For the Fiscal Year Ended June 30, 2015

OR

.. **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

Commission file number: 001-34628

QuinStreet, Inc.

(Exact name of registrant as specified in its charter)

Delaware	77-0512121
(State or other jurisdiction of	(I.R.S. Employer
incorporation or organization)	Identification No.)
950 Tower Lane, 6th Floor	
Foster City, California 94404	
(Address of principal executive offices, including zip code)	
(650) 587-7700	
(Registrant's telephone number, including area code)	

Edgar Filing: QUINSTREET, INC - Form 10-K

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Common Stock, par value \$0.001 per share	The NASDAQ Stock Market LLC
	(NASDAQ Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of December 31, 2014, the aggregate market value of the voting stock held by non-affiliates of the registrant, based on the closing sale price of the Company's common stock as reported by the NASDAQ Global Select Market on such date, was \$215,190,902. For purposes of this disclosure, shares held by persons who hold more than 5% of the outstanding shares of common stock and shares held by executive officers and directors of the registrant have been excluded because such persons may be deemed to be affiliates. This determination of executive officer or affiliate status is not a conclusive determination for other purposes.

Number of shares of common stock outstanding as of August 14, 2015: 45,004,701

Documents Incorporated by Reference:

Portions of the registrant's definitive proxy statement relating to its 2015 annual stockholders meeting are incorporated by reference into Part III of this Annual Report on Form 10-K where indicated.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements. All statements other than statements of historical facts, including statements regarding our future financial condition, business strategy and plans and objectives of management for future operations, are forward-looking statements. Terminology such as believe, may, might, objective, estimate, continue, anticipate, intend, should, plan, expect, predict, negative of these terms or other similar expressions is intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. These forward-looking statements are subject to a number of known and unknown risks and uncertainties that could cause our actual results to differ materially from those expressed or implied in our forward-looking statements. Such risks and uncertainties include, among others, those listed in Part 1, Item 1A. Risk Factors of this Annual Report on Form 10-K and elsewhere in this report, such as but not limited to:

our still developing industry and relatively new business model;

changes in the economic condition, market dynamics, regulatory enforcement or legislative environment affecting our, our third party publishers, and our clients' businesses;

our dependence on the availability and affordability of quality media from third-party publishers;

our dependence on Internet search companies to attract Internet visitors;

our ability to accurately forecast our operating results and appropriately plan our expenses;

our ability to compete in our industry;

our ability to manage cyber security risks and costs associated with maintaining a robust security infrastructure;

our ability to develop our websites to allow Internet visitors to access our websites through mobile devices;

our ability to develop new services and enhancements and features to meet new demands from our clients; and

our ability to successfully challenge regulatory audits, investigations, or allegations of noncompliance with laws.

Except as required by law, we undertake no obligation to update publicly any forward-looking statements for any reason to conform these statements to actual results or to changes in our expectations. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements, and we qualify all of our forward-looking statements by these cautionary statements.

Item 1. Business

Our Company

Edgar Filing: QUINSTREET, INC - Form 10-K

QuinStreet is a leader in performance marketing online. We have built a strong set of capabilities to engage Internet visitors in targeted media and to connect our marketing clients with their potential customers online. We focus on serving clients in large, information-intensive industry verticals where relevant, targeted media and offerings help visitors make informed choices, find the products that match their needs, and thus become qualified customer prospects for our clients. Presently, our primary client verticals are the financial services and education industries. We also have a presence in the business-to-business technology, home services and medical industries.

Table of Contents

We generate revenue by delivering measurable online marketing results to our clients. These results are typically in the form of qualified leads, inquiries, clicks, calls, applications, or customers that are generated from our marketing activities on our websites or via third-party publishers with whom we have relationships. Clients primarily pay us for leads that they can convert into customers, typically in a call center or through other offline customer acquisition processes, or for clicks from our websites that they can convert into applications or customers on their websites. We are predominantly paid on a negotiated or market-driven per lead or per click basis. Media costs to generate qualified leads, inquiries, clicks, calls, applications or customers are borne by us as a cost of providing our services.

QuinStreet was incorporated in California on April 16, 1999 and reincorporated in Delaware on December 31, 2009. We have been a pioneer in the development and application of measurable marketing on the Internet. Clients pay us for the actual opt-in actions by prospects or customers that result from our marketing activities on their behalf, versus traditional impression-based advertising and marketing models in which an advertiser pays for more general exposure to an advertisement. We have been particularly focused on developing and delivering measurable marketing results in the search engine ecosystem, the entry point of the Internet for most of the visitors we convert into qualified leads, inquiries, clicks, calls, applications or customers for our clients. We own or partner with vertical content websites that attract Internet visitors from organic search engine rankings due to the quality and relevancy of their content to search engine users. We also acquire targeted visitors for our websites through the purchase of pay-per-click, or PPC, advertisements on search engines. We complement search engine companies by building websites with content and offerings that are relevant and responsive to their searchers, and by increasing the value of the PPC search advertising they sell by matching visitors with offerings and converting them into customer prospects for our clients.

Market Opportunity

Change in marketing strategy and approach

We believe that marketing approaches are changing as budgets shift from offline, analog advertising media to digital advertising media such as Internet marketing. These changing approaches are fundamental, and require a shift to fundamentally new competencies, including:

From qualitative, impression-driven marketing to analytic, data-driven marketing

Growth in Internet marketing is enabling a more data-driven approach to advertising. The measurability of online marketing allows marketers to collect a significant amount of detailed data on the performance of their marketing campaigns, including the effectiveness of ad format and placement and user responses. This data can then be analyzed and used to improve marketing campaign performance and cost-effectiveness on substantially shorter cycle times than with traditional offline media.

From account management-based client relationships to results-based client relationships

Marketers are becoming increasingly focused on strategies that deliver specific, measurable results. For example, marketers are attempting to better understand how their marketing spending produces measurable objectives such as meeting their target marketing cost per new customer. As marketers adopt more results-based approaches, the basis of client relationships with their marketing services providers is shifting from being more account management-based to being more results-oriented.

From marketing messages pushed on audiences to marketing messages pulled by self-directed audiences

Traditional marketing messages such as television and radio advertisements are broadcast to a broad audience. The Internet is enabling more self-directed and targeted marketing. For example, when Internet visitors click on PPC search advertisements, they are expressing an interest in and proactively engaging with information about a product or service related to that advertisement. The growth of self-directed marketing, primarily through

Table of Contents

online channels, allows marketers to present more targeted and potentially more relevant marketing messages to potential customers who have taken the first step in the buying process, which can in turn increase the effectiveness of marketers' spending.

From marketing spending focused on large media buys to marketing spending optimized for fragmented media

We believe that media is becoming increasingly fragmented and that marketing strategies are changing to adapt to this trend. There are millions of Internet websites, tens of thousands of which have significant numbers of visitors. While this fragmentation can create challenges for marketers, it also allows for improved audience segmentation and the delivery of highly targeted marketing messages, but new technologies and approaches are necessary to effectively manage marketing given the increasing complexity resulting from more media fragmentation.

Increasing complexity of online marketing

Online marketing is a dynamic and increasingly complex advertising medium. There are numerous online channels for marketers to reach potential customers, including search engines, Internet portals, vertical content websites, affiliate networks, display and contextual ad networks, email, video advertising, and social media. We refer to these and other marketing channels as media. Each of these channels may involve multiple ad formats and different pricing models, amplifying the complexity of online marketing. We believe that this complexity increases the demand for our vertical marketing and media services due to our capabilities and to our experience managing and optimizing online marketing programs across multiple channels. Also, marketers and agencies often lack our ability to aggregate offerings from multiple clients in the same industry vertical, an approach that allows us to cover a wide selection of visitor segments and provide more potential matches to visitor needs. This approach can allow us to convert more Internet visitors into qualified leads, inquiries, clicks, calls, applications, or customers from targeted media sources, giving us an advantage when buying or monetizing that media.

Our Business Model

We deliver cost-effective marketing results to our clients most typically in the form of a qualified lead, inquiry, click, call, application or customer. Leads, inquiries, clicks, calls, and applications can then convert into a customer or sale for clients at a rate that results in an acceptable marketing cost to them. We are paid typically by clients when we deliver qualified leads, inquiries, clicks, calls, applications, or customers as defined by our agreements with them. References to the delivery of customers means a sale or completed customer transaction (e.g., bound insurance policies or customer appointments with clients). Because we bear the costs of media, our programs must deliver a value to our clients and provide for a media yield, or generation of acceptable margin on our media costs, that provides a sound financial outcome for us. To deliver leads, inquiries, clicks, calls, applications, and customers to our clients, generally we:

own or access targeted media through business arrangements (e.g., revenue sharing agreements) or by purchasing media (e.g., clicks from major search engines);

run advertisements or other forms of marketing messages and programs in that media to create visitor responses in the form most typically of leads or inquiries (contact information and intent or requests), clicks (to further qualification or matching steps, or to online client applications or offerings), calls (to our owned and operated call centers or that of our clients or their agents), applications (e.g., for enrollment or a financial product), or customers (e.g., bound insurance policies);

match these leads, inquiries, clicks, calls, applications, or customers to client offerings or brands that we believe can meet visitor interests or needs and client targets and requirements; and

optimize client matches and media yield such that we achieve desired results for clients and a sound financial outcome for us.

Table of Contents

Media cost, or the cost to attract targeted Internet visitors, is the largest cost input to producing the measurable marketing results we deliver to clients. Balancing our clients' customer acquisition cost and conversion objectives—or the rate at which the leads, inquiries, clicks, calls, or applications that we deliver to them convert into customers—with our media costs and yield objectives, represents the primary challenge in our business model. We have been able to effectively balance these competing demands by focusing on our media sources and capabilities, conversion optimization, and our mix of offerings and client coverage. We also seek to mitigate media cost risk by working with third-party publishers predominantly on a revenue-share basis. Media purchased on a revenue-share basis has represented the majority of our media costs and of the Internet visitors we convert into qualified leads, inquiries, clicks, calls, applications, or customers for clients, contributing significantly to our ability to maintain profitability.

Media and Internet visitor mix

We are a client-driven organization. We seek to be one of the largest providers of measurable marketing results on the Internet in the client industry verticals we serve by meeting the needs of clients for results, reliability and volume. Meeting those client needs requires that we maintain a diversified and flexible mix of Internet visitor sources due to the dynamic nature of online media. Our media mix changes with changes in Internet visitor usage patterns. We adapt to those changes on an ongoing basis, and also proactively adjust our mix of vertical media sources to respond to client or vertical-specific circumstances and to achieve our financial objectives. Generally, our Internet visitor sources include:

websites owned and operated by us, with content and offerings that are relevant to our clients' target customers;

visitors acquired from PPC advertisements purchased on major search engines and sent to our websites;

revenue sharing agreements with third-party publishers with whom we have a relationship and whose content or traffic is relevant to our clients' target customers;

email lists owned by us or by third parties; and

advertisements run through online advertising networks, directly with major websites or portals, social media networks, or mobile networks, on a revenue-share or purchased basis.

Conversion optimization

Once we acquire targeted Internet visitors from any of our numerous online media sources, we seek to convert that media into qualified leads, inquiries, clicks, calls, applications, or customers at a rate that balances client results with our media costs or yield objectives. We start by providing Internet visitors with information and product offerings on our websites and in our marketing programs that we believe match their interests. Achieving acceptable client results and media yield then requires ongoing testing, measuring, analysis, feedback, and adaptation of the key components of our Internet marketing programs. These components include the marketing or advertising messaging, content mix, visitor navigation path, mix and coverage of client offerings presented, and point-of-sale conversion messaging—the content that is presented to an Internet visitor immediately prior to converting that individual into a qualified lead, inquiry, click, call, application, or customer for our clients. This data complexity is managed by us with technology, data reporting, marketing processes, and personnel. We believe that our scale and more than fifteen-year track record give us an advantage, as managing this complexity often implies a steep experience-based learning curve.

Offerings and client coverage

The Internet is a self-directed medium. Internet visitors choose the websites they visit and their online navigation paths, and always have the option of clicking away to a different website or web page. Having offerings, content or clients that match the interests or needs of website visitors is key to providing results and

Table of Contents

adequate media yield. Our vertical focus allows us to continuously revise and improve this matching process, to better understand the various segments of visitors and client offerings available to be matched, and to ensure that we enable Internet visitors to find what they seek.

Our Competitive Advantages

Vertical focus and expertise

We focus our efforts on large, attractive client market verticals and on building our depth of media and coverage of clients and client offerings within them. We have been a pioneer in developing vertical marketing and media on the Internet and in providing measurable marketing results to clients. We focus on clients who are moving their marketing spending to measurable online formats and on information-intensive client verticals with large underlying market opportunities and high product or customer lifetime values. This focus allows us to utilize targeted media, in-depth industry and client knowledge, and customer segmentation and breadth of client offerings, or coverage, to deliver results for our clients, and greater media yield and buying power.

Measurable marketing experience, expertise and data

We have substantial experience at designing and deploying marketing programs that match Internet visitors to information or product offerings, and that can deliver economically attractive, measurable results to our clients, cost-effectively for us. Such results require frequent testing and balancing of numerous variables, including Internet visitor sources, mix of content and of client and product offerings, visitor navigation paths, prospect qualification, and advertising creative design, among others. The complexity of executing these marketing campaigns is challenging. Due to our scale and more than fifteen-year track record, we have successfully executed thousands of Internet marketing programs, and we have gained significant experience managing and optimizing this complexity to meet our clients' volume, quality and cost objectives, while also achieving media yield and buying power requirements for our business model.

Targeted media

Targeted media attracts Internet visitors who are relatively narrowly focused demographically or in their interests. Targeted media can deliver better measurable marketing results for our clients, at lower media costs for us due to higher rates of conversion of Internet visitors into qualified leads, inquiries, clicks, calls, applications, or customers for targeted offerings and, often, due to less competition from display advertisers. We have significant experience at creating, identifying, partnering, monetizing, and managing targeted media on the Internet. This array of targeted media can represent a share of targeted traffic in our verticals on the Internet that is meaningful and attractive to clients. Many of the targeted media sources for our marketing programs are proprietary or more defensible because of our direct ownership of websites in our client verticals, our acquisition of targeted Internet visitors directly from search engines to our websites, and our relationships and media buying power advantages with media properties or sources owned by others. Examples of websites that we own and operate include Schools.com, OnlineDegrees.com, and AlliedHealthWorld.com in our education client vertical; CarInsurance.com, Insurance.com, Insure.com, CardRatings.com, and MoneyRates.com in our financial services client vertical; eWeek.com and ITBusinessEdge.com in our business-to-business technology client vertical; reliableremodeler.com and improvementcenter.com in our home services client vertical; and ElderCarelink.com in our medical client vertical.

Proprietary technology

We have developed a core technology platform and a common set of applications for managing and optimizing measurable marketing programs across multiple client verticals at scale. The primary objectives and effects of our technologies are to achieve higher media yield, deliver better results for our clients, and more efficiently and effectively manage our scale and complexity. We continuously strive to develop technologies that allow us to better match Internet visitors in our client verticals to the information, clients or product offerings

Table of Contents

visitors seek at scale. In so doing, our technologies can allow us to simultaneously improve visitor satisfaction, increase our media yield, and achieve higher rates of conversions of leads, inquiries, clicks, calls, applications, or customers for our clients a cycle of increased value for Internet visitors and our clients and competitive advantage for us. Some of the key applications in our technology platform are:

an ad server for tracking the placement and performance of content, creative messaging, and offerings on our websites and on those of publishers with whom we work;

database-driven applications for dynamically matching content, offers or brands to Internet visitors expressed needs or interests;

a platform for measuring and managing the performance of tens of thousands of PPC search engine advertising campaigns;

dashboards or reporting tools for displaying operating and financial metrics for thousands of ongoing marketing campaigns; and,

a compliance tool capable of cataloging and filtering content from the thousands of websites on which our marketing programs appear to ensure adherence to client branding guidelines and to regulatory requirements.

Approximately one-third of our employees are engineers, focused on building, maintaining and operating our technology platform.

Client relationships

We are a reliable source of measurably effective marketing results for our clients. We endeavor to work collaboratively and in a data-driven way with clients to improve our results for them. We believe our successful client relationships are due to:

our close, often direct, relationships with most of our large clients;

our ability to deliver measurable and attractive return on investment, or ROI, on clients marketing spending;

our ownership of, or access to large amounts of, targeted media inventory and associated Internet visitors in the client verticals on which we focus; and

our ability to consistently and reliably deliver large quantities of qualified leads, inquiries, clicks, calls, applications, or customers. As our high client retention rates, combined with our depth and breadth of online media in our primary client verticals indicate, we are an important marketing channel partner for our clients.

Client-driven online marketing approach

We focus on providing measurable Internet marketing and media services to our clients in a way that seeks to protect and enhance their brands and their relationships with prospective customers. The Internet marketing programs we execute are designed to adhere to strict client branding and regulatory guidelines, and are intended to match our clients brands and offers with expressed customer interest. We have contractual arrangements with third-party publishers to ensure that they follow our clients brand guidelines, and we utilize our proprietary technologies and trained personnel to help ensure compliance. In addition, we believe that providing relevant, helpful content and client offers that match an Internet visitor s self-selected interest in a product or service, such as requesting information about a financial product or education program, makes that visitor more likely to convert into a customer for our clients. We do not engage in online marketing practices such as spyware or

deceptive promotions, as we believe that these do not provide value to Internet visitors and can undermine our clients' brands.

Table of Contents

Acquisition strategy and success

We have successfully acquired vertical online marketing and media companies, including vertical website businesses, marketing services companies, and technologies. Our scale, breadth of capabilities and common technology platform have historically enabled us to integrate and generate value from acquisitions through our:

ability to monetize Internet media, coupled with client demand for our services, providing us with a particular advantage in acquiring targeted online media properties in the client verticals on which we focus;

capabilities in online media allowing us to generate a greater volume of qualified leads, inquiries, clicks, calls, applications, or customers, and therefore create more value, than other owners of marketing services companies that have aggregated client budgets or relationships; and

application of technologies across our business volume to create more value than previous owners of the technology.

Scale

We are one of the largest Internet performance marketing companies in the world. Our scale allows us to better meet the needs of large clients for reliability, volume and quality of service. It allows us to invest more in technologies that improve media yield, client results and our operating efficiency. We are also able to invest more in other forms of research and development, including determining and developing new types of vertical media, new approaches to engaging website visitors, and new segments of Internet visitors and client budgets, all of which can lead to advantages in media costs, and effectiveness in delivering client results.

Our Strategy

Our goal is to continue to be one of the largest and most successful performance marketing companies on the Internet, and eventually in other digitized media forms. We believe that we are in the early stages of a very large and long-term market opportunity. Our strategy for pursuing this opportunity includes the following key components:

focus on generating sustainable revenues by providing measurable value to our clients;

build QuinStreet and our industry sustainably by behaving ethically in all we do and by providing quality content and website experiences to Internet visitors;

remain vertically focused, choosing to grow through depth, expertise and coverage in our current client verticals; enter new client verticals selectively over time, organically and through acquisitions;

build a world class organization, with best-in-class capabilities for delivering measurable marketing results to clients and high yields or returns on media costs;

develop and evolve the best technologies and platform for managing vertical marketing and media on the Internet; focus on technologies that enhance media yield, improve client results and achieve scale efficiencies;

Edgar Filing: QUINSTREET, INC - Form 10-K

build, buy and partner with vertical content websites that provide the most relevant and highest quality visitor experiences in the client and media verticals we serve; and

be a client-driven organization; develop a broad set of media sources and capabilities to reliably meet client needs.

Clients

In fiscal years 2015, 2014 and 2013, no client comprised more than 10% of net revenue, and our top 20 clients accounted for 45%, 52% and 52% of net revenue. Since our service was first offered in 2001, we have

Table of Contents

developed a broad client base with many multi-year relationships. We enter into Internet marketing contracts with our clients, most of which are cancelable with little or no prior notice. In addition, these contracts do not contain penalty provisions for cancellation before the end of the contract term.

Sales and Marketing

We have an internal sales team that consists of employees focused on signing new clients and account managers who maintain and seek to increase our business with existing clients. Our sales people and account managers are each focused on a particular client vertical so that they develop an expertise in the marketing needs of our clients in that particular vertical.

Our marketing programs include advertising, attendance at trade shows and conferences.

Technology and Infrastructure

We have developed a suite of technologies to manage, improve and measure the results of the marketing programs we offer our clients. We use a combination of proprietary and third-party software as well as hardware from established technology vendors. We use specialized software for client management, building and managing websites, acquiring and managing media, managing our third-party publishers, and the matching of Internet visitors to our marketing clients. We have invested significantly in these technologies and plan to continue to do so to meet the demands of our clients and Internet visitors, to increase the scalability of our operations, and enhance management information systems and analytics in our operations. Our development teams work closely with our marketing and operating teams to develop applications and systems that can be used across our business. In fiscal years 2015, 2014 and 2013, we spent \$17.9 million, \$19.5 million and \$19.0 million on product development.

Our primary data center is at a third-party co-location center in San Francisco, California. All of the critical components of the system are redundant, and we have a backup data center in Las Vegas, Nevada. We have implemented these backup systems and redundancies to minimize the risk associated with earthquakes, fire, power loss, telecommunications failure, and other events beyond our control.

Intellectual Property

We rely on a combination of patent, trade secret, trademark and copyright laws in the United States and other jurisdictions together with confidentiality agreements and technical measures to protect the confidentiality of our proprietary rights. To protect our trade secrets, we control access to our proprietary systems and technology and enter into confidentiality and invention assignment agreements with our employees and consultants and confidentiality agreements with other third parties. QuinStreet is a registered trademark in the United States and other jurisdictions. We also have registered and unregistered trademarks for the names of many of our websites, and we own the domain registrations for our many website domains.

Our Competitors

Our primary competition falls into two categories: advertising and direct marketing services agencies, and online marketing and media companies. We compete for business on the basis of a number of factors including return on marketing expenditures, price, access to targeted media, ability to deliver large volumes or precise types of customer prospects, and reliability.

Advertising and direct marketing services agencies

Online and offline advertising and direct marketing services agencies control the majority of the large client marketing spending for which we primarily compete. So, while they are sometimes our competitors, agencies are

Table of Contents

also often our clients. We compete with agencies to attract marketing budget or spending from offline forms to the Internet or, once designated to be spent online, to be spent with us versus the agency or by the agency with others. When spending online, agencies spend with QuinStreet and with portals, other websites and ad networks.

Online marketing and media companies

We compete with other Internet marketing and media companies, in many forms, for online marketing budgets. Most of these competitors compete with us in one vertical. Examples include BankRate in the financial services client vertical and Education Dynamics in the education client vertical. Some of our competition also comes from agencies or clients spending directly with larger websites or portals, including Google, Yahoo! and Microsoft.

Government Regulation

We provide services through a number of different online and offline channels. As a result, we are subject to many federal and state laws and regulations, including restrictions on the use of unsolicited commercial email, such as the CAN-SPAM Act and state email marketing laws, and restrictions on the use of marketing activities conducted by telephone, including the Telemarketing Sales Rule (the TSR) and the Telephone Consumer Protection Act (the TCPA). Our business is also subject to federal and state laws and regulations regarding unsolicited commercial email, telemarketing, user privacy, search engines, Internet tracking technologies, direct marketing, data security, data privacy, pricing, sweepstakes, promotions, intellectual property ownership and infringement, trade secrets, export of encryption technology, acceptable content and quality of goods, and taxation, among others.

In addition, we provide services to a number of our clients that operate in highly regulated industries, particularly in our financial services and education verticals. In our financial services vertical, our websites and marketing services are subject to various federal, state and local laws, including state licensing laws, federal and state laws prohibiting unfair acts and practices, and federal and state advertising laws. In addition, we are a licensed insurance agent in all fifty states. The costs of compliance with these and new laws may increase in the future and any failure on our part to comply with such laws may subject us to significant liabilities. To date, we have generated a large portion of our revenue from our education client vertical, and nearly all of that revenue was generated from post-secondary educational institutions. Post-secondary educational institutions are subject to extensive federal and state regulations, including the Higher Education Act, Department of Education regulations and individual state higher education regulations. The regulations govern many aspects of these clients' operations, including marketing and recruiting activities, as well as the school's eligibility to participate in Title IV federal student financial aid programs, which is the principal source of funding for many of our education clients. There have been significant changes to these regulations in the recent past, and a high level of regulatory activity and heightened legislative scrutiny is expected to continue in the post-secondary education sector.

Employees

As of June 30, 2015, we had 638 employees, which consisted of 185 employees in product development, 67 in sales and marketing, 45 in general and administration and 341 in operations. None of our employees are represented by a labor union, except for our employees in Brazil who are represented by a union as required by Brazilian law.

Available Information

We file reports with the Securities and Exchange Commission (SEC), including annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and other filings required by the SEC. We make these reports and filings available free of charge on our website via the investor relations page on www.quinstreet.com as soon as reasonably practicable after such material is electronically filed with or furnished

Table of Contents

to the SEC. We also webcast our earnings calls and certain events we host with members of the investment community on our investor relations page at <http://investor.quinstreet.com>. The content of our website is not intended to be incorporated by reference into this report or in any other report or document we file, and any reference to this website and others included in this report is intended to be an inactive textual reference only.

The public may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site (<http://www.sec.gov>) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

Item 1A. Risk Factors

Investing in our common stock involves a high degree of risk. You should carefully consider the risks described below and the other information in this periodic report. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties that we are unaware of, or that we currently believe are not material, may also become important factors that adversely affect our business. If any of the following risks actually occur, our business, financial condition or results of operations could be adversely affected. In those cases, the trading price of our common stock could decline and you may lose all or part of your investment.

Risks Related to Our Business and Industry

We operate in an industry that is still developing and have a relatively new business model that is continually evolving, which makes it difficult to evaluate our business and prospects.

We derive nearly all of our revenue from the sale of online marketing and media services, which is a still developing industry that has undergone rapid and dramatic changes in its relatively short history and which is characterized by rapidly-changing Internet media and advertising technology, evolving industry standards, regulatory uncertainty, and changing user and client demands. As a result, we face risks and uncertainties such as but not limited to:

our still developing industry and relatively new business model;

changes in the economic condition, market dynamics, regulatory enforcement or legislative environment affecting our, our third-party publishers, and our clients' businesses;

our dependence on the availability and affordability of quality media from third-party publishers;

our dependence on Internet search companies to attract Internet visitors;

our ability to accurately forecast our results of operations and appropriately plan our expenses;

our ability to compete in our industry;

our ability to manage cyber security risks and costs associated with maintaining a robust security infrastructure;

our ability to develop our websites to allow Internet visitors to access our websites through mobile devices;

our ability to develop new services, enhancements and features to meet new demands from our clients; and

our ability to successfully challenge regulatory audits, investigations, or allegations of noncompliance with laws. If we are unable to address these risks, our business, results of operations and prospects could suffer.

Table of Contents

Negative changes in the market conditions or the regulatory environment have had in the past, and may in the future have, a material and adverse impact on our revenue, business, and growth.

Adverse macroeconomic conditions could cause decreases or delays in spending by our clients and could harm our ability to generate revenue and our results of operations. Moreover, to date, we have generated a large majority of our revenue from clients in our financial services and education client verticals. We expect that a majority of our revenue, at least in the near term, will continue to be generated from clients in our financial services and education client verticals. Changes in the market conditions or the regulatory environment in these two highly-regulated client verticals in particular have negatively impacted, and may continue to negatively impact, our clients' businesses, marketing practices and budgets and, therefore, our financial results.

Our, our third-party publishers, and our clients' businesses operate in highly regulated industries, subject to many laws and regulatory requirements, including federal, state, and local laws and regulations regarding unsolicited commercial email, telemarketing, user privacy, search engines, Internet tracking technologies, direct marketing, data security, data privacy, pricing, sweepstakes, promotions, intellectual property ownership and infringement, trade secrets, export of encryption technology, acceptable content and quality of goods, and taxation, among others. Each of our financial services, education and other client verticals is also subject to various laws and regulations, and our marketing activities on behalf of our clients are regulated. Many of these laws are frequently changing, and keeping our business in compliance with or bringing our business into compliance with new laws may be costly, affect our revenue and harm our financial results. Violations or alleged violations of laws by us, our third-party publishers or clients could result in damages, fines, criminal prosecution, unfavorable publicity, and restrictions on our ability to operate, any of which could have a material adverse effect on our business, financial condition, and results of operations. In addition, new laws or regulations or changes in enforcement of existing laws or regulations applicable to our clients could affect the activities or strategies of our clients and, therefore, lead to reductions in their level of business with us.

For example, the Federal Communications Commission amended the Telephone Consumer Protection Act (the "TCPA") that affects telemarketing calls. Certain provisions of the regulations became effective in July 2012, and additional regulations requiring prior express written consent for certain types of telemarketing calls became effective in October 2013. Our efforts to comply with the TCPA has not had a material impact on traffic conversion rates. However, depending on future traffic and product mix, it could potentially have a material effect on our revenue and profitability, including increasing our and our clients' exposure to enforcement actions and litigation. Additionally, we generate leads from which users provide a wireless number, and in turn a significant amount of revenue comes from calls made by our internal call centers as well as, in some cases, by third-party call centers. We also purchase a portion of our lead data from third-party publishers and cannot guarantee that these third-parties will comply with the regulations. Any failure by us or the third-party publishers on which we rely for telemarketing, email marketing, and other lead generation activities to adhere to or successfully implement appropriate processes and procedures in response to existing regulations and changing regulatory requirements could result in legal and monetary liability, significant fines and penalties, or damage to our reputation in the marketplace, any of which could have a material adverse effect on our business, financial condition, and results of operations. Furthermore, our clients may make business decisions based on their own experiences with the TCPA regardless of our products and the changes we implemented to comply with the new regulations. These decisions may negatively affect our revenue or profitability.

In connection with our and our third-party publishers' email campaigns to generate traffic for our clients, we are subject to various state and Federal laws regulating commercial email communications, including the federal CAN-SPAM Act. For example, in 2012, several of our clients were named defendants in a California Anti-Spam lawsuit relating to commercial emails which allegedly originated from us and our third party publishers. While the matter was ultimately resolved in our clients' favor, we were nonetheless obligated to indemnify certain of our clients for the fees incurred in the defense of such matter. If we or any of our third-party publishers fail to comply with any provisions of these laws or regulations, we could be subject to regulatory investigation, enforcement actions, and litigation, as well as indemnification obligations with respect to our clients. Any negative outcomes from such regulatory actions or litigation, including monetary penalties or damages, could

Table of Contents

have a material adverse effect on our financial condition, results of operation, and reputation. From time to time, we are subject to audits, inquiries, investigations, claims of non-compliance and lawsuits by federal and state governmental agencies, regulatory agencies, attorneys general, and other governmental or regulatory bodies, any of whom may allege violations of legal requirements. For example, in June 2012, we entered into an Assurance of Voluntary Compliance agreement following a civil investigation into certain of our marketing practices related to our education client vertical that was conducted by the attorneys general of a number of states. If the results of any future investigations, audits, inquiries, claims or litigation are unfavorable to us, we may be required to pay monetary fines or penalties or have restrictions placed on our business, which could materially adversely affect our business, financial condition, results of operations, and cash flows.

Federal and state regulations governing clients in our education vertical have negatively affected, and may continue to negatively affect, our clients' businesses, marketing practices, and budgets, any or all of which could reduce our clients' level of business with us and thereby have a material adverse effect on our financial results.

To date, we have generated a large portion of our revenue from our education client vertical, and nearly all of that revenue was generated from post-secondary educational institutions. Post-secondary educational institutions are subject to extensive federal and state regulations, including the Higher Education Act, Department of Education regulations and individual state higher education regulations. The regulations govern many aspects of these clients' operations, including marketing and recruiting activities, as well as the schools' eligibility to participate in Title IV federal student financial aid programs, which is the principal source of funding for many of our education clients. There have been significant changes to these regulations in the recent past, and a high level of regulatory activity and heightened legislative scrutiny are expected to continue in the post-secondary education sector.

For example, in January 2014, the Department of Education initiated an investigation of a publicly traded for-profit education client with respect to its enrollment activities and job placement, among other things, and in July 2014, the Department of Education signed an agreement with the client requiring it to wind down or sell its campuses. In addition, in October 2014, the Department of Education announced final regulations on gainful employment which went into effect on July 1, 2015. The regulation requires career college programs to prepare students for gainful employment in a recognized occupation which requires the programs' graduates' annual loan payments to be less than a defined percentage of earnings. Programs that do not pass the test could lose access to federal financial aid, which typically constitutes an important source of funding for these programs. As a result, such programs may be modified, curtailed, or eliminated. Similar regulatory and enforcement activities have affected and are expected to continue to affect our clients' businesses and marketing practices, which may result in a decrease in these clients' spending with us, and fluctuations in the volume and mix of our business with these clients. Changes in, or new interpretations of, applicable laws, regulations, standards or policies applicable to these clients could have a material adverse effect on their accreditation, authorization to operate in various states, or receipt of funds under Title IV programs, any of which, in turn, may harm our ability to generate revenue from these clients and our financial results.

We depend on third-party publishers for a significant portion of our visitors. Any decline in the supply of media available through these websites or increase in the price of this media could cause our revenue to decline or our cost to reach visitors to increase.

A significant portion of our revenue is attributable to visitor traffic originating from third-party publishers. In many instances, third-party publishers can change the media inventory they make available to us at any time and, therefore, impact our results of operations. In addition, third-party publishers may place significant restrictions on our offerings. These restrictions may prohibit advertisements from specific clients or specific industries, or restrict the use of certain creative content or formats. If a third-party publisher decides not to make media inventory available to us, or decides to demand a higher revenue share or places significant restrictions on the use of such inventory, we may not be able to find media inventory from other websites that satisfy our

Table of Contents

requirements in a timely and cost-effective manner. In addition, the number of competing online marketing service providers and advertisers that acquire inventory from websites continues to increase. Consolidation of Internet advertising networks and third-party publishers could eventually lead to a concentration of desirable inventory on websites or networks owned by a small number of individuals or entities, which could limit the supply or impact the pricing of inventory available to us. In the past, we have experienced declines in our financial services client vertical primarily due to volume declines caused by losses of available media from third-party publishers acquired by competitors, changes in search engine algorithms which reduced or eliminated traffic from some third-party publishers and increased competition for quality media. We cannot assure you that we will be able to acquire media inventory that meets our clients' performance, price, and quality requirements, in which case our revenue could decline or our operating costs could increase.

We depend upon Internet search providers to direct a significant portion of the visitors to our and our third-party publishers' websites. Changes in search engine algorithms have in the past harmed, and may in the future, harm the websites' placements in both paid and organic search result listings, which may cause the number of visitors to our and our third-party publishers' websites and as a result, cause our revenue to decline.

Our success depends on our ability to attract online visitors to our and our third-party publishers' websites and convert them into prospects for our clients in a cost-effective manner. We depend on Internet search providers to direct a substantial share of visitors to our websites. Search providers offer two types of search results: organic and paid listings. Organic listings are displayed based solely on formulas designed by the search companies. Paid listings are displayed based on a combination of the advertiser's bid price for particular keywords and the search engines' assessment of the website's relevance and quality.

Our ability to maintain or grow the number of visitors to our websites from search providers is not entirely within our control. Search providers frequently revise their algorithms and changes in their algorithms have in the past caused, and could in the future, cause our websites to receive less favorable placements. We have experienced fluctuations in organic rankings for a number of our websites and some of our paid listing campaigns have also been harmed by search engine algorithmic changes. Search providers could determine that our or our third-party publishers' websites' content is either not relevant or is of poor quality.

In addition, we may fail to optimally manage our paid listings, or our proprietary bid management technologies may fail. To attract and retain visitors, we use search engine optimization (SEO) which involves developing content to optimize ranking in search engine results. Our ability to successfully manage SEO efforts across our owned and operated websites and our and our third-party publishers' websites depends on our timely and effective modification of SEO practices implemented in response to periodic changes in search engine algorithms and methodologies and changes in search query trends. If we fail to successfully manage our SEO strategy, our websites may receive less favorable placement in organic or paid listings, which would reduce the number of visitors to our sites, decrease conversion rates and repeat business and have a detrimental effect on our ability to generate revenue. If visits to our websites decrease, we may need to use more costly sources to replace lost visitors, and such increased expense could adversely affect our business and profitability. Even if we succeed in driving traffic to our owned and operated websites and to our clients' websites, we may not be able to effectively monetize this traffic or otherwise retain users. Our failure to do so could result in lower advertising revenue from our owned and operated websites as well as third-party publishers' websites, which would have an adverse effect on our business, financial condition, and results of operations.

Our results of operations have fluctuated in the past and may do so in the future, which makes our results of operations difficult to predict and could cause our results of operations to fall short of analysts' and investors' expectations.

Historically, quarterly and annual results of operations have fluctuated due to changes in our business, our industry, and the general economic climate. We expect our future results of operations to vary significantly from

Table of Contents

quarter to quarter due to a variety of factors, many of which are beyond our control. Our fluctuating results of operations could cause our performance and outlook to be below the expectations of securities analysts and investors, causing the price of our common stock to decline. Our business is changing and evolving, and, as a result, our historical results of operations may not be useful to you in predicting our future results of operations. Factors that may increase the volatility of our results of operations include, but are not limited to, the following:

changes in client volume;

loss of or reduced demand by existing clients;

the availability and price of quality media;

consolidation of media sources;

changes in search engine algorithms that affect our and our publishers' websites; and

regulatory and legislative changes.

As a result of changes in our business model, increased investments, increased expenditures for certain businesses, products, services, and technologies, we anticipate fluctuations in our Adjusted EBITDA margin.

We have invested and expect to continue to invest in new businesses, products, markets, services and technologies, including more expensive forms of media. For example, we expended significant resources in developing new products and technologies and made strategic outlays in, among other things, partnerships, which in the short term will have the effect of reducing our Adjusted EBITDA margin. If we are unsuccessful in our monetization efforts with respect to new products and investments, we may fail to engage and retain users and clients. We may have insufficient revenue to fully offset liabilities and expenses in connection with these investments and may experience inadequate, unpredictable return of capital on our investments. As a result of these investments, we expect fluctuations in our Adjusted EBITDA margin.

If we fail to compete effectively against other online marketing and media companies and other competitors, we could lose clients and our revenue may decline.

The market for online marketing is intensely competitive, and we expect this competition to continue to increase in the future both from existing competitors and, given the relatively low barriers to entry into the market, from new competitors. We compete both for clients and for limited high-quality media. We compete for clients on the basis of a number of factors, including return on investment of clients' marketing spending, price, and client service.

We compete with Internet and traditional media companies for a share of clients' overall marketing budgets, including:

online marketing or media services providers such as BankRate in the financial services client vertical and Education Dynamics in the education client vertical;

offline and online advertising agencies;

major Internet portals and search engine companies with advertising networks;

other online marketing service providers, including online affiliate advertising networks and industry-specific portals or lead generation companies;

third-party publishers with their own sales forces that sell their online marketing services directly to clients;

in-house marketing groups and activities at current or potential clients;

offline direct marketing agencies;

Table of Contents

mobile and social media; and

television, radio, and print companies.

Competition for web traffic among websites and search engines, as well as competition with traditional media companies, has resulted and may continue to result in significant increases in media pricing, declining margins, reductions in revenue, and loss of market share. In addition, if we expand the scope of our services, we may compete with a greater number of websites, clients, and traditional media companies across an increasing range of different services, including in vertical markets where competitors may have advantages in expertise, brand recognition, and other areas. Internet search companies with brand recognition, such as Google, Yahoo! and Microsoft, have significant numbers of direct sales personnel and substantial proprietary advertising inventory and web traffic that provide a significant competitive advantage and have a significant impact on pricing for Internet advertising and web traffic. Some of these companies may offer or develop more vertically targeted products that match users with products and services and, thus, compete with us more directly. For example, Google's search engine provides comparison shopping for insurance and other financial products, which could in the future compete directly with our comparison platforms, divert our users and ultimately our clients, and result in a significant loss of revenue for our financial services vertical. The trend toward consolidation in online marketing may also affect pricing and availability of media inventory and web traffic. Many of our current and potential competitors also enjoy other competitive advantages over us, such as longer operating histories, greater brand recognition, larger client bases, greater access to advertising inventory on high-traffic websites, and significantly greater financial, technical, and marketing resources. As a result, we may not be able to compete successfully. Competition from other marketing service providers' online and offline offerings has affected and may continue to affect both volume and price, and, thus, revenue, profit margins, and profitability. If we fail to deliver results that are superior to those that other online marketing service providers deliver to clients, we could lose clients and market share, and our revenue may decline.

We are exposed to online security risks and security breaches particularly given that we gather, transmit and store personally identifiable information. Unauthorized access to or accidental disclosure of confidential or proprietary data may cause us to incur significant expenses and may negatively affect our reputation and business.

We gather, transmit, and store information about our users and marketing and media partners, including personally identifiable information. This information may include social security numbers, credit scores, credit card information, and financial and health information, some of which is held or managed by our third-party vendors. As a result, we are subject to certain contractual terms, including third-party security reviews, as well as federal, state and foreign laws and regulations designed to protect personally identifiable information. Despite our implementation of security measures and controls, our information technology and infrastructure are susceptible to electronic or physical computer break-ins, cyber attacks, malware, viruses, fraud, employee error, and other disruptions and security breaches that could result in third parties gaining unauthorized access to our systems and data. In addition, the increased use of mobile devices increases the risk of unintentional disclosure of data including personally identifiable information. We may be unable to anticipate all our vulnerabilities and implement adequate preventative measures and, in some cases, we may not be able to immediately detect a security incident. In the past, we have experienced security incidents involving access to our databases. Although to our knowledge no sensitive financial or personal information has been compromised, any future security incidents could result in the compromise of such data and subject us to liability or result in cancellation of client contracts. Any security incident may also result in a misappropriation of our proprietary information or that of our users, clients, and third-party publishers, which could result in legal and financial liability, as well as harm to our reputation.

Privacy concerns relating to our data collection practices and any perceived or actual unauthorized disclosure of personally identifiable information, whether through breach of our network by an unauthorized party, employee theft, misuse, or error could harm our reputation, impair our ability to attract website visitors and to attract and retain our clients, result in a loss of confidence in the security of our products and services, or

Table of Contents

subject us to claims or litigation arising from damages suffered by consumers, and thereby harm our business and results of operations. In addition, we could incur significant costs for which our insurance policies may not adequately cover us and expend significant resources in protecting against security breaches and complying with the multitude of state, federal and foreign laws regarding data privacy and data breach notification obligations.

More people are using mobile devices to access the Internet. If we fail to develop our websites to keep pace with this shift in user devices, we may not remain competitive and could lose clients or advertising inventory.

The number of people who access the Internet through mobile devices such as smart phones and tablets has increased dramatically in the past few years, and we expect the trend to continue. Our online marketing services and content were originally designed for desktop or laptop computers. The shift from desktop or laptop computers to mobile devices could potentially deteriorate the user experience for visitors to our websites and may make it more difficult for visitors to respond to our offerings. It also requires us to develop new offerings specifically designed for mobile devices, such as social media advertising opportunities. Additionally, the monetization of our online marketing services and content on these mobile devices might not be as lucrative for us compared to those on desktop and laptop computers. If we fail to develop our websites cost effectively and improve the monetization capabilities of our mobile marketing services, we may not remain competitive, which may negatively affect our business and results of operations.

A reduction in online marketing spend by our clients, a loss of clients or lower advertising yields may seriously harm our business, financial condition, and results of operations. In addition, a substantial portion of our revenue is generated from a limited number of clients and, if we lose a major client, our revenue will decrease and our business and prospects may be harmed.

We rely on clients' marketing spend on our owned and operated websites and on our network of third-party publisher websites. We have historically derived, and we expect to continue to derive, the majority of our revenue through the delivery of qualified leads, inquiries, clicks, calls, applications, and customers. One component of our platform that we use to generate client interest is our system of monetization tools, which is designed to match content with client offerings in a manner that optimizes revenue yield and end-user experience. Clients will stop spending marketing funds on our owned and operated websites or our third-party publisher websites if their investments do not generate leads and ultimately users or if we do not deliver advertisements in an appropriate and effective manner. The failure of our yield-optimized monetization technology to effectively match advertisements or client offerings with our content in a manner that results in increased revenue for our clients would have an adverse impact on our ability to maintain or increase our revenue from client marketing spend.

Even if our content is effectively matched with advertisements or client offerings, our current clients may not fulfill their obligations under their existing contracts with us and they may not continue to place marketing spend or advertisements on our websites beyond the terms of their existing contracts. If any of our clients decided not to continue marketing spend or advertising on our owned and operated websites or on our third-party publisher websites, we could experience a rapid decline in our revenue over a relatively short period of time. Any factors that limit the amount our clients are willing to and do spend on marketing or advertising with us, or to purchase leads from us, could have a material adverse effect on our business.

Furthermore, a substantial portion of our revenue is generated from a limited number of clients. None of our clients account for 10% or more of our net revenue. However, we have a few clients that account for a large portion of our net revenue. Our clients can generally terminate their contracts with us at any time and they do not have minimum purchase requirements. Clients may also fail to renew their contracts or reduce their level of business with us, leading to lower revenue.

In addition, reductions in business by one or more significant clients may trigger price reductions for our other clients whose prices for certain products are determined in whole or in part by client bidding or

Table of Contents

competition. Any such price reduction could result in lower revenue. We expect that a limited number of clients will continue to account for a significant percentage of our revenue, and the loss of any one of these clients, or material reduction in their marketing spending with us, could decrease our revenue and harm our business.

We rely on our management team and other key employees, and the loss of one or more key employees could harm our business.

Our success and future growth depend upon the continued services of our management team, including Douglas Valenti, Chief Executive Officer, and other key employees in all areas of our organization. From time to time, there may be changes in our key employees resulting from the hiring or departure of executives and employees, which could disrupt our business. We have experienced declines in our business and a depressed stock price, making our equity and cash incentive compensation programs less attractive to current and potential key employees. If we lose the services of key employees or if we are unable to attract and retain additional qualified employees, our business and growth could suffer.

Third-party publishers or vendors may engage in unauthorized or unlawful acts that could subject us to significant liability or cause us to lose clients.

We generate a significant portion of our web visitors from online media that we purchase from third-party publishers. We also rely on third-party call centers and email marketers. Some of these third-parties are authorized to use our clients' brands, subject to contractual restrictions. Any activity by third-party publishers or vendors that clients view as potentially damaging to their brands, whether or not permitted by our contracts with our clients, could harm our relationship with the client and cause the client to terminate its relationship with us, resulting in a loss of revenue. In addition, we may also face liability for any failure of our third-party publishers or vendors to comply with regulatory requirements, as further described in the risk factor beginning, *Negative changes in the market conditions or the regulatory environment have had in the past, and may in the future have, a material and adverse impact on our revenue, business, and growth.*

The law is unsettled on the extent of liability that an advertiser in our position has for the activities of third-party publishers or vendors. Department of Education regulations impose liability on our education clients for misrepresentations made by their marketing service providers. In addition, certain of our contracts impose liability on us, including indemnification obligations, for the acts of our third-party publishers or vendors. We could be subject to costly litigation and, if we are unsuccessful in defending ourselves, we could incur damages for the unauthorized or unlawful acts of third-party publishers or vendors.

If we fail to continually enhance and adapt our products and services to keep pace with rapidly changing technologies and industry standards, we may not remain competitive and could lose clients or advertising inventory.

The online media and marketing industry is characterized by rapidly changing standards, changing technologies, frequent new product and service introductions, and changing user and client demands. The introduction of new technologies and services embodying new technologies and the emergence of new industry standards and practices could render our existing technologies and services obsolete and unmarketable or require unanticipated investments in technology. We continually make enhancements and other modifications to our proprietary technologies, and these changes may contain design or performance defects that are not readily apparent. If our proprietary technologies fail to achieve their intended purpose or are less effective than technologies used by our competitors, our business could be harmed.

Our future success will depend in part on our ability to successfully adapt to these rapidly changing online media formats and other technologies. If we fail to adapt successfully, we could lose clients or advertising inventory.

Table of Contents

We rely on certain advertising agencies for the purchase of various advertising and marketing services on behalf of their clients. Such agencies may have or develop high-risk credit profiles, which may result in credit risk to us.

A portion of our client business is sourced through advertising agencies and, in many cases, we contract with these agencies and not directly with the underlying client. Contracting with these agencies subjects us to greater credit risk than where we contract with clients directly. In many cases, agencies are not required to pay us unless and until they are paid by the underlying client. In addition, many agencies are thinly capitalized and have or may develop high-risk credit profiles. This credit risk may vary depending on the nature of an agency's aggregated client base. If an agency became insolvent, or if an underlying client did not pay the agency, we may be required to write off account receivables as bad debt. Any such write-offs could have a materially negative effect on our results of operations for the periods in which the write-offs occur.

Damage to our reputation could harm our business, financial condition and results of operations.

Our business is dependent on attracting a large number of visitors to our and our third-party publishers' websites and providing leads, inquiries, clicks, calls, applications, and customers to our clients, which depends in part on our reputation within the industry and with our clients. Certain other companies within our industry regularly engage in activities that others may view as unlawful or inappropriate. These activities by third-parties, such as spyware or deceptive promotions, may be seen as characteristic of participants in our industry and may therefore harm the reputation of all participants in our industry, including us.

Our ability to attract potential users and, thereby, clients, also depends in part on users receiving competitive levels of customer service, responsiveness and prices from our clients. If our clients do not provide competitive levels of service to users, our reputation and therefore our ability to attract additional clients and users could be harmed.

In addition, from time to time, we may be subject to investigations, inquiries or litigation by various regulators, which may harm our reputation regardless of the outcome of any such action. For example, in 2012 we responded to a civil investigation conducted by the attorneys general of a number of states into certain of our marketing and business practices resulting in us entering into an Assurance of Voluntary Compliance agreement. Negative perceptions of our business may result in additional regulation, enforcement actions by the government and increased litigation, any of which may affect our business and result in lower revenue.

We also believe that building brand awareness is important to achieving increased demand for certain of our products and services. Accordingly, we have dedicated, and expect to continue to dedicate, significant operating capital and resources to building brand awareness, which may not be successful. Our failure to build brand awareness may adversely affect our ability to attract and retain clients in a cost-effective manner and as a result, our business, financial condition and results of operations.

Any damage to our reputation, including from publicity from legal proceedings against us or companies that work within our industry, governmental proceedings, consumer class action litigation, or the disclosure of information security breaches or private information misuse, could adversely affect our business, financial condition and results of operations.

If we do not effectively manage any future growth or if we are not able to scale our products quickly enough to meet our clients' needs, our operating performance will suffer and we may lose clients.

We have historically experienced growth in our operations and operating locations. This growth has placed, and any future growth will continue to place, significant demands on our management and our operational and financial infrastructure. Growth, if any, may make it more difficult for us to accomplish the following:

successfully scaling our technology to accommodate a larger business and integrate acquisitions;

maintaining our standing with key vendors, including Internet search companies and third-party publishers;

Table of Contents

maintaining our client service standards; and

developing and improving our operational, financial and management controls and maintaining adequate reporting systems and procedures.

Our future success depends in part on the efficient performance of our software and technology infrastructure. As the numbers of websites and Internet users increase, our technology infrastructure may not be able to meet the increased demand. Unexpected constraints on our technology infrastructure could lead to slower website response times or system failures and adversely affect the availability of websites and the level of user responses received, which could result in the loss of clients or revenue or harm to our business and results of operations.

In addition, our personnel, systems, procedures, and controls may be inadequate to support our future operations. The improvements required to manage growth may require us to make significant expenditures, expand, train and manage our employee base, and reallocate valuable management resources. We may spend substantial amounts to purchase or lease data centers and equipment, upgrade our technology and network infrastructure to handle increased traffic on our owned and operated websites and roll out new products and services. This expansion could be expensive and complex and could result in inefficiencies or operational failures. If we do not implement this expansion successfully, or if we experience inefficiencies and operational failures during its implementation, the quality of our products and services and our users experience could decline. This could damage our reputation and cause us to lose current and potential users and clients. The costs associated with these adjustments to our architecture could harm our operating results. Accordingly, if we fail to effectively manage growth, our operating performance will suffer, and we may lose clients, key vendors and key personnel.

Interruption or failure of our information technology and communications systems could impair our ability to effectively deliver our services, which could cause us to lose clients and harm our results of operations.

Our delivery of marketing and media services depends on the continuing operation of our technology infrastructure and systems. Any damage to or failure of our systems could result in interruptions in our ability to deliver offerings quickly and accurately or process visitors' responses emanating from our various web presences. Interruptions in our service could reduce our revenue and profits, and our reputation could be damaged if users or clients perceive our systems to be unreliable. Our systems and operations are vulnerable to damage or interruption from earthquakes, terrorist attacks, floods, fires, power loss, break-ins, hardware or software failures, telecommunications failures, cyber attacks, computer viruses or other attempts to harm our systems, and similar events. If we or third-party data centers that we utilize were to experience a major power outage, we would have to rely on back-up generators. These back-up generators may not operate properly through a major power outage and their fuel supply could also be inadequate during a major power outage or disruptive event. Furthermore, we do not currently have backup generators at our Foster City, California headquarters. Information systems such as ours may be disrupted by even brief power outages, or by the fluctuations in power resulting from switches to and from back-up generators. This could give rise to obligations to certain of our clients which could have an adverse effect on our results of operations for the period of time in which any disruption of utility services to us occurs.

Our primary data center is at a third-party co-location center in San Francisco, California. All of the critical components of the system are redundant and we have a backup data center in Las Vegas, Nevada. We have implemented these backup systems and redundancies to minimize the risk associated with earthquakes, fire, power loss, telecommunications failure, and other events beyond our control; however, these backup systems may fail or may not be adequate to prevent losses.

Any unscheduled interruption in our service would result in an immediate loss of revenue. If we experience frequent or persistent system failures, the attractiveness of our technologies and services to clients and third-party

Table of Contents

publishers could be permanently harmed. The steps we have taken to increase the reliability and redundancy of our systems are expensive, reduce our operating margin and may not be successful in reducing the frequency or duration of unscheduled interruptions.

Acquisitions and investments could complicate operations, or could result in dilution and other harmful consequences that may adversely impact our business and results of operations.

Acquisitions have historically been an important element of our overall corporate strategy and use of capital. Any possible future acquisitions or investments could be material to our financial condition and results of operations. We may evaluate and enter into discussions regarding a wide array of potential strategic transactions. The process of integrating an acquired company, business or technology has created, and will continue to create, unforeseen operating difficulties and expenditures. Our failure to address these risks or other problems encountered in connection with our past or future acquisitions and investments could cause us to fail to realize the anticipated benefits of such acquisitions or investments, incur unanticipated liabilities and harm our business generally.

Future acquisitions could also result in dilutive issuances of our equity securities, the incurrence of debt, contingent liabilities, amortization expenses, impairment of goodwill or restructuring charges, any of which could harm our financial condition or results. Also, the anticipated benefit of many of our acquisitions may not materialize.

We rely on call centers, Internet and data center providers, and other third-parties for key aspects of the process of providing services to our clients, and any failure or interruption in the services and products provided by these third-parties could harm our business.

We rely on internal and third-party call centers as well as third-party vendors, data centers and Internet providers. Notwithstanding disaster recovery and business continuity plans and precautions instituted to protect our clients and us from events that could interrupt delivery of services, there is no guarantee that such interruptions would not result in a prolonged interruption in our ability to provide services to our clients. Any temporary or permanent interruption in the services provided by our call centers or third-party providers could significantly harm our business.

In addition, any financial or other difficulties our third-party providers face may have negative effects on our business, the nature and extent of which we cannot predict. We exercise little control over our third-party vendors, which increases our vulnerability to problems with the services they provide. We license technology and related databases from third-parties to facilitate analysis and storage of data and delivery of offerings. We have experienced interruptions and delays in service and availability for data centers, bandwidth and other technologies in the past. Any errors, failures, interruptions or delays experienced in connection with these third-party technologies and services could adversely affect our business and could expose us to liabilities to third-parties.

We may need additional capital in the future to meet our financial obligations and to pursue our business objectives. Additional capital may not be available or may not be available on favorable terms and our business and financial condition could therefore be adversely affected.

While we anticipate that our existing cash and cash equivalents, together with availability under our revolving loan facility and cash from operations, will be sufficient to fund our operations for at least the next 12 months, we may need to raise additional capital, including debt capital, to fund operations in the future or to finance acquisitions. If we seek to raise additional capital in order to meet various objectives, including developing future technologies and services, increasing working capital, acquiring businesses, and responding to competitive pressures, capital may not be available on favorable terms or may not be available at all. In addition, our revolving loan facility limits the incurrence of additional indebtedness and is secured by substantially all of

Table of Contents

our assets, leaving us with limited collateral for additional financing. Lack of sufficient capital resources could significantly limit our ability to take advantage of business and strategic opportunities. Any additional capital raised through the sale of equity or debt securities with an equity component would dilute our stock ownership. If adequate additional funds are not available, we may be required to delay, reduce the scope of, or eliminate material parts of our business strategy, including potential additional acquisitions or development of new technologies.

Our quarterly revenue and results of operations may fluctuate significantly from quarter to quarter due to fluctuations in advertising spending, including seasonal and cyclical effects.

In addition to other factors that cause our results of operations to fluctuate, results are also subject to significant seasonal fluctuation. In particular, our quarters ending December 31 (our second fiscal quarter) are typically characterized by seasonal weakness. During that quarter, there is generally lower availability of lead supply from some forms of media during the holiday period on a cost effective basis and some of our clients have lower budgets. In our quarters ending March 31 (our third fiscal quarter), this trend generally reverses with better lead availability and often new budgets at the beginning of the year for our clients with fiscal years ending December 31.

Furthermore, advertising spend on the Internet, similar to traditional media, tends to be cyclical and discretionary as a result of factors beyond our control, including budgetary constraints and buying patterns of clients, as well as economic conditions affecting the Internet and media industry. Poor macroeconomic conditions could decrease our clients' advertising spending and thereby have a material adverse effect on our business, financial condition, and operating results.

If the market for online marketing services fails to continue to develop, our success may be limited, and our revenue may decrease.

The online marketing services market is relatively new and rapidly evolving, and it uses different measurements from traditional media to gauge its effectiveness. Some of our current or potential clients have little or no experience using the Internet for advertising and marketing purposes and have allocated only limited portions of their advertising and marketing budgets to the Internet. The adoption of online marketing, particularly by those companies that have historically relied upon traditional media for advertising, requires the acceptance of a new way of conducting business, exchanging information and evaluating new advertising and marketing technologies and services.

In particular, we are dependent on our clients' adoption of new metrics to measure the success of online marketing campaigns. Certain of our metrics are subject to inherent challenges in measurement, and real or perceived inaccuracies in such metrics may harm our reputation and negatively affect our business. We present key metrics such as cost-per-click, cost-per-lead and cost-per-acquisition, some of which are calculated using internal data. We periodically review and refine some of our methodologies for monitoring, gathering, and calculating these metrics. While our metrics are based on what we believe to be reasonable measurements and methodologies, there are inherent challenges in deriving our metrics. In addition, our user metrics may differ from estimates published by third-parties or from similar metrics of our competitors due to differences in methodology. If clients or publishers do not perceive our metrics to be accurate, or if we discover material inaccuracies in our metrics, it could negatively affect our business model and current or potential clients' willingness to adopt our metrics.

We may also experience resistance from traditional advertising agencies who may be advising our clients. We cannot assure you that the market for online marketing services will continue to grow. If the market for online marketing services fails to continue to develop or develops more slowly than we anticipate, the success of our business may be limited, and our revenue may decrease.

Table of Contents

If we do not adequately protect our intellectual property rights, our competitive position and business may suffer.

Our ability to compete effectively depends upon our proprietary systems and technology. We rely on patent, trade secret, trademark and copyright law, confidentiality agreements, and technical measures to protect our proprietary rights. We enter into confidentiality agreements with our employees, consultants, independent contractors, advisors, client vendors, and publishers. These agreements may not effectively prevent unauthorized disclosure of confidential information or unauthorized parties from copying aspects of our services or obtaining and using our proprietary information. Further, these agreements may not provide an adequate remedy in the event of unauthorized disclosures or uses, and we cannot assure you that our rights under such agreements will be enforceable. Effective patent, trade secret, copyright, and trademark protection may not be available in all countries where we currently operate or in which we may operate in the future. Some of our systems and technologies are not covered by any copyright, patent or patent application. We cannot guarantee that: (i) our intellectual property rights will provide competitive advantages to us; (ii) our ability to assert our intellectual property rights against potential competitors or to settle current or future disputes will be effective; (iii) our intellectual property rights will be enforced in jurisdictions where competition may be intense or where legal protection may be weak; (iv) any of the patent, trademark, copyright, trade secret or other intellectual property rights that we presently employ in our business will not lapse or be invalidated, circumvented, challenged, or abandoned; (v) competitors will not design around our protected systems and technology; or (vi) that we will not lose the ability to assert our intellectual property rights against others.

We have from time to time become aware of third-parties who we believe may have infringed our intellectual property rights. Such infringement or infringement of which we are not yet aware could reduce our competitive advantages and cause us to lose clients, third-party publishers or could otherwise harm our business. Policing unauthorized use of our proprietary rights can be difficult and costly. Litigation, while it may be necessary to enforce or protect our intellectual property rights, could result in substantial costs and diversion of resources and management attention and could adversely affect our business, even if we are successful on the merits. In addition, others may independently discover trade secrets and proprietary information, and in such cases we could not assert any trade secret rights against such parties.

Third-parties may sue us for intellectual property infringement, which, even if unsuccessful, could require us to expend significant costs to defend or settle.

We cannot be certain that our internally developed or acquired systems and technologies do not and will not infringe the intellectual property rights of others. In addition, we license content, software and other intellectual property rights from third-parties and may be subject to claims of infringement if such parties do not possess the necessary intellectual property rights to the products they license to us.

In addition, we have in the past, and may in the future, be subject to legal proceedings and claims that we have infringed the patents or other intellectual property rights of third-parties. These claims sometimes involve patent holding companies or other adverse patent owners who have no relevant product revenue and against whom our own intellectual property rights, if any, may therefore provide little or no deterrence. For example, in December 2012, Internet Patents Corporation (IPC) filed a patent infringement lawsuit against us in the Northern District of California alleging that some of our websites infringe a patent held by IPC. IPC is a non-practicing entity that relies on asserting its patents as its primary source of revenue. In addition, third-parties have asserted and may in the future assert intellectual property infringement claims against our clients, and we have agreed in certain circumstances to indemnify and defend against such claims. Any intellectual property-related infringement claims, whether or not meritorious and regardless of the outcome of the litigation, could result in costly litigation and could divert management resources and attention. Should we be found liable for infringement, we may be required to enter into licensing agreements, if available on acceptable terms or at all, pay substantial damages, or limit or curtail our systems and technologies. Moreover, we may need to redesign some of our systems and technologies to avoid future infringement liability. Any of the foregoing could prevent us from competing effectively and increase our costs.

Table of Contents

Additionally, the laws relating to use of trademarks on the Internet are unsettled, particularly as they apply to search engine functionality. For example, other Internet marketing and search companies have been sued for trademark infringement and other intellectual property-related claims for displaying ads or search results in response to user queries that include trademarked terms. The outcomes of these lawsuits have differed from jurisdiction to jurisdiction. We may be subject to trademark infringement, unfair competition, misappropriation or other intellectual property-related claims which could be costly to defend and result in substantial damages or otherwise limit or curtail our activities, and therefore adversely affect our business or prospects.

Limitations on our ability to collect and use data derived from user activities, as well as new technologies that block our ability to deliver Internet-based advertising, could significantly diminish the value of our services and have an adverse effect on our ability to generate revenue.

When a user visits our websites, we use technologies, including cookies, to collect information such as the user's IP address and the user's past responses to our offerings. We also have relationships with data partners that collect and provide us with user data. We access and analyze this information in order to determine the effectiveness of a marketing campaign and to determine how to modify the campaign. The use of cookies is the subject of litigation, regulatory scrutiny and industry self-regulatory activities, including the discussion of do-not-track technologies and guidelines.

Additionally, users are able to block or delete cookies from their browser. Periodically, certain of our clients and publishers seek to prohibit or limit our collection or use of data derived from the use of cookies. Technologies, tools, software and applications (including new and enhanced web browsers) have been developed, and are likely to continue to be developed, that can block or allow users to opt out of display, search, and Internet-based advertising and content, delete or block the cookies used to deliver such advertising, or shift the location in which advertising appears on pages so that our advertisements do not show up in the most monetizable places on our pages or are obscured. As a result, the adoption of such technologies, tools, software, and applications could reduce the number of display and search advertisements that we are able to deliver and/or our ability to deliver Internet-based advertising and this, in turn, could reduce our results of operations.

Interruptions, failures or defects in our data collection systems, as well as privacy concerns and regulatory changes or enforcement actions affecting our or our data partners' ability to collect user data, could also limit our ability to analyze data from, and thereby optimize, our clients marketing campaigns. If our access to data is limited in the future, we may be unable to provide effective technologies and services to clients and we may lose clients and revenue.

If we fail to maintain proper and effective internal controls, our ability to produce accurate financial statements on a timely basis or effectively prevent fraud could be impaired, which would adversely affect our ability to operate our business.

In order to comply with the Sarbanes-Oxley Act of 2002, our management is responsible for establishing and maintaining adequate internal control over financial reporting to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. We may in the future discover areas of our internal financial and accounting controls and procedures that need improvement. Our internal control over financial reporting will not prevent or detect all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. All control systems have inherent limitations, and, accordingly, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud will be detected. If we are unable to maintain proper and effective internal controls, we may not be able to produce accurate financial statements on a timely basis, which could adversely affect our ability to operate our business and could result in regulatory action.

Table of Contents

As a creator and a distributor of Internet content, we face potential liability and expenses for legal claims based on the nature and content of the materials that we create or distribute. If we are required to pay damages or expenses in connection with these legal claims, our results of operations and business may be harmed.

We display original content and third-party content on our websites and in our marketing messages. As a result, we face potential liability based on a variety of theories, including defamation, negligence, deceptive advertising (including Department of Education regulations regarding misrepresentation in education marketing), copyright or trademark infringement. We are also exposed to risk that content provided by third-parties is inaccurate or misleading, and for material posted to our websites by users and other third-parties. These claims, whether brought in the United States or abroad, could divert management time and attention away from our business and result in significant costs to investigate and defend, regardless of the merit of these claims. In addition, if we become subject to these types of claims and are not successful in our defense, we may be forced to pay substantial damages.

We face additional risks in conducting business in international markets.

We have entered into certain international markets and may enter into additional international markets in the future, including through acquisitions. We have limited experience in marketing, selling and supporting our services outside of the United States, and we may not be successful in introducing or marketing our services abroad. For example, in fiscal year 2015, we acquired a company specializing in online marketing to financial services clients in Brazil. While we already have a foothold in the Brazilian education market, our expansion into the financial services market in Brazil is new and as such, we cannot guarantee that we will achieve the same success as we have with the Brazilian education market.

There are risks and challenges inherent in conducting business in international markets, such as:

adapting our technologies and services to foreign clients' preferences and customs;

successfully navigating foreign laws and regulations, including marketing, privacy regulations, employment and labor regulations;

changes in foreign political and economic conditions;

tariffs and other trade barriers, fluctuations in currency exchange rates and potentially adverse tax consequences;

language barriers or cultural differences;

reduced or limited protection for intellectual property rights in foreign jurisdictions;

difficulties and costs in staffing, managing or overseeing foreign operations;

education of potential clients who may not be familiar with online marketing;

challenges in collecting accounts receivables; and

Edgar Filing: QUINSTREET, INC - Form 10-K

successfully interpreting and complying with the U.S. Foreign Corrupt Practices Act and similar worldwide anti-bribery laws, particularly when operating in countries with varying degrees of governmental corruption.

If we are unable to successfully expand and market our services abroad, our business and future growth may be harmed, and we may incur costs that may not lead to future revenue.

In the past, we have recognized impairments in the carrying value of goodwill. Additional such charges in the future could negatively affect our financial condition and results of operations.

We continue to have a substantial amount of goodwill and purchased intangible assets on our consolidated balance sheet as a result of historical acquisitions. The carrying value of goodwill represents the fair value of an

Table of Contents

acquired business in excess of identifiable assets and liabilities as of the acquisition date. The carrying value of intangible assets with identifiable useful lives represents the fair value of relationships, content, domain names, acquired technology, among others, as of the acquisition date, and are amortized based on their economic lives. Goodwill expected to contribute indefinitely to our cash flows is not amortized, but must be evaluated for impairment at least annually. If the carrying value exceeds current fair value as determined based on the discounted future cash flows of the related business, the goodwill or intangible asset is considered impaired and is reduced to fair value via a non-cash charge to earnings. Events and conditions that could result in impairment include adverse changes in the regulatory environment, a reduced market capitalization or other factors leading to reduction in expected long-term growth or profitability.

Goodwill impairment analysis and measurement is a process that requires significant judgment. Our stock price and any estimated control premium are factors affecting the assessment of the fair value of our underlying reporting units for purposes of performing any goodwill impairment assessment. For example, our public market capitalization sustained a decline after December 31, 2012 and June 30, 2014 to a value below the net book carrying value of our equity, triggering the need for a goodwill impairment analysis. As a result of our goodwill impairment analysis, we recorded a goodwill impairment charge in those periods.

It is possible that another material change could occur in the future. We will continue to conduct impairment analyses of our goodwill on an annual basis, unless indicators of possible impairment arise that would cause a triggering event, and we would be required to take additional impairment charges in the future if any recoverability assessments reflect estimated fair values that are less than our recorded values. Further impairment charges with respect to our goodwill could have a material adverse effect on our financial condition and results of operations.

We could lose clients if we fail to detect click-through or other fraud on advertisements in a manner that is acceptable to our clients.

We are exposed to the risk of fraudulent clicks or actions on our websites or our third-party publishers' websites, which could lead our clients to become dissatisfied with our campaigns, and in turn, lead to loss of clients and related revenue. Click-through fraud occurs when an individual clicks on an ad displayed on a website, or an automated system is used to create such clicks, with the intent of generating the revenue share payment to the publisher rather than viewing the underlying content. Action fraud occurs when online lead forms are completed with false or fictitious information in an effort to increase a publisher's compensable actions. From time to time, we have experienced fraudulent clicks or actions. We do not charge our clients for fraudulent clicks or actions when they are detected, and such fraudulent activities could negatively affect our profitability or harm our reputation. If fraudulent clicks or actions are not detected, the affected clients may experience a reduced return on their investment in our marketing programs, which could lead the clients to become dissatisfied with our campaigns, and in turn, lead to loss of clients and related revenue. Additionally, we have, from time to time, had to, and in the future may have to, terminate relationships with publishers who we believed to have engaged in fraud. Termination of such relationships entails a loss of revenue associated with the legitimate actions or clicks generated by such publishers.

As a public company, we are subject to compliance initiatives that will require substantial time from our management and result in significantly increased costs that may adversely affect our operating results and financial condition.

The Securities Exchange Act of 1934, Sarbanes-Oxley Act of 2002, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, and other rules implemented by the SEC and NASDAQ, impose various requirements on public companies, including requiring changes in corporate governance practices. These and proposed corporate governance laws and regulations under consideration may further increase our compliance costs. If compliance with these various legal and regulatory requirements diverts our management's attention from other business concerns, it could have a material adverse effect on our business, financial condition and

Table of Contents

results of operations. We also expect that these laws and regulations may make it more difficult and more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage than used to be available. As a result, it may be more difficult for us to attract and retain qualified individuals to serve on our board of directors, on committees of our board of directors, or as executive officers.

Risks Related to the Ownership of Our Common Stock

Our stock price has been volatile, and you may not be able to resell shares of our common stock at or above the price you paid.

The trading price of our common stock has been volatile since our initial public offering and may continue to be subject to wide fluctuations in response to various factors, some of which are beyond our control. These factors include those discussed in this Risk Factors section of this periodic report and others such as:

our ability to grow our revenues and Adjusted EBITDA margin and to manage any such growth effectively;

changes in earnings estimates or recommendations by securities analysts;

announcements about our revenue, earnings or other financial results that are not in line with analyst expectations;

our ability to find, develop or retain high quality targeted media on a cost effective basis;

relatively low trading volume in our stock, which creates inherent volatility regardless of factors related to our business performance or prospects;

the sale of, or indication of the intent to sell, substantial amounts of our common stock by our directors, officers or substantial shareholders;

announcements by us or our competitors of new services, significant contracts, commercial relationships, acquisitions or capital commitments;

our commencement of, involvement in, or a perceived threat of litigation or regulatory enforcement action; and

negative publicity about us, our industry, our clients or our clients' industries.

In recent years, the stock market in general, and the market for technology and Internet-based companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. Broad market and industry factors may seriously affect the market price of our common stock, regardless of our actual operating performance. In addition, in the past, following periods of volatility in the overall market and the market price of a particular company's securities, securities class action litigation has often been instituted against these companies. Such litigation, if instituted against us, could result in substantial costs and a diversion of our management's attention and resources.

If securities or industry analysts do not publish research or reports about our business, or if they issue an adverse opinion regarding our stock, our stock price and trading volume could decline.

Edgar Filing: QUINSTREET, INC - Form 10-K

The trading market for our common stock is influenced by the research and reports that industry or securities analysts publish about us, our business or the industries or businesses of our clients. If any of the analysts issue an adverse opinion regarding our stock or if our actual results do not meet analyst estimates, our stock price would likely decline. If one or more of these analysts ceases coverage of our company or fails to publish reports on us regularly, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

Table of Contents

Our directors and executive officers and their respective affiliates have substantial influence over us and could delay or prevent a change in corporate control.

As of June 30, 2015, our directors and executive officers, together with their affiliates, beneficially owned approximately 24% of our outstanding common stock. As a result, these stockholders, acting together, have substantial influence over the outcome of matters submitted to our stockholders for approval, including the election of directors and any merger, consolidation or sale of all or substantially all of our assets. In addition, these stockholders, acting together, have significant influence over the management and affairs of our company. Accordingly, this concentration of ownership may have the effect of:

delaying, deferring or preventing a change in corporate control;

impeding a merger, consolidation, takeover or other business combination involving us; or

discouraging a potential acquirer from making a tender offer or otherwise attempting to obtain control of us.

Provisions in our charter documents under Delaware law and in contractual obligations could discourage a takeover that stockholders may consider favorable and may lead to entrenchment of management.

Our amended and restated certificate of incorporation and bylaws contain provisions that could have the effect of delaying or preventing changes in control or changes in our management without the consent of our board of directors. These provisions include:

a classified board of directors with three-year staggered terms, which may delay the ability of stockholders to change the membership of a majority of our board of directors;

no cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates;

the exclusive right of our board of directors to elect a director to fill a vacancy created by the expansion of the board of directors or the resignation, death or removal of a director, which prevents stockholders from being able to fill vacancies on our board of directors;

the ability of our board of directors to issue shares of preferred stock and to determine the price and other terms of those shares, including preferences and voting rights, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquirer;

a prohibition on stockholder action by written consent, which forces stockholder action to be taken at an annual or special meeting of our stockholders;

the requirement that a special meeting of stockholders may be called only by the chairman of the board of directors, the chief executive officer or the board of directors, which may delay the ability of our stockholders to force consideration of a proposal or to take action, including the removal of directors; and

Edgar Filing: QUINSTREET, INC - Form 10-K

advance notice procedures that stockholders must comply with in order to nominate candidates to our board of directors or to propose matters to be acted upon at a stockholders' meeting, which may discourage or deter a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of us.

We are also subject to certain anti-takeover provisions under Delaware law. Under Delaware law, a corporation may not, in general, engage in a business combination with any holder of 15% or more of its capital stock unless the holder has held the stock for three years or, among other things, the board of directors has approved the transaction.

Table of Contents

We do not currently intend to pay dividends on our common stock and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of our common stock.

We have not declared or paid dividends on our common stock and we do not intend to do so in the near term. We currently intend to invest our future earnings, if any, to fund our growth. Additionally, the terms of our revolving loan facility restrict our ability to pay dividends. Therefore, you are not likely to receive any dividends on your common stock in the near term.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our principal executive offices are located in a leased facility in Foster City, California, consisting of approximately 63,998 square feet of office space under a lease that expires in October 2018 with the option to extend the lease term by another two years. This facility accommodates our principal engineering, sales, marketing, operations, finance and administrative activities. We also lease additional facilities to accommodate sales, marketing, and operations throughout the United States. Outside of the United States, we also lease facilities to accommodate engineering, sales, marketing, and operations in Brazil and India.

We may add new facilities and expand our existing facilities as we add employees and expand our markets, and we believe that suitable additional or substitute space will be available as needed to accommodate any such expansion of our operations.

Item 3. Legal Proceedings

In December 2012, Internet Patents Corporation (IPC) filed a patent infringement lawsuit against us and several other named defendants in the United States District Court for the Northern District of California, alleging that we had infringed a patent held by IPC. In September 2013, the court dismissed a related case because it found that the patent is invalid, and on the same date, the court issued IPC an Order to Show Cause that the lawsuit against us should not be dismissed. In October 2013, IPC filed a response to the order and the court subsequently dismissed the case against us. In October 2013, IPC filed its appeal in the United States Court of Appeals for the Federal Circuit. On June 23, 2015, the United States Court of Appeals for the Federal Circuit affirmed the decision of the district court dismissing IPC 's claim against us. IPC has determined that it will not appeal the Federal Circuit court 's decision, and we therefore believe that the case has been fully resolved.

In addition, from time to time we are a party to various legal matters incidental to the conduct of our business. Certain of our outstanding legal matters include claims for indeterminate amounts of damages. We record a liability when we believe that it is probable that a loss has been incurred and the amount can be reasonably estimated. Based on our current knowledge, we do not believe that there is a reasonable possibility that the final outcome of the pending or threatened legal proceedings to which we are a party, either individually or in the aggregate, will have a material adverse effect on our future financial results. However, the outcome of such legal matters is subject to significant uncertainties.

Item 4. Mine Safety Disclosures

Not Applicable.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock has been traded on the NASDAQ Global Select Market under the symbol QNST since our initial public offering on February 11, 2010. Prior to this time, there was no public market for our common stock. The following table shows the high and low sale prices per share of our common stock as reported on the NASDAQ Global Select Market for the periods indicated:

Fiscal Year Ended June 30, 2014	High	Low
First quarter ended September 30, 2013	\$ 9.71	\$ 8.40
Second quarter ended December 31, 2013	\$ 9.62	\$ 8.00
Third quarter ended March 31, 2014	\$ 9.09	\$ 6.02
Fourth quarter ended June 30, 2014	\$ 6.72	\$ 5.10
Fiscal Year Ended June 30, 2015	High	Low
First quarter ended September 30, 2014	\$ 6.09	\$ 4.10
Second quarter ended December 31, 2014	\$ 6.09	\$ 3.78
Third quarter ended March 31, 2015	\$ 6.83	\$ 5.01
Fourth quarter ended June 30, 2015	\$ 6.66	\$ 5.06

On August 14, 2015, the closing price as reported on the NASDAQ Global Select Market of our common stock was \$4.99 per share and we had approximately 93 stockholders of record of our common stock.

We have never declared or paid, and do not anticipate declaring or paying, any dividends on our common stock. Any future determination as to the declaration and payment of dividends, if any, will be at the discretion of our board of directors and will depend on then existing conditions, including our financial condition, operating results, contractual restrictions, capital requirements, business prospects and other factors our board of directors may deem relevant. Our revolving loan facility also restricts our ability to pay dividends.

For equity compensation plan information refer to Item 12 in Part III of this Annual Report on Form 10-K.

Performance Graph

The following performance graph shall not be deemed soliciting material or to be filed with the Securities and Exchange Commission for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or the Exchange Act, or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any filing of QuinStreet, Inc. under the Securities Act of 1933, as amended, or the Exchange Act.

The following performance graph shows a comparison from June 30, 2010 through June 30, 2015 of cumulative total return for our common stock, the NASDAQ Composite Index and the RDG Internet Composite Index. Such returns are based on historical results and are not intended to suggest future performance. Data for the NASDAQ Composite Index and the RDG Internet Composite Index assume reinvestment of dividends.

Recent Sales of Unregistered Securities

There were no unregistered sales of our equity securities during the fiscal year ended June 30, 2015.

Table of Contents**Item 6. Selected Consolidated Financial Data**

The following selected consolidated financial data should be read together with Management's Discussion and Analysis of Financial Condition and Results of Operations and with the consolidated financial statements and accompanying notes appearing elsewhere in this report. The selected consolidated financial data in this section is not intended to replace our consolidated financial statements and the accompanying notes. The results of acquired businesses have been included in our consolidated financial statements since their respective dates of acquisition. Our historical results are not necessarily indicative of our future results and any interim results are not necessarily indicative of the results for a full fiscal year.

We derived the consolidated statements of operations data for the fiscal years ended June 30, 2015, 2014, and 2013 and the consolidated balance sheets data as of June 30, 2015 and 2014 from our audited consolidated financial statements appearing elsewhere in this report. The consolidated statements of operations data for the fiscal year ended June 30, 2012 and 2011 and the consolidated balance sheets data as of June 30, 2013, 2012 and 2011 are derived from our audited consolidated financial statements, which are not included in this report.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

*You should read the following discussion of our financial condition and results of operations in conjunction with the consolidated financial statements and the notes thereto included elsewhere in this report. The following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this report, particularly in the sections titled *Special Note Regarding Forward-Looking Statements* and *Risk Factors*.*

Management Overview

QuinStreet is a leader in performance marketing online. We have built a strong set of capabilities to engage Internet visitors in targeted media and to connect our marketing clients with their potential customers online. We focus on serving clients in large, information-intensive industry verticals where relevant, targeted media and offerings help visitors make informed choices, find the products that match their needs, and thus become qualified customer prospects for our clients.

We deliver cost-effective marketing results to our clients most typically in the form of a qualified lead, inquiry, click, call, application, or customer. Leads, inquiries, clicks, calls, and applications can then convert into a customer or sale for clients at a rate that results in an acceptable marketing cost to them. We are typically paid by clients when we deliver qualified leads, inquiries, clicks, calls, applications, or customers as defined by our agreements with them. References to the delivery of customers means a sale or completed customer transaction (e.g., bound insurance policies or customer appointments with clients). Because we bear the costs of media, our programs must deliver value to our clients and provide for a media yield, or generation of an acceptable margin on our media costs, that provides a sound financial outcome for us. To deliver leads, inquiries, clicks, calls, applications, and customers to our clients, generally we:

own or access targeted media through business arrangements (e.g., revenue sharing agreements) or by purchasing media (e.g., clicks from major search engines);

run advertisements or other forms of marketing messages and programs in that media to create visitor responses in the form most typically of leads or inquiries (contact information and intent or requests), clicks (to further qualification or matching steps, or to online client applications or offerings), calls (to our owned and operated call centers or that of our clients or their agents), applications (e.g., for enrollment or a financial product), or customers (e.g., bound insurance policies);

match these leads, inquiries, clicks, calls, applications, or customers to client offerings or brands that we believe can meet visitor interests or needs and client targets and requirements; and

optimize client matches and media yield such that we achieve desired results for clients and a sound financial outcome for us.

Our primary financial objective has been and remains creating revenue growth from sustainable sources, at target levels of profitability. Our primary financial objective is not to maximize profits, but rather to achieve target levels of profitability while investing in various growth initiatives, as we continue to believe we are in the early stages of a large, long-term market opportunity.

Our Direct Marketing Services (DMS) business accounted for substantially all of our net revenue in fiscal years 2015, 2014 and 2013. Our DMS business derives its net revenue from fees earned through the delivery of qualified leads, inquiries, clicks, calls, applications, or customers and, to a lesser extent, display advertisements, or impressions. Through a vertical focus, targeted media presence and our technology platform, we are able to deliver targeted, measurable marketing results to our clients.

Our two largest client verticals within our DMS business are financial services and education. Our financial services client vertical represented 42%, 39% and 40% of net revenue in fiscal years 2015, 2014 and 2013. Our

Table of Contents

education client vertical represented 38%, 43% and 44% of net revenue in fiscal years 2015, 2014 and 2013. Other DMS client verticals, consisting primarily of business-to-business technology, home services and medical, represented 20%, 18% and 16% of net revenue in fiscal years 2015, 2014 and 2013.

We generated the majority of our revenue from sales to clients in the United States.

Trends Affecting our Business

Client Verticals

To date, our financial services and education client verticals have generated the majority of our revenue. We expect that a majority of our revenue in fiscal year 2016 will also be generated from clients in these client verticals.

Our financial services client vertical has been affected by a number of factors, including the limited availability of high quality media at acceptable margins caused by changes in search engine algorithms, acquisition of media sources by competitors and increased competition for quality media. These effects may continue to impact our business in the near future. To offset this impact, we have broadened our product set with enhanced click, lead, call and policy products, where we expect better monetization to provide greater access to high quality media sources.

Our education client vertical has been significantly affected by regulations and enforcement activity affecting for-profit educational institutions over the past several years. For example, in January 2014, the Department of Education initiated an investigation of a publicly traded for-profit education client with respect to its enrollment activities and job placement, among other things, and in July 2014, the Department of Education signed an agreement with the client requiring it to wind down or sell its campuses. In addition, in October 2014, the Department of Education announced final regulations on gainful employment which went into effect on July 1, 2015. The regulation requires career college programs to prepare students for gainful employment in a recognized occupation which requires the programs' graduates' annual loan payments to be less than a defined percentage of earnings. Programs that do not pass the test could lose access to federal financial aid, which typically constitutes an important source of funding for these programs. As a result, such programs may be modified, curtailed, or eliminated. Similar regulatory and enforcement activities have affected and are expected to continue to affect our clients' businesses and marketing practices, which may result in a decrease in these clients' spending with us, and fluctuations in the volume and mix of our business with these clients. To offset the impact these activities have had on the for-profit educational clients, we have broadened our product set from our traditional lead business with the addition of better qualified and matched leads or inquiries, clicks and calls to our product mix; we believe these new enhanced products better match for-profit education client needs in the regulatory environment. We have also broadened our markets in education to include not-for-profit schools and international markets in Brazil and India.

Development, Acquisition and Retention of Targeted Media

One of the primary challenges of our business is acquiring or creating media that is high quality and targeted enough to attract prospects for our clients at costs that work for our business model. In order to grow our business, we must be able to develop or acquire and retain quality targeted media on a cost-effective basis. Consolidation of media sources, changes in search engine algorithms and increased competition on available media has, during some periods, limited and may continue to limit our ability to generate revenue.

Seasonality

Our results are subject to significant fluctuation as a result of seasonality. In particular, our quarters ending December 31 (our second fiscal quarter) are typically characterized by seasonal weakness. In our second fiscal

Table of Contents

quarters, there is lower availability of lead supply from some forms of media during the holiday period on a cost effective basis and some of our clients have lower budgets. In our quarters ending March 31 (our third fiscal quarter), this trend generally reverses with better lead availability and often new budgets at the beginning of the year for our clients with fiscal years ending December 31.

Regulations

Our revenue has fluctuated as a result of recently adopted or amended regulations and the increased enforcement of existing regulations. Our business is affected directly because we operate websites and conduct telemarketing and email marketing, and indirectly as clients adjust their operations as a result of regulatory changes and enforcement activity that affect their industries.

One example of a regulatory change that may affect our business is the Telephone Consumer Protection Act (the TCPA), which the Federal Communications Commission amended to, among other things, impose heightened consent and opt-out requirements that companies conducting telemarketing must follow. Certain provisions of the regulations became effective in July 2012, and additional regulations requiring prior express written consent for certain types of telemarketing calls became effective in October 2013. Our efforts to comply with the TCPA has not had a material impact on traffic conversion rates. Our clients may make business decisions based on their own experiences with the TCPA regardless of our products, and the changes we implemented to comply with the regulations. Those decisions may negatively affect our revenue or profitability.

Clients in our financial services vertical have increasingly been affected by laws and regulations as a result of the adoption of new regulations under The Dodd Frank Wall Street Reform and Consumer Protection Act and the increased enforcement of new and pre-existing laws and regulations. In addition, our education client vertical has been significantly affected by the adoption of regulations affecting for-profit educational institutions over the past several years, and a higher level of governmental scrutiny is expected to continue. The effect of these regulations, or any future regulations, may continue to result in fluctuations in the volume and mix of our business with these clients.

Basis of Presentation

General

We operate in one reportable segment: DMS. The remainder of our business is classified as All Other. See Note 13, Segment Information, to our consolidated financial statements for further discussion and financial information regarding our reportable segment.

Net Revenue

Our DMS business generates revenue from fees earned through the delivery of qualified leads, inquiries, clicks, calls, applications, customers and, to a lesser extent, display advertisements, or impressions. We deliver targeted and measurable results through a vertical focus that we classify into the following client verticals: financial services, education, and other (which includes business-to-business technology, home services and medical).

Cost of Revenue

Cost of revenue consists primarily of media costs, personnel costs, amortization of intangible assets, depreciation expense and amortization of internal software development costs related to revenue-producing technologies. Media costs consist primarily of fees paid to third-party publishers that are directly related to a revenue-generating event and pay-per-click (PPC) ad purchases from Internet search companies. We pay these third-party publishers and Internet search companies on a revenue-share, cost-per-lead (CPL), cost-per-click, (CPC), or cost-per-thousand-impressions (CPM) basis. Personnel costs include salaries, stock-based

Table of Contents

compensation expense, bonuses and employee benefit costs. Personnel costs are primarily related to individuals associated with maintaining our servers and websites, our call center operations, our editorial staff, client management, creative team, content, compliance group and media purchasing analysts. Costs associated with software incurred in the development phase or obtained for internal use are capitalized and amortized in cost of revenue over the software's estimated useful life. We anticipate that our cost of revenue will increase more than our revenue for the near term as we invest in new media partnerships to drive long-term growth as well as a greater gross margin over time.

Operating Expenses

We classify our operating expenses into three categories: product development, sales and marketing, and general and administrative. Our operating expenses consist primarily of personnel costs and, to a lesser extent, professional services fees, rent and other costs. Personnel costs for each category of operating expenses generally include salaries, stock-based compensation expense, bonuses, commissions and employee benefit costs.

Product Development. Product development expenses consist primarily of personnel costs and professional services fees associated with the development and maintenance of our technology platforms, development and launching of our websites, product-based quality assurance and testing. We are constraining expenses generally to the extent practicable; however we expect product and development expenses to increase in absolute dollars in the future.

Sales and Marketing. Sales and marketing expenses consist primarily of personnel costs, advertising, professional services fees, and travel costs. We are constraining expenses generally to the extent practicable; however we expect sales and marketing expenses to increase in absolute dollars in the future.

General and Administrative. General and administrative expenses consist primarily of personnel costs of our executive, finance, legal, employee benefits and compliance, technical support and other administrative personnel, as well as accounting and legal professional services fees, and insurance. We are constraining expenses generally to the extent practicable; however we expect general and administrative expenses to increase in absolute dollars in the future.

Interest and Other Expense, Net

Interest and other expense, net, consists primarily of interest income, interest expense, and other income and expense. Interest income represents interest earned on our cash, cash equivalents and marketable securities, which may increase or decrease depending on market interest rates and the amounts invested. Interest expense is related to our term loan facility, revolving loan facility, the related interest rate swap, promissory notes issued in connection with our acquisitions, and imputed interest on non-interest bearing notes. Borrowings under our revolving loan facility, the aggregate principal amount of outstanding promissory notes and related interest expense could increase if, among other things, we make additional acquisitions through debt financing. Other income and expense includes gains and losses on foreign currency exchange, gains and losses on sales of websites and domain names that were not considered to be strategically important to our business, and other non-operating items.

Income Tax Benefit from (Provision for)

We are subject to tax in the United States as well as other tax jurisdictions or countries in which we conduct business. Earnings from our limited non-U.S. activities are subject to local country income tax and may be subject to U.S. income tax.

Table of Contents**Results of Operations**

The following table sets forth our consolidated statement of operations for the periods indicated:

	2015		Fiscal Year Ended 2014		2013	
			(In thousands)			
Net revenue	\$ 282,140	100.0%	\$ 282,549	100.0%	\$ 305,101	100.0%

Net loss	\$ (20,008)	(7.1)%	\$ (146,404)	(51.8)%	\$ (67,372)	(22.1)%

⁽¹⁾ Cost of revenue and operating expenses include stock-based compensation expense as follows:

Cost of revenue	\$ 3,120	1.1%	\$ 2,767	1.0%	\$ 3,930	1.3%
Product development	2,395	0.8	2,429	0.9	2,765	0.9
Sales and marketing	2,144	0.8	2,937	1.0	3,264	1.1
General and administrative	2,196	0.8	2,296	0.8	2,057	0.7

Net Revenue

	Fiscal Year Ended June 30,			2015 - 2014 % Change	2014 - 2013 % Change
	2015	2014	2013		
		(In thousands)			
Net revenue	\$ 282,140	\$ 282,549	\$ 305,101	(0%)	(7%)
Cost of revenue	252,002	241,907	251,591	4%	(4%)
Gross profit	\$ 30,138	\$ 40,642	\$ 53,510	(26%)	(24%)

Net revenue was approximately flat in fiscal year 2015 compared to fiscal year 2014. Our financial services client vertical revenue increased \$7.3 million, or 6%, primarily due to our enhanced click, lead, call and policy products which enabled us to access higher quality media for our clients and has led to increased client budgets. Our education client vertical revenue decreased \$14.1 million, or 12%, as a result of our

Edgar Filing: QUINSTREET, INC - Form 10-K

education clients' lower budgets, largely due to uncertainty surrounding regulations and enforcement activity affecting for-profit educational institutions and their operational adjustment to this activity. Revenue from other client verticals increased \$6.4 million, or 13%, primarily due to increased client demand in our business-to-business technology and home services client verticals partially offset by decreased client demand in our medical client vertical.

Net revenue decreased \$22.6 million, or 7%, in fiscal year 2014 compared to fiscal year 2013. Our financial services client vertical revenue decreased \$8.2 million, or 7%, primarily due to our inability to cost effectively

Table of Contents

access sufficient high quality media during the first three quarters of the year, as well as due to a reduction in mortgage inquiry traffic caused by an increase in interest rates. Our education client vertical revenue decreased \$15.0 million, or 11%, primarily as a result of our education clients lower budgets, largely due to uncertainty surrounding regulations and enforcement activity affecting for-profit educational institutions and their operational adjustment to this activity. Revenue from other client verticals increased \$0.6 million, or 1%, primarily due to increased client demand in our business-to-business technology and home services client verticals partially offset by decreased client demand in our medical client vertical.

Cost of Revenue and Gross Margin

Cost of revenue increased \$10.1 million, or 4%, in fiscal year 2015 compared to fiscal year 2014, driven by increased media costs of \$11.1 million, increased personnel costs of \$3.2 million and increased other expenses of \$2.5 million, offset by decreased amortization of intangible assets of \$7.1 million. The increased media costs were attributable to increased costs for high quality media. The increased personnel costs were attributable to an increase in average headcount. The decreased amortization of intangible assets were attributable to assets from historical acquisitions becoming fully amortized and a reduced number of acquisitions in recent periods. Gross margin was 11% in fiscal year 2015 compared to 14% in fiscal year 2014. The decrease in gross margin was attributable to increased media costs associated with our investments in optimizing high quality media in our financial services vertical.

Cost of revenue decreased \$9.7 million, or 4%, in fiscal year 2014 compared to fiscal year 2013, driven by decreased media costs of \$6.7 million, decreased amortization of intangible assets and depreciation of \$6.4 million, and decreased stock-based compensation expense of \$1.2 million, partially offset by increased personnel costs of \$2.6 million and other increases of \$2.0 million. The decreased media costs were primarily attributable to lower revenue levels offset by a lower mix of traffic from owned and operated websites. The decreased amortization of intangible assets were attributable to an amortization charge associated with certain licensed patents in fiscal year 2013, assets from historical acquisitions becoming fully amortized and a reduced number of acquisitions in recent periods. The increased personnel costs were attributable to an increase in average headcount. Gross margin was 14% in fiscal year 2014 compared to 18% in fiscal year 2013. The decrease in gross margin is attributable to lower revenue levels and a lower mix of traffic from owned and operated websites.

Operating Expenses

	Fiscal Year Ended June 30,			2015 - 2014	2014 - 2013
	2015	2014	2013	% Change	% Change
	(In thousands)				
Product development	\$ 17,948	\$ 19,548	\$ 19,048	(8%)	3%
Sales and marketing	14,544	16,385	14,705	(11%)	11%
General and administrative	16,823	17,046	16,226	(1%)	5%
Impairment of goodwill		95,641	92,350	(100%)	4%
Operating expenses	\$ 49,315	\$ 148,620	\$ 142,329	(67%)	4%

Product Development Expenses

Product development expenses decreased \$1.6 million, or 8%, in fiscal year 2015 compared to fiscal year 2014, primarily due to decreased personnel costs of \$1.1 million due to a decrease in average salaries.

Product development expenses increased \$0.5 million, or 3%, in fiscal year 2014 compared to fiscal year 2013, primarily due to increased personnel costs of \$0.8 million, offset by a decrease in stock-based compensation expense of \$0.3 million.

Table of Contents*Sales and Marketing Expenses*

Sales and marketing expenses decreased \$1.8 million, or 11%, in fiscal year 2015 compared to fiscal year 2014, primarily due to decreased stock-based compensation expense of \$0.8 million, decreased advertising costs of \$0.5 million and decreased personnel costs of \$0.4 million.

Sales and marketing expenses increased \$1.7 million, or 11%, in fiscal year 2014 compared to fiscal year 2013, primarily due to increased advertising expenses for our current product offerings of \$1.0 million and increased personnel costs of \$0.6 million.

General and Administrative Expenses

General and administrative expenses decreased \$0.2 million, or 1%, in fiscal year 2015 compared to fiscal year 2014.

General and administrative expenses increased \$0.8 million, or 5%, in fiscal year 2014 compared to fiscal year 2013. This was primarily due to an additional business tax assessment of \$0.8 million, an increase in software license fees and maintenance contracts of \$0.4 million, an increase in bad debt expense of \$0.3 million and an increase in stock-based compensation expense of \$0.2 million offset by a decrease in personnel costs of \$1.0 million.

Impairment of Goodwill

As discussed under Critical Accounting Policies and Estimates, there was no goodwill impairment charge recognized for the year ended June 30, 2015. We recognized a goodwill impairment charge of \$95.6 million for the year ended June 30, 2014 and \$92.4 million for the year ended June 30, 2013 due to declines sustained in our public market capitalization.

Interest and Other Expense, Net

	Fiscal Year Ended June 30,			2015 - 2014	2014 - 2013
	2015	2014	2013	% Change	% Change
	(In thousands)				
Interest income	\$ 72	\$ 115	\$ 115	(37%)	0%
Interest expense	(3,818)	(3,825)	(5,200)	(0%)	(26%)
Other income (expense), net	2,671	1,493	(69)	(79%)	(2264%)
Interest and other expense, net	\$ (1,075)	\$ (2,217)	\$ (5,154)	(52%)	(57%)

Interest and other expense, net decreased \$1.1 million, or 52%, in fiscal year 2015 compared to fiscal year 2014, primarily due to an increase in other income of \$1.2 million. This increase can be attributed to an increase in gains on the sale of domain names that were not considered to be strategically important to our business of \$2.8 million, offset by a gain of \$0.9 million recognized in fiscal year 2014 related to the sale of our shares of preferred stock in our DemandBase investment and an expense of \$0.3 million due to the termination of the interest rate swap in connection with our repayment in full of the term loan facility.

Interest and other expense, net decreased \$2.9 million, or 57%, in fiscal year 2014 compared to fiscal year 2013, primarily due to an increase in other income of \$1.6 million and a decrease in interest expense of \$1.4 million. The increase in other income is due to the gain of \$0.9 million on the sale of our shares of preferred stock in our DemandBase investment and the sale of domain names that were not considered to be strategically important to our business for a gain of \$0.5 million. The decrease in interest expense is due to the accelerated amortization of approximately \$0.7 million of unamortized deferred upfront costs incurred in connection with the amendment of our term loan facility in fiscal year 2013 and decreased debt obligations.

Table of Contents**Benefit from (Provision for) Taxes**

	Fiscal Year Ended June 30,		
	2015	2014	2013
	(In thousands)		
Benefit from (provision for) taxes	\$ 244	\$ (36,209)	\$ 26,601
Effective tax rate	1.2%	(32.8%)	28.3%

We recorded a benefit from taxes of \$0.2 million in fiscal year 2015 primarily due to the carryback of prior year tax losses. We recorded a provision for taxes of \$36.2 million in fiscal year 2014 primarily due to a one-time non-cash charge to establish a valuation allowance against the majority of our deferred tax assets.

The increase in our effective tax rate for the fiscal year 2015 compared to fiscal year 2014 was primarily due to a one-time, non-cash charge recognized in fiscal year 2014 to establish a valuation allowance for a specific portion of our deferred tax assets.

The decrease in our effective tax rate for the fiscal year 2014 compared to fiscal year 2013 was primarily due to a one-time, non-cash charge to establish a valuation allowance for a specific portion of our deferred tax assets in 2014.

Selected Quarterly Financial Data

The following table sets forth our unaudited quarterly condensed consolidated statements of operations data for the eight quarters ended June 30, 2015. We have prepared the statements of operations for each of these quarters on the same basis as the audited consolidated financial statements included elsewhere in this report and, in the opinion of management, each statement of operations includes all adjustments, consisting solely of normal recurring adjustments, necessary for the fair statement of the results of operations for these periods. This information should be read in conjunction with the audited consolidated financial statements and related notes included elsewhere in this report. These quarterly operating results are not necessarily indicative of our operating results for any future period.

(1) Net loss per share for the four quarters of each fiscal year may not sum to the total for the fiscal year because of the different number of shares outstanding during each period.

Adjusted EBITDA

We include adjusted EBITDA in this report because (i) we seek to manage our business to a level of adjusted EBITDA as a percentage of net revenue, (ii) it is a key basis upon which our management assesses our operating performance, (iii) it is one of the primary metrics investors use in evaluating Internet marketing companies, (iv) it is a factor in the evaluation of the performance of our management in determining compensation, and (v) it is an element of certain financial covenants under our revolving loan facility. We define adjusted EBITDA as net loss less benefit from (provision for) taxes, depreciation expense, amortization expense, stock-based compensation expense, interest and other expense, net, impairment of goodwill and restructuring.

We use adjusted EBITDA as a key performance measure because we believe it facilitates operating performance comparisons from period to period by excluding potential differences caused by variations in capital structures (affecting interest expense), tax positions (such as the impact on periods or companies of changes in effective tax rates or fluctuations in permanent differences or discrete quarterly items), non-recurring charges and the non-cash impact of depreciation, amortization, stock-based compensation expense, and impairment of goodwill. Since adjusted EBITDA facilitates internal comparisons of our historical operating performance on a more consistent basis, we also use adjusted EBITDA for business planning purposes, to incentivize and compensate our management personnel and in evaluating acquisition opportunities.

In addition, we believe adjusted EBITDA and similar measures are widely used by investors, securities analysts, ratings agencies and other interested parties in our industry as a measure of financial performance and debt-service capabilities. Our use of adjusted EBITDA has limitations as an analytical tool, and it should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are:

adjusted EBITDA does not reflect our cash expenditures for capital equipment or other contractual commitments;

although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and adjusted EBITDA does not reflect cash capital expenditure requirements for such replacements;

adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;

adjusted EBITDA does not consider the potentially dilutive impact of issuing stock-based compensation to our management team and employees;

Edgar Filing: QUINSTREET, INC - Form 10-K

adjusted EBITDA does not reflect the interest expense or the cash requirements necessary to service interest or principal payments on our indebtedness;

Table of Contents

adjusted EBITDA does not reflect certain tax payments that may represent a reduction in cash available to us; and

other companies, including companies in our industry, may calculate adjusted EBITDA measures differently, which reduces their usefulness as a comparative measure.

Due to these limitations, adjusted EBITDA should not be considered as a measure of discretionary cash available to us to invest in the growth of our business. When evaluating our performance, adjusted EBITDA should be considered alongside other financial performance measures, including various cash flow metrics, net loss and our other GAAP results.

The following table presents a reconciliation of adjusted EBITDA to net loss, the most comparable GAAP measure, for each of the periods indicated:

Adjusted EBITDA as a percentage of net revenue	4%	6%	3%	1%	3%	9%	10%	13%
--	----	----	----	----	----	----	-----	-----

We seek to manage our business to a level of adjusted EBITDA as a percentage of net revenue. We do so on a fiscal year basis by varying our operations to balance revenue growth and costs throughout the fiscal year. We do not seek to manage our business to a level of adjusted EBITDA on a quarterly basis and we expect our adjusted EBITDA margins to vary from quarter to quarter.

Liquidity and Capital Resources

As of June 30, 2015, our principal sources of liquidity consisted of cash and cash equivalents of \$60.5 million, cash we expect to generate from operations, and our \$25.0 million revolving loan facility, which is committed until June 2017, and under which we have drawn \$15.0 million. Our cash and cash equivalents are maintained in highly liquid investments with remaining maturities of 90 days or less at the time of purchase. We believe our cash equivalents are liquid and accessible.

Our short-term and long-term liquidity requirements primarily arise from our working capital requirements, debt service on our \$25.0 million revolving loan facility, and acquisitions from time to time. Our primary operating cash requirements include the payment of media costs, personnel costs, costs of information technology systems and office facilities. Our ability to fund these requirements will depend on our future cash flows, which are determined, in part, by future operating performance and are, therefore, subject to prevailing global macroeconomic conditions and financial, business and other factors, some of which are beyond our control, and also our ability to access our revolving loan facility. Even though we may not need additional funds, we may still elect to obtain additional debt, issue additional equity securities, or draw down on or increase our borrowing capacity under our current revolving loan facility for other reasons.

Table of Contents

We believe that our existing cash, cash equivalents, cash generated from operations and our available borrowings under the revolving loan facility will be sufficient to satisfy our currently anticipated cash requirements through at least the next 12 months.

	Fiscal Year Ended June 30,		
	2015	2014	2013
	(In thousands)		
Cash flows provided by operating activities	\$ 6,133	\$ 18,377	\$ 50,665
Cash flows provided by (used in) investing activities	33,270	(10,731)	(7,469)
Cash flows used in financing activities	(63,119)	(13,539)	(21,616)

Net Cash Provided by Operating Activities

Cash flows from operating activities are primarily the result of our net loss adjusted for depreciation and amortization, stock-based compensation expense, impairment of goodwill and changes in working capital components.

Cash flows provided by operating activities were \$6.1 million for fiscal year 2015 compared to \$18.4 million for fiscal year 2014 and \$50.7 million for fiscal year 2013.

Cash flows provided by operating activities in fiscal year 2015 consisted of a net loss of \$20.0 million, which included a restructuring charge of \$0.4 million, offset by non-cash adjustments of \$26.6 million. In addition, there was a net decrease in cash from changes in working capital of \$0.4 million. The non-cash adjustments consisted of depreciation and amortization of \$18.9 million, stock-based compensation net of tax benefits of \$9.9 million, and gain on the sale of domain names that were not considered to be strategically important to our business of \$3.3 million. The changes in working capital accounts were primarily due to an increase in accounts receivable of \$4.4 million, offset by an increase in accounts payable and accrued liabilities of \$2.4 million and a decrease in net deferred taxes of \$1.8 million. The increase in accounts receivable as well as the increase in accounts payable and accrued liabilities were primarily due to the timing of payments.

Cash flows provided by operating activities in fiscal year 2014 consisted of a net loss of \$146.4 million, offset by non-cash adjustments of \$130.4 million and changes in working capital of \$34.4 million. The non-cash adjustments primarily consisted of depreciation and amortization of \$26.1 million, stock-based compensation expense net of tax benefits of \$9.9 million, and impairment of goodwill of \$95.6 million, offset by other adjustments, net of \$1.1 million. The changes in working capital accounts were primarily due to a decrease in net deferred taxes of \$45.1 million and an increase in accounts payable and accrued liabilities of \$0.4 million partially offset by an increase in prepaid expenses and other current assets of \$6.3 million, an increase in accounts receivable of \$3.5 million, and a decrease in deferred revenue and other noncurrent liabilities of \$1.3 million. The decrease in deferred taxes was due to a one-time charge to establish a valuation allowance. The increase in accounts receivable was due to timing of collections.

Cash flows provided by operating activities in fiscal year 2013 consisted of a net loss of \$67.4 million, offset by non-cash adjustments of \$136.6 million. In addition, there was a net increase in cash from changes in working capital of \$18.5 million. The non-cash adjustments consisted primarily of depreciation and amortization of \$32.3 million, stock-based compensation expense net of tax benefits of \$11.9 million, and impairment of goodwill of \$92.4 million. The changes in working capital accounts were primarily due to an increase in deferred taxes of \$30.8 million resulting from tax deductible goodwill write-off, a decrease in accounts receivable of \$15.3 million, a net decrease in accounts payable and accrued liabilities of \$6.0 million, and a decrease in prepaid expenses and other assets of \$3.2 million. The decrease in accounts receivable were primarily due to better collections. The net decrease in accounts payable and accrued and prepaid expenses and other assets were primarily due to timing of payments.

Table of Contents

Net Cash Provided by (Used in) Investing Activities

Cash flows from investing activities include capital expenditures, capitalized internal development costs, and purchases, sales and maturities of marketable securities.

Cash flows provided by investing activities were \$33.3 million for fiscal year 2015, compared to cash used in investing activities of \$10.7 million for fiscal year 2014 and \$7.5 million for fiscal year 2013.

Cash provided by investing activities in fiscal year 2015 was primarily due to net sales and maturities of marketable securities of \$38.7 million and proceeds from the sale of domain names that were not considered to be strategically important to our business of \$3.4 million, offset by capital expenditures and internal software development costs of \$5.7 million and a purchase of an investment of \$2.5 million.

Cash used in investing activities in fiscal year 2014 was primarily due to capital expenditures and internal software development costs of \$7.9 million, licenses of intangible assets of \$2.8 million and acquisition costs of \$0.9 million offset by proceeds from a sale of an investment of \$1.4 million and other investing activities of \$0.5 million. Net investments in marketable securities totaled \$1.0 million.

Cash used in investing activities in fiscal year 2013 was primarily due to capital expenditures and internal software development costs of \$3.9 million and licenses of intangible assets of \$2.5 million. Net investments in marketable securities totaled \$1.1 million.

Net Cash Used in Financing Activities

Cash flows from financing activities include proceeds from the exercise of stock options, withholding taxes related to restricted stock net of share settlement, excess tax benefits from stock-based compensation, proceeds from revolving loan facility, and principal payments on bank debt and acquisition-related notes payable.

Cash flows used by financing activities were \$63.1 million for fiscal year 2015 compared to \$13.5 million for fiscal year 2014 and \$21.6 million for fiscal year 2013.

Cash used in financing activities in fiscal year 2015 was primarily due to principal payments on our term loan facility and acquisition-related notes payable of \$78.0 million and withholding taxes related to restricted stock net share settlement of \$1.2 million, offset by proceeds from the revolving loan facility of \$15.0 million and exercises of stock options of \$1.3 million.

Cash used in financing activities in fiscal year 2014 was primarily due to principal payments on acquisition-related notes payable and our term loan facility and related fees of \$15.5 million and withholding taxes related to restricted stock net of share settlement of \$1.9 million offset by proceeds received from exercises of stock options of \$3.3 million and excess tax benefits from exercises of stock options of \$0.5 million.

Cash used in financing activities in fiscal year 2013 was primarily due to principal payments on acquisition-related notes payable and our term loan facility and related fees of \$15.8 million and repurchases of our common stock of \$6.2 million under our stock repurchase program partially offset by proceeds received from exercises of stock options of \$0.5 million.

Off-Balance Sheet Arrangements

During the periods presented, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. We have variable interest entities, none of which we are the primary beneficiary.

Table of Contents**Contractual Obligations**

Our contractual obligations relate primarily to borrowings under our revolving loan facility, acquisition-related note payable, and operating leases.

The following table sets forth payments due under our contractual obligations as of June 30, 2015:

	Total	Less than 1 Year	1-3 Years (In thousands)	3-5 Years	More than 5 Years
Revolving Loan Facility	\$ 15,000	\$	\$ 15,000	\$	\$
Operating Leases	11,573	3,645	6,568	1,360	
Promissory Note	50	50			
Total	\$ 26,623	\$ 3,695	\$ 21,568	\$ 1,360	\$

The above table does not include approximately \$3.1 million of long-term income tax liabilities for uncertainty in income taxes due to the fact that we are unable to reasonably estimate the timing of these potential future payments.

Loan Facility

As of June 30, 2014, we were party to a credit agreement (the *Credit Agreement*) with Comerica Bank (the *Bank*), the administrative agent and lead arranger, which consisted of a \$100.0 million five-year term loan facility and a \$50.0 million five-year revolving loan facility maturing on November 4, 2016.

On June 11, 2015, we entered into the Third Amendment to Credit Agreement (*Third Amendment*) with the Bank to, among other things, pay off in full and terminate the term loan facility, reduce the revolving loan facility from \$50.0 million to \$25.0 million, and extend the expiration date of the Credit Agreement from November 4, 2016 to June 11, 2017. Borrowings under the revolving loan facility bear interest at a rate of the Eurodollar rate plus 3.00%, and are secured by substantially all of our assets. Pursuant to the Third Amendment, the revolving loan facility is subject to a borrowing base consisting of eligible receivables and certain other customary conditions. We must pay an annual facility fee of \$62,500 and an annual unused fee of 0.25% of the undrawn revolving loan facility credit commitments. The Company has the right to prepay the revolving loan facility or permanently reduce the revolving loan facility credit commitments without premium or penalty, in whole or in part at any time.

The Credit Agreement, as amended, contains limitations on the Company's ability to sell assets, make acquisitions, pay dividends, incur capital expenditures and requires us to comply with certain additional covenants. We must also comply with certain financial covenants only when there are amounts outstanding under the revolving loan facility or to draw down amounts under the revolving loan facility. We were in compliance with all covenants under the Credit Agreement as of June 30, 2015 and 2014.

As of June 30, 2015, there were no amounts outstanding under the term loan facility, as the term loan facility had been terminated on June 11, 2015. As of June 30, 2014, there was \$77.5 million outstanding under the term loan facility. As of June 30, 2015, \$15.0 million was outstanding under the revolving loan facility. There were no amounts outstanding under the revolving loan facility as of June 30, 2014.

Interest Rate Swap

As of June 30, 2014, we held an interest rate swap to reduce our exposure to the financial impact of changing interest rates under our term loan facility. In June 2015, in connection with our repayment in full of the

Table of Contents

term loan facility, we also terminated the interest rate swap agreement. Upon settlement, we recognized an expense of \$0.3 million to other income (expense), net in the consolidated statement of operations.

Headquarters Lease

We entered into a lease agreement in February 2010 for approximately 63,998 square feet of office space located at 950 Tower Lane, Foster City, California. The term of the lease began on November 1, 2010 and expires on October 31, 2018. The monthly base rent was abated for the first 12 calendar months under the lease, and remained at \$0.1 million through the 24th calendar month of the term of the lease. After this 24 month period, monthly base rent increased to \$0.2 million for the subsequent 12 months and now increases approximately 3% after each 12-month anniversary during the remaining term, including any extensions under our options to extend. We have two options to extend the term of the lease for one additional year for each option following the expiration date of the lease or renewal term, as applicable.

Critical Accounting Policies and Estimates

We have prepared our consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP). In doing so, we are required to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the reporting period.

Some of the estimates and assumptions we are required to make relate to matters that are inherently uncertain as they pertain to future events. We base these estimates and assumptions on historical experience or on various other factors that we believe to be reasonable and appropriate under the circumstances. On an ongoing basis, we reconsider and evaluate our estimates and assumptions. Actual results may differ significantly from these estimates.

We believe that the critical accounting policies listed below involve our more significant judgments, estimates and assumptions and, therefore, could have the greatest potential impact on our consolidated financial statements. In addition, we believe that a discussion of these policies is necessary to understand and evaluate the consolidated financial statements contained in this report.

See Note 2, Summary of Significant Accounting Principles, of our consolidated financial statements for further information on our critical and other significant accounting policies.

Revenue Recognition

More than 99% of total revenue is derived from the DMS business. DMS revenue is derived primarily from fees which are earned through the delivery of qualified leads, inquiries, clicks, calls, applications, customers and, to a lesser extent, display advertisements, or impressions. We recognize revenue when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable and collectability is reasonably assured. Delivery is deemed to have occurred at the time a qualified lead or click is delivered to the client provided that no significant obligations remain.

Under our revenue recognition policies, we allocate revenue in an arrangement using the estimated selling price (ESP) of deliverables if vendor-specific objective evidence (VSOE) of selling price based on historical stand-alone sales or third-party evidence (TPE) of selling price does not exist. Due to the unique nature of some of our multiple deliverable revenue arrangements, we may not be able to establish selling prices based on historical stand-alone sales or third-party evidence, therefore we may use our best estimate to establish selling prices for these arrangements under the standard. We establish best estimates within a range of selling prices considering multiple factors including, but not limited to, factors such as class of client, size of transaction,

Table of Contents

available media inventory, pricing strategies and market conditions. We believe the use of the best estimate of selling price allows revenue recognition in a manner consistent with the underlying economics of the transaction.

From time to time, we may agree to credit a client for certain leads, inquiries, clicks, calls, applications, or customers if they fail to meet the contractual or other guidelines of a particular client. We have established a sales reserve based on historical experience. To date, such credits have been within our expectations.

For a portion of our revenue, we have agreements with providers of online media or third-party publishers used in the generation of qualified leads, inquiries, clicks, calls, applications, or customers. We receive a fee from our clients and pay a fee to publishers either on a revenue-share, cost-per-lead, cost-per-click or cost-per-thousand-impressions basis. We are the primary obligor in the transaction. As a result, the fees paid by our clients are recognized as revenue and the fees paid to our publishers are included in cost of revenue.

All other revenue is comprised of (i) set-up and professional services fees and (ii) usage fees. Set-up and professional service fees that do not provide stand-alone value to a client are recognized over the contractual term of the agreement or the expected client relationship period, whichever is longer, effective when the application reaches the go-live date. We define the go-live date as the date when the application enters into a production environment or all essential functionalities have been delivered. Usage fees are recognized on a monthly basis as earned.

Deferred revenue is comprised of contractual billings in excess of recognized revenue and payments received in advance of revenue recognition.

Stock-Based Compensation

We measure and record the expense related to stock-based transactions based on the fair values of the awards as determined on the date of grant. For stock options, we selected and have historically used the Black-Scholes option pricing model to estimate the fair value. In applying the Black-Scholes option pricing model, our determination of fair value is affected by assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, the expected stock price volatility over the term of the stock options and the employees' actual and projected stock option exercise and pre-vesting employment termination behaviors. We estimate the expected volatility of our common stock based on our historical volatility over the stock options' expected term. We have no history or expectation of paying dividends on our common stock. The risk-free interest rate is based on the U.S. Treasury yield for a term consistent with the expected term of the stock options. The fair value of restricted stock units is determined based on the closing price of our common stock on the date of grant.

We recognize stock-based compensation expense over the requisite service period using the straight-line method, based on awards ultimately expected to vest. We estimate future forfeitures at the date of grant and revise the estimates, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

Goodwill

We conduct a test for the impairment of goodwill at the reporting unit level on at least an annual basis and whenever there are events or changes in circumstances that would more likely than not reduce the estimated fair value of a reporting unit below its carrying value. Application of the goodwill impairment test requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value of each reporting unit. Significant judgments required to estimate the fair value of reporting units include estimating future cash flows and determining appropriate discount rates, growth rates, an appropriate control premium and other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value for each reporting unit which could trigger impairment.

Table of Contents

We have two reporting units for purposes of allocating and testing goodwill, DMS and DSS, which is included in the All Other reportable segment. We performed our annual goodwill impairment test on April 30, 2015 for fiscal year 2015. We conducted a qualitative assessment to determine whether it was necessary to perform a two-step quantitative goodwill impairment test. In assessing the qualitative factors, we considered the impact of key factors such as changes in industry and competitive environment, stock price, actual revenue performance compared to previous years, forecasts and cash flow generation. Based on the results of the qualitative assessment, there were no indicators of impairment.

We performed our annual goodwill impairment test on April 30, 2014 for fiscal year 2014. While we were permitted to conduct a qualitative assessment to determine whether it was necessary to perform a two-step quantitative goodwill impairment test, for our annual goodwill impairment test in the fourth quarter of fiscal 2014, we performed a quantitative test for both of our reporting units.

In the first step of the annual impairment test, we compared the fair value of each reporting unit to its carrying value. We estimated the fair value of the DSS reporting unit using only the income approach as market comparables were not meaningful. We concluded that the carrying value of the DSS reporting unit exceeded its estimated fair value. Therefore we performed a Step 2 analysis, as required, and recorded a goodwill impairment charge of \$1.2 million for the entire goodwill of our DSS reporting unit. We estimated the fair value of our DMS reporting unit based on our market capitalization and determined that there were no instances of impairment in our DMS reporting unit.

Our public market capitalization sustained a decline after June 30, 2014 primarily due to our operating results in the fourth quarter of fiscal year 2014, to a value below the net book carrying value of our equity. As a result, we determined that this triggered the necessity to conduct an interim goodwill impairment test as of June 30, 2014. We first tested the long-lived assets related to the DMS reporting unit as of June 30, 2014 and, based on the undiscounted cash flows, determined that these assets were not impaired.

A two-step process was then required to test goodwill impairment. The first step was to determine if there was an indication of impairment by comparing the estimated fair value to its carrying value including goodwill. Goodwill is considered impaired if the carrying value exceeds the estimated fair value. Upon indication of impairment, a second step is performed to determine the amount of the impairment by comparing the implied fair value of the reporting unit's goodwill with its carrying value.

We estimated the fair value of our DMS reporting unit using a weighting of fair values derived most significantly from the market approach which approximated our market capitalization and to a lesser extent the income approach. Under the market approach, we utilize publicly-traded comparable company information to determine revenue and earnings multiples that were used to value our reporting units adjusted for an estimated control premium. As the DMS reporting unit represented substantially the entire Company, the market approach was reconciled to our market capitalization. Under the income approach, we estimated the fair value of a reporting unit based on the present value of estimated future cash flows. Cash flow projections were based on management's estimates of revenue growth rates and operating margins, taking into consideration industry and market conditions. The discount rate used was based on the weighted-average cost of capital adjusted for the relevant risk associated with business-specific characteristics and the uncertainty related to the reporting unit's ability to execute on the projected cash flows.

The second step of the goodwill impairment test required us to fair value all assets and liabilities of our DMS reporting unit to determine the implied fair value of goodwill. We compared the implied fair value of the reporting unit's goodwill to its carrying value. This test resulted in a non-cash goodwill impairment charge in aggregate of \$95.6 million for the year ended June 30, 2014. The inputs used to measure the estimated fair value of goodwill are classified as a Level 3 fair value measurement due to the significance of unobservable inputs in income approach using company-specific information.

Table of Contents

Long-Lived Assets

We evaluate long-lived assets, such as property and equipment and purchased intangible assets with finite lives, for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. We apply judgment when estimating the fair value of the assets based on the undiscounted future cash flows the assets are expected to generate and recognize an impairment loss if estimated undiscounted future cash flows expected to result from the use of the asset plus net proceeds expected from disposition of the asset, if any, are less than the carrying value of the asset. As mentioned in the Goodwill section above, our public market capitalization sustained a decline after June 30, 2014 and, based on the undiscounted cash flows, determined that these assets were not impaired as of June 30, 2014. We re-evaluated our long-lived assets as of April 30, 2015 and determined that these assets were not impaired.

Income Taxes

We account for income taxes using an asset and liability approach to record deferred taxes. Our deferred income tax assets represent temporary differences between the financial statement carrying amount and the tax basis of existing assets and liabilities that will result in deductible amounts in future years, including net operating loss carry forwards. A valuation allowance is recorded against our deferred tax assets which are not expected to be realized. Our judgment regarding future profitability may change due to future market conditions, changes in U.S. or international tax laws and other factors. We recorded a valuation allowance against the majority of our deferred tax assets at the end of fiscal year 2014 due to the significant negative evidence that the near term realization of certain assets were deemed unlikely. As of June 30, 2015, we believe it is not more likely than not that the net deferred tax assets will be fully realizable and therefore, we continue to maintain the valuation allowance.

Recent Accounting Pronouncements

See Note 2, Summary of Significant Accounting Policies, to our consolidated financial statements for information with respect to recent accounting pronouncements and the impact of these pronouncements on our consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to market risks in the ordinary course of our business. These risks include primarily foreign currency exchange and interest rate risks.

Interest Rate Risk

We invest our cash equivalents primarily in money market funds. Unrestricted cash and cash equivalents are held for working capital purposes and acquisition financing. We do not enter into investments for trading or speculative purposes. We believe that we do not have material exposure to changes in the fair value of these investments as a result of changes in interest rates due to the short-term nature of our investments. Declines in interest rates may reduce future investment income. However, a hypothetical decline of 1% in the interest rate on our investments would not have a material effect on our consolidated financial statements.

As of June 30, 2015, our revolving loan facility had an outstanding balance of \$15.0 million. Interest on borrowings under the revolving loan facility is payable quarterly at the Eurodollar rate plus 3.00%. Our exposure to interest rate risk under the revolving loan facility will depend on the extent to which we utilize such facility. A hypothetical change of 1% from prevailing interest rates as of June 30, 2015 would not have a material effect on our interest rate expense.

Table of Contents

Foreign Currency Exchange Risk

To date, our client agreements have been predominately denominated in U.S. dollars, and accordingly, we have limited exposure to foreign currency exchange rate fluctuations related to client agreements, and do not currently engage in foreign currency hedging transactions. As the local accounts for some of our foreign operations are maintained in the local currency of the respective country, we are subject to foreign currency exchange rate fluctuations associated with the remeasurement to U.S. dollars. A hypothetical change of 10% in foreign currency exchange rates would not have a material effect on our consolidated financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of QuinStreet, Inc.

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of QuinStreet, Inc. and its subsidiaries at June 30, 2015 and June 30, 2014, and the results of their operations and their cash flows for each of the three years in the period ended June 30, 2015 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of June 30, 2015, based on criteria established in *Internal Control – Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company’s management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedule and on the Company’s internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
