FORWARD-LOOKING STATEMENTS

This quarterly report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements include, among other things, business strategy and expectations concerning industry conditions, market position, future operations, margins, profitability, liquidity and capital resources. Forward-looking statements generally can be identified by the use of terminology such as “may,” “will,” “expect,” “intend,” “estimate,” “anticipate” or “believe” or similar expressions or the negatives thereof. These expectations are based on management’s assumptions and current beliefs based on currently available information. Although the Company believes that the expectations reflected in such statements are reasonable, it can give no assurance that such expectations will be correct. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this quarterly report on Form 10-Q and the Company does not have any obligation to update the forward looking statements. The Company’s operations are subject to a number of uncertainties, risks and other influences, many of which are outside its control, and any one of which, or a combination of which, could cause its actual results of operations to differ materially from the forward-looking statements.

HYDROMER, INC. and CONSOLIDATED SUBSIDIARY**Notes to Condensed Consolidated Financial Statements****Basis of Presentation:**

In the opinion of management, the accompanying unaudited condensed financial statements include all adjustments (consisting of only normal adjustments) necessary for a fair presentation of the results for the interim periods. These condensed financial statements, including notes, have been prepared in accordance with the applicable rules of the Securities and Exchange Commission and do not include all of the information and disclosures required by accounting principles generally accepted in the United States of America. The condensed financial statements should be read in conjunction with the consolidated financial statements and other information contained in our Annual Report on Form 10-K for the year ended June 30, 2012. The condensed balance sheet at June 30, 2012 was derived from audited financial statements but does not include all disclosures required by accounting principles generally accepted in the United States of America.

Segment Reporting:

The Company operates two primary business segments. The Company evaluates the segments by revenues, total expenses and earnings before taxes. Corporate Overhead (primarily the salaries and benefits of senior management, support services (Accounting, Legal, Human Resources and Purchasing) and other shared services (building maintenance and warehousing)) are excluded from the business segments as to not distort the contribution of each segment. These segments are the lowest levels for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities.

The results for the six months ended December 31, by segment are:

	Polymer Research	Medical Products	Corporate Overhead	Total
2012				
Revenues	\$1,944,602	\$653,516		\$2,598,118
Expenses	(1,348,090)	(572,066)	\$(727,959)	(2,648,115)

ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

The Company's revenues for the quarter ended December 31, 2012 were \$1,331,628, \$61,080 or 4.4% lower than the \$1,392,708 for the same period the previous year. For the six month period ended December 31, revenues were \$2,598,118 during the current fiscal year, as compared with \$2,841,305 the year before or \$243,187 lower (8.6%). Revenues are comprised of the sale of Products and Services and Royalty and Contract payments.

Product sales were \$681,321 for the quarter ended December 31, 2012 as compared to \$744,189 for the same period the year before, a \$62,868 (8.5%) decrease primarily due to the timing of periodic (non-monthly) sales and the drop off in T-HEXX Dragonhyde Hoof Bath Concentrate sales in Europe due to the high landed cost the end user is facing. Our recently launched Dragonhyde DUST dissolvable hoof bath powder being released to Europe in 2013 should alleviate that issue. (The recommended usage of Dragonhyde DUST, which can be shipped by regular mail, is a 1 kg pouch as compared with one gallon of Dragonhyde Hoof Bath Concentrate (which weighs approximately 4 kg) which needs special handling.) The majority of the customers that ordered on a periodic basis during the 2011 period also ordered in our fiscal quarter ended June 30, 2012 which meant that their new orders are expected in early 2013. Such sales decrease was offset by an increased demand for our anti-fog condensation control coatings, Cosmetics / Personal Care intermediaries and medical device coatings. For the six month period, product sales were \$1,277,403 for the 2012 period as compared with \$1,501,239 for the 2011 period, lower by \$223,836 (14.9%), all attributable to the T-HEXX Animal Health line.

Services revenues, comprised of contract coating services, for the three months ended December 31, 2011 were \$335,167 or \$36,081 lower (9.7%) than the \$371,248 the corresponding period the year before. For the six month periods ended December 31, 2012 and December 31, 2011, services revenues were \$656,938 and \$721,647, respectively, or \$64,709 lower (9.0%). Customers exiting their respective business on products utilizing our contract coating services plus those converting to their own coating application while becoming a medical chemical polymer purchaser lowered the services revenues as compared with the prior period. These "converted" customers allow for additional revenues from medical device coating [product] sales (as reported above) and Supply and Support Agreements (see Royalty and Contract revenues following).

Classified as Royalty and Contract revenues are royalties received and the periodic recurring payments from license, stand still and other agreements other than for product and services, including revenues from support and supply agreements (which avails our customers to continued technical support and/or guaranteed access to our proprietary coatings) and may include the transfer of technical know-how (coatings procedures). Some of the royalties and support fees are based on the net sales of the final item (to which the Hydromer technology is applied) and are subject to the reporting of our customers. For the six months ended December 31, 2012, Royalty and Contract revenues were \$663,777, compared to \$618,419 the same period a year ago, an increase of \$45,358 (7.3%), a result of a new customer converting to Hydromer coatings under a royalty agreement.

Total Expenses for the quarter ended December 31, 2012 were \$1,298,255 as compared with \$1,467,794 the year before, a 11.6% decrease. For the six months ended December 31, 2012, Total Expenses were \$2,642,567 as compared with \$3,002,580 the previous year, a 12.0% decrease.

Reducing Total Expenses and included in Other Income for the quarter ended December 31, 2012 was \$115,344 in income recognized of the proceeds from the Company's insurance carrier, a mutual company having no shareholders, making distributions from it being acquired. There will be additional periodic payments which the Company will include in Other Income.

For the quarter ended December 31, 2012, the Company's Cost of Goods Sold was \$405,097 as compared with \$422,119 the year prior, lower by \$17,022 or 4.0%, a result of the lower product sales. For the six month period ended December 31, 2012, Cost of Goods Sold was \$765,246 as compared with \$838,131 the same period a year ago. The \$72,885 decrease (8.7%) was due to lower product sales.

Operating Expenses were \$938,745 for the quarter ended December 31, 2012 as compared to \$1,037,556 the year before, lower by \$98,811 or 9.5%, due to lower staffing levels this year. For the six months ended December 31, 2012, Operating Expenses were \$1,900,213 or \$242,668 lower (11.3%) than the previous year's \$2,142,881, primarily due to operating on a lower staffing level.

In addition to the one time \$115,344 distribution recognized as income, Other Income / Expenses includes interest expense, foreign currency exchange gains/losses and interest income. Interest expense (primarily mortgage interest) for the six months ended December 31, 2012 and December 31, 2011 was \$97,201 and \$98,743, respectively.

Net income of \$33,373 (\$0.01 per share) is reported for the quarter ended December 31, 2012 as compared to a net loss of \$75,086 (\$0.02 per share) the year before. For the six months ended December 31, 2012, a net loss of \$44,449 (\$0.01 per share) is reported as compared to a net loss of \$161,275 (\$0.03 per share) the year before.

Maintaining or reducing expenses is part of the Company's strategy in its return to profitability. Along with revenue increases (due to new products or the market penetration of current products), the Company expects to achieve profitability. While we did not see a net growth in revenue during the current period (as compared with the prior year), we expect that to occur soon.

Financial Condition

Working capital decreased \$40,641 during the six months ended December 31, 2012.

For the six months ended December 31, 2012, operating activities provided \$153,236 in net cash.

The net loss, as adjusted for non-cash expenses of depreciation and amortization and deferred income taxes, provided \$145,970 in cash. The net change in operating assets and liabilities provided an additional \$7,266 in cash. Reductions to accounts receivable and prepaid expenses were offset by the increase to other assets (the distribution by the insurance carrier, which was received in mid-January 2013).

Investing activities used \$110,644 and financing activities used \$28,628 during the six months ended December 31, 2012.

Investing activities for the six months ended December 31, 2012 included \$28,667 for capital expenditures and \$81,977 towards the Company's patent estate. Under Financing activities was the repayment of the principal portion of

the mortgage.

The Company is nearing a return to profitability. Cost management and revenue growth are the key factors and while we did not reach the same revenue levels achieved a year ago, it is certainly within reach. During the past few years, the Company's R&D resources were dedicated to its T-HEXX Animal Health product line as that could yield the quickest revenue return (as compared with the much longer term human medical product line). Some of the recent developments in the T-HEXX product line are being rolled out into the market.

Item 4 Controls and Procedures

As of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and President and the Chief Financial Officer, of the effectiveness of the design and operation of the disclosure controls and procedures.

Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, our disclosure controls and procedures were effective and that there were no changes to our Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect the Company's internal control over financial reporting during the period covered by the Company's quarterly report.

PART II – Other Information

The Company operates entirely from its sole location at 35 Industrial Parkway in Branchburg, New Jersey, an owned facility secured by a mortgage through a bank.

The existing facility will be adequate for the Company's operations for the foreseeable future.
