OCEANEERING INTERNATIONAL, INC. & SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

1. Summary of Major Accounting Policies

Basis of Presentation. We have prepared these unaudited consolidated financial statements pursuant to instructions for quarterly reports on Form 10-Q, which we are required to file with the Securities and Exchange Commission. These financial statements do not include all information and footnotes normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States. These financial statements reflect all adjustments that we believe are necessary to present fairly our financial position at September 30, 2010 and our results of operations and cash flows for the periods presented. All such adjustments are of a normal and recurring nature. These financial statements should be read in conjunction with the consolidated financial statements and related notes included in our annual report on Form 10-K for the year ended December 31, 2009. The results for interim periods are not necessarily indicative of annual results.

Reclassifications. Certain amounts from prior periods have been reclassified to conform with the current year presentation.

With the sale of the *Ocean Producer* in late 2009, our Mobile Offshore Production Systems (MOPS) business is no longer significant to our overall performance. Consequently, our MOPS results are now being reported in our Subsea Projects segment and our historical segment results have been conformed to the current year presentation.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires that our management make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Actual results could differ from those estimates.

During the quarter ended March 31, 2010, we recorded an impairment charge of \$5.2 million to reduce the carrying value of our vessel held for sale, *The Performer*, to its fair value, less estimated costs to sell. This charge is reflected within the cost of services and products of our Subsea Projects segment. *The Performer* completed its contract in Angola during the first quarter of 2010. After our attempts to market it for use internationally failed, and in light of the current soft vessel market, the age of the vessel and the competition it was facing against newer and more capable vessels, we decided to sell the vessel. At March 31, 2010, we estimated the fair value based on preliminary offers presented to us to purchase the vessel by market participants, which we believed were Level 3 inputs. In July 2010, we sold the vessel for approximately its reduced carrying value.

Subsequent Events. We evaluated events and transactions through the issuance of these financial statements for possible recognition or disclosure.

New Accounting Standards. In June 2009, the Financial Accounting Standards Board issued an updated accounting principle regarding accounting for variable interest entities, specifically to:

require ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity;

eliminate the quantitative approach previously required for determining the primary beneficiary of a variable interest entity, which was based on determining which enterprise absorbs the majority of the entity's expected losses, receives a majority of the entity's expected residual returns, or both;

Edgar Filing: OCEANEERING INTERNATIONAL INC - Form 10-Q

change certain guidance for determining whether an entity is a variable interest entity;

add an additional reconsideration event for determining whether an entity is a variable interest entity when changes in facts and circumstances occur such that the holders of the equity investment at risk, as a group, lose the power from voting rights or similar rights of those investments to direct the activities of the entity that most significantly impact the entity's economic performance; and

require enhanced disclosures that will provide users of financial statements with more transparent information about an enterprise's involvement in a variable interest entity.

We adopted this principle as of January 1, 2010, as required. It had no effect on our financial statements.

Table of Contents**OCEANEERING INTERNATIONAL, INC. & SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****2. Investments in Unconsolidated Affiliates**

Our investments in unconsolidated affiliates consisted of the following:

	Sept. 30, 2010	Dec. 31, 2009
	(in thousands)	
Medusa Spar LLC	\$ 53,025	\$ 57,388
Other		1,348
Total	\$ 53,025	\$ 58,736

We own a 50% equity interest in Medusa Spar LLC. Medusa Spar LLC owns a 75% interest in a production spar platform in the U.S. Gulf of Mexico. Medusa Spar LLC's revenue is derived from processing oil and gas production for a fee based on the volumes processed through the platform. Medusa Spar LLC financed its acquisition of its 75% interest in the production spar platform using approximately 50% debt and 50% equity from its equity holders. The debt was repaid in 2008. We believe our maximum exposure to loss from our investment in Medusa Spar LLC is our investment. Medusa Spar LLC is a variable interest entity. We are not the primary beneficiary of Medusa Spar LLC because we own 50% of its equity and we do not manage the operations of the asset it owns. As we are not the primary beneficiary, we are accounting for our investment in Medusa Spar LLC under the equity method of accounting. Equity earnings from Medusa Spar LLC reflected in our financial statements are after amortization of our initial acquisition costs.

The following are condensed 100% statements of income of Medusa Spar LLC:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2010	2009	2010	2009
	(in thousands)			
Medusa Spar LLC				
Condensed Statements of Income				
Revenue	\$ 3,818	\$ 3,950	\$ 10,679	\$ 12,078
Depreciation	(2,369)	(2,369)	(7,108)	(7,108)
General and administrative	(17)	(17)	(53)	(52)
Net Income	\$ 1,432	\$ 1,564	\$ 3,518	\$ 4,918
Equity Earnings reflected in our financial statements	\$ 702	\$ 768	\$ 1,717	\$ 2,417

3. Inventory

Our inventory consisted of the following:

Edgar Filing: OCEANEERING INTERNATIONAL INC - Form 10-Q

	Sept. 30, 2010	Dec. 31, 2009
	(in thousands)	
Inventory for remotely operated vehicles	\$ 113,030	\$ 110,043
Other inventory, primarily raw materials	129,465	122,174
Total	\$ 242,495	\$ 232,217

We state our inventory at the lower of cost or market. We determine cost using the weighted-average method.

Table of Contents**OCEANEERING INTERNATIONAL, INC. & SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****4. Debt**

Our long-term debt consisted of the following:

	Sept. 30, 2010	Dec. 31, 2009
	(in thousands)	
6.72% Senior Notes	\$	\$ 20,000
Revolving credit		100,000
Total	\$	\$ 120,000

We repaid the 6.72% Senior Notes at maturity in September 2010.

We capitalized \$0.2 million and \$0.3 million of interest in the three- and nine-month periods ended September 30, 2010, respectively. We capitalized \$0.1 million of interest in each of the three-month and nine-month periods ended September 30, 2009.

5. Commitments and Contingencies

Litigation. Various actions and claims are pending against us, most of which are covered by insurance. Although we cannot predict the ultimate outcome of these matters, we believe the ultimate liability, if any, that may result from these actions and claims will not materially affect our results of operations, cash flow or financial position.

Effective as of August 27, 2010, we resolved the previously reported dispute with GRI Simulations, Inc. ("GRI") and Mr. Stephen G. Dodd, one of GRI's owners. That dispute related to rights to certain proprietary information, including software relating to underwater simulations. The resolution involved our entering into new commercial agreements with GRI relating to certain ROV simulation software for a five-year term, as well as a cash payment by us in exchange for a license to GRI proprietary information. In connection with the resolution of the dispute, the litigation (1) in the U.S. District for the Western District of Louisiana was concluded upon the Court's entry of an order of dismissal with prejudice on September 8, 2010 and (2) in the Supreme Court of Newfoundland and Labrador, Canada was concluded upon the parties' filing notices of discontinuance on September 9, 2010. The resolution of this matter did not have a material adverse effect on us.

Financial Instruments and Risk Concentration. In the normal course of business, we manage risks associated with foreign exchange rates and interest rates through a variety of strategies, including the use of hedging transactions. As a matter of policy, we do not use derivative instruments unless we have an underlying exposure.

We had an interest rate hedge in place on \$100 million of floating rate debt under our revolving credit facility for the period August 2009 to August 2011, designated as a cash flow hedge. We terminated this hedge in May 2010 and charged the cost of \$2.9 million to interest expense, and this expense is included in our consolidated statement of income for the nine-month period ended September 30, 2010.

Other financial instruments that potentially subject us to concentrations of credit risk are principally cash and cash equivalents and accounts receivable. The carrying values of cash and cash equivalents and bank borrowings approximate their fair values due to the short maturity of those instruments or the short-term duration of the associated interest rate periods. Accounts receivable are generated from a broad group of customers, primarily from within the energy industry, which is our major source of revenue. Due to their short-term nature, carrying values of

Edgar Filing: OCEANEERING INTERNATIONAL INC - Form 10-Q

our accounts receivable and accounts payable approximate fair market value.

One customer in Angola owed us \$56 million at September 30, 2010 and \$50 million at December 31, 2009, all of which is overdue. We completed the work on the contracts related to this receivable in the first quarter of 2010. Based on our past history with this customer, we believe this receivable will ultimately be collected.

Page 8

Table of Contents**OCEANEERING INTERNATIONAL, INC. & SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****6. Shareholders' Equity, Earnings per Share and Stock-Based Compensation****Shareholders' Equity**

Our shareholders' equity consisted of the following:

	Sept. 30, 2010	Dec. 31, 2009
	(in thousands)	
Common Stock, par value \$0.25; 180,000,000 shares authorized; 55,417,044 shares issued	\$ 13,854	\$ 13,854
Additional paid-in capital	205,013	212,788
Treasury Stock, 1,301,962 and 499,292 shares, at cost	(61,399)	(27,796)
Retained earnings	1,191,780	1,039,043
Accumulated other comprehensive loss	(11,713)	(13,566)
Total	\$ 1,337,535	\$ 1,224,323

During the nine month period ended September 30, 2010, we repurchased 1,100,000 shares of treasury stock for \$49.5 million and we reissued 297,330 shares of treasury stock to satisfy obligations under our stock-based compensation plans.

Comprehensive income is the total of net income and all nonowner changes in equity. The amounts of comprehensive income for the periods indicated are as follows:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2010	2009	2010	2009
	(in thousands)			
Net Income per consolidated statements of income	\$ 59,177	\$ 49,839	\$ 152,737	\$ 142,295
Foreign currency translation gains (losses), net	27,196	18,998	(575)	53,072
Change in pension liability adjustment, net of tax				(183)
Change in fair value of hedges, net of tax		(340)	2,428	428
Total	\$ 86,373	\$ 68,497	\$ 154,590	\$ 195,612

Amounts comprising other elements of comprehensive income in Shareholders' Equity are as follows:

Edgar Filing: OCEANEERING INTERNATIONAL INC - Form 10-Q

	Sept. 30, 2010	Dec. 31, 2009
	(in thousands)	
Accumulated net foreign currency translation adjustment	\$ (7,731)	\$ (7,156)
Pension liability adjustment, net of tax	(3,982)	(3,982)
Fair value of hedges, net of tax		(2,428)
Total	\$ (11,713)	\$ (13,566)

Page 9

Diluted earnings per share	\$ 1.09	\$ 0.90	\$ 2.77	\$ 2.57

Stock-Based Compensation

Stock Options. At September 30, 2010, we had no outstanding stock options and we had no future stock-based compensation expense to be recognized pursuant to stock option grants.

Restricted Stock Plan Information. In 2010 and 2009, we granted shares of restricted common stock to our nonemployee directors, excluding our Chairman, and restricted units of our common stock to our Chairman and certain of our key executives and employees. The shares of restricted stock are subject to a one-year vesting requirement, conditioned upon continued service as a director, and the restricted units generally vest in full on the third anniversary of the award date, conditional on continued employment (or service, in the case of our Chairman). The restricted unit grants can vest pro rata over three years, provided the individual meets certain age and years-of-service requirements.

For each of the restricted stock units granted in 2008 through 2010, at the earlier of three years after grant or at termination of employment or service, the grantee will be issued a share of our common stock for each common stock unit vested. As of September 30, 2010 and December 31, 2009, totals of 523,725 and 621,525 shares of restricted stock or restricted stock units were outstanding. Each grantee of shares of restricted

Edgar Filing: OCEANEERING INTERNATIONAL INC - Form 10-Q

stock is deemed to be the record owner of those shares during the restriction period, with the right to vote and receive any dividends on those shares. The restricted stock units granted in 2008 have no voting rights, but they carry a dividend-equivalent right should we pay dividends on our common stock. The restricted stock units granted after 2008 have no voting or dividend rights.

We estimate that stock-based compensation cost not yet recognized related to shares of restricted stock or restricted stock units, based on their grant-date fair values, was \$10 million at September 30, 2010. This expense is being recognized on a staged-vesting basis over three years for awards attributable to individuals meeting certain age and years-of-service requirements, and on a straight-line basis over the applicable vesting period of one or three years for the other awards.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

7. Income Taxes

During interim periods, we provide for income taxes based on our current estimated annual effective tax rate using assumptions as to (1) earnings and other factors that would affect the tax calculation for the remainder of the year and (2) the operations of foreign branches and subsidiaries that are subject to local income and withholding taxes. The primary difference between our current 2010 estimated effective tax rate of 34.3% and the federal statutory tax rate of 35% is the lesser tax rate applied to our U.S. manufacturing profits.

The financial statement recognition of the benefit for a tax position depends on the benefit being more likely than not to be sustainable upon audit by the applicable taxing authority. If this threshold is met, the tax benefit is then measured and recognized at the largest amount that is greater than 50 percent likely of being realized upon ultimate settlement. We account for any applicable interest and penalties on uncertain tax positions as a component of our provision for income taxes in our financial statements. There were no significant changes in the nine-month periods ended September 30, 2010 and 2009, respectively, for penalties and interest taken in our financial statements relating to uncertain tax positions. Our total liabilities for penalties and interest on uncertain tax positions were \$4.0 million on our balance sheet at September 30, 2010. Including penalties and interest, we have accrued a total of \$5.8 million in the caption other long-term liabilities on our September 30, 2010 balance sheet for unrecognized tax benefits. All additions or reductions to those liabilities affect our effective income tax rate in the periods of change.

We do not believe that the total of our unrecognized tax benefits will significantly increase or decrease in the next 12 months.

We conduct our operations in a number of locations that have varying laws and regulations with regard to income and other taxes, some of which are subject to interpretation. Our tax returns are subject to audit by taxing authorities in multiple jurisdictions. These audits often take years to complete and settle. Since December 31, 2009, there have been the following changes to the earliest tax years open to examination by tax authorities where we have significant operations: United States to 2007 from 2006; Angola to 2005 from 2004; Nigeria to 2004 from 2003; Brazil to 2005 from 2004; Australia to 2007 from 2006; and Canada to 2007 from 2006. Our management believes that adequate provisions have been made for all taxes that ultimately will be payable, although final determinations of tax liabilities may differ from our estimates.

8. Business Segment Information

We are a global oilfield provider of engineered services and products primarily to the offshore oil and gas industry, with a focus on deepwater applications. Through the use of our applied technology expertise, we also serve the defense and aerospace industries. Our Oil and Gas business consists of four business segments: Remotely Operated Vehicles (ROVs); Subsea Products; Subsea Projects; and Inspection. With the sale of the *Ocean Producer* in late 2009, our Mobile Offshore Production Systems (MOPS) business is no longer significant to our overall performance. Consequently, our MOPS results are now being reported in our Subsea Projects segment and our historical segment results have been conformed to the current year presentation. Our Advanced Technologies business is a separate segment that provides project management, engineering services, products and equipment for applications outside the oil and gas industry. Unallocated Expenses are those not associated with a specific business segment. These consist of expenses related to our incentive and deferred compensation plans, including restricted stock units, performance units and bonuses, as well as other general expenses.

There are no differences in the basis of segmentation or in the basis of measurement of segment profit or loss from those used in our consolidated financial statements for the year ended December 31, 2009, except for the above mentioned combination of our MOPS business into our Subsea Projects segment.

-------	-----------	-----------	-----------	------------	------------

We generate a material amount of our consolidated revenue from contracts for services in the U.S. Gulf of Mexico in our Subsea Projects segment, which is usually more active from April through October, as compared to the rest of the year. The European operations of our Inspection segment are also seasonally more active in the second and third quarters. Revenue in our ROV segment is subject to seasonal variations in demand, with our first quarter generally being the low quarter of the year. The level of our ROV seasonality depends on the number of ROVs we have engaged in construction support, which is more seasonal than drilling support. Revenue in each of our Subsea Products and Advanced Technologies segments has generally not been seasonal.

During the nine months ended September 30, 2010, we invested \$164 million of capital expenditures, of which \$93 million was in our ROV segment, \$34 million was in our Subsea Products segment and \$32 million was in our Subsea Projects segment. The amount in our Subsea Products segment included \$17.5 million for a business acquisition.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Certain statements we make in this quarterly report on Form 10-Q, including, without limitation, statements regarding our expectations about:

fourth quarter of 2010 and full years of 2010 and 2011 operating results and earnings per share;

the level of services and products we anticipate;

the adverse impact on our earnings for the remainder of 2010 and in 2011 as a result of the U.S. Department of Interior Drilling Moratorium and subsequent regulatory uncertainty and delay in issuing drilling permits in the U.S. Gulf of Mexico;

cash flows and segment results;

our plans for future operations (including planned additions to our remotely operated vehicle (ROV) fleet);

the adequacy of our liquidity and capital resources;

our anticipated tax rates;

seasonality;

and industry conditions

are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are subject to various risks, uncertainties and assumptions, including those we have referred to under the heading "Risk Factors" in this report and under the headings "Risk Factors" and "Cautionary Statement Concerning Forward-Looking Statements" in Part I of our annual report on Form 10-K for the year ended December 31, 2009. Although we believe that the expectations reflected in such forward-looking statements are reasonable, because of the inherent limitations in the forecasting process, as well as the relatively volatile nature of the industries in which we operate, we can give no assurance that those expectations will prove to be correct. Accordingly, evaluation of our future prospects must be made with caution when relying on forward-looking information.

The following discussion should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in our annual report on Form 10-K for the year ended December 31, 2009.

Segment Change

With the sale of the *Ocean Producer* in late 2009, our Mobile Offshore Production Systems (MOPS) business is no longer significant to our overall performance. Consequently, our MOPS results are now being reported in our Subsea Projects segment and our historical segment results have been conformed to the current year presentation.

Executive Overview

For the full year of 2010, we anticipate our diluted earnings per share to be in the range of \$3.57 to \$3.62, as compared to \$3.40 in 2009. Compared to 2009, our 2010 forecast assumptions include achieving an increased profit contribution from Subsea Products, relatively flat ROV results, and lower Subsea Projects operating income. These three business segments are anticipated to account for 85% or more of our total

Edgar Filing: OCEANEERING INTERNATIONAL INC - Form 10-Q

operating income, as they have for the past few years. We forecast fourth quarter 2010 diluted earnings per share of \$0.80 to \$0.85, with a quarterly operating income improvement over that of the corresponding quarter of the prior year from Subsea Products and lower profit performances from ROVs and Subsea Projects. For the full year of 2011, we anticipate our diluted earnings per share to be in the range of \$3.45 to \$3.75. For our services and products, we anticipate international demand growth may more than offset lower demand in the U.S. Gulf of Mexico. Our assessment of international demand is that deepwater drilling and construction activity will increase, particularly in West Africa and Brazil. The major uncertainties we face heading into 2011 are when, and to what level, permits for U.S. Gulf of Mexico deepwater drilling projects will rebound. For the purposes of developing our earnings per share estimate forecast above, we considered a variety of scenarios. At the midpoint, we assumed a slow start with a gradual acceleration of work and expect 20 to 25 deepwater rigs working in the U.S. Gulf of Mexico at year-end 2011.

We generate approximately 90% of our revenue and substantially all of our operating income before Unallocated Expenses from our services and products provided to the oil and gas industry, particularly in the deepwater sector of the offshore market. Consequently, the level of our customers' capital spending on deepwater exploration and development has a significant impact on the demand for many of our services and products. Looking forward, we face uncertainties in the level of this spending and the timing of projects. These uncertainties have been exacerbated by the *Deepwater Horizon* drilling rig tragedy at the Macondo well in the U.S. Gulf of Mexico in April 2010, the resulting environmental impacts, and the continuing effects of the U.S. Department of Interior drilling moratorium. In May 2010, the U.S. Department of Interior issued a six-month deepwater drilling moratorium, which was subsequently revised in July 2010 and lifted in October 2010. This moratorium and the subsequent regulatory uncertainty and delay in issuing drilling permits began to have an unfavorable effect on our U.S. Gulf of Mexico ROV operations in June 2010 and are expected to have an adverse impact on our earnings during the fourth quarter of 2010 and into 2011.

Table of Contents

Critical Accounting Policies and Estimates

For information about our Critical Accounting Policies and Estimates, please refer to the discussion in our annual report on Form 10-K for the year ended December 31, 2009 under the heading "Critical Accounting Policies and Estimates" in Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operation."

New Accounting Standards

For a discussion of new accounting standards applicable to us, see the discussion in Note 1 to the Consolidated Financial Statements contained in Item 1 of this quarterly report on Form 10-Q.

Liquidity and Capital Resources

We consider our liquidity and capital resources adequate to support our existing operations and capital commitments. At September 30, 2010, we had working capital of \$460 million, including \$148 million of cash and cash equivalents. Additionally, we had \$300 million of borrowing capacity available under our revolving credit facility.

Our capital expenditures were \$164 million during the first nine months of 2010, as compared to \$145 million during the corresponding period of last year. We added 12 new ROVs to our fleet, lost one on the *Deepwater Horizon* and retired seven during the nine months ended September 30, 2010, resulting in a total of 252 ROVs. We plan to add at least six more new ROVs during the rest of 2010 to meet contractual commitments, and these are in the process of being built or installed. Our capital expenditures in the nine months ended September 30, 2010 included \$93 million in our ROV segment, \$34 million in our Subsea Products segment and \$32 million in our Subsea Projects segment. The amount in our Subsea Products segment included \$17.5 million for a business acquisition.

We have chartered a deepwater vessel, the *Ocean Intervention III*, for an initial term which has ended and we are now in the first of six annual extension option years. The current option year extends to May 2011. We have also chartered an additional deepwater vessel, the *Olympic Intervention IV*, for an initial five-year term ending in July 2013. We have outfitted each of these deepwater vessels with two of our high-specification work-class ROVs, and we use these vessels to perform subsea hardware installation and inspection, repair and maintenance projects, and to conduct well intervention services in the ultra-deep waters of the U.S. Gulf of Mexico.

We had no material contractual commitments for capital expenditures at September 30, 2010. We believe our cash provided from operating activities will exceed our capital expenditures in 2010.

During the quarter ended September 30, 2010, we had no borrowings outstanding under our \$300 million revolving credit facility, which is scheduled to expire in January 2012. The revolving credit facility provides for short-term interest rates that float with market rates, plus applicable spreads.

In September 2009, we entered into a \$200 million agreement with Prudential Investment Management, Inc., under which we may, subject to mutual agreement, borrow at fixed rates for up to 13 years with weighted average maturities of no more than 10 years. As of September 30, 2010, we had not borrowed under that agreement.

We have not guaranteed any debt not reflected on our consolidated balance sheet and do not have any off-balance sheet arrangements, as defined by SEC rules.

In February 2010, our Board of Directors approved a new plan to repurchase up to 6 million shares of our common stock. The timing and amount of repurchases will be determined by our management. We expect that any shares repurchased under the new plan will be held as treasury stock for future use. The new plan does not obligate us to repurchase any particular number of shares. We repurchased 100,000 shares for \$5.0 million under this plan during the third quarter of 2010 and a total of 1.1 million shares for \$49.5 million during the nine-month period ended September 30, 2010.

In the nine-month period ended September 30, 2010, we generated \$302 million in cash from operating activities, used \$149 million of cash in investing activities and used \$167 million in financing activities. The cash used in investing activities was used for the capital expenditures described above and the cash used in financing activities was used to pay off our 6.72% Senior Notes, pay off debt under our revolving credit

agreement, and to pay for our share repurchases.

Table of Contents**Results of Operations**

We operate in five business segments. The segments are contained within two businesses – services and products provided to the oil and gas industry (Oil and Gas) and all other services and products (Advanced Technologies). Our Unallocated Expenses are those not associated with a specific business segment.

Consolidated revenue and margin information is as follows:

	For the Three Months Ended			For the Nine Months Ended	
	Sept. 30, 2010	Sept. 30, 2009	June 30, 2010	Sept. 30, 2010	Sept. 30, 2009
	(dollars in thousands)				
Revenue	\$ 516,274	\$ 484,036	\$ 464,303	\$ 1,415,747	\$ 1,369,819
Gross profit	125,619	114,045	123,503	348,827	329,992
Gross margin	24%	24%	27%	25%	24%
Operating income	88,055	76,306	85,374	235,758	219,984
Operating margin	17%	16%	18%	17%	16%

We generate a material amount of our consolidated revenue from contracts for services in the U.S. Gulf of Mexico in our Subsea Projects segment, which is usually more active from April through October, as compared to the rest of the year. The European operations of our Inspection segment are also seasonally more active in the second and third quarters. Revenue in our ROV segment is subject to seasonal variations in demand, with our first quarter generally being the low quarter of the year. The level of our ROV seasonality depends on the number of ROVs we have engaged in construction support, which is more seasonal than drilling support. Revenue in each of our Subsea Products and Advanced Technologies segments has generally not been seasonal.

Our earnings for the third quarter of 2010 improved over the corresponding period in 2009 largely due to an increase in Subsea Products operating income. This was primarily attributable to higher demand for installation and workover control system (IWOCS) services and field development hardware, and our successful efforts to lower manufacturing costs.

Table of Contents**Oil and Gas**

The table that follows sets forth our revenues and margins for our Oil and Gas business for the periods indicated.

	For the Three Months Ended			For the Nine Months Ended

Operating income	111,366	94,827	101,556	294,091	279,155
Operating margin	24%	22%	25%	24%	23%

In general, our Oil and Gas business focuses on supplying services and products to the deepwater sector of the offshore market. We are the world's largest provider of ROV services, and profit from this business segment typically constitutes more than half of our total operating income.

Our ROV segment revenue reflects the utilization percentages, fleet sizes and average pricing of the respective periods. ROV operating income in the quarter ended June 30, 2010 included a \$3.5 million gain from insurance proceeds on the vehicle we had on the *Deepwater Horizon*. We expect our 2010 annual ROV operating income to be relatively flat with 2009, as we believe the fourth quarter of 2010 will be adversely affected in the U.S. Gulf of Mexico due to regulatory uncertainty and delay in issuing deepwater drilling permits subsequent to the drilling moratorium.

Edgar Filing: OCEANEERING INTERNATIONAL INC - Form 10-Q

We expect our ROV operating income to grow in 2011 on an increase in days on hire compared to 2010 from an increase in international demand for drill support services and fleet expansion. We anticipate we will add approximately 15 new ROVs to our fleet in 2011.

Page 16

Table of Contents

Our earnings for the third quarter of 2010 improved over the corresponding period in 2009 largely due to an increase in Subsea Products operating income. This was primarily attributable to higher demand for IWOCS services and field development hardware, and our successful efforts to lower manufacturing costs. Compared to the immediately preceding quarter, Subsea Products quarterly revenue, operating income, and margin improved primarily through higher sales of IWOCS services and field development hardware.

Subsea Products backlog was \$308 million at September 30, 2010 compared to \$321 million at December 31, 2009. During October 2010, we obtained a significant umbilical contract and we anticipate our backlog at December 31, 2010 to be higher than that at December 31, 2009. Compared to the third quarter of 2010, we expect Subsea Products operating income to decline in the fourth quarter of 2010 on lower ROV tooling and IWOCS service sales. We believe Subsea Products revenue, operating income and operating margin will be higher in 2010 than those reported for 2009. We anticipate our Subsea Products results in 2011 will be relatively flat compared to those in 2010.

Our Subsea Projects operating income declined in the third quarter of 2010 compared to the corresponding period of the prior year, due to a decline in profit contribution from the *Ocean Legend*, our remaining mobile offshore production system (MOPS), and the lack of profit contribution from the *Ocean Producer*, a MOPS unit that we sold in the fourth quarter of 2009. During the three months ended March 31, 2010, we recorded a \$5.2 million impairment charge to adjust the carrying value of our vessel held for sale, *The Performer*, to its fair value less estimated costs to sell. *The Performer* completed its contract in Angola during the first quarter of 2010. After our attempts to market it for further use internationally were unsuccessful, and in light of the soft vessel market, the age of the vessel, and the competition it was facing against newer and more capable vessels, we decided to sell the vessel. We completed the sale in July 2010 for approximately the vessel's reduced carrying value. Subsea Projects third quarter of 2010 operating income was higher than that of the second quarter of 2010 largely due to additional demand for deepwater vessel services at the Macondo well site. We also experienced a seasonal increase in demand for diving services.

Subsea Projects operating income is expected to be lower during the fourth quarter of 2010 compared to the third quarter of 2010 due a decline in deepwater vessel services to be performed for BP at the Macondo well site and a seasonally lower demand for diving services. For the year 2010, compared to 2009, we are forecasting lower segment revenue, operating income, and margin performance. Subsea Projects operating income is expected to be lower during 2011 compared to 2010 due to completion in 2010 of project work at the Macondo well site.

In June 2010, we acquired the *DMT Sapphire* at a purchase price of \$16.5 million. This vessel has been renamed the *Ocean Patriot*, and is currently in a shipyard being outfitted for saturation diving service. During the third quarter of 2010, we placed an order to acquire a new, 12-man saturation diving (SAT) system to install on the *Ocean Patriot*. We anticipate that this vessel will be available for SAT diving service sometime in the first quarter of 2011.

In the first quarter of 2010, our vessel *Ocean Intervention II* sustained substantial damage while installing an umbilical in heavy weather. The vessel was unavailable for service until it returned to work in the middle of September 2010. We believe the costs of the repairs, except a small deductible, are covered by our insurance. While the vessel was being repaired, we performed, and charged to expense, its regulatory drydocking.

Our Inspection margins were comparable in the three- and nine-month periods ended September 30, 2010 with the corresponding periods of the prior year. We expect our Inspection results in 2010 to be flat with those of 2009. We expect a slight increase in our Inspection operating income in 2011 as compared to 2010.

Table of Contents**Advanced Technologies**

Revenue and margin information is as follows:

	For the Three Months Ended			For the Nine Months Ended	
	Sept. 30, 2010	Sept. 30, 2009	June 30, 2010	Sept. 30, 2010	Sept. 30, 2009
	(dollars in thousands)				
Revenue	\$ 59,021	\$ 51,875	\$ 62,761	\$ 178,272	\$ 141,598
Gross profit	6,837	7,713	11,333	26,072	19,430
Gross margin	12%	15%	18%	15%	14%
Operating income	2,858	4,375	7,342	14,464	10,378
Operating margin	5%	8%	12%	8%	7%

The decrease in Advanced Technologies operating income in the three-month period ended September 30, 2010 compared to the corresponding period of the prior year and the immediately preceding quarter reflected a slowdown of work on the Constellation Space Suit System program and completion during the second quarter of other government and commercial projects. We are anticipating Advanced Technologies will have higher operating income in the full year of 2010 compared to 2009, with lower operating income in the fourth quarter of 2010 compared to the third quarter. For 2011, we expect Advanced Technologies operating income to be approximately the same as 2010.

Unallocated Expenses

Our Unallocated Expenses, *i.e.*, those not associated with a specific business segment, reflected in gross profit consist of expenses related to our incentive and deferred compensation plans, including restricted stock units, performance units and bonuses, as well as other general expenses. Our Unallocated Expenses reflected in operating income consist of those expenses within gross profit plus general and administrative expenses related to corporate functions.

The table that follows sets forth our Unallocated Expenses for the periods indicated.

	For the Three Months Ended			For the Nine Months Ended	
	Sept. 30, 2010	Sept. 30, 2009	June 30, 2010	Sept. 30, 2010	Sept. 30, 2009
	(dollars in thousands)

----------------------------	--------	--------	--------	--------	--------

Interest expense in the second quarter of 2010 and the nine months ended September 30, 2010 includes \$2.9 million to terminate an interest rate hedge on the \$100 million of revolving credit debt we repaid in the second quarter. We repaid the remaining \$20 million of our debt during the third quarter of 2010.

Table of Contents

Our equity earnings of unconsolidated affiliates consists of earnings from our 50% equity interest in Medusa Spar LLC, which owns a 75% interest in the Medusa Spar production platform in the U.S. Gulf of Mexico. Medusa Spar LLC earns revenue on a tariff basis on oil and gas production throughput processed by the platform from the Medusa field and other surrounding areas.

Other income in the three months ended June 30, 2010 and the nine months ended September 30, 2010 includes a \$2.1 million fee for serving as the stalking horse bidder on an asset auction proceeding. Additionally, we recorded foreign currency transaction gains (losses) of \$(0.3 million) and \$(1.7 million) for the three- and nine-month periods ended September 30, 2010 and \$1.2 million and \$2.6 million for the three- and nine-month periods ended September 30, 2009 in other income (expense). These transaction gains and losses are related primarily to the relative value of the U.S. dollar against the Brazilian real. As the dollar devalues against the real, we have transaction gains. Conversely, as the dollar strengthens, we incur transaction losses.

The provisions for income taxes were related to U.S. income taxes that we provided at estimated annual effective rates using assumptions as to earnings and other factors that would affect the tax calculation for the remainder of the year and to the operations of foreign branches and subsidiaries that were subject to local income and withholding taxes. We anticipate our effective tax rate for 2010 will be approximately 34.3%.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are currently exposed to certain market risks arising from transactions we have entered into in the normal course of business. These risks relate to interest rate changes and fluctuations in foreign exchange rates. We do not believe these risks are material. We have not entered into any market risk sensitive instruments for speculative or trading purposes. We manage our exposure to interest rate changes primarily through the use of a combination of fixed- and floating-rate debt. See Note 5 of Notes to Consolidated Financial Statements included in our annual report on Form 10-K for the year ended December 31, 2009 for a description of our long-term debt agreements, interest rates and maturities. We had an interest rate hedge (designated as a cash flow hedging instrument) in place on our \$100 million of floating rate debt outstanding under our revolving credit facility for the period August 2009 to August 2011. In the quarter ended June 30, 2010, we repaid the \$100 million of debt and terminated the hedge at a cost of \$2.9 million, which we charged to interest expense. At September 30, 2010 we had no long-term debt. We believe that significant interest rate changes would not have a material near-term impact on our future earnings or cash flows.

Other financial instruments that potentially subject us to concentrations of credit risk are principally cash and cash equivalents and accounts receivable. The carrying values of cash and cash equivalents and bank borrowings approximate their fair values due to the short maturity of those instruments or the short-term duration of the associated interest rate periods. Accounts receivable are generated from a broad group of customers, primarily from within the energy industry, which is our major source of revenue. Due to their short-term nature, carrying values of our accounts receivable and accounts payable approximate fair market value.

One customer in Angola owed us \$56 million at September 30, 2010 and \$50 million at December 31, 2009, all of which is overdue. We completed the work on the contracts related to this receivable in the first quarter of 2010. Based on our past history with this customer, we believe this receivable ultimately will be collected.

Because we operate in various oil and gas exploration and production regions in the world, we conduct a portion of our business in currencies other than the U.S. dollar. The functional currency for several of our international operations is the applicable local currency. We manage our exposure to changes in foreign exchange rates principally through arranging compensation in U.S. dollars or freely convertible currency and, to the extent possible, by limiting compensation received in other currencies to amounts necessary to meet obligations denominated in those currencies. We use the exchange rates in effect as of the balance sheet date to translate assets and liabilities as to which the functional currency is the local currency, resulting in translation adjustments that we reflect as accumulated other comprehensive income or loss in the shareholders equity section of our Consolidated Balance Sheets. We recorded positive (negative) adjustments of \$(0.6 million) and \$53.1 million to our equity accounts for the nine-month periods ended September 30, 2010 and 2009, respectively, to reflect the net impact of the U.S. dollar against various foreign currencies for locations where the functional currency is the local currency. Positive adjustments reflect the net impact of the strengthening of various foreign currencies against the U.S. dollar for locations where the functional currency is not the U.S. dollar. Conversely, negative adjustments reflect the effect of a strengthening U.S. dollar. The adjustment in the nine months ended September 30, 2009 from December 31, 2008 was principally due to the strengthening of the Norwegian kroner and British pound sterling against the U.S. dollar.

Table of Contents**Item 4. Controls and Procedures.**

In accordance with Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, as amended (the Exchange Act), we carried out an evaluation, under the supervision and with the participation of management, including our chief executive officer and chief financial officer, of the effectiveness of our disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based on that evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective as of September 30, 2010 to provide reasonable assurance that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

There has been no change in our internal control over financial reporting that occurred during the three months ended September 30, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION**Item 1. Legal Proceedings.**

Various actions and claims are pending against us, most of which are covered by insurance. Although we cannot predict the ultimate outcome of these matters, we believe the ultimate liability, if any, that may result from these actions and claims will not materially affect our results of operations, cash flow or financial position.

Effective as of August 27, 2010, we resolved the dispute with GRI Simulations, Inc. (GRI) and Mr. Stephen G. Dodd, one of GRI's owners, described in Item 1 of Part II of our Quarterly Report on Form 10-Q for the quarter ended June 30, 2010. That dispute related to rights to certain proprietary information, including software relating to underwater simulations. The resolution involved our entering into new commercial agreements with GRI relating to certain ROV simulation software for a five-year term, as well as a cash payment by us in exchange for a license to GRI proprietary information. In connection with the resolution of the dispute, the litigation (1) in the U.S. District for the Western District of Louisiana was concluded upon the Court's entry of an order of dismissal with prejudice on September 8, 2010 and (2) in the Supreme Court of Newfoundland and Labrador, Canada was concluded upon the parties' filing notices of discontinuance on September 9, 2010. The resolution of this matter did not have a material adverse effect on us.

Item 1A. Risk Factors.

The following discussion presents disclosures about the risk factors impacting our business in addition to those previously disclosed in Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2009.

The results of our segments within our oil and gas business could be adversely impacted by the Macondo well incident, the continuing effects of the U.S. government moratorium on offshore deepwater drilling projects and related new regulations.

On April 22, 2010, the drilling rig *Deepwater Horizon*, which was engaged in deepwater drilling operations in the U.S. Gulf of Mexico, sank after an explosion and fire. The incident resulted in a significant and uncontrolled oil spill off the coast of Louisiana. Our segments within our Oil and Gas business are currently pursuing opportunities in the U.S. Gulf of Mexico. On May 28, 2010, the U.S. government imposed a six-month moratorium on all offshore deepwater drilling projects. A preliminary injunction was issued blocking enforcement of the moratorium on June 22, 2010, and the U.S. government issued a new moratorium on deepwater drilling on July 12, 2010. On October 12, 2010, the U.S. government lifted the moratorium. The U.S. government has also established new regulations relating to the design of wells and testing of the integrity of wellbores, the use of drilling fluids, the functionality and testing of well control equipment, including blowout preventers, and other safety regulations. In addition, the U.S. government has announced that it intends to require that operators demonstrate their compliance with new regulations before resuming deepwater drilling. We cannot predict when operators in the U.S. Gulf of Mexico will be able to satisfy these requirements, or when, or to what extent, the U.S. government will issue permits to drill exploratory or development wells. At this time, we cannot predict what, if any, impact the Macondo well incident, the continuing effects of the U.S. government moratorium on offshore deepwater drilling projects and related new regulations may have on offshore oil and gas exploration and development activity, the cost or availability of insurance coverage to cover the risks of such operations, or what actions may be taken by our customers or other industry participants in response to the incident. Changes in laws or regulations regarding offshore oil and gas exploration and development activities, the cost or availability of insurance and decisions by customers or other industry participants could reduce demand for our services, which would have a

negative impact on each of our segments within our Oil and Gas business.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.****(c) Purchases of equity securities by the issuer and affiliated purchasers.**

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
July 1 through July 31, 2010		N/A		5,000,000
August 1 through August 31, 2010	78,900	\$ 49.397	78,900	4,921,100
September 1 through September 30, 2010	21,100	\$ 52.193	21,100	4,900,000
Total	100,000	\$ 49.987	100,000	4,900,000

The above purchases were made under a plan approved by our Board of Directors in February 2010 to repurchase up to 6 million shares of our common stock.
