--	--------------

(1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At July 31, 2009, the value of these securities amounted to \$20,906,685 or 7.83% of net assets.

(2) Perpetual bond security. The maturity date reflects the next call date.

(3) Security exempt from registration under Rule 144A of the Securities Act of 1933. This security, which represents 0.14% of net assets as of July 31, 2009, is considered illiquid and restricted. (See restricted security table below for more information.)

Restricted security	Acquisition date	Acquisition cost	Acquisition cost as a percentage of net assets	07/31/09 Market value	07/31/09 Market value as a percentage of net assets
Union National FIDC Trust 2006, due 07/01/10	06/28/07	\$954,222	0.36%	\$366,047	0.14%

(4) Security linked to closed-end fund.

(5) Security is illiquid. At July 31, 2009, these securities amounted to \$10,166,430 or 3.81% of net assets.

(6) Security is in default.

(7) Floating rate security □ The interest rates shown are the current rates as of July 31, 2009.

(8) Rate shown reflects annualized yield at July 31, 2009 on zero coupon bond.

(9)

Edgar Filing: GLOBAL HIGH INCOME FUND INC - Form N-Q

Step bond ☐ Coupon rate increases in increments to maturity. Rate disclosed is as of July 31, 2009. Maturity date disclosed is the ultimate maturity date.

(10) The table below details the Fund's investments in securities issued by funds that are advised by the same advisor as the Fund. The advisor does not earn a management fee from either UBS Supplementary Trust☐U.S. Cash Management Prime Fund or UBS Cash Management Prime Relationship Fund.

Security description	Value 10/31/08	Purchases during the nine months ended 07/31/09	Sales during the nine months ended 07/31/09	Value 07/31/09	Income earned from affiliate for the nine months ended 07/31/09
UBS Cash Management Prime Relationship Fund	\$ ☐	\$ 107,949,580	\$ 75,989,713	\$ 31,959,867	\$ 66,062
UBS Supplementary Trust☐U.S. Cash Management Prime Fund	14,609,763	53,728,448	68,338,211	☐	138,693

(11) The rate shown reflects the yield at July 31, 2009.

(12) The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its securities from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, current market quotations or valuations from computerized "matrix" systems that derive values based on comparable securities or instruments. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities. Securities traded in the over-the-counter ("OTC") market and listed on The NASDAQ Stock Market, Inc. ("NASDAQ") normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price on the valuation date available prior to valuation. Securities which are listed on US and foreign stock exchanges normally are valued at the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated as the primary market by UBS Global Asset Management (Americas) Inc., the investment advisor of the Fund. If a market value is not available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund's Board of Directors (the "Board"). Various factors may be reviewed in order to make a good faith determination of a security's fair value. These factors include, but are not limited to, the type and cost of the security; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; and changes in overall market conditions. Foreign currency exchange rates are generally determined as of the close of the New York Stock Exchange ("NYSE"). Occasionally, events affecting the value of foreign investments occur between the time at which they are determined and the close of the NYSE, which will not be reflected in the computation of the Fund's net asset value. If events materially affecting the value of such securities occur during such time periods, the securities will be valued at their fair value as determined in good faith by or under the direction of the Board. The amortized cost method of valuation, which approximates market value, generally is used to value short term debt instruments with sixty days or less remaining to maturity, unless the Board determines that this does not represent fair value. Investments in open-end investment companies are valued at the daily closing net asset value of the respective investment company as provided by such other entity. All investments quoted in foreign currencies will be valued in US dollars on the basis of the foreign currency exchange rates prevailing at the time such valuation is determined by the Fund's custodian.

Options written

Written option activity for the nine months ended July 31, 2009 for the Fund was as follows:

	Number of contracts	Amount of premiums received
	<u> </u>	<u> </u>
Options outstanding at October 31, 2008	□	\$ □
Options written	448	75,639
Options terminated in closing purchase transactions	(448)	(75,639)
Options expired prior to exercise	□	□
	<u> </u>	<u> </u>
Options outstanding at July 31, 2009	□	\$ □
	<u> </u>	<u> </u>
	<u> </u>	<u> </u>

The following is a summary of the inputs used as of July 31, 2009 in valuing the Fund's investments:

Measurements at 07/31/09

Description	Quoted prices in active markets for identical investments (Level 1)	Significant other observable inputs (Level 2)	Unobservable inputs (Level 3)	Total
Corporate bonds	\$ 0	\$ 31,190,521	\$ 10,166,430	\$ 41,356,951
Non US-government obligations	0	178,721,777	0	178,721,777
Sovereign/supranational bond	0	5,458,400	0	5,458,400
Short-term investment	0	31,959,867	0	31,959,867
Other financial instruments ⁽¹⁾	719,914	122,936	0	842,850
Total	\$ 719,914	\$ 247,453,501	\$ 10,166,430	\$ 258,339,845

Other financial instruments may include open futures contracts, swap agreements, options, and forward foreign (1) currency contracts.

Level 3 rollforward disclosure

The following is a rollforward of the Fund's investments that were valued using unobservable inputs for the period:

	Measurements using unobservable inputs (Level 3)	
	Corporate bonds	Total
Assets		
Beginning balance	\$ 13,756,350	\$ 13,756,350
Total gains or losses (realized/unrealized) included in earnings ^(a)	1,147,926	1,147,926
Purchases, sales, issuances, and settlements (net)	(6,252,438)	(6,252,438)
Transfers in and/or out of Level 3	1,514,592	1,514,592
Ending balance	\$ 10,166,430	\$ 10,166,430
The amount of total gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to investments still held at 07/31/09.	(\$1,536,812)	(\$1,536,812)

Does not include unrealized losses of \$1,698,592 related to transferred assets, presented at their end of period (a) values.

1) Swap agreements

The Fund may engage in swap agreements, including but not limited to interest rate, currency, total return and credit default swap agreements. The Fund expects to enter into these transactions to preserve a return or spread on a particular investment or portion of the portfolio's duration, to protect against any increase in the price of securities the Fund anticipates purchasing at a later date, or to gain exposure to certain markets in the most economical way possible.

The Fund may enter into interest rate swap agreements with another party to receive or pay interest (e.g., an exchange of fixed rate payments for floating rate payments) to protect itself from interest rate fluctuations. This type of swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to a specified interest rate(s) for a specified amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. Interest rate swap agreements are subject to general market risk, liquidity risk, counterparty risk and interest rate risk.

Credit default swap agreements involve commitments to make or receive payments in the event of a default or a credit event of a referenced security. As a buyer, the Fund would make periodic payments to the counterparty, and the Fund would receive payments only upon the occurrence of a credit event. If no credit event occurs, the Fund will lose its periodic stream of payments over the term of the contract. However, if a credit event does occur, the Fund typically would receive full notional value for a reference obligation that may have little or no value. As a seller, the Fund would receive periodic payments from the counterparty, and the Fund would make payments only upon the occurrence of a credit event. If no credit event occurs, the Fund will gain the periodic stream of payments it received over the term of the contract. However, if a credit event occurs, the Fund will pay full notional value for a reference obligation that may have little or no value. Credit default swaps may involve greater risks than if the Fund had invested in the reference obligation directly and are subject to general market risk, liquidity risk, counterparty risk and credit risk.

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of referenced credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardized terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices changes periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Fund may use credit default swaps on credit indices to hedge its portfolio of credit default swaps or bonds with a credit default swap on indices which is less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swap on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

Credit default swap on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality. Credit default swap agreements on corporate issues or sovereign issues of an emerging country involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit event. If a credit event occurs and cash settlement is not elected, a variety of other deliverable obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event). The Fund may use credit default swaps on corporate issues or sovereign issues of an emerging country to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Fund owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default.

The maximum potential amount of future payments (undiscounted) that the Fund as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement, which may exceed the amount of unrealized appreciation or depreciation reflected on the Statement of assets and liabilities. Notional amounts of all credit default swap agreements outstanding as of July 31, 2009 for

which the Fund is the seller of protection are disclosed under the section "Credit default swaps on corporate and sovereign issues - sell protection" in the Notes to portfolio of investments. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into, if any, by the Fund for the same referenced entity or entities.

Total return swap agreements involve commitments to pay or receive interest in exchange for a market-linked return based on a notional amount. To the extent the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty, respectively. Total return swaps are marked-to-market daily, and the change, if any, is recorded as unrealized appreciation or depreciation. Total return swap agreements are subject to general market risk, liquidity risk, counterparty risk and that there may be unfavorable changes in the underlying investments or instruments.

The use of swaps involves investment techniques and risks different from those associated with ordinary portfolio security transactions. If UBS Global Asset Management (Americas) Inc. is incorrect in its forecast of market values, interest rates and other applicable factors, the investment performance of the Fund will be less favorable than it would have been if this investment technique was never used. Swaps do not involve the delivery of securities and are subject to counterparty risk. If the other party to a swap defaults and fails to consummate the transaction, the Fund's risk of loss will consist of the net amount of interest or other payments that the Fund is contractually entitled to receive. Therefore, the Fund would consider the creditworthiness of the counterparty to a swap agreement in evaluating potential credit risk.

2) Option writing

The Fund may write (sell) put and call options on foreign or US securities indices in order to gain exposure to or protect against changes in the markets. When the Fund writes a call or a put option, an amount equal to the premium received by the Fund is included in the Fund's Statement of assets and liabilities as an asset and as an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. If an option which the Fund has written either expires on its stipulated expiration date or the Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the option was written) without regard to any unrealized gain or loss on the underlying security or derivative instrument, and the liability related to such option is extinguished. If a call option which the Fund has written is exercised, the Fund recognizes a realized gain or loss (long-term or short-term, depending on the holding period of the underlying security) from the sale of the underlying security or derivative instrument and the proceeds from the sale are increased by the premium originally received. If a put option which the Fund has written is exercised, the amount of the premium originally received reduces the cost of the security or derivative instrument which the Fund purchases upon exercise of the option.

In writing an option, the Fund bears the market risk (specifically interest rate risk) of an unfavorable change in the price of the derivative instrument, security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a derivative instrument, security or currency at a price different from current market value.

3) Restricted securities

The Fund may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included in the Fund's "Notes to portfolio of investments".

4) Securities lending

The Fund may lend securities up to 33¹/₃% of its total assets to qualified broker-dealers or institutional investors. The loans are secured at all times by cash, cash equivalents or US government securities in an amount at least equal to the market value of the securities loaned, plus accrued interest and dividends, determined on a daily basis and adjusted accordingly. The Fund will regain ownership of loaned securities to exercise certain beneficial rights; however, the Fund may bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower fail financially. The Fund receives compensation for lending its securities from interest or dividends earned on the cash, cash equivalents or US government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The Fund did not lend any securities during the nine month period ended July 31, 2009.

For more information regarding the Fund's other significant accounting policies, please refer to the Fund's semiannual report to shareholders dated April 30, 2009.

Item 2. Controls and Procedures.

- (a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended ("Investment Company Act")) are effective based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.
- (b) The registrant's principal executive officer and principal financial officer are aware of no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act) that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 3. Exhibits.

- (a) Certifications of principal executive officer and principal financial officer of registrant pursuant to Rule 30a-2(a) under the Investment Company Act is attached hereto as Exhibit EX-99.CERT.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
