### x Quarterly Report Pursuant To Section 13 or 15(d) of the Securities Exchange Act of 1934 FOR THE QUARTERLY PERIOD ENDED MARCH 31, 2015

OR

" Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 For the transition period from \_\_\_\_\_\_ to \_\_\_\_\_

	Exact name of registrant as specified in its charter		
Commission File Number 1-14514	and principal office address and telephone number Consolidated Edison, Inc.	State of Incorporation New York	I.R.S. Employer ID. Number 13-3965100
	4 Irving Place, New York, New York 10003 (212) 460-4600		
1-1217	<b>Consolidated Edison Company of New York, Inc.</b> 4 Irving Place, New York, New York 10003 (212) 460-4600	New York	13-5009340

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Consolidated Edison, Inc. (Con Edison)	Yes x	No "
Consolidated Edison Company of New York, Inc. (CECONY)	Yes x	No "

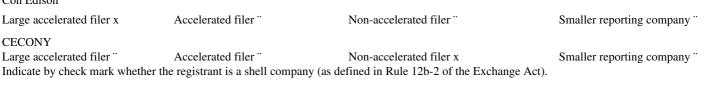

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Con Edison	Yes x	No "
CECONY	Yes x	No "

# Edgar Filing: CONSOLIDATED EDISON INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Con Edison

Con Edison Yes " No x CECONY Yes " No x As of April 30, 2015, Con Edison had outstanding 292,877,149 Common Shares (\$.10 par value). All of the outstanding common equity of CECONY is held by Con Edison.

#### **Filing Format**

This Quarterly Report on Form 10-Q is a combined report being filed separately by two different registrants: Consolidated Edison, Inc. (Con Edison) and Consolidated Edison Company of New York, Inc. (CECONY). CECONY is a wholly-owned subsidiary of Con Edison and, as such, the information in this report about CECONY also applies to Con Edison. As used in this report, the term the Companies refers to Con Edison and CECONY. However, CECONY makes no representation as to the information contained in this report relating to Con Edison or the subsidiaries of Con Edison other than itself.

# **Glossary of Terms**

The following is a glossary of abbreviations or acronyms that are used in the Companies SEC reports:

Con Edison Companies	
Con Edison	Consolidated Edison, Inc.
CECONY	Consolidated Edison Company of New York, Inc.
Con Edison Development	Consolidated Edison Development, Inc.
Con Edison Energy	Consolidated Edison Energy, Inc.
Con Edison Solutions	Consolidated Edison Solutions, Inc.
Con Edison Transmission	Consolidated Edison Transmission, LLC
O&R	Orange and Rockland Utilities, Inc.
Pike	Pike County Light & Power Company
RECO	Rockland Electric Company
The Companies	Con Edison and CECONY
The Utilities	CECONY and O&R
<b>Regulatory Agencies, Governm</b>	nent Agencies, and Quasi-governmental Not-for-Profits
EPA	U. S. Environmental Protection Agency
FERC	Federal Energy Regulatory Commission

## FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements intended to qualify for the safe-harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are statements of future expectation and not facts. Words such as forecasts, expects, estimates, anticipates, intends, believes, plans, will and similar express forward-looking statements. Forward-looking statements are based on information available at the time the statements are made, and accordingly speak only as of that time. Actual results or developments might differ materially from those included in the forward-looking statements because of various factors including:

the Companies are extensively regulated and are subject to penalties;

the Utilities rate plans may not provide a reasonable return;

the Companies may be adversely affected by changes to the Utilities rate plans;

the intentional misconduct of employees or contractors could adversely affect the Companies;

the failure of, or damage to, the Companies facilities could adversely affect the Companies;

a cyber attack could adversely affect the Companies;

the Companies are exposed to risks from the environmental consequences of their operations;

a disruption in the wholesale energy markets or failure by an energy supplier could adversely affect the Companies;

the Companies have substantial unfunded pension and other postretirement benefit liabilities;

Con Edison s ability to pay dividends or interest depends on dividends from its subsidiaries;

the Companies require access to capital markets to satisfy funding requirements;

the Companies strategies may not be effective to address changes in the external business environment; and

the Companies also face other risks that are beyond their control.

### NOTES TO THE FINANCIAL STATEMENTS (UNAUDITED)

#### General

These combined notes accompany and form an integral part of the separate consolidated financial statements of each of the two separate registrants: Consolidated Edison, Inc. and its subsidiaries (Con Edison) and Consolidated Edison Company of New York, Inc. and its subsidiaries (CECONY). CECONY is a subsidiary of Con Edison and as such its financial condition and results of operations and cash flows, which are presented separately in the CECONY consolidated financial statements, are also consolidated, along with those of Con Edison s other utility subsidiary, Orange and Rockland Utilities, Inc. (O&R) and Con Edison s competitive energy businesses (discussed below) in Con Edison s consolidated financial statements. The term Utilities is used in these notes to refer to CECONY and O&R.

As used in these notes, the term Companies refers to Con Edison and CECONY and, except as otherwise noted, the information in these combined notes relates to each of the Companies. However, CECONY makes no representation as to information relating to Con Edison or the subsidiaries of Con Edison other than itself.

The separate interim consolidated financial statements of each of the Companies are unaudited but, in the opinion of their respective managements, reflect all adjustments (which include only normally recurring adjustments) necessary for a fair presentation of the results for the interim periods presented. The Companies separate interim consolidated financial statements should be read together with their separate audited financial statements (including the combined notes thereto) included in Item 8 of their combined Annual Report on Form 10-K for the year ended December 31, 2014.

Con Edison has two regulated utility subsidiaries: CECONY and O&R. CECONY provides electric service and gas service in New York City and Westchester County. The company also provides steam service in parts of Manhattan. O&R, along with its regulated utility subsidiaries, provides electric service in southeastern New York and adjacent areas of northern New Jersey and eastern Pennsylvania and gas service in southeastern New York and adjacent areas of eastern Pennsylvania. Con Edison has the following competitive energy businesses: Consolidated Edison Solutions, Inc. (Con Edison Solutions), a company which sells to retail customers electricity purchased in wholesale markets, enters into related hedging transactions and also provides energy-related products and services to retail customers; Consolidated Edison Energy, Inc. (Con Edison Energy), a company that provides energy-related products and services to wholesale customers; and Consolidated Edison Development, Inc. (Con Edison Development), a company that develops, owns and operates renewable and energy infrastructure projects. In addition, in 2014 Con Edison formed Consolidated Edison Transmission LLC (Con Edison Transmission) to invest in a transmission company. See information about Con Edison Transmission under Guarantees in Note H.

Note A Summary of Significant Accounting Policies

#### **Earnings Per Common Share**

For the three months ended March 31, 2015 and 2014, basic and diluted earnings per share (EPS) for Con Edison are calculated as follows:

(Millions of Dollars, except per share amounts/Shares in Millions)	2015	2014
Net income for common stock	\$370	\$361
Weighted average common shares outstanding basic	292.9	292.9
Add: Incremental shares attributable to effect of potentially dilutive securities	1.0	1.2
Adjusted weighted average common shares outstanding diluted	293.9	294.1
Net Income for common stock per common share basic	\$1.26	\$1.23
Net Income for common stock per common share diluted	\$1.26	\$1.23
The computation of diluted EPS for the three months ended March 31, 2015 and 2014 exclude immaterial amounts of perform	nance shar	re awards

The computation of diluted EPS for the three months ended March 31, 2015 and 2014 exclude immaterial amounts of performance share awards that were not included because of their anti-dilutive effect.

#### Changes in Accumulated Other Comprehensive Income/(Loss) by Component

For the three months ended March 31, 2015 and 2014, changes to accumulated other comprehensive income/(loss) (OCI) for Con Edison and CECONY are as follows:

	Con E	dison	CECO	ONY
(Millions of Dollars)	2015	2014	2015	2014
Beginning balance, accumulated OCI, net of taxes (b)	\$(45)	\$(25)	\$(11)	\$(6)
OCI before reclassifications, net of tax of \$(2) and \$(1) in 2015 and 2014, respectively, for Con Edison	3	2		
Amounts reclassified from accumulated OCI related to pension plan liabilities, net of tax of \$(1) and \$(1) in 2015 and				
2014, respectively, for Con Edison (a)(b)	2	2		1
Current Period OCI, net of taxes	5	4		1
Ending balance, accumulated OCI, net of taxes	\$(40)	\$(21)	\$(11)	\$(5)

(a) For the portion of unrecognized pension and other postretirement benefit costs relating to the regulated Utilities, costs are recorded into, and amortized out of, regulatory assets instead of OCI. The net actuarial losses and prior service costs recognized during the period are included in the computation of net periodic pension and other postretirement benefit cost. See Notes E and F.

(b) Tax reclassified from accumulated OCI is reported in the income tax expense line item of the income statement.

Note B Regulatory Matters

#### **Rate Plans**

#### **CECONY** Electric

On April 20, 2015, CECONY entered into a Joint Proposal with the staff of the New York State Public Service Commission (NYSPSC) and other parties for the extension of CECONY s current electric rate plan for an additional year through 2016. Under the Joint Proposal, which is subject to NYSPSC approval, the rate plan for 2016 does not include a rate increase or decrease. The rate plan for 2016 includes additional revenues from the amortization to income of net regulatory liabilities. The following table contains a summary of the rate plan for 2016:

Effective period	January 2016 December 2016
Base rate changes	None (a)
Amortizations to income of net regulatory (assets) liabilities	Additional \$123 million of net regulatory liabilities (b)
Other revenue sources	Continued retention of \$90 million of annual transmission congestion revenues
Revenue decoupling mechanism	Continued reconciliation of actual electric delivery revenues to those authorized in the rate plan
Recoverable energy costs	Continued current rate recovery of purchased power and fuel costs
Negative revenue adjustments	Continued potential for penalties of up to \$400 million if certain performance targets are not met
Cost reconciliations	Continued reconciliation of expenses for pension and other postretirement benefits, variable-rate tax-exempt debt, major storms, property taxes (c), municipal infrastructure support, the impact of new laws and environmental remediation to amounts reflected in rates
Net utility plant reconciliations	Target levels reflected in rates are as follows:
	Transmission and distribution: \$17,929 million
	Storm hardening: \$268 million
	Other: \$2,069 million
Average rate base	\$18,282 million
Weighted average cost of capital (after-tax)	6.91 percent
Authorized return on common equity	9.0 percent
Earnings sharing	Most earnings above an annual earnings threshold of 9.6 percent are to be applied to reduce regulatory assets for environmental remediation and other costs
Cost of long-term debt	5.09 percent
Common equity ratio	48 percent
common equity rado	TO POLOUIL

(a) The impact of 2014 and 2015 base rate changes under the current electric rate plan will continue to be deferred. \$249 million of annual revenues collected from electric customers will continue to be subject to potential refund following NYSPSC staff review of certain costs. Revenues will continue to include \$21 million as funding for major storm reserve.

(b) The Joint Proposal also provides for continued annual amortization of \$107 million of the regulatory asset for deferred Superstorm Sandy and other major storm costs and recommends that the costs recoverable from customers be reduced by \$4 million, the costs no longer be subject to NYSPSC staff review and the recovery of the costs no longer be subject to refund.

(c) Deferrals for property taxes will continue to be limited to 90 percent of the difference from amounts reflected in rates, subject to an annual maximum for the remaining difference of not more than a 10 basis point impact on return on common equity.

#### O&R New York Electric and Gas

In March 2015, in O&R s electric and gas rate proceedings, NYSPSC staff recommended a \$0.6 million decrease in O&R s electric rates and a \$14.7 million increase in its gas rates (reflecting an authorized return on common equity of 8.5 percent). In April 2015, O&R submitted updated requests to the NYSPSC for increases in its electric and gas rates of \$34 million and \$44.2 million, respectively (reflecting an authorized return

## Edgar Filing: CONSOLIDATED EDISON INC - Form 10-Q

on common equity of 9.75 percent).

### **Other Regulatory Matters**

In February 2009, the NYSPSC commenced a proceeding to examine the prudence of certain CECONY expenditures following the arrests of employees for accepting illegal payments from a construction contractor. Subsequently, additional employees were arrested for accepting illegal payments from materials suppliers and an engineering firm. The arrested employees were terminated by the company and have pled guilty or been convicted. Pursuant to NYSPSC orders, a portion of the company s revenues

(currently, \$249 million, \$32 million and \$6 million on an annual basis for electric, gas and steam service, respectively) is being collected subject to potential refund to customers. The amount of electric revenues collected subject to refund, which was established in a different proceeding, and the amount of gas and steam revenues collected subject to refund were not established as indicative of the company s potential liability in this proceeding. At March 31, 2015, the company had collected an estimated \$1,747 million from customers subject to potential refund in connection with this proceeding. In January 2013, a NYSPSC consultant reported its estimate, with which the company does not agree, of \$208 million of overcharges with respect to a substantial portion of the company s construction expenditures from January 2000 to January 2009. The company is disputing the consultant s estimate, including its determinations as to overcharges regarding specific construction expenditures during this period. The NYSPSC s consultant has not reviewed the company s other expenditures. The company and NYSPSC staff are exploring a settlement in this proceeding. In May 2014, the NYSPSC s Chief Administrative Law Judge appointed a settlement judge to assist the parties. There is no assurance that there will be a settlement, and any settlement would be subject to NYSPSC approval. At March 31, 2015, the company had a \$104 million regulatory liability relating to this matter. The company currently estimates that any additional amount the NYSPSC consultant s \$208 million estimate of overcharges.

In late October 2012, Superstorm Sandy caused extensive damage to the Utilities electric distribution system and interrupted service to approximately 1.4 million customers. Superstorm Sandy also damaged CECONY s steam system and interrupted service to many of its steam customers. As of March 31, 2015, CECONY and O&R incurred response and restoration costs for Superstorm Sandy of \$506 million and \$91 million, respectively (including capital expenditures of \$148 million and \$15 million, respectively). Most of the costs that were not capitalized were deferred for recovery as a regulatory asset under the Utilities electric rate plans. See Regulatory Assets and Liabilities below. CECONY s current electric rate plan includes collection from customers of deferred storm costs (including for Superstorm Sandy), subject to refund following NYSPSC review of the costs. Pursuant to the April 2015 Joint Proposal with respect to CECONY s electric rates, which is subject to NYSPSC approval, the deferred storm costs will no longer be subject to refund. As part of its rate filing, in November 2014 O&R requested recovery of deferred storm costs for its New York electric operations, which are subject to NYSPSC review. RECO s current electric rate plan includes collection from customers of subjects.

In June 2014, the NYSPSC initiated a proceeding to investigate the practices of qualifying persons to perform plastic fusions on gas facilities. New York State regulations require gas utilities to qualify and, except in certain circumstances, annually requalify workers that perform fusion to join plastic pipe. The NYSPSC directed the New York gas utilities to provide information in this proceeding about their compliance with the qualification and requalification requirements and related matters; their procedures for compliance with all gas safety regulations; and their annual chief executive officer certifications regarding these and other procedures. CECONY s qualification and requalified certain workers that had been qualified under their respective procedures to perform fusion to join plastic pipe. CECONY and O&R have requalified their workers who perform plastic pipe fusions. In April 2015, the NYSPSC issued a notice seeking the sampling plans CECONY, O&R and other gas utilities intend to use to inspect and test plastic pipe fusions. The notice also included NYSPSC staff proposals to require these utilities to perform remediation plans, additional leakage surveying and reporting; to require CECONY to hire an independent statistician to develop a risk assessment and remediation plan; and for certain new plastic fusion requirements for gas utilities.

### **Regulatory Assets and Liabilities**

Regulatory assets and liabilities at March 31, 2015 and December 31, 2014 were comprised of the following items:

Regulatory assets         \$ 4,593         \$ 4,543         \$ 4,540         \$ 4,543         \$ 4,609           Future income tax         2,289         2,273         \$ 2,180         \$ 2,600           Environmental remediation costs         911         925         \$ 808         \$ 820           Deferred storm costs         287         319         1916         \$ 223           Revenue taxes         223         219         211         208           Surcharge for New York State assessment         96         99         90         92           Pension and other postretirement benefits deferrals         61         66         53         42           Pension and other postretirement benefits deferrals         58         63         53         653           Unamorized loss on reacquired debt         56         57         53         55           Deferred derivitive losses noncurrent         440         36         77         77           OKR property taxe reconciliation         40         36         77         77         77           Recoverable energy costs noncurrent         206         9,156         8,251         8,481         2167           Deferred derivalive losses corrent         27         77         77		Con	Con Edison		CECONY

#### Note C Capitalization

The carrying amounts and fair values of long-term debt at March 31, 2015 and December 31, 2014 are:

(Millions of Dollars)	201	15	201	4
	Carrying		Carrying	
		Fair		Fair
Long-Term Debt (including current portion)	Amount	Value	Amount	Value
Con Edison	\$12,190	\$14,224	\$12,191	\$13,998
CECONY	\$11,214	\$13,066	\$11,214	\$12,846

Fair values of long-term debt have been estimated primarily using available market information. For Con Edison, \$13,588 million and \$636 million of the fair value of long-term debt at March 31, 2015 are classified as Level 2 and Level 3, respectively. For CECONY, \$12,430 million and \$636 million of the fair value of long-term debt at March 31, 2015 are classified as Level 2 and Level 3, respectively (see Note L). The \$636 million of long-term debt classified as Level 3 is CECONY s tax-exempt, auction-rate securities for which the market is highly illiquid and there is a lack of observable inputs.

#### Note D Short-Term Borrowing

At March 31, 2015, Con Edison had \$519 million of commercial paper outstanding of which \$268 million was outstanding under CECONY s program. The weighted average interest rate at March 31, 2015 was 0.5 percent for both Con Edison and CECONY. At December 31, 2014, Con Edison had \$800 million of commercial paper outstanding of which \$450 million was outstanding under CECONY s program. The weighted average interest rate at December 31, 2014 was 0.4 percent for both Con Edison and CECONY.

At March 31, 2015 and December 31, 2014, no loans were outstanding under the credit agreement (Credit Agreement) and \$61 million (including \$11 million for CECONY) and \$11 million (including \$11 million for CECONY), respectively, of letters of credit were outstanding under the Credit Agreement.

#### Note E Pension Benefits

#### **Total Periodic Benefit Cost**

The components of the Companies total periodic benefit costs for the three months ended March 31, 2015 and 2014 were as follows:

	Con E	dison	CEC	ONY
(Millions of Dollars)	2015	2014	2015	2014
Service cost including administrative expenses	\$ 74	\$ 57	\$ 70	\$ 53
Interest cost on projected benefit obligation	144	143	135	134
Expected return on plan assets	(222)	(208)	(210)	(197)
Recognition of net actuarial loss	194	154	183	146
Recognition of prior service costs	1	1		1
TOTAL PERIODIC BENEFIT COST	\$ 191	\$ 147	\$ 178	\$ 137
Cost capitalized	(68)	(51)	(65)	(49)
Reconciliation to rate level	(24)	26	(24)	23
Cost charged to operating expenses	\$ 99	\$ 122	\$ 89	\$ 111

#### **Expected Contributions**

# Edgar Filing: CONSOLIDATED EDISON INC - Form 10-Q

Based on estimates as of March 31, 2015, the Companies expect to make contributions to the pension plans during 2015 of \$750 million (of which \$697 million is to be contributed by CECONY) and \$16 million to the CECONY external trust for supplemental retirement plans. The Companies policy is to fund the total periodic benefit cost of the qualified plan to the extent tax deductible and to also contribute to the non-qualified plans. During the first quarter of 2015, the Companies contributed \$204 million to the pension plans, nearly all of which was contributed by CECONY.

Note F Other Postretirement Benefits

#### **Total Periodic Benefit Cost**

The components of the Companies total periodic other postretirement benefit costs for the three months ended March 31, 2015 and 2014 were as follows:

	Con E	dison	CEC	ONY
(Millions of Dollars)	2015	2014	2015	2014
Service cost	\$ 5	\$ 5	\$4	\$ 4
Interest cost on accumulated other postretirement benefit obligation	13	15	11	13
Expected return on plan assets	(20)	(19)	(17)	(17)
Recognition of net actuarial loss	8	14	7	13
Recognition of prior service cost	(5)	(5)	(4)	(4)
TOTAL PERIODIC OTHER POSTRETIREMENT BENEFIT COST	\$ 1	\$ 10	\$ 1	\$ 9
Cost capitalized	(1)	(4)	(1)	(3)
Reconciliation to rate level	4	3	2	
Cost charged to operating expenses	\$ 4	\$9	\$ 2	\$ 6

#### **Expected Contributions**

Based on estimates as of March 31, 2015, Con Edison expects to make a contribution of \$6 million, nearly all of which is for CECONY, to the other postretirement benefit plans in 2015.

#### Note G Environmental Matters

#### **Superfund Sites**

Hazardous substances, such as asbestos, polychlorinated biphenyls (PCBs) and coal tar, have been used or generated in the course of operations of the Utilities and their predecessors and are present at sites and in facilities and equipment they currently or previously owned, including sites at which gas was manufactured or stored.

The Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 and similar state statutes (Superfund) impose joint and several liability, regardless of fault, upon generators of hazardous substances for investigation and remediation costs (which include costs of demolition, removal, disposal, storage, replacement, containment and monitoring) and natural resource damages. Liability under these laws can be material and may be imposed for contamination from past acts, even though such past acts may have been lawful at the time they occurred. The sites at which the Utilities have been asserted to have liability under these laws, including their manufactured gas plant sites and any neighboring areas to which contamination may have migrated, are referred to herein as Superfund Sites.

For Superfund Sites where there are other potentially responsible parties and the Utilities are not managing the site investigation and remediation, the accrued liability represents an estimate of the amount the Utilities will need to pay to investigate and, where determinable, discharge their related obligations. For Superfund Sites (including the manufactured gas plant sites) for which one of the Utilities is managing the investigation and remediation, the accrued liability represents an estimate of the company s share of the undiscounted cost to investigate the sites and, for sites that have been investigated in whole or in part, the cost to remediate the sites, if remediation is necessary and if a reasonable estimate of such cost can be made. Remediation costs are estimated in light of the information available, applicable remediation standards and experience with similar sites.

The accrued liabilities and regulatory assets related to Superfund Sites at March 31, 2015 and December 31, 2014 were as follows:

**Con Edison** 

CECONY

# Edgar Filing: CONSOLIDATED EDISON INC - Form 10-Q

(Millions of Dollars)	2015	2014	2015	2014
Accrued Liabilities:				
Manufactured gas plant sites	\$678	\$684	\$582	\$587
Other Superfund Sites	80	80	80	79
Total	\$758	\$764	\$662	\$666
Regulatory assets	\$911	\$925	\$808	\$820

Most of the accrued Superfund Site liability relates to sites that have been investigated, in whole or in part.

However, for some of the sites, the extent and associated cost of the required remediation has not yet been determined. As investigations progress and information pertaining to the required remediation becomes available, the Utilities expect that additional liability may be accrued, the amount of which is not presently determinable but may be material. The Companies are unable to estimate the time period over which the remaining accrued liability will be incurred because, among other things, the required remediation has not been determined for some of the sites. Under their current rate plans, the Utilities are permitted to recover or defer as regulatory assets (for subsequent recovery through rates) certain site investigation and remediation costs.

Environmental remediation costs incurred and insurance recoveries received related to Superfund Sites for the three months ended March 31, 2015 and 2014 were as follows:

	Cor	n Edison	CEC	CONY
(Millions of Dollars)	2015	2014	2015	2014
Remediation costs incurred	\$7	\$9	\$6	\$8
Insurance recoveries received*		5		5

\* Reduced amount deferred for recovery from customers

In 2014, Con Edison and CECONY estimated that for their manufactured gas plant sites (including CECONY s Astoria site), the aggregate undiscounted potential liability for the investigation and remediation of coal tar and/or other environmental contaminants could range up to \$2.7 billion and \$2.5 billion, respectively. These estimates were based on the assumption that there is contamination at all sites, including those that have not yet been fully investigated and additional assumptions about the extent of the contamination and the type and extent of the remediation that may be required. Actual experience may be materially different.

#### **Asbestos Proceedings**

Suits have been brought in New York State and federal courts against the Utilities and many other defendants, wherein a large number of plaintiffs sought large amounts of compensatory and punitive damages for deaths and injuries allegedly caused by exposure to asbestos at various premises of the Utilities. The suits that have been resolved, which are many, have been resolved without any payment by the Utilities, or for amounts that were not, in the aggregate, material to them. The amounts specified in all the remaining thousands of suits total billions of dollars; however, the Utilities believe that these amounts are greatly exaggerated, based on the disposition of previous claims. At March 31, 2015, Con Edison and CECONY had accrued their estimated aggregate undiscounted potential liabilities for these suits and additional suits that may be brought over the next 15 years of \$8 million and \$7 million, respectively. The estimates were based upon a combination of modeling, historical data analysis and risk factor assessment. Trial courts have begun, and unless otherwise determined by an appellate court may continue, to apply a different standard for determining liability in asbestos suits than the standard that applied historically. As a result, the Companies currently believe that there is a reasonable possibility of an exposure to loss in excess of the liability accrued for the suits. The Companies are unable to estimate the amount or range of such loss. In addition, certain current and former employees have claimed or are claiming workers compensation benefits based on alleged disability from exposure to asbestos. Under its current rate plans, CECONY is permitted to defer as regulatory assets (for subsequent recovery through rates) costs incurred for its asbestos lawsuits and workers compensation claims.

The accrued liability for asbestos suits and workers compensation proceedings (including those related to asbestos exposure) and the amounts deferred as regulatory assets for the Companies at March 31, 2015 and December 31, 2014 were as follows:

	Con l	Edison	CEC	ONY
(Millions of Dollars)	2015	2014	2015	2014
Accrued liability asbestos suits	\$8	\$ 8	\$ 7	\$ 7
Regulatory assets asbestos suits	\$8	\$8	\$ 7	\$7
Accrued liability workers compensation	\$ 84	\$ 83	\$ 79	\$ 78
Regulatory assets workers compensation	\$9	\$ 8	\$ 9	\$ 8

Note H Other Material Contingencies

#### Manhattan Steam Main Rupture

In July 2007, a CECONY steam main located in midtown Manhattan ruptured. It has been reported that one person died and others were injured as a result of the incident. Several buildings in the area were damaged. Debris from the incident included dirt and mud containing asbestos. The response to the incident required the closing of several buildings and streets for various periods. Approximately ninety suits are pending against the company seeking generally unspecified compensatory and, in some cases, punitive damages, for personal injury, property damage and business interruption. The company has notified its insurers of the incident and believes that the policies in force at the time of the incident will cover the company s costs to satisfy its liability to others in connection with the suits. In the company s estimation, there is not a reasonable possibility that an exposure to loss exists for the suits that is materially in excess of the estimated liability accrued. At March 31, 2015, the company has accrued its estimated liability for the suits of \$50 million and an insurance receivable in the same amount.

#### **Manhattan Explosion and Fire**

On March 12, 2014, two multi-use five-story tall buildings located on Park Avenue between 116<sup>th</sup> and 117<sup>th</sup> Street in Manhattan were destroyed by an explosion and fire. CECONY had delivered gas to the buildings through service lines from a distribution main located below ground on Park Avenue. Eight people died and more than 48 people were injured. Additional buildings were also damaged. The National Transportation Safety Board (NTSB) is investigating. The parties to the investigation include the company, the City of New York, the Pipeline and Hazardous Materials Safety Administration and the NYSPSC (which is also conducting an investigation). In March 2015, the NTSB issued reports on: operations, emergency preparedness and emergency response of the company and certain City departments; testing of company plastic pipe and its fusion and City water main; the company s public awareness program; and regulatory oversight. It is expected that the NTSB will be issuing a final report concerning the incident, its probable cause and safety recommendations. Approximately 35 suits are pending against the company seeking generally unspecified damages and, in one case, punitive damages, for personal injury, property damage and business interruption. The company has notified its insurers of the incident and believes that the policies in force at the time of the incident will cover the company s costs, in excess of a required retention (the amount of which is not material), to satisfy any liability it may have for damages in connection with the incident. The company is unable to estimate the amount or range of its possible loss related to the incident. At March 31, 2015, the company had not accrued a liability for the incident.

#### **Other Contingencies**

See Other Regulatory Matters in Note B and Uncertain Tax Positions in Note I.

#### Guarantees

Con Edison and its subsidiaries enter into various agreements providing financial or performance assurance primarily to third parties on behalf of their subsidiaries. Maximum amounts guaranteed by Con Edison totaled \$2,559 million and \$2,547 million at March 31, 2015 and December 31, 2014, respectively.

A summary, by type and term, of Con Edison s total guarantees at March 31, 2015 is as follows:

Guarantee Type	0 3 years	4 10 years (Millions of Dol	> 10 years lars)	Total
NY Transco	\$1,360	\$	\$	\$1,360
Energy transactions	830	38	90	958
Renewable electric production projects	204		7	211
Other	30			30
Total	\$2,424	\$38	\$97	\$2,559

**NY Transco** Con Edison has guaranteed payment by its subsidiary, Con Edison Transmission, of the contributions it agreed to make in New York Transco LLC (NY Transco). Con Edison Transmission acquired a 45.7 percent interest in NY Transco when it was formed in 2014. NY Transco s transmission projects are expected to be developed initially by CECONY and other New York transmission owners and then sold to NY Transco. The development of the projects would

be subject to authorizations from the NYSPSC, the Federal Energy Regulatory Commission and other federal, state and local agencies. Guarantee amount shown is for the maximum possible required amount of Con Edison Transmission s contributions, which assumed that all the NY Transco projects proposed when NY Transco was formed receive all required regulatory approvals and are completed at 175 percent of their estimated costs and that NY Transco does not use any debt financing for the projects. Guarantee term shown is assumed as the timing of the contributions is not known.

**Energy Transactions** Con Edison guarantees payments on behalf of its competitive energy businesses in order to facilitate physical and financial transactions in gas, pipeline capacity, transportation, oil, electricity, renewable energy credits and energy services. To the extent that liabilities exist under the contracts subject to these guarantees, such liabilities are included in Con Edison s consolidated balance sheet.

**Renewable Electric Production Projects** Con Edison and Con Edison Development guarantee payments associated with the investment in solar and wind energy facilities on behalf of their wholly-owned subsidiaries. In addition, Con Edison Development has entered into two guarantees (\$35 million maximum and \$15 million maximum, respectively) on behalf of entities (Copper Mountain Solar 2 and Copper Mountain Solar 3, respectively) in which it has a 50 percent interest in connection with the construction of solar energy facilities. Con Edison Development also provided \$3 million in guarantees to Travelers Insurance Company for indemnity agreements for surety bonds in connection with the construction and operation of solar energy facilities performed by its subsidiaries.

**Other** Other guarantees primarily relate to guarantees provided by Con Edison to Travelers Insurance Company for indemnity agreements for surety bonds in connection with energy service projects performed by Con Edison Solutions (\$25 million). In addition, Con Edison issued a guarantee to the Public Utility Commission of Texas covering obligations of Con Edison Solutions as a retail electric provider. Con Edison s estimate of the maximum potential obligation for this guarantee is \$5 million as of March 31, 2015.

#### Note I Income Tax

Con Edison s income tax expense increased to \$199 million for the three months ended March 31, 2015 from \$198 million for the three months ended March 31, 2015 and 2014 was 35 percent. CECONY s income tax expense increased to \$192 million for the three months ended March 31, 2015 from \$184 million for the three months ended March 31, 2014. The effective tax rate for the three months ended March 31, 2015 from \$184 million for the three months ended March 31, 2014. The effective tax rate for the three months ended March 31, 2015 from \$184 million for the three months ended March 31, 2014.

#### **Uncertain Tax Positions**

At March 31, 2015, the estimated liability for uncertain tax positions for Con Edison was \$34 million (\$2 million for CECONY). Con Edison reasonably expects to resolve approximately \$25 million (\$16 million, net of federal taxes) of its uncertain tax positions within the next twelve months, of which the entire amount, if recognized, would reduce Con Edison s effective tax rate. The amount related to CECONY is approximately \$2 million (\$1 million, net of federal taxes), of which the entire amount, if recognized tax benefits, if recognized, that would reduce Con Edison s effective tax rate is \$34 million (\$22 million, net of federal taxes).

The Companies recognize interest on liabilities for uncertain tax positions in interest expense and would recognize penalties, if any, in operating expenses in the Companies consolidated income statements. In the three months ended March 31, 2015, Con Edison recognized an immaterial amount of interest expense and no penalties for uncertain tax positions in its consolidated income statements. At March 31, 2015 and December 31, 2014, Con Edison recognized an immaterial amount of accrued interest on its consolidated balance sheets.

Note J Financial Information by Business Segment

The financial data for the business segments are as follows:

	For the Three Months Ended March 31,							
	<b>Operating</b> revenues			Inter-segment revenues		Depreciation and amortization		ating
	2015 2014		2015	2014	2015 2014		2015	2014
CECONY								
Electric	\$ 1,980	\$ 2,074	\$4	\$4	\$ 202	\$ 189	\$ 279	\$ 257
Gas	655	789	1	1	35	32	241	233
Steam	375	341	22	20	20	19	164	153
Consolidation adjustments			(27)	(25)				
Total CECONY	\$ 3,010	\$ 3,204	\$	\$	\$ 257	\$ 240	\$ 684	\$ 643
O&R								
Electric	\$ 156	\$ 163	\$	\$	\$ 12	\$ 10	\$ 18	\$ 12
Gas	77	93			5	4	27	27
Total O&R	\$ 233	\$ 256	\$	\$	\$ 17	\$ 14	\$ 45	\$ 39
Competitive energy businesses	\$ 374	\$ 329	\$ (3)	\$ 3	\$ 5	7	\$ (3)	\$ 2
Other(a)	(1)		3	(3)				1
Total Con Edison	\$ 3,616	\$ 3,789	\$	\$	\$ 279	\$ 261	\$ 726	\$ 685

(a) Parent company and consolidation adjustments. Other does not represent a business segment.

#### Note K Derivative Instruments and Hedging Activities

Con Edison s subsidiaries hedge market price fluctuations associated with physical purchases and sales of electricity, natural gas, steam and, to a lesser extent, refined fuels by using derivative instruments including futures, forwards, basis swaps, options, transmission congestion contracts and financial transmission rights contracts. Derivatives are recognized on the balance sheet at fair value (see Note L), unless an exception is available under the accounting rules for derivatives and hedging. Qualifying derivative contracts that have been designated as normal purchases or normal sales contracts are not reported at fair value under the accounting rules.

The fair values of the Companies commodity derivatives including the offsetting of assets and liabilities on the consolidated balance sheet at March 31, 2015 and December 31, 2014 were:

(Millions of Dollars)			2015			2014						
	Gross Amounts of	Gross Net Amounts Amounts						Gross Amounts of		ross iounts		Net nounts
	Recognized	0			Assets/	Recognized	0	<u>.</u>		Assets/

Net fair value derivative assets/(liabilities)	\$ (65)	\$	39	\$	(26)(b)	\$ (90)	\$	45	\$	(45)(b)		

(a) Derivative instruments and collateral were offset on the consolidated balance sheet as applicable under the accounting rules. The Companies enter into master agreements for their commodity derivatives. These agreements typically provide offset in the event of contract termination. In such case, generally the non-defaulting party s payable will be offset by the defaulting party s payable. The non-defaulting party will customarily notify the defaulting party within a specific time period and come to an agreement on the early termination amount.

(b) At March 31, 2015 and December 31, 2014, margin deposits for Con Edison (\$37 million and \$27 million, respectively) and CECONY (\$35 million and \$25 million, respectively) were classified as derivative assets in the balance sheet, but not included in the table. Margin is collateral, typically cash, that the holder of a derivative instrument is required to deposit in order to transact on an exchange and to cover its potential losses with its broker or the exchange.

The Utilities generally recover their prudently incurred fuel, purchased power and gas costs, including hedging gains and losses, in accordance with rate provisions approved by the applicable state utility regulators. In accordance with the accounting rules for regulated operations, the Utilities record a regulatory asset or liability to defer recognition of unrealized gains and losses on their electric and gas derivatives. As gains and losses are realized in future periods, they will be recognized as purchased power, gas and fuel costs in the Companies consolidated income statements. Con Edison s competitive energy businesses record realized and unrealized gains and losses on their derivative contracts in purchased power, gas purchased for resale and non-utility revenue in the reporting period in which they occur. Management believes that these derivative instruments represent economic hedges that mitigate exposure to fluctuations in commodity prices.

The following table presents the realized and unrealized gains or losses on commodity derivatives that have been deferred or recognized in earnings for the three months ended March 31, 2015 and 2014:

		Con Edi	Con Edison		ONY
(Millions of Dollars)	Balance Sheet Location	2015	2014	2015	2014
Pre-tax gains/(losses) deferred in accordance w	ith accounting rules for regulated operations:				
Current	Deferred derivative gains	\$ 3	\$ 30	\$ 3	\$ 25
Noncurrent	Deferred derivative gains		4		4
Total deferred gains/(losses)		\$ 3	\$ 34	\$ 3	\$ 29
Current	Deferred derivative losses	\$ 43	\$ 17	\$ 41	\$ 17
Current	Recoverable energy costs		94	(2)	77
Noncurrent	Deferred derivative losses	(19)	2	(16)	2
Total deferred gains/(losses)		\$ 24	\$ 113	\$ 23	\$ 96
Net deferred gains/(losses)		\$ 27	\$ 147	\$ 26	\$ 125
	Income Statement Location				
Pre-tax gain/(loss) recognized in income					
	Purchased power expense	\$ 21(a)	\$ 175(b)	\$	\$
	Gas purchased for resale	(42)	(14)		
	Non-utility revenue	42(a)	(24)		
Total pre-tax gain/(loss) recognized in income		\$ 21	\$ 137	\$	\$

(a) For the three months ended March 31, 2015, Con Edison recorded unrealized gains and losses in non-utility operating revenue (\$4 million loss) and purchased power expense (\$12 million gain).

(b) For the three months ended March 31, 2014, Con Edison recorded an unrealized gain of \$20 million in purchased power expense.

The following table presents the hedged volume of Con Edison s and CECONY s derivative transactions at March 31, 2015:

	Electric Energy (MWHs)(a)(b)	Capacity (MWs)(a)	Natural Gas (Dt)(a)(b)	Refined Fuels (gallons)
Con Edison	19,565,133	6,751	54,964,831	2,352,000
CECONY	6,640,525	2,100	53,860,000	2,352,000

(a) Volumes are reported net of long and short positions, except natural gas collars where the volumes of long positions are reported.

(b) Excludes electric congestion and gas basis swap contracts which are associated with electric and gas contracts and hedged volumes.

The Companies are exposed to credit risk related to transactions entered into primarily for the various energy supply and hedging activities by the Utilities and the competitive energy businesses. Credit risk relates to the loss that may result from a counterparty s nonperformance. The Companies use credit policies to manage this risk, including an established credit approval process, monitoring of counterparty limits, netting provisions within agreements, collateral or prepayment arrangements, credit insurance and credit default swaps. The Companies measure credit risk exposure as the replacement cost for open energy commodity and derivative positions plus amounts owed from counterparties for settled transactions. The replacement cost of open positions represents unrealized gains, net of any unrealized losses where the Companies have a legally enforceable right to offset.

At March 31, 2015, Con Edison and CECONY had \$212 million and \$35 million of credit exposure in connection with energy supply and hedging activities, net of collateral, respectively. Con Edison s net credit exposure consisted of \$108 million with commodity exchange brokers, \$92 million with independent system operators, \$8 million with investment-grade counterparties and \$4 million with non-investment grade/non-rated counterparties. CECONY s net credit exposure was with commodity exchange brokers.

The collateral requirements associated with, and settlement of, derivative transactions are included in net cash flows from operating activities in the Companies consolidated statement of cash flows. Most derivative instrument contracts contain provisions that may require a party to provide collateral on its derivative instruments that are in a net liability position. The amount of collateral to be provided will depend on the fair value of the derivative instruments and the party s credit ratings.

The following table presents the aggregate fair value of the Companies derivative instruments with credit-risk-related contingent features that are in a net liability position, the collateral posted for such positions and the additional collateral that would have been required to be posted had the lowest applicable credit rating been reduced one level and to below investment grade at March 31, 2015:

(Millions of Dollars)	Con Edison (a)		CECO	NY (a)
Aggregate fair value net liabilities	\$	58	\$	40
Collateral posted	\$	5	\$	
Additional collateral(b) (downgrade one level from current ratings)	\$		\$	
Additional collateral(b) (downgrade to below investment grade from current ratings)	\$	73(c)	\$	46(c)

- (a) Non-derivative transactions for the purchase and sale of electricity and gas and qualifying derivative instruments, which have been designated as normal purchases or normal sales, are excluded from the table. These transactions primarily include purchases of electricity from independent system operators. In the event the Utilities and the competitive energy businesses were no longer extended unsecured credit for such purchases, the Companies would be required to post an immaterial amount of collateral at March 31, 2015. For certain other such non-derivative transactions, the Companies could be required to post collateral under certain circumstances, including in the event counterparties had reasonable grounds for insecurity.
- (b) The Companies measure the collateral requirements by taking into consideration the fair value amounts of derivative instruments that contain credit-risk-related contingent features that are in a net liabilities position plus amounts owed to counterparties for settled transactions and amounts required by counterparties for minimum financial security. The fair value amounts represent unrealized losses, net of any unrealized gains where the Companies have a legally enforceable right to offset.

(c) Derivative instruments that are net assets have been excluded from the table. At March 31, 2015, if Con Edison had been downgraded to below investment grade, it would have been required to post additional collateral for such derivative instruments of \$20 million.

#### Note L Fair Value Measurements

The accounting rules for fair value measurements and disclosures define fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in a principal or most advantageous market. Fair value is a market-based measurement that is determined based on inputs, which refer broadly to assumptions that market participants use in pricing assets or liabilities. These inputs can be readily observable, market corroborated, or generally unobservable firm inputs. The Companies often make certain assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, and the risks inherent in the inputs to valuation techniques. The Companies use valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs.

The accounting rules for fair value measurements and disclosures established a fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value in three broad levels. The rules require that assets and liabilities be classified in their entirety based on the level of input that is significant to the fair value measurement. Assessing the significance of a particular input may require judgment considering factors specific to the asset or liability, and may affect the valuation of the asset or liability and their placement within the fair value hierarchy. The Companies classify fair value balances based on the fair value hierarchy defined by the accounting rules for fair value measurements and disclosures as follows:

Level 1 Consists of assets or liabilities whose value is based on unadjusted quoted prices in active markets at the measurement date. An active market is one in which transactions for assets or liabilities occur with sufficient frequency and volume to provide pricing information on an ongoing basis. This category includes contracts traded on active exchange markets valued using unadjusted prices quoted directly from the exchange.

Level 2 Consists of assets or liabilities valued using industry standard models and based on prices, other than quoted prices within Level 1, that are either directly or indirectly observable as of the measurement date. The industry standard models consider observable assumptions including time value, volatility factors and current market and contractual prices for the underlying commodities, in addition to other economic measures. This category includes contracts traded on active exchanges or in over-the-counter markets priced with industry standard models.

Level 3 Consists of assets or liabilities whose fair value is estimated based on internally developed models or methodologies using inputs that are generally less readily observable and supported by little, if any, market activity at the measurement

date. Unobservable inputs are developed based on the best available information and subject to cost benefit constraints. This category includes contracts priced using models that are internally developed and contracts placed in illiquid markets. It also includes contracts that expire after the period of time for which quoted prices are available and internal models are used to determine a significant portion of the value.

Assets and liabilities measured at fair value on a recurring basis as of March 31, 2015 and December 31, 2014 are summarized below.

	2015				2014					
(Millions of Dollars)	T	I	Level 2	Netting	T-4-1	Level 1	I	Land 2	Netting	T-4-1
( <i>Millions of Dollars</i> ) Con Edison	Level 1	Level 2	Level 3	Adjustment (e)	Total	Level 1	Level 2	Level 3	Adjustment (e)	Total
Derivative assets:										
Commodity(a)(b)(c)	\$ 1	\$ 62	\$ 17	\$ 44	\$ 124	\$ 3	\$ 78	\$ 28	\$ (27)	\$ 82
Other(a)(b)(d)	167	120			287	163	116			279
Total assets	\$ 168	\$ 182	\$ 17	\$ 44	\$ 411	\$ 166	\$ 194	\$ 28	\$ (27)	\$ 361
Derivative liabilities:										
Commodity(a)(b)(c)	\$ 14	\$ 193	\$ 6	\$ (151)	\$ 62	\$ 18	\$ 246	\$ 8	\$ (194)	\$ 78
CECONY										
Derivative assets										
Commodity(a)(b)(c)	\$ 1	\$9	\$ 12	\$ 26	\$ 48	\$ 1	\$ 3	\$ 13	\$ 21	\$ 38
Other(a)(b)(d)	159	110			269	155	106			261
Total assets	\$ 160	\$ 119	\$ 12	\$ 26	\$ 317	\$ 156	\$ 109	\$ 13	\$ 21	\$ 299
Derivative liabilities:										
Commodity(a)(b)(c)	\$ 12	\$ 75	\$	\$ (48)	\$ 39	\$ 16	\$ 91	\$	\$ (49)	\$ 58

(a) The Companies policy is to review the fair value hierarchy and recognize transfers into and transfers out of the levels at the end of each reporting period. There were no transfers between levels 1, 2 and 3 for the three months ended March 31, 2015 and for the year ended December 31, 2014.

(b) Level 2 assets and liabilities include investments held in the deferred compensation plan and/or non-qualified retirement plans, exchange-traded contracts where there is insufficient market liquidity to warrant inclusion in Level 1, certain over-the-counter derivative instruments for electricity, refined products and natural gas. Derivative instruments classified as Level 2 are valued using industry standard models that incorporate corroborated observable inputs; such as pricing services or prices from similar instruments that trade in liquid markets, time value and volatility factors.

(c) The accounting rules for fair value measurements and disclosures require consideration of the impact of nonperformance risk (including credit risk) from a market participant perspective in the measurement of the fair value of assets and liabilities. At March 31, 2015 and December 31, 2014, the Companies determined that nonperformance risk would have no material impact on their financial position or results of operations.

(d) Other assets are comprised of assets such as life insurance contracts within the deferred compensation plan and non-qualified retirement plans.

(e) Amounts represent the impact of legally-enforceable master netting agreements that allow the Companies to net gain and loss positions and cash collateral held or placed with the same counterparties.

32

The employees in the Companies risk management group develop and maintain the Companies valuation policies and procedures for, and verify pricing and fair value valuation of, commodity derivatives. Under the Companies policies and procedures, multiple independent sources of information are obtained for forward price curves used to value commodity derivatives. Fair value and changes in fair value of commodity derivatives are reported on a monthly basis to the Companies risk committees, comprised of officers and employees of the Companies that oversee energy hedging at the Utilities and the competitive energy businesses. The risk management group reports to the Companies Vice President and Treasurer.

	Fair Value of Level 3 at March 31, 2015	Valuation		
Con Edison Commodity	(Millions of Dollars)	Techniques	<b>Unobservable Inputs</b>	Range
Electricity	\$ (3)	Discounted Cash Flow	Forward energy prices (a)	\$24.50-\$121.00 per MWH
Licenterty	φ (5)	Discounted Cash Flow	Forward capacity prices (a)	\$0.75-\$8.45 per kW-month
Transmission Congestion Contracts/Financial Transmission Rights	14	Discounted Cash Flow	Discount to adjust auction prices for inter-zonal forward price curves (b) Discount to adjust auction prices for historical monthly realized settlements (b) Inter-zonal forward price curves adjusted for historical zonal losses (b)	9.6%-57.9% 32.3%-58.2% \$(2.65)-\$9.48 per MWH
Total Con Edison Commodity CECONY Commodity	\$ 11		•	
Transmission Congestion Contracts	\$ 12	Discounted Cash Flow	Discount to adjust auction prices for inter-zonal forward price curves (b) Discount to adjust auction prices for historical monthly realized settlements (b)	9.6%-57.9% 32.3%-58.2%

(a) Generally, increases/(decreases) in this input in isolation would result in a higher/(lower) fair value measurement.

(b) Generally, increases/(decreases) in this input in isolation would result in a lower/(higher) fair value measurement.

The table listed below provides a reconciliation of the beginning and ending net balances for assets and liabilities measured at fair value as of March 31, 2015 and 2014 and classified as Level 3 in the fair value hierarchy:

	Con Edison		CECONY	
(Millions of Dollars)	2015	2014	2015	2014
Beginning balance as of January 1,	\$ 20	\$9	\$13	\$ 6
Included in earnings	(10)	50	(2)	11
Included in regulatory assets and liabilities		4		4
Purchases	3	8	2	7
Settlements	(2)	(47)	(1)	(15)
Ending balance as of March 31,	\$ 11	\$ 24	\$ 12	\$ 13

For the Utilities, realized gains and losses on Level 3 commodity derivative assets and liabilities are reported as part of purchased power, gas and fuel costs. The Utilities generally recover these costs in accordance with rate provisions approved by the applicable state public utilities regulators. Unrealized gains and losses for commodity derivatives are generally deferred on the consolidated balance sheet in accordance with the accounting rules for regulated operations.

For the competitive energy businesses, realized and unrealized gains and losses on Level 3 commodity derivative assets and liabilities are reported in non-utility revenues (immaterial for both periods) and purchased power costs (\$8 million loss and \$39 million gain) on the consolidated income statement for the three months ended March 31, 2015 and 2014, respectively. The change in fair value relating to Level 3 commodity derivative assets and liabilities held at

March 31, 2015 and 2014 is included in non-utility revenues (immaterial for both periods) and purchased power costs (\$5 million loss and \$8 million gain) on the consolidated income statement for the three months ended March 31, 2015 and 2014, respectively.

#### Note M Variable Interest Entities

Con Edison enters into arrangements including leases, partnerships and electricity purchase agreements, with various entities. As a result of these arrangements, Con Edison retains or may retain a variable interest in these entities.

CECONY has a variable interest in a non-consolidated variable interest entity (VIE), Astoria Energy, LLC (Astoria Energy), with which CECONY has entered into a long-term electricity purchase agreement. CECONY is not the primary beneficiary of this VIE since CECONY does not have the power to direct activities that CECONY believes most significantly impact the economic performance of Astoria Energy. In particular, CECONY has not invested in, or guaranteed the indebtedness of, Astoria Energy and CECONY does not operate or maintain Astoria Energy s generating facilities. CECONY also has long-term electricity purchase agreements with the following three potential VIEs: Cogen Technologies Linden Venture, LP, Brooklyn Navy Yard Cogeneration Partners, LP and Indeck Energy Services of Corinth, Inc. In 2014, requests were made of these three counterparties for information necessary to determine whether the entity was a VIE and whether CECONY is the primary beneficiary; however, the information was not made available. The payments pursuant to these agreements, which constitute CECONY s maximum exposure to loss with respect to the potential VIEs, for the first quarter of 2015 were \$105 million for Cogen Technologies Linden Venture, LP, \$30 million for Brooklyn Navy Yard Cogeneration Partners, LP and \$15 million for Indeck Energy Services of Corinth, Inc.

During the first quarter of 2015, there were no new investments entered into that qualified for VIE status. The following table summarizes the VIEs in which Con Edison Development has entered into as of March 31, 2015:

	Generating Capacity	Power Purchase Agreement	Year of		Maximum Exposure to Loss
Project Name (a)	Owned (MWs AC)	Term in Years	Initial Investment	Location	(Millions of Dollars)(c)
Pilesgrove	9	n/a(b)	2010	New Jersey	\$26
Mesquite Solar 1	83	20	2013	Arizona	100
Copper Mountain Solar 2	75	25	2013	Nevada	79
Copper Mountain Solar 3	128	20	2014	Nevada	187
California Solar	55	25	2012	California	71
Texas Solar 4	32	25	2014	Texas	55
Broken Bow II	37	25	2014	Nebraska	57

(a) With the exception of Texas Solar 4, Con Edison s ownership interest is 50 percent and these projects are accounted for using the equity method of accounting. Con Edison is not the primary beneficiary since the power to direct the activities that most significantly impact the economics of the entities are shared equally between Con Edison Development and third parties. Con Edison s ownership interest in Texas Solar 4 is 80 percent and is consolidated in the financial statements. Con Edison is the primary beneficiary since the power to direct the activities that most significantly impact the economics of Texas Solar 4 is held by Con Edison Development. The maximum exposure for Texas Solar 4 is the net assets of the investment offset by a \$9 million noncontrolling interest.

- (b) Pilesgrove has 3-5 year Solar Renewable Energy Credit hedges in place.
- (c) For investments accounted for under the equity method, maximum exposure is equal to the carrying value of the investment on the balance sheet. For consolidated investments, maximum exposure is equal to the net assets of the investment on the balance sheet less any applicable minority interest. Con Edison did not provide any financial or other support during the year that was not previously contractually required.

#### Note N New Financial Accounting Standards

In January 2015, the Financial Accounting Standards Board (FASB) issued amendments on income statement guidance through Accounting Standards Update (ASU) No. 2015-01, Income Statement Extraordinary and Unusual Items (Subtopic 225-20). The amendments reduce the

## Table of Contents

complexity of accounting standards related to the income statement by eliminating the requirement to report extraordinary items separately. The amendments are effective for reporting periods beginning on or after December 15, 2015. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The application of this guidance is not expected to have a material impact on the Companies financial position, results of operations and liquidity.

In February 2015, the FASB issued amendments on consolidation guidance through ASU No. 2015-02, Consolidation (Topic 810). The amendments provide additional guidance for VIE accounting of limited partnerships and similar legal entities, fees paid to decision makers of a VIE, the effect of fee arrangements on primary beneficiary determination, the effect of related parties on primary beneficiary determination. For public entities, the amendments are effective prospectively for reporting periods beginning on or after December 15, 2015. Early adoption is permitted. The Companies are evaluating the application and impact of the new guidance on the Companies financial position, results of operations and liquidity.

In April 2015, the FASB issued amendments on debt issuance costs guidance through ASU No. 2015-03, Interest Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. The amendments provide additional guidance requiring that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability rather than as a deferred cost (i.e. an asset) as required by current guidance. For public entities, the amendments are effective for reporting periods beginning after December 15, 2015. Early adoption is permitted. The Companies are in the process of evaluating the application and impact of the new guidance on the Companies financial position, results of operations and liquidity.

In April 2015, the FASB issued amendments on internal-use software guidance through ASU No. 2015-05, Intangibles Goodwill and Other Internal-Use Software (Subtopic 350-40): Customer s Accounting for Fees Paid in a Cloud Computing Arrangement. The amendments provide guidance to customers about whether a cloud computing arrangement would be accounted for as a license of internal use software. If the arrangement is not deemed to contain a software license, it would be accounted for as a service contract. For public entities, the amendments are effective for reporting periods beginning after December 15, 2015. Early adoption is permitted. The Companies are in the process of evaluating the application and impact of the new guidance on the Companies financial position, results of operations and liquidity.

## Item 2: Management s Discussion and Analysis of Financial Condition and Results of Operations

This combined management s discussion and analysis of financial condition and results of operations (MD&A) relates to the consolidated financial statements (the First Quarter Financial Statements) included in this report of two separate registrants: Consolidated Edison, Inc. (Con Edison) and Consolidated Edison Company of New York, Inc. (CECONY) and should be read in conjunction with the financial statements and the notes thereto. As used in this report, the term the Companies refers to Con Edison and CECONY. CECONY is a subsidiary of Con Edison and, as such, information in this management s discussion and analysis about CECONY applies to Con Edison.

This MD&A should be read in conjunction with the First Quarter Financial Statements and the notes thereto and the MD&A in Item 7 of the Companies combined Annual Report on Form 10-K for the year ended December 31, 2014 (File Nos. 1-14514 and 1-1217, the Form 10-K).

Information in any item of this report referred to in this discussion and analysis is incorporated by reference herein. The use of terms such as see or refer to shall be deemed to incorporate by reference into this discussion and analysis the information to which reference is made.

Con Edison, incorporated in New York State in 1997, is a holding company that owns all of the outstanding common stock of CECONY, Orange and Rockland Utilities, Inc. (O&R) and the competitive energy businesses. In addition, in 2014 Con Edison formed Consolidated Edison Transmission, LLC (Con Edison Transmission) to invest in a transmission company. As used in this report, the term the Companies refers to Con Edison and CECONY.

Con Edison s principal business operations are those of CECONY, O&R and the competitive energy businesses. CECONY s principal business operations are its regulated electric, gas and steam delivery businesses. O&R s principal business operations are its regulated electric and gas delivery businesses. The competitive energy businesses sell electricity to retail customers, provide energy-related products and services, and develop, own and operate renewable and energy infrastructure projects.

Con Edison seeks to provide shareholder value through continued dividend growth, supported by earnings growth in regulated utilities and contracted assets. The company invests to provide reliable, resilient, safe, and clean energy critical for New York City s growing economy. The company is an industry leading owner and operator of contracted, large-scale solar generation in the United States. Con Edison is a responsible neighbor, helping the communities it serves become more sustainable.

36

### CECONY

#### Electric

CECONY provides electric service to approximately 3.4 million customers in all of New York City (except a part of Queens) and most of Westchester County, an approximately 660 square mile service area with a population of more than nine million.

#### Gas

CECONY delivers gas to approximately 1.1 million customers in Manhattan, the Bronx, parts of Queens and most of Westchester County.

#### Steam

CECONY operates the largest steam distribution system in the United States by producing and delivering approximately 23,000 MMlb of steam annually to approximately 1,700 customers in parts of Manhattan.

#### O&R

#### Electric

O&R and its utility subsidiaries, Rockland Electric Company (RECO) and Pike County Light & Power Company (Pike) (together referred to herein as O&R) provide electric service to approximately 0.3 million customers in southeastern New York and in adjacent areas of northern New Jersey and northeastern Pennsylvania, an approximately 1,350 square mile service area.

#### Gas

O&R delivers gas to over 0.1 million customers in southeastern New York and adjacent areas of northeastern Pennsylvania.

#### **Competitive Energy Businesses**

Con Edison pursues competitive energy opportunities through three wholly-owned subsidiaries: Con Edison Solutions, Con Edison Energy and Con Edison Development. These businesses sell to retail customers electricity purchased in wholesale markets and enter into related hedging transactions, provide energy-related products and services to wholesale and retail customers, and develop, own and operate renewable and energy infrastructure projects. Con Edison is considering strategic alternatives with respect to the retail electric supply business of its competitive energy businesses. At March 31, 2015, Con Edison s equity investment in its competitive energy businesses was \$464 million and their assets were \$1,168 million.

Certain financial data of Con Edison s businesses are presented below:

(Millions of Dollars, except	Three mon Operati		, 2015	At March 31, 2015		
percentages)	Revenu	es	Net Incon Common		Assets	
CECONY	\$3,010	83%	\$348	94%	\$39,180	89%
O&R	233	7%	22	6%	2,723	6%
Total Utilities	3,243	90%	370	100%	41,903	95%
Con Edison Solutions (a)	330	9%	(6)	(2)%	333	1%
Con Edison Energy (a)	31	1%	4	1%	131	%
Con Edison Development	10	%	4	1%	767	2%
Other (b)	2	%	(2)	%	843	2%
Total Con Edison	\$3,616	100%	\$370	100%	\$43,977	100%

## Table of Contents

- (a) Net income from the competitive energy businesses for the three months ended March 31, 2015 includes \$5 million of net after-tax mark-to-market gains/(losses) (Con Edison Solutions, \$7 million and Con Edison Energy, \$(2) million).
- (b) Other includes parent company and consolidation adjustments.

#### **Results of Operations**

Net income for common stock and earnings per share for the three months ended March 31, 2015 and 2014 were as follows:

	Net Inco Commo (Millions o	n Stock	Earnings Per Share		
	2015	2014	2015	2014	
CECONY	\$ 348	\$ 334	\$ 1.19	\$ 1.14	
O&R	22	21	0.07	0.07	
Competitive energy businesses (a)	2	9		0.03	
Other (b)	(2)	(3)		(0.01)	
Con Edison (c)	\$ 370	\$ 361	\$ 1.26	\$ 1.23	

(a) Includes \$5 million or \$0.01 a share and \$11 million or \$0.04 a share of net after-tax mark-to-market gains in the three months ended March 31, 2015 and 2014, respectively. Also includes an after-tax benefit of \$7 million or \$0.02 a share relating to the lease in/lease out (LILO) transactions terminated in 2013 in the three months ended March 31, 2014.

(b) Other includes parent company and consolidation adjustments.

(c) Earnings per share on a diluted basis were \$1.26 a share and \$1.23 a share for the three months ended March 31, 2015 and 2014, respectively.

The Companies results of operations for the three months ended March 31, 2015, as compared with the 2014 period, reflect primarily changes in the Utilities rate plans including growth in its gas delivery service related to oil-to-gas conversions, and lower other operations and maintenance expenses. The rate plans provide for revenues to cover expected increases in certain other operations and maintenance expenses and depreciation, reflecting primarily the impact of higher utility plant balances. The results of operations also include the impact of LILO transactions in 2014 and the net mark-to-market effects of the competitive energy businesses.

The following table presents the estimated effect on earnings per share and net income for common stock for the 2015 period as compared with 2014 period, resulting from these and other major factors:

	Earnings per Share	Net Income for Common		
	Variation	Stock Variation (Millions of Dollars)		
CECONY (a)				
Changes in rate plans	\$ 0.06	\$	17	
Other operations and maintenance expenses	0.04		13	
Depreciation and amortization	(0.03)		(10)	
Net interest expense	(0.03)		(8)	
Other	0.01		2	
Total CECONY	0.05		14	
O&R (a)				
Changes in rate plans	0.02		5	
Other operations and maintenance expenses	(0.01)		(2)	
Other	(0.01)		(2)	
Total O&R			1	
Competitive energy businesses				
Other operations and maintenance expenses	(0.01)		(4)	
Net interest expense	(0.02)		(7)	
Other			4	

Total competitive energy businesses (b)	(0.03)	(7)
Other, including parent company expenses	0.01	1
Total variations	\$ 0.03	\$ 9

- (a) Under the revenue decoupling mechanisms in the Utilities New York electric and gas rate plans and the weather-normalization clause applicable to their gas businesses, revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. Under the rate plans, pension and other postretirement costs and certain other costs are reconciled to amounts reflected in rates for such costs. In general, the Utilities recover on a current basis the fuel, gas purchased for resale and purchased power costs they incur in supplying energy to their full-service customers. Accordingly, such costs do not generally affect the Companies results of operations.
- (b) These variations include the net mark-to-market effects and impact of the LILO transactions shown in note (a) in the Results of Operations table above.

38

The Companies other operations and maintenance expenses for the three months ended March 31, 2015 and 2014 were as follows:

(Millions of Dollars)	2015	2014
CECONY		
Operations	\$342	\$368
Pensions and other postretirement benefits	91	117
Health care and other benefits	40	36
Regulatory fees and assessments (a)	154	123
Other	76	81
Total CECONY	703	725
O&R	82	78
Competitive energy businesses	30	23
Other (b)	(1)	(1)
Total other operations and maintenance expenses	\$814	\$825

(a) Includes Demand Side Management, System Benefit Charges and Public Service Law 18A assessments which are collected in revenues.

(b) Includes parent company and consolidation adjustments.

Con Edison s principal business segments are CECONY s regulated utility activities, O&R s regulated utility activities and Con Edison s competitive energy businesses. CECONY s principal business segments are its regulated electric, gas and steam utility activities. A discussion of the results of operations by principal business segment for the three months ended March 31, 2015 and 2014 follows. For additional business segment financial information, see Note J to the First Quarter Financial Statements.

## Three Months Ended March 31, 2015 Compared with Three Months Ended March 31, 2014

CECONY s electric sales and deliveries for the three months ended March 31, 2015 compared with the 2014 period were:

	Three	llions of kW Months ided	red	Revenues in Millions (a) Three Months Ended				
	March 31,	March 31, March 31, Percen		Percent	March 31,	March 3	Percent	
Description	2015	2014	Variation	Variation	2015	2014	Variation	Variation
Residential/Religious (b)	2,463	2,416	47	1.9%	\$ 717	\$ 78'	7 \$ (70)	(8.9)%
Commercial/Industrial	2,436	2,461	(25)	(1.0)	527	618	3 (91)	(14.7)
Energy choice customers	6,400	6,437	(37)	(0.6)	596	522	2 74	14.2
NYPA, Municipal Agency and other sales	2,584	2,582	2	0.1	128	13.	3 (5)	(3.8)
Other operating revenues (c)					12	14	4 (2)	(14.3)
Total	13,883	13,896	(13)	(0.1)% (d)	\$ 1,980	\$ 2,074	\$ (94)	(4.5)%

(a) Revenues from electric sales are subject to a revenue decoupling mechanism, as a result of which delivery revenues generally are not affected by changes in delivery volumes from levels assumed when rates were approved.

(b) Residential/Religious generally includes single-family dwellings, individual apartments in multi-family dwellings, religious organizations and certain other not-for-profit organizations.

(c) Other electric operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the revenue decoupling mechanism and other provisions of the company s rate plans.

(d) After adjusting for variations, principally weather and billing days, electric delivery volumes in CECONY s service area decreased 0.4 percent in three months ended March 31, 2015 compared with the 2014 period.

*Operating revenues* decreased \$94 million in the three months ended March 31, 2015 compared with the 2014 period due primarily to lower purchased power (\$72 million) and fuel expenses (\$35 million), offset in part by higher revenues from the electric rate plan (\$13 million).

*Purchased power* expenses decreased \$72 million in the three months ended March 31, 2015 compared with the 2014 period due to a decrease in unit costs (\$84 million), offset by higher purchased volumes (\$12 million).

*Fuel* expenses decreased \$35 million in the three months ended March 31, 2015 compared with the 2014 period due to lower unit costs (\$24 million) and lower sendout volumes from the company s electric generating facilities (\$11 million).

Other operations and maintenance expenses decreased \$24 million due primarily to lower electric operating costs (\$28 million), lower pension costs (\$21 million) and lower costs f
