**AMERISERV FINANCIAL REPORTS FIFTH CONSECUTIVE QUARTER OF PROFITABILITY AND REDUCED NON-PERFORMING ASSETS**

JOHNSTOWN, PA AmeriServ Financial, Inc. (NASDAQ: ASRV) completed its fifth consecutive quarter of profitability by reporting net income for the second quarter of 2004 of \$254,000 or \$0.02 per diluted share. For the six month period ended June 30, 2004, the Company has now earned \$480,000 or \$0.03 per diluted share which represents an increase over the net income of \$120,000 or \$0.01 per diluted share reported for the six month period ended June 30, 2003. The following table highlights the Company's financial performance for both the three and six month periods ended June 30, 2004 and 2003:

	Second Quarter 2004	Second Quarter 2003	Six Months Ended June 30, 2004	Six Months Ended June 30, 2003
Net income	\$254,000	\$915,000	\$480,000	\$120,000
Diluted earnings per share	0.02	0.07	0.03	0.01

Allan R. Dennison, President and Chief Executive Officer, commented, "The AmeriServ Turnaround continues in spite of the volatility of financial markets. We are pleased to see progress in deposit growth, the slowing of erosion in the loan portfolio, the decline in the level of non-performing assets, and the decline in non-interest expense. In the few months since I have joined the Company, I am impressed with the commitment of our employees to maintain our focus as a community bank and to take the necessary steps to improve the performance of this Company."

The Company's provision for loan losses totaled \$259,000 or 0.21% of total loans in the second quarter of 2004. This represented a decrease of \$275,000 from the second quarter 2003 provision of \$534,000 or 0.40% of total loans. For the first six months of 2004, the Company's provision for loan losses totaled \$643,000 or 0.26% of total loans, a decrease of \$1.6 million from the provision of \$2.2 million or 0.80% of total loans recorded in the first six months of 2003. Net charge-offs in the first half of 2004 totaled \$1.2 million or 0.48% of total loans compared to net charge-offs of \$312,000 or 0.11% of total loans in the first half of 2003. The higher net charge-offs in the first six months of 2004 reflect a \$625,000 write-down of a \$4.8 million loan on a personal care facility that was moved into other real estate owned and increased charge-offs on small business commercial loans. Overall, however, the lower provision for loan losses in 2004 reflects improvements in asset quality most evidenced by lower levels of classified loans and non-performing assets. While the Company is pleased with this early improvement in asset quality, it continues to closely monitor the portfolio given its existing level of non-performing assets and problem credits.

Non-performing assets totaled \$10.2 million at June 30, 2004, which represented a decrease of \$3.3 million or 24.7% from the March 31, 2004 level of \$13.5 million. This decline resulted primarily from successful work-out efforts on problem credits which included the collection of over \$2 million on the personal care facility housed in other real estate owned. The Company's allowance for loan losses totaled \$10.9 million at June 30, 2004 providing 108% coverage of non-performing assets. Overall, the allowance for loan losses as a percentage of total loans amounted to 2.18% at June 30, 2004 compared to 2.32% at December 31, 2003, and 2.27% at June 30, 2003.

The Company's net interest income in the second quarter of 2004 decreased by \$521,000 from the prior year second quarter and for the first six months of 2004 declined by \$956,000 when compared to the first six months of 2003. This decline resulted from a reduced level of earning assets and a 13 basis point drop in the net interest margin to 2.32% for the first half of 2004. Loan portfolio shrinkage experienced during the majority of 2003 was a predominant factor contributing to both the lower level of earning assets and the net interest margin contraction. While the Company has generated increased new commercial loan production in 2004, the effects of heightened pay-offs continue to constrain the size of total loans outstanding. A strategic focus on deposit generation has caused the Company to experience a rebuilding and growth of deposits since the low point reached in the third quarter of 2003.

The Company's total non-interest income declined by approximately \$1.5 million when both the second quarter and first six months of 2004 are compared to the same 2003 periods. Fewer gains realized on asset sales was the primary factor responsible for the lower non-interest income in 2004. Specifically, gains realized on the sale of investment securities dropped by \$1.3 million in the second quarter of 2004 and by \$1.7 million for the six month period due to the higher interest rate environment in place in 2004. This higher rate environment in 2004 also had a negative impact on new residential mortgage origination and refinance volumes as gains realized on the sale of mortgage loans into the secondary market decreased by \$106,000 in the second quarter and \$239,000 for the six month period ended June 30, 2004. This lower level of new mortgage origination activity in 2004 was also the main factor responsible for the decrease in other non-interest income. These negative items were partially offset by a \$108,000 or 4.3% increase in

trust fees due to continued successful union related new business development efforts. Also the Company benefited from the non-recurrence of a \$758,000 loss on the sale of approximately 70% of its mortgage-servicing portfolio in the first quarter of 2003. This significant downsizing of the mortgage-servicing asset reduced the level of interest rate risk and earnings volatility of the Company.

The Company's non-interest expense in the second quarter of 2004 favorably decreased by \$830,000 from the prior year second quarter and for the first six months of 2004 declined by \$1.3 million when compared to the first six months of 2003. The largest factor causing the six month decrease was a net favorable change of \$784,000 in the impairment charge on mortgage servicing rights as the higher interest rate environment and reduced mortgage refinancing activity caused an improvement in the value of the Company's remaining mortgage servicing rights. The Company also benefited from the non-recurrence in 2004 of a \$199,000 goodwill impairment loss associated with the write-off of all goodwill within the mortgage-banking segment in the first quarter of 2003. Excluding these impairment related charges, the remaining total non-interest expenses were still down by \$296,000 between the first half of 2003 and first half of 2004 reflecting the Company's continued focus on reducing and containing expenses. Expense reductions were experienced in numerous categories including equipment expense, professional fees, and other expenses.

At June 30, 2004, ASRV had total assets of \$1.178 billion and shareholders' equity of \$67 million or \$4.81 per share. The Company is well capitalized for regulatory purposes with an asset leverage ratio at June 30, 2004 of 7.71%, compared to a regulatory minimum of 5.0%.

AmeriServ Financial, Inc., is the parent of AmeriServ Financial Bank and AmeriServ Trust & Financial Services in Johnstown, AmeriServ Associates of State College, and AmeriServ Life Insurance Company.

This news release may contain forward-looking statements that involve risks and uncertainties, including the risks detailed in the Company's Annual Report and Form 10-K to the Securities and Exchange Commission as defined in the Private Securities Litigation Reform Act of 1995. Actual results may differ materially.
