x **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended March 31, 2016

or

.. **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____ .

Commission File Number: 001-34791

MagnaChip Semiconductor Corporation
(Exact name of registrant as specified in its charter)

Delaware **83-0406195**
(State or other jurisdiction of **(I.R.S. Employer**
incorporation or organization) **Identification No.)**
c/o MagnaChip Semiconductor S.A.

1, Allée Scheffer, L-2520

Luxembourg, Grand Duchy of Luxembourg

(352) 45-62-62

(Address, zip code, and telephone number, including area code, of registrant's principal executive offices)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 30, 2016, the registrant had 34,698,904 shares of common stock outstanding.

MAGNACHIP SEMICONDUCTOR CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(TABULAR DOLLARS IN THOUSANDS, EXCEPT SHARE DATA)

1. Business, Basis of Presentation and Significant Accounting Policies

Business

MagnaChip Semiconductor Corporation (together with its subsidiaries, the Company) is a Korea-based designer and manufacturer of analog and mixed-signal semiconductor products for consumer, computing, communication, industrial, automotive and Internet of Things (IoT) applications. The Company provides technology platforms for analog, mixed signal, power, high voltage, non-volatile memory and Radio Frequency (RF) applications. The Company's business is comprised of two operating segments: Foundry Services Group and Standard Products Group. The Company's Foundry Services Group provides specialty analog and mixed-signal foundry services mainly for fabless and Integrated Device Manufacturer (IDM) semiconductor companies that primarily serve the consumer, computing, communication, industrial, automotive and IoT applications. The Company's Standard Products Group is comprised of two business lines: Display Solutions and Power Solutions. The Company's Display Solutions products provide flat panel display solutions to major suppliers of large and small flat panel displays and include sensor products for mobile applications, and industrial applications and home appliances. The Company's Power Solutions products include discrete and integrated circuit solutions for power management in consumer, communication and industrial applications.

Basis of Presentation

The accompanying unaudited interim consolidated financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States of America (US GAAP). These interim consolidated financial statements include normal recurring adjustments and the elimination of all intercompany accounts and transactions which are, in the opinion of management, necessary to provide a fair statement of the Company's financial condition and results of operations for the periods presented. These interim consolidated financial statements are presented in accordance with Accounting Standards Codification 270, *Interim Reporting* and, accordingly, do not include all of the information and note disclosures required by US GAAP for complete financial statements. The results of operations for the three months ended March 31, 2016 are not necessarily indicative of the results to be expected for a full year or for any other periods.

The December 31, 2015 balance sheet data was derived from the Company's audited financial statements, but does not include all disclosures required by US GAAP.

Recent Accounting Pronouncements

In March 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2016-09, *Improvements to Employee Share-Based Payment Accounting* (ASU 2016-09). ASU 2016-09 simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. ASU 2016-09 is effective for fiscal years beginning after December 15, 2016, and interim periods within those years and early adoption is permitted. The Company is currently evaluating the impact of adoption of ASU 2016-09 on its consolidated financial statements.

Edgar Filing: MAGNACHIP SEMICONDUCTOR Corp - Form 10-Q

In February 2016, the FASB issued Accounting Standards Update No. 2016-02, Leases (Topic 842) (ASU 2016-02) in order to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet for those leases classified as operating leases under US GAAP. ASU 2016-02 requires that a lessee should recognize a liability to make lease payments and a right-of-use asset representing its right to use the underlying asset for the lease term on the balance sheet. ASU 2016-02 is effective for fiscal years beginning after December 15, 2018, including interim periods within those reporting periods using a modified retrospective approach and early adoption is permitted. The Company is currently evaluating the impact of adoption of ASU 2016-02 on its consolidated financial statements.

In November 2015, the FASB issued Accounting Standards Update No. 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes (ASU 2015-17). The amendments in ASU 2015-17 require an entity to classify all deferred tax assets and liabilities as noncurrent. ASU 2015-17 is effective for fiscal years beginning after December 15, 2016 and interim periods within those years and early adoption is permitted. The Company does not expect the adoption of ASU 2015-17 to have a material effect on the Company's consolidated financial statements.

Table of Contents

In July 2015, the FASB issued Accounting Standards Update No. 2015-11, *Simplifying the Measurement of Inventory* (ASU 2015-11). Under this ASU, inventory will be measured at the lower of cost and net realizable value, and options that currently exist for market value will be eliminated. Net realizable value is defined as the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. No other changes were made to the current guidance on inventory measurement. ASU 2015-11 is effective for interim and annual periods beginning after December 15, 2016, with early adoption permitted. The Company does not expect the adoption of ASU 2015-11 to have a material effect on the Company's consolidated financial statements.

In August 2014, the FASB issued Accounting Standards Update No. 2014-15, *Presentation of Financial Statements Going Concern* (ASU 2014-15), which provides guidance on determining when and how to disclose going-concern uncertainties in the financial statements. ASU 2014-15 requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date the financial statements are issued. An entity will be required to provide certain disclosures if conditions of events raise substantial doubt about the entity's ability to continue as a going concern. ASU 2014-15 is effective for annual periods ending after December 15, 2016, and interim periods thereafter, with early adoption permitted. The Company is currently evaluating the impact of the adoption of ASU 2014-15 on its consolidated financial statements.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers* (ASU 2014-09). ASU 2014-09 supersedes the revenue recognition requirements in *Revenue Recognition (Topic 605)*, and requires entities to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to in exchange for those goods or services. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016 (the *Original Effective Date*), including interim periods within that reporting period, and can be adopted either retrospectively to each prior period presented or as a cumulative-effect adjustment as of the date of adoption, with early application permitted as of the *Original Effective Date*. In August 2015, the FASB issued ASU 2015-14 *Deferral of the Effective Date*, which defers the required adoption date of ASU 2014-09 by one year. As a result of the deferred effective date, ASU 2014-09 will be effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early adoption is permitted but not before the original effective date as of annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. In March 2016, the FASB issued Accounting Standards Update No. 2016-08, *Revenue from Contracts with Customers, Principal versus Agent Considerations (Reporting Revenue Gross versus Net)* (ASU 2016-08) clarifying the implementation guidance on principal versus agent considerations. Specifically, an entity is required to determine whether the nature of a promise is to provide the specified good or service itself (that is, the entity is a principal) or to arrange for the good or service to be provided to the customer by the other party (that is, the entity is an agent). The determination influences the timing and amount of revenue recognition. The effective date and transition requirements for ASU 2016-08 and ASU 2014-09 are the same. The Company is currently evaluating the potential impact of adopting ASU 2014-09 and ASU 2016-08 on its consolidated financial statements.

Recently Adopted Accounting Pronouncement

In April 2015, the FASB issued Accounting Standards Update No. 2015-03, *Interest Imputation of Interest* (ASU 2015-03). ASU 2015-03 requires that debt issuance costs are presented in the balance sheet as a direct deduction from the carrying amount of debt liability, consistent with debt discounts or premiums. The recognition and measurement guidance for debt issuance costs would not be affected. Prior to the issuance of ASU 2015-03, debt issuance costs were required to be presented as an asset in the balance sheet. The Company adopted ASU 2015-03 in the first quarter of fiscal 2016 and reclassified all prior periods presented in its consolidated balance sheets to conform to the current period presentation. As of March 31, 2016 and December 31, 2015, \$3,639 thousand and \$3,781 thousand, respectively, of debt issuance costs were reclassified in the consolidated balance sheets from other non-current assets

to a reduction of long-term borrowings. The adoption of ASU 2015-03 did not impact the Company's consolidated statements of operations and cash flows.

Table of Contents**2. Sales of Accounts Receivable and Receivable Discount Program**

The Company has entered into an agreement to sell selected trade accounts receivable to a financial institution from time to time since March 2012. After the sale, the Company does not retain any interest in the receivables and the applicable financial institution collects these accounts receivable directly from the customer. The proceeds from the sales of these accounts receivable totaled \$5,678 thousand and \$25,485 thousand for the three months ended March 31, 2016 and 2015, respectively, and these sales resulted in pre-tax losses of \$18 thousand and \$22 thousand for the three months ended March 31, 2016 and 2015, respectively, which are included in selling, general and administrative expenses in the consolidated statements of operations. Net proceeds of this accounts receivable sale program are recognized in the consolidated statements of cash flows as part of operating cash flows.

The Company uses receivable discount programs with certain customers. While these discount arrangements allow the Company to accelerate collection of customers' receivables, there can be no assurance that these programs will continue in the future.

3. Inventories

Inventories as of March 31, 2016 and December 31, 2015 consist of the following:

	March 31, 2016	December 31, 2015
Finished goods	\$ 26,924	\$ 18,427
Semi-finished goods and work-in-process	53,258	47,131
Raw materials	7,514	5,987
Materials in-transit	553	2,107
Less: inventory reserve	(17,246)	(16,033)
Inventories, net	\$ 71,003	\$ 57,619
	Three Months Ended	
	March 31, 2016	March 31, 2015
Beginning balance	\$ (16,033)	\$ (47,488)
Change in reserve	(1,650)	(896)
Write off	783	6,338
Translation adjustments	(346)	228
Ending balance	\$ (17,246)	\$ (41,818)

Inventory reserve represents the Company's best estimate in value lost due to excessive inventory level, physical deterioration, obsolescence, changes in price levels, or other causes based on individual facts and circumstances. Inventory reserve relates to inventory items including finished goods, semi-finished goods and work-in-process. Write off of this reserve is recognized only when the related inventory has been disposed or scrapped.

4. Property, Plant and Equipment

Edgar Filing: MAGNACHIP SEMICONDUCTOR Corp - Form 10-Q

Property, plant and equipment as of March 31, 2016 and December 31, 2015 are comprised of the following:

	March 31, 2016	December 31, 2015
Buildings and related structures	\$ 67,604	\$ 66,487
Machinery and equipment	256,249	256,259
Vehicles and others	27,928	27,075
	351,781	349,821
Less: accumulated depreciation	(176,171)	(172,546)
Land	14,946	14,710
Property, plant and equipment, net	\$ 190,556	\$ 191,985

Table of Contents

Aggregate depreciation expenses totaled \$5,921 thousand and \$6,789 thousand for the three months ended March 31, 2016 and 2015, respectively.

5. Intangible Assets

Intangible assets as of March 31, 2016 and December 31, 2015 are comprised of the following:

	March 31, 2016		
	Gross amount	Accumulated amortization	Net amount
Technology	\$ 18,756	\$ (18,756)	\$
Customer relationships	26,938	(26,938)	
Intellectual property assets	8,677	(5,880)	2,797
Intangible assets, net	\$ 54,371	\$ (51,574)	\$ 2,797

	December 31, 2015		
	Gross amount	Accumulated amortization	Net amount
Technology	\$ 18,460	\$ (18,460)	\$
Customer relationships	26,513	(26,513)	
Intellectual property assets	8,357	(5,728)	2,629
Intangible assets, net	\$ 53,330	\$ (50,701)	\$ 2,629

Aggregate amortization expenses for intangible assets totaled \$103 thousand and \$81 thousand for the three months ended March 31, 2016 and 2015, respectively.

6. Accrued Expenses

Accrued expenses as of March 31, 2016 and December 31, 2015 are comprised of the following:

	March 31, 2016	December 31, 2015
Payroll, benefits and related taxes, excluding severance benefits	\$ 21,776	\$ 18,831
Withholding tax attributable to intercompany interest income	13,219	13,130
Interest on senior notes	3,104	6,831
Settlement obligations	603	1,012
Accrued claim settlement	23,500	23,500
Outside service fees	4,975	4,327

Others	7,293	9,090
Accrued expenses	\$ 74,470	\$ 76,721

Accrued claim settlement included in the table above relates to the Company's securities class action complaints. On December 10, 2015, it was determined that the Company is obligated to make an aggregate settlement payment of \$23,500 thousand, which includes all attorneys' fees, costs of administration and plaintiffs' out-of-pocket expenses, lead plaintiff compensatory awards and disbursements. In connection with the securities class action complaints, the Company also settled with its insurers and obtained proceeds of \$29.6 million which are recorded as restricted cash as of March 31, 2016. For more information on the accrued claim settlement, see Note 17. Commitments and Contingencies.

Table of Contents**7. Derivative Financial Instruments**

The Company's Korean subsidiary from time to time has entered into zero cost collar contracts to hedge the risk of changes in the functional-currency-equivalent cash flows attributable to currency rate changes on U.S. dollar denominated revenues.

Details of derivative contracts as of March 31, 2016 are as follows:

Date of transaction	Type of derivative	Total notional amount	Month of settlement
September 30, 2015	Zero cost collar	\$ 30,000	April to June 2016

The zero cost collar contracts qualify as cash flow hedges under Accounting Standards Codification 815, Derivatives and Hedging, since at both the inception of the contracts and on an ongoing basis, the hedging relationship was and is expected to be highly effective in achieving offsetting cash flows attributable to the hedged risk during the term of the contracts. The Company is utilizing the hypothetical derivative method to measure the effectiveness by comparing the changes in value of the actual derivative versus the change in fair value of the hypothetical derivative.

The fair values of the Company's outstanding zero cost collar contracts recorded as assets and liabilities as of March 31, 2016 and December 31, 2015 are as follows:

		March 31, 2016	December 31, 2015
Derivatives designated as hedging instruments:			
Asset Derivatives:			
Zero cost collars	Other current assets	\$ 57	\$
Liabilities Derivatives:			
Zero cost collars	Other current liabilities	\$	\$ 40

Offsetting of derivative assets as of March 31, 2016 is as follows:

	Gross amounts of recognized assets	Gross amounts offset in the balance sheets	Net amounts of assets presented in the balance sheets	Gross amounts not offset in the balance sheets Cash collateral received/ pledged	Net amount
As of March 31, 2016					
Asset Derivatives:					
Zero cost collars	\$ 57	\$	\$ 57	\$	\$ 57

Offsetting of derivative liabilities as of December 31, 2015 is as follows:

	Gross amounts of recognized liabilities	Gross amounts offset in the balance sheets	Net amounts of liabilities presented in the balance sheets	Gross amounts not offset in the balance sheets	Net amount
As of December 31, 2015					

	balance sheets	balance sheets	Financial instruments	Cash collateral received/ pledged
Liabilities Derivatives:				
Zero cost collars	\$ 40	\$ 40	\$	\$ 40

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of accumulated other comprehensive income (AOCI) and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative, representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness, are recognized in current earnings.

Table of Contents

The following table summarizes the impact of derivative instruments on the consolidated statement of operations for the three months ended March 31, 2016 and 2015:

Derivatives in ASC	Amount of Gain Recognized in AOCI on Derivatives (Effective Portion)		Location of Gain	Amount of Gain Recognized in AOCI into Statement of Operations (Effective Portion)		Location of Gain	Amount of Gain Recognized in Statement of Operations on Derivatives (Ineffective Portion)	
	Three Months Ended		Reclassified from AOCI into Statement of Operations	Three Months Ended		Recognized in Statement of Operations on Derivative Portion	Three Months Ended	
815 Cash Flow Hedging Relationships	March 31, 2016	2015		March 31, 2016	2015		March 31, 2016	2015
Zero cost collars	\$ 65	\$	Net sales	\$	\$ 485	Other income, net	\$ 42	\$
Total	\$ 65	\$		\$	\$ 485		\$ 42	\$

As of March 31, 2016, the amount expected to be reclassified from accumulated other comprehensive income into income within the next twelve months is \$24 thousand.

The Company set aside \$2,000 thousand and \$6,000 thousand cash deposits to the counterparty, Nomura Financial Investment (Korea) Co., Ltd. (NFIK) for the zero cost collar contracts outstanding as of March 31, 2016 and December 31, 2015, respectively.

The Company is required to deposit cash collateral with NFIK for any exposure in excess of \$500 thousand and no such cash collateral was required as of March 31, 2016. These outstanding zero cost collar contracts are subject to termination if the sum of qualified and unrestricted cash and cash equivalents held by the Company is less than \$30,000 thousand on the last day of a fiscal quarter.

8. Fair Value Measurements

The Company's financial assets measured at fair value on a recurring basis as of March 31, 2016, and the basis for that measurement is as follows:

Assets:	Fair Value	Carrying Value	Fair Value Measurement	Quoted Prices in	Significant	Significant Unobservable Inputs (Level 3)
				Active Markets for Identical Asset (Level 1)	Other Observable Inputs (Level 2)	

Derivative assets (other current assets)	\$	57	\$	57	\$	\$	57	\$
------------------------------------------	----	----	----	----	----	----	----	----

As of March 31, 2016, the Company did not have any assets and liabilities measured at fair value on a recurring basis other than cash and cash equivalents, restricted cash, accounts receivable, other receivables, hedge collateral, accounts payable, and other accounts payable, fair value of which approximate carrying values due to the short-term nature of these instruments. The fair value of assets and liabilities whose carrying value approximates fair value is determined using Level 2 inputs, with the exception of cash (Level 1).

As of March 31, 2016, the total carrying value and estimated fair value of the Company's 6.625% Senior Notes due July 15, 2021 (the 2021 Notes), which are not measured at fair value on a recurring basis, were \$220,548 thousand and \$166,500 thousand, respectively. The estimated fair value is based on Level 2 inputs.

Table of Contents**9. Long-Term Borrowings**

Long-term borrowings as of March 31, 2016 and December 31, 2015 are as follows:

	March 31, 2016	December 31, 2015
6.625% senior notes due July 2021	\$ 225,000	\$ 225,000
Less: unamortized discount and debt issuance costs	(4,452)	(4,625)
Long-term borrowings, net of unamortized discount and debt issuance costs	\$ 220,548	\$ 220,375

On July 18, 2013, the Company issued \$225,000,000 aggregate principal amount of the 2021 Notes at a price of 99.5%. Interest on the 2021 Notes accrues at a rate of 6.625% per annum, payable semi-annually on January 15 and July 15 of each year, beginning on January 15, 2014.

The Company can optionally redeem all or a part of the 2021 Notes according to the following schedule: (i) at any time prior to July 15, 2016, the Company may on any one or more occasions redeem up to 35% of the aggregate principal amount of 2021 Notes issued under that certain Indenture, dated as of July 18, 2013, by and between the Company and Wilmington Trust, National Association, as trustee (the Trustee), as supplemented by that certain First Supplemental Indenture, dated as of March 27, 2014 (collectively, the Indenture), related to the 2021 Notes at a redemption price equal to 106.625% of the principal amount of the 2021 Notes redeemed, plus accrued and unpaid interest and special interest, if any, to the date of redemption with the net proceeds of a qualified equity offering; (ii) at any time prior to July 15, 2017, the Company may on any one or more occasions redeem all or a part of the 2021 Notes at a redemption price equal to 100% of the principal amount of the notes redeemed, plus the applicable premium as of, and accrued and unpaid interest and special interest, if any, to the date of redemption; and (iii) on or after July 15, 2017, the Company may on any one or more occasions redeem all or a part of the 2021 Notes, at a redemption price equal to 103.313%, 101.656% and 100% of the principal amount of the notes redeemed on or after July 15, 2017, 2018 and 2019 and thereafter, respectively, plus accrued and unpaid interest and special interest, if any, on the notes redeemed, to the applicable date of redemption.

The indenture relating to the 2021 Notes contains covenants that limit ability of the Company and its restricted subsidiaries to: (i) declare or pay any dividend or make any payment or distribution on account of or purchase or redeem the Company's capital stock or equity interests of the restricted subsidiaries; (ii) make any principal payment on, or redeem or repurchase, prior to any scheduled repayment or maturity, any subordinated indebtedness; (iii) make certain investments; (iv) incur additional indebtedness and issue certain types of capital stock; (v) create or incur any lien (except for permitted liens) that secures obligations under any indebtedness; (vi) merge with or into or sell all or substantially all of the Company's assets to other companies; (vii) enter into certain types of transactions with affiliates; (viii) guarantee the payment of any indebtedness; (ix) enter into sale-leaseback transactions; (x) enter into agreements that would restrict the ability of the restricted subsidiaries to make distributions with respect to their equity to the Company or other restricted subsidiaries, to make loans to the Company or other restricted subsidiaries or to transfer assets to the Company or other restricted subsidiaries; and (xi) designate unrestricted subsidiaries.

These covenants are subject to a number of exceptions and qualifications. Certain of these restrictive covenants will terminate if the notes are rated investment grade at any time.

Table of Contents**10. Accrued Severance Benefits**

The majority of accrued severance benefits are for employees in the Company's Korean subsidiary. Pursuant to the Employee Retirement Benefit Security Act of Korea, eligible employees and executive officers with one or more years of service are entitled to severance benefits upon the termination of their employment based on their length of service and rate of pay. As of March 31, 2016, 98% of employees of the Company were eligible for severance benefits.

Changes in accrued severance benefits are as follows:

	Three Months Ended	
	March 31,	March 31,
	2016	2015
Beginning balance	\$ 135,160	\$ 140,405
Provisions	5,771	7,260
Severance payments	(4,098)	(1,341)
Translation adjustments	2,270	(726)
	139,103	145,598
Less: Cumulative contributions to the National Pension Fund	(302)	(343)
Group severance insurance plan	(701)	(764)
Accrued severance benefits, net	\$ 138,100	\$ 144,491

The severance benefits funded through the Company's National Pension Fund and group severance insurance plan will be used exclusively for payment of severance benefits to eligible employees. These amounts have been deducted from the accrued severance benefit balance.

The Company is liable to pay the following future benefits to its non-executive employees upon their normal retirement age:

	Severance benefit
Remainder of 2016	\$
2017	
2018	
2019	1,038
2020	1,673
2021	2,871
2022 - 2026	20,186

The above amounts were determined based on the non-executive employees' current salary rates and the number of service years that will be accumulated upon their retirement dates. These amounts do not include amounts that might

be paid to non-executive employees that will cease working with the Company before their normal retirement ages.

The above table reflects an effect of a mandatory extension of retirement age in Korea from 57 to 60 under the Employment Promotion for the Aged Act effective from the beginning of 2016.

11. Foreign Currency Gain (Loss), Net

Net foreign currency gain or loss includes non-cash translation gain or loss associated with intercompany balances. A substantial portion of the Company's net foreign currency gain or loss is non-cash translation gain or loss associated with intercompany long-term loans to the Company's Korean subsidiary. The loans are denominated in U.S. dollars and are affected by changes in the exchange rate between the Korean won and the U.S. dollar. As of March 31, 2016, the outstanding intercompany loan balance including accrued interests between the Korean subsidiary and the Dutch subsidiary was \$590 million. The Korean won to U.S. dollar exchange rates were 1,153.5:1 and 1,172.0:1 using the first base rate as of March 31, 2016 and December 31, 2015, respectively, as quoted by the KEB Hana Bank (formerly Korea Exchange Bank).

Table of Contents**12. Restructuring Gain**

During the first quarter of 2016, the Company completed all procedures necessary to sell all machineries in its closed six-inch fabrication facility in Cheongju, South Korea (the 6-inch fab) and recognized the \$7,785 thousand of restructuring gain from the related deposit of \$8,165 thousand received as of December 31, 2015, net of certain direct selling costs.

13. Income Taxes

The Company files income tax returns in the U.S., Korea, Japan, Taiwan and various other jurisdictions.

The Company's Korean subsidiary is the primary operating subsidiary of the Company. For the three months ended March 31, 2016 and 2015, no income tax expense or benefit for the Korean subsidiary was recorded due to net operating loss carry-forwards available to offset taxable income and full allowance for deferred tax assets.

Income tax expense recorded for the three months ended March 31, 2016 and 2015 was \$815 thousand and \$1,133 thousand, respectively, primarily attributable to interest on intercompany loan balances. The decrease in income tax expenses was attributable to a reversal of deferred tax assets at a foreign subsidiary for the three months ended March 31, 2015.

14. Geographic and Segment Information

The Company had previously reported its results of operations under one operating segment. During the second quarter of 2015, organizational changes were made to (i) realign the Company's businesses and organizational structure and (ii) streamline and consolidate certain business processes to achieve greater operating efficiencies. In furtherance of these objectives, the Company combined its Display Solutions and Power Solutions business lines into a new segment called Standard Products Group. Beginning in the second quarter of 2015, the Company began reporting its financial results in two operating segments: Semiconductor Manufacturing Services and Standard Products Group. The Company's chief operating decision maker is its Chief Executive Officer who allocates resources and assesses performance of the business and other activities based on gross profit. The two newly established operating segments were managed prospectively and all prior period amounts related to the segment change have been retrospectively reclassified to conform to the new presentation.

During the third quarter of 2015, the Company changed the name of its Semiconductor Manufacturing Services segment to Foundry Services Group. The Company believes that this new name provides greater clarity on the identity of this segment. There is no change to the composition of this reportable segment from what the Company previously reported for the Semiconductor Manufacturing Service segment.

The following sets forth information relating to the operating segment:

	Three Months Ended	
	March 31,	March 31,
	2016	2015
Net Sales		
Foundry Services Group	\$ 59,979	\$ 74,520
Standard Products Group		

Edgar Filing: MAGNACHIP SEMICONDUCTOR Corp - Form 10-Q

Display Solutions	58,059	56,353
Power Solutions	29,918	33,837
Total Standard Products Group	\$ 87,977	\$ 90,190
All other	149	175
Total net sales	\$ 148,105	\$ 164,885

Table of Contents

	Three Months Ended	
	March 31,	March 31,
	2016	2015
Gross Profit		
Foundry Services Group	\$ 14,293	\$ 15,377
Standard Products Group	20,760	19,425
All other	(804)	175
Total gross profit	\$ 34,249	\$ 34,977

The following is a summary of net sales by geographic region, based on the location to which the products are billed:

	Three Months Ended	
	March 31,	March 31,
	2016	2015
Korea	\$ 50,628	\$ 62,470
Asia Pacific (other than Korea)	81,793	79,177
U.S.A.	4,776	19,370
Europe	10,517	3,653
Others	391	215
Total	\$ 148,105	\$ 164,885

Net sales from the Company's top ten largest customers accounted for 64% and 67% for the three months ended March 31, 2016 and 2015, respectively.

For the three months ended March 31, 2016, the Company had two customers that represented 18.5% and 13.0% of its net sales, respectively. For the three months ended March 31, 2015, the Company had two customers that represented 15.4% and 13.8% of its net sales, respectively.

96% of the Company's property, plant and equipment are located in Korea as of March 31, 2016.

Table of Contents**15. Accumulated Other Comprehensive Loss**

Accumulated other comprehensive loss consists of the following as of March 31, 2016 and December 31, 2015, respectively:

	March 31, 2016	December 31, 2015
Foreign currency translation adjustments	\$ (6,210)	\$ (190)
Derivative adjustments	24	(41)
Total	\$ (6,186)	\$ (231)

Changes in accumulated other comprehensive loss for the three months ended March 31, 2016 and 2015 is as follows:

	Foreign currency translation adjustments	Derivative adjustments	Total
Three Months Ended March 31, 2016			
Beginning balance	\$ (190)	\$ (41)	\$ (231)
Other comprehensive income (loss) before reclassifications	(6,020)	65	(5,955)
Amounts reclassified from accumulated other comprehensive income			
Net current-period other comprehensive income (loss)	(6,020)	65	(5,955)
Ending balance	\$ (6,210)	\$ 24	\$ (6,186)

	Foreign currency translation adjustments	Derivative adjustments	Total
Three Months Ended March 31, 2015			
Beginning balance	\$ (35,551)	\$ 485	\$ (35,066)
Other comprehensive income before reclassifications	3,056		3,056
Amounts reclassified from accumulated other comprehensive income		(485)	(485)
Net current-period other comprehensive income (loss)	3,056	(485)	2,571

Ending balance	\$ (32,495)	\$	\$ (32,495)
----------------	-------------	----	-------------

Table of Contents**16. Earnings (loss) per Share**

The following table illustrates the computation of basic and diluted earnings (loss) per common share:

	Three Months Ended	
	March 31, 2016	March 31, 2015
Net income (loss)	\$ 8,125	\$ (20,029)
Weighted average common stock outstanding		
Basic	34,698,904	34,056,468
Diluted	34,918,568	34,056,468
Earnings (loss) per share		
Basic	\$ 0.23	\$ (0.59)
Diluted	\$ 0.23	\$ (0.59)

The following outstanding instruments were excluded from the computation of diluted earnings (loss) per share, as they have an anti-dilutive effect on the calculation:

	Three Months Ended	
	March 31, 2016	March 31, 2015
Options	3,770,331	3,068,898

Rights Plan

On March 5, 2015, the Company entered into a Rights Agreement, dated as of March 5, 2015 between the Company and American Stock Transfer & Trust Company, LLC, as rights agent (the Rights Agreement), and the Board of Directors of the Company, authorized and declared a dividend of one preferred stock purchase right (a Right and collectively, the Rights) for each share of the Company's common stock, par value \$0.01 per share, outstanding at the close of business on March 16, 2015. On March 2, 2016, the Company entered into an amendment to the Rights Agreement. As amended, each Right, once exercisable, will entitle the registered holder to purchase from the Company one one-thousandth of a share of Series A Junior Participating Preferred Stock, par value \$0.01 per share, at a purchase price of \$12, subject to adjustment (the Purchase Price). The Rights are not presently exercisable and remain attached to the shares of common stock unless and until the occurrence of the earlier of the following (the

Distribution Date): (i) the tenth day after the public announcement or disclosure by the Company or any person or group of affiliated or associated persons that any person or group of affiliated or associated persons has become an Acquiring Person by obtaining beneficial ownership of 12.5% (or 20% in the case of a passive institutional investor, which is defined generally as any person who has reported beneficial ownership of shares of common stock on Schedule 13G under the Securities Exchange Act of 1934) or more of the Company's outstanding common stock, subject to certain exceptions; or (ii) the tenth business day (or such later date as the Company's Board of Directors may designate before a person or group of affiliated or associated persons becomes an Acquiring Person) after the commencement of, or first public announcement of the intent of any person to commence, a tender or exchange offer by any person or group of affiliated or associated persons, which would, if consummated, result in such person or group becoming an Acquiring Person. The Board of Directors may redeem all of the Rights for \$0.001 per Right at any time before any person or group of affiliated or associated persons becomes an Acquiring Person. In addition, at any time on or after any person or group of affiliated or associated persons becomes an Acquiring Person (but before

any person or group of affiliated or associated persons becomes the owner of 50% or more of the Company's outstanding common stock), the Board of Directors may exchange all or part of the Rights (other than the Rights beneficially owned by the Acquiring Person and certain affiliated persons) for shares of common stock at an exchange ratio of one share of common stock per Right. The Rights will expire at the close of business on September 5, 2016, unless redeemed or exchanged prior to that time.

Table of Contents

If any person or group of affiliated or associated persons becomes an Acquiring Person, then, after the Distribution Date, each Right (other than Rights beneficially owned by the Acquiring Person and certain affiliated persons or transferees thereof) will entitle the holder to purchase, for the Purchase Price, a number of shares of common stock having a market value of twice the Purchase Price. Alternatively, if, after any person or group of affiliated or associated persons becomes an Acquiring Person, (1) the Company is involved in a merger or other business combination in which the Company is not the surviving corporation or its common stock is changed into or exchanged for other securities or assets; or (2) the Company or one or more of its subsidiaries sell or otherwise transfer assets or earning power aggregating more than 50% of the assets or earning power of the Company and its subsidiaries, taken as a whole, then each Right will entitle the holder to purchase, for the Purchase Price, a number of shares of common stock of the other party to such business combination or sale (or in certain circumstances, an affiliate) having a market value of twice the Purchase Price.

17. Commitments and Contingencies***Securities Class Action Complaints***

On March 12, 2014, a purported class action was filed against the Company and certain of the Company's now-former officers. On April 21, 2015, a related purported class action lawsuit (Okla. Police Pension & Retirement Sys. v. MagnaChip Semiconductor Corp., et al., No. 3:15-cv-01797) was filed against the Company, certain of the Company's current directors and former and now-former officers, a shareholder of the Company, and certain financial firms that acted as underwriters of the Company's public stock offerings. On June 15, 2015, these two class action lawsuits were consolidated. On June 26, 2015, an amended complaint was filed in the consolidated action, against the Company, certain of the Company's current directors and former officers, a shareholder of the Company, and certain financial firms that acted as underwriters of the Company's public stock offerings on behalf of a putative class consisting of all persons other than the defendants who purchased or acquired the Company's securities between February 1, 2012 and February 12, 2015 and a putative subclass consisting of all purchasers of the Company's common stock pursuant to or traceable to a shelf registration statement and prospectus issued in connection with the Company's February 6, 2013 public stock offering. The consolidated amended complaint asserts claims on behalf of the putative class for (i) alleged violations of Section 10(b) of the Exchange Act and Rule 10b-5 promulgated thereunder by the Company and certain of the Company's current directors and former officers, (ii) alleged violations of Section 20(a) of the Exchange Act by certain of the Company's current directors and former officers, and (iii) alleged violations of Sections 20(a) and 20(A) of the Exchange Act by a shareholder. The consolidated amended complaint also asserts claims on behalf the subclass for (i) alleged violations of Section 11 of the Securities Act by the Company, certain of the Company's current directors and former officers, and certain financial firms that acted as underwriters of the Company's public stock offerings, (ii) alleged violations of Section 12 of the Securities Act by the Company, certain of the Company's current directors and former officers, a shareholder of the Company, and certain financial firms that acted as underwriters of the Company's public stock offerings, (iii) alleged violations of Section 15 of the Securities Act by the Company, certain of the Company's former officers, and a shareholder of the Company.

On December 10, 2015, the Company and certain of its current and former officers and directors entered into a Memorandum of Understanding with the plaintiffs' representatives to memorialize an agreement in principle to settle the consolidated securities class action lawsuit, Thomas, et al. v. MagnaChip Semiconductor Corp. et al., Civil Action No. 3:14-CV-01160-JST, pending in the United States District Court for the Northern District of California (the "Class Action Litigation"). On February 5, 2016, the plaintiffs in the consolidated securities class action filed a motion for preliminary approval of the settlement, as well as the stipulation and agreement of settlement and related exhibits. The stipulation and agreement of settlement releases all claims asserted against all defendants in the Class Action Litigation except for Avenue Capital Management II, L.P. and does not release claims asserted in the derivative actions Hemmingson, et al. v. Elkins, et al., No. 1-15-CV-278614 (PHK) (Cal. Super. Ct. Santa Clara Cnty.) and

Bushansky v. Norby, et al., No. 1-15-CV-281284 (PHK) (Cal. Super. Ct. Santa Clara Cnty.) (the Derivative Actions). The stipulation and agreement of settlement provides for an aggregate settlement payment by the Company of \$23.5 million, which includes all attorneys fees, costs of administration and plaintiffs out-of-pocket expenses, lead plaintiff compensatory awards and disbursements. The Company expects the settlement will be fully funded by insurance proceeds. The settlement includes the dismissal of all claims against the Company and the named individuals in the Class Action Litigation without any liability or wrongdoing attributed to them.

On April 7, 2016, the court found (i) plaintiffs representatives satisfied Rule 23 s requirements for certification of a putative class for settlement purposes and (ii) the amount of the proposed class action settlement, and the process by which the proposed settlement was negotiated, to be fair and reasonable. The court, however, denied, without prejudice, the motion for preliminary approval of the settlement due to certain identified deficiencies. On April 13, 2016, plaintiffs filed a renewed motion for preliminary approval of the settlement, which sought to cure the deficiencies identified by the court. The settlement remains subject to stockholder notice, court approval and other customary conditions.

Table of Contents

The Company has recorded the \$23.5 million of the obligation as accrued expenses in the consolidated balance sheets as of December 31, 2015 and as selling, general and administrative expenses in the consolidated statements of operations for the year ended December 31, 2015. The Company has recorded \$29.6 million of the proceeds from the insurers as other receivables in the consolidated balance sheets as of December 31, 2015 and as a deduction of the selling, general and administrative expenses in the consolidated statements of operations for the year ended December 31, 2015. The proceeds from the insurers of \$29.6 million were deposited into the Company's escrow account during the first quarter of 2016. As a result, the Company reclassified the \$29.6 million deposits recorded in other receivables into restricted cash as of March 31, 2016.

SEC Enforcement Staff Review

In March 2014, the Company voluntarily reported to the SEC that the Company's Audit Committee had determined that the Company incorrectly recognized revenue on certain transactions and as a result would restate its financial statements, and that the Audit Committee had commenced an independent investigation. Over the course of 2014 and the first two quarters of 2015, the Company voluntarily produced documents to the SEC regarding the various accounting issues identified during the independent investigation, and whether the Company's hiring of an accountant from the Company's independent registered public accounting firm impacted that accounting firm's independence. On July 22, 2014, the Staff of the SEC's Division of Enforcement obtained a Formal Order of Investigation. On March 12, 2015, the SEC issued a subpoena for documents to the Company in connection with its investigation. The Company will continue to cooperate with the SEC in this investigation, and has produced documents in response to the subpoena. At this time, the Company is unable to estimate any reasonably possible loss, or range of reasonably possible losses, with respect to the matters described above.

Shareholder Derivative Complaints

A shareholder derivative action, styled Hemmingson et al. v. Elkins et al., Case No. 1-15-cv-278614, was filed in the Superior Court of the State of California in and for Santa Clara County on March 25, 2015, naming as defendants certain of the Company's current directors and former and now-former officers, as well as a shareholder of the Company, and naming the Company as a nominal defendant. The complaint in this action asserts claims for (i) alleged breaches of fiduciary duty by certain of the Company's current directors and former and now-former officers for purportedly knowingly failing to maintain adequate internal controls over its accounting and reporting functions and disseminating to shareholders certain alleged materially false and misleading statements, (ii) alleged breaches of fiduciary duty by certain of the Company's current directors and a current shareholder of the Company for purported insider trading, and (iii) alleged unjust enrichment by a shareholder of the Company for purported insider trading.

On June 1, 2015, a shareholder derivative action was filed in the Superior Court of the State of California, Santa Clara County styled Bushansky v. Norby, et al., No. 1-15-CV-281284 (PHK) (Cal. Super. Ct. Santa Clara Cnty.). The complaint names as defendants certain of the Company's current directors and former officers, and a shareholder of the Company, with the Company being named as a nominal defendant. The complaint asserts claims for (i) alleged breaches of fiduciary duties by certain of the Company's current directors and former officers for knowingly failing to maintain adequate internal controls over the Company's accounting and reporting functions and disseminating to shareholders certain alleged materially false and misleading statements; and (ii) alleged aiding and abetting of such breaches of fiduciary duties by all defendants.

On January 22, 2016, the Company and the plaintiffs in the Hemmingson and Bushansky actions entered into and filed a stipulation of settlement with the Superior Court of the State of California, Santa Clara County. The settlement provides for the resolution of all of the pending claims in both shareholder derivative actions against the Company and the individual defendants, without any liability or wrongdoing attributed to them. The settlement provides for an

aggregate payment from the Company defendants' directors and officers insurance policies of \$3.0 million to be made to an escrow account, which will be remitted to the Company once the settlement becomes final, less (i) any applicable costs of such escrow account, (ii) any amount awarded by the court to the plaintiff's counsel for attorney's fees and litigation expenses and (iii) the cost of providing notice of the settlement to the Company's stockholders. The proposed settlement also requires that the Company implement certain corporate governance measures. On February 22, 2016, plaintiffs filed an unopposed motion for preliminary approval of the proposed derivative settlement. A hearing on plaintiffs' motion is scheduled for June 10, 2016. The proposed settlement remains subject to stockholder notice, court approval and other customary conditions.

Furthermore, by letter dated May 28, 2015, a purported shareholder demanded to inspect certain of the Company's books and records, pursuant to Section 220 of the General Corporation Law of the State of Delaware (8 Del. C. § 220). The demand's stated purpose is to investigate alleged breaches of fiduciary duty by certain of the Company's current and former directors, officers, and senior management and otherwise evaluate whether to initiate a derivative action on the Company's behalf.

Table of Contents

18. Subsequent Events

In December 2014, the Company announced that the Company's Board of Directors had adopted a plan to close the 6-inch fab. According to this plan, the 6-inch fab was closed on February 29, 2016. On April 4, 2016, the Company commenced a voluntary resignation program (the Program), which was available to certain manufacturing employees, including the Company's 6-inch fab employees, through April 29, 2016.

As of April 29, 2016, 169 employees elected to resign under the terms of the Program. The Company will pay approximately \$8 million for severance benefits, which are required by law and have already been fully accrued in the Company's financial statements, in a lump sum during the second quarter of 2016. The Company will also pay other termination benefits under the Program of approximately \$4 million in the aggregate, payable in equal monthly installments over the next twelve months. The Company expects to record a \$4 million charge related to the other termination benefits payable under the Program during the second quarter of 2016.

FORWARD LOOKING STATEMENTS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended, that involve risks and uncertainties. Forward-looking statements give our current expectations and projections relating to our financial condition, results of operations, plans, objectives, future performance and business. You can identify these statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as anticipate, estimate, expect, project, intend, plan, believe and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events. All statements other than statements of historical facts included in this report that address activities, events or developments that we expect, believe or anticipate will or may occur in the future are forward-looking statements.

These forward-looking statements are largely based on our expectations and beliefs concerning future events, which reflect estimates and assumptions made by our management. These estimates and assumptions reflect our best judgment based on currently known market conditions and other factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control. Although we believe our estimates and assumptions to be reasonable, they are inherently uncertain and involve a number of risks and uncertainties that are beyond our control. In addition, management's assumptions about future events may prove to be inaccurate. Management cautions all readers that the forward-looking statements contained in this report are not guarantees of future performance, and we cannot assure any reader that those statements will be realized or the forward-looking events and circumstances will occur. Actual results may differ materially from those anticipated or implied in the forward-looking statements due to the factors listed in this section, in Part II: Item 1A. Risk Factors herein and in Part I: Item 1A. Risk Factors in our annual report on Form 10-K for the fiscal year ended December 31, 2015.

All forward-looking statements speak only as of the date of this report. We do not intend to publicly update or revise any forward-looking statements as a result of new information or future events or otherwise, except as required by law. These cautionary statements qualify all forward-looking statements attributable to us or persons acting on our behalf.

Statements made in this Quarterly Report on Form 10-Q (this Report), unless the context otherwise requires, that include the use of the terms we, us, our and MagnaChip refer to MagnaChip Semiconductor Corporation and its consolidated subsidiaries. The term Korea refers to the Republic of Korea or South Korea.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the unaudited consolidated financial statements and the related notes included elsewhere in this Report.

Overview

We are a Korea-based designer and manufacturer of analog and mixed-signal semiconductor products for consumer, computing, communication, industrial, automotive and IoT applications. We provide technology platforms for analog, mixed-signal, power, high voltage, non-volatile memory, and RF applications. We have a proven record with a 30-year operating history, large portfolio of 2,350 registered novel patents and 159 pending novel patent applications and extensive engineering and manufacturing process expertise.

Our Foundry Services Group provides specialty analog and mixed-signal foundry services mainly for fabless and IDM semiconductor companies that primarily serve consumer, computing, communication, industrial, automotive and IoT applications. Our Standard Products Group includes our Display Solutions and Power Solutions business lines. Our Display Solutions products provide flat panel display solutions to major suppliers of large and small flat panel displays and include our sensor products for mobile applications, industrial applications and home appliances. Our Power Solutions products include discrete and integrated circuit solutions for power management in consumer, computing, communication and industrial applications.

Our wide variety of analog and mixed-signal semiconductor products and manufacturing services combined with our mature technology platform allow us to address multiple high-growth end markets and to rapidly develop and introduce new products and services in response to market demands. Our design center and substantial manufacturing operations in Korea place us at the core of the global electronics device supply chain. We believe this enables us to quickly and efficiently respond to our customers' needs and allows us to better serve and capture additional demand from existing and new customers.

To maintain and increase our profitability, we must accurately forecast trends in demand for electronics devices that incorporate semiconductor products we produce. We must understand our customers' needs as well as the likely end market trends and demand in the markets they serve. We must balance the likely manufacturing utilization demand of our product businesses and foundry business to optimize our capacity utilization. We must also invest in relevant research and development activities and manufacturing capacity and purchase necessary materials on a timely basis to meet our customers' demand while maintaining our target margins and cash flow.

The semiconductor markets in which we participate are highly competitive. The prices of our products tend to decrease regularly over their useful lives, and such price decreases can be significant as new generations of products are introduced by us or our competitors. We strive to offset the impact of declining selling prices for existing products through cost reductions and the introduction of new products that command selling prices above the average selling price of our existing products. In addition, we seek to manage our inventories and manufacturing capacity so as to mitigate the risk of losses from product obsolescence.

Demand for our products and services is driven by overall demand for consumer, computing, communication, industrial, automotive and IoT products and can be adversely affected by periods of weak consumer and enterprise spending or by market share losses by our customers. In order to mitigate the impact of market volatility on our business, we are diversifying our portfolio of products, customers, and target applications. We also expect that new competitors will emerge in these markets that may place increased pressure on the pricing for our products and services. While we believe we are well positioned competitively to compete in these markets and against these new

competitors as a result of our long operating history, existing manufacturing capacity and our Korea-based operations, if we are not effective in competing in these markets our operating results may be adversely affected.

Within our Foundry Services Group, net sales are driven by customers' decisions on which manufacturing services provider to use for a particular product. Most of our Foundry Services Group customers are fables, while some are IDM customers. A customer will often have more than one supplier of manufacturing services. In any given period, our net sales depend heavily upon the end-market demand for the goods in which the products we manufacture for customers are used, the inventory levels maintained by our customers and in some cases, allocation of demand for manufacturing services among selected qualified suppliers.

Within our Standard Products Group, net sales are driven by design wins in which we are selected by an electronics original equipment manufacturer (OEM) or other potential customer to supply its demand for a particular product. A customer will often have more than one supplier designed in to multi-source components for a particular product line. Once we have design wins and the products enter into mass production, we often specify the pricing of a particular product for a set period of time, with periodic discussions and renegotiations of pricing with our customers. In any given period, our net sales depend heavily upon the end-market demand for the goods in which our products are used, the inventory levels maintained by our customers and in some cases, allocation of demand for components for a particular product among selected qualified suppliers.

Table of Contents

In contrast to fabless semiconductor companies, our internal manufacturing capacity provides us with greater control over manufacturing costs and the ability to implement process and production improvements which can favorably impact gross profit margins. Our internal manufacturing capacity also allows for better control over delivery schedules, improved consistency over product quality and reliability and improved ability to protect intellectual property from misappropriation. However, having internal manufacturing capacity exposes us to the risk of under-utilization of manufacturing capacity that results in lower gross profit margins, particularly during downturns in the semiconductor industry.

Our products and services require investments in capital equipment. Analog and mixed-signal manufacturing facilities and processes are typically distinguished by the design and process implementation expertise rather than the use of the most advanced equipment. These processes also tend to migrate more slowly to smaller geometries due to technological barriers and increased costs. For example, some of our products use high-voltage technology that requires larger geometries and that may not migrate to smaller geometries for several years, if at all. As a result, our manufacturing base and strategy do not require substantial investment in leading edge process equipment, allowing us to utilize our facilities and equipment over an extended period of time with moderate required capital investments. Generally, incremental capacity expansions in our business of the market result in more moderate industry capacity expansion as compared to leading edge processes. As a result, we are less likely to experience significant industry overcapacity, which can cause product prices to decline significantly. In general, we seek to invest in manufacturing capacity that can be used for multiple high-value applications over an extended period of time. We believe this capital investment strategy enables us to optimize our capital investments and facilitates more diversified product and service offerings.

Our success going forward will depend upon our ability to adapt to future challenges such as the emergence of new competitors for our products and services or the consolidation of current competitors. Additionally, we must innovate to remain ahead of, or at least rapidly adapt to, technological breakthroughs that may lead to a significant change in the technology necessary to deliver our products and services. We believe that our established relationships and close collaboration with leading customers enhance our awareness of new product opportunities, market and technology trends and improve our ability to adapt and grow successfully. In our Foundry Services Group, we strive to maintain competitiveness by offering high-value added processes, high-flexibility and excellent service by tailoring existing standard processes to meet customers' design needs and porting customers' own process technologies into our fabrication facilities.

Recent Developments

In December 2014, we announced that our Board of Directors had adopted a plan to close our 6-inch fab. According to this plan, the 6-inch fab was closed on February 29, 2016. On April 4, 2016, we commenced a voluntary resignation program (the "Program"), which was available to certain manufacturing employees, including our 6-inch fab employees, through April 29, 2016.

As of April 29, 2016, 169 employees elected to resign under the terms of the Program, from which we expect to save approximately \$8 million in spending per year. We will pay approximately \$8 million for severance benefits, which are required by law and have already been fully accrued in our financial statements, in a lump sum during the second quarter of 2016. We will also pay other termination benefits under the Program of approximately \$4 million in the aggregate, payable in equal monthly installments over the next twelve months. We expect to record a \$4 million charge related to the other termination benefits payable under the Program during the second quarter of 2016.

Restatement

In January 2014, our Audit Committee commenced an independent investigation that resulted in the restatement of certain financial statements for prior periods. As a result of the restatement, we have incurred substantial external accounting, legal and other related costs associated with the restatement and certain litigation and other regulatory investigations and actions related thereto. We incurred restatement related costs of \$3.6 million, primarily attributable to those relate to certain litigation, for the three months ended March 31, 2016, compared to \$7.1 million in the three months ended March 31, 2015. On December 10, 2015, we entered into a Memorandum of Understanding with the plaintiffs representatives to settle the Class Action Litigation, as defined and detailed in Item 1. Interim Consolidated Financial Statements Notes to Consolidated Financial Statements Note 17. Commitments and Contingencies in this Report, for an aggregate settlement payment of \$23.5 million. This settlement payment is expected to be fully funded by insurance proceeds.

Table of Contents***Segments***

We had previously reported our results of operations under one operating segment. During the second quarter of 2015, organizational changes were made to (i) realign our businesses and organizational structure and (ii) streamline and consolidate certain business processes to achieve greater operating efficiencies. Accordingly, we combined our business lines of Display Solutions and Power Solutions into a new segment called Standard Products Group. Beginning in the second quarter of 2015, we began to report our financial results in two operating segments: Semiconductor Manufacturing Services and Standard Products Group. We identified these segments based on how we allocate resources and assess our performance.

During the third quarter of 2015, we changed the name of our Semiconductor Manufacturing Services segment to Foundry Services Group. We believe that this new name provides greater clarity on the identity of this segment. There is no change to the composition of this reportable segment from what we previously reported for the Semiconductor Manufacturing Services segment.

Foundry Services Group: Our Foundry Services Group provides specialty analog and mixed-signal foundry services to fabless semiconductor companies and IDMs that serve consumer, computing, communication, industrial, automotive and IoT applications. We manufacture wafers based on our customers' product designs. We do not market these products directly to end customers but rather supply manufactured wafers and products to our customers to market to their end customers. We offer approximately 461 process flows to our foundry services customers. We also often partner with key customers to jointly develop or customize specialized processes that enable our customers to improve their products and allow us to develop unique manufacturing expertise. Our foundry services target customers who require differentiated, specialty analog and mixed-signal process technologies such as high voltage complementary metal-oxide-semiconductor (CMOS), embedded memory or bipolar-CMOS-DMOS (BCD). These customers typically serve the consumer, computing, communication, industrial, automotive and IoT applications. Our Foundry Services Group business represented 40.5% and 45.2% of our net sales for the three months ended March 31, 2016 and March 31, 2015, respectively. Gross profit from our Foundry Services Group business was \$14.3 million and \$15.4 million for the three months ended March 31, 2016 and March 31, 2015, respectively.

Standard Products Group: Our Standard Products Group includes our Display Solutions and Power Solutions business lines. Our Display Solutions products include source and gate drivers and timing controllers that cover a wide range of flat panel displays used in ultra high definition (UHD), high definition (HD), light emitting diode (LED), 3D and OLED televisions and displays, notebooks and mobile communications and entertainment devices. Our Display Solutions products support the industry's most advanced display technologies, such as active matrix organic light emitting diodes (AMOLEDs), and low temperature polysilicon (LTPS), as well as high-volume display technologies such as thin film transistors (TFT). We provide a full range of intelligent sensor product families featuring 0.18 micron analog and mixed-signal technology with low power consumption. Our sensor families target the growing market for applications ranging from smartphone, tablet PC and other consumer electronics to industrial devices. Our Power Solutions business line produces power management semiconductor products including discrete and integrated circuit solutions for power management in high-volume consumer applications. These products include metal oxide semiconductor field effect transistors (MOSFETs), insulated-gate bipolar transistors (IGBTs), power modules, AC-DC converters, DC-DC converters, LED drivers, switching regulators and linear regulators for a range of devices, including televisions, smartphones, mobile phones, desktop PCs, notebooks, tablet PCs, other consumer electronics, and industrial applications such as

power suppliers, LED lighting, motor control and home appliances. Our Standard Products Group, which includes our Display Solutions and Power Solutions business lines, represented 59.4% and 54.7% of our net sales for the three months ended March 31, 2016 and March 31, 2015, respectively. Gross profit from our Standard Products Group was \$20.8 million and \$19.4 million for the three months ended March 31, 2016 and March 31, 2015, respectively.

Explanation and Reconciliation of Non-US GAAP Measures

Adjusted EBITDA and Adjusted Net Loss

We use the terms Adjusted EBITDA and Adjusted Net Loss throughout this Report. Adjusted EBITDA, as we define it, is a non-US GAAP measure. We define Adjusted EBITDA for the periods indicated as net income (loss), adjusted to exclude (i) depreciation and amortization, (ii) interest expense, net, (iii) income tax expenses (benefits), (iv) restructuring and other (gain), net, (v) equity-based compensation expense, (vi) foreign currency loss (gain), net, (vii) derivative valuation loss (gain), net and (viii) restatement related expenses.

See the footnotes to the table below for further information regarding these items. We present Adjusted EBITDA as a supplemental measure of our performance because:

Adjusted EBITDA eliminates the impact of a number of items that may be either one time or recurring items that we do not consider to be indicative of our core ongoing operating performance;

we believe that Adjusted EBITDA is an enterprise level performance measure commonly reported and widely used by analysts and investors in our industry;

our investor and analyst presentations will include Adjusted EBITDA; and

Table of Contents

we believe that Adjusted EBITDA provides investors with a more consistent measurement of period to period performance of our core operations, as well as a comparison of our operating performance to that of other companies in our industry.

We use Adjusted EBITDA in a number of ways, including:

for planning purposes, including the preparation of our annual operating budget;

to evaluate the effectiveness of our enterprise level business strategies;

in communications with our Board of Directors concerning our consolidated financial performance; and

in certain of our compensation plans as a performance measure for determining incentive compensation payments.

We encourage you to evaluate each adjustment and the reasons we consider them appropriate. In evaluating Adjusted EBITDA, you should be aware that in the future we may incur expenses similar to the adjustments in this presentation. Adjusted EBITDA is not a measure defined in accordance with US GAAP and should not be construed as an alternative to income from continuing operations, cash flows from operating activities or net income (loss), as determined in accordance with US GAAP. A reconciliation of net income (loss) to Adjusted EBITDA is as follows:

	Three Months Ended March 31, 2016	Three Months Ended March 31, 2015
	(In millions)	
Net income (loss)	\$ 8.1	\$ (20.0)
Adjustments:		
Depreciation and amortization	6.0	6.9
Interest expense, net	4.0	4.1
Income tax expenses	0.8	1.1
Restructuring and other (gain), net(a)	(6.8)	
Equity-based compensation expense(b)	0.5	0.2
Foreign currency loss (gain), net(c)	(8.2)	3.2
Derivative valuation gain, net(d)	(0.0)	
Restatement related expenses(e)	3.6	7.1
Adjusted EBITDA	\$ 8.0	\$ 2.5

(a) This adjustment eliminates the \$7.8 million restructuring gain on sale of machinery in connection with the closure of our 6-inch fab, net of \$1.0 million training and transition costs related to our 6-inch fab employees.

- (b) This adjustment eliminates the impact of non-cash equity-based compensation expenses. Although we expect to incur non-cash equity-based compensation expenses in the future, we believe that analysts and investors will find it helpful to review our operating performance without the effects of these non-cash expenses, as supplemental information.
- (c) This adjustment eliminates the impact of non-cash foreign currency translation associated with intercompany debt obligations and foreign currency denominated receivables and payables, as well as the cash impact of foreign currency transaction gains or losses on collection of such receivables and payment of such payables. Although we expect to incur foreign currency translation gains or losses in the future, we believe that analysts and investors will find it helpful to review our operating performance without the effects of these primarily non-cash gains or losses, as supplemental information.
- (d) This adjustment eliminates the impact of gain or loss recognized in income on derivatives, which represents hedge ineffectiveness or derivatives value changes excluded from the risk being hedged. We enter into derivative transactions to mitigate foreign exchange risks. As our derivative transactions are limited to a certain portion of our expected cash flows denominated in U.S. dollars, and we do not enter into derivative transactions for trading or speculative purposes, we do not believe that these charges or gains are indicative of our core operating performance.
- (e) This adjustment eliminates expenses in connection with the Audit Committee's independent investigation and related restatement and litigation, primarily comprised of legal, audit and consulting fees. This amount does not include any allocation of internal costs related to the restatement.

There was no tax impact from the adjustments to net income (loss) to calculate our Adjusted EBITDA for the three months ended March 31, 2016 and 2015 due to net operating loss carry-forwards available to offset taxable income and full allowance for deferred tax assets.

Table of Contents

Adjusted EBITDA has limitations as an analytical tool, and you should not consider it in isolation, or as a substitute for analysis of our results as reported under US GAAP. Some of these limitations are:

Adjusted EBITDA does not reflect our cash expenditures, or future requirements, for capital expenditures or contractual commitments;

Adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;

Adjusted EBITDA does not reflect the interest expense, or the cash requirements necessary to service interest or principal payments, on our debt;

although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and Adjusted EBITDA does not reflect any cash requirements for such replacements;

Adjusted EBITDA does not consider the potentially dilutive impact of issuing equity-based compensation to our management team and employees;

Adjusted EBITDA does not reflect the costs of holding certain assets and liabilities in foreign currencies; and

other companies in our industry may calculate Adjusted EBITDA differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, Adjusted EBITDA should not be considered as a measure of discretionary cash available to us to invest in the growth of our business. We compensate for these limitations by relying primarily on our US GAAP results and using Adjusted EBITDA only supplementally.

We present Adjusted Net Loss as a further supplemental measure of our performance. We prepare Adjusted Net Loss by adjusting net income (loss) to eliminate the impact of a number of non-cash expenses and other items that may be either one time or recurring that we do not consider to be indicative of our core ongoing operating performance. We believe that Adjusted Net Loss is particularly useful because it reflects the impact of our asset base and capital structure on our operating performance. We present Adjusted Net Loss for a number of reasons, including:

we use Adjusted Net Loss in communications with our Board of Directors concerning our consolidated financial performance;

we believe that Adjusted Net Loss is an enterprise level performance measure commonly reported and widely used by analysts and investors in our industry; and

our investor and analyst presentations may include Adjusted Net Loss.

Adjusted Net Loss is not a measure defined in accordance with US GAAP and should not be construed as an alternative to income from continuing operations, cash flows from operating activities or net income (loss), as determined in accordance with US GAAP. We encourage you to evaluate each adjustment and the reasons we consider them appropriate. Other companies in our industry may calculate Adjusted Net Loss differently than we do, limiting its usefulness as a comparative measure. In addition, in evaluating Adjusted Net Loss, you should be aware that in the future we may incur expenses similar to the adjustments in this presentation. We define Adjusted Net Loss for the periods indicated as net income (loss), adjusted to exclude (i) restructuring and other (gain), net, (ii) equity-based compensation expense, (iii) foreign currency loss (gain), net, (iv) derivative valuation loss (gain), net and (v) restatement related expenses.

The following table summarizes the adjustments to net loss that we make in order to calculate Adjusted Net Loss for the periods indicated:

	Three Months Ended March 31, 2016	Three Months Ended March 31, 2015
	(In millions)	
Net income (loss)	\$ 8.1	\$ (20.0)
Adjustments:		
Restructuring and other (gain), net(a)	(6.8)	
Equity-based compensation expense(b)	0.5	0.2
Foreign currency loss (gain), net(c)	(8.2)	3.2
Derivative valuation gain, net(d)	(0.0)	
Restatement related expenses(e)	3.6	7.1
Adjusted Net Loss	\$ (2.8)	\$ (9.6)

- (a) This adjustment eliminates the \$7.8 million restructuring gain on sale of machinery in conjunction with the closure of our 6-inch fab, net of \$1.0 million training and transition costs related to our 6-inch fab employees.
- (b) This adjustment eliminates the impact of non-cash equity-based compensation expenses. Although we expect to incur non-cash equity-based compensation expenses in the future, we believe that analysts and investors will find it helpful to review our operating performance without the effects of these non-cash expenses, as supplemental information.

Table of Contents

- (c) This adjustment eliminates the impact of non-cash foreign currency translation associated with intercompany debt obligations and foreign currency denominated receivables and payables, as well as the cash impact of foreign currency transaction gains or losses on collection of such receivables and payment of such payables. Although we expect to incur foreign currency translation gains or losses in the future, we believe that analysts and investors will find it helpful to review our operating performance without the effects of these primarily non-cash gains or losses, as supplemental information.
- (d) This adjustment eliminates the impact of gain or loss recognized in income on derivatives, which represents hedge ineffectiveness or derivatives value changes excluded from the risk being hedged. We enter into derivative transactions to mitigate foreign exchange risks. As our derivative transactions are limited to a certain portion of our expected cash flows denominated in U.S. dollars, and we do not enter into derivative transactions for trading or speculative purposes, we do not believe that these charges or gains are indicative of our core operating performance.
- (e) This adjustment eliminates expenses in connection with the Audit Committee's independent investigation and related restatement and litigation, primarily comprised of legal, audit and consulting fees. This amount does not include any allocation of internal costs related to the restatement.

There was no tax impact from the adjustments to net income (loss) to calculate our Adjusted Net Loss for the three months ended March 31, 2016 and 2015 due to net operating loss carry-forwards available to offset taxable income and full allowance for deferred tax assets.

Adjusted Net Loss has limitations as an analytical tool, and you should not consider it in isolation, or as a substitute for analysis of our results as reported under US GAAP. Some of these limitations are:

Adjusted Net Loss does not reflect our cash expenditures, or future requirements, for capital expenditures or contractual commitments;

Adjusted Net Loss does not reflect changes in, or cash requirements for, our working capital needs;

Adjusted Net Loss does not consider the potentially dilutive impact of issuing equity-based compensation to our management team and employees;

Adjusted Net Loss does not reflect the costs of holding certain assets and liabilities in foreign currencies; and

other companies in our industry may calculate Adjusted Net Loss differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, Adjusted Net Loss should not be considered as a measure of discretionary cash available to us to invest in the growth of our business. We compensate for these limitations by relying primarily on our US GAAP results and using Adjusted Net Loss only supplementally.

Factors Affecting Our Results of Operations

Net Sales. We derive virtually all of our sales (net of sales returns and allowances) from two segments: Foundry Services Group and Standard Products Group. Our product inventory is primarily located in Korea and is available for

drop shipment globally. Outside of Korea, we maintain limited product inventory, and our sales representatives generally relay orders to our factories in Korea for fulfillment. We have strategically located our sales and technical support offices near concentrations of major customers. Our sales offices are located in Korea, the United States, Japan and Greater China. Our network of authorized agents and distributors consists of agents in the United States and Europe and distributors and agents in the Asia Pacific region. Our net sales from All other consist principally of the disposal of waste materials.

We recognize revenue when risk and reward of ownership pass to the customer either upon shipment, upon product delivery at the customer's location or upon customer acceptance, depending on the terms of the arrangement. For the three months ended March 31, 2016 and 2015, we sold products to 238 and 220 customers, respectively, and our net sales to our ten largest customers represented 64% and 60% of our net sales, respectively. We have a combined production capacity of over 121,000 eight-inch equivalent semiconductor wafers per month. We believe our large-scale, cost-effective fabrication facilities enable us to rapidly adjust our production levels to meet shifts in demand by our end customers.

Gross Profit. Our overall gross profit generally fluctuates as a result of changes in overall sales volumes and in the average selling prices of our products and services. Other factors that influence our gross profit include changes in product mix, the introduction of new products and services and subsequent generations of existing products and services, shifts in the utilization of our manufacturing facilities and the yields achieved by our manufacturing operations, changes in material, labor and other manufacturing costs including outsourced manufacturing expenses, and variation in depreciation expense.

Table of Contents

Average Selling Prices. Average selling prices for our products tend to be highest at the time of introduction of new products which utilize the latest technology and tend to decrease over time as such products mature in the market and are replaced by next generation products. We strive to offset the impact of declining selling prices for existing products through our product development activities and by introducing new products that command selling prices above the average selling price of our existing products. In addition, we seek to manage our inventories and manufacturing capacity so as to preclude losses from product and productive capacity obsolescence.

Material Costs. Our cost of material consists of costs of raw materials, such as silicon wafers, chemicals, gases and tape and packaging supplies. We use processes that require specialized raw materials, such as silicon wafers, that are generally available from a limited number of suppliers. If demand increases or supplies decrease, the costs of our raw materials could significantly increase.

Labor Costs. A significant portion of our employees are located in Korea. Under Korean labor laws, most employees and certain executive officers with one or more years of service are entitled to severance benefits upon the termination of their employment based on their length of service and rate of pay. As of March 31, 2016, approximately 98% of our employees were eligible for severance benefits.

Depreciation Expense. We periodically evaluate the carrying values of long-lived assets, including property, plant and equipment and intangible assets, as well as the related depreciation periods. We depreciated our property, plant and equipment using the straight-line method over the estimated useful lives of our assets. Depreciation rates vary from 30-40 years on buildings to 5 to 12 years for certain equipment and assets. Our evaluation of carrying values is based on various analyses including cash flow and profitability projections. If our projections indicate that future undiscounted cash flows are not sufficient to recover the carrying values of the related long-lived assets, the carrying value of the assets is impaired and will be reduced, with the reduction charged to expense so that the carrying value is equal to fair value.

Selling Expenses. We sell our products worldwide through a direct sales force as well as a network of sales agents and representatives to OEMs, including major branded customers and contract manufacturers, and indirectly through distributors. Selling expenses consist primarily of the personnel costs for the members of our direct sales force, a network of sales representatives and other costs of distribution. Personnel costs include base salary, benefits and incentive compensation.

General and Administrative Expenses. General and administrative expenses consist of the costs of various corporate operations, including finance, legal, human resources and other administrative functions. These expenses primarily consist of payroll-related expenses, consulting and other professional fees and office facility-related expenses.

Research and Development. The rapid technological change and product obsolescence that characterize our industry require us to make continuous investments in research and development. Product development time frames vary but, in general, we incur research and development costs one to two years before generating sales from the associated new products. These expenses include personnel costs for members of our engineering workforce, cost of photomasks, silicon wafers and other non-recurring engineering charges related to product design. Additionally, we develop base line process technology through experimentation and through the design and use of characterization wafers that help achieve commercially feasible yields for new products. The majority of research and development expenses are for process development that serves as a common technology platform for all of our product lines.

Interest Expense. Our interest expense was incurred primarily under the 2021 Notes.

Impact of Foreign Currency Exchange Rates on Reported Results of Operations. Historically, a portion of our revenues and greater than the majority of our operating expenses and costs of sales have been denominated in non-U.S. currencies, principally the Korean won, and we expect that this will remain true in the future. Because we report our results of operations in U.S. dollars converted from our non-U.S. revenues and expenses based on monthly average exchange rates, changes in the exchange rate between the Korean won and the U.S. dollar could materially impact our reported results of operations and distort period to period comparisons. In particular, because of the difference in the amount of our consolidated revenues and expenses that are in U.S. dollars relative to Korean won, depreciation in the U.S. dollar relative to the Korean won could result in a material increase in reported costs relative to revenues, and therefore could cause our profit margins and operating income (loss) to appear to decline materially, particularly relative to prior periods. The converse is true if the U.S. dollar were to appreciate relative to the Korean won. Moreover, our foreign currency gain or loss would be affected by changes in the exchange rate between the Korean won and the U.S. dollar as a substantial portion of non-cash translation gain or loss is associated with the intercompany long-term loans to our Korean subsidiary, which is denominated in U.S. dollars. As of March 31, 2016, the outstanding intercompany loan balance including accrued interests between our Korean subsidiary and our Dutch subsidiary was \$590 million. As a result of such foreign currency fluctuations, it could be more difficult to detect underlying trends in our business and results of operations. In addition, to the extent that fluctuations in currency exchange rates cause our results of operations to differ from our expectations or the expectations of our investors, the trading price of our stock could be adversely affected.

From time to time, we may engage in exchange rate hedging activities in an effort to mitigate the impact of exchange rate fluctuations. Our Korean subsidiary enters into foreign currency forward and zero cost collar contracts in order to mitigate a portion of the impact of U.S. dollar-Korean won exchange rate fluctuations on our operating results. Obligations under these foreign currency forward and zero cost collar contracts must be cash collateralized if our exposure exceeds certain specified thresholds. These forward and zero cost collar contracts may be terminated by the counterparty in a number of circumstances, including if our total cash and cash

Table of Contents

equivalents is less than \$30.0 million at the end of a fiscal quarter unless a waiver is obtained from the counterparty. We cannot assure that any hedging technique we implement will be effective. If our hedging activities are not effective, changes in currency exchange rates may have a more significant impact on our results of operations.

Foreign Currency Gain or Loss. Foreign currency translation gains or losses on transactions by us or our subsidiaries in a currency other than our or our subsidiaries functional currency are included in our statements of operations as a component of other income (expense). A substantial portion of this net foreign currency gain or loss relates to non-cash translation gain or loss related to the principal balance of intercompany balances at our Korean subsidiary that are denominated in U.S. dollars. This gain or loss results from fluctuations in the exchange rate between the Korean won and U.S. dollar.

Income Taxes. We record our income taxes in each of the tax jurisdictions in which we operate. This process involves using an asset and liability approach whereby deferred tax assets and liabilities are recorded for differences in the financial reporting bases and tax bases of our assets and liabilities. We exercise significant management judgment in determining our provision for income taxes, deferred tax assets and liabilities. We assess whether it is more likely than not that the deferred tax assets existing at the period-end will be realized in future periods. In such assessment, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies and recent results of operations. In the event we were to determine that we would be able to realize the deferred income tax assets in the future in excess of their net recorded amount, we would adjust the valuation allowance, which would reduce the provision for income taxes.

Our operations are subject to income and transaction taxes in the United States and in multiple foreign jurisdictions, including Korea. Significant estimates and judgments are required in determining our worldwide provision for income taxes. Some of these estimates are based on interpretations of existing tax laws or regulations. The ultimate amount of tax liability may be uncertain as a result.

Capital Expenditures. We invest in manufacturing equipment, software design tools and other tangible and intangible assets for capacity expansion and technology improvement. Capacity expansions and technology improvements typically occur in anticipation of increases in demand. We typically pay for capital expenditures in partial installments with portions due on order, delivery and final acceptance. Our capital expenditures include our payments for the purchase of property, plant and equipment as well as payments for the registration of intellectual property rights.

Inventories. We monitor our inventory levels in light of product development changes and market expectations. We may be required to take additional charges for quantities in excess of demand, cost in excess of market value and product age. Our analysis may take into consideration historical usage, expected demand, anticipated sales price, new product development schedules, the effect new products might have on the sales of existing products, product age, customer design activity, customer concentration and other factors. These forecasts require us to estimate our ability to predict demand for current and future products and compare those estimates with our current inventory levels and inventory purchase commitments. Our forecasts for our inventory may differ from actual inventory use.

Table of Contents**Results of Operations Comparison of Three Months Ended March 31, 2016 and 2015**

The following table sets forth consolidated results of operations for the three months ended March 31, 2016 and 2015:

	Three Months Ended March 31, 2016		Three Months Ended March 31, 2015		Change Amount
	Amount	% of Net Sales	Amount	% of Net Sales

Table of Contents***Net Sales***

Net sales were \$148.1 million for the three months ended March 31, 2016, a \$16.8 million, or 10.2%, decrease compared to \$164.9 million for the three months ended March 31, 2015. This decrease was primarily due to decrease in revenue related to our Foundry Services Group as described below.

Foundry Services Group. Net sales from our Foundry Services Group segment were \$60.0 million for the three months ended March 31, 2016, a \$14.5 million, or 19.5%, decrease compared to \$74.5 million for the three months ended March 31, 2015. The \$9.2 million decrease was primarily attributable to reduced levels of demand of our foundry services from customers serving the high-end and mid-range smartphone markets. The remaining decrease was due to the expected revenue declines related to our closed 6-inch fab.

Standard Products Group. Net sales from our Standard Products Group segment were \$88.0 million for the three months ended March 31, 2016, a \$2.2 million, or 2.4%, decrease compared to \$90.2 million for the three months ended March 31, 2015. This decrease was due to a \$3.9 million decrease in revenue related to our Power Solutions products primarily for TVs and reduction of low margins MOSFETs as part of our product portfolio optimization process. Such decrease was partially offset by a \$1.7 million increase in revenue related to our Display Solutions business line. This increase in sales was primarily attributable to higher sales of mobile display products, which was partially offset by reduced demand of source drivers among large display products, primarily for TVs and notebooks.

All Other. All other net sales were \$0.1 million for the three months ended March 31, 2016 and \$0.2 million for the three months ended March 31, 2015, respectively.

Gross Profit

Total gross profit was \$34.2 million for the three months ended March 31, 2016 compared to \$35.0 million for the three months ended March 31, 2015, a \$0.7 million, or 2.1%, decrease. Gross profit as a percentage of net sales for the three months ended March 31, 2016 increased to 23.1% compared to 21.2% for the three months ended March 31, 2015. The increase in gross profit as a percentage of net sales was primarily attributable to the positive impact of lower unit costs due to our cost reduction efforts, partially offset by the negative impact of a lower utilization rate.

Foundry Services Group. Gross profit from our Foundry Services Group segment was \$14.3 million for the three months ended March 31, 2016, a \$1.1 million, or 7.1%, decrease compared to \$15.4 million for the three months ended March 31, 2015. Gross profit as a percentage of net sales for the three months ended March 31, 2016 increased to 23.8% compared to 20.6% for the three months ended March 31, 2015. The increase in gross profit as a percentage of net sales was mainly attributable to the positive impact of lower unit costs resulting from our continuing cost reduction effort. This increase was partially offset by the negative impact of a lower utilization rate and an increase in cost of end-of-life inventory produced in our 6-inch fab.

Standard Products Group. Gross profit from our Standard Products Group segment was \$20.8 million for the three months ended March 31, 2016, a \$1.3 million, or 6.9%, increase from \$19.4 million for the three months ended March 31, 2015. Gross profit as a percentage of net sales for the three months ended March 31, 2016 increased to 23.6% compared to 21.5% for the three months ended March 31, 2015. The increase in gross profit as a percentage of net sales was mainly attributable to the positive impact of lower unit costs resulting from our continuing cost reduction effort. This increase was mainly offset by an unfavorable impact resulting from a lower utilization rate.

All Other. All other gross profit for the three months ended March 31, 2016 was a negative \$0.8 million mainly attributable to training and transition costs related to our 6-inch fab employees, which was partially offset by revenue

from the disposal of waste materials. All other gross profit for the three months ended March 31, 2015 was \$0.2 million related to the disposal of waste materials.

Net Sales by Geographic Region

We report net sales by geographic region based on the location to which the products are billed. The following table sets forth our net sales by geographic region and the percentage of total net sales represented by each geographic region for the three months ended March 31, 2016 and 2015:

Table of Contents

	Three Months Ended March 31, 2016		Three Months Ended March 31, 2015		Change Amount
	Amount	% of Net Sales	Amount	% of Net Sales	
	(In millions)				
Korea	\$ 50.6	34.2%	\$ 62.5	37.9%	\$ (11.8)
Asia Pacific (other than Korea)	81.8	55.2	79.2	48.0	2.6
United States	4.8	3.2	19.4	11.7	(14.6)
Europe	10.5	7.1	3.7	2.2	6.9
Others	0.4	0.3	0.2	0.1	0.2
	\$ 148.1	100.0%	\$ 164.9	100.0%	\$ (16.8)

Net sales in Korea for the three months ended March 31, 2016 decreased from \$62.5 million to \$50.6 million compared to the three months ended March 31, 2015, or by \$11.8 million, or 19.0%, primarily due to reduced demand of large display applications primarily for TVs and notebooks and our foundry services from a customer serving the mid-range smartphone market. The decrease in sales of MOSFETs primarily for TVs also resulted in a decrease in sales.

Net sales in the United States for the three months ended March 31, 2016 decreased from \$19.4 million to \$4.8 million compared to the three months ended March 31, 2015, or by \$14.6 million, or 75.3%, due to the change in billing location from the United States to Europe by a foundry customer serving the high-end smartphone market.

Net sales in the Europe for the three months ended March 31, 2016 increased from \$3.7 million to \$10.5 million compared to the three months ended March 31, 2015, or by \$6.9 million, or 187.9%, primarily due to the change in billing location from the United States to Europe by a foundry customer serving the high-end smartphone market, which was partially offset by the decrease in sales to the customer.

Operating Expenses

Selling, General and Administrative Expenses. Selling, general and administrative expenses were \$20.0 million, or 13.5% of net sales, for the three months ended March 31, 2016, compared to \$25.0 million, or 15.2% of net sales, for the three months ended March 31, 2015. The decrease of \$5.1 million, or 20.3%, was primarily attributable to a decrease in professional services costs related to the restatement of approximately \$3.5 million

Research and Development Expenses. Research and development expenses were \$17.8 million, or 12.0% of net sales, for the three months ended March 31, 2016, compared to \$22.2 million, or 13.4% of net sales, for the three months ended March 31, 2015. The decrease of \$4.3 million, or 19.6%, was primarily due to the decrease in material and personnel costs.

Restructuring Gain. Restructuring gain of \$7.8 million recorded for the three months ended March 31, 2016 resulted from the sale of machinery related to the closure of our 6-inch fab.

Operating Income

As a result of the foregoing, operating income increased by \$16.5 million, or 134.9%, in the three months ended March 31, 2016 compared to the three months ended March 31, 2015. As discussed above, the increase in operating income resulted from a \$5.1 million decrease in selling, general and administrative expenses, a \$4.3 million decrease

in research and development expenses and a \$7.8 million increase in restructuring gain.

Other Income

Interest Expense. Interest expense was \$4.1 million for the three months ended March 31, 2016 and March 31, 2015.

Table of Contents

Foreign Currency Gains, Net. Net foreign currency gain for the three months ended March 31, 2016 was \$8.2 million compared to net foreign currency loss of \$3.2 million for the three months ended March 31, 2015. A substantial portion of our net foreign currency gain or loss is non-cash translation gain or loss associated with intercompany balances at our Korean subsidiary and is affected by changes in the exchange rate between the Korean won and the U.S. dollar. Foreign currency translation gain or loss from intercompany balances was included in determining our consolidated net income since the intercompany balances were not considered long-term investments in nature because management intended to settle these intercompany balances at their respective maturity dates.

Others, Net. Others were comprised of gains and losses on valuation of derivatives which were designated as hedging instruments, rental income and interest income. Others for the three months ended March 31, 2016 and March 31, 2015 was \$0.5 million and \$0.6 million, respectively.

Income Tax Expenses

Income tax expenses for the three months ended March 31, 2016 were \$0.8 million and for the three months ended March 31, 2015 were \$1.1 million, primarily attributable to interest on intercompany loan balances. The decrease in income tax expenses was attributable to a reversal of deferred tax assets at a foreign subsidiary for the three months ended March 31, 2015.

Net Income

As a result of the foregoing, net income increased by \$28.2 million in the three months ended March 31, 2016 compared to the three months ended March 31, 2015. As discussed above, the increase in net income primarily resulted from a \$16.5 million increase in operating income attributable to reduction in certain operating expenses and a \$11.4 million increase in foreign currency gain.

Table of Contents

Liquidity and Capital Resources

Our principal capital requirements are to fund sales and marketing, invest in research and development and capital equipment, to make debt service payments and to fund working capital needs. We calculate working capital as current assets less current liabilities.

Our principal sources of liquidity are our cash, cash equivalents, our cash flows from operations and our financing activities. Our ability to manage cash and cash equivalents may be limited, as our primary cash flows are dictated by the terms of our sales and supply agreements, contractual obligations, debt instruments and legal and regulatory requirements. From time to time, we may sell accounts receivable to third parties under factoring agreements or engage in accounts receivable discounting to facilitate the collection of cash. For a description of our factoring arrangements and accounts receivable discounting, please see Item 1. Interim Consolidated Financial Statements Notes to Consolidated Financial Statements Note 2. Sales of Accounts Receivable and Receivable Discount Program included elsewhere in this Report. In addition, from time to time, we may make payments to our vendors on extended terms with their consent. As of March 31, 2016, we have zero balance in our accounts payable on extended terms or payment deferment with our vendors.

In addition to the factoring arrangements and accounts receivable discounting described above, our cash balance at December 31, 2015 compared to that at March 31, 2016 was impacted positively by \$10.0 million of customer prepayments for the sale of products produced from our 6-inch fabrication facility closed during the first quarter of 2016. Those customers paid cash prior to risk of loss of products being transferred based on the terms of the arrangements. Our cash balance at December 31, 2015 was also impacted positively by approximately \$8.2 million as the result of equipment deposits received with respect to the then-planned closure of our 6-inch fabrication facility.

Since fiscal 2015, we have implemented a comprehensive cost reduction program to reduce spending and improve our cash flows. Our ability to maintain sufficient liquidity for the next twelve months to fund our operations and capital expenditures and implement our business plan and strategy will also be dependent on continuing improvement of the recent negative trends in our operating results. We currently believe that we will have sufficient cash reserves from cash on hand and expected cash from operations to fund our operations and planned capital expenditures for the next twelve months. However, if our operating results do not improve, we may need to seek additional capital. There can be no assurance that any additional equity or debt financing would be available to us, or if available, that such financing would be on favorable terms to us. Accordingly, if we are unable to obtain additional capital or our business does not generate sufficient cash flows from operating activities to fund our working capital needs and planned capital expenditures, and our cash reserves are depleted, we may need to take various actions, such as down-sizing and/or eliminating certain operations, which could include additional exit costs, reducing or delaying capital expenditures, selling assets, or other restructuring actions.

Additionally, many of the aspects of management's plan, growth strategies and cost reduction initiatives to conserve our liquidity position involve management's judgments and estimates that include factors that may be beyond our control, and actual results could differ materially from our current expectations. As a result, these and other factors could cause our business plans, strategies and cost reduction initiatives to be unsuccessful, which could have a material adverse effect on our operating results, financial condition and liquidity.

As of March 31, 2016, cash and cash equivalents held by our Korean subsidiary were \$68.9 million, which represents 94% of our total cash and cash equivalents of \$73.5 million on a consolidated basis. We, as a holding company resident in the United States, issued our 2021 Notes. Payments under our outstanding 2021 Notes are currently funded in part by our Korean subsidiary's repayment of its existing loans from our Dutch subsidiary, with our Dutch subsidiary using such repayments in turn to repay the loans owed to our Luxembourg subsidiary, which repays loans

owed to us. Repatriation of funds could have potential adverse tax consequences.

Cash Flows from Operating Activities

Cash outflow used in operating activities totaled \$18.2 million for the three months ended March 31, 2016, compared to \$8.7 million in the three months ended March 31, 2015. The net operating cash outflow for the three months ended March 31, 2016 reflects our net income of \$8.1 million and non-cash adjustments of \$4.1 million which mainly consisted of depreciation and amortization, provision for severance benefits, foreign currency loss and restructuring gain, and an increase in net operating assets of \$22.2 million.

Our working capital balance as of March 31, 2016 was \$100.3 million compared to \$93.7 million as of December 31, 2015. The \$6.5 million increase was primarily attributable to a \$13.4 million increase in inventories and a \$10.1 million decrease in deferred revenue, which were partially offset by a \$17.4 million decrease in cash and cash equivalents.

Table of Contents

The level of inventories is increased as of March 31, 2016 in anticipation of sales growth in future periods and the decrease in deferred revenue is due to the recognition of the related revenue during the first quarter of 2016 for the upfront payments received from certain customers for the sale of products prior to risk of loss being transferred based on the terms of the arrangement.

Cash Flows from Investing Activities

Cash outflow used in investing activities totaled \$0.2 million in the three months ended March 31, 2016, compared to \$1.0 million in the three months ended March 31, 2015. The decrease was primarily attributable to a collection of hedge collateral of \$4.0 million and a \$0.8 million net decrease in guarantee deposits, which were partially offset by a \$3.9 million net increase in capital expenditures.

Cash Flows from Financing Activities

We had no cash flows from financing activities for the three months ended March 31, 2016 and March 31, 2015.

Capital Expenditures

We routinely make capital expenditures to enhance our existing facilities and reinforce our global research and development capability. For the three months ended March 31, 2016, capital expenditures were \$4.5 million, a \$3.9 million, or 613.7%, increase from \$0.6 million in the three months ended March 31, 2015. The increase was due to supporting technology improvements at our fabrication facilities in anticipation of attaining manufacturing efficiency.

Table of Contents**Contractual Obligations**

The following summarizes our contractual obligations as of March 31, 2016:

	Total	Payments Due by Period					Thereafter	
		Remainder of 2016	2017	2018	2019	2020		
			(In millions)					
Senior notes ⁽¹⁾	\$ 307.0	\$ 7.5	\$ 14.9	\$ 14.9	\$ 14.9	\$ 14.9	\$ 239.9	
Operating lease ⁽²⁾	44.2	5.7	5.4	2.9	1.9	1.9	26.5	
Others ⁽³⁾	13.7	5.5	6.5	1.7				

- (1) Interest payments as well as \$225.0 million aggregate principal amount of the 2021 Notes outstanding as of March 31, 2016, which bear interest at a rate of 6.625% per annum and are scheduled to mature in 2021.
- (2) Assumes constant currency exchange rate for Korean won to U.S. dollars of 1,153.5:1, the exchange rate as of March 31, 2016.
- (3) Includes license agreements and other contractual obligations.

The Indenture relating to the 2021 Notes contains covenants that limit our ability and the ability of our restricted subsidiaries to: (i) declare or pay any dividend or make any payment or distribution on account of or purchase or redeem our capital stock or equity interests of the restricted subsidiaries; (ii) make any principal payment on, or redeem or repurchase, prior to any scheduled repayment or maturity, any subordinated indebtedness; (iii) make certain investments; (iv) incur additional indebtedness and issue certain types of capital stock; (v) create or incur any lien (except for permitted liens) that secures obligations under any indebtedness; (vi) merge with or into or sell all or substantially all of our assets to other companies; (vii) enter into certain types of transactions with affiliates; (viii) guarantee the payment of any indebtedness; (ix) enter into sale-leaseback transactions; (x) enter into agreements that would restrict the ability of the restricted subsidiaries to make distributions with respect to their equity to us or other restricted subsidiaries, to make loans to us or other restricted subsidiaries or to transfer assets to us or other restricted subsidiaries; and (xi) designate unrestricted subsidiaries.

These covenants are subject to a number of exceptions and qualifications. Certain of these restrictive covenants will terminate if the notes are rated investment grade at any time

We lease land, office space and equipment under various operating lease agreements that expire through 2034.

We follow accounting guidance on uncertain tax positions. Our unrecognized tax benefits totaled \$2.2 million as of March 31, 2016. These unrecognized tax benefits have been excluded from the above table because we cannot estimate the period of cash settlement with the respective taxing authorities.

Although we are obligated to pay severance benefits to eligible employees with one or more years of service upon the termination of their employment based on their length of service and rate pay, we have no obligation to fund the accrued severance benefits. Our accrued severance benefits totaled \$138.1 million as of March 31, 2016. Our obligations in connection with severance benefits have been excluded from the above table because we are unable to reasonably estimate the rate of termination and related cash payments for future period.

Critical Accounting Policies and Estimates

Preparing financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements, the reported amounts of revenues and expenses during the reporting periods and the related disclosures in our consolidated financial statements and accompanying notes.

We believe that our significant accounting policies, which are described further in Note 1 to our consolidated financial statements in the 2015 Form 10-K, are critical due to the fact that they involve a high degree of judgment and estimates about the effects of matters that are inherently uncertain. We base these estimates and judgments on historical experience, knowledge of current conditions and other assumptions and information that we believe to be reasonable. Estimates and assumptions about future events and their effects cannot be determined with certainty. Accordingly, these estimates may change as new events occur, as more experience is acquired, as additional information is obtained and as the business environment in which we operate changes.

A description of our critical accounting policies that involve significant management judgement appears in the 2015 Form 10-K, under Management's Discussion and Analysis of Financial Conditions and Reports of Operations Critical Accounting Policies and Estimates. There have been no material changes to our critical accounting policies and estimates as compared to our critical accounting policies and estimates included in the 2015 Form 10-K.

Recent Accounting Pronouncements

For a full description of new accounting pronouncements and recently adopted accounting pronouncement, including the respective dates and impact of adoption on our consolidated financial statements, please see Item 1. Interim Consolidated Financial Statements Notes to Consolidated Financial Statements Note 1. Business, Basis of Presentation and Significant Accounting Policies in this Report.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to the market risk that the value of a financial instrument will fluctuate due to changes in market conditions, primarily from changes in foreign currency exchange rates and interest rates. In the normal course of our business, we are subject to market risks associated with interest rate movements and currency movements on our assets and liabilities.

Foreign Currency Exposures

We have exposure to foreign currency exchange rate fluctuations on net income from our subsidiaries denominated in currencies other than U.S. dollars, as our foreign subsidiaries in Korea, Taiwan, China, Japan and Hong Kong use local currency as their functional currency. From time to time these subsidiaries have cash and financial instruments in local currency. The amounts held in Japan, Taiwan, Hong Kong and China are not material in regards to foreign currency movements. However, based on the cash and financial instruments balance at March 31, 2016 for our Korean subsidiary, a 10% devaluation of the Korean won against the U.S. dollar would have resulted in a decrease of \$1.0 million in our U.S. dollar financial instruments and cash balances.

See Note 7. Derivative Financial Instruments to our consolidated financial statements under Item 1. Interim Consolidated Financial Statements and Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Factors Affecting Our Results of Operations Impact of Foreign Currency Exchange Rates on Reported Results of Operations for additional information regarding our foreign exchange hedging activities.

Interest Rate Exposures

As of March 31, 2016, \$225.0 million aggregate principal amount of our 2021 Notes were outstanding. Interest on the 2021 Notes accrues at a fixed rate of 6.625% per annum and is paid semi-annually every January 15 and July 15 of each year until the 2021 Notes mature on July 15, 2021. Since the interest rate is fixed, we have no market risk related to the 2021 Notes.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our periodic reports filed under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, with the participation of our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

In connection with the preparation of this Quarterly Report on Form 10-Q, we carried out an evaluation under the supervision of and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, as of March 31, 2016, of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were not effective as of March 31, 2016, as we cannot conclude that the material weaknesses in internal control over financial reporting described in Part II, Item 9A of our 2015 Form 10-K have been remediated as of the date of this Report.

Previously Identified Material Weaknesses

As previously disclosed in our 2015 Form 10-K, management concluded that, based on the criteria set forth in Internal Control Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), our internal control over financial reporting was not effective as of December 31, 2015 to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with US GAAP. For more information on material weaknesses in internal control over financial reporting, see Part II, Item 9A of our 2015 Form 10-K.

Remediation Efforts

As previously disclosed in Part II, Item 9A of our 2015 Form 10-K, we have enhanced various internal controls that relate to (i) Period End Closing and Financial Reporting and (ii) Income Tax Accounting and Disclosures. However, controls over (i) the completeness and accuracy of non-routine manual journal entries and (ii) the analysis and review of current income taxes will not be considered fully remediated until those controls operate effectively as redesigned for a sufficient period of time by the end of 2016.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended March 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

For a discussion of legal proceedings, see Part I: Item 3. Legal Proceedings of our 2015 Form 10-K.

See also Part I: Item 1A. Risk Factors of our 2015 Form 10-K and Note 16 and 17 to our consolidated financial statements in this Report for additional information.

Item 1A. Risk Factors

We are subject to risks and uncertainties, any of which could have a significant or material adverse effect on our business, financial condition, liquidity or consolidated financial statements. You should carefully consider the risk factors set forth below as well as the risk factors disclosed in Part I, Item 1A of our 2015 Form 10-K. The risks described herein and therein are not the only ones we face. This information should be considered carefully together with the other information contained in this report and the other reports and materials the Company files with the SEC.

Our Rights Plan and provisions in our charter documents and Delaware Law may make it difficult for a third party to acquire us and could depress the price of our common stock.

On March 5, 2015, our Board of Directors adopted a stockholder rights plan (the Rights Plan) and declared a dividend of one preferred stock purchase right on each share of the Company's common stock outstanding at the close of business on March 16, 2015. On March 2, 2016, the Company entered into an amendment to the Rights Agreement. As amended, each right will entitle the holder to purchase one one-thousandth of a share of our Series A Junior Participating Preferred Stock. Under certain circumstances, if a person or group acquires 12.5% (or 20% in the case of a passive institutional investor) or more of our outstanding common stock, holders of the rights (other than the person or group triggering their exercise) will be able to purchase for each share of common stock owned, \$12 worth of shares of the Company's common stock having a market value of twice such price. The rights expire in September 2016 unless extended by our Board of Directors. Because the rights may substantially dilute the stock ownership of a person or group attempting to acquire us without the approval of our Board of Directors, our Rights Plan could make it more difficult for a third party to acquire us (or a significant percentage of our outstanding capital stock) without first negotiating with our Board of Directors regarding such acquisition.

In addition, provisions in our certificate of incorporation and bylaws may have the effect of delaying or preventing a change of control or changes in our management. Among other things, our certificate of incorporation and bylaws:

authorize our Board of Directors to issue, without stockholder approval, preferred stock with such terms as the Board of Directors may determine;

prohibit action by written consent of our stockholders;

prohibit any person other than our Board of Directors, the chairman of our Board of Directors, our Chief Executive Officer or holders of at least 25% of the voting power of all then outstanding shares of capital stock of

the corporation entitled to vote generally in the election of directors to call a special meeting of our stockholders;
and

specify advance notice requirements for stockholder proposals and director nominations.

In addition, we are subject to the provisions of Section 203 of the Delaware General Corporation Law (the "DGCL"), regulating corporate takeovers and which has an anti-takeover effect with respect to transactions not approved in advance by our Board of Directors, including discouraging takeover attempts that might result in a premium over the market price for shares of our common stock. In general, those provisions prohibit a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years following the date that the stockholder became an interested stockholder, unless:

the transaction is approved by the board of directors before the date the interested stockholder attained that status;

upon consummation of the transaction which resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced; or

on or after such date, the business combination is approved by the board of directors and authorized at a meeting of stockholders, and not by written consent, by at least two-thirds of the outstanding voting stock that is not owned by the interested stockholder.

Table of Contents

In general, DGCL Section 203 defines a business combination to include the following:

any merger or consolidation involving the corporation and the interested stockholder;

any sale, transfer, pledge or other disposition of 10% or more of the assets of the corporation involving the interested stockholder;

subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation to the interested stockholder;

any transaction involving the corporation that has the effect of increasing the proportionate share of the stock of any class or series of the corporation beneficially owned by the interested stockholder; or

the receipt by the interested stockholder of the benefit of any loans, advances, guarantees, pledges or other financial benefits provided by or through the corporation.

In general, DGCL Section 203 defines an interested stockholder as any entity or person beneficially owning 15% or more of the outstanding voting stock of the corporation and any entity or person affiliated with or controlling or controlled by any such entity or person.

A Delaware corporation may opt out of this provision by express provision in its original certificate of incorporation or by amendment to its certificate of incorporation or bylaws approved by its stockholders. However, we have not opted out of, and do not currently intend to opt out of, this provision.

We cooperate with independent foundries to produce certain advanced technology Display Solutions products, and the failure of such independent foundries to satisfy our demand could materially disrupt our business.

We use independent foundry services for certain of our AMOLED Display Solutions products that require more advanced technology than is available in our fabrication facilities. Silicon wafer production at these facilities is allocated solely by our vendors and beyond our direct control. Therefore, any disruption in wafer supply from these vendors could have a material impact on our revenue and results of operations.

Except for the aforementioned, there are no material changes to the Company's risk factors disclosed in Part I: Item 1A. Risk Factors of our 2015 Form 10-K.
