Equity Holders' Net Income (Loss) (USD million)	125.6	97.8	(213.8)
Earnings per ADS (USD)	0.64	0.50	(1.09)

- EBITDA ⁴ of USD390.0 million in the fourth quarter 2013, 9% higher than EBITDA in the third quarter 2013 as a result of higher EBITDA per ton partially offset by seasonally lower steel shipments.
- Earnings per American Depositary Share (ADS) ⁵ of USD0.64 in the fourth quarter 2013
- Capital expenditures of USD158.2 million in the fourth quarter 2013, down from USD217.5 million in the third quarter 2013.
- Net debt position of USD1.5 billion at the end of December 2013, down from USD1.6 billion at the end of September 2013.

¹ Iron ore shipments in 2013 included Ternium's interest in Peña Colorada. Starting on January 1, 2013, Peña Colorada and Exiros have been proportionally consolidated. Comparative amounts for both companies show them as investments in non-consolidated companies and their results are included within "Equity in earnings (losses) of non-consolidated companies" in the consolidated income statement.

² Certain comparative amounts have been reclassified to conform to changes in the current period presentation, and to reflect the changes related to the completion of the purchase price allocation of Usiminas.

³ Consolidated EBITDA divided by steel shipments

⁴ EBITDA in the fourth quarter 2013 equals operating income of USD295.6 million adjusted to exclude depreciation and amortization of USD94.5 million.

⁵ Each American Depositary Share (ADS) represents 10 shares of Ternium's common stock. Results are based on a weighted average number of shares of common stock outstanding (net of treasury shares) of 1,963,076,776.

Ternium's operating income in the fourth quarter 2013 was USD295.6 million, USD29.5 million higher than in the third quarter 2013 as a result of a higher operating margin partially offset by seasonally lower steel shipments. Operating margin in the fourth quarter 2013 increased sequentially mainly due to higher steel revenue per ton in Mexico and Other Markets and a slight reduction in operating cost per ton ⁶ resulting principally from a lower cost of purchased slabs and raw materials.

Compared to the fourth quarter 2012, the company's operating income in the fourth quarter 2013 was USD172.1 million higher due to improved operating margin and steel shipments. The year-over-year increase in operating margin was mainly due to a lower operating cost per ton principally from a lower cost of purchased slabs and raw materials. In addition, operating income in the fourth quarter 2012 reflected the decreased productivity caused by the stoppage of a blast furnace in Argentina.

Net income was USD171.1 million in the fourth quarter 2013, USD35.0 million higher than net income in the third quarter 2013 mainly due to the above mentioned higher operating income. Relative to the prior-year period, net income in the fourth quarter 2013 increased by USD402.3 million mainly due to the above mentioned higher operating income and a USD298.0 million better result related to the investment in Usiminas, which in the fourth quarter 2012 included a USD275.3 million impairment charge.

⁶ Operating cost per ton equals cost of sales plus Selling, General & Administrative expenses divided by steel shipments.

- EBITDA ⁷ of USD1.5 billion in 2013, 15% higher than EBITDA in 2012 as a result of higher EBITDA per ton and steel shipments.
- Earnings per ADS ⁸ of USD2.32 in 2013.
- Capital expenditures of USD883.3 million in 2013, down from USD1.0 billion in 2012.

Operating income in 2013 was USD1.1 billion, 21% higher than in 2012 mainly due to higher operating margin and a 220,000 ton increase in steel shipments, as well as higher iron ore shipments to third parties as a result of the proportional consolidation in 2013 of Peña Colorada's mining operations. Operating margin in 2013 increased principally due to lower operating cost per ton, which resulted mainly from a lower cost of purchased slabs and raw materials, partially offset by lower steel revenue per ton in Mexico and Other Markets.

Net income in 2013 was USD592.9 million, USD402.0 million higher than net income in 2012, mainly due to a USD328.6 million better result related to the investment in Usiminas, which in 2012 included a USD275.3 million impairment charge, and a USD188.8 million higher operating income, partially offset by higher net financial and income tax expenses.

Mexican Power Plant Investment

Following the execution of an August 2013 memorandum of understanding for the construction and operation of a natural gas-fired combined cycle electric power plant in the Pesquería area of the State of Nuevo León, Mexico, as of February 2014, Ternium, Tenaris and Tecpetrol International S.A. (a wholly-owned subsidiary of San Faustin S.A., the controlling shareholder of both Ternium and Tenaris) have completed their initial investments in Techgen, S.A. de C.V., a Mexican project company owned 48% by Ternium, 30% by Tecpetrol and 22% by Tenaris. Tenaris and Ternium have also agreed to enter into power supply and transportation agreements with Techgen, pursuant to which Ternium and Tenaris will contract 78% and 22%, respectively, of Techgen's power capacity of between 850 and 900 megawatts.

⁷ EBITDA in 2013 equals operating income of USD1.1 billion adjusted to exclude depreciation and amortization of USD377.1 million.

⁸ Each American Depositary Share (ADS) represents 10 shares of Ternium's common stock. Results are based on a weighted average number of shares of common stock outstanding (net of treasury shares) of 1,963,076,776.

Annual Dividend Proposal

Ternium's board of directors proposed that an annual dividend of USD0.075 per share (USD0.75 per ADS), or approximately USD150.4 million in the aggregate, be approved at the company's annual general shareholders' meeting, which is scheduled to be held on May 7, 2014. If the annual dividend is approved at the shareholders' meeting, it will be paid on May 16, 2014, with record-date of May 13, 2014.

Outlook

Ternium expects steel shipments to increase sequentially in the first quarter 2014, with an improvement in sales to industrial customers in Mexico partially offset by seasonally weaker volumes in Argentina. The company anticipates a relatively stable operating income in the first quarter 2014 compared to the fourth quarter 2013, as a result of the above mentioned increase in shipments being offset by a slightly lower operating margin, with a decrease in revenue per ton and stable operating cost per ton.

Analysis of Fourth Quarter 2013 Results

Net income attributable to Ternium's equity holders in the fourth quarter 2013 was USD125.6 million, compared to a net loss of USD213.8 million in the fourth quarter 2012. Selling, General & Administrative (SG&A) expenses in the fourth quarter 2013 were USD210.4 million, or 9.9% of net sales, an increase of USD13.5 million compared to the fourth quarter 2012, mainly due to higher taxes and contributions (other than income tax) and labor expenses, partially offset by lower services expenses.
