Stone Harbor Emerging Markets Income Fund

Shareholder Letter

May 31, 2011 (Unaudited)

Dear Shareholder:

We appreciate your confidence in Stone Harbor Investment Partners, the investment manager of the Stone Harbor Emerging Markets Income Fund. As you know, the Fund's objective is to maximize total return, which consists of income on its investments and capital appreciation. The Fund invests primarily in debt securities issued by governments and corporations in emerging market countries. The investments are denominated in both U.S. dollars and in local currencies.

We believe that the continuing trends of credit improvement and strong economic growth make emerging market debt investments very attractive versus bonds from developed countries. We believe that these fundamentals, coupled with Stone Harbor's many years of experience in the asset class, put us in a good position to achieve the Fund's objectives. At Stone Harbor we endeavor to keep you well informed. Please feel free to call us at 877-206-0791 if you have any questions about your investment in our Fund.

Performance Review

Emerging Markets Debt Fund investors fared well in the Fund's initial reporting period. The total return on net asset value (NAV) of the Fund from inception of December 23, 2010 to May 31, 2011 was 7.32%. This performance compared quite favorably to most comparable indices for the period (See Figure 1). On a market value basis, the Fund's total return was 3.08% during this period.

Figure 1. Comparative Asset Class/Index Returns, 23 December 2010 to 31 May 2011

Energy Commodities	12.59%
Gold	11.12%
Broad Commodities	9.07%
EM Local Currency Debt	8.09%
S&P 500	7.92%
EDF (NAV)	7.32%
US High Yield Bonds	6.28%
Barclays Global Aggregate (Fixed Income)	6.26%
US TIPS	5.42%
US Investment Grade Debt	4.87%
US Treasuries 7-10 Year	4.78%
EM Equities	4.73%
EM Corporate Debt, High Yield	4.60%
EM External Sovereign Debt	4.02%
EM Corporate Debt	3.83%
EM Corporate Debt, Investment Grade	3.46%
Agricultural Commodities	1.95%
US Dollar	-7.31%

Source: Bloomberg, Stone Harborⁱ

For the reporting period, EDF's NAV outperformed its benchmark, the JP Morgan Emerging Market Bond Index - Global Diversified, by 3.30%. Most of this excess return resulted from security selection decisions in external sovereign debt and local currency bonds. Local currencies benefitted largely from a declining US dollar, but also from continuing strength in many key emerging markets (EM) economies. On balance, our country selection decisions detracted from performance, but our allocations to corporate debt in most countries enhanced total return relative to the index. We actively manage the allocations to external sovereign (US dollar-denominated), corporate, and local currency debt, based on the intensive credit research and relative value analysis of our portfolio management and research teams. On May 31, 2011, EDF's allocations were 50.1% local currency sovereign debt, 30.5% external sovereign debt, 19.3% corporate debt and 0.1% net cash.

Market Review

We are particularly pleased with the performance of the Fund given the market headwinds that global investors faced during the period. While not an exhaustive list, the potentially destabilizing events during the period included:

1. The governments of Egypt and Tunisia were toppled by popular insurrection
2. The war began in Libya
3. Oil prices (Brent crude) climbed to a peak of \$126.74, nearly 35% higher than when EDF was launched
4. Japan's tsunami and earthquake resulted in significant economic destruction, particularly in global supply chains.
5. The sovereign debt crisis in Europe's periphery intensified; Portugal, Greece and Ireland were downgraded.
6. The US Federal Reserve ended the second round of quantitative easing, dubbed QE2.
7. The US economy entered a lull in growth in the second quarter, raising worries of the potential for a double-dip recession

Despite rising geopolitical and macroeconomic risks in the developed world, the fundamental characteristics of most EMs—fast growth rates, relatively low debt levels and improved policy making in both fiscal and monetary matters—remained supportive of the EM debt asset classes. EM growth rates remained well above growth rates of developed countries. Commodity prices stabilized, but remained at relatively high levels, fueled largely by EM demand. Since many EM countries are rich in natural resources, the sustained high level of commodity prices has enriched EM exporters and provided a steady stream of new cash flow, all of which supported EM governments' and companies' abilities to repay their debts. EM central banks continued normalizing monetary policy during the reporting period, hiking short term policy rates or raising bank reserve requirement ratios to cool inflation pressures. We expect more EM central banks to allow currency appreciation in the months ahead to help in an effort to stave off the threat of inflation.

Stone Harbor Emerging Markets Income Fund

Shareholder Letter

May 31, 2011 (Unaudited)

Our strategy focused on investing in assets with attractive total return potential from EM countries and companies of improving credit quality. At the end of the period our allocations reflected our strong bias in favor of local currency and corporate bonds from many fast growing EM countries. In addition, we held exposure to select sovereign external bonds where we saw strong valuations and potential for return from spread compression.

Our outlook for the remainder of the year remains constructive for EM debt. While signs of a global soft patch in economic activity have affected EM economies as industrial production figures have weakened recently, growth rates have remained solidly positive in most EMs; we believe EM growth rates will continue to outpace developed country growth rates this year. While policy rates in core developed countries may begin to normalize by year end, interest rates are most likely to remain very low, in our opinion. Inflation pressures, as we see it, have been eased in part by prudent monetary policies of many EM central banks, but also by the stabilization of commodity prices in recent months. Moreover, continued institutional investments in EM debt, which reflect a shift to strategic allocations to the asset class, provide further strong support.

Nevertheless, we recognize several specific market risks to our benign base case, including:

1. Europe fails to provide a comprehensive solution to the sovereign debt crises in Portugal, Italy, Ireland, Greece and Spain
2. The US economy slips back into recession
3. China's economy weakens, producing a hard landing of sub 7% annual growth rate
4. EM policy makers engage in trade wars in an effort to counteract the economic effects of a falling US dollar
5. EM central banks fall behind in their efforts to curb inflation
6. US interest rates rise sharply reflecting rising fiscal deficits and the end of quantitative easing.

Other general risks of the Fund relate to our use of leverage and also to the longer-term prospects for a rise in global interest rates. With respect to leverage, Stone Harbor tactically employs leverage to enhance returns. During the performance period, leverage consisted primarily of borrowings using short term reverse repurchase agreements through which the Fund loans securities with the obligation to repurchase them at a later date at a fixed price. The implied borrowing costs of the repurchase agreements averaged approximately 0.56% per annum. The level of gross leverage was increased to a maximum of 24.4% of total assets in February, but was reduced by the end of the period to 17.96%. The Fund management team varied borrowing levels to reflect the team's outlook on the EM debt markets. The team increased borrowings when it felt opportunities had increased and reduced borrowings when, in the team's judgment, macroeconomic risks had risen. The Fund's lower level of gross leverage at the end of the period reflected the team's assessment of the rising risks of a sovereign default in Europe's southern periphery as well as a slow

down in US growth. Nevertheless, the Fund's allocations express a positive secular outlook for emerging markets.

As it pertains to the risk of a general rise in global interest rates, Stone Harbor attempts to mitigate the risk of loss of principal through its allocation process. We seek to upgrade credit quality and reduce duration exposure during periods of rising rates. Notwithstanding these efforts, rising interest rates would increase the Fund's cost of leverage and could also decrease the value of its portfolio securities, adversely affecting fund performance.

Notwithstanding these risks, we anticipate further strong gains from EM debt through the remainder of 2011 and continue to believe that all three sectors of the asset class - external sovereign, corporate and local currency debt - offer attractive risk-adjusted returns for investors.

Once again, we thank you for choosing Stone Harbor Investment Partners.

Sincerely,

Thomas W. Brock
Chairman of the Board of Trustees

Stone Harbor Emerging Markets Income Fund

Growth of \$10,000 Investment
May 31, 2011 (Unaudited)

Comparison of Change in Value of \$10,000 Investment in Stone Harbor Emerging Markets Income Fund and the JP Morgan Emerging Market Bond Global Diversified Index.

The JP Morgan Emerging Market Bond Global Diversified Index is a uniquely-weighted version of the EMBI Global Index, which tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities such as Brady bonds, loans and Eurobonds. Currently, the EMBI Global Index covers 196 instruments across 28 countries. It limits the weights of those index countries with larger debt stocks by only including specified portions of these countries' eligible debt outstanding. The countries covered in the EMBI Global Diversified are identical to those covered by the EMBI Global Index.

Average Annual Total Returns as of May 31, 2011

	3 Months	Since Inception	Inception Date
Stone Harbor Emerging Markets Income Fund - NAV	8.50%	7.32%	12/22/10
Stone Harbor Emerging Markets Income Fund Market Price	4.12%	3.08%	
JP Morgan EMBI Global Diversified Index	4.14%	4.11%	

Past performance is no guarantee of future results. Current performance may be lower or higher than the performance shown. Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. The calculation assumes that all income dividends, capital gain and return of capital distributions, if any, have been reinvested and includes all fee waivers and expense reimbursements. Total return does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or broker commissions or sales charges in connection with the purchase or sale of Fund shares. Investment return and principal value will vary, and shares, when sold, may be worth more or less than their original cost. Total returns for a period of less than one year are not annualized. Index returns do not include the effects of sales charges or management fees. It is not possible to invest directly in an index.

Performance at market price will differ from its results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about the Fund, market conditions, supply and demand for the Fund's shares, or changes in Fund dividends.

An investment in the Fund involves risk, including the loss of principal. Total return, market price, market price yield and NAV will fluctuate with changes in market conditions. This data is provided for information purposes only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a onetime public offering and once issued, shares of closed-end funds are traded in the open market through a stock exchange. NAV is equal to total assets attributable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.

- (1) Floating or variable rate security. Interest rate disclosed is that which is in effect at May 31, 2011.
- (2) This security has been valued at its fair value determined in good faith pursuant to procedures approved by the Board of Trustees. Total market value of fair valued securities amounts to \$42,680,745, which represents approximately 11.15% of net assets as of May 31, 2011.
- (3) On May 31, 2011, securities valued at \$119,645,250 were pledged as collateral for reverse repurchase agreements. The average amount of borrowings while outstanding during the period ended May 31, 2011 was \$86,846,746 at a weighted average interest rate of 0.56%.
- (4) Security exempt from registration under Rule 144A of the Securities Act of 1933. Under procedures approved by the Board of Trustees, such securities have been determined to be liquid by the Investment Advisor and may normally be sold to qualified institutional buyers in transactions exempt from registration. Total market value of Rule 144A securities amounts to \$46,168,727, which represents approximately 12.06% of net assets as of May 31, 2011.
- (5) Securities were issued pursuant to Regulation S under the Securities Act of 1933, which exempts securities offered and sold outside of the United States from registration. Such securities cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration. These securities have been deemed liquid under procedures approved by the Fund's Board of Trustees. As of May 31, 2011, the aggregate market value of those securities was \$62,323,678, representing 16.28% of net assets.
- (6) Step bond. Coupon increases periodically based upon a predetermined schedule. Interest rate disclosed is that which is in effect at May 31, 2011.
- (7) Bank loans generally pay interest at rates which are periodically determined by reference to a base lending rate plus a premium. All loans carry a variable rate of interest. These base lending rates are generally (i) the Prime Rate offered by one or more major United States banks, (ii) the lending rate offered by one or more European banks such as the London Interbank Offered Rate (LIBOR) or (iii) the Certificate of Deposit rate. Rate shown represents the weighted average rate at May 31, 2011. Bank Loans, while exempt from registration,

Edgar Filing: Stone Harbor Emerging Markets Income Fund - Form N-CSRS/A

under the Securities Act of 1933 (the 1933 Act), contain certain restrictions on resale and cannot be sold publicly. Floating rate bank loans often require prepayments from excess cash flow or permit the borrower to repay at its election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturity shown.

Ratio of net investment income to average net assets	10.01% ⁽⁴⁾
Ratio of expenses to average managed assets ⁽⁵⁾	1.55% ⁽⁴⁾
Portfolio turnover rate	55%

⁽¹⁾ Calculated using average shares throughout the period.⁽²⁾ Total returns for periods of less than one year are not annualized.⁽³⁾ Total investment return is calculated assuming a purchase of common share at the opening on the first day and a sale at closing on the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Total investment returns do not reflect brokerage commissions, if any, and are not annualized.⁽⁴⁾ Annualized.⁽⁵⁾ Average managed assets represent net assets applicable to common shares plus average amount of borrowings during the period.

Stone Harbor Emerging Markets Income Fund

Notes to Financial Statements

May 31, 2011 (Unaudited)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Stone Harbor Emerging Markets Income Fund (the Fund) is a newly organized, non-diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a Massachusetts business trust on September 10, 2010, pursuant to an Agreement and Declaration of Trust governed by the laws of The Commonwealth of Massachusetts (the Declaration of Trust). The Fund commenced operations on December 22, 2010. Prior to that, the Fund had no operations other than matters relating to its organization and the sale and issuance of 4,188 shares of beneficial interest (Common Shares) in the Fund to the Stone Harbor Investment Partners (the Adviser) at a price of \$23.88 per share. The Fund's common shares are listed on the New York Stock Exchange (the Exchange) and trade under the ticker symbol EDF.

The Fund's primary investment objective is to maximize total return, which consists of income on its investments and capital appreciation. The Fund will normally invest at least 80% of its net assets (plus any borrowings made for investment purposes) in Emerging Markets Securities.

Emerging Markets Securities include fixed income securities and other instruments (including derivatives) that are economically tied to emerging market countries that are denominated in the predominant currency of the local market of an emerging market country or whose performance is linked to those countries' markets, currencies, economies or ability to repay loans. A security or instrument is economically tied to an emerging market country if it is principally traded on the country's securities markets or if the issuer is organized or principally operates in the country, derives a majority of its income from its operations within the country or has a majority of its assets within the country.

The Fund is classified as non-diversified under the 1940 Act. As a result, it can invest a greater portion of its assets in obligations of a single issuer than a diversified fund. The Fund may therefore be more susceptible than a diversified fund to being adversely affected by any single corporate, economic, political, or regulatory occurrence.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America (GAAP). The preparation of the financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

(a) Investment Valuation: Debt securities, bank loans and linked notes are valued at the mean between the bid and asked prices provided by an independent pricing service that are based on transactions in debt obligations, quotations from dealers, market transactions in comparable securities and various other relationships between securities. Equity securities for which market quotations are available are valued at the last sale price or official closing price on the primary market or exchange on which they trade. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market, and are valued at the mean between the bid and asked prices as of the close of business of that market. When prices are not readily available, or are determined not to reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Funds calculate their net asset value, the Funds may value these investments at fair value as determined in accordance with the procedures approved by the Fund's Board of Trustees. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates market value. Available cash is invested into a money market fund by the custodian.

A three-tier hierarchy has been established to measure fair value based on the extent of use of observable inputs as compared to unobservable inputs for disclosure purposes and requires additional disclosures about these valuations measurements. Inputs refer broadly to the assumptions that market participants would use in pricing a security. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the security developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the security developed based on the best information available in the circumstances.

The three-tier hierarchy is summarized as follows:

Edgar Filing: Stone Harbor Emerging Markets Income Fund - Form N-CSRS/A

Level 1	Quoted and Unadjusted Prices in active markets for identical investments
Level 2	Other Significant Observable Inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
Level 3	Significant Unobservable Inputs (including the Fund's own assumptions in determining the fair value of investments).

Table of Contents

Stone Harbor Emerging Markets Income Fund

Notes to Financial Statements

May 31, 2011 (Unaudited)

The following is a summary of the inputs used as of May 31, 2011 in valuing the Fund's assets:

	Level 1 - Quoted and Unadjusted Prices	Level 2 - Other Significant Observable Inputs	Level 3 - Significant Unobservable Inputs	Total

**Realized gain and change in unrealized appreciation are included in the related amounts on investments in the Statement of Operations.*
 The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

(b) Security Transactions and Investment Income: Security transactions are accounted for on a trade date basis. Interest income, adjusted for amortization of premium and accretion of discount, is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date. Foreign dividend income is recorded on the ex-dividend date or as soon as practical after the Fund determines the existence of a dividend declaration after exercising reasonable due diligence. The cost of investments sold is determined by use of the specific identification method. To the extent any issuer defaults on an expected interest payment, the

Fund's policy is to generally halt any additional interest income accruals and consider the realizability of interest accrued up to the date of default.

(c) Foreign Currency Translation: The books and records of the Fund are maintained in U.S. dollars. Investment valuations and other assets and liabilities initially expressed in foreign currencies are converted each business day into U.S. dollars based upon current exchange rates. Prevailing foreign exchange rates may generally be obtained at the close of the NYSE (normally, 4:00 p. m. Eastern time).

Stone Harbor Emerging Markets Income Fund

Notes to Financial Statements

May 31, 2011 (Unaudited)

The portion of realized and unrealized gains or losses on investments due to fluctuations in foreign currency exchange rates is not separately disclosed and is included in realized and unrealized gains or losses on investments, when applicable.

(d) Foreign Securities: The Fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible revaluation of currencies, the ability to repatriate funds, less complete financial information about companies and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of securities of comparable U.S. issuers.

(e) Leverage: The Fund may borrow from banks and other financial institutions and may also borrow additional funds by entering into reverse repurchase agreements or the issuance of debt securities (collectively, Borrowings) in an amount that, when combined with the value of any Preferred Shares issued by the Fund, does not exceed 33 1/3% of the Fund's Total Assets immediately after such transactions. It is possible that following such Borrowings and/or issuances of Preferred Shares, the assets of the Fund will decline due to market conditions such that this 33 1/3% limit will be exceeded. In that case, the leverage risk to Common Shareholders will increase.

In a reverse repurchase agreement, the Fund loans to a financial institution a security that it holds with an agreement to repurchase the same security at an agreed - upon price and date. A reverse repurchase agreement involves the risk that the market value of the security loaned by the Fund may decline below the repurchase price of the security. The Fund will segregate assets determined to be liquid by the investment adviser or otherwise cover its obligations under reverse repurchase agreements.

(f) Risk Exposure and the Use of Derivative Instruments: The Fund's investment objectives not only permit the Fund to purchase investment securities, they also allow the Fund to enter in various types of derivatives contracts. In doing so, the Fund will employ strategies in differing combinations to permit them to increase, decrease, or change the level or types of exposure to market factors. Central to those strategies are features inherent to derivatives that may make them more attractive for this purpose than equity or debt securities; they require little or no initial cash investment, they can focus exposure on only certain selected risk factors, and they may not require the ultimate receipt or delivery of the underlying security (or securities) to the contract. This may allow the Fund to pursue their objectives more quickly and efficiently than if they were to make direct purchases or sales of securities capable of effecting a similar response to market factors.

Market Risk Factors. In pursuit of its investment objectives, the Fund may seek to use derivatives to increase or decrease its exposure to the following market risk factors, among others:

Interest Rate Risk. Interest rate risk refers to the fluctuations in value of fixed-income securities resulting from the inverse relationship between price and yield. For example, an increase in general interest rates will tend to reduce the make value of already issued fixed-income investments, and a decline in general interest rates will tend to increase their value. In addition, debt securities with longer maturities, which tend to have higher yields, are subject to potentially greater fluctuations in value from changes in interest rates than obligations with shorter maturities.

Credit Risk. Credit risk relates to the ability of the issuer to meet interest and principal payments, or both, as they come due. In general, lower-grade, higher-yield bonds are subject to credit risk to a greater extent than lower-yield, higher-quality bonds.

Foreign Exchange Rate Risk. Foreign exchange rate risk relates to the change in the U.S. dollar value of a security held that is denominated in a foreign currency. The U.S. dollar value of a foreign currency denominated security will decrease as the dollar appreciates against the currency, while the U.S. dollar value will increase as the dollar depreciates against the currency.

Equity Risk. Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Risk of Investing in Derivatives. The Fund's use of derivatives can result in losses due to unanticipated changes in the market risk factors and the overall market. In instances where the Fund is using derivatives to decrease, or hedge, exposures to market risk factors for securities held by the Fund, there are also risks that those derivatives may not perform as expected resulting in losses for the combined or hedged positions.

Derivatives may have little or no initial cash investment relative to their market value exposure and therefore can produce significant gains or losses in excess of their cost. This use of embedded leverage allows the Fund to increase its market value exposure relative to its net assets and

Edgar Filing: Stone Harbor Emerging Markets Income Fund - Form N-CSRS/A

can substantially increase the volatility of the Fund's performance.

Additional associated risks from investing in derivatives also exist and potentially could have significant effects on the valuation of the derivative and the Fund. Typically, the associated risks are not the risks that the Fund is attempting to increase or decrease exposure to, per its investment objectives, but are the additional risks from investing in derivatives.

Examples of these associated risks are liquidity risk, which is the risk that the Fund will not be able to sell or close out the derivative in a timely manner, and counterparty credit risk, which is the risk that the counterparty will not fulfill its obligation to the Fund. Associated risks can be different for each type of derivative and are discussed by each derivative type below and in the notes that follow.

Forward Foreign Currency Contracts: The Fund may engage in currency transactions with counterparties to hedge the value of

Table of Contents**Stone Harbor Emerging Markets Income Fund****Notes to Financial Statements**

May 31, 2011 (Unaudited)

portfolio securities denominated in particular currencies against fluctuations in relative value, to gain or reduce exposure to certain currencies, or to generate income or gains. A forward foreign currency contract is an agreement between two parties to buy and sell a currency at a set price on a future date. The contract is marked-to-market daily and the change in value is recorded by the Fund as an unrealized gain or loss. When a forward foreign currency contract is extinguished, through either delivery or offset by entering into another forward foreign currency contract, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value of the contract at the time it was extinguished.

Forward foreign currency contracts involve elements of market risk in excess of the amounts reflected in the Statement of Assets and Liabilities. The Fund bears the risk of an unfavorable change in the foreign exchange rate underlying the forward foreign currency contract. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

Credit Default Swaps: The Fund may enter into credit default swap contracts for hedging purposes, to gain market exposure or to add leverage to their portfolios. When used for hedging purposes, a Fund would be the buyer of a credit default swap contract. In that case, the Fund would be entitled to receive the par (or other agreed

upon) value of a referenced debt obligation, index or other investment from the counterparty to the contract in the event of a default by a third party, such as a U.S. or foreign issuer, on the referenced debt obligation. In return, the Fund would pay to the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would have spent the stream of payments and received no benefit from the contract. When the Fund is the seller of a credit default swap contract, it receives the stream of payments but is obligated to pay upon default of the referenced debt obligation. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total assets, the Fund would be subject to investment exposure on the notional amount of the swap.

In addition to the risks applicable to derivatives generally, credit default swaps involve special risks because they are difficult to value, are highly susceptible to liquidity and credit risk, and generally pay a return to the party that has paid the premium only in the event of an actual default by the issuer of the underlying obligation, as opposed to a credit downgrade or other indication of financial difficulty.

No swaps were held in the Fund as of May 31, 2011.

The following is a summary of the fair valuations of derivative instruments categorized by risk exposure:

Fair values of derivative instruments on the Statement of Assets and Liabilities as of May 31, 2011:

	Foreign Exchange Contracts	Total
Assets:		
Unrealized appreciation on forward foreign currency contracts	\$ 489,746	\$ 489,746
Liabilities:		
Unrealized depreciation on forward foreign currency contracts	\$ (178,639)	\$ (178,639)

The effect of derivative instruments on the Statement of Operations for the period ended May 31, 2011:

Edgar Filing: Stone Harbor Emerging Markets Income Fund - Form N-CSRS/A

	Foreign Exchange Contracts	Total
Net Realized Loss on:		
Foreign currency transactions	\$ (721,486)	\$ (721,486)
Change in Unrealized Appreciation on:		
Translation of assets and liabilities denominated in foreign currencies	\$ 311,107	\$ 311,107

(g) Credit Linked Notes: The Fund may invest in Credit Linked Notes to obtain economic exposure to high yield, emerging markets or other securities. Investments in a Credit Linked Note typically provide the holder with a return based on the return of an underlying reference instrument, such as an emerging market bond. Like an investment in a bond, investments in credit-linked securities represent the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of

the security. In addition to the risks associated with the underlying reference instrument, an investment in a Credit Linked Note is also subject to the risk that the counterparty will be unwilling or unable to meet its obligations under the note. Because Credit Linked Notes are derivatives, an investment in these instruments is generally subject to the risks associated with derivatives.

Table of Contents

Stone Harbor Emerging Markets Income Fund

Notes to Financial Statements

May 31, 2011 (Unaudited)

(h) Loan Participations and Assignments: The Fund may invest in loans arranged through private negotiation between one or more financial institutions. The Fund's investment in any such loan may be in the form of a participation in or an assignment of the loan. In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the participation.

The Fund assumes the credit risk of the borrower, the lender that is selling the participation and any other persons interpositioned between the Fund and the borrower. In the event of the insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

(i) Leverage Risk: Leverage creates risks for Common Shareholders, including the likelihood of greater volatility of NAV per share and market price of, and dividends paid on, the Common Shares. There is a risk that fluctuations in the interest rates on any Borrowings or the dividend rates on any Preferred Shares issued by the Fund may adversely affect the return to the Common Shareholders. If the income from the securities purchased with the proceeds of leverage is not sufficient to cover the cost of leverage, the return on the Fund will be less than if leverage had not been used, and therefore the amount available for distribution to the Common Shareholders as dividends and other distributions will be reduced.

The Fund may choose not to use leverage at all times. The amount and composition of leverage used may vary depending upon a number of factors, including economic and market conditions in the relevant emerging market countries, the availability of relatively attractive investment opportunities not requiring leverage and the costs and risks that the Fund would incur as a result of leverage.

There were no Preferred Shares issued by the Fund as of May 31, 2011.

(j) Credit and Market Risk: The Fund invests in high yield and emerging market instruments that are subject to certain credit and market risks. The yields of high yield and emerging market debt obligations reflect, among other things, perceived credit and market risks. The Fund's investment in securities rated below investment grade typically involves risks not associated with higher rated securities including, among others, greater risk related to timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading. The consequences of political, social, economic or diplomatic changes may have disruptive effects on the market prices of investments held by the Fund. The Fund's investment in non-dollar denominated securities may also result in foreign currency losses caused by devaluations and exchange rate fluctuations. Investments in derivatives are subject to credit and market risks.

(k) Federal and Other Taxes: No provision for income taxes is included in the accompanying financial statements, as the Funds intend to distribute

to shareholders all taxable investment income and realized gains and otherwise comply with Subchapter M of the Internal Revenue Code applicable to regulated investment companies.

The Fund evaluates tax positions taken (or expected to be taken) in the course of preparing the Fund's tax returns to determine whether these positions meet a more-likely-than-not standard that, based on the technical merits, have more than a fifty percent likelihood of being sustained by a taxing authority upon examination. A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements.

Management of the Fund analyzes all open tax years, as defined by the Statute of Limitations, for all major jurisdictions, including federal tax authorities and certain state tax authorities. As of, and during the period ended May 31, 2011, the Fund did not have a liability for any unrecognized tax benefits.

(l) Distributions to Shareholders: The Fund makes monthly cash distributions of all or a portion of its net investment income to common shareholders. The Fund intends to pay capital gains distributions at least annually. The Fund has filed an application with the Securities and Exchange Commission seeking permission to distribute capital gains more frequently than annually; however there can be no assurance that it will be granted.

Edgar Filing: Stone Harbor Emerging Markets Income Fund - Form N-CSRS/A

Income and long-term capital gain distributions are determined in accordance with federal income tax regulations, which may differ from GAAP. The amount and characteristics of tax basis distributions and composition of distributable earnings/(accumulated losses) are finalized at fiscal year end; accordingly, tax basis balances have not been determined as of May 31, 2011.

2. MANAGEMENT FEES, TRUSTEE FEES, ADMINISTRATION FEES, CUSTODY FEES AND TRANSFER AGENT FEE

The Adviser receives a monthly fee at the annual rate of 1.00% of the average daily value of the Fund's total assets (including any assets attributable to any leverage used) minus the Fund's accrued liabilities (other than Fund liabilities incurred for any leverage) (Total Assets).

ALPS Fund Services, Inc. (ALPS) serves as administrator to the Fund. Under the administration agreement, ALPS is responsible for calculating the net asset value of the common shares and generally managing the administrative affairs of the Fund. ALPS receives a monthly fee at an annual rate of 0.15% of the average daily value of the Fund's Total Assets.

The Bank of New York Mellon serves as the Fund's custodian. Mellon Investor Services LLC, an affiliate of The Bank of New York Mellon, serves as the Fund's transfer agent.

The Fund pays each Trustee who is not a director, officer, employee, or affiliate of Stone Harbor or ALPS, a fee of \$5,000 per meeting of

Table of Contents

Stone Harbor Emerging Markets Income Fund

Notes to Financial Statements

May 31, 2011 (Unaudited)

the Board of Trustees. The Fund will also reimburse independent Trustees for travel and out-of-pocket expenses incurred in connection with such meetings.

3. SECURITIES TRANSACTIONS

During the period ended May 31, 2011, there were purchase and sale transactions (excluding short term securities) of \$662,094,291 and 234,451,575, respectively.

On May 31, 2011, based on cost of \$458,778,308 for federal income tax purposes, aggregate gross unrealized gains for all securities in which there is an excess of value over tax cost was \$13,816,146 and aggregate gross unrealized losses for all securities in which there is an excess of tax cost over value was \$3,691,998, resulting in net unrealized gain of \$10,124,148.

Summary of Dividend Reinvestment Plan

May 31, 2011 (Unaudited)

Unless the registered owner of Common Shares elects to receive cash by contacting Mellon Investor Services LLC (the Plan Administrator), all dividends declared on Common Shares will be automatically reinvested by the Plan Administrator for shareholders in the Fund's Automatic Dividend Reinvestment Plan (the Plan), in additional Common Shares. Common Shareholders who elect not to participate in the Plan will receive all dividends and other distributions in cash paid by check mailed directly to the shareholder of record (or, if the Common Shares are held in street or other nominee name, then to such nominee) by the Plan Administrator as dividend disbursing agent. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Such notice will be effective with respect to a particular dividend or other distribution (together, a Dividend). Some brokers may automatically elect to receive cash on behalf of Common Shareholders and may re-invest that cash in additional Common Shares.

The Plan Administrator will open an account for each Common Shareholder under the Plan in the same name in which such Common Shareholder's Common Shares are registered. Whenever the Fund declares a Dividend payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in Common Shares. The Common Shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized Common Shares from the Fund (Newly Issued Common Shares) or (ii) by purchase of outstanding Common Shares on the open market (Open-Market Purchases) on the NYSE or elsewhere. If, on the payment date for any Dividend, the closing market price plus estimated brokerage commissions per Common Share is equal to or greater than the NAV per Common Share, the Plan Administrator will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the NAV per Common Share on the payment date; provided that, if the NAV is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per Common Share on the payment date. If, on the payment date for any Dividend, the NAV per Common Share is greater than the closing market value plus estimated brokerage commissions, the Plan Administrator will invest the Dividend amount in Common Shares acquired on behalf of the participants in Open-Market Purchases.

In the event of a market discount on the payment date for any Dividend, the Plan Administrator will have until the last business day before the next date on which the Common Shares trade on an ex-dividend basis or 30 days after the payment date for such Dividend, whichever is sooner (the Last Purchase Date), to invest the Dividend amount in Common Shares acquired in Open-Market Purchases. It is contemplated that the Fund will pay monthly income Dividends. If, before the Plan Administrator has completed its Open-Market Purchases, the market price per Common Share

exceeds the NAV per Common Share, the average per Common Share purchase price paid by the Plan Administrator may exceed the NAV of the Common Shares, resulting in the acquisition of fewer Common Shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at the NAV per Common Share at the close of business on the Last Purchase Date provided that, if the NAV is less than or equal to 95% of the then current market price per Common Share, the dollar amount of the Dividend will be divided by 95% of the market price on the payment date for purposes of determining the number of shares issuable under the Plan.

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common Shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instructions of the participants.

In the case of Common Shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Administrator will administer the Plan on the basis of the number of Common Shares certified from time to time by the record shareholder's

Edgar Filing: Stone Harbor Emerging Markets Income Fund - Form N-CSRS/A

name and held for the account of beneficial owners who participate in the Plan.

There will be no brokerage charges with respect to Common Shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commissions incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such Dividends. See U.S. Federal Income Tax Matters below. Participants that request a sale of Common Shares through the Plan Administrator are subject to brokerage commissions.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator.

FUND PORTFOLIO HOLDINGS

The Fund files its complete schedule of portfolio holdings with the Securities and Exchange Commission (the "SEC") for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Q will be available (1) on the Fund's website located at <http://www.shiplpcef.com>, (2) on the SEC's website at <http://www.sec.gov>, or (3) they may be reviewed and copied at the SEC's Public Reference Room in Washington DC (call 1-800-732-0330 for information on the operation of the Public Reference Room).

PROXY VOTING

The policies and procedures used to determine how to vote proxies relating to securities held by the Fund will be available (1) without charge, upon request, by calling 1-877-206-0791, or (2) on the Fund's website located at <http://www.shiplpcef.com>, and (3) on the SEC's website at <http://www.sec.gov>. Information regarding how the Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 will be available by August 31 of each year (1) without charge, upon request, by calling 1-877-206-0791, or (2) on the Fund's website located at <http://www.shiplpcef.com>, and (3) on the SEC's website at <http://www.sec.gov>.

SENIOR OFFICER CODE OF ETHICS

The Fund files a copy of its code of ethics that applies to the registrant's principal executive officer, principal financial officer or controller, or persons performing similar functions, with the SEC as an exhibit to its annual report on Form N-CSR. This will be available on the SEC's website at <http://www.sec.gov>.

This report, including the financial information herein, is transmitted to the shareholders of Stone Harbor Emerging Markets Income Fund for their information. It is not a prospectus, circular or representation intended for use in the purchase of shares of the Funds or any securities mentioned in this report.

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that from time to time the Fund may purchase its common shares in the open market.

Information on the Fund is available at www.shiplpcef.com or by calling the Fund's shareholder servicing agent at 1-866-390-3910.

Stone Harbor Emerging Markets Income Fund Approval of Investment Advisory Agreement

May 31, 2011 (Unaudited)

The Stone Harbor Emerging Markets Income Fund (the Fund) commenced operations in December 2010. The Board of Trustees approved the Fund's investment advisory agreement (the Agreement) at a Board meeting held on November 17, 2010. In addition to reviewing materials provided in advance of that meeting, the Trustees considered their experience as trustees of other funds managed by the Adviser and information provided to the Trustees at the meeting. In considering whether to approve the Agreement, the Board of Trustees, including the trustees who are not interested persons of the Fund (the Independent Trustees), did not identify any single factor as determinative. In addition, individual Trustees may have evaluated the information presented differently from one another, giving different weights to various factors. Matters considered by the Trustees, including the Independent Trustees, in connection with their approval of the Agreement included the following:

The nature, extent and quality of the services provided to the Fund under the Agreement. The Trustees considered the nature, extent and quality of the services proposed to be provided by Stone Harbor Investment Partners LP (the Adviser) to the Fund. The Trustees also considered the nature, extent and quality of the services provided by the Adviser to its institutional clients and to open-end registered investment companies for which it serves as investment adviser, and the proposed dedication of resources to the Fund by the Adviser. In this regard, the Trustees took into account the experience of the Fund's portfolio management team, including their experience managing closed-end funds at their previous employers, and of the Adviser's senior management, and the time and attention they proposed to devote to the Fund.

After reviewing these and related factors, the Trustees concluded, within the context of their overall conclusions regarding the Agreement, that the nature, extent and quality of the services provided by the Adviser supported the approval of the Agreement.

Investment performance of the Adviser. Prior to the approval of the Agreement, the Trustees received information regarding the performance of other accounts managed or sub-advised by the Adviser or its personnel over various time periods, including information which compared the Adviser's performance to that of appropriate performance benchmarks. The Trustees also considered the Adviser's performance and reputation generally and its proposed investment techniques, risk management controls and decision-making processes.

After reviewing these and related factors, the Trustees concluded, within the context of their overall conclusions regarding the Agreement, that the performance of the Adviser supported the approval of the Agreement.

The costs of the services to be provided and profits to be realized by the Adviser from its relationship with the Funds. The Trustees considered the proposed fees to be charged to the Fund for advisory services as well as the total expense levels proposed for the Fund. The Adviser furnished information to the Trustees compiled by a third party that included comparisons of the Fund's proposed

advisory fees and total expense levels compared to a group of similar mutual funds selected by the third party. The Adviser also provided information about the costs to it of providing services to the Fund and information about its potential profitability with respect to its management of the Fund, as well as information about the advisory fees it charges to institutional separate accounts with similar strategies and information about differences in such fees. The Trustees received from the Adviser information about the complexities in managing a fund that will use leverage and which will be subject to market expectations regarding its distribution rate. The Trustees also considered information about the administrative, operational, tax and compliance complexities associated with the management of closed-end funds as contrasted with the management of separate accounts with similar investment strategies. The Trustees also considered that because of the Fund's organizational expense cap and because of other expenses the Adviser would bear in connection with the launch of the Fund, the Fund was not expected to be immediately profitable to the Adviser.

After reviewing these and related factors, the Trustees concluded, within the context of their overall conclusions regarding the Agreement, that the advisory fee for the Fund was fair and reasonable, and that the costs of these services generally and the related profitability of the Adviser in respect of its relationship with the Fund supported the approval of the Agreement.

Economies of Scale. The Trustees considered to what extent economies of scale would likely be realized as the Fund grows and whether those economies would be shared with the Fund through breakpoints in their investment advisory fees or other means, such as expense caps. At the time of their meeting, the size of the Fund had yet to be determined and therefore the Trustees were not able to determine the extent to which economies of scale could be shared with investors.

After reviewing these and related factors, the Trustees concluded, within the context of their overall conclusions regarding the Agreement, that the extent to which economies of scale would be shared with the Fund supported the approval of the Agreement.

Edgar Filing: Stone Harbor Emerging Markets Income Fund - Form N-CSRS/A

The Trustees also considered other factors, which included but were not limited to the following:

the compliance programs of the Fund and the Adviser. They also considered the compliance-related resources the Adviser proposed to provide to the Fund, including resources designed to ensure compliance with the investment objectives, policies and restrictions of the Fund.

potential fallout benefits to the Adviser, such as the benefits from being known in the marketplace as a sponsor of closed-end funds.

Based on their evaluation of all factors they deemed to be material, including those factors described above, the Trustees, including the Independent Trustees, concluded that the proposed Agreement should be approved for an initial two-year period.

Table of Contents**Stone Harbor Emerging Markets Income Fund****Trustees & Officers**

May 31, 2011 (Unaudited)

The business and affairs of each Fund are managed under the direction of its Board of Trustees. The Board of Trustees approves all significant agreements between a Fund and the persons or companies that furnish services to the Fund, including agreements with its distributor, investment adviser, administrator, custodian and transfer agent. The day -to-day operations of the Fund are delegated to the Fund's Adviser and administrator.

The name, age and principal occupations for the past five years of the Trustees and officers of the Funds are listed below, along with the number of portfolios in the Fund complex overseen by and the other directorships held by each Trustee. Except as otherwise noted, the address of each Trustee and officer is c/o Stone Harbor Investment Partners LP, 31 W. 52nd Street, 16th Floor, New York, New York 10019. The Trust's Statement of Additional Information includes additional information about the Trustees and is available without a charge, upon request, by calling 1-866-699-8158.

None.

Item 10. Submission of Matters to a Vote of Security Holders.

On November 27, 2010, the Board of Directors of the Registrant adopted bylaws of the Registrant (the *Bylaws*) that designate procedures by which shareholders may submit proposals to the Registrant's Board of Trustees. The applicable section of the *Bylaws* is set forth below:

Article 10.6(c): In addition to any other requirements under applicable law and the Declaration of Trust and these *Bylaws*, persons nominated by Shareholders for election as Trustees and any other proposals by Shareholders may be properly brought before an annual meeting only pursuant to timely notice (the *Shareholder Notice*) in writing to the Secretary. To be timely, the *Shareholder Notice* must be delivered to or mailed and received at the principal executive offices of the Trust not less than forty-five (45) nor more than sixty (60) days prior to the first anniversary date of the date on which the Trust first mailed its proxy materials for the prior year's annual meeting; provided, however, with respect to the annual meeting to be held in the calendar year 2011, the *Shareholder Notice* must be so delivered or mailed and so received on or before March 31, 2011; provided further, however, if and only if the annual meeting is not scheduled to be held within a period that commences thirty (30) days before the first anniversary date of the annual meeting for the preceding year and ends (30) days after such anniversary date (an annual meeting date outside such period being referred to herein as an *Other Annual Meeting Date*), such *Shareholder Notice* must be given in the manner provided herein by the later of the close of business on (i) the date forty-five (45) days prior to such *Other Annual Meeting Date* or (ii) the tenth (10th) business day following the date such *Other Annual Meeting Date* is first publicly announced or is disclosed.

Item 11. Controls and Procedures.

- (a) The Registrant's principal executive officer and principal financial officer have concluded that the Registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended) are effective as of a date within 90 days of the filing date of this Report that includes the disclosure required by this paragraph, based on the evaluation of these controls and procedures required by Rule 30a-3(b) under the Investment Company Act of 1940, as amended, and Rule 15d-15(b) under the Securities Exchange Act of 1934.

- (b) There was no change in the Registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940, as amended) that occurred during the second fiscal quarter of the period covered by this Report that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.
