Registration Statement No. 333-219206

Leveraged Buffered S&P 500<sup>®</sup> Index-Linked Notes due

The notes do not bear interest. The amount that you will be paid on your notes on the stated maturity date (expected to be September 30, 2021) is based on the performance of the S&P 500<sup>®</sup> Index as measured from the trade date (expected to be March 26, 2019) to and including the determination date (expected to be September 27, 2021).

If the final underlier level on the determination date is greater than the initial underlier level (set on the trade date), the return on your notes will be positive and will equal 2 times the underlier return, subject to the maximum settlement amount (expected to be between \$1,205 and \$1,235 for each \$1,000 face amount of your notes).

If the final underlier level is greater than the initial underlier level, you will not receive more than the maximum settlement amount, regardless of how much the final underlier level increases as compared to the initial underlier level.

If the final underlier level declines by up to 10% from the initial underlier level, you will receive the face amount of your notes. If the final underlier level declines by more than 10% from the initial underlier level, the return on your notes will be negative and will equal the underlier return plus 10%.

You could lose a significant portion of the face amount of your notes.

guaranteed by

The Goldman Sachs Group, Inc.

The notes do not bear interest. The amount that you will be paid on your notes on the stated maturity date (expected to be September 30, 2021) is based on the performance of the S&P 500<sup>®</sup> Index as measured from the trade date (expected to be March 26, 2019) to and including the determination date (expected to be September 27, 2021).

If the final index level on the determination date is greater than the initial index level (set on the trade date), the return on your notes will be positive and will equal 2 times the index return, subject to the maximum settlement amount (expected to be between \$1,205 and \$1,235 for each \$1,000 face amount of your notes).

If the final index level declines by up to 10% from the initial index level, you will receive the face amount of your notes. If the final index level declines by more than 10% from the initial index level, the return on your notes will be negative and will equal the index return plus 10%. You could lose a significant portion of the face amount of your notes.

To determine your payment at maturity, we will calculate the index return, which is the percentage increase or decrease in the final index level from the initial index level. At maturity, for each \$1,000 face amount of your notes, you will receive an amount in cash equal to:

if the index return is positive (the final index level is greater than the initial index level), the sum of (i) \$1,000 plus (ii) the product of (a) \$1,000 times (b) 2 times (c) the index return, subject to the maximum settlement amount;

if the index return is zero or negative but not below -10% (the final index level is equal to the initial index level or is less than the initial index level, but not by more than 10%), \$1,000; or  
if the index return is negative and is below -10% (the final index level is less than the initial index level by more than 10%), the sum of (i) \$1,000 plus (ii) the product of (a) the sum of the index return plus 10% times (b) \$1,000. You will receive less than the face amount of your notes.

You should read the disclosure herein to better understand the terms and risks of your investment, including the credit risk of GS Finance Corp. and The Goldman Sachs Group, Inc. See page PS-12.

The estimated value of your notes at the time the terms of your notes are set on the trade date is expected to be between \$930 and \$970 per \$1,000 face amount. For a discussion of the estimated value and the price at which Goldman Sachs & Co. LLC would initially buy or sell your notes, if it makes a market in the notes, see the following page.

### Estimated Value of Your Notes

The estimated value of your notes at the time the terms of your notes are set on the trade date (as determined by reference to pricing models used by Goldman Sachs & Co. LLC (GS&Co.) and taking into account our credit spreads) is expected to be between \$930 and \$970 per \$1,000 face amount, which is less than the original issue price. The value of your notes at any time will reflect many factors and cannot be predicted; however, the price (not including GS&Co.'s customary bid and ask spreads) at which GS&Co. would initially buy or sell notes (if it makes a market, which it is not obligated to do) and the value that GS&Co. will initially use for account statements and otherwise is equal to approximately the estimated value of your notes at the time of pricing, plus an additional amount (initially equal to \$     per \$1,000 face amount).

Prior to     , the price (not including GS&Co.'s customary bid and ask spreads) at which GS&Co. would buy or sell your notes (if it makes a market, which it is not obligated to do) will equal approximately the sum of (a) the then-current estimated value of your notes (as determined by reference to GS&Co.'s pricing models) plus (b) any remaining additional amount (the additional amount will decline to zero on a straight-line basis from the time of pricing through     ). On and after     , the price (not including GS&Co.'s customary bid and ask spreads) at which GS&Co. would buy or sell your notes (if it makes a market) will equal approximately the then-current estimated value of your notes determined by reference to such pricing models.
