Notes to Consolidated Financial Statements

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations - Orrstown Financial Services, Inc. (the Company) is a financial holding company whose primary activity consists of supervising its wholly-owned subsidiary, Orrstown Bank (the Bank). The Company operates through its office in Shippensburg, Pennsylvania. Orrstown Bank provides services through its network of offices in Franklin, Cumberland and Perry Counties of Pennsylvania and in Washington County, Maryland. The Bank engages in lending services for commercial loans, residential loans, commercial mortgages and various forms of consumer lending. Deposit services include checking, savings, time and money market deposits. The Bank also provides investment and brokerage services through its Orrstown Financial Advisors division. The Bank has twenty-one branches located in Shippensburg (2), Carlisle (5), Spring Run, Orrstown, Chambersburg (3), Mechanicsburg (2), Camp Hill, Greencastle, Newport (2), Duncannon, and New Bloomfield, Pennsylvania and Hagerstown, Maryland. The Company and its subsidiary are subject to the regulation of certain federal and state agencies and undergo periodic examinations by such regulatory authorities.

Basis of Presentation - The unaudited financial statements of the Company and its subsidiary are presented for the three months ended March 31, 2012 and 2011 and have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information, the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. However, unaudited information reflects all adjustments (consisting solely of normal recurring adjustments) that are, in the opinion of management, considered necessary for a fair presentation of the financial position, results of operations and cash flows for the interim period. Information presented at December 31, 2011 is condensed from audited year-end financial statements. For further information, refer to the audited consolidated financial statements and footnotes thereto, included in the Annual Report on Form 10-K for the year ended December 31, 2011.

All significant intercompany transactions and accounts have been eliminated. Operating results for the three months ended March 31, 2012, are not necessarily indicative of the results that may be expected for the year ending December 31, 2012.

Use of Estimates - The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for losses on loans and the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans. In connection with the determination of the allowance for losses on loans and foreclosed real estate, management obtains independent appraisals for significant properties.

While management uses available information to recognize losses on loans and foreclosed real estate; future additions to the allowances may be necessary based on changes in local economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for losses on loans and foreclosed real estate. Such agencies may require the Company to recognize additions to the allowance based on their judgments concerning information available to them at the time of their examination. Because of these factors, management sestimate of credit losses inherent in the loan portfolio and the related allowance may change in the near term

Subsequent Events - GAAP establishes standards for accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued. The subsequent events principle sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition in the financial statements,

Table of Contents

identifies the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and specifies the disclosures that should be made about events or transactions that occur after the balance sheet date. In preparing these financial statements, the Company evaluated the events and transactions that occurred after March 31, 2012, through the date these financial statements were filed with the Securities and Exchange Commission (the Commission).

Concentration of Credit Risk - The Company grants agribusiness, commercial, residential and consumer loans to customers in its market area. Although the Company maintains a diversified loan portfolio, a significant portion of its customers—ability to honor their contracts is dependent upon economic sectors for construction contractors, residential and non-residential building operators, sales finance, sub-dividers and developers. Management evaluates each customer—s creditworthiness on a case-by-case basis. The amount of collateral obtained, if collateral is deemed necessary by the Company upon the extension of credit, is based on management—s credit evaluation of the customer. Collateral held varies, but generally includes real estate and equipment.

The types of securities the Company invests in are included in Note 2, Securities Available for Sale and the type of lending the Company engages in are included in Note 3, Loans Receivable and Allowance for Loan Losses.

Cash and Cash Equivalents - For purposes of the consolidated statements of cash flows, cash and cash equivalents include cash, balances due from banks and federal funds sold, all of which have original maturities of 90 days or less.

Restricted Investments in Bank Stocks - Restricted investment in bank stocks, which represents required investments in the common stock of correspondent banks, is carried at cost as of March 31, 2012 and December 31, 2011, and consists of common stock of the Federal Reserve Bank of Philadelphia, Atlantic Central Bankers Bank and the Federal Home Loan Bank (FHLB) of Pittsburgh stocks.

Management evaluates the restricted investment in bank stocks for impairment in accordance with Accounting Standard Codification (ASC) Topic 942, Accounting by Certain Entities (Including Entities with Trade Receivables) That Lend to or Finance the Activities of Others.

Management's determination of whether these investments are impaired is based on their assessment of the ultimate recoverability of their cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of their cost is influenced by criteria such as (1) the significance of the decline in net assets of the correspondent bank as compared to the capital stock amount for the correspondent bank and the length of time this situation has persisted, (2) commitments by the correspondent bank to make payments required by law or regulation and the level of such payments in relation to the operating performance of the correspondent bank, and (3) the impact of legislative and regulatory changes on institutions and, accordingly, on the customer base of the correspondent bank.

Management believes no impairment charge is necessary related to the restricted investment in bank stocks as of March 31, 2012. However, security impairment analysis is completed quarterly and the determination that no impairment had occurred as of March 31, 2012 is no assurance that impairment may not occur in the future.

Interest-Bearing Deposits in Banks - Interest bearing deposits in banks are due on demand or mature within one year and are carried at cost.

Securities - Certain debt securities that management has the positive intent and ability to hold to maturity are classified as held to maturity and recorded at amortized cost. Trading securities are recorded at fair value with changes in fair value included in earnings. As of March 31, 2012 and December 31, 2011 the Company had no held to maturity or trading securities. Securities not classified as held to maturity or trading, including equity securities with readily determinable fair values, are classified as available for sale and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income. Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

Table of Contents

The Company follows the accounting guidance related to recognition and presentation of other-than-temporary impairment (FASB ASC 320-10). This guidance specifies that (a) if a company does not have the intent to sell a debt security prior to recovery and (b) it is more likely than not that it will not have to sell the debt security prior to recovery, the security would not be considered other-than-temporarily impaired unless there is a credit loss. When an entity does not intend to sell the security, and it is more likely than not, the entity will not have to sell the security before recovery of its cost basis, it will recognize the credit component of an other-than-temporary impairment of a debt security in earnings and the remaining portion in other comprehensive income. For held-to-maturity debt securities, the amount of an other-than-temporary impairment recorded in other comprehensive income for the noncredit portion of a previous other-than-temporary impairment should be amortized prospectively over the remaining life of the security on the basis of the timing of future estimated cash flows of the security.

The Company had no debt securities it deemed to be other than temporarily impaired at March 31, 2012 and December 31, 2011.

The Company s securities are exposed to various risks, such as interest rate, market risk, currency and credit risks. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in risks in the near term would materially affect investment assets reported in the consolidated financial statements.

For equity securities, when the Company has decided to sell an impaired available-for-sale security and the entity does not expect the fair value of the security to fully recover before the expected time of sale, the security is deemed other-than-temporarily impaired in the period in which the decision to sell is made. The Company recognizes an impairment loss when the impairment is deemed other than temporary even if a decision to sell has not been made.

Loans Held for Sale - Loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or fair value (LOCM). Gains and losses on loan sales (sales proceeds minus carrying value) are recorded in non-interest income.

Loans - The Company grants commercial, mortgage, and consumer loans to its customers located principally in south-central Pennsylvania and northern Maryland. The ability of the Company s debtors to honor their contracts is dependent upon the real estate and general economic conditions in this area.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off generally are reported at their outstanding unpaid principal balances adjusted for charge-offs, the allowance for loan losses, and any deferred fees or costs on originated loans. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and amortized as a yield adjustment over the respective term of the loan.

For all classes of loans, the accrual of interest income on loans, including impaired loans, ceases when principal or interest is past due 90 days or more or immediately if, in the opinion of management, full collection is unlikely. Interest will continue to accrue on loans past due 90 days or more if the collateral is adequate to cover principal and interest, and the loan is in the process of collection. Interest accrued, but not collected, as of the date of placement on nonaccrual status, is reversed and charged against current interest income, unless fully collateralized. Subsequent payments received are either applied to the outstanding principal balance or recorded as interest income, depending upon management s assessment of the ultimate collectability of principal. Loans are returned to accrual status, for all loan classes, when all the principal and interest amounts contractually due are brought current, the loan has performed in accordance with the contractual terms of the note for a reasonable period of time, generally six months, and the ultimate collectability of the total contractual principal and interest is reasonably assured. Past due status is based on contractual terms of the loan.

- 10 -

Table of Contents

Loan terms which are modified are classified as troubled debt restructurings if a concession was granted, for legal or economic reasons, related to a debtor s financial difficulties. Concessions granted under a troubled debt restructuring typically involve a temporary deferral of scheduled loan payments, an extension of a loan s stated maturity date, temporary reduction in interest rates, or granting of an interest rate below market rates given the risk of the transaction. If a modification occurs while the loan is on accruing status, it will continue to accrue interest under the modified terms. Nonaccrual troubled debt restructurings are restored to accrual status if scheduled principal and interest payments, under the modified terms, are current for six months after modification, and the borrower continues to demonstrate its ability to meet the modified terms. Troubled debt restructurings are evaluated individually for impairment if they have been restructured during the most recent calendar year, or if they are not performing according to their modified terms.

Allowance for Loan Losses - The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management speriodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower sability to repay, the estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

Loans Serviced - The Bank administers secondary market mortgage programs available through the Federal Home Loan Bank of Pittsburgh and the Federal National Mortgage Association and offers residential mortgage products and services to customers. The Bank originates single-family residential mortgage loans for immediate sale in the secondary market, and retains the servicing of those loans. At March 31, 2012 and December 31, 2011 the balance of loans serviced for others was \$304,005,000 and \$299,998,000.

Transfers of Financial Assets - Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferree obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Foreclosed Real Estate - Real estate properties acquired through, or in lieu of, loan foreclosure are initially recorded at the lower of carrying value or fair value less estimated costs to sell the underlying collateral. Capitalized costs include accrued interest and any costs that significantly improve the value of the properties. After foreclosure, valuations are periodically performed by management and the real estate is carried at the lower of its carrying amount or fair value less estimated costs to sell. Foreclosed real estate totaled \$2,413,000 and \$2,165,000 as of March 31, 2012 and December 31, 2011 and is included in other assets.

Stock Compensation Plans - The Company has stock option plans that cover employees and non-employee directors. Stock compensation accounting guidance (FASB ASC 718, Compensation - Stock Compensation) requires that the compensation cost relating to share-based payment transactions be recognized in financial statements. That cost is measured based on the grant date fair value of the stock award, including a Black-Scholes model for stock options. Compensation cost for all stock awards are calculated and recognized over the employees service period, generally defined as the vesting period.

Income Taxes - The Company accounts for Income Taxes in accordance with income tax accounting guidance (FASB ASC 740, *Income Taxes*). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be

- 11 -

Table of Contents

paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.

Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to management s judgment. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized. The Company recognizes interest and penalties, if any, on income taxes as a component of income tax expense.

Treasury Stock - Common stock shares repurchased are recorded as treasury stock at cost.

Earnings Per Share - Basic earnings per share represent income available to common stockholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflect the additional common shares that would have been outstanding if dilutive potential common shares had been issued. Potential common shares that may be issued by the Company relate solely to outstanding stock options.

Treasury shares are not deemed outstanding for earnings per share calculations.

Comprehensive Income - Comprehensive income consists of net income and other comprehensive income. Other comprehensive income includes unrealized gains on securities available for sale, and unrealized losses related to factors other than credit on debt securities and unrealized gains and losses on cash flow hedges.

Fair Value of Financial Instruments - Fair values of financial instruments are estimated using relevant market information and other assumptions. Fair value estimates involve uncertainties and matters of significant judgment. Changes in assumptions or in market conditions could significantly affect the estimates.

Segment Reporting - The Company only operates in one significant segment - Community Banking. The Company s non-banking activities are insignificant to the consolidated financial statements.

Recent Accounting Pronouncements - In April 2011, the FASB issued ASU 2011-2, A Creditor s Determination of Whether a Restructuring is a Troubled Debt Restructuring. This guidance clarifies which loan modifications constitute troubled debt restructurings and is intended to assist creditors in determining whether a modification of the terms of a receivable meets the criteria to be considered a troubled debt restructuring, both for the purpose of recording an impairment charge and for disclosure of troubled debt restructurings. In evaluating whether a restructuring constitutes a troubled debt restructuring, a creditor must separately conclude, under the guidance clarified by ASU 2011-2, that both of the following exist: (a) the restructuring constitutes a concession; and (b) the debtor is experiencing financial difficulties. As allowed by the guidance, the Company adopted the provisions of ASU 2011-2 in the quarter ending June 30, 2011. See further discussion in Note 3 - Loans Receivable and Allowance for Loan Losses.

In May 2011, the FASB issued ASU 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. The ASU requires certain disclosures about transfers between Level 1 and Level 2 of the fair value hierarchy, sensitivity of fair value measurements categorized within Level 3 of the fair value hierarchy, and categorization by level of items that are reported at cost but are required to be disclosed at fair value. The disclosures are to be applied prospectively in the first interim and annual periods beginning after December 15, 2011. The adoption of this standard did not have a material impact on the Company s consolidated financial statements.

In December 2011, the FASB issued ASU 2011-12, Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05, which defers certain provisions of ASU 2011-05, Presentation of Comprehensive Income. One of ASU 2011-05 s provisions requires entities to present reclassification adjustments out of accumulated other comprehensive income by component in both the statement in which net income is presented and the statement in which other comprehensive income is presented (for both interim and annual financial statements). Accordingly, this requirement is indefinitely deferred by ASU 2011-12 and will be further deliberated by the FASB at a future date. ASUs 2011-05 and 2011-12 are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, and should be applied retrospectively for all periods presented in the financial statements. The Company adopted the provisions of this guidance which are incorporated in these consolidated financial statements.

In December 2011, the FASB issued ASU 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities.* The ASU requires new disclosures regarding the nature of an entity s rights of setoff and related arrangements associated with its financial instruments and derivative instruments. The new disclosures are designed to make GAAP financial statements more comparable to those prepared under International Financial Reporting Standards. The new disclosures entail presenting information about both gross and net exposures. The new disclosure requirements are effective for annual reporting periods beginning on or after January 1, 2013, and interim periods therein; retrospective application is required. The Company has not yet completed its evaluation of this ASU; however, since the provisions of ASU 2011-11 are disclosure-related, the Company s adoption of this ASU is not expected to have an impact to its financial condition or results of operations.

NOTE 2. SECURITIES AVAILABLE FOR SALE

At March 31, 2012 and December 31, 2011, the investment securities portfolio was comprised exclusively of securities classified as available for sale , resulting in investment securities being carried at fair value. The amortized cost and fair values of investment securities available for sale at March 31, 2012 and December 31, 2011 were:

(Dollars in thousands) March 31, 2012	Amortized Cost	Unrealized Unrealized Gains Losses				Fair Value

The Company had 12 securities and 35 securities at March 31, 2012 and December 31, 2011 in which the amortized cost exceeds their values, as discussed below.

U.S. Treasuries and Government Sponsored Enterprises (GSE). Six U.S Treasuries and GSE securities, including mortgage-backed securities, have amortized costs which exceed their fair values, all of which are in the less than 12 months at March 31, 2012. At December 31, 2011, the Company had fifteen GSE securities with unrealized losses, all of which were in the less than 12 months category. These unrealized losses have been caused by a rise in interest rates from the time the securities were purchased. The contractual terms of those investments do not permit the issuer to settle the securities at a price less than the amortized cost bases of the investments. Because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider these investments to be other-than-temporarily impaired at March 31, 2012 or at December 31, 2011.

State and Political Subdivisions. One state and political subdivision security had an amortized cost which exceeded its fair value for less than 12 months at March 31, 2012. At December 31, 2011, two state and political subdivision securities had unrealized losses, both of which were greater than 12 months. These unrealized losses have been caused by a rise in interest rates from the time the securities were purchased. Management considers the investment rating, the state of the issuer of the security and other credit support in determining whether the security is other-than-temporarily impaired. Because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider these investments to be other-than-temporarily impaired at March 31, 2012.

Equity Securities. Five equity securities have cost which exceeds their fair value, all of which had unrealized losses for less than 12 months at March 31, 2012. At December 31, 2011, 18 equity securities had unrealized losses, all of which had unrealized losses for less than 12 months. These securities are among various industries, including financial, industrial, consumer, energy, health care and a large cap fund, In considering whether the equity securities are other-than-temporarily impaired, management reviews the severity and duration of decline in fair value, research reports, analysts recommendations, credit rating changes, news stories and other relevant information. Management believes the equity securities are not other-than-temporarily impaired and will equal or exceed our cost basis within a reasonable period of time. Since these

companies are considered viable and carry the possibility of price appreciation in the future, impairments are considered temporary. The Company recorded no other than temporary impairment expense on equity securities for the quarters ended March 31, 2012 and December 31, 2011.

- 14 -

The amortized cost and fair values of securities available for sale at March 31, 2012 by contractual maturity are shown below. Contractual maturities will differ from expected maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Availabl	le for Sale
	Amortized	Fair
(Dollars in thousands)	Cost	Value
Due in one year or less	\$ 5,568	\$ 5,634
Due after one year through five years	32,614	32,818
Due after five years through ten years	20,852	21,896
Due after ten years	41,868	43,523
GSE residential mortgage-backed securities	204,932	207,113
Total debt securities	305,834	310,984
Equity securities	553	501
	\$ 306,387	\$ 311,485

Proceeds from sales of securities available for sale for the quarters ended March 31, 2012 and 2011 were \$30,865,000 and \$27,658,000. Gross gains on the sales of securities were \$2,260,000 and \$421,000 for the quarters ended March 31, 2012 and 2011. Gross losses on securities available for sale were \$29,000 and \$42,000.

Securities with a fair value of \$303,878,000 and \$280,805,000 at March 31, 2012 and December 31, 2011 were pledged to secure public funds and for other purposes as required or permitted by law.

NOTE 3. LOANS RECEIVABLE AND ALLOWANCE FOR LOAN LOSSES

The Company s loan portfolio is broken down into segments to an appropriate level of disaggregation to allow management to monitor the performance by the borrower and to monitor the yield on the portfolio. Management has incorporated the provisions of ASU 2010-20, *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Loan Losses*, resulting in a refinement in its portfolio segregation. Consistent with the standard, the segments were further broken down into classes, to allow for differing risk characteristics within a segment.

The risks associated with lending activities differ among the various loan classes, and are subject to the impact of changes in interest rates, market conditions of collateral securing the loans, and general economic conditions. All of these factors may adversely impact the borrower s ability to repay its loans, and impact the associated collateral.

The Company has various types of commercial real estate loans which have differing levels of credit risk associated with them. Owner-occupied commercial real estate loans are generally dependent upon the successful operation of the borrower s business, with the cash flows generated from the business being the primary source of repayment of the loan. If the business suffers a downturn in sales or profitability, the borrower s ability to repay the loan could be in jeopardy.

Non-owner occupied and multi-family commercial real estate loans present a different credit risk to the Company than owner-occupied commercial real estate, as the repayment of the loan is dependent upon the borrower's ability to generate a sufficient level of occupancy to produce rental income that exceeds debt service requirements and operating expenses. Lower occupancy or lease rates may result in a reduction in cash flows, which hinder the ability of the borrower to meet debt service requirements, and may result in lower collateral values. The Company generally recognizes greater risk is inherent in these credit relationships as compared to owner-occupied loans mentioned above in its loan pricing.

Acquisition and development loans consist of 1-4 family residential construction and commercial and land development loans. The risk of loss on these loans is largely dependent on the Company s ability to assess the property s value at the completion of the project, which should exceed the property s construction

- 15 -

costs. During the construction phase, a number of factors could potentially negatively impact the collateral value, including cost overruns, delays in completing the project, competition, and real estate market conditions which may change based on the supply of similar properties in the area. In the event the collateral value at the completion of the project is not sufficient to cover the outstanding loan balance, the Company must rely upon other repayment sources, including the guarantors of the project or other collateral securing the loan.

Commercial and industrial loans include advances to local and regional businesses for general commercial purposes and include permanent and short-term working capital, machinery and equipment financing, and may be either in the form of lines of credit or term loans. Although commercial and industrial loans may be unsecured to our highest rated borrowers, the majority of these loans are secured by the borrower's accounts receivable, inventory and machinery and equipment. In a majority of these loans, the collateral also includes the business real estate or the business owner's personal real estate or assets. Commercial and industrial loans present credit exposure to the Company as they are more susceptible to risk of loss during a downturn in the economy, as borrowers may have greater difficulty in meeting their debt service requirements and the value of the collateral may decline. The Company attempts to mitigate this risk through its underwriting standards, including evaluating the credit worthiness of the borrower and to the extent available, credit ratings on the business. Additionally, monitoring of the loans through annual renewals and meetings with the borrowers are common. However, these procedures cannot eliminate the risk of loss associated with commercial and industrial lending.

The Company originates loans to its retail customers, including fixed-rate and adjustable first lien mortgage loans with the underlying 1-4 family owner-occupied residential property securing the credit. The Company s risk exposure is minimized in these types of loans through the evaluation of the credit worthiness of the borrower, including credit scores and debt-to-income ratios, and underwriting standards which limit the loan-to-value ratio to generally no more than 80% upon loan origination, unless the borrower obtains private mortgage insurance.

Home equity loans, including term loans and lines of credit, present a slightly higher risk to the Company than 1-4 family first liens, as these loans can be first or second liens on 1-4 family owner occupied residential property, but can have loan-to-value ratios of no greater than 90% of the value of the real estate taken as collateral. The credit worthiness of the borrower is considered including credit scores and debt-to-income ratios, which generally cannot exceed 38%.

Installment and other loans credit risk are mitigated through the Company s underwriting standards, including the evaluation of the credit worthiness of the borrower, including credit scores and debt-to-income ratios, and if secured, the collateral value of the assets. As these loans can be unsecured or secured by assets the value of which may depreciate quickly or may fluctuate, they present a greater risk to the Company than 1-4 family residential loans.

The loan portfolio, excluding residential loans held for sale, broken out by classes, as of March 31, 2012 and December 31, 2011 was as follows:

	,		December 31,	
(Dollars in thousands)	2012		2011	
Commercial real estate:

Table of Contents

In order to monitor ongoing risk associated with its loan portfolio and specific credits within the segments, management uses an eight point internal grading system. The first four rating categories, representing the lowest risk to the Bank, are combined and given a Pass rating. The Special Mention category includes loans that have potential weaknesses that may, if not monitored or corrected, weaken the asset or inadequately protect the Bank s position at some future date. These assets pose elevated risk, but their weakness does not yet justify a more severe, or criticized rating. Management generally follows regulatory definitions in assigning criticized ratings to loans, including substandard, doubtful or loss. Substandard loans are classified as they have a well-defined weakness, or weaknesses that jeopardize liquidation of the debt. These loans are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Substandard loans include loans that management has determined not to be impaired, as well as loans considered to be impaired. A doubtful loan has a high probability of total or substantial loss, but because of specific pending events that may strengthen the asset; its classification of loss is deferred.

Loss assets are considered uncollectible, as the underlying borrowers are often in bankruptcy, have suspended debt repayments, or ceased business operations. Once a loan is classified as Loss , there is little prospect of collecting the loan s principal or interest and it is generally written off.

The Bank has a loan review policy and program which is designed to reduce and control risk in the lending function. The Credit Administration Committee, comprised of members of the Board, is charged with the overall credit quality and risk exposure of the Company's loan portfolio. This includes the monitoring of the lending activities of all Bank personnel with respect to underwriting and processing new loans and the timely follow-up and corrective action for loans showing signs of deterioration in quality. The loan review program provides the Bank with an internal (through an outsourced third party beginning in 2011), independent review of the Bank's loan portfolio on an ongoing basis. Generally, consumer and residential mortgage loans are included in the Pass categories unless a specific action, such as extended delinquencies, bankruptcy, repossession or death of the borrower occurs, which heightens awareness as to a possible credit event.

Loan reviews are completed annually on all commercial relationships with a committed loan balance in excess of \$1,000,000. Loan review documentation is submitted to the Credit Administration Committee quarterly with a formal review and rating as presented by independent loan review personnel. In addition, all relationships greater than \$250,000 rated Substandard, Doubtful or Loss are reviewed by the Credit Administration Committee on a quarterly basis, with reaffirmation of the rating as recommended by the Bank s Problem Loan Committee or Loan Review staff. In addition to the policy and procedure guidelines noted above, the Company expanded its review coverage during the last three quarters of 2011 in light of softness in overall economic conditions and deterioration of underlying collateral securing lending relationships. As a result, all commercial real estate, construction and development loans, and commercial loans in excess of \$500,000, representing over 75% coverage of these portfolios, have been reviewed. The Company will continue with this expanded review throughout 2012.

- 17 -

The following summarizes the Bank's ratings based on its internal risk rating system as of March 31, 2012 and December 31, 2011:

		Special	Non-	Impaired	In	npaired -

Classified loans may also be evaluated for impairment. For commercial real estate, acquisition and development and commercial and industrial loans, a loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Generally, loans that are more than 90 days past due are assigned a Substandard rating. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower s prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Nonaccrual loans in the commercial and commercial real estate portfolios are, by definition, deemed to be impaired. Impairment is measured on a loan-by-loan basis for commercial, construction and restructured loans by either the present value of the expected future cash flows discounted at the loan s effective interest rate, the loan s obtainable market price, or the fair value of the collateral if the loan is collateral dependent. A loan is collateral dependent if the repayment of the loan is expected to be provided solely by the underlying collateral. For loans that are deemed to be impaired for extended periods of time, periodic updates on fair values are obtained, which may include updated appraisals. The updated fair values will be incorporated into the impairment analysis as of the next reporting period. In the event an updated appraisal that requires a higher impairment reserve is received after a reporting period, but prior to the issuance of the financial statements, an evaluation is made as to the significance of the difference and whether the amounts need to be reflected in the financial statements not yet

Loan charge-offs, which may include, from time-to-time, a partial charge-off, are taken on an impaired loan that is collateral dependent if the loan s carrying balance exceeds its collateral s appraised value; the loan has been identified as uncollectible; and it is deemed to be a confirmed loss. Typically, impaired loans with a charge-off or partial charge-off will continue to be considered impaired, unless the note is split into

- 18 -

Table of Contents

two, and management expects the performing note to continue to perform and is adequately secured. The second, or non-performing note, would be charged-off. As of the periods presented, the Company has no loans to borrowers that resulted from splitting impaired loans into multiple notes. Generally, an impaired loan with a partial charge-off will continue to have an impairment reserve on it after the partial charge-off, if factors warrant.

As of March 31, 2012 and December 31, 2011, nearly all of the Company's impaired loans extent of impairment was measured based on the estimated fair value of the collateral securing the credit, except for certain troubled debt restructurings not in nonaccrual status. By definition, troubled debt restructurings are considered impaired. For real estate loans, collateral generally consists of commercial real estate, but in the case of commercial and industrial loans, it would also consist of accounts receivable, inventory, equipment or other business assets. Commercial and industrial loans may also have real estate collateral.

At the time a real estate-secured loan is deemed impaired, management determines whether an updated certified appraisal of the real estate is necessary to assist in determining the extent of an impairment reserve, if any. The decision for requiring an updated appraisal takes into consideration the age of the most recent appraisal, the loan-to-value ratio based on the original certified appraisal, the Company's recent experience and knowledge of market conditions, recent list prices or broker opinions, the condition of the property, and environmental factors. If market conditions have changed significantly from the date of the most recent appraisal, an updated appraisal will be obtained. As of October 1, 2011, the Company amended its policy, which now requires annual updated appraisals for criticized loans in excess of \$250,000. The as is value provided in the appraisal is often used as the fair value of the collateral in determining impairment, unless circumstances, such as subsequent improvements, approvals, or other circumstances dictate that another value provided by the appraiser is more appropriate.

Generally impaired loans secured by real estate were measured at fair value using certified real estate appraisals that had been completed within the last year. Appraised values are further discounted for estimated costs to sell the property and other selling considerations to arrive at the properties—fair value. In those situations in which it is determined an updated appraisal is not required for loans individually evaluated for impairment, fair values are based on one or a combination of the following approaches. In those situations in which a combination of approaches is considered, the factor that carries the most consideration will be the one management believes is warranted. The approaches are as follows:

Original appraisal - if the original appraisal provides a strong loan-to-value (generally 70% or lower) and, after consideration of market conditions and knowledge of the property and area, it is determined by the Credit Administration staff that there has not been a significant deterioration in the collateral value, the original certified appraised value may be used. Discounts as deemed appropriate for selling costs are factored into the appraised value in arriving at fair value.

Discounted cash flows - In limited cases, discounted cash flows may be used on projects in which the collateral is liquidated to reduce the borrowings outstanding, and is used to validate collateral values derived from other approaches.

Collateral on certain impaired loans is not limited to real estate, and consists of accounts receivable, inventory, equipment or other business assets. Estimated fair values are determined based on borrowers financial statements, inventory ledgers, accounts receivable agings or appraisals from individuals with knowledge in the business. Stated balances are generally discounted for the age of the financial information or the quality of the assets. In determining fair value, liquidation discounts are applied to this collateral based on existing loan evaluation policies.

The Company distinguishes Substandard loans on both an impaired and non-impaired basis, as it places less emphasis on a loan s classification, and increased reliance on whether the loan was performing in accordance with the contractual terms. Substandard classification does not automatically meet the definition of impaired. A Substandard credit is one that is inadequately protected by current sound worth, paying capacity of the obligor or the collateral pledged, if any. Extensions of credit so classified have well-defined weaknesses which may jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Loss potential, while

existing in the aggregate amount of Substandard credits, does not have to exist in individual extensions of credit classified Substandard. As a result, the Company revised its methodology in its evaluation of certain accruing commercial real estate, acquisition and development and commercial and industrial loans rated Substandard to be collectively evaluated for impairment as opposed to evaluating these loans individually for impairment. Although we believe these loans have well defined weaknesses and meet the definition of Substandard, they are generally performing and management has concluded that it is likely it will be able to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement.

Larger groups of smaller balance homogenous loans are collectively evaluated for impairment. Generally, the Bank does not separately identify individual consumer and residential loans for impairment disclosures, unless such loans are the subject of a restructuring agreement due to financial difficulties of the borrower.

The following summarizes impaired loans by class, segregated by those for which a specific allowance was required and those for which a specific allowance was not required as of March 31, 2012 and December 31, 2011. In the first quarter of 2012, the Company began to more aggressively charge off specific reserve allocations on impaired loans rather than to carry related allowances. At December 31, 2011, specific reserves related to anticipated closing costs, additional market discounts on appraisal values and specific reserves identified during periods subsequent to the balance sheet. Allowances established at March 31, 2012 generally pertain to those credits in which an updated appraisal is pending, and the partial charge-off will be recorded when received.
