Media Release

Credit Suisse Group completes review related to revaluation of certain asset-backed securities positions in its CDO trading business

Final valuation reduction of CHF 2.86 billion is CHF 200 million less than previously estimated.

Valuation reduction of CHF 1.18 billion (CHF 789 million net of tax) relating to the fourth quarter of 2007, and CHF 1.68 billion relating to the first quarter of 2008.

Revised income from continuing operations for 2007 of CHF 7.8 billion is down 6% from the record level in 2006.

With regard to 2008, including valuation reductions, Credit Suisse was profitable through the end of February. In light of the difficult market conditions in March, at this time, Credit Suisse believes it is unlikely to be profitable in the first quarter.

Zurich, March 20, 2008 Credit Suisse Group today announced the completion of an internal review related to the revaluation of certain asset-backed securities positions in the Collateralized Debt Obligations (CDO) trading business within its Investment Banking division.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Credit Suisse recorded a total valuation reduction of CHF 2.86 billion (USD 2.65 billion), of which CHF 1.18 billion is related to the fourth quarter of 2007, and CHF 1.68 billion to the first quarter of 2008. Net income for Credit Suisse for the fourth quarter and full-year 2007 has been revised by CHF 789 million to CHF 540 million, and CHF 7,760 million, respectively.

Reflecting the good performance for 2007 and the strong capitalization with a year-end BIS tier 1 ratio of 11.1%, the proposal for a CHF 2.50 per share dividend to the shareholders meeting remains unchanged.

With regard to 2008, including these valuation reductions, Credit Suisse was profitable through the end of February. However, in light of the difficult market conditions in March, at this time, Credit Suisse believes it is unlikely to be profitable in the first quarter.

Following its revaluation review, Credit Suisse has determined that the pricing errors were, in part, the result of intentional misconduct by a small number of traders. These employees have been terminated or have been suspended and are in the process of being disciplined under local employment law. The review also found that the controls put in place to prevent or detect this activity were not effective.

The Executive Board of Credit Suisse will oversee a series of remedial actions:

- Reassignment of the trading responsibility for the CDO trading business and enhancement of related control processes.
- Improvement of the effectiveness of supervisory reviews and formalization of escalation procedures.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Media Release

March 20, 2008

Page 2/3

Improvement of the coordination among trading, product control and risk management and addition of further resources.

Improvement of training and enhancement of tools and other technical resources available to our employees.

Brady Dougan, Chief Executive Officer of Credit Suisse Group, said: This incident is unacceptable and it does not represent the high standard of Credit Suisse. Our overall control framework remains sound. We are taking strong action to remediate and move forward. Mr. Dougan added:

Credit Suisse continues to be well positioned through the challenging and volatile markets that have existed since the middle of 2007. We are one of the world's best capitalized banks, and our funding is conservative. Our Private Banking business continues to perform very well. Client momentum across our businesses is strong. We benefit from our diverse mix of businesses, our extensive global reach and our integrated banking model. I am confident in our ability to navigate current market conditions and deliver long-term value to our shareholders.

2007 Annual Report available online from today

Credit Suisse Group today published its 2007 Annual Report (including the Form 20-F filed with the US SEC) online in English at www.credit-suisse.com/annualreporting. The Annual Report will be available in print in English on April 4, 2008.

The Annual Report contains a detailed presentation of Credit Suisse's strategy, annual financial statements for 2007 with management discussion and analysis, risk and treasury management and corporate governance.

Credit Suisse Group

As one of the world's leading banks, Credit Suisse provides its clients with private banking, investment banking and asset management services worldwide. Credit Suisse offers advisory services, comprehensive solutions and innovative products to companies, institutional clients and high-net-worth private clients globally, as well as retail clients in Switzerland. Credit Suisse is active in over 50 countries and employs approximately 48,000 people. Credit Suisse's parent company, Credit Suisse Group, is a leading global financial services company headquartered in Zurich. Credit Suisse Group's registered shares (CSGN) are listed in Switzerland and, in the form of American Depositary Shares (CS), in New York. Further information about Credit Suisse can be found at www.credit-suisse.com.

Cautionary statement regarding forward-looking information

This press release contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as believes, anticipates, expects, intends and plans and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of a US or global economic downturn in 2008;
- the direct and indirect impacts of continuing deterioration of subprime and other real estate markets;
- further adverse rating actions by credit rating agencies in respect of structured credit products or other credit-related exposures or of monoline insurers;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
operational factors such as systems failure, human error, or the failure to implement procedures properly;
actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
the effects of changes in laws, regulations or accounting policies or practices;
competition in geographic and business areas in which we conduct our operations;
the ability to retain and recruit qualified personnel;
the ability to maintain our reputation and promote our brand;
the ability to increase market share and control expenses;
technological changes;
the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
the adverse resolution of litigation and other contingencies; and
our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, as well as the information set forth in our Form 20-F Item 3 Key Information Risk Factors.

Cautionary statement

Cautionary statement regarding forward-looking and non-GAAP information

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.

Forward-looking statements involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we describe or imply in forward-looking statements.

A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements, including those we identify in "Risk Factors" in our Annual Report on Form 20-F for the fiscal year ended December 31, 2007 filed with the US Securities and Exchange Commission, and in other public filings and press releases.

We do not intend to update these forward-looking statements except as may be required by applicable laws.

This presentation contains non-GAAP financial information. Information needed to reconcile such non-GAAP financial information to the most directly comparable measures under GAAP can be found in Credit Suisse Group's revised fourth quarter report 2007 and in our Annual Report on Form 20-F for the fiscal year ended December 31, 2007.

Slide 2

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Summary

Final valuation reductions of CHF 2.86 bn or USD 2.65 bn
(vs. USD 2.85 bn estimate announced on February 19)

Valuation reductions of CHF 1.18 bn relating to 4Q07 and CHF 1.68 bn
relating to first six weeks of 1Q08

Revised net income for 2007 of CHF 7.8 bn, down 6% from record income
from continuing operations in 2006

Pricing errors on certain CDO positions were in part due to intentional trader
misconduct

Sound overall control framework, but controls in place to detect this misconduct
were not effective in this case

Re-pricing limited to CDO trading business

Remedial action and consequences

Reassign trading responsibility for the impacted CDO trading business
and enhance related control processes

Improve the effectiveness of supervisory reviews and formalizing
escalation procedures

Improve the co-ordination among trading, product control and risk
management

Slide 6

Outlook

Managing positions more conservatively than most

Although profitable through to the end of February, in light of difficult market conditions in March, we believe we are unlikely to be profitable in 1Q08

Benefiting from diverse business mix and global reach

Seeing strong client momentum in a number of our businesses

Integrated banking model provides opportunities to drive growth and enhance efficiency

optimum efficiency in global market access

Total:
CHF 606 bn

1) Time, demand and saving deposits

2) Structured notes, mid and long-term Bonds and subordinated debt

3) Bank deposits, CDs, corporates

Slide 25

Summary

Stable results despite challenging environment

Growth momentum and strong profitability in Private Banking

further investing in the international expansion

net new asset momentum in Asia and increased global hiring

Maneuvered well through difficult environment in Investment Banking

avoided excessive exposures; losses well contained

most business lines outside affected areas with improved performance

Strong performance across most Asset Management businesses, but performance affected by losses on purchased money market securities

Strong capital and conservative liquidity management

CMBS exposures are fundamentally different from residential mortgage exposures

Majority of our portfolio is secured by high quality, income-producing real estate

Development loans are less than 5% of our portfolio and have an average LTV of 51%

Portfolio is well-diversified with solid LTV ratios

UK

2%

Slide 32

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Residential mortgage (RMBS) exposure and portfolio analysis

Reduced origination activity early in crisis

RMBS re-positioned largely as a trading business;
exposures are managed on a net basis

US subprime positions reduced by 59% in 4Q07;
positions also reduced in higher quality credit
sectors (Alt-A and Prime)

Exposures are fair valued based on market levels

Benchmark price testing: valuations for our
subprime positions (across both RMBS and
CDOs) are consistent with ABX index levels

Significant amount of additional index hedges

(CHF m)

4Q07

2007

CDO trading exposures and portfolio analysis

Exposures are relatively modest in industry context

Credit Suisse was a market leader in 2000 to 2003, but reduced CDO origination activity in recent years (ranked 11th in 2007)

Now positioned largely as a trading business and actively managed

Reduced originations and active hedging enabled us to navigate challenging 2007 markets

Net exposure ¹⁾ (CHF bn)

1.6

Other focus sectors

We do not rely on monolines in our subprime hedging, in either RMBS or CDO trading

Gross credit exposures of approx. CHF 2 bn with monolines are more than offset by combination of reinsurance, other hedges and trading positions

Monolines

SIVs

Credit Suisse does not sponsor any SIVs

Investment bank has CHF 930 m of gross exposure (mostly undrawn liquidity facilities)

SIV = Structured Investment Vehicles

Slide 35

Asset Management: money market fund repositioning

Gross exposure (CHF bn)

4Q07

CHF m

4Q07

2007

Responded to highly stressed market conditions
affecting money market funds

Bought CHF 9.3 bn of securities from its third party
funds onto Credit Suisse balance sheet

Actions taken to maintain liquidity and to protect client
franchise

Money market funds are now operating normally

No material exposure to SIVs, CDOs or US subprime

Purchased securities caused significant losses

Valuations impacted as mortgage market stress
began to affect higher rated securities

Positions are marked-to-market, and carry typical
discounts to par of 15% to 20%

Portfolio reduced by 58% in 4Q07 and we continue to
reduce/hedge positions

Securities transferred to bank balance sheet

Roll-forward of exposure (CHF bn)

Exposure as of year-end 2007

3,921

Value-at-Risk (VaR)

Broad measure of trading risk, calculated in line with regulatory requirements

Based on historical market data (backward looking)

As 2H07 market swings were absorbed into the model, the VaR for the same positions increased by almost 2x (vs. pre-crisis calibration at mid-year)

When adjusted for model effects, 4Q07 VaR is roughly flat vs. 2Q07 and up 21% vs. 3Q07

Actual trading P&L was more volatile than predicted by VaR in fall 2007 (until new market volatility was incorporated by the model)

As these limitations of VaR are well known, we do not use VaR as part of our planning for stress events

Reported VaR ¹⁾ in CHF m

1) Average one-day 99% VaR;

Does not reflect the valuation reductions from revaluing certain ABS positions in our CDO trading business, as we do not consider the impact of these valuation reductions to be material to our economic capital, position risk, VaR or related trends

Economic Risk Capital (ERC)

Proprietary risk model based on long-term
stress market analysis

Captures all positions on a consistent basis
(incl. market, credit and investment risks)

Assumptions generally held up well, even
vs. 2007 stress levels

ERC declined 10% in 4Q07 as IB worked
down key positions; risk capital coverage
remains strong

Disclosed on quarterly basis to show
portfolio trends

Helped us take action in certain portfolios
(e.g. Leveraged finance) in early 2007

ERC risk breakdown at 4Q07

ERC a broader view of risk

Note: Does not reflect the valuation reductions from revaluing certain ABS positions in our CDO trading business, as we do not consider the impact of these valuation reductions to be material to our economic capital, position risk, VaR or related trends.
