CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Independent Bank Corp. (the "Company") is a state chartered, federally registered bank holding company, incorporated in 1985. The Company is the sole stockholder of Rockland Trust Company ("Rockland Trust" or the "Bank"), a Massachusetts trust company chartered in 1907.

All material intercompany balances and transactions have been eliminated in consolidation. Certain previously reported amounts may have been reclassified to conform to the current year's presentation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation of the financial statements, primarily consisting of normal recurring adjustments, have been included. Operating results for the quarter ended March 31, 2015 are not necessarily indicative of the results that may be expected for the year ending December 31, 2015 or any other interim period.

For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, filed with the Securities and Exchange Commission.

NOTE 2 - RECENT ACCOUNTING STANDARDS UPDATES

FASB ASC Subtopic 835-30 "Interest - Imputation of Interest" Update No. 2015-03. Update No. 2015-03 was issued in April 2015 to simplify presentation of debt issuance costs. The amendments in this Update require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuances costs are not affected by the amendments in this Update. The amendments in this update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 810 "Consolidation" Update No. 2015-02. Update No. 2015-02 was issued in February 2015 to respond to stakeholders' concerns about the current accounting for consolidation of certain legal entities. The amendments in this update affect reporting entities that are required to evaluate whether they should consolidate certain legal entities. All legal entities are subject to reevaluation under the revised consolidation model. Specifically, the amendments: (1) modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities (VIEs) or voting interest entities, (2) eliminate the presumption that a general partner should consolidate a limited partnership, (3) affect the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships, and (4) provide a scope exception from consolidation guidance for reporting entities with interests in legal entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds. The amendments in this update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Subtopic 225-20 "Income Statement - Extraordinary and Unusual Items" Update No. 2015-01. Update No. 2015-01 was issued in January 2015 to simplify the income statement presentation requirements in Subtopic 225-20 by eliminating the concept of extraordinary items. Extraordinary items are events and transactions that are distinguished by their unusual nature and by the infrequency of their occurrence. The amendments in this update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early

adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

Table of Contents

NOTE 3 - ACQUISITIONS

Peoples Federal Bancshares, Inc.

On February 20, 2015, the Company completed its acquisition of Peoples Federal Bancshares, Inc. ("Peoples"), the parent of Peoples Federal Saving Bank. The transaction qualified as a tax-free reorganization for federal income tax purposes and Peoples shareholders received, for each share of Peoples common stock, the right to receive either \$21.00 in cash per share or 0.5523 shares of the Company's stock (valued at \$23.26 per share, based upon the highest trading value of the Company's stock on February 20, 2015 of \$42.11). The total deal consideration was \$141.8 million and was comprised of 40% cash and 60% stock consideration. The cash consideration was \$55.4 million in the aggregate, inclusive of cash paid in lieu of fractional shares. The total stock consideration was \$86.4 million and resulted in an increase to the Company's outstanding shares of 2,052,137 shares.

The Company accounted for the acquisition using the acquisition method pursuant to the Business Combinations Topic of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC"). Accordingly, the Company recorded merger and acquisition expenses of \$10.2 million during the three months ended March 31, 2015. Additionally, the acquisition method requires the acquirer to recognize the assets acquired and the liabilities assumed at their fair values as of the acquisition date. The following table summarizes the estimated fair value of the assets acquired and liabilities assumed as of the date of the acquisition:

	Net Assets Acquired at Fair Value (Dollars in thousands)
Assets	
Cash	\$ 41,957
Investments	43,585
Loans	463,927
Premises and equipment	9,346
Goodwill	30,662
Core deposit and other intangibles	3,936
Other assets	46,920
Total assets acquired	640,333
Liabilities	
Deposits	432,250
Borrowings	51,209
Other liabilities	15,054
Total liabilities assumed	498,513
Purchase price	\$ 141,820

Fair value adjustments to assets acquired and liabilities assumed are generally amortized using either an effective yield or straight-line basis over periods consistent with the average life, useful life and/or contractual term of the related assets and liabilities.

Fair values of the major categories of assets acquired and liabilities assumed were determined as follows:

Cash and Cash Equivalents

The fair values of cash and cash equivalents approximate the respective carrying amounts because the instruments are payable on demand or have short-term maturities.

Investments

The fair values of securities were based on quoted market prices for identical securities received from an independent, nationally-recognized, third-party pricing service. Prices provided by the independent pricing service were based on recent trading activity and other observable information including, but not limited to, market interest rate curves,

referenced credit spreads and estimated prepayment rates where applicable.

Table of Contents

Loans

The loans acquired were recorded at fair value without a carryover of the allowance for loan losses. Fair value of the loans is determined using market participant assumptions in estimating the amount and timing of both principal and interest cash flows expected to be collected, as adjusted for an estimate of future credit losses and prepayments, and then applying a market-based discount rate to those cash flows. The overall discount on the loans acquired in this transaction was due to anticipated credit loss, as well as considerations for liquidity and market interest rates.

A portion of the loans acquired showed evidence of deterioration of credit quality at the purchase date and it was deemed unlikely that the Bank will be able to collect all contractually required payments. As such, these loans were deemed to be purchased credit impaired ("PCI") and the carrying value and prospective income recognition are predicated upon future cash flows expected to be collected. The following is a summary of these PCI loans associated with the acquisition as of the date acquired:

	(Dollars in thousands)
Contractually required principal and interest at acquisition	\$4,358
Contractual cash flows not expected to be collected	(1,596)
Expected cash flows at acquisition	2,762
Interest component of expected cash flows	(319)
Basis in PCI loans at acquisition - estimated fair value	\$2,443

Premises and Equipment

The fair value of the premises, including land, buildings and improvements, was determined based upon appraisals by licensed real estate appraisers or pending agreed upon sale prices. The appraisals were based upon the best and highest use of the property with final values determined based upon an analysis of the cost, sales comparison and income capitalization approaches for each property appraised.

Core Deposit Intangible

The fair value of the core deposit intangible is derived by comparing the interest rate and servicing costs that the financial institution pays on the core deposit liability versus the current market rate for alternative sources of financing, while factoring in estimates over the remaining life and attrition rate of the deposit accounts. The intangible asset represents the stable and relatively low cost source of funds that the deposits and accompanying relationships provide the Company, when compared to alternative funding sources.

Deposits

The fair value of acquired savings and transaction deposit accounts was assumed to approximate the carrying value as these accounts have no stated maturity and are payable on demand. The fair value of time deposits were determined based on the present value of the contractual cash flows over the remaining period to maturity using a market interest rate.

Borrowings

The fair values of Federal Home Loan Bank ("FHLB") advances were derived based upon the present value of the principal and interest payments using a current market discount rate.

Table of Contents

Selected Pro Forma Results

The following summarizes the unaudited pro forma results of operations as if the Company acquired Peoples on January 1, 2015 (2014 amounts represent combined results for the Company and Peoples). The selected pro forma financial information is presented for illustrative purposes only and is not necessarily indicative of the financial results of the combined companies had the acquisition actually been completed at the beginning of the periods presented, nor does it indicate future results for any other interim or full-year period.

	March 31,	
	2015	2014
	(Dollars in thousands)	
Net interest income after provision for loan losses	\$54,407	\$47,516
Net income	14,161	13,897

Excluded from the pro forma results of operations for the three months ended March 31, 2015 are merger-related costs of \$16.6 million recognized by both the Company and Peoples in the aggregate. These costs were primarily made up of contract terminations arising due to the change in control, the acceleration of certain compensation and benefit costs, and other merger expenses.

Table of Contents

NOTE 4 - SECURITIES

Trading Securities

As of March 31, 2015, the Company had trading securities of \$494,000. These securities are held in a rabbi trust and will be used for future payments associated with the Company's non-qualified 401(k) Restoration Plan and non-qualified deferred compensation plan.

Available for Sale and Held to Maturity Securities

The following table presents a summary of the amortized cost, gross unrealized holding gains and losses, other-than-temporary impairment recorded in other comprehensive income and fair value of securities available for sale and securities held to maturity for the periods below:

	March 31, 2015				December 31, 2014			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Total	\$773,781	\$ 19,966	\$ (4,387)	\$789,360	\$718,546	\$ 16,579	\$ (6,872)	\$728,253

(1) Gross unrealized gains and gross unrealized losses include \$146,000 and \$230,000 of net non-credit related OTTI at March 31, 2015 and December 31, 2014, respectively.

When securities are sold, the adjusted cost of the specific security sold is used to compute the gain or loss on the sale. The Company had no realized gains or losses during the three month period ending March 31, 2015 and realized a net gain of \$91,000 during the three month period ending March 31, 2014 on equity securities classified as available for sale. There were no gains on sale on the Company's fixed income securities during the periods ending March 31, 2015 and 2014.

The actual maturities of certain securities may differ from the contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. A schedule of the contractual maturities of securities available for sale and securities held to maturity as of March 31, 2015 is presented below:

Table of Contents

	Available for Sale		Held to Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(Dollars in thousands)			
Due in one year or less	\$—	\$—	\$5,202	\$5,300
Due after one year to five years	54,992	55,912	408	423
Due after five to ten years	95,080	96,837	30,927	31,804
Due after ten years	217,420	222,291	358,208	364,795
Total debt securities	\$367,492	\$375,040	\$394,745	\$402,322
Equity securities	\$11,544	\$11,998	\$—	\$—
Total	\$379,036	\$387,038	\$394,745	\$402,322

Inclusive in the table above is \$39.1 million of callable securities in the Company's investment portfolio at March 31, 2015.

The carrying value of securities pledged to secure public funds, trust deposits, repurchase agreements and for other purposes, as required or permitted by law, was \$327.4 million and \$340.0 million at March 31, 2015 and December 31, 2014, respectively.

At March 31, 2015 and December 31, 2014, the Company had no investments in obligations of individual states, counties, or municipalities which exceeded 10% of stockholders' equity.

Other-Than-Temporary Impairment ("OTTI")

The Company continually reviews investment securities for the existence of OTTI, taking into consideration current market conditions, the extent and nature of changes in fair value, issuer rating changes and trends, the credit worthiness of the obligor of the security, volatility of earnings, current analysts' evaluations, the Company's intent to sell the security, or whether it is more likely than not that the Company will be required to sell the debt security before its anticipated recovery, as well as other qualitative factors. The term "other-than-temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment.

The following tables show the gross unrealized losses and fair value of the Company's investments in an unrealized loss position, which the Company has not deemed to be OTTI, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position:

March 31, 2015

The Company does not intend to sell these investments and has determined based upon available evidence that it is more likely than not that the Company will not be required to sell the security before the recovery of its amortized cost basis. As a result, the Company does not consider these investments to be OTTI. The Company made this determination by reviewing various qualitative and quantitative factors regarding each investment category, such as current market conditions, extent and nature of changes in fair value, issuer rating changes and trends, volatility of earnings, and current analysts' evaluations.

As a result of the Company's review of these qualitative and quantitative factors, the causes of the impairments listed in the table above by category are as follows at March 31, 2015:

Agency Mortgage-Backed Securities and Collateralized Mortgage Obligations: This portfolio has contractual terms that generally do not permit the issuer to settle the securities at a price less than the current par value of the investment. The decline in market value of these securities is attributable to changes in interest rates and not credit quality. Additionally, these securities are implicitly guaranteed by the U.S. Government or one of its agencies.

Single Issuer Trust Preferred Securities: This portfolio consists of one security which is below investment grade. The unrealized loss on these securities is attributable to the illiquid nature of the trust preferred market in the current economic environment. Management evaluates various financial metrics for the issuers, including regulatory capital ratios of the issuers.

Pooled Trust Preferred Securities: This portfolio consists of two below investment grade securities both of which are performing. The unrealized loss on these securities is attributable to the illiquid nature of the trust preferred market and the significant risk premiums required in the current economic environment. Management evaluates collateral credit and instrument structure, including current and expected deferral and default rates and timing. In addition, discount rates are determined by evaluating comparable spreads observed currently in the market for similar instruments.

Equity Securities: This portfolio consists of mutual funds and other equity investments. During some periods, the mutual funds in the Company's investment portfolio may have unrealized losses resulting from market fluctuations as well as the risk premium associated with that particular asset class. For example, emerging market equities tend to trade at a higher risk premium than U.S. government bonds and thus, will fluctuate to a greater degree on both the upside and the downside. In the context of a well-diversified portfolio, however, the correlation amongst the various asset classes represented by the funds serves to minimize downside risk. The Company evaluates each mutual fund in the portfolio regularly and measures performance on both an absolute and relative basis. A reasonable recovery period for positions with an unrealized loss is based on management's assessment of general economic data, trends within a particular asset class, valuations, earnings forecasts and bond durations.

Table of Contents

The following table shows the total OTTI that the Company recorded for the periods indicated:

	Three Months Ended March 31	
	2015	2014

For the purpose of estimating the allowance for loan losses, management segregates the loan portfolio into the portfolio segments detailed in the above tables. Each of these loan categories possesses unique risk characteristics that are considered when determining the appropriate level of allowance for each segment. Some of the risk characteristics unique to each loan category include:

Commercial Portfolio

Commercial and Industrial: Loans in this category consist of revolving and term loan obligations extended to business and corporate enterprises for the purpose of financing working capital and/or capital investment. Collateral generally

consists of pledges of business assets including, but not limited to: accounts receivable, inventory, plant & equipment, or real estate, if applicable. Repayment sources consist of primarily, operating cash flow, and secondarily, liquidation of assets.

Commercial Real Estate: Loans in this category consist of mortgage loans to finance investment in real property such as multi-family residential, commercial/retail, office, industrial, hotels, educational and healthcare facilities and other specific use properties. Loans are typically written with amortizing payment structures. Collateral values are determined based upon third party appraisals and evaluations. Loan to value ratios at origination are governed by established policy and regulatory guidelines. Repayment sources consist of primarily, cash flow from operating leases and rents, and secondarily, liquidation of assets.

Commercial Construction: Loans in this category consist of short-term construction loans, revolving and nonrevolving credit lines and construction/permanent loans to finance the acquisition, development and construction or rehabilitation of real property. Project types include residential 1-4 family condominium and multi-family homes, commercial/retail, office, industrial, hotels, educational and healthcare facilities and other specific use properties. Loans may be written with

Table of Contents

nonamortizing or hybrid payment structures depending upon the type of project. Collateral values are determined based upon third party appraisals and evaluations. Loan to value ratios at origination are governed by established policy and regulatory guidelines. Repayment sources vary depending upon the type of project and may consist of sale or lease of units, operating cash flows or liquidation of other assets.

Small Business: Loans in this category consist of revolving, term loan and mortgage obligations extended to sole proprietors and small businesses for purposes of financing working capital and/or capital investment. Collateral generally consists of pledges of business assets including, but not limited to accounts receivable, inventory, plant & equipment, or real estate if applicable. Repayment sources consist primarily of, operating cash flows, and secondarily, liquidation of assets.

For the commercial portfolio it is the Bank's policy to obtain personal guarantees for payment from individuals holding material ownership interests of the borrowing entities.

Consumer Portfolio

Residential Real Estate: Residential mortgage loans held in the Bank's portfolio are made to borrowers who demonstrate the ability to make scheduled payments with full consideration to underwriting factors such as current and expected income, employment status, current assets, other financial resources, credit history and the value of the collateral. Collateral consists of mortgage liens on 1-4 family residential properties. The Company does not originate or purchase sub-prime loans.

Home Equity: Home equity loans and lines are made to qualified individuals and are secured by senior or junior mortgage liens on owner-occupied 1-4 family homes, condominiums or vacation homes or on nonowner occupied 1-4 family homes with more restrictive loan to value requirements. The home equity loan has a fixed rate and is billed in equal payments comprised of principal and interest. The home equity line of credit has a variable rate and is billed in interest-only payments during the draw period. At the end of the draw period, the home equity line of credit is billed as a percentage of the principal balance plus all accrued interest. Additionally, the Bank has the option of renewing the line of credit for additional draw periods. Borrower qualifications include favorable credit history combined with supportive income requirements and combined loan to value ratios within established policy guidelines.

Other Consumer: Other consumer loan products include personal lines of credit and amortizing loans made to qualified individuals for various purposes such as education, auto loans, debt consolidation, personal expenses or overdraft protection. Borrower qualifications include favorable credit history combined with supportive income and collateral requirements within established policy guidelines. These loans may be secured or unsecured.

Credit Quality

The Company continually monitors the asset quality of the loan portfolio using all available information. Based on this information, loans demonstrating certain payment issues or other weaknesses may be categorized as delinquent, impaired, nonperforming and/or put on nonaccrual status. Additionally, in the course of resolving such loans, the Company may choose to restructure the contractual terms of certain loans to match the borrower's ability to repay the loan based on their current financial condition. If a restructured loan meets certain criteria, it may be categorized as a troubled debt restructuring ("TDR").

The Company reviews numerous credit quality indicators when assessing the risk in its loan portfolio. For the commercial portfolio, the Company utilizes a 10-point commercial risk-rating system, which assigns a risk-grade to each borrower based on a number of quantitative and qualitative factors associated with a commercial loan transaction. Factors considered include industry and market conditions, position within the industry, earnings trends, operating cash flow, asset/liability values, debt capacity, guarantor strength, management and controls, financial reporting, collateral, and other considerations. The risk-ratings categories are defined as follows:

1- 6 Rating — Pass: Risk-rating grades "1" through "6" comprise those loans ranging from 'Substantially Risk Free' which indicates borrowers are of unquestioned credit standing and the pinnacle of credit quality, well established companies with a very strong financial condition, and loans fully secured by cash collateral, through 'Acceptable Risk', which indicates borrowers may exhibit declining earnings, strained cash flow, increasing leverage and/or weakening market fundamentals that indicate above average or below average asset quality, margins and market share. Collateral coverage is protective.

7 Rating — Potential Weakness: Borrowers exhibit potential credit weaknesses or downward trends deserving management's close attention. If not checked or corrected, these trends will weaken the Bank's asset and position. While potentially weak, currently these borrowers are marginally acceptable; no loss of principal or interest is envisioned.

8 Rating — Definite Weakness Loss Unlikely: Borrowers exhibit well defined weaknesses that jeopardize the orderly liquidation of debt. Loan may be inadequately protected by the current net worth and paying capacity of the obligor or by the collateral pledged, if any. Normal repayment from the borrower is in jeopardy, although no loss of principal is envisioned. However,

Table of Contents

there is a distinct possibility that a partial loss of interest and/or principal will occur if the deficiencies are not corrected. Collateral coverage may be inadequate to cover the principal obligation.

9 Rating — Partial Loss Probable: Borrowers exhibit well defined weaknesses that jeopardize the orderly liquidation of debt with the added provision that the weaknesses make collection of the debt in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Serious problems exist to the point where partial loss of principal is likely.

10 Rating — Definite Loss: Borrowers deemed incapable of repayment. Loans to such borrowers are considered uncollectible and of such little value that continuation as active assets of the Bank is not warranted.

The credit quality of the commercial loan portfolio is actively monitored and any changes in credit quality are reflected in risk-rating changes. Risk-ratings are assigned or reviewed for all new loans, when advancing significant additions to existing relationships (over \$50,000), at least quarterly for all actively managed loans, and any time a significant event occurs, including at renewal of the loan.

The Company utilizes a comprehensive strategy for monitoring commercial credit quality. Borrowers are required to provide updated financial information at least annually which is carefully evaluated for any changes in credit quality. Larger loan relationships are subject to a full annual credit review by an experienced credit analysis group.

Additionally, the Company retains an independent loan review firm to evaluate the credit quality of the commercial loan portfolio. The independent loan review process achieves significant penetration into the commercial loan portfolio and reports the results of these reviews to the Audit Committee of the Board of Directors on a quarterly basis.

The following table details the amount of outstanding principal balances relative to each of the risk-rating categories for the Company's commercial portfolio:

Category	Risk Rating	March 31, 2015				Total
		Commercial and Industrial	Commercial Real Estate	Commercial Construction	Small Business	
(Dollars in thousands)						
Pass	1 - 6	\$760,872	\$2,452,783	\$272,974	\$ 83,855	\$3,570,484

Table of Contents

For the Company's consumer portfolio, the quality of the loan is best indicated by the repayment performance of an individual borrower. However, the Company does supplement performance data with current Fair Isaac Corporation ("FICO") and Loan to Value ("LTV") estimates. Current FICO data is purchased and appended to all consumer loans on a quarterly basis. In addition, automated valuation services and broker opinions of value are used to supplement original value data for the residential and home equity portfolios, periodically. The following table shows the weighted average FICO scores and the weighted average combined LTV ratios as of the periods indicated below:

	March 31, 2015	December 31, 2014	
Residential portfolio			
FICO score (re-scored)(1)	739	739	
LTV (re-valued)(2)	63.8	% 67.1	%
Home equity portfolio			
FICO score (re-scored)(1)	765	764	
LTV (re-valued)(2)	53.5	% 53.6	%

(1) The average FICO scores for March 31, 2015 are based upon rescues available from February 28, 2015 and origination score data for loans booked between March 1 and March 31, 2015. The average FICO scores for December 31, 2014 are based upon rescues available from November 30, 2014 and origination score data for loans booked between December 1, 2014 and December 31, 2014.

(2) The combined LTV ratios for March 31, 2015 are based upon updated automated valuations as of February 28, 2013 and origination value data for loans booked between March 1, 2013 and March 31, 2015. The combined LTV ratios for December 31, 2014 are based upon updated automated valuations as of February 28, 2013 and actual score data for loans booked from March 1, 2013 through December 31, 2014. For home equity loans and lines in a subordinate lien, the LTV data represents a combined LTV, taking into account the senior lien data for loans and lines.

The Bank's philosophy toward managing its loan portfolios is predicated upon careful monitoring, which stresses early detection and response to delinquent and default situations. Delinquent loans are managed by a team of seasoned collection specialists and the Bank seeks to make arrangements to resolve any delinquent or default situation over the shortest possible time frame. As a general rule, loans more than 90 days past due with respect to principal or interest are classified as nonaccrual loans. As permitted by banking regulations, certain consumer loans 90 days or more past due may continue to accrue interest. The Company also may use discretion regarding other loans over 90 days delinquent if the loan is well secured and in process of collection. Set forth below is information regarding the Company's nonaccrual, delinquent, TDRs, and impaired loans at the period shown.

Table of Contents

The following table shows nonaccrual loans at the dates indicated:

	March 31, 2015	December 31, 2014
	(Dollars in thousands)	
Commercial and industrial	\$4,542	\$2,822
Commercial real estate	8,459	7,279
Commercial construction	311	311
Small business	267	246
Residential real estate	8,591	8,697
Home equity	7,976	8,038
Other consumer	7	—
Total nonaccrual loans(1)	\$30,153	\$27,393

(1) Included in these amounts were \$4.9 million and \$5.2 million of nonaccruing TDRs at March 31, 2015 and December 31, 2014, respectively.

The following table shows information regarding foreclosed residential real estate property at the date indicated:

	March 31, 2015
	(Dollars in thousands)
Foreclosed residential real estate property held by the creditor	\$2,239
Recorded investment in mortgage loans collateralized by residential real estate property that are in the process of foreclosure	\$1,508

The following table shows the age analysis of past due financing receivables as of the dates indicated:

Loan Portfolio	March 31, 2015									Total Financing Receivables	Recorded Investment >90 Days and Accruing

In the course of resolving nonperforming loans, the Bank may choose to restructure the contractual terms of certain loans. The Bank attempts to work out an alternative payment schedule with the borrower in order to avoid foreclosure actions. Any loans that are modified are reviewed by the Bank to identify if a TDR has occurred, which is when, for economic or legal reasons related to a borrower's financial difficulties, the Bank grants a concession to the borrower that it would not otherwise consider. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status and the restructuring of the loan may include the transfer of assets from the borrower to satisfy the debt, a modification of loan terms, or a combination of the two.

The following table shows the Company's total TDRs and other pertinent information as of the dates indicated:

	March 31, 2015	December 31, 2014
	(Dollars in thousands)	
TDRs on accrual status	\$36,887	\$38,382
TDRs on nonaccrual	4,899	5,248
Total TDRs	\$41,786	\$43,630
Amount of specific reserves included in the allowance for loan losses associated with TDRs:	\$1,816	\$2,004
Additional commitments to lend to a borrower who has been a party to a TDR:	\$2,071	\$1,400

The Bank's policy is to have any restructured loan which is on nonaccrual status prior to being modified remain on nonaccrual status for six months, subsequent to being modified, before management considers its return to accrual status. If the restructured loan is on accrual status prior to being modified, it is reviewed to determine if the modified loan should remain on accrual status. Additionally, loans classified as TDRs are adjusted to reflect the changes in value of the recorded investment in the loan, if any, resulting from the granting of a concession. For all residential loan modifications, the borrower must perform during a 90 day trial period before the modification is finalized. The following table shows the modifications which occurred during the periods indicated and the change in the recorded investment subsequent to the modifications occurring:

Table of Contents

	Three Months Ended March 31, 2015		
	Number of Outstanding Contracts	Pre-Modification Recorded Investment (Dollars in thousands)	Post-Modification Outstanding Recorded Investment (1)

Residential real estate	2	513	542
Other consumer	1	8	8
Total	19	\$ 2,886	\$ 2,915

(1) The post-modification balances represent the balance of the loan on the date of modifications. These amounts may show an increase when modifications include a capitalization of interest.

The following table shows the Company's post-modification balance of TDRs listed by type of modification during the period indicated:

	Three Months Ended March 31	
	2015	2014
	(Dollars in thousands)	
Extended maturity	\$642	\$835
Adjusted interest rate	—	728
Combination rate & maturity	114	1,344
Court ordered concession	30	8
Total	\$786	\$2,915

The Company considers a loan to have defaulted when it reaches 90 days past due. The following table shows loans that have been modified during the past twelve months which have subsequently defaulted during the periods indicated.

Table of Contents

	Three Months Ended March 31			
	2015		2014	
	Number	Recorded	Number	Recorded
	of Contracts	Investment	of Contracts	Investment
	(Dollars in thousands)			
Troubled debt restructurings that subsequently defaulted				
Commercial real estate	1	\$378	1	\$176
Commercial and industrial	—	—	2	52
Residential real estate	—	—	1	327
	1	\$378	4	\$555

All TDR loans are considered impaired and therefore are subject to a specific review for impairment. The impairment analysis appropriately discounts the present value of the anticipated cash flows by the loan's contractual rate of interest in effect prior to the loan's modification. The amount of impairment, if any, is recorded as a specific loss allocation to each individual loan in the allowance for loan losses. Commercial loans (commercial and industrial, commercial construction, commercial real estate and small business loans), residential loans, and home equity loans that have been classified as TDRs and which subsequently default are reviewed to determine if the loan should be deemed collateral dependent. In such an instance, any shortfall between the value of the collateral and the carrying value of the loan is determined by measuring the recorded investment in the loan against the fair value of the collateral less estimated costs to sell. The Bank charges off the amount of any confirmed loan loss in the period when the loans, or portion of loans, are deemed uncollectible. Smaller balance consumer TDR loans are reviewed for performance to determine when a charge-off is appropriate.

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Table of Contents

The tables below set forth information regarding the Company's impaired loans by loan portfolio at the dates indicated:

Certain loans acquired by the Company may have shown evidence of deterioration of credit quality since origination and it was therefore deemed unlikely that the Bank would be able to collect all contractually required payments. As such, these loans were deemed to be PCI loans and the carrying value and prospective income recognition are predicated upon future cash flows expected to be collected. The following table displays certain information pertaining to PCI loans at the dates indicated:

	March 31, 2015	December 31, 2014
	(Dollars in thousands)	
Outstanding balance	\$25,992	\$25,279
Carrying amount	\$22,576	\$22,315

The following table summarizes activity in the accretable yield for the PCI loan portfolio:

	Three Months Ended March 31	
	2015	2014
	(Dollars in thousands)	
Beginning balance	\$2,974	\$2,514
Acquisition	319	—
Accretion	(964) (377
Other change in expected cash flows (1)	219	541
Reclassification from nonaccretable difference for loans which have paid off (2)	79	—
Ending balance	\$2,627	\$2,678

(1) Represents changes in cash flows expected to be collected and resulting in increased interest income as a prospective yield adjustment over the remaining life of the loan(s).

(2) Results in increased interest income during the period in which the loan paid off at amount greater than originally expected.

Performance-based restricted stock	—	1,242

Table of Contents

NOTE 7 - STOCK BASED COMPENSATION

Time Vested Restricted Stock Awards

During the three months ended March 31, 2015, the Company made the following awards of restricted stock:

Date	Shares	Granted Plan	Grant Date Fair Value	Vesting Period
2/11/2015	31,500	2005 Employee Stock Plan	\$39.42	Ratably over 5 years from grant date
2/12/2015	25,910	2005 Employee Stock Plan	\$40.03	Ratably over 5 years from grant date
3/19/2015	3,800	2005 Employee Stock Plan	\$43.56	Ratably over 5 years from grant date

The fair value of the restricted stock awards is based upon the average of the high and low price at which the Company's common stock traded on the date of grant. The holders of restricted stock awards participate fully in the rewards of stock ownership of the Company, including voting and dividend rights.

Performance-Based Restricted Stock Awards

On February 12, 2015, the Company granted 21,780 performance-based restricted stock awards to certain executive level employees. These performance-based restricted stock awards were issued from the 2005 Employee Stock Plan and were determined to have a grant date fair value per share of \$40.03. The number of shares to be vested will be contingent upon the Company's attainment of certain performance measures outlined in the award agreement and will be measured as of the end of the three year performance period, or December 31, 2017. These awards will be accounted for as equity awards due to the nature of these awards and the fact that these shares will not be settled in cash.

The fair value of the performance-based restricted stock awards, assuming achievement at target, is based upon the average of the high and low price at which the Company's common stock traded on the date of grant. The holders of these awards are not entitled to receive dividends or vote until the share are vested.

Stock Options

The Company did not issue any awards of options to purchase shares of common stock during the three months ended March 31, 2015.

NOTE 8 - DERIVATIVE AND HEDGING ACTIVITIES

The Company's derivative financial instruments are used to manage differences in the amount, timing, and duration of the Company's known or expected cash receipts and its known or expected cash payments principally to manage the Company's interest rate risk. Additionally, the Company enters into interest rate derivatives and foreign exchange contracts to accommodate the business requirements of its customers ("customer related positions"). The Company minimizes the market and liquidity risks of customer related positions by entering into similar offsetting positions with broker-dealers. Derivative instruments are carried at fair value in the Company's financial statements. The accounting for changes in the fair value of a derivative instrument is dependent upon whether or not it qualifies as a hedge for accounting purposes, and further, by the type of hedging relationship.

The Company does not enter into proprietary trading positions for any derivatives.

Interest Rate Positions

The Company currently utilizes interest rate swap agreements as hedging instruments against interest rate risk associated with the Company's borrowings. An interest rate swap is an agreement whereby one party agrees to pay a floating rate of interest on a notional principal amount in exchange for receiving a fixed rate of interest on the same notional amount, for a predetermined period of time, from a second party. The amounts relating to the notional principal amount are not actually exchanged. The maximum length of time over which the Company is currently hedging its exposure to the variability in future cash flows for forecasted transactions related to the payment of

variable interest on existing financial instruments is four years.

32

Table of Contents

The following table reflects the Company's derivative positions for the periods indicated below for interest rate swaps which qualify as cash flow hedges for accounting purposes:

March 31, 2015

For derivative instruments that are designated and qualify as cash flow hedging instruments, the effective portion of the gains or losses is reported as a component of other comprehensive income ("OCI"), and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. The Company expects approximately \$2.7 million (pre-tax) to be reclassified to interest expense from OCI related to the Company's cash flow hedges in the next twelve months. This reclassification is due to anticipated payments that will be made and/or received on the swaps based upon the forward curve as of March 31, 2015.

The Company recognized \$61,000 of net amortization income that was an offset to interest expense related to previously terminated swaps for the three month periods ended March 31, 2015 and 2014, respectively.

The Company had no fair value hedges as of March 31, 2015 or December 31, 2014.

Customer Related Positions

Loan level derivatives, primarily interest rate swaps, offered to commercial borrowers through the Bank's loan level derivative program do not qualify as hedges for accounting purposes. The Bank believes that its exposure to commercial customer derivatives is limited because these contracts are simultaneously matched at inception with an offsetting dealer transaction. The commercial customer derivative program allows the Bank to retain variable-rate commercial loans while allowing the customer to synthetically fix the loan rate by entering into a variable-to-fixed interest rate swap.

Foreign exchange contracts offered to commercial borrowers through the Bank's derivative program do not qualify as hedges for accounting purposes. The Bank acts as a seller and buyer of foreign exchange contracts to accommodate its customers. To mitigate the market and liquidity risk associated with these derivatives, the Bank enters into similar offsetting positions.

Table of Contents

The following table reflects the Company's customer related derivative positions for the periods indicated below for those derivatives not designated as hedging:

	Number of Positions (1)	Notional Amount Maturing					Total	Fair Value
		Less than 1 year	Less than 2 years	Less than 3 years	Less than 4 years	Thereafter		
March 31, 2015 (Dollars in thousands)

(1) The Company may enter into one dealer swap agreement which offsets multiple commercial borrower swap agreements.

Mortgage Derivatives

Prior to closing and funding certain one-to-four family residential mortgage loans, an interest rate lock commitment is generally extended to the borrower. During the period from commitment date to closing date, the Company is subject to the risk that market rates of interest may change. If market rates rise, investors generally will pay less to purchase such loans resulting in a reduction in the gain on sale of the loans or, possibly, a loss. In an effort to mitigate such risk, forward delivery sales commitments are executed, under which the Company agrees to deliver whole mortgage loans to various investors. In addition, the Company may also enter into additional forward To Be Announced ("TBA") mortgage contracts, also considered derivative instruments, which are purchased by the Company from a diversified list of counterparties in order to hedge customer rate locks. These forward contracts carry a market price that has a strong inverse relationship to that of mortgage prices. When the Company locks a rate to the customer, the rate can be held for the benefit of the customer for a certain period of time until the mortgage is sold. During that time, the Company may not have agreed on a price with a mortgage investor and fluctuations in market conditions may cause the mortgage to lose market value. Within a short period after the rate is locked with the customer, the Company may, depending upon the effectiveness of existing hedges, execute a forward TBA trade with a counterparty to hedge that

market risk. Certain assumptions, including pull through rates and rate lock periods, are used in managing the existing and future hedges. The effectiveness of the hedges rely on the accuracy of these assumptions.

The change in fair value on the interest rate lock commitments, forward delivery sale commitments, and forward TBA mortgage contracts are recorded in current period earnings as a component of mortgage banking income. In addition, the Company has elected the fair value option to carry loans held for sale at fair value. The change in fair value of loans held for sale is recorded in current period earnings as a component of mortgage banking income in accordance with the Company's fair value election. The change in fair value associated with loans held for sale was an increase of \$27,000 and \$51,000 for the three months ended

Table of Contents

March 31, 2015 and 2014, respectively. These amounts were offset in earnings by the change in the fair value of mortgage derivatives.

The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the balance sheet at the periods indicated:

	Asset Derivatives			Liability Derivatives		
	Balance Sheet Location (Dollars in thousands)	Fair Value at March 31, 2015	Fair Value at December 31, 2014	Balance Sheet Location	Fair Value at March 31, 2015	Fair Value at December 31, 2014

Changes in fair value of mortgage derivatives		
Mortgage banking income	192	(40)
Total	\$195	\$(12)

Table of Contents

By using derivatives, the Company is exposed to credit risk to the extent that counterparties to the derivative contracts do not perform as required. Should a counterparty fail to perform under the terms of a derivative contract, the Company's credit exposure on interest rate swaps is limited to the net positive fair value and accrued interest of all swaps with each counterparty. The Company seeks to minimize counterparty credit risk through credit approvals, limits, monitoring procedures, and obtaining collateral, where appropriate. Institutional counterparties must have an investment grade credit rating and be approved by the Company's Board of Directors. As such, management believes the risk of incurring credit losses on derivative contracts with those counterparties is remote and losses, if any, would be immaterial. The Company had \$4,000 and \$272,000 in exposure relating to institutional counterparties at March 31, 2015 and December 31, 2014, respectively. The Company's exposure relating to customer counterparties was approximately \$24.5 million and \$18.9 million at March 31, 2015 and December 31, 2014, respectively. Credit exposure may be reduced by the amount of collateral pledged by the counterparty.

NOTE 9 - BALANCE SHEET OFFSETTING

The Company does not offset fair value amounts recognized for derivative instruments or repurchase agreements. The Company does net the amount recognized for the right to reclaim cash collateral against the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement. Collateral legally required to be maintained at dealer banks by the Company is monitored and adjusted as necessary. At March 31, 2015, it was determined that no additional collateral would have to be posted to immediately settle these instruments.

The following tables present the Company's asset and liability derivative positions and the potential effect of netting arrangements on its financial position, as of the periods indicated:

	Gross Amounts Recognized in the Statement of Financial Position March 31, 2015 (Dollars in thousands)	Gross Amounts Offset in the Statement of Financial Position	Net Amounts Presented in the Statement of Financial Position	Gross Amounts Not Offset in the Statement of Financial Position Financial Instruments (1)	Collateral Pledged (Received)	Net Amount

(1) Reflects offsetting derivative positions with the same counterparty.

The Company has agreements with certain of its derivative counterparties that contain a provision where if the Company fails to maintain its status as a well capitalized institution, then the Company could be required to terminate any outstanding derivatives with the counterparty. All liability position interest rate swap and customer loan level swap counterparties have credit-risk contingent features as of the dates indicated in the table above. In addition, derivative instruments that contain credit-risk related contingent features that are in a net liability position require the Company to assign collateral as noted in the table above.

NOTE 10 - FAIR VALUE MEASUREMENTS

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. If there has been a significant decrease in the volume and level of activity for the asset or liability, regardless of the valuation technique(s) used, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. The Company uses prices and inputs that are current as of the measurement date. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from one level to another.

The Fair Value Measurements and Disclosures Topic of the FASB ASC defines fair value and establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under the

Fair Value Measurements and Disclosures Topic of the FASB ASC are described below:

Level 1 – Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 – Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

37

Table of Contents

Level 3 – Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Valuation Techniques

There have been no changes in the valuation techniques used during the current period.

Securities:

Trading Securities

These equity securities are valued based on market quoted prices. These securities are categorized in Level 1 as they are actively traded and no valuation adjustments have been applied.

U.S. Government Agency Securities

Fair value is estimated using either multi-dimensional spread tables or benchmarks. The inputs used include benchmark yields, reported trades, and broker/dealer quotes. These securities are classified as Level 2.

Agency Mortgage-Backed Securities

Fair value is estimated using either a matrix or benchmarks. The inputs used include benchmark yields, reported trades, broker/dealer quotes, and issuer spreads. These securities are categorized as Level 2.

Agency Collateralized Mortgage Obligations

The valuation model for these securities is volatility-driven and ratings based, and uses multi-dimensional spread tables. The inputs used include benchmark yields, reported trades, new issue data, broker dealer quotes, and collateral performance. If there is at least one significant model assumption or input that is not observable, these securities are categorized as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2.

State, County, and Municipal Securities

The fair value is estimated using a valuation matrix with inputs including bond interest rate tables, recent transaction, and yield relationships. These securities are categorized as Level 2.

Single and Pooled Issuer Trust Preferred Securities

The fair value of trust preferred securities, including pooled and single issuer preferred securities, is estimated using external pricing models, discounted cash flow methodologies or similar techniques. The inputs used in these valuations include benchmark yields, reported trades, new issue data, broker dealer quotes, and collateral performance. If there is at least one significant model assumption or input that is not observable, these securities are classified as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2.

Equity Securities

These equity securities are valued based on market quoted prices. These securities are classified as Level 1 as they are actively traded and no valuation adjustments have been applied.

Loans Held for Sale

The Company has elected the fair value option to account for originated closed loans intended for sale. The fair value is measured on an individual loan basis using quoted market prices and when not available, comparable market value or discounted cash flow analysis may be utilized. These assets are typically classified as Level 2.

Derivative Instruments

Derivatives

The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. The Company incorporates credit valuation adjustments to appropriately reflect nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Company has considered the impact

Table of Contents

of netting and any applicable credit enhancements, such as collateral postings. Additionally, in conjunction with fair value measurement guidance, the Company has made an accounting policy election to measure the credit risk of its derivative financial instruments that are subject to master netting agreements on a net basis by counterparty portfolio. Although the Company has determined that the majority of the inputs used to value its interest rate derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by the Company and its counterparties. However, as of March 31, 2015 and December 31, 2014, the Company has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Company has determined that its derivative valuations in their entirety are classified as Level 2.

Mortgage Derivatives

The fair value of mortgage derivatives is determined based on current market prices for similar assets in the secondary market and, therefore, classified as Level 2 within the fair value hierarchy.

Impaired Loans

Collateral dependent loans that are deemed to be impaired are valued based upon the lower of cost or fair value of the underlying collateral less costs to sell. The inputs used in the appraisals of the collateral are not always observable, and therefore the loans may be classified as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2.

Other Real Estate Owned and Other Foreclosed Assets

The fair values are generally estimated based upon recent appraisal values of the property less costs to sell the property, as Other Real Estate Owned ("OREO") and Other Foreclosed Assets are valued at the lower of cost or fair value of the property, less estimated costs to sell. Certain inputs used in appraisals are not always observable, and therefore OREO and Other Foreclosed Assets may be classified as Level 3 within the fair value hierarchy.

Goodwill and Other Intangible Assets

Goodwill and identified intangible assets are subject to impairment testing. The Company conducts an annual impairment test of goodwill in the third quarter of each year, or more frequently if necessary, and other intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. To estimate the fair value of goodwill and, if necessary, other intangible assets, the Company utilizes both a comparable analysis of relevant price multiples in recent market transactions and discounted cash flow analysis. Both valuation models require a significant degree of management judgment. In the event the fair value as determined by the valuation model is less than the carrying value, the intangibles may be impaired. If the impairment testing resulted in impairment, the Company would classify the impaired goodwill and other intangible assets subjected to nonrecurring fair value adjustments as Level 3.

Table of Contents

Assets and liabilities measured at fair value at the periods indicated were as follows:

	Balance	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Total nonrecurring fair value measurements	\$15,939	\$—	\$—	\$15,939

The table below presents a reconciliation for all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3), which were valued using pricing models and discounted cash flow methodologies, as of the dates indicated:

	Securities Available for Sale: (Dollars in thousands)	
	Three Months Ended March 31, 2015	Three Months Ended March 31, 2014
Pooled Trust Preferred Securities		
Beginning balance	\$6,321	\$3,841
Gains (losses) (realized/unrealized)		
Included in other comprehensive income	(4) 1,162
Settlements	(45) (36
Ending balance	\$6,272	\$4,967

It is the Company's policy to recognize the transfers between levels of the fair value hierarchy as of the end of the reporting period. There were no transfers between the levels of the fair value hierarchy for any assets or liabilities measured at fair value on a recurring basis during the three month periods ended March 31, 2015 or 2014.

Table of Contents

The following table sets forth certain unobservable inputs regarding the Company's investment in securities that are classified as Level 3 for the periods indicated:

Valuation Technique	March 31	December 31	Unobservable Inputs	March 31	December 31	March 31	December 31
	2015	2014		2015	2014	2015	2014
	Fair Value			Range		Weighted Average	
	(Dollars in Thousands)						
Discounted cash flow methodology							
Pooled trust preferred securities	\$6,272	\$6,321	Cumulative prepayment	0% - 75%	0% - 75%	6.9%	7.0%
			Cumulative default	3% - 100%	3% - 100%	13.3%	13.9%
			Loss given default	85% - 100%	85% - 100%	95.9%	96.1%
			Cure given default	0% - 75%	0% - 75%	39.2%	46.7%
Appraisals of collateral (1)							
Impaired loans	\$7,559	\$8,196					
Other real estate owned and foreclosed assets	\$6,285	\$7,743					

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various Level 3 inputs which are not identifiable. Appraisals may be adjusted by management for qualitative factors such as economic factors and estimated liquidation expenses. The range of these possible adjustments may vary.

For the fair value measurements in the table above, which are classified as Level 3 within the fair value hierarchy, the Company's Treasury and Finance groups determine the valuation policies and procedures. For the pricing of the securities, the Company uses third-party pricing information, without adjustment. Depending on the type of the security, management employs various techniques to analyze the pricing it receives from third parties, such as analyzing changes in market yields and in certain instances reviewing the underlying collateral of the security. Management reviews changes in fair value from period to period and performs testing to ensure that prices received from the third parties are consistent with their expectation of the market. For the securities whose market is deemed to be inactive and which are categorized as Level 3, the fair value models are calibrated and significant inputs are back tested on a quarterly basis, to the extent possible. This testing is done by the third party service provider, who performs this testing by comparing anticipated inputs to actual results. Significant changes in fair value from period to period are closely scrutinized to ensure fair value models are not flawed. The driver(s) of the respective change in fair value and the method for forecasting the driver(s) is closely considered by management.

The significant unobservable inputs used in the fair value measurement of the Company's pooled trust preferred securities are cumulative prepayment rates, cumulative defaults, loss given defaults and cure given defaults. Significant increases (decreases) in deferrals or defaults, in isolation, would result in a significantly lower (higher) fair value measurement. Alternatively, significant increases (decreases) in cure rates, in isolation, would result in a significantly higher (lower) fair value measurement.

Additionally, the Company has certain assets which are marked to fair value on a nonrecurring basis which are categorized within Level 3. These assets include collateral dependent impaired loans and OREO. The determination of the fair value amount is derived from the use of independent third party appraisals and evaluations, prepared by firms from a predetermined list of qualified and approved appraisers or evaluators. Upon receipt of an appraisal or

evaluation, the Company's Commercial Real Estate Appraisal Department will review the report for compliance with regulatory and Bank standards, as well as reasonableness and acceptance of the value conclusions. Any issues or concerns regarding compliance or value conclusions will be addressed with the engaged firm and the report may be adjusted or revised. If a disagreement cannot be resolved, the Commercial Real Estate Appraisal Department will either address the key issues and modify the report for acceptance or reject the report and re-order a new report. Ultimately, the Company's Commercial Real Estate Appraisal Department will confirm the collateral value as part of its review process.

Table of Contents

The estimated fair values and related carrying amounts for assets and liabilities for which fair value is only disclosed are shown below as of the periods indicated:

	Carrying Value	Fair Value	Fair Value Measurements at Reporting Date Using		
			Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	March 31, 2015 (Dollars in thousands)

The fair values presented are based on quoted market prices, where available. If quoted market prices are not (a) available, fair values are based on quoted market prices of comparable instruments and/or discounted cash flow analyses.

(b) Fair value is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities or cash flows.

(c) Fair value was determined by discounting anticipated future cash payments using rates currently available for instruments with similar remaining maturities.

(d) Fair value was determined based upon market prices of securities with similar terms and maturities.

This summary excludes financial assets and liabilities for which the carrying value approximates fair value. For financial assets, these include cash and due from banks, federal funds sold, short-term investments, FHLB stock, and cash surrender value of life insurance policies. For financial liabilities, these include demand, savings, money market deposits, and federal funds purchased. These instruments would all be considered to be classified as Level 1 within the fair value hierarchy. Also excluded from the summary are financial instruments measured at fair value on a recurring and nonrecurring basis, as previously described.

The Company considers its financial instruments' current use to be the highest and best use of the instruments.

Less: net cash flow hedge losses reclassified into interest on borrowings expense (1)	(1,148)) 469	(679)
Net change in fair value of cash flow hedges	848	(346)	502
Net unamortized gain related to defined benefit pension and other postretirement adjustments arising during the period	(80)) 33	(47)
Less: amortization of actuarial losses	(11)) 4	(7)
Less: amortization of prior service costs	25	(10)	15
Net change in other comprehensive income for defined benefit postretirement plans (2)	(66)) 27	(39)
Total other comprehensive income	\$3,978	\$ (1,598)	\$ 2,380

(1) Includes the amortization of the remaining balance of a realized but unrecognized gain, net of tax, from the termination of interest rate swaps in June 2009. The original gain of \$1.4 million, net of tax, is being recognized in earnings through December 2018, the original maturity date of the swap. The balance of this gain has amortized to \$534,000 and \$678,000 at March 31, 2015 and 2014, respectively.

(2)

The amortization of prior service costs is included in the computation of net periodic pension cost as disclosed in the Employee Benefit Plans footnote in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, filed with the Securities and Exchange Commission.

Table of Contents

Information on the Company's accumulated other comprehensive loss, net of tax, is comprised of the following components as of the periods indicated:

	Unrealized Gain on Securities	Unrealized Loss on Cash Flow Hedge	Deferred Gain on Hedge Transactions	Defined Benefit Postretirement Plans	Accumulated Other Comprehensive Loss
2015 (Dollars in thousands)					
Beginning balance: January 1, 2015	\$3,389	\$(3,298)	\$571	\$ (2,794)	\$(2,132)
Net change in other comprehensive income (loss)	1,561	119	(37)	76	1,719
Ending balance: March 31, 2015	\$4,950	\$(3,179)	\$534	\$ (2,718)	\$(413)
2014					
Beginning balance: January 1, 2014	\$(2,023)	\$(5,698)	\$715	\$ (428)	\$(7,434)
Net change in other comprehensive income (loss)	1,917	539	(37)	(39)	2,380
Ending balance: March 31, 2014	\$(106)	\$(5,159)	\$678	\$ (467)	\$(5,054)

NOTE 12 - COMMITMENTS AND CONTINGENCIES

Financial Instruments with Off-Balance Sheet Risk

In the normal course of business, the Company enters into various transactions to meet the financing needs of its customers, which, in accordance with GAAP, are not included in its consolidated balance sheets. These transactions include commitments to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in the consolidated balance sheets. The Company minimizes its exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures.

The Company enters into contractual commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Substantially all of these commitments to extend credit are contingent upon customers maintaining specific credit standards at the time of loan funding. Standby letters of credit are written conditional commitments issued to guarantee the performance of a customer to a third party. In the event the customer does not perform in accordance with the terms of the agreement with the third party, the Company would be required to fund the commitment. The maximum potential amount of future payments the Company could be required to make is represented by the contractual amount of the commitment. If the commitment were funded, the Company would be entitled to seek recovery from the customer. The Company's policies generally require that standby letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements.

The fees collected in connection with the issuance of standby letters of credit are representative of the fair value of its obligation undertaken in issuing the guarantee. In accordance with applicable accounting standards related to guarantees, fees collected in connection with the issuance of standby letters of credit are deferred. The fees are then recognized in income proportionately over the life of the standby letter of credit agreement. The deferred standby letter of credit fees represent the fair value of the Company's potential obligations under the standby letter of credit guarantees.

The following table summarizes the above financial instruments at the dates indicated:

	March 31, 2015 (Dollars in thousands)	December 31, 2014
Commitments to extend credit	\$1,862,493	\$1,822,369
Standby letters of credit	19,912	18,516
Deferred standby letter of credit fees	119	105

Table of Contents

Lease Commitments

The Company leases office space, space for ATM locations, and certain branch locations under noncancelable operating leases.

Rent expense incurred under operating leases was approximately \$1.9 million for both the three months ended March 31, 2015 and 2014, respectively. Renewal options ranging from 1-10 years exist for several of these leases. Rockland Trust has entered into a lease with a related party. The terms of that lease are substantially the same as terms for comparable transactions with unrelated parties, and required rent payments of approximately \$168,000 and \$251,000 for the three months ended March 31, 2015 and 2014, respectively. There has been no significant change in the future minimum lease payments payable by the Company since December 31, 2014. See the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014 for information regarding our leases and other commitments.

Other Contingencies

At March 31, 2015, Rockland Trust was involved in pending lawsuits that arose in the ordinary course of business or due to acquisitions. Management has reviewed these pending lawsuits with legal counsel and has taken into consideration the view of counsel as to their outcome. In the opinion of management, the final disposition of pending lawsuits is not expected to have a material adverse effect on the Company's financial position or results of operations. The Bank is required to maintain certain reserve requirements of vault cash and/or deposits with the Federal Reserve Bank of Boston. The amount of this reserve requirement was \$25.7 million and \$33.0 million at March 31, 2015 and December 31, 2014, respectively.

NOTE 13 - LOW INCOME HOUSING PROJECT INVESTMENTS

The Company has invested in low income housing projects that generate Low Income Housing Tax Credits ("LIHTC") which provide the Company with tax credits and operating loss tax benefits over a period of approximately 15 years. None of the original investment is expected to be repaid. The investment in LIHTC projects is being accounted for using the proportional amortization method, under which the Company amortizes the initial cost of the investment in proportion to the amount of the tax credits and other tax benefits received and recognizes the net investment benefit in the income statement as a component of income tax expense (benefit).

The following table presents the Company's investments in low income housing projects as of the date indicated:

	March 31, 2015	December 31, 2014
	(Dollars in thousands)	
Original investment value	\$40,541	\$40,541
Current recorded investment	38,305	38,943
Unfunded liability obligation	23,002	28,004
Tax credits and benefits (1)	4,554	1,683
Amortization of investments (2)	3,045	1,089
Net income tax benefit (3)	1,509	594

(1) This amount reflects anticipated tax credits and tax benefits for the years ended December 31, 2015 and 2014.

(2) The amortization amount reduces the tax credits and benefits anticipated for the full years ended December 31, 2015 and 2014.

(3) This amount represents the net tax benefit expected to be realized for the full years ended December 31, 2015 and 2014 in determining the Company's effective tax rate.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the consolidated financial statements, notes and tables included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014, filed with the Securities and Exchange Commission.

Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q, both in the Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere, contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are not historical facts and include expressions about management's confidence and strategies and management's expectations about new and existing programs and products, acquisitions, relationships, opportunities, taxation, technology, market conditions and economic expectations. These statements may be identified by forward-looking terminology such as "should," "expect," "believe," "view," "opportunity," "allow," "continues," "reflects," "typically," "usually," "anticipate," or similar statements or variations of such terms. Such forward-looking statements involve certain risks and uncertainties and our actual results may differ materially from such forward-looking statements. Factors that may cause actual results to differ materially from those contemplated by such forward-looking statements, in addition to those risk factors listed under the "Risk Factors" section of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014, include, but are not limited to:

- a weakening in the United States economy in general and the regional and local economies within the New England region and the Company's market area;
- adverse changes in the local real estate market;
- a deterioration of the credit rating for U.S. long-term sovereign debt;
- acquisitions may not produce results at levels or within time frames originally anticipated and may result in unforeseen integration issues or impairment of goodwill and/or other intangibles;
- changes in trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System;
- higher than expected tax expense resulting from failure to comply with general tax laws, changes in tax laws or failure to comply with requirements of the federal New Markets Tax Credit program;
- unexpected changes in market interest rates for interest earning assets and/or interest bearing liabilities;
- adverse changes in asset quality including an unanticipated credit deterioration in our loan portfolio;
- unexpected increased competition in the Company's market area;
- unanticipated loan delinquencies, loss of collateral, decreased service revenues, and other potential negative effects on our business caused by severe weather or other external events;
- a deterioration in the conditions of the securities markets;
- our inability to adapt to changes in information technology;
- electronic fraudulent activity within the financial services industry, especially in the commercial banking sector;
- adverse changes in consumer spending and savings habits;
- the inability to realize expected revenue synergies from the Peoples Federal Bancshares merger in the amounts or in the timeframe anticipated;
- cost or difficulties relating to the Peoples Federal Bancshares integration matters might be greater than expected;
- inability to retain customers and employees, including those of Peoples Federal Bancshares;
- the effect of laws and regulations regarding the financial services industry including, but not limited to, the Dodd-Frank Wall Street Reform and Consumer Protection Act;
- changes in laws and regulations (including laws and regulations concerning taxes, banking, securities and insurance) generally applicable to the Company's business;
- changes in accounting policies, practices and standards, as may be adopted by the regulatory agencies as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board, and other accounting

standard setters;

• cyber security attacks or intrusions that could adversely impact our businesses; and

• other unexpected material adverse changes in our operations or earnings.

Except as required by law, the Company disclaims any intent or obligation to update publicly any such forward-looking statements, whether in response to new information, future events or otherwise. Any public statements or disclosures by the Company following this Quarterly Report on Form 10-Q which modify or impact any of the forward-looking statements contained in this Quarterly Report on Form 10-Q will be deemed to modify or supersede such statements in this Quarterly Report on Form 10-Q.

Table of Contents

Executive Level Overview

Management evaluates the Company's operating results and financial condition using measures that include net income, earnings per share, return on assets and equity, return on tangible common equity, net interest margin, tangible book value per share, asset quality indicators, and many others. These metrics help management make key decisions regarding the Bank's balance sheet, liquidity, interest rate sensitivity, and capital resources and assist with identifying areas to improve. The Company is focused on organic growth, but will consider acquisition opportunities that provide a satisfactory financial return. During the first quarter of 2015 the Company closed on the acquisition of Peoples Federal Bancshares, Inc. ("Peoples").

Loans and Asset Quality

Management's balance sheet strategy emphasizes commercial and home equity lending. The results depicted in the following table reflect an overall increase in total loans due to the acquisition of Peoples. However, the impact of the acquisition was offset by adverse weather conditions and an increasing competitive environment which led to organic declines in overall loan balances, primarily in the commercial and industrial and residential real estate portfolios.

Management strives to be disciplined about loan pricing and generates loan assets with interest rate sensitivity in mind. The Company has gradually and intentionally shifted its balance sheet composition so that its interest-rate risk position is fundamentally asset-sensitive.

Management takes a disciplined approach to credit underwriting, seeking to avoid undue credit risk and loan losses as evidenced by consistently strong overall asset quality metrics.

Table of Contents

Funding and the Net Interest Margin

The Company's overall sources of funding increased during the first quarter of 2015, reflective of the Peoples acquisition. The impact of the acquisition supported management's continued emphasis on core deposit growth to fund loans, as depicted by the following chart:

As of March 31, 2015, core deposits comprised 86.7% of total deposits compared to 87.3% in the prior quarter. Exclusive of the Peoples acquisition, core deposits increased by \$47.0 million during the first quarter to \$4.9 billion. The continued emphasis on core deposits has resulted in a low cost of deposits, which was 0.21% for the quarter compared to 0.20% in the prior quarter.

The Company's net interest margin was 3.50% for the quarter ended March 31, 2015, an increase of eight basis points from the linked quarter. The Company's net interest margin increase was mainly due to a four basis point accretion adjustment related to early payoffs on loans acquired along with lower liquid balances.

Noninterest Income

Management continues to focus on noninterest income growth, however, seasonal fluctuations in deposit account fees typically impact first quarter results as compared to other previous quarters. Noninterest income is primarily comprised of deposit account fees, interchange and ATM fees, and investment management fees. The following chart depicts noninterest income, excluding certain noncore items, as a percentage of total revenue (the sum of net noninterest income, excluding certain noncore items, and net interest income) over the past five quarters:

*See "Non-GAAP Measures" below for a reconciliation to GAAP financial measures.

Table of Contents

Expense Control

Management takes a balanced approach to noninterest expense control by paying close attention to the management of ongoing operating expenses while making needed capital expenditures and prudently investing in growth initiatives. The Company's primary expenses arise from Rockland Trust's employee salaries and benefits and expenses associated with buildings and equipment. During the first quarter of 2015, noninterest expense increased from prior periods due to the closing of the Peoples acquisition. The following chart depicts the Company's efficiency ratio, on an operating basis (calculated by dividing noninterest expense, excluding certain noncore items, by the sum of net noninterest income, excluding certain noncore items, and net interest income) over the past five quarters:

*See "Non-GAAP Measures" below for a reconciliation to GAAP financial measures.

Tax Effectiveness

The Company participates in federal and state tax credit programs designed to promote economic development, affordable housing, and job creation. The Company continues to participate in the federal New Markets Tax Credit program and has made low-income housing tax credit investments. The Company has also established security corporation subsidiaries and, through its subsidiaries, purchased tax-exempt bonds. Federal and state tax credit program participation and other tax strategies permit the Company to operate in a tax effective manner and sometimes also creates a competitive advantage for Rockland Trust and its community development subsidiaries. During the first quarter of 2015, the Company's effective tax rate was 29.03%.

Table of Contents

Capital

The Company's disciplined approach with respect to revenue, expense, and tax effectiveness is designed to promote long-term shareholder value. This approach, combined with the impact of the stock issued as consideration for the Peoples acquisition, has resulted in a tangible book value per share increase of \$0.64 during the first quarter, and tangible common equity as a percentage of tangible assets increased from 7.44% in the prior quarter to 7.73%. The following chart shows the Company's tangible book value per share over the past five quarters:

*See "Non-GAAP Measures" below for a reconciliation to GAAP financial measures.

This strong growth in capital has led to a consistent cash dividend which increased from \$0.24 per share in each quarter of 2014 to \$0.26 per share in the first quarter of 2015, representing an 8.3% increase.

2015 Results

Net income for the first quarter of 2015 computed in accordance with generally accepted accounting principles in the United States ("GAAP") was \$9.5 million, or \$0.38 on a diluted earnings per share basis, as compared to \$13.4 million, or \$0.56 per diluted share, for the prior year first quarter. The first quarters in both 2015 and 2014 included merger and acquisition expenses, as well as other items that are considered noncore, which are excluded from operating earnings. First quarter 2015 net operating earnings were \$15.8 million, or \$0.63 on a diluted earnings per share basis, an increase of 30.5% and 23.5%, respectively, when compared to net operating earnings of \$12.1 million, or \$0.51 per diluted share, for the first quarter of 2014.

2015 Earnings Outlook

The Company anticipates 2015 diluted operating earnings per share performance to be in the range between \$2.63 and \$2.73. Key assumptions in the 2015 outlook include:

▣ Total organic loan growth likely in the lower end of 4-6% range;

▣ Total organic deposit growth of 3-4%;

▣ A net interest margin percentage in the low 3.40s;

Stable asset quality, with a provision for loan loss in the range of \$7-\$10 million and net charge-offs in the range of \$5-\$8 million;

▣ Core noninterest income (exclusive of the Peoples acquisition) growing by 3-4%;

▣ Core noninterest expense (exclusive of the Peoples acquisition) increasing by 3-4%;

▣ An effective tax rate of slightly higher than 28.5% realized in 2014; and

▣ Tangible Common Equity ratio increasing to a range of 7.75% to 8.00% by the end of 2015.

Table of Contents

Non-GAAP Measures

When management assesses the Company's financial performance for purposes of making day-to-day and strategic decisions, it does so based upon the performance of its core banking business, which is primarily derived from the combination of net interest income and noninterest or fee income, reduced by operating expenses, the provision for loan losses, and the impact of income taxes and other noncore items shown in the table that follows. The Company's financial performance is determined in accordance with GAAP which sometimes includes items that management believes are unrelated to its core banking business and will not have a material financial impact on operating results in future periods, such as gains or losses on the sales of securities, merger and acquisition expenses, and other items. Management, therefore, computes the Company's non-GAAP operating earnings, which excludes these items, to measure the strength of the Company's core banking business and to identify trends that may to some extent be obscured by such gains or losses. Management also supplements its evaluation of financial performance with analysis of tangible book value per share which is computed by dividing stockholders' equity less goodwill and identifiable intangible assets by common shares outstanding.

Management's computation of the Company's non-GAAP operating earnings information and tangible book value per share are set forth because management believes it may be useful for investors to have access to the same analytical tools used by management to evaluate the Company's core operational performance so that investors may assess the Company's overall financial health and identify business and performance trends that may be more difficult to identify and evaluate when noncore items are included and to assess the relative strength of the Company's capital position. Management also believes that the computation of non-GAAP operating earnings and tangible book value per share may facilitate the comparison of the Company to other companies in the financial services industry.

Non-GAAP measures should not be considered a substitute for GAAP results. An item which management deems to be noncore and excludes when computing non-GAAP operating earnings can be of substantial importance to the Company's results for any particular quarter or year. The Company's non-GAAP operating earnings information and tangible book value per share set forth are not necessarily comparable to non-GAAP information which may be presented by other companies.

The following tables summarizes the impact of noncore items recorded for the time periods indicated below and reconciles them in accordance with GAAP:

	Three Months Ended March 31			
	Net Income		Diluted Earnings Per Share	
	2015	2014	2015	2014

Tangible book value per share	\$19.82	\$19.18	\$18.66	\$18.20	\$17.61	((a-b)/c)

Critical Accounting Policies

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and could potentially result in materially different results under different assumptions and conditions. The Company believes that the most critical accounting policies are those which the Company's financial condition depends upon, and which involve the most complex or subjective decisions or assessments.

There have been no material changes in critical accounting policies during the first three months of 2015. Please refer to the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014 for a complete listing of critical accounting policies.

Table of Contents

FINANCIAL POSITION

Securities Portfolio The Company's securities portfolio consists of trading securities, securities available for sale, and securities which management intends to hold until maturity. Securities increased by \$58.3 million, or 8.0%, at March 31, 2015 as compared to December 31, 2014, primarily due to the acquired Peoples portfolio of \$43.6 million. The ratio of securities to total assets was 11.3% and 11.4% as of March 31, 2015 and December 31, 2014, respectively.

The Company continually reviews investment securities for the presence of other-than-temporary impairment ("OTTI"). For debt securities, the primary consideration in determining whether impairment is OTTI is whether or not the Bank expects to collect all contractual cash flows. Further analysis of the Company's OTTI can be found in Note 4 "Securities" within Notes to Consolidated Financial Statements included in Item 1 hereof.

Residential Mortgage Loan Sales The Company's primary loan sale activity arises from the sale of government sponsored enterprise eligible residential mortgage loans to government sponsored agencies and other financial institutions. During the three months ended March 31, 2015 and 2014 the Bank originated residential loans with the intention of selling them in the secondary market, and to a lesser extent, to hold in the Company's residential portfolio. When a loan is sold, the Company enters into agreements that contain representations and warranties about the characteristics of the loans sold and their origination. The Company may be required to either repurchase mortgage loans or to indemnify the purchaser from losses if representations and warranties are breached. The Company established a reserve of \$250,000 during the fourth quarter of 2014 and incurred no losses during the three months ended March 31, 2015 related to mortgage repurchases. The Company incurred no losses related to repurchases during the three months ended March 31, 2014.

The following table shows the total residential loans that were closed and whether the amounts were held in the portfolio or sold/held for sale in the secondary market during the period indicated:

Table 1 - Closed Residential Real Estate Loans

	Three Months Ended March 31	
	2015	2014
	(Dollars in thousands)	
Held in portfolio	\$10,203	\$11,659
Sold/held for sale in secondary market	42,602	23,421
Total closed loans	\$52,805	\$35,080

The table below reflects the loans which were sold during the periods indicated:

Table 2 - Residential Mortgage Loan Sales

	Three Months Ended March 31	
	2015	2014
	(Dollars in thousands)	
Sold with servicing rights released	\$34,681	\$3,668
Sold with servicing rights retained	5,912	19,533
Total loans sold	\$40,593	\$23,201

Table of Contents

As noted in the table above, loans may be sold with servicing rights released or with servicing rights retained. Upon sale with servicing rights retained, the mortgage servicing asset is established, which represents the then current estimated fair value based on market prices for comparable mortgage servicing contracts, when available, or alternatively is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses. Servicing rights are recorded in other assets in the consolidated balance sheets, are amortized in proportion to and over the period of estimated net servicing income, and are assessed for impairment based on fair value at each reporting date. Impairment is determined by stratifying the rights based on predominant characteristics, such as interest rate, loan type and investor type. Impairment is recognized through a valuation allowance, to the extent that fair value is less than the capitalized amount. If the Company later determines that all or a portion of the impairment no longer exists, a reduction of the allowance may be recorded as an increase to income. The principal balance of loans serviced by the Bank on behalf of investors amounted to \$420.2 million (including \$23.1 million of loans included in the Peoples acquisition), \$403.0 million, and \$341.9 million at March 31, 2015, December 31, 2014, and March 31, 2014, respectively. The following table shows the adjusted cost of the servicing rights associated with these loans and the changes for the periods indicated:

Table 3 - Mortgage Servicing Asset

	Three Months Ended March 31

	(Dollars in thousands)	
Balance at beginning of period	\$2,912	\$2,368
Additions	161	173
Acquired portfolio	83	—
Amortization	(166) (141
Change in valuation allowance	(7) (23
Balance at end of period	\$2,983	\$2,377

Forward sale contracts of mortgage loans and forward To Be Announced ("TBA") mortgage contracts, considered derivative instruments for accounting purposes, may be utilized by the Company in its efforts to manage risk of loss associated with its mortgage loan commitments and mortgage loans held for sale. Prior to closing and funding certain one-to-four family residential mortgage loans, an interest rate lock commitment is generally extended to the borrower. During the period from commitment date to closing date, the Company is subject to the risk that market rates of interest may change. If market rates rise, investors generally will pay less to purchase such loans, resulting in a reduction in the gain on sale of the loans or, possibly, a loss. In an effort to mitigate such risk, forward delivery sales commitments are executed, under which the Company agrees to deliver whole mortgage loans to investors, or forward TBA mortgage contracts are entered into with a counterparty, which economically hedges this market risk. See Note 8, "Derivative and Hedging Activities" within Notes to Consolidated Financial statements included in Item 1 hereof for more information on mortgage activity and mortgage related derivatives.

Loan Portfolio Management continues to focus on growth in the commercial and home equity lending categories. Management believes this emphasis is prudent, given the prevailing interest rate and economic environment, as well as strategic priorities. The Bank's loan portfolio increased \$422.4 million during the first quarter of 2015 due primarily to the \$463.9 million acquired loan portfolio related to the Peoples acquisition. Excluding the acquisition, organic growth in commercial real estate, construction, and home equity portfolios was countered by declines in the commercial and industrial and residential loan portfolios as heightened competition and severe weather served to restrain loan closings and line utilization, resulting in an overall organic decline in balances of \$41.5 million, or 3.4%, on an annualized basis.

Table of Contents

The following table summarizes loan growth during the periods indicated:

Table 4 - Components of Loan Growth/(Decline)

	March 31 2015	December 31 2014	Peoples Acquisition	Organic Growth/(Decline) \$	Organic Growth/(Decline) %	
	(Dollars in thousands)					
Commercial and industrial	\$829,380	\$860,839	\$11,268	\$ (42,727) (5.0)%
Commercial real estate	2,606,444	2,347,323	249,383	\$ 9,738	0.4	%
Commercial construction	291,666	265,994	15,299	\$ 10,373	3.9	%
Small business	87,709	85,247	120	\$ 2,342	2.7	%
Residential real estate	681,379	530,259	175,323	\$ (24,203) (4.6)%
Home equity	876,916	863,863	9,072	\$ 3,981	0.5	%
Other consumer	19,624	17,208	3,462	\$ (1,046) (6.1)%
Total loans	\$5,393,118	\$4,970,733	\$463,927	\$ (41,542) (0.8)%

The Bank's commercial and industrial portfolio is well-diversified with loans to various types of industries. The following pie chart shows the diversification of the commercial and industrial portfolio as of March 31, 2015:

	(Dollars in thousands)	
Average loan size	\$234	
Largest individual commercial and industrial loan	\$20,174	
Commercial and industrial nonperforming loans/commercial and industrial loans	0.55	%

The Bank's commercial real estate portfolio, inclusive of commercial construction, is the Bank's largest loan type concentration. This portfolio is also well-diversified with loans secured by a variety of property types, such as owner-occupied and nonowner-occupied commercial, retail, office, industrial, warehouse, industrial development bonds, and other special purpose properties, such as hotels, motels, nursing homes, restaurants, churches, recreational facilities, marinas, and golf courses. Commercial real estate also includes loans secured by certain residential-related property types including multi-family apartment

Table of Contents

buildings, residential development tracts and condominiums. The following pie chart shows the diversification of the commercial real estate portfolio as of March 31, 2015:

	(Dollars in thousands)	
Average loan size	\$716	
Largest individual commercial real estate mortgage outstanding	\$28,000	
Commercial real estate nonperforming loans/commercial real estate loans	0.31	%
Owner occupied commercial real estate loans/commercial real estate loans	15.9	%

In addition to the commercial portfolios, the Bank also originates both fixed-rate and adjustable-rate residential real estate loans as well as residential construction lending related to single-home residential development within the Bank's market area. The Bank also provides home equity loans and lines that may be made as a fixed rate term loan or under a variable rate revolving line of credit secured by a first or second mortgage on the borrower's residence or second home. Additionally, the Bank makes loans for a wide variety of other personal needs. Consumer loans primarily consist of installment loans and overdraft protections. The residential, home equity and other consumer portfolios have increased in total by \$166.6 million for the three months ended March 31, 2015 to \$1.6 billion, inclusive of \$187.9 million from the Peoples acquisition.

Asset Quality The Company continually monitors the asset quality of the loan portfolio using all available information. Based on this assessment, loans demonstrating certain payment issues or other weaknesses may be categorized as delinquent, impaired, nonperforming and/or put on nonaccrual status. Additionally, in the course of resolving such loans, the Company may choose to restructure the contractual terms of certain loans to match the borrower's ability to repay the loan based on their current financial condition. If a restructured loan meets certain criteria, it may be categorized as a troubled debt restructuring ("TDR").

Delinquency The Bank's philosophy toward managing its loan portfolios is predicated upon careful monitoring, which stresses early detection and response to delinquent and default situations. The Bank seeks to make arrangements to resolve any delinquent or default situation over the shortest possible time frame. Generally, the Bank requires that a delinquency notice be mailed to a borrower upon expiration of a grace period (typically no longer than 15 days beyond the due date). Reminder notices may be sent and telephone calls may be made prior to the expiration of the grace period. If the delinquent status is not resolved within a reasonable time frame following the mailing of a delinquency notice, the Bank's personnel charged with managing its loan portfolios contact the borrower to ascertain the reasons for delinquency and the prospects for payment. Any subsequent actions taken to resolve the delinquency will depend upon the nature of the loan and the length of time that the loan has been delinquent. The borrower's needs are considered as much as reasonably possible without jeopardizing the Bank's position. A late charge is usually assessed on loans upon expiration of the grace period.

Nonaccrual Loans As a general rule, within commercial real estate or home equity categories, loans more than 90 days past due with respect to principal or interest are classified as nonaccrual loans. As permitted by banking regulations, certain consumer loans past due 90 days or more continue to accrue interest. In addition, certain commercial and real estate loans that are more than 90 days past due may be kept on an accruing status if the loans are well secured and in the process of collection. The Company may also put a junior lien mortgage on nonaccrual status as a result of delinquency with respect to the first position, which is held by another financial institution, while the junior lien is currently performing. Income accruals are suspended on all nonaccrual loans and all previously accrued and uncollected interest is reversed against current income. A loan remains on nonaccrual status until it becomes current with respect to principal and interest (and in certain instances remains current for up to six months), the loan is liquidated, or when the loan is determined to be uncollectible and is charged-off against the allowance for loan losses.

Troubled Debt Restructurings In the course of resolving problem loans, the Bank may choose to restructure the contractual terms of certain loans. The Bank attempts to work out an alternative payment schedule with the borrower in order to avoid or cure a default. Any loans that are modified are reviewed by the Bank to identify if a TDR has occurred, which is when, for economic or legal reasons related to a borrower's financial difficulties, the Bank grants a concession to the borrower that it would not otherwise consider. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status and the restructuring of the loan may include adjustments to interest rates, extensions of maturity, consumer loans where the borrower's obligations have been effectively discharged through Chapter 7 Bankruptcy and the borrower has not reaffirmed the debt to the Bank, and other actions intended to minimize economic loss and avoid foreclosure or repossession of collateral. If such efforts by the Bank do not result in satisfactory performance, the loan is referred to legal counsel, at which time foreclosure proceedings are initiated. At any time prior to a sale of the property at foreclosure, the Bank may terminate foreclosure proceedings if the borrower is able to work out a satisfactory payment plan.

It is the Bank's policy to have any restructured loans which are on nonaccrual status prior to being modified remain on nonaccrual status for six months, subsequent to being modified, before management considers its return to accrual status. If the restructured loan is on accrual status prior to being modified, it is reviewed to determine if the modified loan should remain on accrual status. Loans that are considered TDRs are classified as performing, unless they are on nonaccrual status or greater than 90 days delinquent. Loans classified as TDRs remain classified as such for the life of the loan, except in limited circumstances, when it may be determined that the borrower is performing under modified terms and the restructuring agreement specified an interest rate greater than or equal to an acceptable market rate for a comparable new loan at the time of the restructuring.

Purchased Credit Impaired Loans Purchased Credit Impaired ("PCI") loans are acquired loans which had evidence of deterioration in credit quality at the purchase date and for which it is probable that all contractually required payments will not be collected. PCI loans are recorded at fair value without any carryover of the allowance for loan losses. The excess cash flows expected to be collected over the carrying amount of the loans, referred to as the "accretable yield," is accreted into interest income over the life of the loans using the effective yield method. Accordingly, PCI loans are not subject to classification as nonaccrual in the same manner as originated loans, rather they are generally considered to be accruing loans because their interest income recognized relates to the accretable yield and not to contractual interest payments. See Note 5, "Loans, Allowance for Loan Losses, and Credit Quality" within Notes to Consolidated Financial Statements included in Item 1 hereof for more information.

Nonperforming Assets Nonperforming assets are comprised of nonperforming loans, nonperforming securities, other real estate owned ("OREO"), and other assets in possession. Nonperforming loans consist of nonaccrual loans and loans that are more than 90 days past due but still accruing interest.

Nonperforming securities consist of securities that are on nonaccrual status. The Company holds five collateralized debt obligation securities ("CDOs") comprised of pools of trust preferred securities issued by banks and insurance companies, which are currently deferring interest payments on certain tranches within the bonds' structures including the tranches held by the Company. The bonds are anticipated to continue to defer interest until cash flows are sufficient to satisfy certain collateralization levels designed to protect more senior tranches. As a result, the Company has placed the five securities on nonaccrual status and has reversed any previously accrued but unpaid income related to these securities.

OREO consists of real estate properties, which have served as collateral to secure loans, that are controlled or owned by the Bank. These properties are recorded at fair value less estimated costs to sell at the date control is established, resulting in a new cost basis. The amount by which the recorded investment in the loan exceeds the fair value (net of estimated costs to sell) of the foreclosed asset is charged to the allowance for loan losses. Subsequent declines in the fair value of the foreclosed asset below the new cost basis are recorded through the use of a valuation allowance. Subsequent increases in the fair value are recorded as reductions in the valuation allowance, but not below zero. All costs incurred thereafter in maintaining the property are generally charged to noninterest expense. In the event the real estate is utilized as a rental property, net rental income and expenses are recorded as incurred within noninterest expense.

Other assets in possession typically consist of foreclosed non-real estate assets deemed to be in control of the Company.

The following table sets forth information regarding nonperforming assets held by the Bank at the dates indicated:
Table 5 - Nonperforming Assets

	March 31, 2015	December 31, 2014	March 31, 2014

Charge-offs	(9) (704
TDRs ending balance	\$41,786	\$47,327

Income accruals are suspended on all nonaccrual loans and all previously accrued and uncollected interest is reversed against current income. The table below shows interest income that was recognized or collected on all nonaccrual loans and TDRs as of the dates indicated:

Table 9 - Interest Income - Nonaccrual Loans and Troubled Debt Restructurings

	Three Months Ended March 31	
	2015	2014
	(Dollars in thousands)	
The amount of incremental gross interest income that would have been recorded if nonaccrual loans had been current in accordance with their original terms	\$350	\$447
The amount of interest income on nonaccrual loans and performing TDRs that was included in net income	724	498

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impaired loans include all commercial and industrial loans, commercial real estate loans, commercial construction and small business loans that are on nonaccrual status, TDRs, and other loans that have been categorized as impaired. Impairment is measured on a loan by loan basis by comparing the loan's value to either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent. For impaired loans deemed collateral dependent, where impairment is measured using the fair value of the collateral, the Bank will either order a new appraisal or use another available source of collateral assessment such as a broker's opinion of value to determine a reasonable estimate of the fair value of the collateral.

Total impaired loans at March 31, 2015 and December 31, 2014 were \$62.9 million and \$58.0 million, respectively. For additional information regarding the Bank's asset quality, including delinquent loans, nonaccruals, TDRs, and impaired loans, see Note 5, "Loans, Allowance for Loan Losses, and Credit Quality" within Notes to Consolidated Financial Statements included in Item 1 hereof.

Table of Contents

Potential problem loans are any loans which are not included in nonaccrual or nonperforming loans, where known information about possible credit problems of the borrowers causes management to have concerns as to the ability of such borrowers to comply with present loan repayment terms. At March 31, 2015, there were 64 relationships, with an aggregate balance of \$60.7 million, deemed to be potential problem loans. These potential problem loans continued to perform with respect to payments. Management actively monitors these loans and strives to minimize any possible adverse impact to the Bank.

Allowance for Loan Losses The allowance for loan losses is maintained at a level that management considers appropriate to provide for probable loan losses based upon evaluation of known and inherent risks in the loan portfolio. The allowance is increased by providing for loan losses through a charge to expense and by recoveries of loans previously charged-off and is reduced by loans being charged-off.

While management uses available information to recognize losses on loans, future additions to the allowance may be necessary based on increases in nonperforming loans, changes in economic conditions, or for other reasons.

Additionally, various regulatory agencies, as an integral part of the Bank's examination process, periodically assess the appropriateness of the allowance for loan losses and may require it to increase its provision for loan losses or recognize further loan charge-offs, in accordance with GAAP.

Table of Contents

The following table summarizes changes in the allowance for loan losses and other selected statistics for the periods presented:

Table 10 - Summary of Changes in the Allowance for Loan Losses

	Three Months Ended

For purposes of the allowance for loan losses, management segregates the loan portfolio into the portfolio segments detailed in the table below. The allocation of the allowance for loan losses is made to each loan category using the analytical techniques and estimation methods described herein. While these amounts represent management's best estimate of the distribution of probable losses at the evaluation dates, they are not necessarily indicative of either the categories in which actual losses may occur or the

Table of Contents

extent of such actual losses that may be recognized within each category. Each of these loan categories possess unique risk characteristics that are considered when determining the appropriate level of allowance for each segment. The total allowance is available to absorb losses from any segment of the loan portfolio.

The following table sets forth the allocation of the allowance for loan losses by loan category at the dates indicated:
Table 11 - Summary of Allocation of Allowance for Loan Losses

	March 31, 2015	Percent of Allowance Amount	December 31, 2014	Percent of Allowance Amount	
		In Category To Total Loans		In Category To Total Loans	
	(Dollars in thousands)

Home equity	4,906	16.3	% 4,956	17.4	%
Other consumer	677	0.4	% 748	0.3	%
Total allowance for loan losses	\$54,515	100.0	% \$55,100	100.0	%

To determine if a loan should be charged-off, all possible sources of repayment are analyzed. Possible sources of repayment include the potential for future cash flows, the value of the Bank's collateral, and the strength of co-makers or guarantors. When available information confirms that specific loans or portions thereof are uncollectible, these amounts are promptly charged-off against the allowance for loan losses and any recoveries of such previously charged-off amounts are credited to the allowance.

Regardless of whether a loan is unsecured or collateralized, the Company charges off the amount of any confirmed loan loss in the period when the loans, or portions of loans, are deemed uncollectible. For troubled, collateral-dependent loans, loss-confirming events may include an appraisal or other valuation that reflects a shortfall between the value of the collateral and the carrying value of the loan or receivable, or a deficiency balance following the sale of the collateral.

For additional information regarding the Bank's allowance for loan losses, see Note 5, "Loans, Allowance for Loan Losses, and Credit Quality" within Notes to Consolidated Financial Statements included in Item 1 hereof.

Federal Home Loan Bank Stock The Bank held an investment in Federal Home Loan Bank ("FHLB") of Boston of \$37.5 million and \$33.2 million at March 31, 2015 and December 31, 2014, respectively. The increase was due to an additional investment acquired in the Peoples acquisition. The FHLB is a cooperative that provides services to its member banking institutions. The primary reason for the FHLB of Boston membership is to gain access to a reliable source of wholesale funding, particularly term funding, as a tool to manage interest rate risk. The purchase of stock in the FHLB is a requirement for a member to gain access to funding. The Company purchases FHLB stock proportional to the volume of funding received and views the purchases as a necessary long-term investment for the purposes of balance sheet liquidity and not for investment return.

Goodwill and Identifiable Intangible Assets Goodwill and identifiable intangible assets increased from \$180.3 million at December 31, 2014 to \$215.1 million at March 31, 2015. The increase is due to the Peoples acquisition.

The Company typically performs its annual goodwill impairment testing during the third quarter of the year, unless certain indicators suggest earlier testing to be warranted. The Company performed its annual goodwill impairment testing during the third quarter of 2014 and determined that the Company's goodwill was not impaired. Identifiable intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. There were no events or changes that indicated impairment of

identifiable intangible assets.

68

Table of Contents

Cash Surrender Value of Life Insurance Policies The Bank holds life insurance policies for the purpose of offsetting its future obligations to its employees under its retirement and benefits plans. The cash surrender value of life insurance policies was \$131.6 million and \$109.9 million at March 31, 2015 and December 31, 2014, respectively. The increase in balances is primarily due to policies acquired as part of the Peoples acquisition. The Bank recorded tax exempt income from the life insurance policies of \$778,000 and \$722,000 for the three months ended March 31, 2015 and March 31, 2014, respectively. In addition, the Company recognized tax exempt gains on life insurance benefits in the amount \$1.6 million for the three months ended March 31, 2014. There were no such gains for the three months ended March 31, 2015.

Deposits As of March 31, 2015, deposits increased by 8.8% to \$5.7 billion when compared to \$5.2 billion at December 31, 2014, due primarily to the impact of the Peoples acquisition. As shown in the table below, excluding the impact of the acquisition, total deposits experienced organic growth of \$28.0 million, or 2.2%, on an annualized basis. Total cost of deposits increased by one basis point as a result of the acquired deposit base, yet remained low at 0.21% for the first quarter, reflecting the Company's continued emphasis on lower cost funding. The Company's core deposit balances represent 86.7% of total deposits as of March 31, 2015.

The following table sets forth the balances of the Bank's deposits for the periods indicated:

Table 12 - Components of Deposit Growth

	March 31 2015	December 31 2014	Peoples Acquisition	Organic Growth/(Decline) \$	Organic Growth/(Decline) %	
	(Dollars in thousands)					
Demand deposits	\$1,603,124	\$1,462,200	\$71,362	\$69,562	4.8	%
Savings and interest checking	2,232,832	2,108,486	168,228	(43,882)	(2.1)	%
Money market	1,088,223	990,160	76,724	21,339	2.2	%
Time certificates of deposits	746,533	649,620	115,936	(19,023)	(2.9)	%
Total	\$5,670,712	\$5,210,466	\$432,250	\$27,996	0.5	%

The Bank also participates in the Certificate of Deposit Account Registry Service ("CDARS") program, allowing the Bank to provide easy access to multi-million dollar Federal Deposit Insurance Corporation ("FDIC") deposit insurance protection on certificate of deposits investments for consumers, businesses and public entities. In addition, the Bank may occasionally raise funds through brokered certificates of deposit. This channel allows the Bank to seek additional funding in potentially large quantities by attracting deposits from outside the Bank's core market. At March 31, 2015 and December 31, 2014, the Company had \$63.3 million and \$65.9 million, respectively, of brokered deposits of which \$42.9 million and \$44.9 million, respectively, were part of the CDARS program.

Table of Contents

Borrowings The Company's borrowings consist of both short-term and long-term borrowings and provide the Bank with one of its primary sources of funding. Maintaining available borrowing capacity provides the Bank with a contingent source of liquidity.

The Company's borrowings consisted of the following as of the periods indicated:

Table 13 - Borrowings

	March 31, 2015	December 31, 2014
	(Dollars in thousands)	
Federal Home Loan Bank borrowings	\$108,246	\$70,080
Short-term borrowings - one year and under (1)		
Customer repurchase agreements and other short-term borrowings	128,138	147,890
Long-term borrowings - over one year (1)		
Wholesale repurchase agreements	50,000	50,000
Junior subordinated debentures:		
Capital Trust V	51,547	51,547
Slades Ferry Trust I	10,310	10,310
Central Trust I	5,258	5,258
Central Trust II	6,516	6,570
Subordinated debentures	35,000	65,000
Total long-term borrowings	\$158,631	\$188,685
Total borrowings	\$395,015	\$406,655

(1) Classification is based upon duration at origination and not predicated upon remaining time to maturity.

During the first quarter, the Company assumed, at fair value, an additional \$51.2 million of FHLB borrowings as part of the Peoples acquisition. In addition, the Company redeemed \$30.0 million of subordinated debt held at the Bank, as the debt had entered the window with 5 years left until maturity and as a result began losing its Tier 2 capital treatment. The Company did not incur a prepayment penalty as part of the redemption.

At March 31, 2015 and December 31, 2014, the Bank had \$3.0 billion and \$2.8 billion, respectively, of assets pledged as collateral against borrowings. These assets are primarily pledged to the FHLB of Boston, the Federal Reserve Bank of Boston, and serve as collateral for repurchase agreements.

Table of Contents

Capital Resources On March 19, 2015, the Company's Board of Directors declared a cash dividend of \$0.26 per share to stockholders of record as of the close of business on March 30, 2015. This dividend was paid on April 10, 2015. The Federal Reserve Board, the FDIC and other regulatory agencies have established capital guidelines for banks and bank holding companies. Risk-based capital guidelines issued by the federal regulatory agencies require banks to meet certain minimum ratios. Beginning January 1, 2015, the Company and the Bank are subject to the Basel Committee's December 2010 framework, commonly referred to as BASEL III, which substantially revise the risk-based capital requirements applicable to bank holding companies and depository institutions. These rules, among other things: (i) introduce a new capital measure called "Common Equity Tier 1" or CET 1; (ii) specify that Tier 1 capital consists of CET 1 and "Additional Tier 1 capital" instruments meeting specified requirements; (iii) apply most deductions/adjustments to regulatory capital measures to CET 1 and not to the other components of capital, thus potentially requiring higher levels of CET1 in order to meet minimum ratios; and (iv) expand the scope of the reductions/adjustments from capital as compared to existing regulations. At March 31, 2015 and December 31, 2014, the Company and the Bank exceeded the minimum requirements for all applicable ratios that were in effect during the respective periods.

The Company's and the Bank's actual capital amounts and ratios are presented in the following table, along with the applicable minimum requirements for each period indicated:

Table 14 - Company and Bank's Capital Amounts and Ratios

Dividend Restrictions In the ordinary course of business, the Company is dependent upon dividends from the Bank to provide funds for the payment of dividends to shareholders and to provide for other cash requirements. Banking regulations may limit the amount of dividends that may be paid. Approval by regulatory authorities is required if the effect of dividends declared would cause the regulatory capital of the Bank to fall below specified minimum levels. Approval is also required if dividends declared exceed the net profits for that year combined with the retained net profits for the preceding two years. Under the foregoing

Table of Contents

dividend restrictions and while maintaining its "well capitalized" status, dividends paid by the Bank to the Company totaled \$8.2 million and \$8.3 million for the three months ended March 31, 2015 and 2014, respectively.

Trust Preferred Securities In accordance with the applicable accounting standard related to variable interest entities, the common stock of trusts which have issued trust preferred securities have not been included in the consolidated financial statements. At both March 31, 2015 and 2014, \$71.0 million in trust preferred securities have been included in the Tier 1 capital of the Company for regulatory reporting purposes pursuant to the Federal Reserve's capital adequacy guidelines.

Investment Management As of March 31, 2015, the Rockland Trust Investment Management Group had assets under administration of \$2.5 billion, representing approximately 5,071 trust, fiduciary, and agency accounts. At December 31, 2014, assets under administration were \$2.5 billion, representing approximately 4,878 trust, fiduciary, and agency accounts. Included in these amounts as of March 31, 2015 and December 31, 2014 are assets under administration of \$226.6 million and \$215.6 million, respectively, relating to the Company's registered investment advisor, Bright Rock Capital Management, LLC, which provides institutional quality investment management services to institutional and high net worth clients. Revenue from the Investment Management Group amounted to \$4.5 million and \$4.1 million for the three months ended March 31, 2015 and March 31, 2014, respectively.

Additionally, for the three months ended March 31, 2015 and March 31, 2014, retail investments and insurance revenue was \$566,000 and \$533,000, respectively. Retail investments and insurance includes commission revenue from LPL Financial and its affiliates, LPL Insurance Associates, Inc., Savings Bank Life Insurance of Massachusetts, and Smith Companies LTD, a division of Capitas Financial, LLC.

RESULTS OF OPERATIONS

The following table provides a summary of results of operations:

Table 15 - Summary of Results of Operations

	Three Months Ended March 31			
	2015	2014		
	(Dollars in thousands)			
Net Income	\$9,460	\$13,383		
Diluted earnings per share	\$0.38	\$0.56		
Return on average assets	0.58	% 0.88		%
Return on average equity	5.58	% 9.02		%
Net interest margin	3.50	% 3.49		%

Net Interest Income The amount of net interest income is affected by changes in interest rates and by the volume and mix of interest earning assets and interest bearing liabilities.

On a fully tax equivalent basis, net interest income for the first quarter of 2015 increased \$3.7 million, or 7.8%, to \$51.6 million, when compared to the first quarter of 2014, driven by the overall increase in interest earning assets.

Table of Contents

The following tables present the Company's average balances, net interest income, interest rate spread, and net interest margin for the three months ending March 31, 2015 and 2014. Nontaxable income from loans and securities is presented on a fully tax-equivalent basis by adjusting tax-exempt income upward by an amount equivalent to the prevailing income taxes that would have been paid if the income had been fully taxable.

The total amount of adjustment to present interest income and yield on a FTE basis is \$372,000 and \$291,000 for the three months ended March 31, 2015 and 2014, respectively. The FTE adjustment relates to nontaxable (1) investment securities with average balances of \$5.5 million and \$6.1 million and nontaxable industrial development bonds recorded within commercial real estate with average balances of \$68.9 million and \$45.0 million, for the three months ended March 31, 2015 and 2014, respectively.

(2) Average nonaccruing loans are included in loans.

(3) Interest rate spread represents the difference between the weighted average yield on interest-earning assets and the weighted average cost of interest-bearing liabilities.

(4) Net interest margin represents annualized net interest income as a percentage of average interest-earning assets.

Table of Contents

The following table presents certain information on a fully tax-equivalent basis regarding changes in the Company's interest income and interest expense for the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, information is provided with respect to changes attributable to: (1) changes in rate (change in rate multiplied by old volume), (2) changes in volume (change in volume multiplied by old rate), and (3) changes in volume/rate (change in volume multiplied by change in rate) which is allocated to the change due to rate column:

(1) The table above reflects income determined on a fully tax equivalent basis. See footnote (1) to table 16 above for the related adjustments.

(2) Loans include portfolio loans and nonaccrual loans; however, unpaid interest on nonaccrual loans has not been included for purposes of determining interest income.

Provision (Benefit) For Loan Losses The provision (benefit) for loan losses represents the charge to expense or benefit that is required to maintain an appropriate level of allowance for loan losses. During the first quarter of 2015, the Company recognized a benefit for loan losses of \$500,000, as compared to a provision for loan losses of \$4.5 million for the three months

76

Table of Contents

ended March 31, 2014. The Company's allowance for loan losses, as a percentage of total loans, was 1.01% at March 31, 2015, as compared to 1.11% at December 31, 2014 and 1.12% at March 31, 2014. The decrease in this ratio was driven largely by the loans acquired in the Peoples acquisition which were recorded at fair value, with no carryover of allowance. Additionally, the Company experienced significant recoveries during the first quarter of 2015, which led to a significantly reduced level of net charge-offs for the three months ended March 31, 2015. The net charge-offs totaled \$85,000 and \$4.1 million, for the periods ending March 31, 2015 and 2014, respectively.

Regional and local general economic conditions continued to improve during the first quarter of 2015, as measured by employment levels, economic activity, and other regional economic indicators. Job growth has been steady and unemployment levels have decreased. Local residential real estate values increased during the quarter on lower sales activity as volume was slowed by severe winter weather. Lower oil and gasoline prices are benefiting consumers and lowering business costs in the region, although some savings is being offset by higher natural gas and electricity costs. Commercial real estate market conditions were steady to improving, with most markets experiencing unchanged to positive trends. Leading economic indicators suggest continued growth in the near term.

Management's periodic evaluation of the adequacy of the allowance for loan losses considers past loan loss experience, known and inherent risks in the loan portfolio, adverse situations which may affect the borrowers' ability to repay, the estimated value of the underlying collateral, if any, and current economic conditions. Substantial portions of the Bank's loans are secured by real estate in Massachusetts and Rhode Island. Accordingly, the ultimate collectability of a substantial portion of the Bank's loan portfolio is susceptible to changes in property values within those states.

Noninterest Income The following table sets forth information regarding noninterest income for the periods shown:
Table 18 - Noninterest Income

	Three Months Ended		Change Amount	%	
	March 31 2015	2014			
	(Dollars in thousands)				
Deposit account fees	\$4,166	\$4,359	\$(193)	(4.43))%
Interchange and ATM fees	3,100	2,975	\$125	4.20	%
Investment management	5,107	4,603	\$504	10.95	%
Mortgage banking income	1,126	487	\$639	131.21	%
Gain on life insurance benefits	—	1,627	\$(1,627)	(100.00))%
Increase in cash surrender value of life insurance policies	778	722	\$56	7.76	%
Loan level derivative income	418	746	\$(328)	(43.97))%
Net gain on sale of equity securities	—	91	\$(91)	(100.00))%
Other noninterest income	1,862	1,906	\$(44)	(2.31))%
Total	\$16,557	\$17,516	\$(959)	(5.47))%

Noninterest income amounted to \$16.6 million during the three months ended March 31, 2015, a \$959,000, or 5.5%, decrease, from the same period in the prior year. The primary reasons for the significant variances in the noninterest income category shown in the preceding table are noted below:

Deposit account fees decreased as compared to the prior year period, due to a reduction in overdraft fees.

Interchange and ATM fees increased as compared to the prior year period, due primarily to the Company's focus on core checking accounts.

Investment management income growth is driven primarily from growth in overall assets under administration, which were \$2.5 billion at March 31, 2015, an increase of \$231.1 million, or 10.0%, as compared to March 31, 2014.

Mortgage banking income increased as compared to the prior year period primarily driven by increased volumes of loan closings in 2015.

Loan level derivative income declined due to decreased volume.

Table of Contents

The Company recognized certain items such as gains on life insurance benefits and gains on sales of equity securities during the prior year period. There were no such items recognized during the quarter ended March 31, 2015.

Noninterest Expense The following table sets forth information regarding non-interest expense for the periods shown:
Table 19 - Noninterest Expense

	Three Months Ended		Change Amount	%	
	March 31 2015	2014			
	(Dollars in thousands)				
Salaries and employee benefits	\$25,288	\$23,080	\$2,208	9.57	%
Occupancy and equipment expenses	6,394	6,146	248	4.04	%
Data processing & facilities management	1,122	1,253	(131)	(10.45))%
FDIC assessment	956	905	51	5.64	%
Advertising expense	834	824	10	1.21	%
Consulting expense	755	559	196	35.06	%
Merger and acquisition expenses	10,230	77	10,153	13,185.71	%
Software maintenance	625	662	(37)	(5.59))%
Other noninterest expenses	8,773	8,381	392	4.68	%
Total	\$54,977	\$41,887	\$13,090	31.25	%

Inclusive of merger and acquisition costs of \$10.2 million in the first quarter, noninterest expense increased by \$13.1 million, or 31.3%, during the three months ended March 31, 2015, as compared to the same period in the prior year.

The primary reasons for the significant variances in the noninterest expense category shown in the preceding table are noted below:

The increase in salaries and employee benefits reflects overall increases in the employee base (including the Peoples acquisition) along with an increase in expenses associated with postretirement benefits.

Occupancy and equipment expense increases were attributable to increased snow removal costs and rent expenses offset by a decrease in impairment recognized on certain fixed assets during the first quarter of 2014.

Consulting expense increased due to timing of certain initiatives.

Merger and acquisition expense in 2015 is related to the Peoples acquisition which closed in the first quarter of 2015. The majority of the expense in 2014 relates to the acquisition of Mayflower Bancorp, Inc., which closed in November of 2013.

Other noninterest expenses increased for the three months ended March 31, 2015 due primarily to increases in the provision for unfunded commitments, examinations and audits, and losses on extinguishment of debt. These were offset partially by decreases in debit card expenses and other losses and charge-offs.

Table of Contents

Income Taxes The tax effect of all income and expense transactions is recognized by the Company in each year's consolidated statements of income, regardless of the year in which the transactions are reported for income tax purposes. The following table sets forth information regarding the Company's tax provision and applicable tax rates for the periods indicated:

Table 20 - Tax Provision and Applicable Tax Rates

	Three Months Ended March 31	
	2015	2014
	(Dollars in thousands)	
Combined federal and state income tax provisions	\$3,869	\$5,350
Effective income tax rates	29.03	% 28.56

The Company's blended statutory tax rate was 40.7% for both of the three month periods ending March 31, 2015 and 2014. The effective income tax rates noted in the table above are lower than the blended statutory tax rate due to certain tax preference assets such as life insurance policies and tax exempt bonds, as well as federal tax credits recognized primarily in connection with the New Markets Tax Credit program and investments in low income housing project investments. The increase in the effective income tax rate for 2015 is primarily due to a reduction in the benefits recognized from New Markets Tax Credits.

The Company's subsidiaries have received several awards of tax credit allocation authority under the federal New Markets Tax Credit program which enable the Company to recognize federal tax credits over a seven year period totaling 39.0% of the total award. The Company recognizes federal tax credits as capital investments are made into its subsidiaries to fund below market interest rate loans to qualifying businesses in low income communities. The following table details the remaining tax credit recognition by year associated with this program:

Table 21 - New Markets Tax Credit Recognition Schedule

Investment	2015	2016	2017	2018	2019	Total Remaining Credits
	(Dollars in thousands)					
2009	10,000	600	—	—	—	600
2010	40,000	2,400	2,400	—	—	4,800
2012	21,400	1,285	1,285	1,285	—	5,140
2013	44,600	2,229	2,675	2,675	2,675	12,929
Total	\$116,000	\$6,514	\$6,360	\$3,960	\$2,675	\$23,469

The Company invests in various low income housing projects which are real estate limited partnerships that acquire, develop, own and operate low and moderate-income housing developments. As a limited partner in these operating partnerships, the Company will receive tax credits and tax deductions for losses incurred by the underlying properties. The investments are accounted for using the proportional amortization method and will be amortized over various periods through 2030, which represents the period that the tax credits and other tax benefits will be utilized. The total committed investment in these partnerships is \$40.5 million, of which \$17.5 million has been funded. It is expected that the limited partnership investments will generate a net tax benefit of approximately \$1.5 million for the 2015 calendar year, and a total of \$13.7 million over the remaining life of the investments, from the combination of the tax credits and operating losses.

Deferred tax assets generally represent items that can be used as a tax deduction or credit in future income tax returns, for which a financial statement tax benefit has already been recognized. The realization of the net deferred tax asset generally depends upon future levels of taxable income and the existence of prior years' taxable income to which "carry-back" refund claims could be made. If current available information raises doubt as to the realization of the

deferred tax assets, a valuation allowance is established. Deferred tax assets are measured using enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be recovered or settled. The effect of a change in enacted tax rates on the deferred tax assets is recognized in income in the period that includes the enactment date. The Company had no recorded tax valuation allowance as of March 31, 2015 and 2014.

Table of Contents

Risk Management

The Company's Board of Directors and Executive Management have identified significant risk categories which affect the Company. The risk categories include: credit risk, operations risk, compliance risk, strategic and reputation risk, market risk and liquidity risk. The Board of Directors has approved a Risk Management Policy that addresses each category of risk. The Chief Executive Officer, Chief Financial Officer, Chief Information Officer, Director of Residential Lending and Compliance Officer, Executive Vice President of Commercial Lending and other members of management provide regular reports to the Board of Directors, identifying key risk issues and plans to address these issues. The Board of Directors will ensure the level of risk is within limits established by both the Risk Management Policy and other previously approved policies.

Credit Risk Credit risk represents the possibility that the Company's borrowing customers or other counterparties may not repay loans or other contractual obligations according to their terms due to changes in the financial capacity and ability of such borrowing customers or counterparties to meet their obligations. In some cases, the collateral securing the payment of the loans may be sufficient to assure repayment, but in other cases the Company may experience significant credit losses which could have an adverse effect on its operating results. The Company makes various assumptions and judgments about the collectability of its loan portfolio, including the creditworthiness of its borrowers and counterparties and the value of the real estate and other assets serving as collateral for the repayment of loans. For further discussion regarding the credit risk and the credit quality of the Company's loan portfolio, see Note 5, "Loans, Allowance for Loan Losses, and Credit Quality" within Notes to Consolidated Financial Statements included in Item 1 hereof.

Operations Risk Operations risk is the risk of loss due to human behavior, inadequate or failed internal systems and controls, and external influences such as market conditions, fraudulent activities, disasters and security risks. The Company continuously strives to strengthen its system of internal controls, operating processes and employee awareness. The Bank has an Operations Risk Management Committee that meets monthly and reports to the Board quarterly or more frequently if warranted. The Committee is chaired by the Chief Information Officer and members of the Committee include representatives from Audit, Finance, Technology, Operations, Information Security and periodic attendance from business units throughout the organization. An operations risk management dashboard is updated quarterly and reviewed with the Board.

Compliance Risk Compliance risk represents the risk of regulatory sanctions or financial loss resulting from the Company's failure to comply with rules and regulations issued by the various banking agencies, the U.S. Securities and Exchange Commission, the NASDAQ Stock Market, and standards of good banking practice. Activities which may expose the Company to compliance risk include, but are not limited to, those dealing with the prevention of money laundering, privacy and data protection, adherence to all applicable laws and regulations, community reinvestment initiatives and employment and tax matters. Compliance risk is mitigated through the use of written policies and procedures, training of staff, and monitoring of activities for adherence to those procedures.

Strategic and Reputation Risk Strategic and reputation risk represent the risk of loss due to impairment of reputation, failure to fully develop and execute business plans, and failure to assess current and new opportunities and threats in business, markets, and products. Management mitigates strategic and reputational risk through robust annual strategic planning, frequent executive strategic reviews, ongoing competitive and technological observation, rigorous assessment processes of new product, new branch, and new business initiatives, adherence to ethical standards, a philosophy of customer advocacy, a structured process of customer complaint resolution, and ongoing reputational monitoring and management tools.

Market Risk Market risk is the sensitivity of income to changes in interest rates, foreign exchange rates, commodity prices and other market-driven rates or prices. Interest rate sensitivity is the most significant market risk to which the Company is exposed.

Interest rate risk is the sensitivity of income to changes in interest rates. Changes in interest rates, as well as fluctuations in the level and duration of assets and liabilities, affect net interest income, the Company's primary source of revenue. Interest rate risk arises directly from the Company's core banking activities. In addition to directly impacting net interest income, changes in the level of interest rates can also affect the amount of loans originated, the

timing of cash flows on loans and securities, and the fair value of securities and derivatives, as well as other effects. The primary goal of interest rate risk management is to control this risk within limits approved by the Board of Directors. These limits reflect the Company's tolerance for interest rate risk over both short-term and long-term horizons. The Company attempts to control interest rate risk by identifying, quantifying, and where appropriate, hedging its exposure. If assets and liabilities do not re-price simultaneously and in equal volume, the potential for interest rate exposure exists. It is management's objective to maintain stability in the growth of net interest income through the maintenance of an appropriate mix of interest-earning assets

Table of Contents

and interest-bearing liabilities and, when necessary, within prudent limits, through the use of off-balance sheet hedging instruments such as interest rate swaps, floors and caps.

The Company quantifies its interest rate exposures using net interest income simulation models, as well as simpler gap analysis, and Economic Value of Equity analysis. Key assumptions in these simulation analyses relate to behavior of interest rates and behavior of the Company's deposit and loan customers. The most material assumptions relate to the prepayment of mortgage assets (including mortgage loans and mortgage-backed securities) and the life and sensitivity of nonmaturity deposits (e.g. DDA, NOW, savings and money market). In the case of prepayment of mortgage assets, assumptions are derived from published dealer median prepayment estimates for comparable mortgage loans. The risk of prepayment tends to increase when interest rates fall. Since future prepayment behavior of loan customers is uncertain, the resultant interest rate sensitivity of loans cannot be determined exactly.

The Company's policy on interest-rate risk simulation specifies that for all "core" interest rate scenarios, estimated net interest income for the subsequent one-year period should not decline by more than 10%. The Company's core scenarios for March 31, 2015 included five instantaneous parallel shifts ("shocks") to market interest rates and four gradual (12 to 24 months) shifts in interest. Additionally, the Company analyzed a separate alternative scenario, labeled "Flat Up 200". In this scenario the short term end of the yield curve increases 200 bps over the first 12 months of the simulation, while the long term end of the curve remains relatively flat. This causes the treasury yield curve to flatten within a range of 2.00% on the short end to 2.65% on the long end.

The results of all scenarios are outlined in the table below:

Table 22 - Interest Rate Sensitivity

	Impact on Net Interest Income							
	As of March 31,							
	2015		2014		2015		2014	
	Year 1	Year 2	Year 1	Year 2	Year 1	Year 2	Year 1	Year 2
Parallel rate shocks (basis points)								
-100	(0.6)%	(5.2)%	0.1	%	(3.4)%
+100	5.1	%	7.0	%	3.9	%	5.8	%
+200	10.1	%	14.6	%	8.0	%	12.0	%
+300	15.0	%	22.2	%	12.1	%	18.3	%
+400	19.9	%	29.6	%	16.1	%	24.5	%
Gradual rate shifts (basis points)								
-100 over 12 months	0.2	%	(3.5)%	0.4	%	(2.1)%
+200 over 12 months	4.5	%	12.4	%	3.4	%	10.2	%
+400 over 24 months	4.5	%	17.1	%	3.4	%	14.1	%
Flat +500 over 12 months	5.6	%	20.4	%	4.2	%	16.4	%
Alternative scenarios								
Flat up 200 basis points scenario	4.3	%	10.2	%	n/a		n/a	

The Company's policy on interest rate risk simulation also specifies that estimated net interest income for the second year of all "core scenarios" should not decline by more than 15.0%. The Company was well within policy limits at March 31, 2015 and 2014. It should be emphasized, however, that the results are dependent on material assumptions such as those discussed above. For instance, asymmetrical rate behavior can have a material impact on the simulation results. If competition for deposits forced the Company to raise rates on those liabilities more quickly than is assumed in the simulation analysis without a corresponding increase in asset yields, net interest income may be negatively impacted. Alternatively, if the Company is able to lag increases in deposit rates as loans re-price upward, net interest income would be positively impacted.

The most significant factors affecting market risk exposure of the Company's net interest income during the three months ended March 31, 2015 were the shape of the U.S. Government securities and interest rate swap yield curve,

the level of U.S. prime interest rate and LIBOR rates, and the level of interest rates being offered on long-term fixed rate loans.

81

Table of Contents

The Company manages the interest rate risk inherent in both its loan and borrowing portfolios by utilizing interest rate swap agreements and interest rate caps and floors. An interest rate swap is an agreement whereby one party agrees to pay a floating rate of interest on a notional principal amount in exchange for receiving a fixed rate of interest on the same notional amount for a predetermined period of time from a second party. Interest rate caps and floors are agreements whereby one party agrees to pay a floating rate of interest on a notional principal amount for a predetermined period of time to a second party if certain market interest rate thresholds are realized. The amounts relating to the notional principal amount are not actually exchanged. Additionally, the Company may manage the interest rate risk inherent in its mortgage banking operations by entering into forward sales contracts and forward TBA mortgage contracts. The level of hedging activity the bank engages in, with regards to its mortgage portfolio, depends on whether the investor purchases the loan with a forward rate lock commitment. Loans with a predefined commitment are not hedged as the price is fixed by the investor at commitment. For loans without a predefined commitment from an investor, a change in market interest rates between the time the Company commits to terms on a loans and the time the Company ultimately sells the loan in the secondary market could reduce the gain (or increase the loss) the Company records on the sale. The Company may attempt to mitigate this risk by entering into forward sales commitments and forward TBA mortgage contracts in amounts sufficient to cover loans not locked by the investor. See Note 8, "Derivative and Hedging Activities" within Notes to Consolidated Financial Statements included in Item 1 hereof for additional information regarding the Company's Derivative Financial Instruments.

The Company's earnings are not directly or materially impacted by movements in foreign currency rates or commodity prices. Movements in equity prices may have a modest impact on earnings by affecting the volume of activity or the amount of fees from investment-related business lines. See Note 4, "Securities" within Notes to Consolidated Financial Statements included in Item 1 hereof.

Liquidity Risk Liquidity risk is the risk that the Company will not have the ability to generate adequate amounts of cash in the most economical way for the institution to meet its ongoing obligations to pay deposit withdrawals, service borrowings, and to fund loan commitments. The Company's primary sources of funds are deposits, borrowings, and the amortization, prepayment and maturities of loans and securities. The Bank utilizes its extensive branch network to access retail customers who provide a stable base of in-market core deposits. These funds are principally comprised of demand deposits, interest checking accounts, savings accounts, and money market accounts. Deposit levels are greatly influenced by interest rates, economic conditions, and competitive factors.

The Company actively manages its liquidity position under the direction of the Asset Liability Committee of the Bank (ALCO). The Company's primary measure of short-term liquidity is the Total Basic Surplus/Deficit as a percentage of assets. This ratio, which is an analysis of the relationship between liquid assets plus available funding at the FHLB less short-term liabilities relative to total assets, was within policy limits at March 31, 2015. The Total Basic Surplus/Deficit measure is affected primarily by changes in deposits, securities and short-term investments, loans and borrowings. An increase in deposits, without a corresponding increase in nonliquid assets, will improve the Total Basic Surplus/Deficit measure, whereas, an increase in loans, with no increase in deposits, will decrease the measure. Other factors affecting the Total Basic Surplus/Deficit measure include collateral requirements at the FHLB, changes in the securities portfolio, and the mix of deposits.

The Bank is careful to increase deposits without adversely impacting the weighted average cost of those funds. As part of a prudent liquidity risk management practice, the Company maintains various liquidity sources, some of which are only accessed on a contingency basis. Accordingly, management has implemented funding strategies that include FHLB advances, Federal Reserve Bank borrowing capacity and repurchase agreement lines. These nondeposit funds are also viewed as a contingent source of liquidity and, when profitable lending and investment opportunities exist, access to such funds provides a means to grow the balance sheet.

Borrowing capacity at the FHLB and the Federal Reserve is impacted by the amount and type of assets available to be pledged. For example, a prime, one-to-four family, residential loan, may provide 75 cents of borrowing capacity for every \$1.00 pledged, whereas, a commercial loan may provide a lower amount. As a result, the Company's strategic lending decisions can also affect its liquidity position.

The Company can raise additional liquidity through the issuance of equity or unsecured debt privately or publicly. Additionally, the Company is able to enter into additional repurchase agreements or acquire brokered deposits at its

discretion. The availability and cost of equity or debt on an unsecured basis is dependent on many factors. Some factors that will impact this source of liquidity are the Company's financial position, the market environment, and the Company's credit rating. As such, the Company is careful to monitor the various factors that could impact its ability to raise liquidity through these channels.

Table of Contents

The table below shows current and unused liquidity capacity from various sources as of the dates indicated:

Table 23 - Sources of Liquidity

	March 31, 2015		December 31, 2014	
	Outstanding	Additional Borrowing Capacity	Outstanding	Additional Borrowing Capacity
	(Dollars in thousands)			
Federal Home Loan Bank of Boston (1)	\$ 108,246	\$ 821,265	\$ 70,080	\$ 755,712
Federal Reserve Bank of Boston	—	788,299	—	801,740
Unpledged Securities	—	385,445	—	297,871
Wholesale repurchase agreements	50,000	—	(3) 50,000	— (3)
Customer repurchase agreements	118,138	—	(3) 147,890	— (3)
Junior subordinated debentures (1)	73,631	—	(3) 73,685	— (3)
Subordinated debt	35,000	—	(3) 65,000	— (3)
Parent Company line of credit	10,000	10,000	—	20,000
Brokered deposits (2)	63,327	—	(3) 65,914	— (3)
	\$ 458,342	2,005,009	\$ 472,569	\$ 1,875,323

(1) Amounts shown are inclusive of fair value marks associated with previous acquisitions.

(2) Inclusive of \$42.9 million and \$44.9 million of brokered deposits acquired through participation in the CDARS program as of March 31, 2015 and December 31, 2014, respectively.

(3) The additional borrowing capacity has not been assessed for these categories.

In addition to policies used for managing operational liquidity, the Board of Directors and the ALCO recognize the need to establish reasonable guidelines for managing through an environment of heightened liquidity risk. Catalysts for elevated liquidity risk can be Bank-specific issues and/or systemic industry-wide events. It is therefore the responsibility of the Board and ALCO to institute systems and controls to provide advanced detection of potentially significant funding shortages, establish methods for assessing and monitoring risk levels, and institute prompt responses that may alleviate/circumvent a potential liquidity crisis. As such, the Board of Directors and the ALCO have put a Liquidity Contingency Plan in place. The overall goal of this plan is to provide a framework for the Bank to help detect liquidity problems promptly and appropriately address potential liquidity problems in a timely manner. In a period of perceived heightened liquidity risk, the Liquidity Contingency Plan provides for the establishment of a Liquidity Crisis Task Force. The Liquidity Crisis Task Force is responsible for monitoring the potential for a liquidity crisis and for establishing and executing an appropriate response.

Off-Balance Sheet Arrangements There have been no material changes in off-balance sheet financial instruments during the three months ended March 31, 2015. See Note 8, "Derivative and Hedging Activities" and Note 12, "Commitments and Contingencies" within Notes to Consolidated Financial Statements included in Item 1 hereof for more information relating to the Company's off-balance sheet financial instruments.

Contractual Obligations, Commitments, and Contingencies There have been no material changes in contractual obligations, commitments, or contingencies during the three months ended March 31, 2015. Please refer to the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014 for a complete table of contractual obligations, commitments and contingencies.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information required by this Item 3 is included in the "Risk Management" section of Item 2 of Part I of this Form 10-Q, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Item 4. Controls and Procedures

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures. The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer along with the Company's Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as such term is defined under Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Company's Chief Executive Officer along with the Company's Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective as of the end of the period covered by this quarterly report.

Table of Contents

Changes in Internal Controls over Financial Reporting. There were no changes in our internal control over financial reporting that occurred during the first quarter of 2015 that have materially affected or are reasonably likely to materially affect the Company's internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

At March 31, 2015, Rockland Trust was involved in pending lawsuits that arose in the ordinary course of business or due to acquisitions. Management has reviewed these pending lawsuits with legal counsel and has taken into consideration the view of counsel as to their outcome. In the opinion of management, the final disposition of pending lawsuits is not expected to have a material adverse effect on the Company's financial position or results of operations.

Item 1A. Risk Factors

As of the date of this report, there have been no material changes with regard to the Risk Factors disclosed in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2014, which are incorporated herein by reference.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Not applicable.

(b) Not applicable.

(c) The following table sets forth information regarding the Company's repurchases of its common stock during the three months ended March 31, 2015:

Period	Issuer Purchases of Equity Securities			
	Total Number of Shares Purchased (1)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan or Program (2)	Maximum Number of Shares That May Yet Be Purchased Under the Plan or Program
January 1 to January 31, 2015	250	\$40.67	—	—
February 1 to February 28, 2015	12,261	\$39.92	—	—
March 1 to March 31, 2015	25,793	\$44.09	—	—
Total	38,304		—	

(1) Shares repurchased relate to the surrendering of mature shares for the exercise and/or vesting of stock compensation grants.

(2) The Company does not currently have a stock repurchase program or plan in place.

Item 3. Defaults Upon Senior Securities—None

Item 4. Mine Safety Disclosures - Not Applicable

Item 5. Other Information—None
