Letter from the Chairman of the Board & President

Dear Shareholder:

As previously announced, on September 26, 2014, prior to the close of the reporting period, William Bill Gross, PIMCO s former chief investment officer (CIO) and co-founder, resigned from the firm. PIMCO s managing directors elected Daniel Ivascyn to serve as group chief investment officer (Group CIO). In addition, PIMCO appointed Andrew Balls, CIO Global; Mark Kiesel, CIO Global Credit; Virginie Maisonneuve, CIO Global Equities; Scott Mather, CIO U.S. Core Strategies; and Mihir Worah, CIO Real Return and Asset Allocation. As announced by PIMCO on November 3, 2014, Marc Seidner returned to the firm effective November 12, 2014, in a new role as CIO Non-Traditional Strategies and head of Portfolio Management in PIMCO s New York office. Under this leadership structure, Andrew and Mihir have additional managerial responsibility for PIMCO s Portfolio Management group and trade floor activities globally. Andrew oversees portfolio management and trade floor activities in Europe and Asia-Pacific, and Mihir oversees portfolio management and trade floor activities in the U.S. Furthermore, effective as of September 26, 2014, Alfred Murata and Mohit Mittal replaced Mr. Gross as portfolio managers for PIMCO Corporate & Income Strategy Fund (PCN). There have not been any changes to the portfolio management of PIMCO Income Opportunity Fund (each a Fund and together with PCN, the Funds).

Douglas Hodge, PIMCO s chief executive officer, and Jay Jacobs, PIMCO s president, continue to serve as the firm s senior executive leadership team, spearheading PIMCO s business strategy, client service and the firm s operations.

These appointments are a further evolution of the structure that PIMCO established earlier in 2014, reflecting our belief that the best approach for PIMCO s clients and our firm is an investment leadership team of seasoned, highly skilled investors overseeing all areas of PIMCO s investment activities.

During his 43 years at PIMCO, Mr. Gross made great contributions to building the firm and delivering value to PIMCO s clients. Over this period, PIMCO developed into a global asset manager, expanding beyond core fixed income, now encompassing over 2,400 employees across 13 offices, including more than 250 portfolio managers. Mr. Gross was also responsible for starting PIMCO s robust investment process, with a focus on long-term macroeconomic views and bottom-up security selection a process that is well institutionalized and will continue into PIMCO s future.

For the 12-month reporting period ended October 31, 2014:

After several years of positive growth, severe winter weather in parts of the country appeared to be a headwind for the U.S. economy in early 2014. Looking back, gross domestic product (GDP), the value of goods and services produced in the country, the broadest measure of economic activity and the principal indicator of economic performance, expanded at a 3.5% annual pace during the fourth quarter of 2013.

2 PIMCO CLOSED-END FUNDS

According to the U.S. Commerce Department, GDP then contracted at an annual pace of 2.1% during the first quarter of 2014. However, this was a temporary setback, as GDP expanded at a 4.6% annual pace during the second quarter of 2014. This represented the strongest growth rate since the fourth quarter of 2011. According to the Commerce Department s estimate released on November 25, 2014, GDP expanded at an annual pace of 3.9% during the third quarter of 2014.

The Federal Reserve (the Fed) began tapering its monthly asset purchase program in January 2014. At each of its next seven meetings, the Fed announced that it would further taper its asset purchases. Following its meeting in October 2014, the Fed announced that it had concluded its asset purchases.

However, the Fed again indicated that it would not raise interest rates in the near future, saying in October that it likely will be appropriate to maintain the 0 to 1/4 percent target range for the federal funds rate for a considerable time following the end of its asset purchase program this month, especially if projected inflation continues to run below the Committee s 2 percent longer-run goal, and provided that longer-term inflation expectations remain well anchored.

Outlook

PIMCO s 2015 forecast in the U.S. is for a continuation of the economic recovery. With the ongoing assistance of easy monetary policy, combined with healthy private financial sector balance sheets, we believe the U.S. economy is poised to grow between 2.5% and 3.0% in the coming calendar year. We expect to see corporate capital expenditures accelerate on the back of rising pricing power and expected returns on newly invested capital. We expect very gradually rising wages and product prices, which will allow the Fed to maintain its accommodative monetary policy for 2015. Potential wildcards for the economy in both the U.S. and abroad are geopolitical issues in Ukraine, the Middle East and elsewhere.

On the following pages of this PIMCO Closed-End Funds Annual Report, please find specific details regarding investment performance and a discussion of factors that most affected performance of the Funds over the 12-month reporting period ended October 31, 2014.

Thank you for investing with us. We value your trust and will continue to work diligently to meet your investment needs. If you have questions regarding any of your PIMCO Closed-End Funds investments, please contact your financial advisor or call the Funds shareholder servicing agent at (844) 33-PIMCO (844-337-4626). We also invite you to visit our website at pimco.com/investments to learn more about our views and global thought leadership.

Letter from the Chairman of the Board & President (Cont.)

We remain dedicated to serving your investment needs.

Sincerely,

Hans W. Kertess Chairman of the Board of Trustees Peter G. Strelow President; Principal Executive Officer

4 PIMCO CLOSED-END FUNDS

Important Information About the Funds

We believe that bond funds have an important role to play in a well-diversified investment portfolio. It is important to note, however, that in an environment where interest rates trend upward, rising rates would negatively impact the performance of most bond funds, and fixed-income securities held by a Fund are likely to decrease in value. A number of factors can cause interest rates to rise (e.g., central bank monetary policies, inflation rates, general economic conditions, etc.). Accordingly, changes in interest rates can be sudden, and there is no guarantee that Fund Management will anticipate such movement.

As of the date of this report, interest rates in the U.S. are at or near historically low levels. As such, bond funds may currently face an increased exposure to the risks associated with rising interest rates. This is especially true since the Federal Reserve Board has concluded its quantitative easing program. Further, while the U.S. bond market has steadily grown over the past three decades, dealer inventories of corporate bonds have remained relatively stagnant. As a result, there has been a significant reduction in the ability of dealers to make markets in corporate bonds. All of the factors mentioned above, individually or collectively, could lead to increased volatility and/or lower liquidity in the fixed income markets, which could result in increased losses to a Fund. Bond funds and individual bonds with a longer duration (a measure of the sensitivity of a security s price to changes in interest rates) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities or funds with shorter durations. In addition, in the current low interest rate environment, the market price of the Funds common shares may be particularly sensitive to changes in interest rates or the perception that there will be a change in interest rates.

The use of derivatives may subject the Funds to greater volatility than investments in traditional securities. The Funds may use derivative instruments for hedging purposes or as part of an investment strategy. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, call risk, credit risk, management risk and the risk that a Fund could not close out a position when it would be most advantageous to do so. Certain derivative transactions may have a leveraging effect on a Fund. For example, a small investment in a derivative instrument may have a significant impact on a Fund s exposure to interest rates, currency exchange rates or other investments. As a result, a relatively small price movement in a derivative instrument may cause an immediate and substantial loss or gain, which translates into heightened volatility in a Fund s net asset value. A Fund may engage in such transactions regardless of whether the Fund owns the asset, instrument or components of the index underlying a derivative instrument. A Fund may invest a significant portion of its assets in these types of instruments. If it does, a Fund s investment exposure could far exceed the value of its portfolio securities and its investment performance could be primarily dependent upon securities it does not directly own.

A Fund s use of leverage creates the opportunity for increased income for the Fund s common shareholders, but also creates special risks. Leverage is a speculative technique that may expose a Fund to greater risk and increased costs. If shorter-term interest rates rise relative to the rate of return on a Fund s portfolio, the interest and other costs to the Fund of leverage could exceed the rate of return on the debt obligations and other investments held by the Fund, thereby reducing return to the Fund s common shareholders. In addition, fees and expenses of any form of leverage used by a Fund will be borne entirely by its common shareholders (and not by preferred shareholders, if any) and will reduce the investment return of the Fund s common shares. There can be no assurance that a Fund s use of leverage will result in a higher yield on its common shares, and it may result in losses. Leverage creates several major types of risks for a Fund s common shareholders,

Important Information About the Funds (Cont.)

including: (1) the likelihood of greater volatility of net asset value and market price of the Fund s common shares, and of the investment return to the Fund s common shareholders, than a comparable portfolio without leverage; (2) the possibility either that the Fund s common share dividends will fall if the interest and other costs of leverage rise, or that dividends paid on the Fund s common shares will fluctuate because such costs vary over time; and (3) the effects of leverage in a declining market or a rising interest rate environment, as leverage is likely to cause a greater decline in the net asset value of the Fund s common shares than if the Fund were not leveraged and may result in a greater decline in the market value of the Fund s common shares.

A Fund s investments in and exposure to foreign securities involve special risks. For example, the value of these investments may decline in response to unfavorable political and legal developments, unreliable or untimely information or economic and financial instability. Foreign securities may experience more rapid and extreme changes in value than investments in securities of U.S. issuers. The securities markets of certain foreign countries are relatively small, with a limited number of companies representing a small number of industries. Issuers of foreign securities are usually not subject to the same degree of regulation as U.S. issuers. Reporting, accounting, auditing and custody standards of foreign countries differ, in some cases significantly, from U.S. standards. Also, nationalization, expropriation or other confiscation, a Fund could lose its entire investment in foreign securities. In the event of nationalization, expropriation or other confiscation, a Fund could lose its entire investment in foreign securities. Risks associated with investing in foreign securities may be increased when a Fund invests in emerging markets. For example, if a Fund invests in emerging market debt, it may face increased exposure to interest rate, liquidity, volatility, and redemption risk due to the specific economic, political, geographical, or legal background of the emerging market.

Investments in loans are generally subject to risks similar to those of investments in other types of debt obligations, including, among others, credit risk, interest rate risk, variable and floating rate securities risk, and, as applicable, risks associated with mortgage-related securities. In addition, in many cases loans are subject to the risks associated with below-investment grade securities. In the case of a loan participation or assignment, a Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Fund may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement. In the event of the insolvency of the lender selling a loan participation, a Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. The Funds may be subject to heightened or additional risks and potential liabilities and costs by investing in mezzanine and other subordinated loans or acting as an originator of loans, including those arising under bankruptcy, fraudulent conveyance, equitable subordination, lender liability, environmental and other laws and regulations, and risks and costs associated with debt servicing and taking foreclosure actions associated with he loans. To the extent that a Fund originates a loan, it may be responsible for all or a substantial portion of the expenses associated with initiating the loan, irrespective of whether the loan transaction is ultimately consummated or closed. This may include significant legal and due diligence expenses, which will be indirectly borne by the Fund and its shareholders.

Mortgage-related and other asset-backed securities often involve risks that are different from or more acute than risks associated with other types of debt instruments. Generally, rising interest rates tend to extend the duration of fixed rate mortgage-related securities, making them more sensitive to

6 PIMCO CLOSED-END FUNDS

changes in interest rates. As a result, in a period of rising interest rates, if a Fund holds mortgage-related securities, it may experience additional volatility since individual mortgage holders are less likely to exercise prepayment options, thereby putting additional downward pressure on the value of these securities and potentially causing the Fund to lose money. This is known as extension risk. Mortgage-backed securities can be highly sensitive to rising interest rates, such that even small movements can cause an investing Fund to lose value. Mortgage-backed securities, and in particular those not backed by a government guarantee, are subject to credit risk. In addition, adjustable and fixed rate mortgage-related securities are subject to prepayment risk. When interest rates decline, borrowers may pay off their mortgages sooner than expected. This can reduce the returns of the Funds because the Funds may have to reinvest that money at the lower prevailing interest rates. The Funds investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets. Payment of principal and interest on asset-backed securities may be largely dependent upon the cash flows generated by the assets backing the securities, and asset-backed securities may not have the benefit of any security interest in the related assets.

High-yield bonds (commonly referred to as junk bonds) typically have a lower credit rating than other bonds. Lower-rated bonds generally involve a greater risk to principal than higher-rated bonds. Further, markets for lower-rated bonds are typically less liquid than for higher-rated bonds, and public information is usually less abundant in such markets. Thus, high yield investments increase the chance that a Fund will lose money on its investment. The Funds may hold defaulted securities that may involve special considerations including bankruptcy proceedings, other regulatory and legal restrictions affecting the Funds ability to trade, and the availability of prices from independent pricing services or dealer quotations. Defaulted securities are often illiquid and may not be actively traded. Sale of securities in bankrupt companies at an acceptable price may be difficult and differences compared to the value of the securities used by the Funds could be material.

Certain Funds may invest in securities and instruments that are economically tied to Russia. Investments in Russia are subject to political, economic, legal, market and currency risks, as well as the risk of economic sanctions imposed by the United States and/or other countries. Such sanctions which may impact companies in many sectors, including energy, financial services and defense, among others may negatively impact a Fund s performance and/or ability to achieve its investment objective. For example, certain transactions may be prohibited and/or existing investments may become illiquid (e.g., in the event that transacting in certain existing investments is prohibited).

The common shares of the Funds trade on the New York Stock Exchange. As with any stock, the price of a Fund s common shares will fluctuate with market conditions and other factors. If you sell your common shares of a Fund, the price received may be more or less than your original investment. Shares of closed-end management investment companies frequently trade at a discount from their net asset value. The common shares of a Fund may trade at a price that is less than the initial offering price and/or the net asset value of such shares.

The Funds may be subject to various risks in addition to those described above. Some of these risks may include, but are not limited to, the following: asset allocation risk, credit risk, stressed securities risk, distressed and defaulted securities risk, corporate bond risk, market risk, issuer risk, liquidity risk, equity securities and related market risk, mortgage-related and other asset-backed securities

Important Information About the Funds (Cont.)

risk, extension risk, prepayment risk, privately issued mortgage-related securities risk, mortgage market/subprime risk, foreign (non-U.S.) investment risk, emerging markets risk, currency risk, redenomination risk, non-diversification risk, management risk, municipal bond risk, inflation-indexed security risk, senior debt risk, loans, participations and assignments risk, reinvestment risk, real estate risk, U.S. Government securities risk, foreign (non-U.S.) government securities risk, valuation risk, segregation and cover risk, focused investment risk, credit default swaps risk, event-linked securities risk, counterparty risk, preferred securities risk, confidential information access risk, other investment companies risk, private placements risk, inflation/deflation risk, regulatory risk, tax risk, recent economic conditions risk, securities lending risk, zero-coupon bond and payment-in-kind securities risk, portfolio turnover risk, smaller company risk, short sale risk and convertible securities risk. A description of certain of these risks is available in the Notes to Financial Statements of this Report.

The geographical classification of foreign securities in this report are classified by the country of incorporation of a holding. In certain instances, a security s country of incorporation may be different from its country of economic exposure.

On each individual Fund Summary page in this Shareholder Report the Common Share Average Annual Total Return table and Common Share Cumulative Returns (if applicable) measure performance assuming that all dividend and capital gain distributions were reinvested. Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions. Total return for a period of more than one year represents the average annual total return. Performance at market price will differ from results at NAV. Although market price returns tend to reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about a Fund, market conditions, supply and demand for the Fund s shares, or changes in the Fund s dividends. Performance shown is net of fees and expenses.

The following table discloses the commencement of operations of each Fund:

Fund Name	Commencement of Operations
	of Operations 12/21/01
PIMCO Corporate & Income Strategy Fund	
PIMCO Income Opportunity Fund	11/30/07

An investment in a Fund is not a deposit of a bank and is not guaranteed or insured by the Federal Deposit Insurance Corporation or any other government agency. It is possible to lose money on investments in the Funds.

PIMCO has adopted written proxy voting policies and procedures (Proxy Policy) as required by Rule 206(4)-6 under the Investment Advisers Act of 1940. The Proxy Policy has been adopted by the Funds as the policies and procedures that PIMCO will use when voting proxies on behalf of the Funds. A description of the policies and procedures that PIMCO uses to vote proxies relating to portfolio securities of each Fund, and information about how each Fund voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, are available without charge, upon request, by calling the Funds at (844) 33-PIMCO (844-337-4626), on the Funds website at www.pimcofunds.com/closedendfunds, and on the Securities and Exchange Commission s (SEC) website at http://www.sec.gov.

8 PIMCO CLOSED-END FUNDS

Each Fund files a complete schedule of its portfolio holdings with the SEC for the first and third quarters of its fiscal year on Form N-Q. A copy of each Fund s Form N-Q is available on the SEC s website at http://www.sec.gov and may be reviewed and copied at the SEC s Public Reference Room in Washington, D.C., and is available without charge, upon request by calling the Funds at (844) 33-PIMCO (844-337-4626) and on the Funds website at www.pimco.com/closedendfunds. Updated portfolio holdings information about a Fund will be available at www.pimco.com/investments approximately 15 calendar days after such Fund s most recent fiscal quarter end, and will remain accessible until such Fund files a Form N-Q or a shareholder report for the period which includes the date of the information. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

- (1) Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and the principal value of an investment will fluctuate. Total return, market price, NAV, market price distribution yield, and NAV distribution yield will fluctuate with changes in market conditions. For performance current to the most recent month-end, visit www.pimco.com/investments or call (844) 33-PIMCO.
- (2) Distribution yields are not performance and are calculated by annualizing the most recent distribution per share and dividing by the NAV or Market Price, as applicable, as of the reported date. Distributions may be comprised of ordinary income, net capital gains, and/or a return of capital (ROC) of your investment in the Fund. Because the distribution rate may include a ROC, it should not be confused with yield or income. If the Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. Please refer to the most recent Section 19 Notice, if applicable, for additional information regarding the composition of distributions. Please visit www.pimco.com for most recent Section 19 Notice, if applicable. Final determination of a distribution s tax character will be made on Form 1099 DIV sent to shareholders each January.
- (3) Represents regulatory leverage outstanding, as a percentage of total managed assets. Regulatory leverage may include preferred shares, tender option bond transactions, reverse repurchase agreements, and other borrowings (collectively Leverage). Total managed assets refer to total assets (including assets attributable to Leverage that may be outstanding) minus accrued liabilities (other than liabilities representing Leverage).

10 PIMCO CLOSED-END FUNDS

Portfolio Insights

- The overall fixed income market generated a positive return during the reporting period. The fixed income market was volatile at times as investor sentiment was impacted by incoming economic data, changing expectations regarding future monetary policy and a number of geopolitical issues. All considered, longer-term U.S. Treasury yields declined during the 12-month period, with the yield on the benchmark 10-year Treasury bond falling from 2.57% to 2.35%. Compared to the 4.14% return for the overall U.S. fixed income market (as measured by the Barclays U.S. Aggregate Bond Index), investment grade and high yield corporate bonds returned 6.24% and 5.82%, respectively (as measured by the Barclays U.S. Credit and Barclays U.S. Corporate High Yield Indexes), for the 12 months ended October 31, 2014. Among investment grade quality credits, lower-quality tiers outperformed with AAA-, AA-, and BBB-rated issues, returning 2.54%, 5.42%, 5.94% and 7.62%, respectively, as measured by the Barclays U.S. Credit Index. In contrast, higher-rated high yield credits outperformed, with BB-rated issues returning 7.18%, versus 5.17% for B-rated issues, as measured by the Barclays U.S. Corporate High Yield Index.
- The Fund benefited most from its allocation to nonagency mortgage-backed securities as an improving U.S. housing market, driven by continued recovery in home prices as well as favorable demand relative to supply, supported the sector. Specifically, attractive levels of coupon, coupled with a substantial allocation to this sector, resulted in a large positive contribution to return. Another substantial contributor to performance came from the Fund s allocation to municipal bonds during the reporting period. The sector benefited from both attractive current coupon as well as increases in bond prices, supported by continued economic recovery in the United States and, subsequently, higher local tax revenues. Lastly, the Fund s exposure to corporate credit, specifically to the banking and automotive sectors, contributed to results, driven primarily by attractive current coupons.
- » The Fund s exposure to Brazilian interest rates detracted from returns as local interest rates rose during the period following higher-than-expected inflation reports and market concerns about future higher inflation following Dilma Rousseff s re-election as president. There were no additional material detractors from results during the period.

- The Fund benefited most from its allocation to non-agency mortgage-backed securities as an improving U.S. housing market, driven by continued recovery in home prices as well as favorable demand relative to supply, supported the sector. Specifically, attractive levels of coupon, coupled with a substantial allocation to this sector, resulted in a large positive contribution to return. The Fund s exposure to bank capital via investments into junior parts of the capital structure enhanced its results as these performed well given continued improvement in fundamentals and broad deleveraging imposed by regulators. The Fund s exposure to high yield corporate bonds benefited the Fund s performance as those bonds offered attractive coupon. Specifically, energy pipeline, gambling and media issuers offered the largest contribution to returns. The Fund s smaller exposure to taxable municipal bonds was modestly positive for performance.
- » An allocation to emerging markets credits was additive for results, with Brazilian and Russian quasi-sovereign credits being the largest contributors. However, exposure to Brazilian interest rates detracted from returns as local interest rates rose during the period following higher-than-expected inflation reports and market concerns about future higher inflation following Dilma Rousseff s re-election as president.

^ Reflects an amount rounding to less than \$0.005.

^(a) Per share amounts based on average number of common shares outstanding during the year.

^(b) Total investment return is calculated assuming a purchase of a common share at the market price on the first day and a sale of a common share at the market price on the last day of each year reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund s dividend reinvestment plan. Total investment return does not reflect brokerage commissions in connection with the purchase or sale of Fund shares.

^(c) Calculated on the basis of income and expenses applicable to both common and preferred shares relative to the average net assets of common shareholders. ^(d) Interest expense primarily relates to participation in reverse repurchase agreement transactions.

Statement of Cash Flows

Year Ended October 31, 2014

(Amounts in thousands)	Ir Opp	MCO acome ortunity Fund
Cash flows (used for) operating activities:		
Net increase in net assets resulting from operations	\$	38,722
Adjustments to reconcile net increase in net assets from operations to net cash (used for) operating activities:		
Purchases of long-term securities	· · · · · · · · · · · · · · · · · · ·	,387,264)
Proceeds from sales of long-term securities	1	,272,496
Proceeds from sales of short-term portfolio investments, net		(7,667)
(Increase) in deposits with counterparty		(1,967)
Decrease in receivable for investments sold		151,417
(Increase) in interest and dividends receivable		(2,164)
(Increase) in exchange-traded or centrally cleared derivatives		(6,937)
(Increase) in over the counter derivatives		(1,801)
(Increase) in other assets		(6)
(Decrease) in payable for investments purchased		(207,171)
Increase in deposits from counterparty		277
Increase in accrued management fees		229
(Payments on) currency transactions		(721)
(Decrease) in other liabilities		(84)
Net Realized (Gain) Loss		
Investments in securities		(15,279)
Exchange-traded or centrally cleared financial derivative instruments		(3,201)
Over the counter financial derivative instruments		(560)
Foreign currency		615
Net Change in Unrealized (Appreciation) Depreciation		
Investments in securities		14,479
Exchange-traded or centrally cleared financial derivative instruments		9,815
Over the counter financial derivative instruments		(3,839)
Foreign currency assets and liabilities		(285)
Net amortization (accretion) on investments		(3,517)
Net cash (used for) operating activities		(154,413)
Cash flows received from financing activities:		
Increase in overdraft due to custodian		1,855
Cash dividend paid*		(40,636)
Proceeds from reverse repurchase agreements	1	,566,271
Payments on reverse repurchase agreements		,373,980)
Proceeds from deposits from counterparty	(1	9,531
Payments on deposits from counterparty		(8,536)
Net cash received from financing activities		154,505
Net Increase in Cash and Foreign Currency		92
Cash and Foreign Currency:		
Beginning of year		851
End of year	\$	943
* Reinvestment of dividends	\$	2,321
Supplemental disclosure of cash flow information:		
Interest expense paid during the year	\$	1,410

						\$	(18)	\$ 46	\$ 28	\$	0

(1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(2) Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate issues as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity s credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

⁽³⁾The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
