

First Bancorp, Inc /ME/
Form 10-K
March 12, 2010

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of The Securities Exchange Act of 1934
For the Fiscal Year ended December 31, 2009

Commission File Number 0-26589

THE FIRST BANCORP, INC.
(Exact name of Registrant as specified in its charter)

MAINE
(State or other jurisdiction of incorporation or organization)

01-0404322
(I.R.S. Employer Identification No.)

MAIN STREET, DAMARISCOTTA, MAINE
(Address of principal executive offices)

04543
(Zip code)

(207) 563-3195
Registrant's telephone number, including area code

Securities registered pursuant to Section 12(g) of the Act:
Common Stock

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.
Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):
Large accelerated filer Accelerated filer Non-accelerated filer

Edgar Filing: First Bancorp, Inc /ME/ - Form 10-K

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter.

Common Stock: \$170,925,000

Indicate the number of shares outstanding of each of the registrant's classes of common stock as of March 12, 2010

Common Stock: 9,751,475 shares

ITEM 1. Discussion of Business

The First Bancorp, Inc. (the “Company”) was incorporated under the laws of the State of Maine on January 15, 1985, for the purpose of becoming the parent holding company of The First National Bank of Damariscotta, which was chartered as a national bank under the laws of the United States on May 30, 1864. At the Company’s Annual Meeting of Shareholders on April 30, 2008, the Company’s name was changed from First National Lincoln Corporation to The First Bancorp, Inc. On January 14, 2005, the acquisition of FNB Bankshares (“FNB”) of Bar Harbor, Maine, was completed, adding seven banking offices and one investment management office in Hancock and Washington counties of Maine. FNB’s subsidiary, The First National Bank of Bar Harbor, was merged into The First National Bank of Damariscotta at closing, and since January 31, 2005, the combined banks have operated under a new name: The First, N.A. (the “Bank”).

As of December 31, 2009, the Company’s securities consisted of one class of common stock, one class of preferred stock, and stock warrants. At that date, there were 9,744,170 shares of common stock outstanding. In addition, there were 25,000 shares of cumulative perpetual preferred stock outstanding with a preference value of \$1,000 per share, all of which were issued to the U.S. Treasury under its Capital Purchase Program (the “CPP Shares”). Incident to the issuance of the CPP Shares, the Company has issued to the U.S. Treasury warrants to purchase up to 225,904 shares of the Company’s common stock at a price per share of \$16.60 (the “Warrants”). The CPP Shares and the Warrants (and any shares of common stock issuable pursuant to the Warrants) are freely transferable by the U.S. Treasury to third parties and the Company has filed a registration statement with the Securities and Exchange Commission to allow for possible resale of such securities.

The common stock and preferred stock of the Bank are the principal assets of the Company, which has no other subsidiaries. The Bank’s capital stock consists of one class of common stock of which 120,000 shares, par value \$2.50 per share, are authorized and outstanding, and one class of non-cumulative perpetual preferred stock, \$1,000 preference value, of which 25,000 shares are authorized and outstanding. All of the Bank’s common stock and preferred stock is owned by the Company.

The Bank emphasizes personal service, and customers are primarily small businesses and individuals for whom the Bank offers a wide variety of services, including deposit accounts, consumer and commercial and mortgage loans. The Bank has not made any material changes in its mode of conducting business during the past five years. The banking business in the Bank’s market area is seasonal with lower deposits in the winter and spring and higher deposits in the summer and fall. This swing is predictable and has not had a materially adverse effect on the Bank.

In addition to traditional banking services, the Company provides investment management and private banking services through First Advisors, which is an operating division of the Bank. First Advisors is focused on taking advantage of opportunities created as the larger banks have altered their personal service commitment to clients not meeting established account criteria. First Advisors is able to offer a comprehensive array of private banking, financial planning, investment management and trust services to individuals, businesses, non-profit organizations and municipalities of varying asset size, and to provide the highest level of personal service. The staff includes investment and trust professionals with extensive experience.

The financial services landscape has changed considerably over the past five years in the Bank’s primary market area. Two large out-of-state banks have continued to experience local change as a result of mergers and acquisitions at the regional and national level. Credit unions have continued to expand their membership and the scope of banking services offered. Non-banking entities such as brokerage houses, mortgage companies and insurance companies are offering very competitive products. Many of these entities and institutions have resources substantially greater than those available to the Bank and are not subject to the same regulatory restrictions as the Company and the Bank. In November of 1999, Congress adopted the Gramm-Leach-Bliley Financial Modernization Act (“GLBA”). This legislation breaks down the firewalls separating related businesses in order to create more competition and a level playing field in the financial services sector. GLBA eliminated depression-era restrictions which separate the business of banking from the businesses of insurance and securities underwriting, and also resulted in modifications to protect consumers and streamline regulation. While the Company views this legislation as an opportunity to offer a more

comprehensive range of financial products and services, at the same time it has provided additional competition in the marketplace.

The Company believes that there will continue to be a need for a bank in the Bank's primary market area with local management having decision-making power and emphasizing loans to small and medium-sized businesses and to individuals. The Bank has concentrated on extending business loans to such customers in the Bank's primary market area and to extending investment and trust services to clients with accounts of all sizes. The Bank's Management also makes decisions based upon, among other things, the knowledge of the Bank's employees regarding the communities and customers in the Bank's primary market area. The individuals employed by the Bank, to a large extent, reside near

The First Bancorp 2009 Form 10-k

the branch offices and thus are generally familiar with their communities and customers. This is important in local decision-making and allows the Bank to respond to customer questions and concerns on a timely basis and fosters quality customer service.

The Bank has worked and will continue to work to position itself to be competitive in its market area. The Bank's ability to make decisions close to the marketplace, Management's commitment to providing quality banking products, the caliber of the professional staff, and the community involvement of the Bank's employees are all factors affecting the Bank's ability to be competitive.

Supervision and Regulation

The Company is a financial holding company within the meaning of the Bank Holding Company Act of 1956, as amended (the "Act"), and section 225.82 of Regulation Y issued by the Board of Governors of the Federal Reserve System (the "Federal Reserve Board"), and is required to file with the Federal Reserve Board an annual report and other information required pursuant to the Act. The Company is subject to examination by the Federal Reserve Board. The Act requires the prior approval of the Federal Reserve Board for a financial holding company to acquire or hold more than a 5% voting interest in any bank, and controls interstate banking activities. The Act restricts The First Bancorp's non-banking activities to those which are determined by the Federal Reserve Board to be closely related to banking. The Act does not place territorial restrictions on the activities of non-bank subsidiaries of financial holding companies. Virtually all of the Company's cash revenues are generally derived from dividends paid to the Company by the Bank. These dividends are subject to various legal and regulatory restrictions which are summarized in Note 19 to the accompanying financial statements. The Bank is regulated by the Office of the Comptroller of the Currency ("OCC") and is subject to the provisions of the National Bank Act. As a result, it must meet certain liquidity and capital requirements, which are discussed in the following sections.

Customer Information Security

The Federal Deposit Insurance Corporation ("FDIC"), the OCC and other bank regulatory agencies have published guidelines establishing standards for safeguarding nonpublic personal information about customers that implement provisions of the GLBA (the "Guidelines"). Among other things, the Guidelines require each financial institution, under the supervision and ongoing oversight of its Board of Directors or an appropriate committee thereof, to develop, implement and maintain a comprehensive written information security program designed to ensure the security and confidentiality of customer information, to protect against any anticipated threats or hazards to the security or integrity of such information, and to protect against unauthorized access to or use of such information that could result in substantial harm or inconvenience to any customer.

Privacy

The FDIC, the OCC and other regulatory agencies have published privacy rules pursuant to provisions of the GLBA ("Privacy Rules"). The Privacy Rules, which govern the treatment of nonpublic personal information about consumers by financial institutions, require a financial institution to provide notice to customers (and other consumers in some circumstances) about its privacy policies and practices, describe the conditions under which a financial institution may disclose nonpublic personal information to nonaffiliated third parties, and provide a method for consumers to prevent a financial institution from disclosing that information to most nonaffiliated third parties by "opting-out" of that disclosure, subject to certain exceptions.

USA Patriot Act

The USA Patriot Act of 2001, designed to deny terrorists and others the ability to obtain anonymous access to the U.S. financial system, has significant implications for depository institutions, broker-dealers and other businesses involved in the transfer of money. The USA Patriot Act, together with the implementing regulations of various federal regulatory agencies, have caused financial institutions, including the Bank, to adopt and implement additional or

Edgar Filing: First Bancorp, Inc /ME/ - Form 10-K

amend existing policies and procedures with respect to, among other things, anti-money laundering compliance, suspicious activity and currency transaction reporting, customer identity verification and customer risk analysis. The statute and its underlying regulations also permit information sharing for counter-terrorist purposes between federal law enforcement agencies and financial institutions, as well as among financial institutions, subject to certain conditions, and require the Federal Reserve Board (and other federal banking agencies) to evaluate the effectiveness of an applicant in combating money laundering activities when considering applications filed under Section 3 of the Act or under the Bank Merger Act.

The First Bancorp 2009 Form 10-k

Page 2

The Sarbanes-Oxley Act

The Sarbanes-Oxley Act of 2002 (“SOX”) implements a broad range of corporate governance and accounting measures for public companies (including publicly-held bank holding companies such as the Company) designed to promote honesty and transparency in corporate America and better protect investors from the type of corporate wrongdoings that occurred at Enron and WorldCom, among other companies. SOX’s principal provisions, many of which have been implemented through regulations released and policies and rules adopted by the securities exchanges in 2003 and 2004, provide for and include, among other things:

- The creation of an independent accounting oversight board;
- Auditor independence provisions which restrict non-audit services that accountants may provide to clients;
- Additional corporate governance and responsibility measures, including the requirement that the chief executive officer and chief financial officer of a public company certify financial statements;
- The forfeiture of bonuses or other incentive-based compensation and profits from the sale of an issuer’s securities by directors and senior officers in the twelve-month period following initial publication of any financial statements that later require restatement;
- An increase in the oversight of, and enhancement of certain requirements relating to, audit committees of public companies and how they interact with the public company’s independent auditors;
- Requirements that audit committee members must be independent and are barred from accepting consulting, advisory or other compensatory fees from the issuer;
- Requirements that companies disclose whether at least one member of the audit committee is a ‘financial expert’ (as such term is defined by the Securities and Exchange Commission (“SEC”)) and if not, why not;
- Expanded disclosure requirements for corporate insiders, including accelerated reporting of stock transactions by insiders and a prohibition on insider trading during pension blackout periods;
- A prohibition on personal loans to directors and officers, except certain loans made by insured financial institutions, such as the Bank, on nonpreferential terms and in compliance with bank regulatory requirements;
 - Disclosure of a code of ethics and filing a Form 8-K in the event of a change or waiver of such code; and
 - A range of enhanced penalties for fraud and other violations.

The Company complies with the provisions of SOX and its underlying regulations. Management believes that such compliance efforts have strengthened the Company’s overall corporate governance structure and does not expect that such compliance has to date had, or will in the future have, a material impact on the Company’s results of operations or financial condition.

Capital Requirements and FDICIA

The OCC has established guidelines with respect to the maintenance of appropriate levels of capital by FDIC-insured banks. The Federal Reserve Board has established substantially identical guidelines with respect to the maintenance of appropriate levels of capital, on a consolidated basis, by bank holding companies. If a banking organization’s capital levels fall below the minimum requirements established by such guidelines, a bank or bank holding company will be expected to develop and implement a plan acceptable to the FDIC or the Federal Reserve Board, respectively, to achieve adequate levels of capital within a reasonable period, and may be denied approval to acquire or establish additional banks or non-bank businesses, merge with other institutions or open branch facilities until such capital levels are achieved. Federal regulations require federal bank regulators to take “prompt corrective action” with respect to insured depository institutions that fail to satisfy minimum capital requirements and imposes significant restrictions on such institutions. See “Prompt Corrective Action” below.

Leverage Capital Ratio

The regulations of the OCC require national banks to maintain a minimum “Leverage Capital Ratio” or “Tier 1 Capital” (as defined in the Risk-Based Capital Guidelines discussed in the following paragraphs) to Total Assets of 4.0%. Any bank experiencing or anticipating significant growth is expected to maintain capital well above the minimum levels. The Federal Reserve Board’s guidelines impose substantially similar leverage capital requirements on bank holding

companies on a consolidated basis. It is possible that banking regulators may increase minimum capital requirements for banks should the current economic situation persist or worsen.

Risk-Based Capital Requirements

OCC regulations also require national banks to maintain minimum capital levels as a percentage of a bank's risk-adjusted assets. A bank's qualifying total capital ("Total Capital") for this purpose may include two components: "Core" (Tier 1) Capital and "Supplementary" (Tier 2) Capital. Core Capital consists primarily of common stockholders' equity, which generally includes common stock, related surplus and retained earnings, certain non-cumulative perpetual preferred stock and related surplus, and minority interests in the equity accounts of consolidated subsidiaries, and

The First Bancorp 2009 Form 10-k

(subject to certain limitations) mortgage servicing rights and purchased credit card relationships, less all other intangible assets (primarily goodwill). Supplementary Capital elements include, subject to certain limitations, a portion of the allowance for loan losses, perpetual preferred stock that does not qualify for inclusion in Tier 1 capital, long-term preferred stock with an original maturity of at least 20 years and related surplus, certain forms of perpetual debt and mandatory convertible securities, and certain forms of subordinated debt and intermediate-term preferred stock.

The risk-based capital rules assign a bank's balance sheet assets and the credit equivalent amounts of the bank's off-balance sheet obligations to one of four risk categories, weighted at 0%, 20%, 50% or 100%, as applicable. Applying these risk-weights to each category of the bank's balance sheet assets and to the credit equivalent amounts of the bank's off-balance sheet obligations and summing the totals results in the amount of the bank's total Risk-Adjusted Assets for purposes of the risk-based capital requirements. Risk-Adjusted Assets can either exceed or be less than reported balance sheet assets, depending on the risk profile of the banking organization. Risk-Adjusted Assets for institutions such as the Bank will generally be less than reported balance sheet assets because its retail banking activities include proportionally more residential mortgage loans, many of its investment securities have a low risk weighting and there is a relatively small volume of off-balance sheet obligations.

The risk-based capital regulations require all banks to maintain a minimum ratio of Total Capital to Risk-Adjusted Assets of 8.0%, of which at least one-half (4.0%) must be Core (Tier 1) Capital. For the purpose of calculating these ratios: (i) a banking organization's Supplementary Capital eligible for inclusion in Total Capital is limited to no more than 100% of Core Capital; and (ii) the aggregate amount of certain types of Supplementary Capital eligible for inclusion in Total Capital is further limited. For example, the regulations limit the portion of the allowance for loan losses eligible for inclusion in Total Capital to 1.25% of Risk-Adjusted Assets. The Federal Reserve Board has established substantially identical risk-based capital requirements, which are applied to bank holding companies on a consolidated basis. The risk-based capital regulations explicitly provide for the consideration of interest rate risk in the overall evaluation of a bank's capital adequacy to ensure that banks effectively measure and monitor their interest rate risk, and that they maintain capital adequate for that risk. A bank deemed by its federal banking regulator to have excessive interest rate risk exposure may be required to maintain additional capital (that is, capital in excess of the minimum ratios discussed above). The Bank believes, based on its level of interest rate risk exposure, that this provision will not have a material adverse effect on it.

On January 9, 2009, the Company received \$25 million from a preferred stock issuance of 25,000 shares under the U.S. Treasury Capital Purchase Program (the "CPP Shares") at a purchase price of \$1,000 per share. The CPP Shares call for cumulative dividends at a rate of 5.0% per year for the first five years, and at a rate of 9.0% per year in following years, payable quarterly in arrears on February 15, May 15, August 15 and November 15 of each year. Incident to such issuance, the Company issued to the U.S. Treasury warrants (the "Warrants") to purchase up to 225,904 shares of the Company's common stock at a price per share of \$16.60 (subject to adjustment). The CPP Shares and the related Warrants (and any shares of common stock issuable pursuant to the Warrants) are freely transferable by the U.S. Treasury to third parties and the Company has filed a registration statement with the SEC to allow for possible resale of such securities. The CPP Shares qualify as Tier 1 capital on the Company's books for regulatory purposes and rank senior to the Company's common stock and senior or at an equal level in the Company's capital structure to any other shares of preferred stock the Company may issue in the future. The Company may redeem the CPP Shares at any time using any funds available to the Company, and any redemption would be subject to the prior approval of the Federal Reserve Bank of Boston. The minimum amount that may be redeemed is 25% of the original CPP investment. The CPP Shares are "perpetual" preferred stock, which means that neither the U.S. Treasury nor any subsequent holder would have a right to require that the Company redeem any of the shares.

On December 31, 2009, the Company's consolidated Total and Tier 1 Risk-Based Capital Ratios were 14.96% and 13.70%, respectively, and its Leverage Capital Ratio was 9.44%. Based on the above figures and accompanying discussion, the Company exceeds all regulatory capital requirements and is considered well capitalized.

Prompt Corrective Action

The Federal Deposit Insurance Corporation Improvement Act of 1991 (“FDICIA”) requires, among other things, that the federal banking regulators take “prompt corrective action” with respect to, and imposes significant restrictions on, any bank that fails to satisfy its applicable minimum capital requirements. FDICIA establishes five capital categories consisting of “well capitalized,” “adequately capitalized,” “undercapitalized,” “significantly undercapitalized” and “critically undercapitalized.” Under applicable regulations, a bank that has a Total Risk-Based Capital Ratio of 10.0% or greater, a Tier 1 Risk-Based Capital Ratio of 6.0% or greater and a Leverage Capital Ratio of 5.0% or greater, and is not subject to any written agreement, order, capital directive or prompt corrective action directive to meet and maintain a specific capital level for any capital measure is deemed to be “well capitalized.” A bank that has a Total Risk-Based Capital Ratio of 8.0% or greater, a Tier 1 Risk-Based Capital Ratio of 4.0% or greater and a Leverage Capital Ratio of 4.0% (or 3% for banks with the highest regulatory examination rating that are not experiencing or anticipating

The First Bancorp 2009 Form 10-k

Page 4

significant growth or expansion) or greater and does not meet the definition of a well capitalized bank is considered to be “adequately capitalized.” A bank that has a Total Risk-Based Capital Ratio of less than 8.0% or has a Tier 1 Risk-Based Capital Ratio that is less than 4.0%, except as noted above, a Leverage Capital Ratio of less than 4.0% is considered “undercapitalized.” A bank that has a Total Risk-Based Capital Ratio of less than 6.0%, or a Tier 1 Risk-Based Capital Ratio that is less than 3.0% or a Leverage Capital Ratio that is less than 3.0% is considered to be “significantly undercapitalized,” and a bank that has a ratio of tangible equity to total assets equal to or less than 2% is deemed to be “critically undercapitalized.” A bank may be deemed to be in a capital category lower than is indicated by its actual capital position if it is determined to be in an unsafe or unsound condition or receives an unsatisfactory examination rating. FDICIA generally prohibits a bank from making capital distributions (including payment of dividends) or paying management fees to controlling stockholders or their affiliates if, after such payment, the bank would be undercapitalized.

Under FDICIA and the applicable implementing regulations, an undercapitalized bank will be (i) subject to increased monitoring by its primary federal banking regulator; (ii) required to submit to its primary federal banking regulator an acceptable capital restoration plan (guaranteed, subject to certain limits, by the bank’s holding company) within 45 days of being classified as undercapitalized; (iii) subject to strict asset growth limitations; and (iv) required to obtain prior regulatory approval for certain acquisitions, transactions not in the ordinary course of business, and entries into new lines of business. In addition to the foregoing, the primary federal banking regulator may issue a “prompt corrective action directive” to any undercapitalized institution. Such a directive may (i) require sale or re-capitalization of the bank, (ii) impose additional restrictions on transactions between the bank and its affiliates, (iii) limit interest rates paid by the bank on deposits, (iv) limit asset growth and other activities, (v) require divestiture of subsidiaries, (vi) require replacement of directors and officers, and (vii) restrict capital distributions by the bank’s parent holding company. In addition to the foregoing, a significantly undercapitalized institution may not award bonuses or increases in compensation to its senior executive officers until it has submitted an acceptable capital restoration plan and received approval from its primary federal banking regulator.

Not later than 90 days after an institution becomes critically undercapitalized, the primary federal banking regulator for the institution must appoint a receiver or, with the concurrence of the FDIC, a conservator, unless the agency, with the concurrence of the FDIC, determines that the purpose of the prompt corrective action provisions would be better served by another course of action. FDICIA requires that any alternative determination be “documented” and reassessed on a periodic basis. Notwithstanding the foregoing, a receiver must be appointed after 270 days unless the appropriate federal banking agency and the FDIC certify that the institution is viable and not expected to fail.

Deposit Insurance Assessments

The Bank’s deposits are insured by the Bank Insurance Fund of the FDIC to the current legal maximum of \$250,000 generally for each insured depositor. Non-interest bearing checking accounts have unlimited coverage. The Federal Deposit Insurance Act, as amended by the Federal Deposit Insurance Reform Act of 2005, provides that the FDIC shall set deposit insurance assessment rates. In 2006, the former Bank Insurance Fund merged with the Savings Association Insurance Fund to create the Deposit Insurance Fund, or DIF. The Act eliminated the requirement that the FDIC set deposit insurance assessment rates on a semi-annual basis at a level sufficient to increase the ratio of BIF reserves to BIF-insured deposits to at least 1.25%. Under the Act, the FDIC annually sets the designated reserve ratio (DRR) of DIF reserves to DIF-insured deposits between 1.15% and 1.50%, subject to public comment, based on appropriate considerations including risk of losses and economic conditions such that the ratio would increase during favorable economic conditions and decrease during less favorable conditions, thus avoiding sharp swings in assessment rates.

Past bank failures and reserves against future failures lowered the FDIC insurance fund to 0.22% of insured deposits as of June 30, 2009 from 0.40% and 1.22% at December 31, 2008 and 2007, respectively. To keep the fund from falling to a level that could undermine public confidence, there was a one-time special insurance premium charged to all FDIC-insured banks of 0.05% on each insured depository institution’s total assets minus Tier 1 capital as of June 30, 2009. To ensure that the reserve ratio returns to 1.15% within the statutorily mandated period of time, in 2009 the

FDIC Board took the following steps:

- Impose no further special assessments under the final rule adopted in May 2009.
- Maintain assessment rates at their current levels through the end of 2010 and thereafter adopt a uniform 3 basis point increase in assessment rates effective January 1, 2011.
- Extend to eight years the Amended Restoration Plan to raise the Deposit Insurance Fund reserve ratio to 1.15 percent.
- Require all institutions to prepay, on December 30, 2009, their estimated risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011, and 2012, at the same time that institutions pay their regular quarterly deposit insurance assessments for the third quarter of 2009. An institution would initially account for the prepaid assessments as a prepaid expense and amortize this amount over a three-year period.

The First Bancorp 2009 Form 10-k

Page 5

Brokered Deposits and Pass-Through Deposit Insurance Limitations

Under FDICIA, a bank cannot accept brokered deposits unless it either (i) is “Well Capitalized” or (ii) is “Adequately Capitalized” and has received a written waiver from its primary federal banking regulator. For this purpose, “Well Capitalized” and “Adequately Capitalized” have the same definitions as in the Prompt Corrective Action regulations. See “Prompt Corrective Action” above. Banks that are not in the “Well Capitalized” category are subject to certain limits on the rates of interest they may offer on any deposits (whether or not obtained through a third-party deposit broker). Pass-through insurance coverage is not available in banks that do not satisfy the requirements for acceptance of brokered deposits for deposits of certain employee benefit plans, except that pass-through insurance coverage will be provided for employee benefit plan deposits in institutions which at the time of acceptance of the deposit meet all applicable regulatory capital requirements and send written notice to their depositors that their funds are eligible for pass-through deposit insurance. The Bank currently accepts brokered deposits.

Real Estate Lending Standards

FDICIA requires the federal bank regulatory agencies to adopt uniform real estate lending standards. The FDIC and the OCC have adopted regulations which establish supervisory limitations on Loan-to-Value (“LTV”) ratios in real estate loans by FDIC-insured banks, including national banks. The regulations require banks to establish LTV ratio limitations within or below the prescribed uniform range of supervisory limits.

Standards for Safety and Soundness

Pursuant to FDICIA the federal bank regulatory agencies have prescribed, by regulation, standards and guidelines for all insured depository institutions and depository institution holding companies relating to: (i) internal controls, information systems and internal audit systems; (ii) loan documentation; (iii) credit underwriting; (iv) interest rate risk exposure; (v) asset growth; and (vi) compensation, fees and benefits. The compensation standards prohibit employment contracts, compensation or benefit arrangements, stock option plans, fee arrangements or other compensatory arrangements that would provide “excessive” compensation, fees or benefits, or that could lead to material financial loss. In addition, the federal bank regulatory agencies are required by FDICIA to prescribe standards specifying: (i) maximum classified assets to capital ratios; (ii) minimum earnings sufficient to absorb losses without impairing capital; and (iii) to the extent feasible, a minimum ratio of market value to book value for publicly-traded shares of depository institutions and depository institution holding companies.

Consumer Protection Provisions

FDICIA also includes provisions requiring advance notice to regulators and customers for any proposed branch closing and authorizing (subject to future appropriation of the necessary funds) reduced insurance assessments for institutions offering “lifeline” banking accounts or engaged in lending in distressed communities. FDICIA also includes provisions requiring depository institutions to make additional and uniform disclosures to depositors with respect to the rates of interest, fees and other terms applicable to consumer deposit accounts.

FDIC Waiver of Certain Regulatory Requirements

The FDIC issued a rule, effective on September 22, 2003, that includes a waiver provision which grants the FDIC Board of Directors extremely broad discretionary authority to waive FDIC regulatory provisions that are not specifically mandated by statute or by a separate regulation.

Impact of Monetary Policy

The monetary policies of regulatory authorities, including the Federal Reserve Board, have a significant effect on the operating results of banks and bank holding companies. Through open market securities transactions and changes in its discount rate and reserve requirements, the Board of Governors exerts considerable influence over the cost and availability of funds for lending and investment. The nature of future monetary policies and the effect of such policies on the future business and earnings of the Company and the Bank cannot be predicted. See Item 7 - Management’s

Discussion and Analysis of Financial Condition and Results of Operations, regarding the Bank's net interest margin and the effect of interest-rate volatility on future earnings.

Employees

At December 31, 2009, the Company had 212 employees and full-time equivalency of 206 employees. The Company enjoys good relations with its employees. A variety of employee benefits, including health, group life and disability income, a defined contribution retirement plan, and an incentive bonus plan, are available to qualifying officers and employees.

Page 7

ITEM 1A. Risk Factors

The risks and uncertainties described below are not the only ones the Company faces. Additional risks and uncertainties that we are unaware of, or that we currently deem immaterial, also may become important factors that affect us and our business. If any of these risks were to occur, our business, financial condition or results of operations could be materially and adversely affected.

Recent negative developments in the financial services industry and U.S. and global credit markets may adversely impact our operations and results.

Negative developments in 2007, 2008 and 2009 in the capital markets have resulted in uncertainty in the financial markets in general with the expectation of the general economic downturn continuing in 2010 and perhaps beyond 2010. The impact of this situation, together with concerns regarding the financial strength of financial institutions, has led to distress in credit markets and issues relating to liquidity among financial institutions. Some financial institutions around the world and the United States have failed; others have been forced to seek acquisition partners. Loan portfolio value has deteriorated at many institutions resulting from, amongst other factors, a weak economy and a decline in the value of the collateral supporting their loans. The competition for our deposits has increased significantly due to liquidity concerns at many of these same institutions. Stock prices of bank holding companies, like ours, have been negatively affected by the current condition of the financial markets, as has our ability, if needed, to raise capital or borrow in the debt markets compared to recent years. The United States and other governments have taken unprecedented steps to try to stabilize the financial system, including investing in financial institutions. Our business and our financial condition and results of operations could be adversely affected by (1) continued or accelerated disruption and volatility in financial markets, (2) continued capital and liquidity concerns regarding financial institutions generally and our counterparties specifically, (3) recessionary conditions that are deeper or last longer than currently anticipated, or (4) new federal or state laws and regulations regarding lending and funding practices and liquidity standards, and the likelihood that financial institution regulatory agencies will be very aggressive in responding to concerns and trends identified in examinations, including the expected issuance of formal enforcement actions. Negative developments in the financial services industry and the impact of new legislation in response to those developments could negatively impact our operations by restricting our business operations, including our ability to originate or sell loans, and adversely impact our financial performance.

Recent legislative and regulatory initiatives to address difficult market and economic conditions may not stabilize the U.S. banking system.

The recently enacted Emergency Economic Stabilization Act of 2008, or EESA, authorizes the U.S. Treasury to purchase from financial institutions and their holding companies up to \$700 billion in mortgage loans, mortgage-related securities and certain other financial instruments, including debt and equity securities issued by financial institutions and their holding companies, under the troubled asset relief program, or TARP. The purpose of TARP is to restore confidence and stability to the U.S. banking system and to encourage financial institutions to increase their lending to customers and to each other. The Treasury has allocated \$250 billion towards the TARP Capital Purchase Program. Under the TARP Capital Purchase Program, Treasury has purchased equity securities from participating institutions. The EESA also increased federal deposit insurance on most deposit accounts from \$100,000 to \$250,000. This increase is in place until the end of 2013. The EESA followed numerous actions by the Federal Reserve Board, the U.S. Congress, Treasury, the Federal Deposit Insurance Corporation, the SEC and others to address the current liquidity and credit crisis that has followed the sub-prime meltdown that commenced in 2007. These measures include homeowner relief that encourage loan restructuring and modification; the establishment of significant liquidity and credit facilities for financial institutions and investment banks; the lowering of the federal funds rate; emergency action against short selling practices; a temporary guaranty program for money market funds; the establishment of a commercial paper funding facility to provide back-stop liquidity to commercial paper issuers;

and coordinated international efforts to address illiquidity and other weaknesses in the banking sector.

There can be no assurance that the Emergency Economic Stabilization Act (“EESA”), the American Recovery and Reinvestment Act of 2009, and other initiatives undertaken by the United States government to restore liquidity and stability to the U.S. financial system will help stabilize and stimulate the U.S. financial system.

The purpose of these legislative and regulatory actions is to stabilize the U.S. banking system. The EESA and the other regulatory initiatives described above may not have their desired effects. If the volatility in the markets continues and economic conditions fail to improve or worsen, our business, financial condition and results of operations could be materially and adversely affected. There can be no assurance regarding the actual impact that the EESA or the American Recovery and Reinvestment Act of 2009, or other programs and other initiatives undertaken by the U.S. government, will have on the financial markets; the extreme levels of volatility and limited credit availability currently being

The First Bancorp 2009 Form 10-k

experienced may persist. The failure of the EESA or other government programs to help stabilize the financial markets and a continuation or worsening of current financial market conditions could have a material adverse effect on the Company. In the event turmoil in the financial markets continues, we may experience a material adverse effect from (1) continued or accelerated disruption and volatility in financial markets, (2) continued capital and liquidity concerns regarding financial institutions generally and our transaction counterparties specifically, (3) limitations resulting from further governmental action to stabilize or provide additional regulation of the financial system, or (4) recessionary conditions that are deeper or last longer than currently anticipated.

The soundness of other financial services institutions may adversely affect our credit risk.

We rely on other financial services institutions through trading, clearing, counterparty, and other relationships. We maintain limits and monitor concentration levels of our counterparties as specified in our internal policies. Our reliance on other financial services institutions exposes us to credit risk in the event of default by these institutions or counterparties. These losses could adversely affect our results of operations and financial condition.

Declines in value may adversely impact the investment portfolio.

As of December 31, 2009, we had \$81.8 million and \$190.5 million in available for sale and held to maturity investment securities, respectively. We may be required to record impairment charges on our investment securities if they suffer a decline in value that is considered other-than-temporary. Numerous factors, including lack of liquidity for re-sales of certain investment securities, absence of reliable pricing information for investment securities, adverse changes in business climate, adverse actions by regulators, or unanticipated changes in the competitive environment could have a negative effect on our investment portfolio in future periods. If an impairment charge is significant enough it could affect the ability of the Bank to renew funding. This could have a material adverse effect on our liquidity and our ability to upstream dividends to the Company to then pay dividends to Shareholders. It could also negatively impact our regulatory capital ratios and result in not being classified as "well-capitalized" for regulatory purposes.

Changes in interest rates can have an adverse effect on profitability.

Our earnings and cash flows are largely dependent upon the Bank's net interest income. Net interest income is the difference between interest income earned on interest-earning assets, such as loans and investment securities, and interest expense paid on interest-bearing liabilities, such as deposits and borrowed funds. Interest rates are sensitive to many factors that are beyond our control, including general economic conditions, competition, and policies of various governmental and regulatory agencies and, in particular, the policies of the Federal Reserve Board. Changes in monetary policy, including changes in interest rates, could influence not only the interest the Bank receives on loans and investment securities and the amount of interest it pays on deposits and borrowings, but such changes could also affect (i) the Bank's ability to originate loans and obtain deposits, (ii) the fair value of the Bank's financial assets and liabilities, including the held to maturity, available for sale, and trading securities portfolios, and (iii) the average duration of the Bank's interest-earning assets. This also includes the risk that interest-earning assets may be more responsive to changes in interest rates than interest-bearing liabilities, or vice versa (repricing risk), the risk that the individual interest rates or rate indices underlying various interest-earning assets and interest-bearing liabilities may not change in the same degree over a given time period (basis risk), and the risk of changing interest rate relationships across the spectrum of interest-earning asset and interest-bearing liability maturities (yield curve risk), including a prolonged flat or inverted yield curve environment. Although Management believes it has implemented effective asset and liability management strategies to reduce the potential effects of changes in interest rates on our results of

operations, any substantial, unexpected, or prolonged change in market interest rates could have a material adverse effect on our financial condition and results of operations.

Regulation.

Bank holding companies and nationally chartered banks operate in a highly regulated environment and are subject to supervision and examination by various regulatory agencies. The Company is subject to the Bank Holding Company Act of 1956, as amended, and to regulation and supervision by the Federal Reserve Board. The Bank is subject to regulation and supervision by the Office of the Comptroller of the Currency, or the OCC. The cost of compliance with regulatory requirements may adversely affect our results of operations or financial condition. Federal and state laws and regulations govern numerous matters including: changes in the ownership or control of banks and bank holding companies; maintenance of adequate capital and the financial condition of a financial institution; permissible types, amounts and terms of extensions of credit and investments; permissible non-banking activities; the level of reserves against deposits; and restrictions on dividend payments. The OCC possesses cease and desist powers to prevent or remedy unsafe or unsound practices or violations of law by banks subject to their regulation, and the Federal Reserve Board possesses similar powers with respect to bank holding companies. These and other restrictions limit the manner in which we may conduct our business and obtain financing.

The First Bancorp 2009 Form 10-k

Under regulatory capital adequacy guidelines and other regulatory requirements, we must meet guidelines that include quantitative measures of assets, liabilities, and certain off-balance sheet items, subject to qualitative judgments by regulators about components, risk weightings and other factors. If we fail to meet these minimum capital guidelines and other regulatory requirements, our financial condition would be materially and adversely affected. Our failure to maintain the status of “well-capitalized” under our regulatory framework could affect the confidence of our customers in us, thus compromising our competitive position. In addition, failure to maintain the status of “well-capitalized” under our regulatory framework or “well-managed” under regulatory examination procedures could compromise our status as a bank holding company and related eligibility for a streamlined review process for acquisition proposals.

The Cost of FDIC Insurance May Increase.

The FDIC has publicly stated that past bank failures and reserves against future failures have lowered the FDIC insurance fund to 0.22% of insured deposits as of June 30, 2009 from 0.40% and 1.22% at December 31, 2008 and 2007, respectively. In order to keep the insurance fund from falling to a level that could undermine public confidence, there was a one-time special insurance premium paid by all FDIC-insured banks of 0.05% on each insured depository institution’s total assets minus Tier 1 capital as of June 30, 2009. To ensure that the reserve ratio returns to 1.15% within the statutorily mandated period of time, meet the FDIC’s liquidity needs without imposing additional burdens on the industry during a period of stress, and ensure that the deposit insurance system remains directly industry-funded, in 2009 the FDIC Board took the following steps:

- Impose no further special assessments under the final rule adopted in May 2009.
- Maintain assessment rates at their current levels through the end of 2010 and thereafter adopt a uniform 3 basis point increase in assessment rates effective January 1, 2011.
- Extend to eight years the Amended Restoration Plan to raise the Deposit Insurance Fund reserve ratio to 1.15 percent.
- Require all institutions to prepay, on December 30, 2009, their estimated risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011, and 2012, at the same time that institutions pay their regular quarterly deposit insurance assessments for the third quarter of 2009. An institution would initially account for the prepaid assessments as a prepaid expense and amortize this amount over a three-year period.

While the FDIC projects that the 2009 special assessment, raising the assessment schedule and prepaying three-year’s projected assessments will recapitalize the insurance fund to 1.15% of insured deposits in eight years, there can be no assurance that additional payments related to FDIC insurance will not be required and that such payments could materially or adversely affect the Company’s results of operations.

Interest rate risk.

Our main source of income is net interest income, which is equal to the difference between the interest income received on loans, investment securities and other interest-bearing assets and the interest expense incurred in connection with deposits, borrowings and other interest-bearing liabilities. As a result, our net interest income can be affected by changes in market interest rates. These rates are highly sensitive to many factors beyond our control, including general economic conditions, both domestic and foreign, and the monetary and fiscal policies of various governmental and regulatory authorities. We have asset and liability management policies that attempt to minimize the potential adverse effects of changes in interest rates on our net interest income, primarily by altering the mix and maturity of loans, investments and funding sources. However, even with these policies in place, we cannot provide assurance that changes in interest rates will not negatively impact our operating results. For a further discussion on the Company’s exposure to interest rate risk, see Item 7A: Quantitative and Qualitative Disclosures about Market Risk. Furthermore, our banking business is affected not only by general economic conditions, but also by the monetary policies of the Federal Reserve Board. Changes in monetary or legislative policies may affect the interest rates we must offer to attract deposits and the interest rates we can charge on our loans, as well as the manner in which we offer

deposits and make loans. These monetary policies have had, and are expected to continue to have, significant effects on the operating results of depository institutions, including the Bank. Increases in interest rates also may reduce the demand for loans and, as a result, the amount of loan and commitment fees the Bank receives.

Credit risk.

A number of factors can impact the ability of borrowers to repay their current loan obligations, which could not only result in increased loan defaults, foreclosures and write-offs, but also necessitate further increases to our allowance for loan losses. If customers default on the repayment of their loans, our profitability could be adversely affected. A borrower's default on its obligations under one or more of our loans may result in lost principal and interest income and increased operating expenses as a result of the allocation of Management time and resources to the collection and work-out of the loans. If collection efforts are unsuccessful or acceptable workout arrangements cannot be reached, we may

The First Bancorp 2009 Form 10-k

Page 10

have to write-off the loans in whole or in part. Although we may acquire real estate or other assets that secure the defaulted loans through foreclosure or other similar remedies, the amount owed under the defaulted loans may exceed the value of the assets acquired.

Management periodically makes a determination of our allowance for loan losses based on available information, including the quality of our loan portfolio, economic conditions, the value of the underlying collateral and the level of our non-accruing loans. If assumptions prove to be incorrect, our allowance may not be sufficient. Increases in this allowance will result in an expense for the period. If, as a result of general economic conditions or an increase in non-performing loans, Management determines that an increase in our allowance for loan losses is necessary, we may incur additional expenses.

As an integral part of their examination processes, bank regulatory agencies periodically review our allowance for loan losses and the value we attribute to real estate acquired through foreclosure or other similar remedies. These regulatory agencies may require us to adjust our determination of the value of these items. These adjustments could negatively impact our results of operations or financial condition.

Because we serve primarily individuals and smaller businesses located in coastal Maine, the ability of customers to repay their loans is impacted by the economic conditions in this area. In addition, our ability to continue to originate loans may be impaired by adverse changes in local and regional economic conditions. These events also could have an adverse effect on the value of our collateral and our financial condition.

In the course of business, we may acquire, through foreclosure, properties securing loans that are in default. In commercial real estate lending, there is a risk that hazardous substances could be discovered on these properties. In this event, we might be required to remove these substances from the affected properties at our sole cost and expense. The cost of this removal could exceed the value of the affected properties. We may not have adequate remedies against the prior owners or other responsible parties and could find it difficult or impossible to sell the affected properties. The occurrence of one or more of these events could adversely affect our financial condition or operating results.

Liquidity and funding.

We have traditionally obtained funds principally through deposits and borrowings. As a general matter, deposits are a lower-cost source of funds than borrowings, because interest rates paid for deposits are typically less than interest rates charged for borrowings. If, as a result of competitive pressures, market interest rates, general economic conditions or other events, the balance of our deposits decreases relative to our overall banking operations, we may have to rely more heavily on borrowings as a source of funds in the future. Such an increased reliance on borrowings could have a negative impact on our results of operations or financial condition. In addition, fluctuations in interest rates may result in disintermediation, which is the flow of funds away from depository institutions into direct investments that pay higher rates of return, and may affect the value of our investment securities and other interest-earning assets.

Our access to funding sources in amounts adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of our business activity due to a market downturn or adverse regulatory action against us. Our ability to borrow could also be impaired by factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole should the recent turmoil faced by banking organizations in the domestic and worldwide credit markets continue or worsen.

Loss of lower-cost funding sources.

Checking and savings, NOW, and money market deposit account balances and other forms of customer deposits can decrease when customers perceive alternative investments, such as the stock market, as providing a better risk/return tradeoff. If customers move money out of bank deposits and into other investments, we could lose a relatively low cost source of funds, increasing our funding costs and reducing our net interest income and net income. Advances from the Federal Home Loan Bank of Boston ("FHLB") are currently a relatively low-cost source of funding. The availability of qualified collateral on the Bank's balance sheet determines the level of advances available from FHLB and a deterioration in quality in the Bank's loan portfolio can adversely impact the availability of this source of funding.

Competition in the financial services industry.

We face substantial competition in all areas of our operations from a variety of different competitors, many of which are larger and may have more financial resources than we do. We compete with other providers of financial services such as commercial and savings banks, savings and loan associations, credit unions, money market and mutual funds, mortgage companies, asset managers, insurance companies and a wide array of other local, regional and national institutions which offer financial services. Mergers between financial institutions within Maine and in neighboring states have added competitive pressure. If we are unable to compete effectively, we will lose market share and our income generated from loans, deposits, and other financial products will decline.

The First Bancorp 2009 Form 10-k

Allowance for loan losses may be insufficient.

The Bank maintains an allowance for loan losses based on, among other things, national and regional economic conditions, historical loss experience and delinquency trends. We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of borrowers and the value of the real estate and other assets serving as collateral for the repayment of loans. In determining the size of the allowance for loan losses, we rely on our experience and our evaluation of economic conditions. However, we cannot predict loan losses with certainty, and we cannot provide assurance that charge-offs in future periods will not exceed the allowance for loan losses. During 2009, the Bank experienced incremental increases in both non-performing loans and net loan charge-offs, as compared to prior periods. No assurance can be given that the relevant economic and market conditions will improve or will not further deteriorate. Hence, the persistence or worsening of such conditions could result in an increase in delinquencies, could cause a decrease in our interest income, or could continue to have an adverse impact on our loan loss experience, which, in turn, may necessitate increases to our allowance for loan losses. If net charge-offs exceed the Bank's allowance, its earnings would decrease. In addition, regulatory agencies review the Bank's allowance for loan losses and may require additions to the allowance based on their judgment about information available to them at the time of their examination. Management could also decide that the allowance for loan losses should be increased. An increase in the Bank's allowance for loan losses could reduce its earnings.

Changes in primary market area could adversely impact results of operations and financial condition.

Most of the Bank's lending is in Mid-Coast and Down East Maine. As a result of this geographic concentration, a significant broad-based deterioration in economic conditions in this area or Northern New England could have a material adverse impact on the quality of the Bank's loan portfolio, and accordingly, our results of operations. Such a decline in economic conditions could impair borrowers' ability to pay outstanding principal and interest on loans when due and, consequently, adversely affect the cash flows of our business.

The Bank's loan portfolio is largely secured by real estate collateral. A substantial portion of the real and personal property securing the loans in the Bank's portfolio is located in Mid-Coast and Down East Maine. Conditions in the real estate market in which the collateral for the Bank's loans is located strongly influence the level of the Bank's non-performing loans and results of operations. The recent decline in the Mid-Coast and Down East Maine area real estate values, as well as other external factors, could adversely affect the Bank's loan portfolio.

Operational risk.

We face the risk that the design of our controls and procedures, including those to mitigate the risk of fraud by employees or outsiders, may prove to be inadequate or are circumvented, thereby causing delays in detection of errors or inaccuracies in data and information. Management regularly reviews and updates our internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of our controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on our business, results of operations and financial condition.

We may also be subject to disruptions of our systems arising from events that are wholly or partially beyond our control (including, for example, computer viruses or electrical or telecommunications outages), which may give rise to losses in service to customers and to financial loss or liability. We are further exposed to the risk that our external vendors may be unable to fulfill their contractual obligations (or will be subject to the same risk of fraud or operational errors by their respective employees as are we) and to the risk that our (or our vendors') business continuity and data security systems prove to be inadequate.

Our performance is largely dependent on the talents and efforts of highly skilled individuals. There is intense competition in the financial services industry for qualified employees. In addition, we face increasing competition with businesses outside the financial services industry for the most highly skilled individuals. Our business operations could be adversely affected if we were unable to attract new employees and retain and motivate our existing employees.

Claims and litigation pertaining to fiduciary responsibility or lender liability.

From time to time as part of our normal course of business, customers make claims and take legal action against the Bank based on actions or inactions of the Bank. If such claims and legal actions are not resolved in a manner favorable to us, they may result in financial liability and/or adversely affect the market perception of the Company and its products and services. This may also impact customer demand for the Company's products and services. Any financial liability or reputation damage could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

The First Bancorp 2009 Form 10-k

Page 12

There may not be a robust trading market for the common stock.

Although our common stock is traded on the NASDAQ Global Select market, the trading volume of the common stock has historically not been substantial. Over the five-year period ending December 31, 2009, for example, the average monthly trading volume of our common stock has been 185,745 shares or approximately 1.91% of the outstanding common stock. Due to the limited trading volume in our common stock, the intraday spread between bid and ask prices of the shares can be quite high. There can be no assurance that a more robust, active or economical trading market for our common stock will develop. The market value and liquidity of our common stock may, as a result, be adversely affected.

The price of our common stock may fluctuate.

The price of our common stock on the NASDAQ Global Select Market constantly changes and recently, given the uncertainty in the financial markets, has fluctuated widely. We expect the market price of our common stock will continue to fluctuate. Holders of our common stock will be subject to the risk of volatility and changes in prices. Our common stock price can fluctuate as a result of many factors which are beyond our control, including:

- quarterly fluctuations in our operating and financial results;
- operating results that vary from the expectations of Management, securities analysts and investors;
- changes in expectations as to our future financial performance, including financial estimates by securities analysts;
- events negatively impacting the financial services industry which result in a general decline for the industry;
 - announcements of material developments affecting our operations or our dividend policy;
 - future sales of our equity securities;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
 - changes in accounting standards, policies, guidance, interpretations or principles; and
 - general domestic economic and market conditions.

In addition, recently the stock market generally has experienced extreme price and volume fluctuations, and industry factors and general economic and political conditions and events, such as economic slowdowns or recessions, interest rate changes or credit loss trends, could also cause our stock price to decrease regardless of our operating results.

Future offerings of debt or other securities may adversely affect the market price of our stock.

In the future, we may attempt to increase our capital resources or, if our or the Bank's capital ratios approach or fall below the required minimums, we or the Bank could be forced to raise additional capital by making additional offerings of debt or preferred equity securities, including medium-term notes, trust preferred securities, senior or subordinated notes and preferred stock. Upon liquidation, holders of our debt securities and shares of preferred stock and lenders with respect to other borrowings will receive distributions of our available assets prior to the holders of our common stock. Additional equity offerings may dilute the value for existing Shareholders or reduce the market price of our common stock, or both. Holders of our common stock are not entitled to preemptive rights or other protections against dilution.

ITEM 1B. Unresolved Staff Comments

None

The First Bancorp 2009 Form 10-k

ITEM 2. Properties

The principal office of the Company and the Bank is located in Damariscotta, Maine. The Bank operates 14 full-service banking offices in four counties in the Mid-Coast and Down East regions of Maine:

Lincoln County	Knox County	Hancock County	Washington County
Boothbay Harbor	Camden	Bar Harbor	Eastport
Damariscotta	Rockland	Blue Hill	Calais
Waldoboro	Rockport	Ellsworth	
Wiscasset		Northeast Harbor	
		Southwest Harbor	

First Advisors, the investment management and trust division of the Bank, operates from two offices in Bar Harbor and Damariscotta. The Bank also maintains an Operations Center in Damariscotta.

The Company owns all of its facilities except for the land on which the Ellsworth branch is located, and except for the Camden, Calais, and Northeast Harbor offices and the Southwest Harbor drive-up facility, for which the Bank has entered into long-term leases. Management believes that the Bank's current facilities are suitable and adequate in light of its current needs and its anticipated needs over the near term.

ITEM 3. Legal Proceedings

There are no material pending legal proceedings to which the Company or the Bank is a party or to which any of its property is subject, other than routine litigation incidental to the business of the Bank. None of these proceedings is expected to have a material effect on the financial condition of the Company or of the Bank.

ITEM 4. Submission of Matters to a Vote of Security Holders

None.

The First Bancorp 2009 Form 10-k

ITEM 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities

The common stock of The First Bancorp (ticker symbol FNLC) trades on the NASDAQ Global Select Market System. As of December 31, 2009, there were 9,744,170 shares outstanding and held of record by approximately 3,446 Shareholders. The following table reflects the high and low prices of actual sales in each quarter of 2009 and 2008. Such quotations do not reflect retail mark-ups, mark-downs or brokers' commissions.

	2009		2008	
	High	Low	High	Low
1st Quarter	\$20.29	\$10.77	\$15.74	\$13.95
2nd Quarter	21.80	14.49	18.00	13.65
3rd Quarter	20.50	17.29	23.05	12.88
4th Quarter	19.00	14.65	22.98	12.84

The last transaction in the Company's stock on NASDAQ during 2009 was on December 31 at \$15.42 per share. There are no warrants outstanding with respect to the Company's common stock other than warrants to purchase up to 225,904 shares of its common stock (subject to adjustment) at \$16.60 per share issued to the U.S. Treasury incident to the Company's participation in the CPP program. The Company has no securities outstanding which are convertible into common equity.

The ability of the Company to pay cash dividends depends on receipt of dividends from the Bank. While the Company's preferred stock issued under the CPP Program remains outstanding, the Company may not increase the dividend paid on its common stock without U.S. Treasury approval during the first three years. Dividends may be declared by the Bank out of its net profits as the directors deem appropriate, subject to the limitation that the total of all dividends declared by the Bank in any calendar year may not exceed the total of its net profits of that year plus retained net profits of the preceding two years. The amount available for dividends in 2010 will be that year's net income plus \$11.8 million. The payment of dividends from the Bank to the Company may be additionally restricted if the payment of such dividends resulted in the Bank failing to meet regulatory capital requirements. The Bank is also required to maintain minimum amounts of capital-to-total-risk-weighted-assets, as defined by banking regulators. At December 31, 2009, the Bank was required to have minimum Tier 1 and Tier 2 risk-based capital ratios of 4.00% and 8.00%, respectively. The Bank's actual ratios were 13.62% and 14.88%, respectively, as of December 31, 2009. The table below sets forth the cash dividends declared in the last two fiscal years:

Date Declared	Amount Per Share	Date Payable
March 20, 2008	\$0.185	April 30, 2008
June 19, 2008	\$0.190	July 31, 2008
September 18, 2008	\$0.195	October 31, 2008
December 18, 2008	\$0.195	January 30, 2009
March 18, 2009	\$0.195	April 30, 2009
June 18, 2009	\$0.195	July 31, 2009
September 17, 2009	\$0.195	October 30, 2009
December 17, 2009	\$0.195	January 29, 2010

The First Bancorp 2009 Form 10-k

Securities Authorized for Issuance Under Equity Compensation Plans

The following table lists the amount and weighted-average exercise price of securities authorized for issuance under equity compensation plans:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	55,000	\$ 15.89	-
Equity compensation plans not approved by security holders	-	\$ -	-
Total	55,000	\$ 15.89	-

Performance Graph

Set forth below is a line graph comparing the five-year cumulative total return of \$100.00 invested in the Company's common stock ("FNLC"), assuming reinvestment of all cash dividends and retention of all stock dividends, with a comparable amount invested in the Standard & Poor's 500 Index ("S&P 500") and the NASDAQ Combined Bank Index ("NASD Bank"). The NASD Bank index is a capitalization-weighted index designed to measure the performance of all NASDAQ stocks in the banking sector.

	2004	2005	2006	2007	2008	2009
FNLC	100.00	103.71	102.02	93.15	133.86	107.09

The First Bancorp 2009 Form 10-k

Repurchase of Shares and Use of Proceeds

On August 16, 2007, the Company announced that its Board of Directors had authorized a program for the repurchase of up to 300,000 shares of the Company's common stock or approximately 3.1% of the outstanding shares. This program ended on August 16, 2009. Under the program the Company repurchased 182,869 shares at an average price of \$15.63 and at a total cost of \$2.9 million. As a consequence of the Company's issuance of securities under the U.S. Treasury's CPP program, its ability to repurchase stock while such securities remain outstanding is restricted to purchases from employee benefit plans. During the year ended December 31, 2009, the Company repurchased 15,925 shares from employee benefit plans at an average price of \$16.51 per share and for total proceeds of \$263,000.

Repurchase transactions from employee benefit plans in 2009 are detailed in the following table:

Month	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan or Program	Maximum Number of Shares that may yet be Purchased under the Plan or Program
January 2009	1,077	\$ 16.50	1,077	123,450
February 2009	820	14.46	820	122,630

Total	15,925	\$ 16.51	7,396	-

Unregistered Sales of Equity Securities

The Company issues shares to the Bank's 401k Investment and Savings Plan pursuant to an exemption from registration under the Securities Act of 1933, as amended (the "Securities Act"), contained in Section 3(a)(11) thereof and Rule 147 promulgated thereunder. Sales in 2009 are presented in the following table:

Month	Shares	Average Price	Proceeds
January 2009	385	\$ 16.57	\$ 6,378
February 2009	671	14.62	9,807
March 2009	5,552	12.46	69,183
April 2009	1,138	16.77	19,088
May 2009	633	15.61	9,880
June 2009	592	17.39	10,296

November 2009	705	15.31	10,794
December 2009	-	-	-
Total	11,412	\$14.73	\$168,077

In addition, on January 9, 2009, the Company issued 25,000 shares of its Series A Preferred Stock, as well as warrants to purchase up to 225,904 shares of its common stock, to the U.S. Treasury under the CPP Program for total proceeds of \$25,000,000 pursuant to an exemption from registration under Section 4(2) of the Securities Act. The preferred shares were subsequently registered with the Securities and Exchange Commission.

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The First Bancorp, Inc. (the "Company") was incorporated in the State of Maine on January 15, 1985, and is the parent holding company of The First, N.A. (the "Bank"). At the Company's Annual Meeting of Shareholders on April 30, 2008, the Company's name was changed to The First Bancorp, Inc. from First National Lincoln Corporation.

The Company generates almost all of its revenues from the Bank, which was chartered as a national bank under the laws of the United States on May 30, 1864. The Bank, which has fourteen offices along coastal Maine, emphasizes personal service to the communities it serves, concentrating primarily on small businesses and individuals.

The Bank offers a wide variety of traditional banking services and derives the majority of its revenues from net interest income – the spread between what it earns on loans and investments and what it pays for deposits and borrowed funds. While net interest income typically increases as earning assets grow, the spread can vary up or down depending on the level and direction of movements in interest rates. Management believes the Bank has modest exposure to changes in interest rates, as discussed in "Interest Rate Risk Management" elsewhere in Management's Discussion. The banking business in the Bank's market area historically has been seasonal with lower deposits in the winter and spring and higher deposits in the summer and fall. This seasonal swing is fairly predictable and has not had a materially adverse effect on the Bank.

Non-interest income is the Bank's secondary source of revenue and includes fees and service charges on deposit accounts, fees for processing merchant credit card receipts, income from the sale and servicing of mortgage loans, and income from investment management and private banking services through First Advisors, a division of the Bank.

Forward-Looking Statements

This report contains statements that are "forward-looking statements." We may also make written or oral forward-looking statements in other documents we file with the SEC, in our annual reports to Shareholders, in press releases and other written materials, and in oral statements made by our officers, directors or employees. You can identify forward-looking statements by the use of the words "believe", "expect", "anticipate", "intend", "estimate", "assume", "outlook", "will", "should", "may", "might", "could", and other expressions that predict or indicate future events and trends and which do not relate to historical matters. You should not rely on forward-looking statements, because they involve known and unknown risks, uncertainties and other factors, some of which are beyond the control of the Company. These risks, uncertainties and other factors may cause the actual results, performance or achievements of the Company to be materially different from the anticipated future results, performance or achievements expressed or implied by the forward-looking statements.

Some of the factors that might cause these differences include the following: changes in general national, regional or international economic conditions or conditions affecting the banking or financial services industries or financial capital markets, volatility and disruption in national and international financial markets, government intervention in the U.S. financial system, reductions in net interest income resulting from interest rate volatility as well as changes in the balance and mix of loans and deposits, reductions in the market value of wealth management assets under administration, changes in the value of securities and other assets, reductions in loan demand, changes in loan collectibility, default and charge-off rates, changes in the size and nature of the Company's competition, changes in legislation or regulation and accounting principles, policies and guidelines, and changes in the assumptions used in making such forward-looking statements. In addition, the factors described under "Risk Factors" in Item 1A of this Annual Report on Form 10-K for the fiscal year ended December 31, 2009, as filed with the SEC, may result in these differences. You should carefully review all of these factors, and you should be aware that there may be other factors that could cause these differences. These forward-looking statements were based on information, plans and estimates at the date of this quarterly report, and we assume no obligation to update any forward-looking statements to reflect changes in underlying assumptions or factors, new information, future events or other changes.

Although The First Bancorp, Inc. believes that the expectations reflected in such forward-looking statements are reasonable, actual results may differ materially from the results discussed in these forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the

Edgar Filing: First Bancorp, Inc /ME/ - Form 10-K

date hereof. The Company undertakes no obligation to republish revised forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Readers are also urged to carefully review and consider the various disclosures made by the Company, which attempt to advise interested parties of the facts that affect the Company's business.

The First Bancorp 2009 Form 10-k

Page 19

Critical Accounting Policies

Management's discussion and analysis of the Company's financial condition is based on the consolidated financial statements which are prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of such financial statements requires Management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. On an ongoing basis, Management evaluates its estimates, including those related to the allowance for loan losses, goodwill, the valuation of mortgage servicing rights, and other-than-temporary impairment on securities. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis in making judgments about the carrying values of assets that are not readily apparent from other sources. Actual results could differ from the amount derived from Management's estimates and assumptions under different assumptions or conditions.

Allowance for Loan Losses. Management believes the allowance for loan losses requires the most significant estimates and assumptions used in the preparation of the consolidated financial statements. The allowance for loan losses is based on Management's evaluation of the level of the allowance required in relation to the estimated loss exposure in the loan portfolio. Management believes the allowance for loan losses is a significant estimate and therefore regularly evaluates it for adequacy by taking into consideration factors such as prior loan loss experience, the character and size of the loan portfolio, business and economic conditions and Management's estimation of potential losses. The use of different estimates or assumptions could produce different provisions for loan losses.

Goodwill. Management utilizes numerous techniques to estimate the value of various assets held by the Company, including methods to determine the appropriate carrying value of goodwill as required under FASB ASC Topic 350 "Intangibles – Goodwill and Other." In addition, goodwill from a purchase acquisition is subject to ongoing periodic impairment tests, which include an evaluation of the ongoing assets, liabilities and revenues from the acquisition and an estimation of the impact of business conditions.

Mortgage Servicing Rights. The valuation of mortgage servicing rights is a critical accounting policy which requires significant estimates and assumptions. The Bank often sells mortgage loans it originates and retains the ongoing servicing of such loans, receiving a fee for these services, generally 0.25% of the outstanding balance of the loan per annum. Mortgage servicing rights are recognized when they are acquired through the sale of loans, and are reported in other assets. They are amortized into non-interest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets. Management uses an independent firm which specializes in the valuation of mortgage servicing rights to determine the fair value which is recorded on the balance sheet. The most important assumption is the anticipated loan prepayment rate, and increases in prepayment speed results in lower valuations of mortgage servicing rights. The valuation also includes an evaluation for impairment based upon the fair value of the rights, which can vary depending upon current interest rates and prepayment expectations, as compared to amortized cost. Impairment is determined by stratifying rights by predominant characteristics, such as interest rates and terms. The use of different assumptions could produce a different valuation. All of the assumptions are based on standards the Company believes would be utilized by market participants in valuing mortgage servicing rights and are consistently derived and/or benchmarked against independent public sources.

Other-Than-Temporary Impairment on Securities. One of the significant estimates related to investment securities is the evaluation of other-than-temporary impairments. The evaluation of securities for other-than-temporary impairments is a quantitative and qualitative process, which is subject to risks and uncertainties and is intended to determine whether declines in the fair value of investments should be recognized in current period earnings. The risks and uncertainties include changes in general economic conditions, the issuer's financial condition and/or future prospects, the effects of changes in interest rates or credit spreads and the expected recovery period of unrealized losses. Securities that are in an unrealized loss position are reviewed at least quarterly to determine if other-than-temporary impairment is present based on certain quantitative and qualitative factors and measures. The primary factors considered in evaluating whether a decline in value of securities is other-than-temporary include: (a) the length of time and extent to which the fair value has been less than cost or amortized cost and the expected

recovery period of the security, (b) the financial condition, credit rating and future prospects of the issuer, (c) whether the debtor is current on contractually obligated interest and principal payments, (d) the volatility of the securities' market price, (e) the intent and ability of the Company to retain the investment for a period of time sufficient to allow for recovery, which may be at maturity and (f) any other information and observable data considered relevant in determining whether other-than-temporary impairment has occurred, including the expectation of receipt of all principal and interest when due.

The First Bancorp 2009 Form 10-k

Page 20

Use of Non-GAAP Financial Measures

Certain information in Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in this Report contains financial information determined by methods other than in accordance with accounting principles generally accepted in the United States of America ("GAAP"). Management uses these "non-GAAP" measures in its analysis of the Company's performance and believes that these non-GAAP financial measures provide a greater understanding of ongoing operations and enhance comparability of results with prior periods as well as demonstrating the effects of significant gains and charges in the current period. The Company believes that a meaningful analysis of its financial performance requires an understanding of the factors underlying that performance. Management believes that investors may use these non-GAAP financial measures to analyze financial performance without the impact of unusual items that may obscure trends in the Company's underlying performance. These disclosures should not be viewed as a substitute for operating results determined in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies.

In several places net interest income is presented on a fully taxable equivalent basis. Specifically included in interest income was tax-exempt interest income from certain investment securities and loans. An amount equal to the tax benefit derived from this tax exempt income has been added back to the interest income total, which adjustments increased net interest income accordingly. Management believes the disclosure of tax-equivalent net interest income information improves the clarity of financial analysis, and is particularly useful to investors in understanding and evaluating the changes and trends in the Company's results of operations. Other financial institutions commonly present net interest income on a tax-equivalent basis. This adjustment is considered helpful in the comparison of one financial institution's net interest income to that of another institution, as each will have a different proportion of tax-exempt interest from its earning assets. Moreover, net interest income is a component of a second financial measure commonly used by financial institutions, net interest margin, which is the ratio of net interest income to average earning assets. For purposes of this measure as well, other financial institutions generally use tax-equivalent net interest income to provide a better basis of comparison from institution to institution. The Company follows these practices.

The following table provides a reconciliation of tax-equivalent financial information to the Company's consolidated financial statements, which have been prepared in accordance with GAAP. A 35.0% tax rate was used in 2009, 2008 and 2007.

Dollars in thousands	Years ended December 31,		
	2009	2008	2007
Net interest income as presented	\$43,653	\$37,703	\$31,836
Effect of tax-exempt income	2,395	2,187	2,081
Net interest income, tax equivalent	\$46,048	\$39,890	\$33,917

The Company presents its efficiency ratio using non-GAAP information. The GAAP-based efficiency ratio is noninterest expenses divided by net interest income plus noninterest income from the Consolidated Statements of Income. The non-GAAP efficiency ratio excludes securities losses and other-than-temporary impairment charges from noninterest expenses, excludes securities gains from noninterest income, and adds the tax-equivalent adjustment to net interest income. The following table provides a reconciliation of between the GAAP and non-GAAP efficiency ratio:

In thousands of dollars	Years ended December 31,		
	2009	2008	2007
Non-interest expense, as presented	\$26,658	\$22,994	\$22,183
Net securities losses	(150)	(89)	-
Other than temporary impairment charge	(916)	-	-

Edgar Filing: First Bancorp, Inc /ME/ - Form 10-K

Adjusted non-interest expense	25,592	22,905	22,183
Net interest income, as presented	43,653	37,703	31,836
Effect of tax-exempt income	2,395	2,187	2,081
Non-interest income, as presented	12,754	9,646	10,145
Effect of non-interest tax-exempt income	185	186	165
Net securities gains	-	-	2
Adjusted net interest income plus non-interest income	\$58,987	\$49,722	\$44,229
Non-GAAP efficiency ratio	43.39	% 46.07	% 50.16
GAAP efficiency ratio	47.26	% 48.56	% 52.84

The Company presents certain information based upon tangible average shareholders' equity instead of total average shareholders' equity. The difference between these two measures is the Company's intangible assets, specifically goodwill from prior acquisitions. Management, banking regulators and many stock analysts use the tangible common equity ratio and the tangible book value per common share in conjunction with more traditional bank capital ratios to compare the capital adequacy of banking organizations with significant amounts of goodwill or other intangible assets, typically stemming from the use of the purchase accounting method in accounting for mergers and acquisitions. The following table provides a reconciliation of tangible average shareholders' equity to the Company's consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles:

In thousands of dollars	Years ended December 31,		
	2009	2008	2007
Average shareholders' equity as presented	\$146,854	\$116,448	\$111,422
Intangible assets	27,684	27,684	27,684
Tangible average shareholders' equity	\$119,170	\$88,764	\$83,738

Executive Summary

Net income for the year ended December 31, 2009 was \$13.0 million, down \$1.0 million or 7.1% from the \$14.0 million posted for the year ended December 31, 2008. Earnings per common share on a fully diluted basis were \$1.22 for the year ended December 31, 2009, down \$0.22 or 15.3% from the \$1.44 posted for the year ended December 31, 2008.

The core business of The First Bancorp continues to be the spread business from traditional banking services – the difference between what we earn from loans and investments and what we pay for deposits and borrowed funds. The spread business did extremely well in 2009. With low interest rates and a steep yield curve, net interest income for the year ended December 31, 2009 was up \$6.0 million or 15.8% over the year ended December 31, 2008 and the net interest margin widened from 3.33% for the year ended December 31, 2008 to 3.66% for the year ended December 31, 2009. Our 2009 operating results also included nonrecurring revenues of \$910,000, after taxes, related to the sale of our merchant credit card processing portfolio.

At the same time, we continue to be in the longest and worst recession since the Great Depression of the 1930's. With weakening credit quality, the \$7.5 million or 158.7% increase in our provision for loan losses in 2009 more than offset the above-noted increase in net interest income. The slump in the housing market is continuing and the national unemployment rate is at 10.0%. Fortunately, the unemployment rate in Maine, at 8.3%, is somewhat better than the national average. These unemployment numbers, however, do not reflect the number of people who have experienced reduced incomes from wage cutbacks and loss of overtime. In Maine, many people who are self-employed are also experiencing a decline in business revenues impacting their individual incomes as well.

Total assets were up \$5.7 million or 0.4% over December 31, 2008. The loan portfolio was down \$26.8 million or 2.7%, with a decline in residential mortgages that refinanced and the sale of such refinanced loans to the secondary market because of their low interest rates. The investment portfolio was up \$24.5 million or 9.9% over December 31, 2008. On the liability side of the balance sheet, low-cost deposits were up \$12.7 million or 4.9% year-to-date, which Management views as very positive given that these are among our lowest cost sources of funding.

Edgar Filing: First Bancorp, Inc /ME/ - Form 10-K

We also added \$25.0 million in preferred stock in the first quarter of 2009 under the U.S. Treasury Capital Purchase Program. Our participation in the program provides us with greater ability to ride out the current economic storm, especially if conditions worsen, and also provides greater ability to work with individuals and businesses as they also struggle through these adverse economic conditions. We continue to be considered well-capitalized by FDIC standards with total risk-based capital at 14.96%, well above the well-capitalized threshold of 10.00% set by the FDIC.

The First Bancorp 2009 Form 10-k

Page 21

Results of Operations

Net Interest Income

Net interest income increased 15.8% or \$6.0 million to \$43.7 million for the year ended December 31, 2009 from the \$37.7 million reported for the year ended December 31, 2008. This was a result of two factors. Although earning assets were lower at December 31, 2009 than at December 31, 2008, average earning assets in 2009 were \$79.8 million higher than in 2008. At the same time, actions taken by the Federal Open Market Committee ("FOMC") in 2009 resulted in significantly lower interest rates, which led to the Company's net interest margin on a tax-equivalent basis increasing from 3.33% in 2008 to 3.66% in 2009.

Total interest income in 2009 was \$62.6 million, a decrease of \$8.8 million or 12.3% from the \$71.4 million posted by the Company in 2008. Total interest expense in 2009 was \$18.9 million, a decrease of \$14.8 million or 43.8% from the \$33.7 million posted by the Company in 2008. The decrease in both interest income and interest expense was attributable to lower interest rates. Tax-exempt interest income amounted to \$4.4 million for the year ended December 31, 2009, \$4.1 million for the year ended December 31, 2008 and \$3.9 million for the year ended December 31, 2007. The following tables present changes in interest income and expense attributable to changes in interest rates, volume, and rate/volume¹ for interest-earning assets and interest-bearing liabilities. Tax-exempt income is calculated on a tax-equivalent basis, using a 35.0% tax rate.

Year ended December 31, 2009 compared to 2008

The First Bancorp 2009 Form 10-k

Page 22

The following table presents, for the years ended December 31, 2009, 2008, and 2007, the interest earned on or paid for each major asset and liability category, respectively, the average yield for each major asset and liability category, and the net yield between assets and liabilities. Tax-exempt income has been calculated on a tax-equivalent basis using a 35% rate. Unrecognized interest on non-accrual loans is not included in the amount presented, but the average balance of non-accrual loans is included in the denominator when calculating yields.

Dollars in thousands	2009			2008			2007

Total Liabilities & Stockholders' Equity	\$1,353,517	\$1,273,433	\$1,156,517

Non-Interest Income

Non-interest income in 2009 was \$12.8 million, an increase of 32.2% from the \$9.6 million reported in 2008. This increase was attributable to mortgage origination and servicing income, which increased \$2.2 million or 1,514.5% as a result of a high volume of residential mortgages refinancing and these loans being sold to the secondary market, as well as an increase in other operating income of \$1.4 million or 26.5% due to the sale of the Company's merchant credit card processing portfolio.

Non-Interest Expense

Non-interest expense in 2009 was \$26.7 million, an increase of 15.9% from the \$23.0 million reported in 2008. The majority of the increase was attributable to a \$916,000 charge for other-than-temporary impairment of investment securities and a \$1.3 million increase in FDIC insurance assessments (see "Discussion of Business – Deposit Insurance Assessments"). Despite these increases in non-interest expense, the Company's efficiency ratio improved considerably in 2009 – 43.39% compared to 46.07% in 2008. The improvement in the efficiency ratio year-to-date was the result of the increase in both net interest income and non-interest income previously discussed.

Provision to the Allowance for Loan Losses

The Company's provision to the allowance for loan losses was \$12.2 million in 2009 compared to \$4.7 million in 2008. The level of provision in 2009 and 2008 was to maintain the allowance for loan losses at an adequate level given the size of our loan portfolio and the recent deterioration in asset quality. While the weakness in the national economy has not hit coastal Maine as hard as many other parts of the country, the Company has seen an increase in non-performing loans and net chargeoffs were \$7.3 million in 2009 compared to \$2.7 million in 2008. As a result, our provision for loan losses increased by \$7.5 million in 2009 from the 2008 level. Despite this increase, our 2009 provision for loan losses of 0.91% of average assets compares quite favorably to our peer at 1.43% of average assets. Given the number of economic uncertainties at this time, Management views it prudent to continue to increase the allowance for loan losses and that the amount of increase is directionally consistent with the decline in credit quality seen in the portfolio. A further discussion of asset and credit quality can be found in "Assets and Asset Quality".

Net Income

Net income for 2009 was \$13.0 million – a 7.1% or \$1.0 million decrease from net income of \$14.0 million that was posted in 2008. Earnings per share on a fully diluted basis were \$1.22, down \$0.22 or 15.3% from the \$1.44 reported for the year ended December 31, 2008.

Key Ratios

Return on average assets in 2009 was 0.96%, down from the 1.10% posted in 2008. Return on average tangible equity was 13.77% in 2009, compared to 15.75% in 2008 and 15.89% in 2007. In 2009, the Company's dividend payout ratio (dividends declared per share divided by earnings per share) was 63.93%, compared to 52.76% in 2008 and 51.49% in 2007. The Company's efficiency ratio – a benchmark measure of the amount spent to generate a dollar of income – was 43.39% in 2009 compared to 74.23% for the Bank's peer group, on average. In 2008, the Bank's efficiency ratio was 46.07% compared to 64.72% for the Bank's peer group, on average. The improvement in 2009 was the result of revenues (net interest income and non-interest income) increasing at a higher rate than operating expenses. The efficiency ratio is calculated by dividing the Company's operating expenses (which excludes the provision for loan losses) by the total of net interest income on a tax-equivalent basis before provision for loan losses and other operating income (which excludes securities gains).

Investment Management and Fiduciary Activities

As of December 31, 2009, First Advisors, the Bank's private banking and investment management division, had assets under management with a market value of \$205.2 million, consisting of 918 trust accounts, estate accounts, agency accounts, and self-directed individual retirement accounts. This compares to December 31, 2008, when 1,015 accounts with a market value of \$223.8 million were under management. The decline in market value was due to decline in equity markets that impacted the value of assets under management.

The First Bancorp 2009 Form 10-k

Page 25

Assets and Asset Quality

Total assets were up slightly in 2009, with the investment portfolio increasing \$24.5 million or 9.9% over December 31, 2008, while the loan portfolio decreased \$26.8 million or 2.7%. Total assets increased 0.4% or \$5.7 million from \$1.326 billion at December 31, 2008, to \$1.331 billion at December 31, 2009. Although earning assets were lower at December 31, 2009 than at December 31, 2008, average earning assets in 2009 were \$79.8 million higher than in 2008. This increase in average earning assets contributed to net interest income increasing \$6.0 million or 15.8% during 2009 when compared to 2008.

While the weaknesses in the national and global economies have not impacted coastal Maine as much as some other parts of the country, we nevertheless experienced a deterioration in asset quality in our loan portfolio. Non-performing assets to total assets stood at 1.80% at December 31, 2009, a significant increase over 1.31% at December 31, 2008. This increase is attributable to the impact that the weakened economy is having on our borrowers. Small businesses are seeing revenue/sales decreases and some are struggling to meet their obligations with a declining revenue base. A number of consumers have lost their jobs or seen a reduction in hours worked and/or overtime, thereby creating strained finances resulting in payment issues on their loans. In Management's opinion, the Company's long-standing approach to working with borrowers and ethical loan underwriting standards helps alleviate some of the payment problems on customers' loans and in the end minimizes actual loan losses.

Net charge offs in 2009 were \$7.3 million or 0.75% of average loans outstanding compared to \$2.7 million or 0.28% of average loans outstanding in 2008. Despite the increase, this is relatively low compared to most banks in the country and our peer group, which had, on average, net charge offs of 1.49% of average loans outstanding in 2009.

We manage our loan portfolio to minimize losses and have shown an excellent track record for the past 20 years with annual average chargeoffs of 0.25% of average loans outstanding.

Residential real estate loans represent 38.7% of the total loan portfolio, and this loan category generally has a lower level of losses in comparison to other loan types. In 2009, the loss ratio for residential mortgages was 0.50% compared to 0.75% for the entire loan portfolio. We have not written subprime mortgages or "no documentation loans" – the types of loans that are currently defaulting on a large scale nationwide. The Company does not have a credit card portfolio or offer dealer consumer loans which generally carry more risk and therefore higher losses.

The allowance for loan losses ended the year at \$13.6 million and stood at 1.43% of total loans outstanding compared to 0.90% at December 31, 2008. A \$12.2 million provision for losses was made in 2009, resulting in the allowance for loan losses increasing \$4.8 million or 55.0% from December 31, 2008, after \$7.3 million in net chargeoffs. This compares to a \$4.7 million provision for losses in 2008. Management believes this level of provision to be directionally consistent with a weakening economy and an increase in the level of non-performing loans. Given the above factors, Management views the \$13.6 million allowance for loan losses to be adequate as of December 31, 2009.

Investment Activities

During 2009, the investment portfolio increased 9.9% to end the year at \$272.4 million compared to \$247.8 million at December 31, 2008. The Company's investment securities are classified into two categories: securities available for sale and securities to be held to maturity. Securities available for sale consist primarily of debt securities which Management intends to hold for indefinite periods of time. They may be used as part of the Company's funds management strategy, and may be sold in response to changes in interest rates, prepayment risk and liquidity needs, to increase capital ratios, or for other similar reasons. Securities to be held to maturity consist primarily of debt securities that the Company has acquired solely for long-term investment purposes, rather than for trading or future sale. For securities to be categorized as held to maturity, Management must have the intent and the Company must have the ability to hold such investments until their respective maturity dates. The Company does not hold trading account securities.

All investment securities are managed in accordance with a written investment policy adopted by the Board of Directors. It is the Company's general policy that investments for either portfolio be limited to government debt obligations, time deposits, and corporate bonds or commercial paper with one of the three highest ratings given by a nationally recognized rating agency. The portfolio is currently invested primarily in U.S. Government agency securities and tax-exempt obligations of states and political subdivisions. The individual securities have been selected to enhance the portfolio's overall yield while not materially adding to the Company's level of interest rate risk. The following table sets forth the Company's investment securities at their carrying amounts as of December 31, 2009, 2008, and 2007.

The First Bancorp 2009 Form 10-k

Dollars in thousands	2009	2008	2007
Securities available for sale

	190,537	234,767	181,354
Total securities	\$272,375	\$247,839	\$208,584

The following table sets forth certain information regarding the yields and expected maturities of the Company's investment securities as of December 31, 2009. Yields on tax-exempt securities have been computed on a tax-equivalent basis using a tax rate of 35%. Mortgage-backed securities are presented according to their final contractual maturity date, while the calculated yield takes into effect the intermediate cashflows from repayment of principal which results in a much shorter average life.

Page 27

Impaired Securities

The securities portfolio contains certain securities the amortized cost of which exceeds fair value, which at December 31, 2009 amounted to an excess of \$2.1 million, or 0.8% of the amortized cost of the total securities portfolio. At December 31, 2008 this amount represented an excess of \$8.6 million, or 3.5% of the total securities portfolio. As a part of the Company's ongoing security monitoring process, the Company identifies securities in an unrealized loss position that could potentially be other-than-temporarily impaired. If a decline in the fair value of an available-for-sale security is judged to be other-than-temporary, a charge is recorded in net realized securities losses equal to the difference between the fair value and cost or amortized cost basis of the security.

The Company's evaluation of securities for impairments is a quantitative and qualitative process intended to determine whether declines in the fair value of investment securities should be recognized in current period earnings. The primary factors considered in evaluating whether a decline in the fair value of securities is other-than-temporary include: (a) the length of time and extent to which the fair value has been less than cost or amortized cost and the expected recovery period of the security, (b) the financial condition, credit rating and future prospects of the issuer, (c) whether the debtor is current on contractually obligated interest and principal payments, (d) the volatility of the securities market price, (e) the intent and ability of the Company to retain the investment for a period of time sufficient to allow for recovery, which may be at maturity, and (f) any other information and observable data considered relevant in determining whether other-than-temporary impairment has occurred.

The Company's best estimate of cash flows uses severe economic recession assumptions due to market uncertainty. The Company's assumptions include but are not limited to delinquencies, foreclosure levels and constant default rates on the underlying collateral, loss severity ratios, and constant prepayment rates. If the Company does not expect to receive 100% of future contractual principal and interest, an other-than-temporary impairment charge is recognized. Estimating future cash flows is a quantitative and qualitative process that incorporates information received from third party sources along with certain internal assumptions and judgments regarding the future performance of the underlying collateral.

Based on the foregoing evaluation criteria, during the first quarter of 2009, the Company concluded that one available-for-sale corporate security with an amortized cost of \$1.0 million was other-than-temporarily impaired, because the Company could no longer conclude that it is probable that it will recover 100% of the investment. Accordingly, the Company recorded a \$916,000 charge for other-than-temporary impairment. Management believes this loss was attributable to potential bankruptcy of the issuer of the security, which ultimately happened in the second quarter of 2009. While recording this impairment charge is consistent with GAAP, Management estimates that the ultimate economic losses that may be realized for other securities in the portfolio may be meaningfully less than the current "mark-to-market" losses. Management believes that the difference between the expected losses and current "mark-to-market" losses is largely attributable to current market illiquidity conditions, de-leveraging, and the historical disruption in the financial markets in general. In Management's opinion, no additional write-down for other-than-temporary impairment is required.

As of December 31, 2009, the Company had temporarily impaired securities with a fair value of \$79.1 million and unrealized losses of \$2.1 million, as identified in the table below. Securities in a continuous unrealized loss position more than twelve-months amounted to \$2.2 million as of December 31, 2009, compared with \$17.5 million at December 31, 2008. The Company has concluded that these securities were not other-than-temporarily impaired. This conclusion was based on the issuer's continued satisfaction of the securities issuers' obligations in accordance with their contractual terms and the expectation that the issuers will continue to do so, Management's intent and ability to hold these securities for a period of time sufficient to allow for any anticipated recovery in fair value which may be at maturity, the expectation that the Company will receive 100% of future contractual cash flows, as well as the evaluation of the fundamentals of the issuers' financial condition and other objective evidence. The following table summarizes temporarily impaired securities and their approximate fair values at December 31, 2009.

Less than 12 months	12 months or more	Total
---------------------	-------------------	-------

Edgar Filing: First Bancorp, Inc /ME/ - Form 10-K

In thousands of dollars	Fair	Unrealized	Fair	Unrealized	Fair	Unrealized
	Value	Losses	Value	Losses	Value	Losses

	\$76,904	\$(1,456)	\$2,212	\$(661)	\$79,116	\$(2,117)

For securities with unrealized losses, the following information was considered in determining that the securities were not other-than-temporarily impaired:

Securities issued by the U.S. Treasury and U.S. Government-sponsored agencies and enterprises. As of December 31, 2009, the total unrealized losses on these securities amounted to \$707,000, compared with \$5.9 million at December 31, 2008. All of these securities were credit rated "AAA" by the major credit rating agencies. Management believes that securities issued by the U.S. Treasury bear no credit risk because they are backed by the full faith and credit of the United States and that securities issued by U.S. Government-sponsored agencies and enterprises have minimal credit risk, as these agencies and enterprises play a vital role in the nation's financial markets. Management believes that the unrealized losses at December 31, 2009 were attributable to changes in current market yields and spreads since the date the underlying securities were purchased, and does not consider these securities to be other-than-temporarily impaired at December 31, 2009. The Company also has the ability and intent to hold these securities until a recovery of their amortized cost, which may be at maturity.

Mortgage-backed securities issued by U.S. Government agencies and U.S. Government-sponsored enterprises. As of December 31, 2009, the total unrealized losses on these securities amounted to \$602,000, compared with \$297,000 at December 31, 2008. All of these securities were credit rated "AAA" by the major credit rating agencies. Management believes that securities issued by U.S. Government agencies bear no credit risk because they are backed by the full faith and credit of the United States and that securities issued by U.S. Government-sponsored enterprises have minimal credit risk, as these agencies enterprises play a vital role in the nation's financial markets. Management believes that the unrealized losses at December 31, 2009 were attributable to changes in current market yields and spreads since the date the underlying securities were purchased, and does not consider these securities to be other-than-temporarily impaired at December 31, 2009. The Company also has the ability and intent to hold these securities until a recovery of their amortized cost, which may be at maturity.

Obligations of state and political subdivisions. As of December 31, 2009, the total unrealized losses on municipal securities amounted to \$485,000, compared with \$684,000 at December 31, 2008. Municipal securities are supported by the general taxing authority of the municipality and, in the cases of school districts, are supported by state aid. At December 31, 2009 all municipal bond issuers were current on contractually obligated interest and principal payments. The Company attributes the unrealized losses at December 31, 2009 to changes in prevailing market yields and pricing spreads since the dates the underlying securities were purchased, combined with current market liquidity conditions and the disruption in the financial markets in general. Accordingly, the Company does not consider these municipal securities to be other-than-temporarily impaired at December 31, 2009. The Company also has the ability and intent to hold these securities until a recovery of their amortized cost, which may be at maturity.

Corporate securities. As of December 31, 2009, the total unrealized losses on corporate securities amounted to \$302,000, compared with \$1.7 million at December 31, 2008. Corporate securities are dependent on the operating performance of the issuers. At December 31, 2009 all corporate bond issuers were current on contractually obligated interest and principal payments. The Company attributes the unrealized losses at December 31, 2009 to changes in prevailing market yields and pricing spreads since the dates the underlying securities were purchased, combined with current market liquidity conditions and the disruption in the financial markets in general. Accordingly, the Company does not consider these corporate securities to be other-than-temporarily impaired at December 31, 2009. The Company also has the ability and intent to hold these securities until a recovery of their amortized cost, which may be at maturity. The previously discussed security which was designated as other-than-temporarily impaired in the first quarter of 2009 was evaluated separately because fair value exceeded its impaired value at December 31, 2009.

Federal Home Loan Bank Stock

The Bank is a member of the Federal Home Loan Bank (“FHLB”) of Boston. The FHLB is a cooperatively owned wholesale bank for housing and finance in the six New England States. Its mission is to support the residential mortgage and community-development lending activities of its members, which include over 450 financial institutions across New England. As a requirement of membership in the FHLB, the Bank must own a minimum required amount of FHLB stock, calculated periodically based primarily on its level of borrowings from the FHLB. The Company uses the FHLB for much of its wholesale funding needs. As of December 31, 2009 and December 31, 2008, the Company’s investment in FHLB stock totaled \$14.0 million.

FHLB stock is a non-marketable equity security and therefore is reported at cost, which equals par value. Shares held in excess of the minimum required amount are generally redeemable at par value. However, in the first quarter of 2009 the FHLB announced a moratorium on such redemptions in order to preserve its capital in response to current

The First Bancorp 2009 Form 10-k

market conditions and declining retained earnings. The minimum required shares are redeemable, subject to certain limitations, five years following termination of FHLB membership. The Bank has no intention of terminating its FHLB membership. The Company had no dividend income on its FHLB stock in 2009.

The FHLB recorded a net loss of \$186.8 million for the year ending December 31, 2009. Losses due to the other-than-temporary impairment of investments in private-label mortgage-backed securities resulted in a credit loss of \$444.1 million for the year. The associated non-credit loss on these securities in 2009 was \$885.4 million, which is recorded in capital rather than through earnings, and contributed largely to an accumulated other comprehensive loss of \$1.0 billion at December 31, 2009. Retained earnings increased to \$142.6 million at December 31, 2009, up from an accumulated deficit of \$19.7 million at December 31, 2008. This increase was mainly due to the effect of adopting FSP FAS 115-2 and FAS 124-2 on January 1, 2009, which reclassified \$349.1 million from accumulated deficit to accumulated other comprehensive loss. The FHLB remained in compliance with all regulatory capital ratios as of December 31, 2009, and, in the most recent information available, was classified "adequately capitalized" by its regulator, the Federal Housing Finance Agency, as of September 30, 2009.

Notwithstanding continued significant credit losses in its investment portfolio, the FHLB reported modest profitability for the fourth quarter. Net income for the fourth quarter of 2009 was \$6.3 million. The FHLB's net interest income continues to be strong, and totaled \$311.7 million for the year ending December 31, 2009, and \$88.0 million for the fourth quarter of 2009. The FHLB expects to see volatility in its earnings in the next several quarters as it works through continued challenges. In particular, high and prolonged unemployment rates, high delinquency and foreclosure rates, and declining housing prices may result in additional credit losses from the FHLB's private-label mortgage-backed securities investments. The FHLB will continue to monitor this situation closely in 2010.

The FHLB remains focused on returning the FHLB to stable profitability and enhancing the FHLB's capital base by building retained earnings. The FHLB's board of directors is unlikely to declare any dividends until a consistent pattern of positive net income is demonstrated, allowing growth in retained earnings, which will likely preclude a declaration of dividends for at least the first two quarters of 2010. The opportunity to pay a dividend after that, and the amount of any such dividend, will be a function of the success that the FHLB has in stabilizing earnings and building retained earnings, which will be driven in large part by the performance of its private-label mortgage-backed securities portfolio. The FHLB's current retained earnings target is estimated at \$925 million, a target adopted in connection with the FHLB's Revised Operating Plan to preserve capital in light of the various challenges to the FHLB. The FHLB's retained earnings target could be superseded by mandates from its primary regulator, the Federal Housing Finance Agency, either in the form of an order specific to the FHLB or by promulgation of new regulations requiring a level of retained earnings that is different from the FHLB's currently targeted level. Moreover, Management and the board of directors of the FHLB may, at any time, change the FHLB's methodology or assumptions for modeling the FHLB's retained earnings requirement. Either of these could result in the FHLB further increasing its retained earnings target or reducing or eliminating the dividend payout, as necessary.

The Company periodically evaluates its investment in FHLB stock for impairment based on, among other factors, the capital adequacy of the FHLB and its overall financial condition. No impairment losses have been recorded through December 31, 2009. The Bank will continue to monitor its investment in FHLB stock.

Lending Activities

The loan portfolio declined \$26.8 million or 2.7% in 2009, with total loans at \$952.5 million at December 31, 2009, compared to \$979.3 million at December 31, 2008. While commercial loans increased \$18.0 million or 4.7% between December 31, 2008 and December 31, 2009, residential term loans decreased by \$64.3 million or 14.9% during the same period as a result of borrowers refinancing home mortgage loans which were sold by the Bank to the secondary market. At the same time, municipal loans posted growth of \$11.1 million or 31.9%.

Commercial loans are comprised of three categories, commercial real estate loans, commercial construction loans and other commercial loans. Commercial real estate is primarily comprised of loans to small businesses collateralized by owner-occupied real estate, while other commercial is primarily comprised of loans to small businesses collateralized

by plant and equipment, commercial fishing vessels and gear, and limited inventory-based lending. Commercial real estate loans typically have a maximum loan-to-value ratio of 75% based upon current appraisal information at the time the loan is made. Land development loans typically have a maximum loan-to-value ratio of 65% based upon current appraisal information at the time the loan is made. Commercial construction loans comprise a very small portion of the portfolio, and at 37.7% of capital are well under the regulatory guidance of 100.0% of total risk-based capital. Commercial real estate loans are at 185.7% of total risk-based capital, well under the regulatory guidance of 300.0% of total risk-based capital. Municipal loans are comprised of loans to municipalities in the State of Maine for capitalized expenditures, construction projects or tax-anticipation notes. All municipal loans are considered general obligations of the municipality and as such are collateralized by the taxing ability of the municipality for repayment of debt.

The First Bancorp 2009 Form 10-k

Residential loans are also comprised of two categories, term loans, which include traditional amortizing home mortgages and home equity loans and lines of credit, and construction loans, which include loans for owner-occupied residential construction. Residential loans typically have a 75% to 80% loan to value based upon current appraisal information at the time the loan is made. Consumer loans are primarily short-term amortizing loans to individuals collateralized by automobiles, pleasure craft and recreations vehicles, with a maximum loan to value ratio of 80%-90% of the purchase price of the collateral. Consumer loans also include a small amount of unsecured short-term time notes to individuals. The following table summarizes the loan portfolio as of December 31, 2009, 2008, 2007, 2006 and 2005.

As of December 31,

Loan Concentrations

As of December 31, 2009, the Bank did not have any concentration of loans in one particular industry that exceeded 10% of its total loan portfolio.

Loans Held for Sale

Loans held for sale are carried at the lower of cost or market value, with a balance of \$2.9 million at December 31, 2009 compared with \$1.3 million at December 31, 2008. No recourse obligations have been incurred in connection with the sale of loans. Due to refinancing activity at substantially lower interest rates, \$115.7 million of residential mortgages were sold into the secondary market during 2009, much higher than the \$19.7 million sold in 2008. This resulted in non-interest income for mortgage origination and servicing in 2009 being up \$2.2 million or 1,514.5% compared to 2008.

Credit Risk Management and Allowance for Loan Losses

Credit risk is the risk of loss arising from the inability of a borrower to meet its obligations. We manage credit risk by evaluating the risk profile of the borrower, repayment sources, the nature of the underlying collateral, and other support given current events, conditions, and expectations. We attempt to manage the risk characteristics of our loan portfolio through various control processes, such as credit evaluation of borrowers, establishment of lending limits, and application of lending procedures, including the holding of adequate collateral and the maintenance of compensating balances. However, we seek to rely primarily on the cash flow of our borrowers as the principal source of repayment. Although credit policies and evaluation processes are designed to minimize our risk, Management recognizes that loan losses will occur and the amount of these losses will fluctuate depending on the risk characteristics of our loan portfolio, as well as general and regional economic conditions.

We provide for loan losses through the establishment of an allowance for loan losses which represents an estimated reserve for existing losses in the loan portfolio. We deploy a systematic methodology for determining our allowance that includes a quarterly review process, risk assessment, and adjustment to our allowance. We classify our portfolios as either consumer or commercial and monitor credit risk separately as discussed below. We evaluate the adequacy of

our allowance continually based on a review of all significant loans, with a particular emphasis on nonaccruing, past due, and other loans that we believe require special attention.

The allowance consists of three elements: (1) specific reserves and valuation allowances for individual credits; (2) general reserves for types or portfolios of loans based on historical loan loss experience, judgmentally adjusted for current conditions and credit risk concentrations; and (3) unallocated reserves. Combined specific reserves and general reserves by loan type are considered allocated reserves. All outstanding loans are considered in evaluating the adequacy of the allowance.

Adequacy of the allowance for loan losses is determined using a consistent, systematic methodology, which analyzes the risk inherent in the loan portfolio. In addition to evaluating the collectibility of specific loans when determining the adequacy of the allowance for loan losses, Management also takes into consideration other factors such

The First Bancorp 2009 Form 10-k

as changes in the mix and size of the loan portfolio, historic loss experience, the amount of delinquencies and loans adversely classified, economic trends, changes in credit policies, and experience, ability and depth of lending Management. The adequacy of the allowance for loan losses is assessed by an allocation process whereby specific loss allocations are made against certain adversely classified loans, and general loss allocations are made against segments of the loan portfolio which have similar attributes. The Company's historical loss experience, industry trends, and the impact of the local and regional economy on the Company's borrowers, in whole or in part, were considered by Management in determining the adequacy of the allowance for loan losses.

The allowance for loan losses is increased by provisions charged against current earnings. Loan losses are charged against the allowance when Management believes that the collectibility of the loan principal is unlikely. Recoveries on loans previously charged off are credited to the allowance. While Management uses available information to assess possible losses on loans, future additions to the allowance may be necessary based on increases in non-performing loans, changes in economic conditions, growth in loan portfolios, or for other reasons. Any future additions to the allowance would be recognized in the period in which they were determined to be necessary. In addition, various regulatory agencies periodically review the Company's allowance for loan losses as an integral part of their examination process. Such agencies may require the Company to record additions to the allowance based on judgments different from those of Management.

Commercial

Our commercial portfolio includes all secured and unsecured loans to borrowers for commercial purposes, including commercial lines of credit and commercial real estate. Our process for evaluating commercial loans includes performing updates on loans that we have rated for risk. Our non-performing commercial loans are generally reviewed individually to determine impairment, accrual status, and the need for specific reserves. Our methodology incorporates a variety of risk considerations, both qualitative and quantitative. Quantitative factors include our historical loss experience by loan type, collateral values, financial condition of borrowers, and other factors. Qualitative factors include judgments concerning general economic conditions that may affect credit quality, credit concentrations, the pace of portfolio growth, and delinquency levels; these qualitative factors are also considered in connection with the unallocated portion of our allowance for loan losses.

The process of establishing the allowance with respect to our commercial loan portfolio begins when a loan officer initially assigns each loan a risk rating, using established credit criteria. Approximately 50% of our outstanding loans and commitments are subject to review and validation annually by an independent consulting firm, as well as periodically by our internal credit review function. Our methodology employs Management's judgment as to the level of potential losses on existing loans based on our internal review of the loan portfolio, including an analysis of the borrowers' current financial position, and the consideration of current and anticipated economic conditions and their potential effects on specific borrowers and/or lines of business. In determining our ability to collect certain loans, we also consider the fair value of any underlying collateral. We also evaluate credit risk concentrations, including trends in large dollar exposures to related borrowers, industry and geographic concentrations, and economic and environmental factors.

Residential and Consumer

Consumer and residential mortgage loans are generally segregated into homogeneous pools with similar risk characteristics. Trends and current conditions in consumer and residential mortgage pools are analyzed and historical loss experience is adjusted accordingly. Quantitative and qualitative adjustment factors for the consumer and residential mortgage portfolios are consistent with those for the commercial portfolios. Certain loans in the consumer and residential portfolios identified as having the potential for further deterioration are analyzed individually to confirm the appropriate risk rating and accrual status, and to determine the need for a specific reserve. Consumer loans that are greater than 120 days past due are generally charged off. Residential loans that are greater than 90 days past due are generally placed in non-accrual status unless, through an internal evaluation, it can be demonstrated that the loans are both well secured and in the process of collection. In general, the foreclosure process is also begun at this

time.

Unallocated

The unallocated portion of the allowance is intended to provide for losses that are not identified when establishing the specific and general portions of the allowance and is based upon Management's evaluation of various conditions that are not directly measured in the determination of the portfolio and loan specific allowances. Such conditions include general economic and business conditions affecting our lending area, credit quality trends (including trends in delinquencies and nonperforming loans expected to result from existing conditions), loan volumes and concentrations, specific industry conditions within portfolio categories, recent loss experience in particular loan categories, duration of the current business cycle, bank regulatory examination results, findings of external loan review examiners, and

The First Bancorp 2009 Form 10-k

Page 32

Management's judgment with respect to various other conditions including loan administration and management and the quality of risk identification systems. Management reviews these conditions quarterly. We have risk management practices designed to ensure timely identification of changes in loan risk profiles; however, undetected losses may exist inherently within the loan portfolio. The judgmental aspects involved in applying the risk grading criteria, analyzing the quality of individual loans, and assessing collateral values can also contribute to undetected, but probable, losses.

The allowance for loan losses includes reserve amounts assigned to individual loans on the basis of loan impairment. Certain loans are evaluated individually and are judged to be impaired when Management believes it is probable that the Company will not collect all of the contractual interest and principal payments as scheduled in the loan agreement. Under this method, loans are selected for evaluation based on internal risk ratings or non-accrual status. A specific reserve is allocated to an individual loan when that loan has been deemed impaired and when the amount of a probable loss is estimable on the basis of its collateral value, the present value of anticipated future cash flows, or its net realizable value. At December 31, 2009, impaired loans with specific reserves totaled \$12.2 million (all of these loans were on non-accrual status) and the amount of such reserves was \$2.2 million. This compares to impaired loans with specific reserves of \$7.6 million at December 31, 2008 (all of these loans were on non-accrual status) at which time the amount of such reserves was \$2.0 million. All of these analyses are reviewed and discussed by the Directors' Loan Committee, and recommendations from these processes provide Management and the Board of Directors with independent information on loan portfolio condition. Our total allowance at December 31, 2009 is considered by Management to be adequate to address the credit losses inherent in the current loan portfolio. Management views the level of the allowance for loan losses as adequate. However, our determination of the appropriate allowance level is based upon a number of assumptions we make about future events, which we believe are reasonable, but which may or may not prove valid. Thus, there can be no assurance that our charge-offs in future periods will not exceed our allowance for loan losses or that we will not need to make additional increases in our allowance for loan losses. The allowance for loan losses totaled \$13.6 million at December 31, 2009, compared to \$8.8 million at December 31, 2008. The increase in the allowance reflects Management's ongoing application of its methodologies to establish the allowance, which included increases in the allowance for collateral dependent impaired loans (specific reserves), which increased \$0.2 million in 2009 from \$2.0 million at December 31, 2008 to \$2.2 million at December 31, 2009. The specific loans that make up those categories change from period to period. Impairment on those loans, which would be reflected in the allowance for loan losses, might or might not exist, depending on the specific circumstances of each loan. Increases to reflect negative market trends and other qualitative factors (unallocated reserves) increased \$1.2 million in 2009 from \$676,000 on December 31, 2008 to \$1.9 million on December 31, 2009. The following table summarizes our allocation of allowance by loan type as of December 31, 2009, 2008, 2007, 2006 and 2005. The percentages are the portion of each loan type to total loans.

Based upon Management’s evaluation, provisions are made to maintain the allowance as a best estimate of inherent losses within the portfolio. The provision for loan losses to maintain the allowance was \$12.2 million in 2009 compared to \$4.7 million in 2008. Net chargeoffs were \$7.3 million in 2009 compared to net chargeoffs of \$2.7 million in 2008. Our allowance as a percentage of outstanding loans has increased from 0.90% as of December 31, 2008 to 1.43% as of December 31, 2009, reflecting the changes in our loss estimates and the increases resulting from the application of our loss estimate methodology.

The First Bancorp 2009 Form 10-k

Management believes the allowance for loan losses is adequate as of December 31, 2009. In Management's opinion, the increase in provision for loan losses and the corresponding increase in the allowance for loan losses is directionally consistent with the deterioration in credit quality of our loan portfolio and corresponding increased levels of specific reserves and unallocated reserves, as well as with the performance of the national and local economies, higher levels of unemployment and the outlook for the recession continuing for some time to come.

Nonperforming Loans

Nonperforming loans are comprised of loans which have been determined to be impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. A loan is not considered impaired during a minimal period of delay in payment if we expect to collect all amounts due, including past-due interest. When a loan becomes nonperforming (generally 90 days past due), it is evaluated for collateral dependency based upon the most recent appraisal. If the collateral value is lower than the outstanding loan balance plus accrued interest and estimated selling costs, the loan is placed on non-accrual status, all accrued interest is reversed from interest income, and a specific reserve is established for the difference between the loan balance and the collateral value less selling costs. At the same time, a new independent, third-party appraisal may be ordered, based on the currency of the most recent appraisal and the size of the loan, and upon receipt of the revised appraisal – typically 30 days for residential loans and 60-90 days for commercial loans – the loan may have an additional specific reserve or write down based upon the new appraisal information.

On an ongoing basis, if a non-performing loan is collateral dependent as its source of repayment, we may have an independent appraisal done periodically, based on the currency of the most recent appraisal and the size of the loan, and an additional specific reserve or write down based upon the new appraisal information will be made if appropriate. Once a loan is placed on nonaccrual, it remains in nonaccrual status until the loan is current as to payment of both principal and interest and the borrower demonstrates the ability to pay and remain current. All payments made on nonaccrual loans are applied to the principal balance of the loan.

Nonperforming loans, expressed as a percentage of total loans, totaled 1.95% at December 31, 2009 compared to 1.27% at December 31, 2008. The following table shows the distribution of nonperforming assets and loans greater than 90 days past due as of December 31, 2009, 2008, 2007, 2006 and 2005:

Dollars in thousands	As of December 31,				
	2009	2008	2007	2006	2005
Commercial					
Real estate	\$6,589	\$7,477	\$734	\$1,105	\$744
Construction	458	-	-	-	-
Other	2,735	2,908	2,011	2,285	1,697
Municipal	-	-	-	-	-
Residential					
Term	6,322	6,594	2,109	606	914
Construction	3,182	-	-	-	-
Home equity line of credit	143	313	299	190	20
Consumer	309	137	1	46	45
Total loans 90 or more days past due	\$19,738	\$17,429	\$5,154	\$4,232	\$3,420
Non-accrual loans included in above total	\$18,562	\$12,449	\$2,867	\$3,485	\$3,095

Impaired loans increased \$6.1 million from December 31, 2008 to December 31, 2009, with the number of loans increasing by 58 from 81 to 139 during the same period. Impaired commercial loans decreased \$925,000 from December 31, 2008 to December 31, 2009. The specific allowance for impaired commercial loans increased from \$1.8 million at December 31, 2008 to \$2.4 million as of December 31, 2009, which represented the fair value deficiencies for those loans for which the net fair value of the collateral was estimated at less than our carrying amount of the loan. Impaired residential loans increased \$3.7 million from December 31, 2008 to December 31, 2009, with the recession and resulting higher unemployment leading to higher levels of delinquent borrowers. Impaired consumer loans were up slightly from December 31, 2008 to December 31, 2009.

The First Bancorp 2009 Form 10-k

Troubled Debt Restructures

A restructuring of debt constitutes a troubled debt restructuring (“TDR”) if the Bank, for economic or legal reasons related to the borrower’s financial difficulties, grants a concession to the borrower that it would not otherwise consider. To determine whether or not a loan should be classified as a TDR, Management evaluates a loan based upon the following criteria:

- The borrower demonstrates financial difficulty; common indicators include past due status with bank obligations, substandard credit bureau reports, or an inability to refinance with another lender, and
- The Bank has granted a concession; common concession types include maturity date extension, interest rate adjustments to below market pricing, and deferment of payments.

As of December 31, 2009 we had 52 loans with a value of \$8.4 million that have been restructured due to the borrower’s inability to maintain a current status on the loan that were classified as TDRs. This compares to no loans classified as TDRs as of December 31, 2008. As of December 31, 2009, six of the loans classified as TDRs with a total balance of \$835,000 were greater than 30 days past due and one loan with a balance of \$234,000 was in the process of foreclosure. Management is aware of only one TDR with a balance of \$77,000 in which the borrower is in the process of bankruptcy.

Potential Problem Loans

Potential problem loans consist of classified accruing commercial and commercial real estate loans that were between 30 and 89 days past due. Such loans are characterized by weaknesses in the financial condition of borrower or collateral deficiencies. Based on historical experience, the credit quality of some of these loans may improve due to changes in collateral values or the financial condition of the borrower, while the credit quality of other loans may deteriorate, resulting in some amount of loss. These loans are not included in the analysis of non-accrual loans above. At December 31, 2009, there were 28 potential problem loans with a balance of \$8.7 million or 0.9% of total loans. This compares to 26 loans with a balance of \$2.0 million or 0.2% of total loans at December 31, 2008. As of December 31, 2009, there were 42 loans in the process of foreclosure with a total balance of \$8.0 million.

Past Due Loans

The Bank’s overall loan delinquency ratio was 3.14% at December 31, 2009, versus 2.99% at December 31, 2008. Loans 90 days delinquent and accruing decreased from \$5.0 million at December 31, 2008 to \$1.2 million as of December 31, 2009. This total is made up of 18 loans, with the largest loan totaling \$391,000. We expect to collect all amounts due on these loans, including interest.

The following table sets forth loan delinquencies as of December 31, 2009, 2008, 2007, 2006 and 2005:

Dollars in thousands	As of December 31,				
	2009	2008	2007	2006	2005

The First Bancorp 2009 Form 10-k

Other Real Estate Owned

Other real estate owned and repossessed assets (“OREO”) are comprised of properties or other assets acquired through a foreclosure proceeding, or acceptance of a deed or title in lieu of foreclosure. Real estate acquired through foreclosure is carried at the lower of fair value less estimated cost to sell. At December 31, 2009, there were 18 properties owned with a net OREO balance of \$5.3 million, net of an allowance for losses of \$0.6 million, compared to December 31, 2008 when there were nine properties owned with a net OREO balance of \$2.4 million, net of an allowance for losses of \$0.3 million. The following table presents the composition of other real estate owned as of December 31, 2009, 2008, 2007, 2006 and 2005:

The First Bancorp 2009 Form 10-k

Funding, Liquidity and Capital Resources

As of December 31, 2009 the Bank had primary sources of liquidity of \$206.8 million. It is Management's opinion that this is adequate. In addition, the Bank has an additional \$142.6 million in borrowing capacity under the Federal Reserve Bank of Boston's Borrower in Custody program, \$18.0 million in credit lines with correspondent banks, and \$24.9 million in unencumbered securities available as collateral for borrowing. These bring the Bank's primary sources of liquidity to \$392.3 million. The Asset/Liability Committee ("ALCO") establishes guidelines for liquidity in its Asset/Liability policy and monitors internal liquidity measures to manage liquidity exposure. Based on its assessment of the liquidity considerations described above, Management believes the Company's sources of funding will meet anticipated funding needs.

Liquidity is the ability of a financial institution to meet maturing liability obligations and customer loan demand. The Bank's primary source of liquidity is deposits, which funded approximately 70% of total average assets in 2009. While the generally preferred funding strategy is to attract and retain low cost deposits, the ability to do so is affected by competitive interest rates and terms in the marketplace. Other sources of funding include discretionary use of purchased liabilities (e.g., FHLB term advances and other borrowings), cash flows from the securities portfolios and loan repayments. Securities designated as available for sale may also be sold in response to short-term or long-term liquidity needs although Management has no intention to do so at this time.

The Bank has a detailed liquidity funding policy and a contingency funding plan that provide for the prompt and comprehensive response to unexpected demands for liquidity. Management has developed quantitative models to estimate needs for contingent funding that could result from unexpected outflows of funds in excess of "business as usual" cash flows. In Management's estimation, risks are concentrated in two major categories: runoff of in-market deposit balances and the inability to renew wholesale sources of funding. Of the two categories, potential runoff of deposit balances would have the most significant impact on contingent liquidity. Our modeling attempts to quantify deposits at risk over selected time horizons. In addition to these unexpected outflow risks, several other "business as usual" factors enter into the calculation of the adequacy of contingent liquidity including payment proceeds from loans and investment securities, maturing debt obligations and maturing time deposits. The Bank has established collateralized borrowing capacity with the Federal Reserve Bank of Boston and also maintains additional collateralized borrowing capacity with the FHLB in excess of levels used in the ordinary course of business as well as Fed Funds lines with two correspondent banks.

Deposits

During 2009, total deposits decreased by \$3.0 million or 0.3%, ending the year at \$922.7 million compared to \$925.7 million at December 31, 2008. This decrease was primarily due to a decrease in money market accounts. Average deposits, however, increased \$94.6 million in 2009, as shown in the following table which sets forth the average daily balance for the Bank's principal deposit categories for each period:

Dollars in thousands	Years ended December 31,			% change	
	2009	2008	2007	2009 vs.	2008
Demand deposits	\$65,567	\$63,495	\$61,678	3.26	%
NOW accounts	106,895	105,689	102,083	1.14	%
Money market accounts	108,922	123,699	125,370	-11.95	%
Savings	87,921	86,018	91,967	2.21	%
Certificates of deposit	578,713	474,517	438,131	21.96	%
Total deposits	\$948,018	\$853,418	\$819,229	11.08	%

The average cost of deposits (including non-interest-bearing accounts) was 1.25% for the year ended December 31, 2009, compared to 2.69% for the year ended December 31, 2008 and 3.75% for the year ended December 31, 2007. The following table sets forth the average cost of each category of interest-bearing deposits for the periods indicated.

	Years ended December 31,		
	2009	2008	2007
NOW	0.35%	0.63%	0.66%
Money market	1.07%	2.88%	4.82%
Savings	0.62%	0.97%	1.12%
Certificates of deposit	1.75%	3.78%	5.12%
Total interest-bearing deposits	1.35%	2.90%	3.93%

Of all certificates of deposit, \$452.1 million or 81.3% will mature by December 31, 2010. As of December 31, 2009, the Bank held a total of \$343.2 million in certificate of deposit accounts with balances in excess of \$100,000. The following table summarizes the time remaining to maturity for these certificates of deposit:

Dollars in thousands	As of December 31,	
	2009	2008
Within 3 Months	\$184,574	\$214,491
3 Months through 6 months	94,778	35,475
6 months through 12 months	27,709	22,631
Over 12 months	36,143	18,200
Total	\$343,204	\$290,797

Borrowed Funds

Borrowed funds consists mainly of advances from the Federal Home Loan Bank of Boston (FHLB) which are secured by FHLB stock, funds on deposit with FHLB, U.S. Treasury and Agency notes and mortgage-backed securities and qualifying first mortgage loans. As of December 31, 2009, the Bank's total FHLB borrowing capacity was \$253.4 million, of which \$54.0 million was unused. As of December 31, 2009, advances totaled \$199.4 million, with a weighted average interest rate of 2.90% and remaining maturities ranging from three days to 15 years. This compares to advances totaling \$220.4 million, with a weighted average interest rate of 3.38% and remaining maturities ranging from two days to 16 years, as of December 31, 2008. During 2009, the Bank shifted a portion of its funding from borrowed funds to wholesale certificates of deposit to increase the Bank's immediate sources of liquidity by increasing collateral capacity at the FHLB. The decrease in the weighted average rate paid on borrowed funds in 2009 compared to 2008 is consistent with the interest rate policy and actions of the FOMC.

The Bank offers securities repurchase agreements to municipal and corporate customers as an alternative to deposits. The balance of these agreements as of December 31, 2009 was \$49.7 million, compared to \$48.8 million on December 31, 2008, and \$41.1 million on December 31, 2007. The weighted average rates of these agreements were 1.57% as of December 31, 2009, compared to 2.12% as of December 31, 2008 and 3.46% as of December 31, 2007.

The Bank participates in the Note Option Depository which is offered by the U.S. Treasury Department. Under the Treasury Tax and Loan Note program, the Bank accumulates tax deposits made by its customers and is eligible to receive additional Treasury Direct investments up to an established maximum balance of \$5.0 million. The balances invested by the Treasury are increased and decreased at the discretion of the Treasury. The deposits are generally made at interest rates that are favorable in comparison to other borrowings. The balances on the Treasury Tax and Loan note at December 31, 2009, 2008, and 2007 were \$0.6 million, \$2.9 million, and \$2.0 million, respectively.

Edgar Filing: First Bancorp, Inc /ME/ - Form 10-K

The maximum amount of borrowed funds outstanding at any month-end during each of the last three years was \$306.5 million at the end of February in 2009, \$331.7 million at the end of January in 2008, and \$316.7 million at the end of December in 2007. The average amount outstanding during 2009 was \$248.3 million with a weighted average interest rate of 2.84%. This compares to an average outstanding amount of \$293.7 million with a weighted average interest rate of 3.62% in 2008, and an average outstanding amount of \$215.4 million with a weighted average interest rate of 4.71% in 2007. The decline in average cost realized during 2009 is consistent with the interest rate policy and actions of the FOMC.

The First Bancorp 2009 Form 10-k

Page 39

Capital Resources

Shareholders' equity as of December 31, 2009 was \$147.9 million, compared to \$117.2 million as of December 31, 2008. The Company's earnings for 2009, net of dividends paid, plus participation in the U.S. Treasury Capital Purchase Program ("CPP"), added to shareholders' equity. The net unrealized loss on available-for-sale securities, presented in accordance with FASB ASC Topic 740 "Investments – Debt and Equity Securities", decreased by \$0.7 million from December 31, 2008.

Capital at December 31, 2009 was sufficient to meet the requirements of regulatory authorities. Leverage capital of the Company, or total shareholders' equity divided by average total assets for the current quarter less goodwill and any net unrealized gain or loss on securities available for sale and postretirement benefits, stood at 9.44% on December 31, 2009 and 7.07% at December 31, 2008. To be rated "well-capitalized", regulatory requirements call for a minimum leverage capital ratio of 5.00%. At December 31, 2009, the Company had tier-one risk-based capital of 13.70% and tier-two risk-based capital of 14.96%, versus 10.11% and 11.13%, respectively, at December 31, 2008. To be rated "well-capitalized", regulatory requirements call for minimum tier-one and tier-two risk-based capital ratios of 6.00% and 10.00%, respectively. The Company's actual levels of capitalization were comfortably above the standards to be rated "well-capitalized" by regulatory authorities.

During 2009, the Company declared cash dividends of \$0.195 per share in each quarter or \$0.78 per share for the year. The Company's dividend payout ratio (dividends declared per share divided by earnings per share) was 63.93% of earnings in 2009 compared to 52.76% in 2008 and 51.49% in 2007. The ability of the Company to pay cash dividends to its Shareholders depends on receipt of dividends from its subsidiary, the Bank. A total of \$8.6 million in dividends was declared in 2009 from the Bank to the Company.

In determining future dividend payout levels, the Board of Directors carefully analyzes capital requirements and earnings retention, as set forth in the Company's Dividend Policy. The Bank may pay dividends to the Company out of so much of its net profits as the Bank's directors deem appropriate, subject to the limitation that the total of all dividends declared by the Bank in any calendar year may not exceed the total of its net profits of that year combined with its retained net profits of the preceding two years. Based upon this restriction, the amount available for dividends in 2010 will be that year's net income plus \$11.8 million. The payment of dividends from the Bank to the Company may be additionally restricted if the payment of such dividends resulted in the Bank failing to meet regulatory capital requirements. Also, pursuant to restrictions applicable to the Company as a consequence of its participation in the CPP program discussed below, the Company may not increase its quarterly dividend above \$0.195 per share during the first three years that the CPP shares are outstanding without the consent of the U.S. Treasury.

In 2009, 21,000 shares of common stock were issued in conjunction with the exercise of stock options for consideration totaling \$134,000 and 42,698 shares were issued via employee stock programs and the dividend reinvestment plan during the year for consideration totaling \$702,000. The Company also purchased 15,925 shares of common stock for total consideration of \$263,000 during the year.

On November 21, 2008, the Company received approval for a \$25.0 million preferred stock investment by the U.S. Treasury under the Capital Purchase Program. The Company completed the CPP investment transaction on January 9, 2009. The CPP Shares call for cumulative dividends at a rate of 5.0% per year for the first five years, and at a rate of 9.0% per year in following years. The CPP Shares qualify as Tier 1 capital on the Company's books for regulatory purposes and will rank senior to the Company's common stock and senior or at an equal level in the Company's capital structure to any other shares of preferred stock the Company may issue in the future. During the first three years these securities remain outstanding, the Company may increase the dividend on shares of its common stock only with the consent of the U.S. Treasury.

On August 16, 2007, the Company announced that its Board of Directors had authorized a program for the repurchase of up to 300,000 shares of the Company's common stock or approximately 3.1% of the outstanding shares. This program ended on August 16, 2009 and under the program the Company repurchased 182,869 shares at an average price of \$15.63 and at a total cost of \$2.9 million. As a consequence of the Company's issuance of securities under the U.S. Treasury's CPP program, its ability to repurchase stock while such securities remain outstanding is restricted to

purchases from employee benefit plans. In 2009, the Company repurchased 11,412 shares from employee benefit plans at an average price of \$14.73 per share and for total proceeds of \$168,000.

Except as identified in Item 1A, "Risk Factors", Management knows of no present trends, events or uncertainties that will have, or are reasonably likely to have, a material effect on capital resources, liquidity, or results of operations.

The First Bancorp 2009 Form 10-k

Page 40

Goodwill

On January 14, 2005, the Company completed the acquisition of FNB Bankshares of Bar Harbor, Maine, and its subsidiary, The First National Bank of Bar Harbor, which was merged into the Bank. The total value of the transaction was \$48.0 million, and all of the voting equity interest of FNB Bankshares was acquired in the transaction. As of December 31, 2009, the Company completed its annual review of goodwill and determined there has been no impairment.

Contractual Obligations

The following table sets forth the contractual obligations and commitments to extend credit of the Company as of December 31, 2009:

Dollars in thousands	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Borrowed funds	\$249,778	149,601	20,000	30,000	50,177
Operating leases	907	190	334	131	252
Certificates of deposit	556,097	452,129	56,379	47,589	-
Total	\$806,782	601,920	76,713	77,720	50,429
Unused lines, collateralized by residential real estate	\$58,751	58,751	-	-	-
Other unused commitments	76,125	76,125	-	-	-
Standby letters of credit	3,449	3,449	-	-	-
Commitments to extend credit	4,512	4,512	-	-	-
Total loan commitments and unused lines of credit	\$142,837	142,837	-	-	-

The Company is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These include commitments to originate loans, commitments for unused lines of credit, and standby letters of credit. The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated balance sheets. Commitments for unused lines are agreements to lend to a customer provided there is no violation of any condition established in the contract and generally have fixed expiration dates. Standby letters of credit are conditional commitments issued by the Bank to guarantee a customer's performance to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers. As of December 31, 2009, the Company's off-balance-sheet activities consisted entirely of commitments to extend credit.

Off-Balance Sheet Financial Instruments

No material off-balance sheet risk exists that requires a separate liability presentation.

Capital Purchases

In 2009, the Company made capital purchases totaling \$3.8 million. This cost will be amortized over an average of seven years, adding approximately \$543,000 to pre-tax operating costs per year. The capital purchases included real estate improvements for branch premises and equipment related to technology.

Effect of Future Interest Rates on Post-retirement Benefit Liabilities

In evaluating the Company's post-retirement benefit liabilities, Management believes changes in discount rates which have occurred pursuant to newly enacted Federal legislation will not have a significant impact on the Company's future operating results or financial condition.

The First Bancorp 2009 Form 10-k

Page 41

ITEM 7A. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, and the Company's market risk is composed primarily of interest rate risk. The Bank's Asset/Liability Committee (ALCO) is responsible for reviewing the interest rate sensitivity position of the Company and establishing policies to monitor and limit exposure to interest rate risk. All guidelines and policies established by ALCO have been approved by the Board of Directors.

Asset/Liability Management

The primary goal of asset/liability management is to maximize net interest income within the interest rate risk limits set by ALCO. Interest rate risk is monitored through the use of two complementary measures: static gap analysis and earnings simulation modeling. While each measurement has limitations, taken together they present a reasonably comprehensive view of the magnitude of interest rate risk in the Company, the level of risk through time, and the amount of exposure to changes in certain interest rate relationships.

Static gap analysis measures the amount of repricing risk embedded in the balance sheet at a point in time. It does so by comparing the differences in the repricing characteristics of assets and liabilities. A gap is defined as the difference between the principal amount of assets and liabilities which reprice within a specified time period. The cumulative one-year gap, at year-end, was +0.72% of total assets, which compares to -8.95% of assets at December 31, 2008. ALCO's policy limit for the one-year gap is plus or minus 20% of total assets. Core deposits with non-contractual maturities are presented based upon historical patterns of balance attrition which are reviewed at least annually. The gap repricing distributions include principal cash flows from residential mortgage loans and mortgage-backed securities in the time frames in which they are expected to be received. Mortgage prepayments are estimated by applying industry median projections of prepayment speeds to portfolio segments based on coupon range and loan age.

The Company's summarized static gap, as of December 31, 2009, is presented in the following table:

	0-90	90-365	1-5	5+
Dollars in thousands	Days	Days	Years	Years
Investment securities at amortized cost	\$28,564	\$69,880	\$98,862	\$75,260

The earnings simulation model forecasts one- and two-year net interest income under a variety of scenarios that incorporate changes in the absolute level of interest rates as well as basis risk, as represented by changes in the shape of the yield curve and changes in interest rate relationships. Management evaluates the effects on income of

alternative interest rate scenarios against earnings in a stable interest rate environment. This analysis is also most useful in determining the short-run earnings exposures to changes in customer behavior involving loan payments and deposit additions and withdrawals.

The most recent simulation model projects net interest income would decrease by approximately 0.1% of stable-rate net interest income if short-term rates fall gradually by one percentage point over the next year, and decrease by approximately 1.0% if short-term rates rise gradually by two percentage points. Both scenarios are within ALCO's policy limit of a decrease in net interest income of no more than 10.0% given a move in interest rates of 2.0% up or 1.0% down, in the first year. Management believes this reflects a reasonable interest rate risk position. Within a two-year horizon and assuming no additional change in interest rates, the model forecasts that net interest income would be

The First Bancorp 2009 Form 10-k

Page 42

lower than that earned in a stable rate environment by 0.8% in a falling rate scenario and decrease by 4.4% in a rising rate scenario.

The change in net interest income projections between December 31, 2009, and December 31, 2008, is attributable to the change in the Company's mix of assets and liabilities, as well as lowering of interest rates by the FOMC and the corresponding steepening of the yield curve which occurred in 2008 and 2009. A summary of the Company's interest rate risk simulation modeling, as of December 31, 2009 and 2008 is presented in the following table:

Changes in Net Interest Income	2009	2008
Year 1		
Projected changes if rates decrease by 1.0%	-0.1%	+1.8%
Projected change if rates increase by 2.0%	-1.0%	-1.2%
Year 2		
Projected changes if rates decrease by 1.0%	-0.8%	-0.5%
Projected change if rates increase by 2.0%	-4.4%	-6.4%

This dynamic simulation model includes assumptions about how the balance sheet is likely to evolve through time and in different interest rate environments. Loans and deposits are projected to maintain stable balances. All maturities, calls and prepayments in the securities portfolio are assumed to be reinvested in similar assets. Mortgage loan prepayment assumptions are developed from industry median estimates of prepayment speeds for portfolios with similar coupon ranges and seasoning. Non-contractual deposit volatility and pricing are assumed to follow historical patterns. The sensitivities of key assumptions are analyzed annually and reviewed by ALCO.

Interest Rate Risk Management

A variety of financial instruments can be used to manage interest rate sensitivity. These may include the securities in the investment portfolio, interest rate swaps, and interest rate caps and floors. Frequently called interest rate derivatives, interest rate swaps, caps and floors have characteristics similar to securities but possess the advantages of customization of the risk-reward profile of the instrument, minimization of balance sheet leverage and improvement of liquidity. As of December 31, 2009, the Company had a de minimus interest rate cap for interest rate risk management.

Management believes that the current level of interest rate risk is acceptable as of December 31, 2009. The Company engages an independent consultant to periodically review its interest rate risk position, as well as the effectiveness of simulation modeling and reasonableness of assumptions used. As of December 31, 2009, there were no significant differences between the views of the independent consultant and Management regarding the Company's interest rate risk exposure.

ITEM 8. Financial Statements and Supplementary Data

Consolidated Balance Sheets

The First Bancorp, Inc. and Subsidiary

As of December 31,	2009	2008
Assets		
Cash and cash equivalents	\$ 15,332,000	\$ 16,856,000

The First Bancorp 2009 Form 10-k

Notes to Consolidated Financial Statements

Nature of Operations

The First Bancorp, Inc. (the “Company”) through its wholly-owned subsidiary, The First, N.A. (“the Bank”), provides a full range of banking services to individual and corporate customers from fourteen offices in coastal Maine. First Advisors, a division of the Bank, provides investment management, private banking and financial planning services. At the Company’s Annual Meeting of Shareholders on April 30, 2008, the Company’s name was changed to The First Bancorp, Inc. from First National Lincoln Corporation.

Note 1. Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and the Bank. All intercompany accounts and transactions have been eliminated in consolidation.

Subsequent Events

Events occurring subsequent to December 31, 2009, have been evaluated as to their potential impact to the financial statements.

Accounting Standards Codification

In June 2009, the Financial Accounting Standards Board (“FASB”) issued an accounting standard which established Accounting Standards Codification (the “Codification” or “ASC”) to become the single source of authoritative generally accepted accounting principles (“GAAP”) recognized by the FASB to be applied by nongovernmental entities, with the exception of guidance issued by the U.S. Securities and Exchange Commission (the “SEC”) and its staff. All guidance contained in the Codification carries an equal level of authority. The Codification is not intended to change GAAP, but rather is expected to simplify accounting research by reorganizing current GAAP into approximately 90 accounting topics. The Company adopted this accounting standard in preparing the Consolidated Financial Statements for the period ended September 30, 2009. The adoption of this accounting standard, which was subsequently codified into FASB ASC Topic 105, “Generally Accepted Accounting Principles,” had no impact on the Company’s consolidated financial statements.

Use of Estimates in Preparation of Financial Statements

In preparing the financial statements in accordance with accounting principles generally accepted in the United States of America, Management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the balance sheet and revenues and expenses for the reporting period. Actual results could differ significantly from those estimates. Material estimates that are particularly susceptible to significant change in the near-term relate to the determination of the allowance for loan losses, the valuation of mortgage servicing rights, and goodwill.

Investment Securities

Investment securities are classified as available for sale or held to maturity when purchased. There are no trading account securities. Securities available for sale consist primarily of debt securities which Management intends to hold for indefinite periods of time. They may be used as part of the Bank’s funds management strategy, and may be sold in response to changes in interest rates or prepayment risk, changes in liquidity needs, or for other reasons. They are accounted for at fair value, with unrealized gains or losses adjusted through shareholders’ equity, net of related income taxes. Securities to be held to maturity consist primarily of debt securities which Management has acquired solely for long-term investment purposes, rather than for purposes of trading or future sale. For securities to be held to maturity, Management has the intent and the Bank has the ability to hold such securities until their respective maturity dates. Such securities are carried at cost adjusted for the amortization of premiums and accretion of discounts. Investment

securities transactions are accounted for on a settlement date basis; reported amounts would not be materially different from those accounted for on a trade date basis. Gains and losses on the sales of investment securities are determined using the amortized cost of the security. For declines in the fair value of individual debt securities available for sale below their cost that are deemed to be other than temporary, where the Company does not intend to sell the security and it is more likely than not that the Company will not be required to sell the security before recovery of its amortized cost basis, the other-than-temporary decline in the fair value of the debt security related to 1) credit loss is recognized in earnings and 2) other factors is recognized in other comprehensive income or loss. Credit loss is deemed to exist if the present value of expected future cash flows using the effective rate at acquisition is less than the amortized cost basis of

The First Bancorp 2009 Form 10-k

Page 48

the debt security. For individual debt securities where the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost, the other-than-temporary impairment is recognized in earnings equal to the entire difference between the security's cost basis and its fair value at the balance sheet date.

Loans Held for Sale

Loans held for sale consist of residential real estate mortgage loans and are carried at the lower of aggregate cost or market value, as determined by current investor yield requirements.

Loans

Loans are generally reported at their outstanding principal balances, adjusted for chargeoffs, the allowance for loan losses and any deferred fees or costs to originate loans. Loan commitments are recorded when funded.

Loan Fees and Costs

Loan origination fees and certain direct loan origination costs are deferred and recognized in interest income as an adjustment to the loan yield over the life of the related loans. The unamortized net deferred fees and costs are included on the balance sheets with the related loan balances, and the amortization is included with the related interest income.

Allowance for Loan Losses

Loans considered to be uncollectible are charged against the allowance for loan losses. The allowance for loan losses is maintained at a level determined by Management to be adequate to absorb probable losses. This allowance is increased by provisions charged to operating expenses and recoveries on loans previously charged off. Arriving at an appropriate level of allowance for loan losses necessarily involves a high degree of judgment. In determining the appropriate level of allowance for loan losses, Management takes into consideration several factors, including reviews of individual non-performing loans and performing loans listed on the watch report requiring periodic evaluation, loan portfolio size by category, recent loss experience, delinquency trends and current economic conditions. Loans more than 30 days past due are considered delinquent. Impaired loans, including restructured loans, are measured at the present value of expected future cash flows discounted at the loan's effective interest rate or at the fair value of the collateral if the loan is collateral dependent. Management takes into consideration impaired loans in addition to the above mentioned factors in determining the appropriate level of allowance for loan losses.

Goodwill and Identified Intangible Assets

Intangible assets include the excess of the purchase price over the fair value of net assets acquired (goodwill) from the acquisition of FNB Bankshares in 2005 as well as the core deposit intangible related to the same acquisition. The core deposit intangible is amortized on a straight-line basis over ten years. Amortization expense for 2009, 2008 and 2007 was \$283,000 and the amortization expense for each year until fully amortized will be \$283,000. The straight-line basis is used because the Company does not expect significant run off in the core deposits acquired. The Company annually evaluates goodwill, and periodically evaluates other intangible assets for impairment on the basis of whether these assets are fully recoverable from projected, undiscounted net cash flows of the acquired company. At December 31, 2009, the Company determined goodwill and other intangible assets were not impaired.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between financial statement carrying amounts of assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period the change is enacted.

Accrual of Interest Income and Expense

Interest on loans and investment securities is taken into income using methods which relate the income earned to the balances of loans and investment securities outstanding. Interest expense on liabilities is derived by applying applicable interest rates to principal amounts outstanding. Recording of interest income on problem loans, which includes impaired loans, ceases when collectibility of principal and interest within a reasonable period of time becomes doubtful. Cash payments received on non-accrual loans, which includes impaired loans, are applied to reduce the loan's principal balance until the remaining principal balance is deemed collectible, after which interest is recognized when collected. As a general rule, a loan may be restored to accrual status when payments are current and repayment of the remaining contractual amounts is expected or when it otherwise becomes well secured and in the process of collection.

The First Bancorp 2009 Form 10-k

Page 49

Premises and Equipment

Premises, furniture and equipment are stated at cost, less accumulated depreciation. Depreciation expense is computed by straight-line and accelerated methods over the asset's estimated useful life.

Other Real Estate Owned (OREO)

Real estate acquired by foreclosure or deed in lieu of foreclosure is transferred to OREO and recorded at fair market value, less estimated costs to sell, based on appraised value at the date actually or constructively received. Loan losses arising from the acquisition of such property are charged against the allowance for loan losses. Subsequent provisions to reduce the carrying value of a property are recorded to the allowance for OREO losses and a charge to operations on a specific property basis.

Earnings Per Share

Basic earnings per share data are based on the weighted average number of common shares outstanding during each year. Diluted earnings per share gives effect to the stock options and warrants outstanding, determined by the treasury stock method.

Post-Retirement Benefits

The cost of providing post-retirement benefits is accrued during the active service period of the employee or director.

Comprehensive Income

Comprehensive income includes net income and other comprehensive income (loss), which is comprised of the change in unrealized gains and losses on securities available for sale, net of tax, and unrealized gains and loss related to post-retirement benefit costs, net of tax, is disclosed in the consolidated statements of changes in shareholders' equity.

Segments

The First Bancorp, Inc., through the branches of its subsidiary, The First, N.A., provides a broad range of financial services to individuals and companies in coastal Maine. These services include demand, time, and savings deposits; lending; credit card servicing; ATM processing; and investment management and trust services. Operations are managed and financial performance is evaluated on a corporate-wide basis. Accordingly, all of the Company's banking operations are considered by Management to be aggregated in one reportable operating segment.

Loan Servicing

Servicing rights are recognized when they are acquired through sale of loans. Capitalized servicing rights are reported in other assets and are amortized into non-interest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets. Servicing rights are evaluated for impairment based upon the fair value of the rights as compared to amortized cost. Impairment is determined by stratifying rights by predominant characteristics, such as interest rates and terms. Impairment is recognized through a valuation allowance for an individual stratum, to the extent that fair value is less than the capitalized amount for the stratum.

Stock Options

The Company established a Shareholder-approved stock option plan in 1995, under which the Company may grant options to its employees for up to 600,000 shares of common stock. The Company believes that such awards align the interests of its employees with those of its Shareholders. Only incentive stock options may be granted under the plan. The exercise price of each option grant is determined by the Options Committee of the Board of Directors, and in no instance shall be less than the fair market value on the date of the grant. An option's maximum term is ten years from the date of grant, with 50% of the options granted vesting two years from the date of grant and the remaining 50% vesting five years from date of grant. As of January 16, 2005, all options under this plan had been granted.

The Company applies the fair value recognition provisions of FASB ASC Topic 718, "Compensation – Stock Compensation", to stock-based employee compensation for fiscal years beginning on or after January 1, 2006. As a result, \$37,000, \$37,000 and \$59,000 in compensation cost was included in the Company's financial statements for 2009, 2008 and 2007, respectively. The unrecognized compensation cost to be amortized over a weighted average remaining vesting period of 1.0 years is \$37,000 for 21,000 options granted in 2005.

The weighted average fair market value per share was \$4.41 for options granted in 2005. The fair market value was estimated using the Black-Scholes option pricing model and the following assumptions: quarterly dividends of \$0.12, risk-free interest rate of 4.20%, volatility of 25.81%, and an expected life of ten years. Volatility is based on the actual volatility of the Company's stock during the quarter in which the options were granted. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve at the time of the option grant.

The following table summarizes the status of the Company's non-vested options as of December 31, 2009.

	Number of Shares	Weighted Average Grant Date Fair Value
Non-vested at December 31, 2008	21,000	\$4.41
Granted in 2009	-	-
Vested in 2009	-	-
Forfeited in 2009	-	-
Non-vested at December 31, 2009	21,000	\$4.41

During 2009, 21,000 options were exercised, with total proceeds paid to the Company of \$134,000. The excess of the fair value of the stock issued upon exercise over the exercise price was \$200,000. A summary of the status of the Company's Stock Option Plan as of December 31, 2009, and changes during the year then ended, is presented below.

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at December 31, 2008	76,500	\$ 13.27		
Granted in 2009	-	-		
Vested in 2009	-	-		
Exercised in 2009	(21,000)	6.36		
Forfeited in 2009	-	-		
Outstanding at December 31, 2009	55,500	\$ 15.89	4.6	\$82,000
Exercisable at December 31, 2009	34,500	\$ 14.61	4.1	\$82,000

Note 2. Cash and Cash Equivalents

For the purposes of reporting consolidated cash flows, cash and cash equivalents include cash on hand, amounts due from banks and federal funds sold. At December 31, 2009 the Company had a contractual clearing balance of \$500,000 and a reserve balance requirement of \$576,000 at the Federal Reserve Bank, which are satisfied by both cash on hand at branches and balances held at the Federal Reserve Bank of Boston. The Company maintains a portion of its cash in bank deposit accounts which, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts. The Company believes it is not exposed to any significant risk with respect to these accounts.

The First Bancorp 2009 Form 10-k

Note 3. Investment Securities

The following tables summarize the amortized cost and estimated fair value of investment securities at December 31, 2009 and 2008:

As of December 31, 2009	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value (Estimated)
Securities available for sale				
U.S. Treasury and agency	\$31,022,000	\$90,000	\$(153,000)	\$30,959,000
Mortgage-backed securities	31,254,000	133,000	(239,000)	31,148,000
State and political subdivisions	18,219,000	414,000	(119,000)	18,514,000
Corporate securities	1,120,000	-	(302,000)	818,000
Other equity securities	414,000	6,000	(21,000)	399,000
	\$82,029,000	\$643,000	\$(834,000)	\$81,838,000
Securities to be held to maturity				
U.S. Treasury and agency	\$39,099,000	\$142,000	\$(554,000)	\$38,687,000
Mortgage-backed securities	90,193,000	1,839,000	(363,000)	91,669,000
State and political subdivisions	61,095,000	1,603,000	(366,000)	62,332,000
Corporate securities	150,000	-	-	150,000
	\$190,537,000	\$3,584,000	\$(1,283,000)	\$192,838,000
As of December 31, 2008				
Securities available for sale				
Mortgage-backed securities	\$900,000	\$22,000	\$-	\$922,000
State and political subdivisions	8,571,000	339,000	-	8,910,000
Corporate securities	4,566,000	-	(1,589,000)	2,977,000
Other equity securities	295,000	2,000	(34,000)	263,000
	\$14,332,000	\$363,000	\$(1,623,000)	\$13,072,000
Securities to be held to maturity				
U.S. Treasury and agency	\$110,513,000	\$74,000	\$(5,871,000)	\$104,716,000
Mortgage-backed securities	60,774,000	640,000	(297,000)	61,117,000
State and political subdivisions	62,330,000	952,000	(684,000)	62,598,000
Corporate securities	1,150,000	-	(121,000)	1,029,000
	\$234,767,000	\$1,666,000	\$(6,973,000)	\$229,460,000

The following table summarizes the contractual maturities of investment securities at December 31, 2009:

	Securities available for sale		Securities to be held to maturity	
	Amortized Cost	Fair Value (Estimated)	Amortized Cost	Fair Value (Estimated)
Due in 1 year or less	\$-	\$-	\$330,000	\$335,000
Due in 1 to 5 years	18,144,000	18,381,000	7,934,000	8,245,000
Due in 5 to 10 years	3,671,000	3,783,000	15,020,000	15,591,000
Due after 10 years	59,800,000	59,275,000	167,253,000	168,667,000
Equity securities	414,000	399,000	-	-

Edgar Filing: First Bancorp, Inc /ME/ - Form 10-K

\$82,029,000 \$81,838,000 \$190,537,000 \$192,838,000

At December 31, 2009, securities with a fair value of \$154,034,000 were pledged to secure borrowings from the Federal Home Loan Bank of Boston, public deposits, repurchase agreements, and for other purposes as required by law. This compares to securities with a fair value of \$153,560,000, as of December 31, 2008 pledged for the same purpose.

The First Bancorp 2009 Form 10-k

Page 52

Gains and losses on the sale of securities available for sale are computed by subtracting the amortized cost at the time of sale from the security's selling price, net of accrued interest to be received. The following table shows securities gains and losses for 2009, 2008 and 2007:

	2009	2008	2007
Proceeds from sales	\$4,051,000	\$14,192,000	\$179,000
Gross gains	20,000	123,000	2,000
Gross losses	(170,000)	(212,000)	-
Net gain (loss)	\$(150,000)	\$(89,000)	\$2,000
Related income taxes	\$(52,000)	\$(31,000)	\$1,000

Management reviews securities with unrealized losses for other than temporary impairment. During the first quarter 2009, the Company took an after-tax charge of \$596,000 for other-than-temporary impairment related to one automotive company corporate security in the investment portfolio. As of December 31, 2009, there were 45 securities with unrealized losses held in the Company's portfolio. These securities were temporarily impaired as a result of changes in interest rates reducing their fair market value, of which eight had been temporarily impaired for 12 months or more. At the present time, there have been no material changes in the credit quality of these securities resulting in other than temporary impairment, and in Management's opinion, no additional write-down for other-than-temporary impairment is warranted. Information regarding securities temporarily impaired as of December 31, 2009 is summarized below:

	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
As of December 31, 2009						
U.S. Treasury and agency	\$19,999,000	\$(707,000)	\$-	\$-	\$19,999,000	\$(707,000)
Mortgage-backed securities	47,509,000	(602,000)	-	-	47,509,000	(602,000)
State and political subdivisions	9,396,000	(147,000)	1,350,000	(338,000)	10,746,000	(485,000)
Corporate securities	-	-	818,000	(302,000)	818,000	(302,000)
Other equity securities	-	-	44,000	(21,000)	44,000	(21,000)
	\$76,904,000	\$(1,456,000)	\$2,212,000	\$(661,000)	\$79,116,000	\$(2,117,000)

As of December 31, 2008, there were 97 securities with unrealized losses held in the Company's portfolio. These securities were temporarily impaired as a result of changes in interest rates reducing their fair market value, of which 29 had been temporarily impaired for 12 months or more. Information regarding securities temporarily impaired as of December 31, 2008 is summarized below:

	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
As of December 31, 2008						
U.S. Treasury and agency	\$64,951,000	\$(4,610,000)	\$10,043,000	\$(1,261,000)	\$74,994,000	\$(5,871,000)

Edgar Filing: First Bancorp, Inc /ME/ - Form 10-K

Mortgage-backed securities	12,498,000	(110,000)	3,534,000	(187,000)	16,032,000	(297,000)
State and political subdivisions	13,592,000	(573,000)	2,165,000	(111,000)	15,757,000	(684,000)
Corporate securities	1,821,000	(187,000)	1,709,000	(1,523,000)	3,530,000	(1,710,000)
Other equity securities	-	-	32,000	(34,000)	32,000	(34,000)
	\$92,862,000	\$(5,480,000)	\$17,483,000	\$(3,116,000)	\$110,345,000	\$(8,596,000)

Federal Home Loan Bank stock and Federal Reserve Bank stock have also been evaluated for impairment. The Bank is a member of the Federal Home Loan Bank (“FHLB”) of Boston. The FHLB is a cooperatively owned wholesale bank for housing and finance in the six New England States. Its mission is to support the residential mortgage and community-development lending activities of its members, which include over 450 financial institutions across New England. As a requirement of membership in the FHLB, the Bank must own a minimum required amount of

The First Bancorp 2009 Form 10-k

FHLB stock, calculated periodically based primarily on the Bank's level of borrowings from the FHLB. The Company uses the FHLB for much of its wholesale funding needs. As of December 31, 2009 and 2008, the Company's investment in FHLB stock totaled \$14.0 million.

FHLB stock is a non-marketable equity security and therefore is reported at cost, which equals par value. Shares held in excess of the minimum required amount are generally redeemable at par value. However, in the first quarter of 2009 the FHLB announced a moratorium on such redemptions in order to preserve its capital in response to current market conditions and declining retained earnings. The minimum required shares are redeemable, subject to certain limitations, five years following termination of FHLB membership. The Bank has no intention of terminating its FHLB membership. The Company had no dividend income on its FHLB stock in 2009.

The FHLB recorded a net loss of \$186.8 million for the year ending December 31, 2009. Losses due to the other-than-temporary impairment of investments in private-label mortgage-backed securities resulted in a credit loss of \$444.1 million for the year. The associated non-credit loss on these securities in 2009 was \$885.4 million, which is recorded in capital rather than through earnings, and contributed largely to an accumulated other comprehensive loss of \$1.0 billion at December 31, 2009. Retained earnings increased to \$142.6 million at December 31, 2009, up from an accumulated deficit of \$19.7 million at December 31, 2008. This increase was mainly due to the effect of adopting FSP FAS 115-2 and FAS 124-2 on January 1, 2009, which reclassified \$349.1 million from accumulated deficit to accumulated other comprehensive loss. The FHLB remained in compliance with all regulatory capital ratios as of December 31, 2009, and, in the most recent information available, was classified "adequately capitalized" by its regulator, the Federal Housing Finance Agency, as of September 30, 2009.

Notwithstanding continued significant credit losses in its investment portfolio, the FHLB reported modest profitability for the fourth quarter. Net income for the fourth quarter of 2009 was \$6.3 million. The FHLB's net interest income continues to be strong, and totaled \$311.7 million for the year ending December 31, 2009, and \$88.0 million for the fourth quarter of 2009. The FHLB expects to see volatility in its earnings in the next several quarters as it works through continued challenges. In particular, high and prolonged unemployment rates, high delinquency and foreclosure rates, and declining housing prices may result in additional credit losses from the FHLB's private-label mortgage-backed securities investments. The FHLB will continue to monitor this situation closely in 2010.

The FHLB remains focused on returning the FHLB to stable profitability and enhancing the FHLB's capital base by building retained earnings. The FHLB's board of directors is unlikely to declare any dividends until a consistent pattern of positive net income is demonstrated, allowing growth in retained earnings, which will likely preclude a declaration of dividends for at least the first two quarters of 2010. The opportunity to pay a dividend after that, and the amount of any such dividend, will be a function of the success that the FHLB has in stabilizing earnings and building retained earnings, which will be driven in large part by the performance of its private-label mortgage-backed securities portfolio. The FHLB's current retained earnings target is estimated at \$925 million, a target adopted in connection with the FHLB's Revised Operating Plan to preserve capital in light of the various challenges to the FHLB. The FHLB's retained earnings target could be superseded by mandates from its primary regulator, the Federal Housing Finance Agency, either in the form of an order specific to the FHLB or by promulgation of new regulations requiring a level of retained earnings that is different from the FHLB's currently targeted level. Moreover, Management and the board of directors of the FHLB may, at any time, change the FHLB's methodology or assumptions for modeling the FHLB's retained earnings requirement. Either of these could result in the FHLB further increasing its retained earnings target or reducing or eliminating the dividend payout, as necessary.

The Company periodically evaluates its investment in FHLB stock for impairment based on, among other factors, the capital adequacy of the FHLB and its overall financial condition. No impairment losses have been recorded through December 31, 2009. The Bank will continue to monitor its investment in FHLB stock.

Note 4. Loan Servicing

At December 31, 2009 and 2008, the Bank serviced loans for others totaling \$223,837,000 and \$168,242,000, respectively. Net gains from the sale of loans totaled \$962,000 in 2009, \$249,000 in 2008, and \$333,000 in 2007. In 2009, mortgage servicing rights of \$1,133,000 were capitalized and amortization for the year totaled \$539,000. After deducting for an impairment reserve of \$73,000 at December 31, 2009, mortgage servicing rights had a fair value of \$1,199,000, which is included in other assets. In 2008, mortgage servicing rights of \$201,000 were capitalized or acquired, and amortization for the year totaled \$366,000. After deducting for an impairment reserve of \$368,000 at December 31, 2008, mortgage servicing rights had a fair value of \$311,000, which is included in other assets. FASB ASC Topic 860, "Transfers and Servicing", requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable. Servicing assets and servicing liabilities are reported using the amortization method or the fair value measurement method. In evaluating the carrying values of mortgage servicing rights, the Company obtains third party valuations based on loan level data including note rate, type and term of the underlying loans. The model utilizes several assumptions, the most significant of which is loan prepayments, calculated using a three-month moving average of weekly prepayment data published by the Public Securities Association (PSA) and modeled against the serviced loan portfolio, and the discount rate to discount future cash flows. As of December 31, 2009, the prepayment assumption using the PSA model was 256, which translates into an anticipated prepayment rate of 15.33%. The discount rate is the quarterly average ten-year U.S. Treasury interest rate plus 4.22%. Other assumptions include delinquency rates, foreclosure rates, servicing cost inflation, and annual unit loan cost. All assumptions are adjusted periodically to reflect current circumstances. Amortization of mortgage servicing rights, as well as write-offs due to prepayments of the related mortgage loans, are recorded as a charge against mortgage servicing fee income. Mortgage servicing rights are included in other assets and detailed in the following table:

As of December 31,	2009	2008
Mortgage servicing rights	\$5,086,000	\$3,954,000
Accumulated amortization	(3,814,000)	(3,275,000)
Impairment reserve	(73,000)	(368,000)
	\$1,199,000	\$311,000

Note 5. Loans

The following table shows the composition of the Company's loan portfolio as of December 31, 2009 and 2008:

As of December 31,	2009	2008
Commercial		
Real estate	\$240,178,000	\$219,057,000
Construction	48,714,000	48,182,000
Other	114,486,000	118,109,000
Municipal	45,952,000	34,832,000
Residential		
Term	367,267,000	431,520,000
Construction	17,361,000	26,235,000
Home equity line of credit	94,324,000	77,206,000
Consumer	24,210,000	24,132,000
Total loans	\$952,492,000	\$979,273,000

Loan balances include net deferred loan costs of \$1,352,000 in 2009 and \$1,369,000 in 2008. Pursuant to collateral agreements, qualifying first mortgage loans, which were valued at \$295,119,000 and \$356,964,000 at December 31, 2009 and 2008, respectively, were used to collateralize borrowings from the Federal Home Loan Bank of Boston. In addition, commercial, construction and home equity loans totaling \$366,264,000 were used to collateralize a standby line of credit at the Federal Reserve Bank of Boston that is currently unused.

At December 31, 2009 and 2008, non-accrual loans were \$18,562,000 and \$12,449,000, respectively. As of December 31, 2009, 2008 and 2007, interest income which would have been recognized on these loans, if interest had been accrued, was \$1,297,000, \$489,000, and \$283,000, respectively. Loans more than 90 days past due accruing interest totaled \$1,176,000 at December 31, 2009 and \$4,980,000 at December 31, 2008. The Company continues to

The First Bancorp 2009 Form 10-k

accrue interest on these loans because it believes collection of principal and interest is reasonably assured. Allowance for loan losses transactions for the years ended December 31, 2009, 2008 and 2007 were as follows:

For the years ended December 31,	2009	2008	2007
Balance at beginning of year	\$8,800,000	\$6,800,000	\$6,364,000
Provision charged to operating expenses	12,160,000	4,700,000	1,432,000
	20,960,000	11,500,000	7,796,000
Loans charged off	(7,576,000)	(2,941,000)	(1,337,000)
Recoveries on loans	253,000	241,000	341,000
Net loans charged off	(7,323,000)	(2,700,000)	(996,000)
Balance at end of year	\$13,637,000	\$8,800,000	\$6,800,000

Information regarding impaired loans is as follows:

As of December 31,	2009	2008	2007
Average investment in impaired loans	\$16,263,000	\$6,199,000	\$2,427,000
Interest income recognized on impaired loans, all on cash basis	70,000	24,000	163,000

As of December 31,	2009	2008
Balance of impaired loans	\$25,843,000	\$12,449,000
Less portion for which no allowance for loan losses is allocated	(13,682,000)	(4,805,000)
Portion of impaired loan balance for which an allowance for loan losses is allocated	\$12,161,000	\$7,644,000
Portion of allowance for loan losses allocated to the impaired loan balance	\$2,196,000	\$1,957,000

Loans to directors, officers and employees totaled \$38,952,000 at December 31, 2009 and \$37,876,000 at December 31, 2008. A summary of loans to directors and executive officers, which in the aggregate exceed \$60,000, is as follows:

For the years ended December 31,	2009	2008
Balance at beginning of year	\$23,896,000	\$20,886,000
New loans	3,820,000	12,245,000
Repayments	(2,341,000)	(9,235,000)
Balance at end of year	\$25,375,000	\$23,896,000

Note 6. Premises and Equipment

Premises and equipment are carried at cost and consist of the following:

As of December 31,	2009	2008
Land	\$3,556,000	\$3,556,000
Land improvements	648,000	636,000
Buildings	13,821,000	13,788,000
Equipment	9,532,000	6,348,000
	27,557,000	24,328,000
Less accumulated depreciation	9,226,000	8,300,000
	\$18,331,000	\$16,028,000

Note 7. Other Real Estate Owned

The following summarizes other real estate owned:

As of December 31,	2009	2008
Real estate acquired in settlement of loans	\$5,345,000	\$2,428,000

Changes in the allowance for losses from other real estate owned were as follows:

For the years ended December 31,	2009	2008	2007
Balance at beginning of year	\$325,000	\$325,000	\$269,000
Losses charged to allowance	(223,000)	-	-
Provision charged to operating expenses	481,000	-	56,000
Balance at end of year	\$583,000	\$325,000	\$325,000

Note 8. Goodwill

On January 14, 2005, the Company acquired FNB Bankshares (“FNB”) of Bar Harbor, Maine, and its subsidiary, The First National Bank of Bar Harbor. The total value of the transaction was \$47,955,000, and all of the voting equity interest of FNB was acquired in the transaction. The transaction was accounted for as a purchase and the excess of purchase price over the fair value of net tangible assets acquired equaled \$27,559,000 and was recorded as goodwill, none of which was deductible for tax purposes. The portion of the purchase price related to the core deposit intangible is being amortized over its expected economic life, and goodwill is evaluated annually for possible impairment under the provisions of FASB ASC Topic 350, “Intangibles – Goodwill and Other”.

Note 9. Income Taxes

The current and deferred components of income tax expense (benefit) were as follows:

For the years ended December 31,	2009	2008	2007
Federal income tax			
Current	\$5,520,000	\$6,415,000	\$5,500,000
Deferred	(1,210,000)	(1,039,000)	(464,000)
	4,310,000	5,376,000	5,036,000
State franchise tax	237,000	245,000	229,000
	\$4,547,000	\$5,621,000	\$5,265,000

The actual tax expense differs from the expected tax expense (computed by applying the applicable U.S. Federal corporate income tax rate to income before income taxes) as follows:

For the years ended December 31,	2009	2008	2007
Expected tax expense	\$6,156,000	\$6,879,000	\$6,428,000
Non-taxable income	(1,555,000)	(1,364,000)	(1,244,000)
State franchise tax, net of federal tax benefit	154,000	159,000	149,000
Tax credits, net of amortization	(345,000)	(100,000)	-
Other	137,000	47,000	(68,000)
	\$4,547,000	\$5,621,000	\$5,265,000

The First Bancorp 2009 Form 10-k

Page 57

Deferred tax assets and liabilities are classified as other assets and other liabilities in the consolidated balance sheets. No valuation allowance is deemed necessary for the deferred tax asset. Items that give rise to the deferred income tax assets and liabilities and the tax effect of each at December 31, 2009 and 2008 are as follows:

	2009	2008
Allowance for loan losses	\$4,773,000	\$3,080,000
Other real estate owned	204,000	114,000
Assets related to FNB acquisition	1,000	9,000
Accrued pension and post-retirement	1,183,000	1,139,000
Unrealized loss on securities available for sale	67,000	441,000
Other than temporary impairment of securities available for sale	321,000	-
Other assets	169,000	75,000
Total deferred tax asset	6,718,000	4,858,000
Net deferred loan costs	(672,000)	(578,000)
Depreciation	(2,106,000)	(1,422,000)
Mortgage servicing rights	(420,000)	(109,000)
Core deposit intangible	(500,000)	(600,000)
Liabilities related to FNB acquisition	(10,000)	(32,000)
Other liabilities	(114,000)	(35,000)
Total deferred tax liability	(3,822,000)	(2,776,000)
Net deferred tax asset	\$2,896,000	\$2,082,000

At December 31, 2009, the Company held investments in two limited partnerships with related New Market Tax Credits. These investments are carried at cost and amortized on the effective yield method. The tax credits from these investments are estimated at \$530,000 and \$154,000 for the years ended December 31, 2009 and 2008, respectively, and are recorded as a reduction of income tax expense. Amortization of the investments in the limited partnerships totaled \$275,000 and \$84,000 for the years ended December 31, 2009 and 2008, respectively, and is recognized as a component of income tax expense in the consolidated statements of income. The carrying value of these investments was \$2,712,000 and \$1,616,000 at December 31, 2009 and 2008, respectively, and is recorded in other assets. The Company's total exposure to these limited partnerships was \$5,712,000 and \$5,516,000, at December 31, 2009 and 2008, respectively, which is comprised of the Company's equity investment in the limited partnerships and the balance of a participated loan receivable.

FASB ASC Topic 740 "Income Taxes" defines the criteria that an individual tax position must satisfy for some or all of the benefits of that position to be recognized in a company's financial statements. Topic 740 prescribes a recognition threshold of more-likely-than-not, and a measurement attribute for all tax positions taken or expected to be taken on a tax return, in order for those tax positions to be recognized in the financial statements. Effective January 1, 2007, the Company has adopted these provisions and there was no material effect on the financial statements, and no cumulative effect. The Company is currently open to audit under the statute of limitations by the Internal Revenue Service for the years ended December 31, 2006 through 2008.

Note 10. Certificates of Deposit

At December 31, 2009, the scheduled maturities of certificates of deposit are as follows:

Year of Maturity	All		
	Less than \$100,000	Greater than \$100,000	Certificates of Deposit
2010	\$145,068,000	\$307,061,000	\$452,129,000

Edgar Filing: First Bancorp, Inc /ME/ - Form 10-K

2011	15,885,000	7,566,000	23,451,000
2012	14,429,000	3,119,000	17,548,000
2013	11,850,000	3,530,000	15,380,000
2014	25,661,000	21,928,000	47,589,000
	\$212,893,000	\$343,204,000	\$556,097,000

Interest on certificates of deposit of \$100,000 or more was \$3,901,000, \$6,905,000, and \$11,885,000 in 2009, 2008 and 2007, respectively.

The First Bancorp 2009 Form 10-k

Page 58

Note 11. Borrowed Funds

Borrowed funds consist of advances from the Federal Home Loan Bank of Boston (FHLB), Treasury Tax & Loan Notes, and securities sold under agreements to repurchase with municipal and commercial customers. Pursuant to collateral agreements, FHLB advances are collateralized by all stock in FHLB, qualifying first mortgage loans, U.S. Government and Agency securities not pledged to others, and funds on deposit with FHLB. As of December 31, 2009, the Bank's total FHLB borrowing capacity was \$253,439,000, of which \$54,037,000 was unused and available for additional borrowings. All FHLB advances as of December 31, 2009, had fixed rates of interest until their respective maturity dates. Under the Treasury Tax & Loan Note program, the Bank accumulates tax deposits made by customers and is eligible to receive Treasury Direct investments up to an established maximum balance. Securities sold under agreements to repurchase include U.S. Treasury and Agency securities and other securities. Repurchase agreements have maturity dates ranging from one to 365 days. The Bank also has in place \$10.0 million in credit lines with correspondent banks and a credit facility of \$142,600,000 with the Federal Reserve Bank of Boston using commercial and home equity loans as collateral which are currently not in use.

Borrowed funds at December 31, 2009 and 2008 have the following range of interest rates and maturity dates:

As of December 31, 2009

Federal Home Loan Bank Advances

2010	0.20% - 5.41%	\$99,225,000
2012	4.39 %	10,000,000
2013	3.49 %	10,000,000
2014	2.73% - 3.89%	20,000,000
2015 and thereafter	0.00% - 2.69%	60,177,000
		199,402,000
Treasury Tax & Loan Notes (rate at December 31, 2009 was 0.00%)	variable	638,000
Repurchase agreements		
Municipal and commercial customers	0.90% - 4.00%	49,738,000
		\$249,778,000

As of December 31, 2008

Federal Home Loan Bank Advances

2009	0.36% - 5.00%	\$80,227,000
2010	4.43% - 5.41%	50,000,000
2012	4.39 %	10,000,000
2013	3.49 %	10,000,000
2014 and thereafter	0.00% - 3.89%	70,184,000
		220,411,000
Treasury Tax & Loan Notes (rate at December 31, 2008 was 0.00%)	variable	2,864,000
Repurchase agreements		
Municipal and commercial customers	1.49% - 4.75%	48,799,000
		\$272,074,000

The First Bancorp 2009 Form 10-k

Note 12. Employee Benefit Plans

401(k) Plan

The Bank has a defined contribution plan available to substantially all employees who have completed six months of service. Employees may contribute up to \$16,500 of their compensation if under age 50 and \$22,000 if over age 50, and the Bank may provide a match to employee contributions not to exceed 3.0% of compensation depending on contribution level. Subject to a vote of the Board of Directors, the Bank may also make a profit-sharing contribution to the Plan. Such contribution equaled 2.0% of each eligible employee's compensation in 2009, 2008, and 2007. The expense related to the 401(k) plan was \$365,000, \$356,000, and \$338,000 in 2009, 2008, and 2007, respectively.

Supplemental Retirement Plan

The Bank also provides unfunded, non-qualified supplemental retirement benefits for certain officers, payable in installments over 20 years upon retirement or death. The agreements consist of individual contracts with differing characteristics that, when taken together, do not constitute a postretirement plan. The costs for these benefits are recognized over the service periods of the participating officers in accordance with FASB ASC Topic 712, "Compensation – Nonretirement Postemployment Benefits". The expense of these supplemental plans was \$214,000 in 2009, \$164,000 in 2008, and \$153,000 in 2007. As of December 31, 2009 and 2008, the accrued liability of these plans was \$1,418,000 and \$1,265,000, respectively.

Post-Retirement Benefit Plans

The Bank sponsors two post-retirement benefit plans. One plan currently provides a subsidy for health insurance premiums to certain retired employees and a future subsidy for seven active employees who were age 50 and over in 1996. These subsidies are based on years of service and range between \$40 and \$1,200 per month per person. The other plan provides life insurance coverage to certain retired employees. The Bank also provides health insurance for retired directors. None of these plans are pre-funded.

The Company utilizes FASB ASC Topic 712, "Compensation – Nonretirement Postemployment Benefits", to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its balance sheet and to recognize changes in the funded status in the year in which the changes occur through comprehensive income of a business entity. The Bank sponsors postretirement benefit plans which provide certain life insurance and health insurance benefits for certain retired employees and health insurance for retired directors.

The following tables set forth the accumulated post-retirement benefit obligation, funded status, and net periodic benefit cost:

At December 31,	2009	2008	2007
Change in benefit obligations			
Benefit obligation at beginning of year:	\$ 1,990,000	\$ 1,949,000	\$ 2,005,000
Service cost	21,000	19,000	20,000
Interest cost	134,000	134,000	136,000
Benefits paid	(143,000)	(155,000)	(144,000)
Actuarial (gain) loss	(40,000)	43,000	(68,000)
Benefit obligation at end of year:	\$ 1,962,000	\$ 1,990,000	\$ 1,949,000
Funded status			
Benefit obligation at end of year	\$(1,962,000)	\$(1,990,000)	\$(1,949,000)
Accrued benefit cost	\$(1,962,000)	\$(1,990,000)	\$(1,949,000)

For the years ended December 31,	2009	2008	2007
Components of net periodic benefit cost			
Service cost	\$21,000	\$19,000	\$20,000
Interest cost	134,000	134,000	136,000
Amortization of unrecognized transition obligation	29,000	29,000	29,000
Amortization of prior service credit	(1,000)	(3,000)	(3,000)
Amortization of accumulated losses	24,000	21,000	26,000
Net periodic benefit cost	\$207,000	\$200,000	\$208,000
Weighted average assumptions as of December 31			
Discount rate	7.0	% 7.0	% 7.0

The above discount rate assumption was used in determining both the accumulated benefit obligation as well as the net benefit cost. The measurement date for benefit obligations was as of year-end for all years presented. The estimated amount of benefits to be paid in 2010 is \$148,000. For years ending 2011 through 2014 the estimated amount of benefits to be paid is \$159,000, \$168,000, \$156,000 and \$164,000 respectively, and the total estimated amount of benefits to be paid for years ended 2015 through 2019 is \$887,000. Plan expense for 2010 is estimated to be \$188,000.

In accordance with FASB ASC Topic 715, "Compensation – Retirement Benefits", amounts not yet reflected in net periodic benefit cost and included in accumulated other comprehensive income are as follows:

At December 31,	2009	2008	Portion to Be Recognized in Income in 2010
Unamortized prior service credit	\$-	\$1,000	\$-
Unamortized net actuarial loss	(233,000)	(297,000)	-
Unrecognized transition obligation	(92,000)	(121,000)	29,000
	(325,000)	(417,000)	29,000
Deferred tax benefit at 35%	114,000	146,000	(10,000)
Net unrecognized post-retirement benefits included in accumulated other comprehensive income	\$(211,000)	\$(271,000)	\$19,000

Note 13. Preferred Stock

On January 9, 2009, the Company received \$25 million from preferred stock issuance under the U.S. Treasury Capital Purchase Program (the "CPP Shares") at a purchase price of \$1,000 per share. The CPP Shares call for cumulative dividends at a rate of 5.0% per year for the first five years, and at a rate of 9.0% per year in following years, payable quarterly in arrears on February 15, May 15, August 15 and November 15 of each year. Incident to such issuance, the Company issued to the U.S. Treasury warrants (the "Warrants") to purchase up to 225,904 shares of the Company's common stock at a price per share of \$16.60 (subject to adjustment). The CPP Shares and the related Warrants (and any shares of common stock issuable pursuant to the Warrants) are freely transferable by the U.S. Treasury to third parties and the Company has filed a registration statement with the Securities and Exchange Commission to allow for possible resale of such securities. The CPP Shares qualify as Tier 1 capital on the Company's books for regulatory purposes and rank senior to the Company's common stock and senior or at an equal level in the Company's capital structure to any other shares of preferred stock the Company may issue in the future.

The Company may redeem the CPP Shares at any time using any funds available to the Company, and any redemption would be subject to the prior approval of the Federal Reserve Bank of Boston. The minimum amount that may be

redeemed is 25% of the original CPP investment. The CPP Shares are “perpetual” preferred stock, which means that neither Treasury nor any subsequent holder would have a right to require that the Company redeem any of the shares. During the first three years following the Company’s sale of the CPP Shares, the Company is required to obtain Treasury’s consent to increase the dividend per share paid on the Company’s common stock unless the Company had redeemed the CPP Shares in full or Treasury had transferred all of the CPP Shares to other parties. Also during the first three years following the Company’s sale of the CPP Shares, the Company is required to obtain Treasury’s consent in order to repurchase any shares of its outstanding stock of any type (other than purchases of common stock or preferred stock ranking junior to the CPP Shares in the ordinary course of the Company’s business and consistent with the Company’s past practices in connection with a benefit plan) unless the Company had redeemed the CPP Shares in full or Treasury had transferred all of the CPP Shares to other parties.

As a condition to Treasury’s purchase of the CPP Shares, during the time that Treasury holds any equity or debt instrument the Company issued, the Company is required to comply with certain restrictions and other requirements relating to the compensation of the Company’s chief executive officer, chief financial officer and three other most highly compensated executive officers. These restrictions include a prohibition on severance payments to those executive officers upon termination of their employment and a \$500,000 limit on the tax deductions the Company can take for compensation expense for each of those executive officers in a single year as well as a prohibition on bonus compensation to such officers other than limited amounts of long-term restricted stock.

In conjunction with the sale of the CPP Shares, the Company also issued the Warrants which have a term of ten years and could be exercised by Treasury or a subsequent holder at any time or from time to time during their term. Treasury will not vote any shares of common stock it receives upon exercise of the Warrants, but that restriction would not apply to third parties to whom Treasury transferred the Warrants. The Warrants (and any common stock issued upon exercise of the Warrants) could be transferred to third parties separately from the CPP Shares. The proceeds from the sale of the CPP Shares were allocated between the CPP Shares and Warrants based on their relative fair values on the issue date. The fair value of the Warrants was determined using the Black-Scholes model which includes the following assumptions: common stock price of \$16.60 per share, dividend yield of 4.70%, stock price volatility of 24.43%, and a risk-free interest rate of 2.01%. The discount on the CPP Shares was based on the value that was allocated to the Warrants upon issuance, and is being accreted back to the value of the CPP Shares over a five-year period (the expected life of the shares upon issuance) on a straight-line basis.

Note 14. Common Stock

On August 16, 2007, the Company announced that its Board of Directors had authorized a program for the repurchase of up to 300,000 shares of the Company’s common stock or approximately 3.1% of the outstanding shares. This program ended on August 16, 2009 and under the program the Company repurchased 182,869 shares at an average price of \$15.63 and at a total cost of \$2.9 million. As a consequence of the Company’s issuance of securities under the U.S. Treasury’s CPP program, its ability to repurchase stock while such securities remain outstanding is restricted to purchases from employee benefit plans. In 2009, the Company repurchased 11,412 shares from employee benefit plans at an average price of \$14.73 per share and for total proceeds of \$168,000.

The Company has reserved 700,000 shares of its common stock to be made available to directors and employees who elect to participate in the stock purchase or savings and investment plans. During 2006, the number of shares set aside for these plans was increased by the Board of Directors from 480,000 to 700,000. As of December 31, 2009, 484,851 shares had been issued pursuant to these plans, leaving 215,149 shares available for future use. The issuance price is based on the market price of the stock at issuance date. Sales of stock to directors and employees amounted to 21,469 shares in 2009, 17,425 shares in 2008, and 17,828 shares in 2007.

In 2001, the Company established a dividend reinvestment plan to allow Shareholders to use their cash dividends for the automatic purchase of shares in the Company. When the plan was established, 600,000 shares were registered with the Securities and Exchange Commission, and as of December 31, 2009, 155,617 shares have been issued, leaving 444,383 shares for future use. Participation in this plan is optional and at the individual discretion of each Shareholder. Shares are purchased for the plan from the Company at a price per share equal to the average of the daily bid and asked prices reported on the NASDAQ System for the five trading days immediately preceding, but not including, the dividend payment date. Sales of stock under the Dividend Reinvestment Plan amounted to 21,229 shares in 2009,

22,243 shares in 2008, and 20,233 shares in 2007.

Note 15. Off-Balance-Sheet Financial Instruments and Concentrations of Credit Risk

The Bank is party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to originate loans, commitments for unused lines of credit, and standby letters of credit. The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated balance sheets. The contract amounts of those instruments reflect the extent of involvement the Bank has in particular classes of financial instruments.

Commitments for unused lines are agreements to lend to a customer provided there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on Management's credit evaluation of the borrower. The Bank did not incur any losses on its commitments in 2009, 2008 or 2007.

Standby letters of credit are conditional commitments issued by the Bank to guarantee a customer's performance to a third party, with the customer being obligated to repay (with interest) any amounts paid out by the Bank under the letter of credit. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers.

The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for loan commitments and standby letters of credit is represented by the contractual amount of those instruments.

The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. At December 31, 2009 and 2008, the Bank had the following off-balance-sheet financial instruments, whose contract amounts represent credit risk:

As of December 31,	2009	2008
Unused lines, collateralized by residential real estate	\$58,751,000	\$55,370,000
Other unused commitments	76,125,000	75,236,000
Standby letters of credit	3,449,000	2,687,000
Commitments to extend credit	4,512,000	12,496,000
Total	\$142,837,000	\$145,789,000

The Bank grants residential, commercial and consumer loans to customers principally located in the Mid-Coast and Down East regions of Maine. Collateral on these loans typically consists of residential or commercial real estate, or personal property. Although the loan portfolio is diversified, a substantial portion of borrowers' ability to honor their contracts is dependent on the economic conditions in the area, especially in the real estate sector.

Note 16. Earnings Per Share

The following table provides detail for basic earnings per share (EPS) and diluted earnings per share for the years ended December 31, 2009, 2008 and 2007:

	Income (Numerator)	Shares (Denominator)	Per-Share Amount
For the year ended December 31, 2009			
Net income as reported	\$ 13,042,000		
Less dividends and amortization of premium on preferred stock	1,161,000		
Basic EPS: Income available to common shareholders	11,881,000	9,721,172	\$ 1.22
Effect of dilutive securities: incentive stock options		12,072	
Diluted EPS: Income available to common shareholders plus assumed conversions	\$ 11,881,000	9,733,244	\$ 1.22
For the year ended December 31, 2008			
Net income as reported	\$ 14,034,000		
Basic EPS: Income available to common shareholders	14,034,000	9,701,379	\$ 1.45
Effect of dilutive securities: incentive stock options		18,952	
Diluted EPS: Income available to common shareholders plus assumed conversions	\$ 14,034,000	9,720,331	\$ 1.44
For the year ended December 31, 2007			
Net income as reported	\$ 13,101,000		
Basic EPS: Income available to common shareholders	\$ 13,101,000	9,787,287	\$ 1.34
Effect of dilutive securities: incentive stock options		25,731	
Diluted EPS: Income available to common shareholders plus assumed conversions	\$ 13,101,000	9,813,018	\$ 1.34

All earnings per share calculations have been made using the weighted average number of shares outstanding during the period. The dilutive securities are incentive stock options granted to certain key members of Management and warrants granted to the U.S. Treasury under the Capital Purchase program. The dilutive number of shares has been calculated using the treasury method, assuming that all granted options and warrants were exercisable at the end of each period.

Note 17. Fair Value Disclosures

Certain assets and liabilities are recorded at fair value to provide additional insight into the Company's quality of earnings. Some of these assets and liabilities are measured on a recurring basis while others are measured on a nonrecurring basis, with the determination based upon applicable existing accounting pronouncements. For example, securities available for sale are recorded at fair value on a recurring basis. Other assets, such as, mortgage servicing rights, loans held for sale, and impaired loans, are recorded at fair value on a nonrecurring basis using the lower of cost or market methodology to determine impairment of individual assets. The Company groups assets and liabilities which are recorded at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement (with level 1 considered highest and level 3 considered lowest). A brief description of each level follows.

Level 1 – Valuation is based upon quoted prices for identical instruments in active markets.

Level 2 – Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 – Valuation is generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates that market participants would use in pricing the asset or liability. Valuation includes use of discounted cash flow models and similar techniques.

The most significant instruments that the Company fair values include securities which fall into Level 2 in the fair value hierarchy. The securities in the available for sale portfolio are priced by independent providers. In obtaining such

The First Bancorp 2009 Form 10-k

Page 63

valuation information from third parties, the Company has evaluated their valuation methodologies used to develop the fair values in order to determine whether the valuations are representative of an exit price in the Company's principal markets. The Company's principal markets for its securities portfolios are the secondary institutional markets, with an exit price that is predominantly reflective of bid level pricing in those markets.

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

Securities Available for Sale. Investment securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices for similar assets, if available. If quoted prices are not available, fair values are measured using matrix pricing models, or other model-based valuation techniques requiring observable inputs other than quoted prices such as yield curves, prepayment speeds, and default rates. Recurring Level 1 securities would include U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets. Recurring Level 2 securities include federal agency securities, mortgage-backed securities, collateralized mortgage obligations, municipal bonds and corporate debt securities. The following table presents the balances of assets and liabilities that were measured at fair value on a recurring basis as of December 31, 2009 and 2008.

	At December 31, 2009			Total
	Level 1	Level 2	Level 3	
Securities available for sale				
U.S. Treasury and agency	\$-	\$30,959,000	\$-	\$30,959,000
Mortgage-backed securities	-	31,148,000	-	31,148,000
State and political subdivisions	-	18,514,000	-	18,514,000
Corporate securities	-	818,000	-	818,000
Other equity securities	-	399,000	-	399,000
Total assets	\$-	\$81,838,000	\$-	\$81,838,000

	At December 31, 2008			Total
	Level 1	Level 2	Level 3	
Securities available for sale				
Mortgage-backed securities	\$-	\$922,000	\$-	\$922,000
State and political subdivisions	-	8,910,000	-	8,910,000
Corporate securities	-	2,977,000	-	2,977,000
Other equity securities	-	263,000	-	263,000
Total assets	\$-	\$13,072,000	\$-	\$13,072,000

Assets and Liabilities Recorded at Fair Value on a Non-Recurring Basis

Mortgage Servicing Rights. Mortgage servicing rights represent the value associated with servicing residential mortgage loans. Servicing assets and servicing liabilities are reported using the amortization method or the fair value measurement method. In evaluating the carrying values of mortgage servicing rights, the Company obtains third party valuations based on loan level data including note rate, type and term of the underlying loans. As such, the Company classifies mortgage servicing rights as nonrecurring Level 2.

Loans Held for Sale. Mortgage loans held for sale are recorded at the lower of carrying value or market value. The fair value of mortgage loans held for sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, the Company classifies mortgage loans held for sale as nonrecurring Level 2.

Other Real Estate Owned. Real estate acquired through foreclosure is recorded at fair value. The fair value of other real estate owned is based on property appraisals and an analysis of similar properties currently available. As such, the

Company records other real estate owned as nonrecurring Level 2.

Impaired Loans. A loan is considered to be impaired when it is probable that all of the principal and interest due under the original underwriting terms of the loan may not be collected. Impairment is measured based on the fair value of the underlying collateral. The Company measures impairment on all nonaccrual loans for which it has established specific reserves as part of the specific allocated allowance component of the allowance for loan losses. As such, the Company records impaired loans as nonrecurring Level 2.

Page 64

The following table presents assets measured at fair value on a nonrecurring basis as of December 31, 2009, that have had a fair value adjustment since their initial recognition as of March 31, 2008. Other real estate owned is presented net of an allowance for losses of \$583,000. Impaired loans are presented net of their related specific allowance for loan losses of \$2,196,000.

	At December 31, 2009			Total
	Level 1	Level 2	Level 3	
Mortgage servicing rights	\$-	\$1,199,000	\$-	\$1,199,000
Loans held for sale	-	2,876,000	-	2,876,000
Other real estate owned	-	5,345,000	-	5,345,000
Impaired loans	-	9,965,000	-	9,965,000
Total Assets	\$-	\$19,385,000	\$-	\$19,385,000

The following table presents assets measured at fair value on a nonrecurring basis as of December 31, 2008, that have had a fair value adjustment since their initial recognition as of March 31, 2008. Other real estate owned is presented net of an allowance for losses of \$325,000. Impaired loans are presented net of their related specific allowance for loan losses of \$1,957,000.

	At December 31, 2008			Total
	Level 1	Level 2	Level 3	
Mortgage servicing rights	\$-	\$311,000	\$-	\$311,000
Loans held for sale	-	1,298,000	-	1,298,000
Other real estate owned	-	2,428,000	-	2,428,000
Impaired loans	-	10,492,000	-	10,492,000
Total Assets	\$-	\$14,529,000	\$-	\$14,529,000

FASB ASC Topic 820 "Fair Value Measurements and Disclosures" requires disclosures of fair value information about financial instruments, whether or not recognized in the balance sheet, if the fair values can be reasonably determined. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques using observable inputs when available. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. FASB ASC Topic 820 excludes certain financial ins
