Item 8.01. Other Events

In 2014, Public Service Company of Colorado (PSCo), a wholly owned subsidiary of Xcel Energy Inc., filed an electric rate case in Colorado with the Colorado Public Utilities Commission (CPUC) for an overall increase in annual revenue of approximately \$136.0 million, or 4.83 percent. The requested 2015 rate increase reflects approximately \$100.9 million for recovery of costs associated with the Clean Air Clean Jobs Act (CACJA) project. The case also requests the initiation of a CACJA rider for 2016 and 2017, which is anticipated to increase revenue recovery by approximately \$34.2 million in 2016 and then decline to approximately \$29.9 million in 2017. PSCo's objective is to establish a multi-year regulatory plan that provides certainty for PSCo and its customers.

The rate filing is based on a 2015 test year, a requested return on equity (ROE) of 10.35 percent, an electric rate base of \$6.39 billion and an equity ratio of 56 percent. As part of the filing, PSCo will transfer approximately \$19.9 million from the transmission rider to base rates, which will not impact customer bills. The CACJA rider is projected to recover incremental investment and expenses, based on a comprehensive plan to retire certain coal plants, add pollution control equipment to other existing coal units and add natural gas generation. The CACJA project investment is expected to be completed by 2017.

On Nov. 7, 2014, several parties filed answer testimony, including the CPUC Staff (Staff) and the Office of Consumer Counsel (OCC).

The Staff and OCC's recommendations and the estimated impact on PSCo's filed electric rate case are as follows:

2015 Rate Request (Millions of Dollars)	Staff	OCC
PSCo's filed rate request	\$136.0	\$136.0
Transfer from transmission rider to base rates	19.9	19.9
PSCo's filed revenue requirement deficiency	155.9	155.9
Lower ROE	(69.1)	(66.5)
Capital structure	(20.9)	(23.7)
Rate base adjustments (largely the removal of prepaid pension asset)	(20.8)	2.3
Adjustment to a historic test year	(82.5)	(82.5)
Adjustment to use 13-month average rate base	(26.1)	(22.0)
Rate base adjustments for known and measurable plant through September 2014	21.9	—
Operation and maintenance expense adjustments	(7.2)	(16.6)
Depreciation	—	(3.8)
Property taxes	—	(12.1)
Remove CACJA from base rates	(62.4)	—
Other, net	0.1	0.1
Total recommendation 2015	\$(111.1)	\$(68.9)
CACJA rider mechanism	54.2	—
Net rate reduction	\$(56.9)	\$(68.9)

The Staff's position is based on an ROE of 9.11 percent and a 51.24 percent equity ratio. The Staff also recommended deferred accounting treatment for property taxes and an adjustment to PSCo's recovery of pension expense and the existing prepaid pension asset. In addition, the Staff proposed that costs associated with the CACJA project be recovered through a rider mechanism. The OCC recommended an ROE of 9.10 percent, a 52.70 percent equity ratio and that a portion of the costs associated with the CACJA project be recovered in base rates and the remainder through a rider mechanism.

A number of the recommendations by the parties deviate from previously established and recently affirmed CPUC precedent, including the basis for determination of ROE (the Staff recommended the low end of their range of

reasonableness), capital structure and the inclusion of the prepaid pension asset in rate base. In addition, PSCo is currently validating certain numbers that were not clear in the intervenors' cost of service and riders. The parties will meet for settlement discussions over the next several weeks.

The next steps in the procedural schedule are expected to be as follows:

- Rebuttal Testimony — Dec. 17, 2014;
 - Evidentiary Hearing — Jan. 26 - Feb. 4, 2015;
 - Interim rates are scheduled to be effective on Feb. 13, 2015, subject to refund; and
 - A decision as well as implementation of final rates are anticipated in the second quarter of 2015.
