The Basel II Framework, based on the International Convergence of Capital Measurement and Capital Standards: A Revised Framework issued by the Basel Committee on Banking Supervision, requires the disclosure of capital adequacy information to ensure the enhanced effectiveness of market discipline. Our disclosure is made under the Matters Separately Prescribed by the Commissioner of the Financial Services Agency Regarding Capital Adequacy Conditions, etc. pursuant to Article 19-2, Paragraph 1, Item 5, Subitem (d), etc. of the Ordinance for Enforcement of the Banking Law (Ministry of Finance Ordinance No. 10 of 1982) (FSA Notice No. 15 of 2007).

As a method to calculate the amount of credit risk-weighted assets under the Basel II Framework, we have adopted the advanced internal ratings-based approach. In addition, as a method to calculate the amount equivalent to the operational risk, we have adopted the advanced measurement approach.

Notes:

1. The above figures are calculated based on the BIS standard applied on a consolidated basis under the Standards for Determining the Status of Capital Adequacy in consideration of assets held by a bank holding company and by its subsidiaries, in accordance with Banking Law Article 52-25 (FSA Notice No. 20 of 2006 (the Notice)). For the figures as of September 30, 2009 and 2010, we did not apply the exception to the Notice (FSA Notice No. 79 of 2008).
2. As it is not possible to break down Mizuho Financial Group's common stock and preferred stock according to classes of stock, non-cumulative perpetual preferred stock is not stated separately from capital.
3. In calculating the consolidated capital adequacy ratio, we underwent an examination following the procedures agreed with Ernst & Young ShinNihon LLC, on the basis of Treatment in implementing examination by agreed-upon procedures for calculating capital adequacy ratio (Industry Committee Report No. 30 of the Japanese Institute of Certified Public Accountants). Note that this is not a part of the accounting audit performed on our consolidated financial statements. This consists of an examination under agreed-upon procedures performed by Ernst & Young ShinNihon LLC on a portion of the internal control structure concerning the calculation of the capital adequacy ratio and a report of the results to us. As such, they do not represent an opinion regarding the capital adequacy ratio itself nor the internal controls related to the calculation of the capital adequacy ratio.
4. The amounts of net deferred tax assets as of September 30, 2009 and 2010 were ¥615.1 billion and ¥447.0 billion, respectively, and the maximum amounts of deferred tax assets that can be recorded without diminishing the amount of Tier 1 capital for the purpose of calculating capital adequacy ratio as of September 30, 2009 and 2010 were ¥1,029.4 billion and ¥1,252.0 billion, respectively.
5. The adjusted floor amount is the amount obtained by multiplying (i) 12.5 by (ii) the excess, if any, of the required capital under the advanced internal rating-based approach and the gross profit allocation approach multiplied by the rate prescribed in the Notice over the required capital under the advanced internal ratings-based approach and the advanced measurement approach. The adjusted amount for credit risk-weighted assets is the amount obtained by multiplying (i) 12.5 by (ii) the excess, if any, of the required capital under the foundation internal ratings-based approach multiplied by the rate prescribed in the Notice over the required capital under the advanced internal ratings-based approach; and the adjusted amount for operational risk equivalent is the amount obtained by multiplying (i) 12.5 by (ii) the excess, if any, of the required capital under the basic indicator approach multiplied by the rate prescribed in the Notice over the required capital under the advanced measurement approach.
6. Among our group companies that were subject to the calculation of consolidated capital adequacy ratio pursuant to Article 3 of the Notice, the numbers of consolidated subsidiaries were 164 and 163 as of September 30, 2009 and 2010, respectively. There was no company that was subject to the deductions for total risk-based capital forth in Article 8, Paragraph 1, Item 2, Subitem (a) through (c) of the Notice as of September 30, 2009 and 2010.

## Notes:

1. We have changed the method of calculation of actual losses for the above table starting the period from October 1, 2009 through September 30, 2010. We also reflected such changes to the periods from October 1, 2008 through September 30, 2009 in the above table.
2. Actual losses are the sum of the net increase (decrease) in the amount of partial direct write-offs, specific reserve for possible losses on loans and general reserve for possible losses on loans (for claims against special attention obligors or below), etc., as well as tax-qualified direct write-offs, losses from sales of non-performing loans, losses from debt forgiveness and losses from debt-equity swaps during the relevant period. Equity exposure under the PD/LGD approach is not included in the amount of actual losses.

## &lt;Analysis&gt;

Actual losses for the period from October 1, 2009 through September 30, 2010 decreased by ¥362.0 billion from the period from October 1, 2008 through September 30, 2009 to ¥101.8 billion. The decrease was due mainly to a significant decrease in losses from corporate exposure reflecting the improvement of obligor classifications through our business revitalization support to corporate customers.
