I. Operating Results and Financial Conditions

2015 in Review

Looking back at the global economy in 2015, the U.S. economy continued to grow steadily as employment conditions and consumer spending progressively improved. In Europe, developed countries such as the U.K. led a moderate economic recovery. In contrast, China's economy continued to decline, weighed down by excessive investments, and the economies of emerging countries, including those of Southeast Asia and India, slowed due to such factors as the recession in China and a decline in resource prices. As for the Japanese economy, improvements were seen in both corporate earnings and employment conditions during the year. Despite expectations at the beginning of 2015 that the global economy would realize a modest recovery led by the U.S. economy, during the second half, as the slowdown in China's economy became evident, emerging economies also grew weaker. As a result, the global economy overall experienced its lowest level of growth since the financial crisis precipitated by Lehman Brothers' bankruptcy in 2008.

As for the markets in which Canon operates amid these conditions, demand for office multifunction devices (MFDs) remained firm, mainly for color models. As for cameras, the interchangeable-lens digital camera market continued to face harsh conditions owing to currency depreciations in emerging countries and the slowdown in China. Likewise, demand for digital compact cameras also declined amid the shrinking market. Additionally, demand for inkjet printers decreased in emerging countries, mainly in Asia, due to the depreciations of emerging country currencies and the slowdown in China. In the industrial equipment market, ongoing strong investment by manufacturers led to healthy demand for semiconductor lithography systems for memory devices, image sensors and power semiconductor devices. Additionally, demand for lithography equipment used in the production of flat panel displays (FPDs) increased for large-size panels as device manufacturers boost capital investment for larger-size LCD panels that offer higher levels of resolution.

The average value of the yen during the year was ¥121.13 against the U.S. dollar, a year-on-year depreciation of approximately ¥15, and ¥134.20 against the euro, a year-on-year appreciation of approximately ¥6.

During 2015, sales of digital cameras and inkjet printers declined in the face of continued harsh conditions, mainly in China and emerging Asian countries. By contrast, sales of color-model office MFDs and color-model light-production printing systems increased steadily. Sales of semiconductor lithography equipment and FPD lithography equipment also largely exceeded those for the previous year thanks to favorable market conditions. Consequently, benefitting from the boost provided by the acquisition of Axis and the positive effect of favorable currency exchange rates, net sales for the year increased 2.0% year on year to ¥3,800.3 billion. The gross profit ratio for the year rose 1.0 point year on year to 50.9% thanks to ongoing cost-cutting activities and highly profitable new products. Operating expenses increased 5.4% year on year to ¥1,579.2 billion owing to such factors as the increase in foreign-currency-denominated operating expenses after conversion into yen due to the depreciation of the yen, along with the impact of the acquisition of Axis and an increase in R&D expenses related to new products. As a result, operating profit decreased by 2.3% to ¥355.2 billion. Other income (deductions) decreased by ¥27.5 billion due to foreign currency exchange losses, leading to a year-on-year decline in income before income taxes of 9.3% to ¥347.4 billion, and a decrease in net income attributable to Canon Inc. of 13.6% to ¥220.2 billion.

Basic net income attributable to Canon Inc. shareholders per share for the year was ¥201.65, a year-on-year decrease of ¥27.38.

Results by Segment

Looking at Canon's full-year performance by business unit, within the Office Business Unit, as for office MFDs, thanks to strong sales of color models led by new small-office/home-office color A3 (12 x18 ") imageRUNNER ADVANCE C3300-series models and imagePRESS C800/700-series color digital presses targeting the light production market, unit sales of color models increased compared with the previous year, as did unit sales for the segment overall, including monochrome models, which had been facing decreasing demand. Among high-speed continuous-feed printers, the new Océ-produced VarioPrint i300, Canon's first high-speed sheet-fed color inkjet press, gained favorable reviews. As for laser printers, total sales volume decreased due to declining demand in emerging countries. Those factors, coupled with the positive effect of favorable currency exchange rates, resulted in sales for the business unit totaling ¥2,110.8 billion, a year-on-year increase of 1.5%, while operating profit totaled ¥290.6 billion, a year-on-year decrease of 0.5%.

Within the Imaging System Business Unit, although total sales volume of interchangeable-lens digital cameras declined due to currency depreciations in emerging countries and the slowdown of China's economy, there were positive signs of a recovery in sales in the U.S. and Japan. Additionally, sales have been strong for such models as the EOS 5DS and EOS 5DS R digital SLR cameras, which deliver the highest resolution of any model in the history of EOS cameras. As for digital compact cameras, while sales volume declined amid the ongoing contraction of the market, the ratio of more profitable high-added-value models increased owing to efforts to strengthen the lineup of PowerShot G-series models. As for inkjet printers, although Canon has been working to expand sales through the Company's broad product lineup, ranging from home-use printers to MAXIFY-series business models, total sales volume declined due to the significant impact of shrinking markets, mainly in Asia. In contrast, sales of consumable supplies enjoyed solid demand. As a result, sales for the business unit totaled ¥1,263.8 billion, a year-on-year decrease of 5.9%, while operating profit totaled ¥183.4 billion, declining 5.7% year on year.

In the Industry and Others Business Unit, within the semiconductor lithography equipment segment, unit sales increased owing to strong capital investment in response to growing demand for memory devices used in mobile devices such as smartphones, and in cloud servers, along with increased demand for on-board automotive devices and for communication devices supporting the development of the IoT (Internet of Things). Unit sales of FPD lithography equipment also increased, particularly systems used in the fabrication of large-size panels. Consequently, along with the impact of the acquisition of Axis, which was consolidated in the second quarter, sales for the business unit increased 31.6% year on year to ¥524.7 billion. As for operating profit, although it improved by ¥8.7 billion compared with the previous year, the business unit was in the red by ¥13.1 billion due to upfront investment in next-generation technologies and new businesses.

Cash Flow

During 2015, cash flow from operating activities totaled ¥474.7 billion, a decrease of ¥109.2 billion compared with the previous year due to the decrease in profit along with the increase in working capital. Cash flow from investing activities increased ¥184.3 billion year on year to ¥453.6 billion, mainly due to the payment for the acquisition of Axis. Accordingly, free cash flow totaled ¥21.1 billion, a decrease of ¥293.5 billion compared with the previous year.

Cash flow from financing activities recorded an outlay of ¥210.2 billion, mainly arising from the dividend payout.

Owing to these factors, as well as the negative impact of foreign currency translation adjustments, cash and cash equivalents decreased by ¥211.0 billion to ¥633.6 billion from the end of the previous year.

Non-consolidated Results

Non-consolidated net sales totaled ¥2,091.1 billion, a year-on-year increase of 0.3% while ordinary profit increased by 8.2% to ¥269.8 billion, and net income increased by 20.8% to ¥212.0 billion.

Outlook

As for the outlook in 2016, the U.S. and European economies are expected to grow moderately thanks to expanding domestic demand as employment conditions continue to improve. With regard to the Japanese economy, the outlook indicates a gradual recovery trend amid increased capital investment and wage growth supported by improved corporate earnings. Looking at China's economy, the slowdown is expected to continue due to sluggish domestic demand and capital investment. Emerging economies, such as those of Southeast Asia, India, Brazil and Russia, are likely to face slowdowns owing to currency depreciations or declines in resource prices. Overall, the global economy is expected to face harsh economic conditions for some time.

In the businesses in which Canon is involved, although demand for color office MFDs and production printers is expected to continue growing, a recovery in sales of products that are largely sold in emerging markets, such as entry-class cameras and single-function laser printers, is expected to take time. Within the market for semiconductor lithography equipment, capital investment is expected to remain strong while forecasts for the FPD lithography equipment market also point to further future expansion. Also expected to grow is the network camera market, a market in which Axis, which became a consolidated subsidiary in 2015, is a major player.

With regard to currency exchange rates for the year, on which the Company's performance outlook is based, taking into account the expectation of a strong U.S. dollar supported by continuous interest rates hikes in the future, Canon anticipates exchange rates of ¥120 to the U.S. dollar and ¥130 to the euro, representing appreciations of approximately ¥1 against the U.S. dollar and approximately ¥4 against the euro.

Taking these foreign exchange rate assumptions into consideration and the current economic forecast, Canon projects full-year consolidated net sales in 2016 of ¥3,850.0 billion, a year-on-year increase of 1.3%; operating profit of ¥360.0 billion, a year-on-year increase of 1.3%; income before income taxes of ¥360.0 billion, a year-on-year increase of 3.6%; and net income attributable to Canon Inc. of ¥230.0 billion, a year-on-year increase of 4.4%.

Basic Policy Regarding Profit Distribution and Dividends for the Current Fiscal Year

Canon is being more proactive in returning profits to shareholders, mainly in the form of a dividend, taking into consideration mid-term profit forecasts, planned future investments, cash flow and other factors.

In 2015, the business environment remained challenging, characterized by, among other factors, economic slowdowns in China and emerging countries. Thanks, however, to efforts to boost product competitiveness and strengthen the Company's financial position through a management focus on profitability and cash flow, Canon was able to generate ample cash reserves. Taking this into consideration while seeking to actively provide a stable return to shareholders, Canon has decided to distribute a full-year dividend of ¥150 per share, (interim dividend of ¥75 per share [already distributed] and year-end dividend of ¥75), which is the same as the previous year's dividend.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

II. Management Policy

(1) Basic Policy

Under the corporate philosophy of *kyosei* living and working together for the common good Canon's basic management policy is to contribute to the prosperity and well-being of the world while endeavoring to become a truly excellent global corporation targeting continued growth and development.

(2) Management Goals

Based on this basic management policy, Canon launched the Excellent Global Corporation Plan in 1996 with the aim of improving corporate value, promoting management reform, raising product competitiveness and strengthening its financial base. In 2011, under the slogan "Aiming for the Summit," Canon embarked on a new five-year initiative: Phase IV of the Excellent Global Corporation Plan. Under this initiative, Canon aimed to make large strides toward becoming a truly excellent corporation, targeting sound business growth through measures aimed at maintaining high profitability and further expanding corporate scale.

Over the five years that followed, however, the global economy proved highly challenging due to such factors as Europe's financial crisis and further economic slowdowns in China and other emerging markets. In response, Canon charted a new course away from a management focus targeting expansion to a strategy aimed at strengthening its financial condition. In this way, the Company aimed to achieve a structure capable of withstanding the recession, while also restructuring business foundations representing new growth engines to facilitate great strides in the future.

During Phase V, launched in 2016 under the basic policy of "Embracing the challenge of new growth through a grand strategic transformation," reforms that were promoted in Phase IV will be further expanded upon. In 2020, the final year of Phase V, Canon aims to achieve net sales of 5 trillion yen, an operating profit ratio of 15% or more, a net income ratio of 10% or more, and a shareholders' equity ratio of 70% or more.

(3) Business Challenges and Countermeasures

Although the global economy is expected to be somewhat better than what it had been over the past five years, the situation remains unstable due to issues such as increased geopolitical risk in the Middle East and the economic slowdown in China. As such, global economic growth is expected to remain modest. From an industrial perspective, however, remarkable developments are being made in technologies in such areas as the IoT and artificial intelligence, which are leading to major changes in industry structure.

Advancements in digital technology have made it easier for startup companies to enter markets, thus fueling increased market competition. Additionally, in the markets in which Canon participates, the office equipment and digital camera markets continue to mature.

To realize new growth and overcome these changes in the market environment, Canon will work to reform all aspects of development, production and sales to further promote enhanced profitability and the rollout of new businesses.

The following key strategies have been drafted for, and will be actively implemented during, Phase V.

1. Establish a new production system to achieve a cost-of-sales ratio of 45%

Strengthen domestic mother factories by further promoting the return of production to Japan and the integration of design, procurement, production engineering, and manufacturing technology operations. At the same time, pursue

total cost reductions through the promotion of such advanced production engineering technologies as robotics and automation.

2. Reinforce and expand new businesses while creating future businesses

Create and expand new businesses by accelerating the horizontal expansion of existing business. Additionally, concentrate management resources and make effective use of M&A to accelerate the expansion of promising business areas such as commercial printing, network cameras and life sciences.

3. Restructure the global sales network in accordance with market changes

Review existing sales organizations and reinforce omni-channel marketing that integrates online and brick-and-mortar sales routes while strengthening and expanding solutions-driven businesses with the aim of solving issues faced by customers. Additionally, continue focusing energies on developing marketing in emerging countries.

4. Enhance R&D capabilities through open innovation

Discard the strict notion of self-sufficiency and construct an R&D system that proactively leverages external technologies and knowledge, promoting joint and contract research with various partners such as domestic and foreign universities and research institutes.

5. Complete the Three Regional Headquarters management system capturing world dynamism

Promote the acquisition of promising businesses through active M&A and complete the Three Regional Headquarter management system, under which Japan, the U.S. and Europe will each roll out businesses globally.

Additionally, under the theme "Taking a decisive first step toward transformation," the following key challenges will be pursued in 2016, the inaugural year of Phase V.

1. Draft and implement plans to revitalize existing businesses

Raise profitability through drastic cost-cutting and work to revitalize businesses, swiftly launching future products that were exhibited at Canon EXPO 2015.

2. Rapidly expand new businesses

Work to speed up the expansion and deployment of large-scale businesses such as commercial printing and network cameras.

3. Accelerate efforts aimed at reducing the cost-of-sales ratio

Continue to investigate optimal locations for production sites and work to accelerate cost reductions at all stages, including product development.

4. Boost sales productivity through marketing reforms

Accelerate efforts to address global growth in e-commerce and work to reinforce the solutions business.

5. Improve R&D productivity through selection and concentration

Apply the selection and concentration process to development themes and boost R&D productivity.

6. Promote the cultivation of global human resources

Build a structure to discover talented individuals from within the entire Canon Group to cultivate global competent human resources capable of performing duties while maintaining an all-encompassing perspective of the world map.

III. Basic Concept Regarding the Selection of Accounting Standards

Canon is listed on the New York Stock Exchange and, since registering its American Depositary Receipts on the OTC (over-the-counter) market in 1969, has prepared its consolidated financial statements in accordance with U.S. generally accepted accounting principles (GAAP) over the long term.

Canon has continued to adopt U.S. GAAP in order to maintain the continuity of financial statements from the past and to maintain international comparability.

Notes: 1. The primary products included in each of the segments are as follows:

Office Business Unit:

Office multifunction devices (MFDs) / Laser multifunction printers (MFPs) / Laser printers / Digital production printing systems / High speed continuous feed printers / Wide-format printers / Document solutions

Imaging System Business Unit:

Interchangeable lens digital cameras / Digital compact cameras / Digital camcorders / Digital cinema cameras / Interchangeable lenses / Compact photo printers / Inkjet printers / Large-format inkjet printers / Commercial photo printers / Image scanners / Multimedia projectors / Broadcast equipment / Calculators

Industry and Others Business Unit:

Semiconductor lithography equipment / FPD (Flat panel display) lithography equipment / Digital radiography systems / Ophthalmic equipment / Vacuum thin-film deposition equipment / Organic LED (OLED) panel manufacturing equipment / Die bonders / Micromotors / Network cameras / Handy terminals / Document scanners

2. The principal countries and regions included in each regional category are as follows:

Americas: United States of America, Canada, Latin America

Europe: United Kingdom, Germany, France, Netherlands, European countries, Middle East and Africa

Asia and Oceania: China, Asian countries, Australia

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these

and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.
