytheon Stock Fund	\$ 1,467,065,441	\$ 1,912,531,979
Fidelity Institutional Money Market Fund	895,907,871	587,021,227
Northern Trust S&P 500 Index Fund	473,567,335	751,034,489
Fidelity Equity Income Fund	452,752,857	867,019,875
Fidelity Balanced Fund	N/A	621,828,737

\* Presented at contract value

During the year ended December 31, 2008 the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) depreciated in value as follows:

Edgar Filing: RAYTHEON CO/ - Form 11-K

Registered investment companies	\$ (2,174,521,928)
Common collective trusts	(292,032,473)
Raytheon Company common stock	(284,972,880)
Common stock and other investments	(191,318,818)
	\$ (2,942,846,099)

**5. Investment Contracts**

The Plan invests in benefit-responsive Synthetic GICs with financial institutions. Income from Synthetic GICs is reported net of administrative expenses. The GIC issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed by the Plan. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value with limited restrictions related to the transfer of funds

---

**Table of Contents**

**Raytheon Savings and Investment Plan**

**Notes to Financial Statements**

**December 31, 2008 and 2007**

into a competing investment option. The Plan considers such factors as the benefit responsiveness of the investment contracts, the ability of the parties to the contracts to perform in accordance with the terms of the contracts and the likelihood of default by an issuer of an investment security in evaluating the GICs.

Synthetic GICs represent individual assets, usually a portfolio of high quality fixed income securities placed in a trust, with ownership by the Plan. The Plan purchases a third party issued benefit-responsive wrapper contract that guarantees that participant transactions are executed at contract value. Individual assets of the Synthetic GICs are valued based on the policy in Note 2.

Wrap contracts accrue interest using a formula called the crediting rate. Wrap contracts use the crediting rate formula to convert market value changes in the covered assets into income distributions in order to minimize the difference between the market and contract value of the covered assets over time. Using the crediting rate formula, an estimated future market value is calculated by compounding the Fund's current market value at the Fund's current yield to maturity for a period equal to the Fund's duration. The crediting rate is the discount rate that equates estimated future market value with the Fund's current contract value. The crediting rate is most impacted by the change in the annual effective yield to maturity of the underlying securities, but is also affected by the differential between the contract value and the market value of the covered investments. The difference is amortized over the duration of the investments. Depending on the change in duration from reset period to reset period, the magnitude of the impact to the crediting rate of the contract contract to market difference is heightened or lessened. Crediting rates are reset quarterly. The wrap contracts provide a guarantee that the crediting rate will not fall below 0%. Events disqualifying an underlying investment from being wrapped include but are not limited to bankruptcy of the security issuer or the default or restricted liquidity of the security issuer.

If the Fund experiences significant redemptions when the market value is below the contract value, the Fund's yield may be reduced significantly, to a level that is not competitive with other investment options. This may result in additional redemptions, which would tend to lower the crediting rate further. If redemptions continued, the Fund's yield could be reduced to zero. If redemptions continued thereafter, the Fund might have insufficient assets to meet redemption requests, at which point the Fund would require payments from the wrap issuers to pay further shareholder redemptions.

The crediting rate, and hence the Fund's return, may be affected by many factors, including purchases and redemptions by participants. The precise impact on the Fund depends on whether the market value of the covered assets is higher or lower than the contract value of those assets. If the market value of the covered assets is higher than their contract value, the crediting rate will ordinarily be higher than the yield of the covered assets. Under these circumstances, cash from new investors will tend to lower the crediting rate and the Fund's return, and redemptions by existing participants will tend to increase the crediting rate and the Fund's return.

The Fund and the wrap contracts purchased by the Fund are designed to pay all participant-initiated transactions at contract value. Participant-initiated transactions are those transactions allowed by the Plan (typically this would include withdrawals for benefits, loans, or transfers to non-competing investment options within the Plan). However, the wrap contracts limit the ability of the Fund to transact at contract value upon the occurrence of certain events. At this time, management believes the occurrence of any of these events is not probable. These events include:

1. The Plan's failure to qualify under Section 401(a) or Section 401(k) of the Code.
2. The establishment of a defined contribution plan that competes with the Plan for employee contributions.
3. Any substantive modification of the Plan or the administration of the Plan that is not consented to by the wrap issuer.
4. Complete or partial termination of the Plan.
5. Any change in law, regulation or administrative ruling applicable to the Plan that could have a material adverse effect on the Fund's cashflow.

---

**Table of Contents**

**Raytheon Savings and Investment Plan**

**Notes to Financial Statements**

**December 31, 2008 and 2007**

6. Merger or consolidation of the Plan with another plan; the transfer of Plan assets to another plan; or the sale, spin-off, or merger of a subsidiary or division of the Plan Sponsor.
7. Any communication given to participants by the Plan Sponsor or any other plan fiduciary that is designed to induce or influence participants not to invest in the Fund or to transfer assets out of the Fund.
8. Exclusion of a group of previously eligible employees from eligibility in the Plan.
9. Any early retirement program, group termination, group layoff, facility closing, or similar program.
10. Any transfer of assets from the Fund directly to a competing option.
11. Bankruptcy of the Plan Sponsor or other Plan Sponsor events which cause a significant withdrawal from the Plan.

A wrap issuer may terminate a wrap contract at any time. In the event that the market value of the Fund's covered assets is below their contract value at the time of such termination, Fidelity Management Trust Company ( FMTC ), the Trustee, may elect to keep the wrap contract in place until such time as the market value of the Fund's covered assets is equal to their contract value. A wrap issuer may also terminate a wrap contract if FMTC's investment management authority over the Fund is limited or terminated as well as if all of the terms of the wrap contract fail to be met. In the event that the market value of the Fund's covered assets is below their contract value at the time of such termination, the terminating wrap provider would not be required to make a payment to the Fund.

Synthetic investment contracts generally impose conditions on both the Plan and the issuer. If an event of default occurs and is not cured, the non-defaulting party may terminate the contract. The following may cause the Plan to be in default: a breach of material obligation under the contract; a material misrepresentation; or a material amendment to the Plan agreement. The issuer may be in default if it breaches a material obligation under the investment contract; makes a material misrepresentation; has a decline in its long term credit rating below a threshold set forth in the contract; is acquired or reorganized and the successor issuer does not satisfy the investment or credit guidelines applicable to issuers. If, in the event of default of an issuer, the Plan were unable to obtain a replacement investment contract, withdrawing plans may experience losses if the value of the Plan's assets no longer covered by the contract is below contract value. The Plan may seek to add additional issuers over time to diversify the Plan's exposure to such risk, but there is no assurance that the Plan may be able to do so. The combination of the default of an issuer and an inability to obtain a replacement agreement could render the Plan unable to achieve its objective of maintaining a stable contract value. The terms of an investment contract generally provide for settlement of payments only upon termination of the contract or total liquidation of the covered investments. Generally, payments will be made pro-rata, based on the percentage of investments covered by each issuer. Contract termination occurs whenever the contract value or market value of the covered investments reaches zero or upon certain events of default. If the contract terminates due to issuer default (other than a default occurring because of a decline in its rating), the issuer will generally be required to pay to the Plan the excess, if any, of contract value over market value on the date of termination.

## Edgar Filing: RAYTHEON CO/ - Form 11-K

If a Synthetic GIC terminates due to a decline in the ratings of the issuer, the issuer may be required to pay to the Plan the cost of acquiring a replacement contract (i.e. replacement cost) within the meaning of the contract. If the contract terminates when the market value equals zero, the issuer will pay the excess of contract value over market value to the Plan to the extent necessary for the Plan to satisfy outstanding contract value withdrawal requests. Contract termination also may occur by either party upon election and notice.

The fund maintains investment contracts issued by insurance companies, banks, and other financial institutions. The issuing institutions' ability to meet their contractual obligations under the respective contracts may be affected by future economic and regulatory developments in the insurance and banking industries.

The issuer may elect to terminate the contract for no reason by giving certain notice to the Trustee. If, at any time, prior to dates agreed to in each contract for the receipt of such notice, the Trustee objects to such election, the Trustee shall be deemed to have made an immunization election and the immunization

**Table of Contents****Raytheon Savings and Investment Plan****Notes to Financial Statements****December 31, 2008 and 2007**

provisions of the contract apply. The immunization provision results in the wrapped portion of the Plan being managed according to more conservative immunization investment guidelines provided for in the contract and the contract can terminate in segments over a period of time. In the event a wrap issuer sought to terminate its contract or immunize its portion of the portfolio, the fund can seek to replace that contract issuer with another financial institution.

Plans investing in wrap contracts and fixed income securities are subject to a number of risks, including credit risk of underlying investments, risk associated with prepayment of collateralized mortgage obligations, risk that third parties will not perform under the wrap contracts, risk associated with interest rate fluctuations, and risk of losses caused by liquidation of contracts or investments to meet withdrawal demands.

The crediting interest rates are adjusted quarterly to reflect the experience and anticipated yields to be earned on such investments, based on their book value. The average yield and crediting interest rates were as follows:

	<b>Average Yield</b>	<b>Crediting Interest Rate</b>
December 31, 2008		
JP Morgan Chase (ARAYTHEON-2-07)	4.57%	3.89%
State Street Bank and Trust (107046)	4.58%	3.90%
AIG Financial Products Corp (969481)	4.57%	3.89%
Rabobank (RTN040701)	4.56%	3.89%
December 31, 2007		
JP Morgan Chase (ARAYTHEON-2-07)	4.87%	5.05%
State Street Bank and Trust (107046)	4.87%	5.06%
AIG Financial Products Corp (969481)	4.87%	5.05%
Rabobank (RTN040701)	4.87%	5.05%

**6. Forward Foreign Currency Exchange Contracts**

A forward foreign currency exchange contract ( forward currency contract ) is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate.

Forward currency contracts are utilized to hedge a portion of the currency exposure that results from the Plan's holdings of fixed income securities denominated in foreign currencies. Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies and the difference between the contract value and market value is recorded as unrealized appreciation (depreciation) in net assets.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts.

**Table of Contents****Raytheon Savings and Investment Plan****Notes to Financial Statements****December 31, 2008 and 2007**

The table below summarizes the unrealized appreciation and depreciation of the forward foreign currency contracts.

Currency Sold	Settlement Date	Aggregate Face Value	Market Value	Unrealized Appreciation (Depreciation)
Australian Dollar	1/22/2009	\$ (1,509,025)	\$ (1,621,270)	\$ (112,245)
Australian Dollar	1/15/2009 - 1/29/2009	1,414,295	1,520,364	106,069

				\$ (110,800)

**7. Future Contracts**

A future contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated future exchange. The Plan had no outstanding future contracts at December 31, 2008.

As described in Note 5, the Synthetic GICs represent individual assets placed in a trust, with ownership by the Plan. As of December 31, 2008 and 2007, the Synthetic GICs contained future contracts. The Plan uses fixed income future contracts to manage exposure to the market. Buying future contracts tends to increase the Plan's exposure to the underlying instrument. Selling futures tends to decrease the Plan's exposure to the underlying instrument held, or hedge the fair value of other fund investments.

Future contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a future contract, the Plan is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract (initial margin) with the broker. The Plan does not employ leverage in its use of futures, thus cash balances are maintained at a level at least equal to the contract value of the futures. Pursuant to the future contract, the Plan agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the future contract. Such receipts or payments are known as variation margin which are settled daily and are included in the realized gains (losses) on future contracts. In addition, the Plan pledges collateral, generally U.S. government bonds, for open fixed income future positions.

Future contracts involve, to varying degrees, credit and market risks. The Plan enters into future contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the future contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there

is an illiquid secondary market for the contracts. In addition, there is the risk that there may not be an exact correlation between a future contract and the underlying index or security.

Table of Contents**Raytheon Savings and Investment Plan****Notes to Financial Statements****December 31, 2008 and 2007**

The Plan had no outstanding future contracts at December 31, 2008. A summary of the open fixed income future contracts at December 31, 2007 is presented below:

	Long Contracts 2007		Short Contracts 2007

	5,007	\$ 967,592,426	1,679	\$ 327,247,702

**8. Swaps and Swaptions**

The Plan may invest in interest rate swap contracts and swaptions. A swaption is an option to enter into a swap contract at an exercise price. As described in Note 5, the Synthetic GICs represent individual assets placed in a trust, with ownership by the Plan. As of December 31, 2008 and 2007, the Synthetic GICs contained swap contracts and swaptions. The Plan uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts entered into by the Plan typically represent the exchange by the Plan with a counterparty of a commitment to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts may have a term of one to ten years,

but typically require periodic interim settlement in cash, at which time both the value of the index or security and the specified interest rate are reset for the next settlement period. During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Plan in accordance with the terms of the contract based on the closing level of the relevant index or security and interest accrual through the valuation date. Changes in the value of the swap contract are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses. Swaption contracts are marked-to-market as the net amount due to or from the Plan in accordance with the terms of the contract based on the closing level of the relevant market rate of interest.

Table of Contents**Raytheon Savings and Investment Plan****Notes to Financial Statements****December 31, 2008 and 2007**

The Plan may also invest in credit default swaps. Credit default swap contracts entered into by the Plan typically represent the exchange by the Plan with a counterparty of a commitment to provide a level of credit protection for a commitment to receive interest at a fixed rate based on the potential risk of default of the relevant underlying issuer. Providing credit protection to a counterparty tends to increase a Plan's exposure to the underlying instrument. Receiving credit protection from a counterparty tends to decrease a Plan's exposure to the underlying instrument held by a Plan, or hedge the fair value of other Plan investments. Such contracts may have a term of one to ten years, but typically require periodic interim settlement in cash. During the period that the credit default swap contract is open, the contract is marked-to-market in accordance with the terms of the contract based on the current interest rate spreads and credit risk of the referenced obligation of the underlying issuer and interest accrual through valuation date. Changes in the value of the credit default swap are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

Entering into a swap contract involves, to varying degrees, elements of credit, market and interest rate risk in excess of the amounts reported in the statement of net assets available for benefits. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contracts. Accordingly, credit risk is limited to any amounts receivable from the counterparty. To reduce credit risk from potential counterparty default, the Plan enters into swap contracts with counterparties. The Plan bears the market risk arising from any change in index or security values or interest rates.

At December 31, 2008, the Plan had the following swap contracts outstanding:

**Interest Rate Swaps**

**9. Securities on a Delayed Delivery**

The Plan may purchase securities on a delayed delivery ( TBA securities ) when issued, or forward commitment basis. Payment and delivery may take place one month or more after the date of the transaction. The price of the underlying securities and the date when the securities will be delivered and paid for are fixed at the time the transaction is negotiated. The underlying securities are valued at current market value with daily fluctuations in the market value recorded as unrealized gains or losses. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract, or if the issuer does not issue the securities due to political, economic, or other factors.

**10. Plan Termination**

Although it has not expressed any intention to do so, the Company reserves the right under the Plan at any time to discontinue its contributions and to terminate the Plan subject to the provisions of ERISA. Upon termination of the Plan, all participants become fully vested in their accounts. In the event of Plan termination, after payment of all expenses and adjustment of accounts to reflect such expenses, fund losses or profits, and reallocations, each participant shall be entitled to receive all amounts then in his or her account.

**11. Federal Income Tax Status**

The Internal Revenue Service has determined and informed the Company by letter dated July 8, 2003 that the design of the Plan meets the requirements for qualification under Code section 401(a), on which the tax exemption of the Trust under Code section 501(a) is based. The Plan has been amended since receiving the determination letter. The Plan administrator and the Company's benefits counsel believe that the current design and operation of the Plan are consistent with continued qualification of the Plan and exemption of the Trust.

---

**Table of Contents**

**Raytheon Savings and Investment Plan**

**Notes to Financial Statements**

**December 31, 2008 and 2007**

**12. Related Party Transactions**

The trustee of the Plan is Fidelity Management Trust Company (the Trustee). Certain Plan investments are shares of registered investment companies managed by affiliates of the Trustee and therefore, these transactions in addition to participant loans qualify as party-in-interest transactions. The Plan also pays fees to the Trustee. These transactions qualify as party-in-interest transactions as well. In addition, The Bank of New York Mellon, successor by operation of law to Mellon Trust of New England, N.A. (the Custodian) serves as custodian for certain assets of the Plan. Certain Plan investments are issued by the Custodian and therefore, these transactions qualify as party-in-interest transactions. In addition, the Plan pays certain fees to the custodian.

In accordance with the provisions of the Plan, the Trustee acts as the Plan's agent for purchases and sales of shares of Raytheon Company stock. Purchases amounted to \$222,050,244 and sales amounted to \$383,133,622 for the year ended December 31, 2008. Dividend income from shares of Raytheon Company stock amounted to \$33,137,976 for the year ended December 31, 2008.

**13. Commitments and Contingencies**

In September 2007, the Plan received proceeds from the settlement of class action lawsuits filed in 2003 on behalf of participants and beneficiaries in the Plan against the Company, its Pension and Investment Group and its Investment Committee. The lawsuits were consolidated into one action in which the complaint, as amended, alleged that the defendants breached their ERISA fiduciary duties by failing to (1) prudently and loyally manage Plan assets, (2) monitor the Pension and Investment Group and the Investment Committee and provide them with accurate information, (3) provide complete and accurate information to Plan participants and beneficiaries, and (4) avoid conflicts of interest. On February 6, 2007, the District Court issued a final order approving a settlement and plaintiffs' attorneys' fees and expenses, pursuant to a settlement agreement that the parties had reached. In accordance with the settlement, by April 2007 the Company paid to the Escrow Fund established under the settlement agreement \$5,500,000, with part of that amount payable from the Escrow Fund directly to the Plan, part payable directly to certain participants and beneficiaries, and part payable for expenses. The Company also paid plaintiffs' attorneys' fees of \$1,400,000 and expenses of \$60,916, which were determined by a federal Magistrate. The class for purposes of the settlement consisted of any person who was a participant or beneficiary at any time between October 7, 1998, and April 30, 2006, and whose Plan accounts included investments in the Raytheon Stock Fund. In September 2007, the Settlement Claims Administrator distributed settlement proceeds in accordance with the Plan of Allocation provided in the settlement agreement.

In January 2006, five individuals, who are currently on leave from the Company while serving as business representatives of Electronic and Space Technicians Union Local 1553, sued the Company alleging that the termination of plaintiffs' ability to make contributions to, and receive matching contributions under, the Plan as of December 31, 2005 violated ERISA. The plaintiffs filed two amended complaints (the first of which added the Plan as a defendant). In response to the complaint and the Amended complaints, the defendants filed three Motions to Dismiss, the last one on June 22, 2006. On July 17, 2006, the Court granted defendants' Motion to Dismiss. On March 26, 2008, the Ninth Circuit Court of Appeals affirmed the District Court's July 17, 2006 grant of defendants' Motion to Dismiss.

On April 12, 2006, the Company filed an application with the Internal Revenue Service to avail the Plan of the Voluntary Correction Procedure (VCP) within the Employee Plans Compliance Resolution System. The application seeks voluntary correction of the fact that until December 31, 2005, the Plan accepted contributions by or on behalf of, and made matching contributions for, individuals on leave from the Company while serving as union business representatives in situations the same as or similar to the situations involved in the lawsuit described in the preceding paragraph. In the VCP application, the Company proposed that cessation of these contributions constitutes adequate correction. On May 28, 2008, the IRS sent the Plan a Compliance Statement that is consistent with the method of correction proposed by the Plan.
