FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from Commission File Number _____ to 001-11595

Astec Industries, Inc.
(Exact name of registrant as specified in its charter)

Tennessee
(State or other jurisdiction of incorporation or organization)

62-0873631
(I.R.S. Employer Identification No.)

1725 Shepherd Road, Chattanooga, Tennessee
(Address of principal executive offices)

37421
(Zip Code)

(423) 899-5898
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES NO

Edgar Filing: ASTEC INDUSTRIES INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
YES NO

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at July 29, 2010
Common Stock, par value \$0.20	22,619,879

ASTEC INDUSTRIES, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Significant Accounting Policies

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X promulgated under the Securities Act of 1933. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America ("U.S. GAAP") for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six-month periods ended June 30, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010. It is suggested that these condensed financial statements be read in conjunction with the financial statements and the notes thereto included in the Astec Industries, Inc. Annual Report on Form 10-K for the year ended December 31, 2009.

The condensed consolidated balance sheet at December 31, 2009 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by U.S. GAAP for complete financial statements.

A reclassification has been made to prior period data as previously reported to conform to current year presentation regarding foreign exchange gains and losses which have been reclassified to cost of sales from other income, net of expenses.

Recent Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board ("FASB") issued guidance that supersedes certain previous rules relating to how a company allocates consideration to all of its deliverables in a multiple-deliverable revenue arrangement. The revised guidance eliminates the use of the residual method of allocation in which the undelivered element is measured at its estimated selling price and the delivered element is measured as the residual of the arrangement consideration and alternatively requires that the relative-selling-price method be used in all circumstances in which an entity recognizes revenue for an arrangement with multiple-deliverables. The revised guidance requires both ongoing disclosures regarding an entity's multiple-element revenue arrangements as well as certain transitional disclosures during periods after adoption. All entities must adopt the revised guidance no later than the beginning of their first fiscal year beginning on or after June 15, 2010 with earlier adoption allowed. Entities may elect to adopt the guidance through either prospective application or through retrospective application to all revenue arrangements for all periods presented. The Company plans to adopt the revised guidance effective January 1, 2011. The Company does not believe the adoption of this new guidance will have a significant impact on the Company's financial statements.

Note 2. Earnings per Share

Basic earnings per share is determined by dividing net income attributable to controlling interest by the weighted average number of common shares outstanding during each period. Diluted earnings per share include the potential dilutive effects of options, restricted stock units and shares held in the Company's Supplemental Executive Retirement Plan.

The following table sets forth the computation of basic and diluted earnings per share:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2010	2009	2010	2009
Numerator:				
Net income attributable to controlling interest	\$ 10,308,000	\$ 7,749,000	\$ 19,102,000	\$ 15,181,000
Denominator:				
Denominator for basic earnings per share	22,507,078	22,435,037	22,490,431	22,432,804
Effect of dilutive securities:				
Employee stock options and restricted stock units	225,736	203,317	211,234	171,859
Supplemental Executive Retirement Plan	99,971	97,416	98,558	94,956
Denominator for diluted earnings per share	22,832,785	22,735,770	22,800,223	22,699,619
Net income attributable to controlling interest per share:				
Basic	\$0.46	\$0.35	\$0.85	\$0.68
Diluted	\$0.45	\$0.34	\$0.84	\$0.67

A total of 1,072 and 1,840 options were antidilutive for the three months ended June 30, 2010 and 2009, respectively. A total of 1,437 and 1,821 options were antidilutive for the six months ended June 30, 2010 and 2009, respectively. Antidilutive options are not included in the diluted earnings per share computation.

Note 3. Receivables

Receivables are net of allowances for doubtful accounts of \$2,046,000 and \$2,215,000 as of June 30, 2010 and December 31, 2009, respectively.

Note 4. Inventories

Inventories consist of the following (in thousands):

	June 30, 2010	December 31, 2009
Raw materials and parts	\$88,644	\$90,150
Work-in-process	52,581	52,010
Finished goods	66,702	87,968
Used equipment	16,352	18,420
Total	\$224,279	\$248,548

The above inventory amounts are net of reserves totaling \$16,594,000 and \$16,378,000 as of June 30, 2010 and December 31, 2009, respectively.

Note 5. Property and Equipment

Property and equipment is stated at cost, less accumulated depreciation of \$160,626,000 and \$152,959,000 as of June 30, 2010 and December 31, 2009, respectively.

Note 6. Fair Value Measurements

The Company has various financial instruments that must be measured at fair value on a recurring basis including marketable debt and equity securities held by Astec Insurance Company (“Astec Insurance”), the Company’s captive insurance company, and marketable equity securities held in an unqualified Supplemental Executive Retirement Plan (“SERP”). The financial assets held in the SERP also constitute a liability of the Company for financial reporting purposes. The Company’s subsidiaries also occasionally enter into foreign currency exchange contracts to mitigate exposure to fluctuations in currency exchange rates.

For cash and cash equivalents, trade receivables, other receivables, revolving debt and accounts payable, the carrying amount approximates the fair value because of the short-term nature of these instruments. Investments are carried at their fair value based on quoted market prices for identical or similar assets or, where no quoted prices exist, other observable inputs for the asset. The fair values of foreign currency exchange contracts are based on quotations from various banks for similar instruments using models with market based inputs.

Financial assets and liabilities are categorized based upon the level of judgment associated with the inputs used to measure their fair value. The inputs used to measure the fair value are identified in the following hierarchy:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 - Unadjusted quoted prices in active markets for similar assets or liabilities; or unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active; or inputs other than quoted prices that are observable for the asset or liability.

Level 3 - Inputs reflect management’s best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs to the model.

As indicated in the table below, the Company has determined that all its financial assets and liabilities, excluding pension assets, at June 30, 2010 are level 1 and level 2 in the fair value hierarchy as defined above (in thousands):

	Level 1	Level 2	Total
Financial Assets:			
Trading equity securities:			
SERP money market fund	\$ 1,466	\$-	\$ 1,466
SERP mutual funds	873	-	873
Preferred stocks	538	-	538
Trading debt securities:			
Corporate bonds	-	5,149	5,149
Municipal bonds	-	3,849	3,849
Floating rate notes	-	812	812
Other government bonds	-	225	225
Derivative asset	-	130	130
Total financial assets	\$ 2,877	\$ 10,165	\$ 13,042
Financial Liabilities:			
SERP liabilities	\$ 5,111	\$-	\$ 5,111

Edgar Filing: ASTEC INDUSTRIES INC - Form 10-Q

Derivative liabilities	-	82	82
Total financial liabilities	\$5,111	\$82	\$5,193

9

The Company's investments (other than pension assets) consist of the following (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value (Net Carrying Amount)
June 30, 2010:				
Trading equity securities	\$2,952	\$30	\$106	\$2,876
Trading debt securities	9,770	338	72	10,036
	\$12,722	\$368	\$178	\$12,912
December 31, 2009:				
Trading equity securities	\$2,753	\$29	\$79	\$2,703
Trading debt securities	10,564	405	56	10,913
	\$13,317	\$434	\$135	\$13,616

The trading equity investments noted above are valued at their estimated fair value based on their quoted market prices and the debt securities are valued based upon a mix of observable market prices and model driven prices derived from a matrix of observable market prices for assets with similar characteristics obtained from a nationally recognized third party pricing service. Additionally, a significant portion of the trading equity securities are in equity money market and mutual funds and also comprise a portion of the Company's liability under its SERP.

Trading debt securities are comprised of marketable debt securities held by Astec Insurance. Astec Insurance has an investment strategy that focuses on providing regular and predictable interest income from a diversified portfolio of high-quality fixed income securities. At June 30, 2010 and December 31, 2009, \$1,157,000 and \$1,651,000, respectively, of trading debt securities were due to mature within twelve months and, accordingly, are included in other current assets in the accompanying balance sheets. The financial liabilities related to the SERP shown above are included in other long-term liabilities and the derivative financial liabilities are included in other accrued liabilities in the accompanying balance sheets.

Net unrealized gains or losses incurred during the three and six-month periods ended June 30, 2010 on investments still held as of June 30, 2010 totaled losses of \$159,000 and \$14,000, respectively.

Note 7. Debt

During April 2007, the Company entered into an unsecured credit agreement with Wachovia Bank, National Association ("Wachovia"), whereby Wachovia has extended to the Company an unsecured line of credit of up to \$100,000,000, including a sub-limit for letters of credit of up to \$15,000,000.

The Wachovia credit facility had an original term of three years with two one-year extensions available. Early in 2010, the Company exercised the final extension bringing the new loan maturity date to May 2012. The interest rate for borrowings is a function of the Adjusted LIBOR Rate or Adjusted LIBOR Market Index Rate, as elected by the Company, plus a margin based upon a leverage ratio pricing grid ranging between 0.5% and 1.5%. As of June 30, 2010 the applicable margin based upon the leverage ratio pricing grid was equal to 0.5%. The unused facility fee is 0.125%. The Wachovia credit facility requires no principal amortization and interest only payments are due, in the case of loans bearing interest at the Adjusted LIBOR Market Index Rate, monthly in arrears and, in the case of loans bearing interest at the Adjusted LIBOR Rate, at the end of the applicable interest period therefore. The Wachovia credit agreement contains certain financial covenants related to minimum fixed charge coverage ratios, minimum

tangible net worth and maximum allowed capital expenditures. At June 30, 2010, the Company had no borrowings outstanding under the credit facility but did have letters of credit totaling \$7,999,000 outstanding, resulting in additional borrowing availability of \$92,001,000 on the Wachovia credit facility. The Company was in compliance with the financial covenants under its credit facility as of June 30, 2010.

The Company's South African subsidiary, Osborn Engineered Products SA (Pty) Ltd. ("Osborn"), has available a credit facility of approximately \$7,849,000 (ZAR 60,000,000) to finance short-term working capital needs, as well as to cover letter of credit performance, advance payment and retention guarantees. As of June 30, 2010, Osborn had no outstanding borrowings under the credit facility, but approximately \$3,369,000 in performance, advance payment and retention bonds were issued under the facility. The facility is secured by Osborn's buildings and improvements, accounts receivable, cash balances and a \$2,000,000 letter of credit issued by the parent Company. As of June 30, 2010, Osborn had available credit under the facility of approximately \$4,480,000. The facility has an ongoing, indefinite term subject to annual reviews by the bank. The agreement has an unused facility fee of 0.793%.

The Company's Australian subsidiary, Astec Australia Pty Ltd ("Astec Australia") has an available credit facility to finance short-term working capital needs of approximately \$2,386,000 (AUD 2,800,000), to finance foreign exchange dealer limit orders of approximately \$2,131,000 (AUD 2,500,000) and to provide bank guarantees to others of approximately \$170,000 (AUD 200,000). The facility is secured by a \$2,500,000 letter of credit issued by the parent Company. No amounts were outstanding under the credit facility at June 30, 2010.

Note 8. Product Warranty Reserves

The Company warrants its products against manufacturing defects and performance to specified standards. The warranty period and performance standards vary by market and uses of its products, but generally range from three months to one year or up to a specified number of hours of operations. The Company estimates the costs that may be incurred under its warranties and records a liability at the time product sales are recorded. The product warranty liability is primarily based on historical claim rates, nature of claims and the associated cost.

Changes in the Company's product warranty liability for the three and six-month periods ended June 30, 2010 and 2009 are as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Reserve balance at the beginning of the period	\$8,549	\$9,513	\$8,714	\$10,050
Warranty liabilities accrued during the period	4,095	2,425	6,954	5,528
Warranty liabilities settled during the period	(3,922)	(2,968)	(6,965)	(6,581)
Other	(40)	129	(21)	102
Reserve balance at the end of the period	\$8,682	\$9,099	\$8,682	\$9,099

Note 9. Accrued Loss Reserves

The Company accrues reserves for losses related to known workers' compensation and general liability claims that have been incurred but not yet paid or are estimated to have been incurred but not yet reported to the Company. The undiscounted reserves are actuarially determined based on the Company's evaluation of the type and severity of individual claims and historical information, primarily its own claims experience, along with assumptions about future events. Changes in assumptions, as well as changes in actual experience, could cause these estimates to change in the future. Total accrued loss reserves were \$8,229,000 at June 30, 2010 compared to \$9,253,000 at December 31, 2009, of which \$4,085,000 and \$5,613,000 were included in other long-term liabilities at June 30, 2010 and December 31, 2009, respectively.

Note 10. Income Taxes

The Company's combined federal and state effective income tax rate was 34.8% and 34.9% for the three-month periods ended June 30, 2010 and 2009, respectively. The Company's combined federal and state effective income tax rate was 35.3% and 36.8% for the six-month periods ended June 30, 2010 and 2009, respectively. The primary reason for the reduction in six-month rates between years was due to an increase in the tax deduction the Company receives for domestic production activities.

The Company's liability recorded for uncertain tax positions as of June 30, 2010 has not changed significantly in amount or composition since December 31, 2009.

Note 11. Segment Information

The Company has four reportable operating segments, which include the Asphalt Group, the Aggregate and Mining Group, the Mobile Asphalt Paving Group and the Underground Group. The business units in the Asphalt Group design, manufacture and market a complete line of asphalt plants and related components, heating and heat transfer processing equipment, storage tanks for the asphalt paving and other non-related industries as well as a line of concrete mixing plants. The business units in the Aggregate and Mining Group design, manufacture and market equipment for the aggregate, metallic mining and recycling industries. The business units in the Mobile Asphalt Paving Group design, manufacture and market asphalt pavers, material transfer vehicles, milling machines and screeds. The business units in the Underground Group design, manufacture and market a complete line of trenching equipment and directional drills for the underground construction market. Business units that do not meet the requirements for separate disclosure as operating segments are shown in the "All Others" category, including Peterson Pacific Corp. ("Peterson"), Astec Australia Pty Ltd., ("Astec Australia"), Astec Insurance Company and the parent company, Astec Industries, Inc. Peterson designs, manufactures and markets whole-tree pulpwood chippers, horizontal grinders and blower trucks. Astec Australia markets equipment and installs, services and provides parts support for many of the products produced by the Company's manufacturing companies.

Note 12. Contingent Matters

Certain customers have financed purchases of Company products through arrangements expiring through May 2016 in which the Company is contingently liable for customer debt of approximately \$3,308,000 and \$4,276,000 at June 30, 2010 and December 31, 2009, respectively. At June 30, 2010, the maximum potential amount of future payments for which the Company would be liable is equal to \$3,308,000. These arrangements also provide that the Company will

receive the lender's full security interest in the equipment financed if the Company is required to fulfill its contingent liability under these arrangements. The Company has recorded a liability of \$316,000 related to these guarantees at June 30, 2010.

The Company is contingently liable under letters of credit issued by Wachovia totaling approximately \$7,999,000 as of June 30, 2010, including a \$2,500,000 and a \$2,000,000 letter of credit issued on behalf of Astec Australia and Osborn, respectively, two of the Company's foreign subsidiaries. The outstanding letters of credit expire at various dates through June 2011. Additionally, as of June 30, 2010 Osborn is contingently liable for a total of \$3,369,000 in outstanding letters of credit. As of June 30, 2010, the maximum potential amount of future payments under these letters of credit and bonds for which the Company could be liable is approximately \$11,368,000.

The Company is currently a party to various claims and legal proceedings that have arisen in the ordinary course of business. If management believes that a loss arising from such claims and legal proceedings is probable and can reasonably be estimated, the Company records the amount of the loss (excluding estimated legal fees), or the minimum estimated liability when the loss is estimated using a range, and no point within the range is more probable than another. As management becomes aware of additional information concerning such contingencies, any potential liability related to these matters is assessed and the estimates are revised, if necessary. If management believes that a loss arising from such claims and legal proceedings is either (i) probable but cannot be reasonably estimated or (ii) reasonably possible but not probable, the Company does not record the amount of the loss, but does make specific disclosure of such matter, if material. Based upon currently available information and with the advice of counsel, management believes that the ultimate outcome of its current claims and legal proceedings, individually and in the aggregate, will not have a material adverse effect on the Company's financial position, cash flows or results of operations. However, claims and legal proceedings are subject to inherent uncertainties and rulings unfavorable to the Company could occur. If an unfavorable ruling were to occur, there exists the possibility of a material adverse effect on the Company's financial position, cash flows or results of operations.

The Company has received notice that Johnson Crushers International, Inc. is subject to an enforcement action brought by the U.S. Environmental Protection Agency (EPA) and the Oregon Department of Environmental Quality related to an alleged failure to comply with federal and state air permitting regulations. Each agency is expected to seek sanctions that will include monetary penalties. No penalties have yet been proposed. The Company believes that it has cured the alleged violations and is cooperating fully with the regulatory agencies. At this stage of the investigations, the Company is unable to predict the outcome or the amount of any such sanctions or monetary penalties that may be assessed.

The Company also has received notice from the EPA that it may be responsible for a portion of the costs incurred in connection with an environmental cleanup in Illinois. The discharge of hazardous materials and associated cleanup relate to activities occurring prior to the Company's acquisition of Barber-Greene in 1986. The Company believes that over 300 other parties have received similar notices. At this time, the Company cannot predict whether the EPA will seek to hold the Company liable for a portion of the cleanup costs or the amount of any such liability.

The Company has not recorded a liability with respect to either matter because no estimates of the amount of any such liabilities can be made at this time.

Note 13. Shareholders' Equity

Under terms of the Company's stock option plans, officers and certain other employees were granted options to purchase the Company's common stock at no less than 100% of the market price on the date the option was granted. No additional options can be granted under these plans; however the Company has reserved unissued shares of common stock for the exercise of the 132,927 unexercised and outstanding options as of June 30, 2010 under these employee plans. All options granted to employees under these plans vested prior to 2007.

In addition, a Non-employee Directors Stock Incentive Plan has been established to allow non-employee directors to have a personal financial stake in the Company through an ownership interest. Directors may elect to receive their compensation in cash, common stock, deferred stock or stock options. Options granted to Directors vest and become fully exercisable immediately upon grant. All stock options have a 10-year term. The shares reserved under the 1998 Non-Employee Directors Stock Incentive Plan total 146,666 as of June 30, 2010 of which 136,416 shares are available for future grants of stock or deferred stock to directors. The fair value of stock awards granted to non-employee directors totaled \$49,000 and \$56,000 for the three-month periods ended June 30, 2010 and 2009, respectively. The fair value of stock awards granted to non-employee directors totaled \$91,000 and \$112,000 for the six-month periods ended June 30, 2010 and 2009, respectively.

In August 2006, the Compensation Committee of the Board of Directors implemented a five-year plan to award key members of management restricted stock units (“RSU’s”) each year. The details of the plan were formulated under the 2006 Incentive Plan approved by the Company’s shareholders in their annual meeting held in April 2006. The plan allows up to 700,000 shares to be granted to employees. RSU’s granted each year will be determined based upon the performance of individual subsidiaries and consolidated annual financial performance. Additional RSU’s may be granted in 2011 based upon cumulative five-year performance. Generally, each award will vest at the end of five years from the date of grant, or at the time a recipient retires after reaching age 65, if earlier. Compensation expense of \$133,000 and \$557,000 has been recorded in the three-month periods ended June 30, 2010 and 2009, respectively, to reflect the fair value of the total shares amortized over the portion of the vesting period occurring during the periods. Compensation expense of \$724,000 and \$587,000 has been recorded in the six-month periods ended June 30, 2010 and 2009, respectively, to reflect the fair value of the total shares amortized over the portion of the vesting period occurring during the periods.

Note 14. Seasonality

Based upon historical results of the past several years, 51% to 55% of the Company's annual revenues typically occur during the first six months of the year. During the usual seasonal trend, the first three quarters of the year are the Company's stronger quarters for sales volume, with the fourth quarter normally being the weakest quarter.

Note 15. Comprehensive Income

The components of total comprehensive income attributable to controlling interest for the three and six-month periods ended June 30, 2010 and 2009 is presented below (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Net income	\$10,330	\$7,775	\$19,162	\$15,172
Change in unrecognized pension and post retirement benefit costs, net of tax	3	32	(58)	46
Foreign currency translation adjustments	(1,808)	4,859	(1,036)	4,098
Comprehensive income	8,525	12,666	18,068	19,316
Comprehensive income (loss) attributable to non-controlling interest	(5)	(199)	(49)	(137)
Comprehensive income attributable to controlling interest	\$8,520	\$12,467	\$18,019	\$19,179

Note 16. Other Income, net of expenses

Other income, net of expenses for the three and six-month periods ended June 30, 2010 and 2009 is presented below (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Interest income	\$204	\$192	\$438	\$267
Gain (loss) on investments	(19)	320	73	193
Other	(63)	298	99	315
Total	\$122	\$810	\$610	\$775

Note 17. Derivative Financial Instruments

The Company is exposed to certain risks related to its ongoing business operations. The primary risk managed by using derivative instruments is foreign currency risk. From time to time the Company's foreign subsidiaries enter into foreign currency exchange contracts to mitigate exposure to fluctuations in currency exchange rates. The fair value of the derivative financial instrument is recorded on the Company's balance sheet and is adjusted to fair value at each measurement date based on the contractual forward exchange rate and the forward exchange rate at the measurement date. The changes in fair value are recognized in the consolidated statements of operation in the current period. The Company does not engage in speculative transactions nor does it hold or issue financial instruments for trading purposes. The Company reported \$130,000 of derivative assets in prepaid expenses and other, derivative liabilities of \$40,000 in other accrued liabilities and \$42,000 in other long-term liabilities at June 30, 2010. The Company reported \$111,000 of derivative liabilities in other accrued liabilities and \$10,000 in other long-term liabilities at December 31, 2009. The Company recognized, as a component of cost of sales, a gain of \$210,000 and a loss of \$537,000 on the change in fair value of derivative financial instruments in the three-month periods ended June 30, 2010 and 2009, respectively. The Company recognized, as a component of cost of sales, a gain of \$169,000 and a loss of \$716,000 on the change in fair value of derivative financial instruments for the six months ended June 30, 2010 and 2009, respectively. There were no derivatives that qualified for hedge accounting at June 30, 2010 or December 31, 2009.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Statements contained anywhere in this Quarterly Report on Form 10-Q that are not limited to historical information are considered forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are sometimes identified by the words “will,” “would,” “should,” “could,” “may,” “believes,” “anticipates,” “intends,” “for,” “expects” and similar expressions. Such forward-looking statements include, without limitation, statements regarding the Company's expected sales and results of operations during 2010, the Company's expected capital expenditures in 2010, the expected benefit and impact of financing arrangements, the ability of the Company to meet its working capital and capital expenditure requirements through June 30, 2011, the impact of the enactment of the Hiring Incentives to Restore Employment (HIRE) Act of 2010 or any future state or federal funding for transportation construction programs, the need for road improvements, the impact of other public sector spending and funding mechanisms, changes in the economic environment as it affects the Company, the timing and impact of changes in the economy, the market confidence of customers and dealers, the Company being called upon to fulfill certain contingencies, the expected dates of granting of restricted stock units, changes in interest rates and the impact of such changes on the financial results of the Company, changes in the prices of steel and oil, the ability of the Company to offset future changes in prices in raw materials, the change in the level of the Company's presence and sales in international markets, the seasonality of the Company's business, the percentage of the Company's equipment sold directly to end users, the amount or value of unrecognized tax benefits, the Company's discussion of its critical accounting policies and the ultimate outcome of the Company's current claims and legal proceedings.

These forward-looking statements are based largely on management's expectations, which are subject to a number of known and unknown risks, uncertainties and other factors discussed in this Report and in other documents filed by the Company with the Securities and Exchange Commission, which may cause actual results, financial or otherwise, to be materially different from those anticipated, expressed or implied by the forward-looking statements. All forward-looking statements included in this document are based on information available to the Company on the date hereof, and the Company assumes no obligation to update any such forward-looking statements to reflect future events or circumstances.

The risks and uncertainties identified herein under the caption “Item 1A. Risk Factors” in Part II of this Report, elsewhere herein and in other documents filed by the Company with the Securities and Exchange Commission, including the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2009, should be carefully considered when evaluating the Company's business and future prospects.

Overview

Astec Industries, Inc. (“the Company”) is a leading manufacturer and marketer of equipment for road building, aggregate processing, directional drilling, trenching and wood processing. The Company’s businesses:

- design, engineer, manufacture and market equipment that is used in each phase of road building, including quarrying and crushing the aggregate to producing asphalt or concrete, recycling old asphalt or concrete and applying the asphalt;
- design, engineer, manufacture and market additional equipment and components including trenching, auger boring, directional drilling, geothermal drilling, oil and natural gas drilling, industrial heat transfer, wood chipping and grinding; and
- manufacture and sell replacement parts for equipment in each of its product lines.

The Company has 14 manufacturing companies, 13 of which fall within four reportable operating segments, which include the Asphalt Group, the Aggregate and Mining Group, the Mobile Asphalt Paving Group and the Underground Group. The business units in the Asphalt Group design, manufacture and market a complete line of asphalt plants and related components, heating and heat transfer processing equipment and storage tanks for the asphalt paving and other unrelated industries including energy production and concrete mixing plants. The business units in the Aggregate and Mining Group design, manufacture and market equipment for the aggregate, metallic mining and recycling industries. In September 2009 this segment acquired a small company with unique machine technology to make wood pellets. The Company began production of the new pellet production equipment in January 2010. The business units in the Mobile Asphalt Paving Group design, manufacture and market asphalt pavers, material transfer vehicles, milling machines, stabilizers and screeds. The business units in the Underground Group design, manufacture and market a complete line of trenching equipment, directional drills, geothermal drills and auger boring machines for the underground construction market, as well as vertical drills for gas and oil field development. The Company also has one other category that contains the business units that do not meet the requirements for separate disclosure as an operating segment. The business units in the Other category include Peterson Pacific Corp. (Peterson), Astec Australia Pty Ltd (Astec Australia), Astec Insurance Company (“Astec Insurance”) and Astec Industries, Inc., the parent company. Peterson designs, manufactures and markets whole-tree pulpwood chippers, horizontal grinders and blower trucks. Astec Australia markets equipment and installs, services and provides parts for many of the products produced by the Company’s manufacturing companies. Astec Insurance is a captive insurance company.

The Company’s financial performance is affected by a number of factors, including the cyclical nature and varying conditions of the markets it serves. Demand in these markets fluctuates in response to overall economic conditions and is particularly sensitive to the amount of public sector spending on infrastructure development, privately funded infrastructure development, changes in the price of crude oil, which affects the cost of fuel and liquid asphalt, and changes in the price of steel.

In August 2005, President Bush signed into law the Safe, Accountable, Flexible and Efficient Transportation Equity Act - A Legacy for Users (“SAFETEA-LU”), which authorized appropriation of \$286.5 billion in guaranteed federal funding for road, highway and bridge construction, repair and improvement of the federal highways and other transit projects for federal fiscal years October 1, 2004 through September 30, 2009. The Company believes that federal highway funding such as SAFETEA-LU significantly influences the purchasing decisions of the Company’s customers who are more comfortable making purchasing decisions with such legislation in place. Federal funding provides for approximately 25% of all highway, street, roadway and parking construction put in place in the United States.

SAFETEA-LU funding expired on September 30, 2009 and federal transportation funding operated on short-term appropriations through March 17, 2010. On March 18, 2010, President Obama signed into law the Hiring Incentives to Restore Employment (HIRE) Act. This law extends authorization of the surface transportation programs previously funded under SAFETEA-LU through December 31, 2010 at 2009 levels. In addition, the HIRE Act authorizes a one-time transfer of \$19.5 billion from the general fund to the highway trust fund related to previously foregone interest payments. It also shifts the cost of fuel tax exemptions for state and local governments from the highway trust fund to the general fund, which will generate an anticipated \$1.5 billion annually, and allows the highway trust fund to retain interest earned on future unexpended balances. Although the HIRE Act should help stabilize the federal highway program, the Company believes a new multi-year highway program would have the greatest positive impact on the road construction industry and allow its customers to plan and execute longer term projects.

Several other countries have also implemented infrastructure spending programs to stimulate their economies. The Company believes these spending programs have had a positive impact on the financial performance of certain of its business segments; however, the magnitude of that impact cannot be determined.

The public sector spending described above is needed to fund road, bridge and mass transit improvements. The Company believes that increased funding is unquestionably needed to restore the nation's highways to a quality level required for safety, fuel efficiency and mitigation of congestion. In the Company's opinion, amounts needed for such improvements are significantly greater than amounts approved to date, and funding mechanisms such as the federal usage fee per gallon of gasoline, which has not been increased in 17 years, would likely need to be increased along with other measures to generate the funds needed.

In addition to public sector funding, the economies in the markets the Company serves, the price of oil and its impact on customers' purchase decisions and the price of steel may each affect the Company's financial performance. Economic downturns, like the one experienced from 2001 through 2003, and the current downturn that began in late 2008, generally result in decreased purchasing by the Company's customers, which, in turn, causes reductions in sales and increased pricing pressure on the Company's products. Rising interest rates typically negatively impact customers' attitudes toward purchasing equipment. The Federal Reserve has maintained historically low interest rates in response to the current economic downturn, and the Company expects only slight changes, if any, in interest rates in the near term; however, management believes that upward pressure is building on long-term interest rates.

Significant portions of the Company's revenues relate to the sale of equipment involved in the production, handling and installation of asphalt mix. Asphalt is a by-product of oil production. An increase in the price of oil increases the cost of asphalt, which is likely to decrease demand for asphalt and therefore decrease demand for certain Company products. While increasing oil prices may have a negative financial impact on the Company's customers, the Company's equipment can use a significant amount of recycled asphalt pavement, thereby mitigating the final cost of asphalt for the customer. The Company continues to develop products and initiatives to reduce the amount of oil and related products required to produce asphalt mix. Oil price volatility makes it difficult to predict the costs of oil-based products used in road construction such as liquid asphalt and gasoline. The Company's customers appear to be adapting their prices in response to the fluctuating oil prices, and the fluctuations did not appear to significantly impair equipment purchases in 2009 and early 2010. The Company expects oil prices to continue to fluctuate in 2010 but does not believe the fluctuation will have a significant impact on customers' buying decisions.

Contrary to the negative impact of higher oil prices on many of the Company's products as discussed above, sales of several of the Company's products, including products manufactured by the Underground Group, which are used to drill for oil and natural gas and install oil and natural gas pipelines, would benefit from higher oil and natural gas prices, to the extent that such higher prices lead to further development of oil and natural gas production.

Steel is a major component in the Company's equipment. Steel prices increased moderately through the first and second quarters of 2010 as the overall economy improved. Pricing began to decline slowly at the end of the second quarter as demand weakened; however, management anticipates that pricing will remain stable during the third quarter and into the fourth quarter. The Company will continue the practice of obtaining contract pricing on a portion of its steel needs to ensure pricing stability and manage costs. An increase in the demand for steel in the broader economy, coupled with reduced steel production by steel mills, could combine to increase steel prices during 2011. In this event the Company would institute price increases in response to rising steel and component prices; however, the Company may not be able to raise the prices of its products enough to cover increased costs, which would have a negative effect on the Company's financial results. If the Company expects that steel prices will increase, it will take advantage of buying opportunities to offset such future pricing where possible.

In addition to the factors stated above, many of the Company's markets are highly competitive, and its products compete worldwide with a number of other manufacturers and dealers that produce and sell similar products. During the first half of 2009 the dollar was stronger relative to currencies in many of the Company's foreign markets, negatively impacting the Company's international sales. During the latter half of 2009, a weakening dollar, combined with improving economic conditions in certain foreign economies, had a positive impact on the Company's international sales. During the first six months of 2010, the dollar has grown stronger in Europe, but in most international markets the dollar has remained weaker than it was during the first half of 2009. The Company expects the dollar to fluctuate during the remainder of 2010. Future strengthening of the dollar could have a negative impact on the Company's international sales.

In the United States and internationally, the Company's equipment is marketed directly to customers as well as through dealers. During 2009, approximately 75% to 80% of equipment sold by the Company was sold directly to the end user. The Company expects this ratio to remain relatively consistent through 2010.

The Company is operated on a decentralized basis and there is a complete management team for each operating subsidiary. Finance, insurance, legal, shareholder relations, corporate accounting and other corporate matters are primarily handled at the corporate level (i.e., Astec Industries, Inc., the parent company). The engineering, design, sales, manufacturing and basic accounting functions are all handled at each individual subsidiary. Standard accounting procedures are prescribed and followed in all reporting.

The non-union employees of each subsidiary have the opportunity to earn bonuses in the aggregate of up to 10% of each subsidiary's after-tax profit if such subsidiary meets established goals. These goals are based on the subsidiary's return on capital employed, cash flow on capital employed and safety. The bonuses for subsidiary presidents are normally paid from a separate corporate pool.

Results of Operations

Net Sales

Net sales increased \$20,406,000 or 10.8%, from \$188,843,000 for the second quarter of 2009 to \$209,249,000 in the second quarter of 2010. Sales are generated primarily from new equipment purchases made by customers for use in construction for infrastructure funded by both the private and public sectors. The overall increase in sales for the second quarter of 2010 compared to the second quarter of 2009 reflects strengthening international economic conditions. Domestic sales remained flat in the second quarter of 2010 compared to the second quarter of 2009.

Net sales increased \$8,556,000 or 2.2%, from \$394,148,000 for the first six months of 2009 to \$402,704,000 in the first six months of 2010. The overall increase in sales for the first six months of 2010 compared to the first six months of 2009 reflects strengthening international economic conditions.

Domestic sales for the second quarter of 2010 were \$129,289,000 or 61.8% of consolidated net sales compared to \$129,250,000 or 68.4% of consolidated net sales for the second quarter of 2009, an increase of \$39,000. International sales for the second quarter of 2010 were \$79,960,000 or 38.2% of consolidated net sales compared to \$59,593,000 or 31.6% of consolidated net sales for the second quarter of 2009, an increase of \$20,367,000 or 34.2%. Domestic sales were negatively impacted by the lack of action by Congress in renewing the long-term highway bill to replace the previous bill that expired in September 2009. The overall increase in international sales for the second quarter of 2010 compared to the second quarter of 2009 is due to improved economic conditions in several of the international markets the company serves and the adoption of stimulus packages with significant emphasis on the development of highways. The increases occurred primarily in Canada, Australia, South America, the West Indies and Europe.

Domestic sales for the first six months of 2010 were \$258,740,000 or 64.3% of consolidated net sales compared to \$261,181,000 or 66.3% of consolidated net sales for the first six months of 2009, a decrease of \$2,441,000 or 0.9%. International sales for the first six months of 2010 were \$143,964,000 or 35.7% of consolidated net sales compared to \$132,967,000 or 33.7% of consolidated net sales for the first six months of 2009, an increase of \$10,997,000 or 8.3%. Domestic sales were negatively impacted by the lack of action by Congress in renewing the new long-term highway bill to replace the previous bill that expired in September 2009. The overall increase in international sales for the first six months of 2010 compared to the first six months of 2009 is due to improved economic conditions in several of the international markets the company serves and the adoption of stimulus packages with significant emphasis on the development of highways. The year-to-date increases occurred primarily in Canada, South America, Central America and Africa.

Parts sales for the second quarter increased 13.0% from \$44,418,000 in 2009 to \$50,204,000 in 2010. Parts sales for the second quarter of 2010 as a percentage of consolidated net sales increased 50 basis points from 23.5% in 2009 to 24.0% in 2010.

Parts sales for the first six months increased 11.6% from \$90,041,000 in 2009 to \$100,467,000 in 2010. Parts sales for the first six months of 2010 as a percentage of consolidated net sales increased 210 basis points from 22.8% in 2009 to 24.9% in 2010.

Gross Profit

Consolidated gross profit as a percentage of sales decreased 40 basis points to 22.3% in the second quarter of 2010 from 22.7% in the second quarter of 2009 as the weak domestic market for certain of the Company's products has led the Company to offer more competitive pricing.

Consolidated gross profit as a percentage of sales increased 100 basis points to 23.0% in the first six months of 2010 from 22.0% in the first six months of 2009. One of the reasons for the increase in gross margin as a percent of sales is increased parts sales for the six-month period compared to the same period in 2009.

Selling, General, Administrative and Engineering Expenses

Selling, general, administrative and engineering expenses for the second quarter of 2010 were \$30,824,000, or 14.7% of net sales, compared to 31,607,000, or 16.7% of net sales, for the second quarter of 2009, a decrease of \$783,000, or 2.5%. The decrease was primarily due to a decrease in SERP expense of \$460,000 and expenses related to restricted stock units of \$424,000, both of which primarily resulted from a decrease in the Company's stock price from March 31, 2010 to June 30, 2010. Additionally, sales promotional expense decreased \$517,000 and research and development decreased \$441,000. These cost savings were offset by an increase in sales commissions of \$571,000 due to increased sales volumes, an increase in profit sharing expense increase of \$439,000 due to improved performance at certain subsidiaries, and an increase of \$534,000 in expenses related to the Bauma trade show which is held every three years.

Selling, general, administrative and engineering expenses for the six months ending June 30, 2010 were \$63,542,000, or 15.8% of net sales, compared to \$63,034,000, or 16.0% of net sales, for the first six months of 2009, an increase of \$508,000, or 0.8%. The increase was primarily related to an increase in profit sharing expense of \$1,057,000 due to improved performance at certain subsidiaries, an increase in sales commissions of \$537,000 due to increased sales volumes and an increase of \$984,000 in expenses related to the Bauma trade show which is held every three years. These increases were offset by decreases in sales promotional expense of \$452,000 and bad debt expense of \$479,000.

Interest Expense

Interest expense in the second quarter of 2010 decreased \$35,000, or 20.6%, to \$135,000 from \$170,000 in the second quarter of 2009.

Interest expense in the first six months of 2010 decreased \$93,000, or 26.4%, to \$259,000 from \$352,000 in the first six months of 2009 due to the reduction in borrowings outstanding for the comparable periods.

Other Income, net of expenses

Other income, net of expenses was income of \$122,000 for the second quarter of 2010 compared to income of \$810,000 in the second quarter of 2009, a decrease in income of \$688,000. The decrease was primarily due a decrease in investment income of \$339,000.

Other income, net of expenses was income of \$610,000 for the six months ending June 30, 2010 compared to income of \$775,000 for the six months ending June 30, 2009, a decrease in income of \$165,000. The decrease was primarily related to decreases in investment income of \$120,000.

Income Tax

Income tax expense for the second quarter of 2010 was \$5,511,000, compared to income tax expense of \$4,166,000 for the second quarter of 2009. The effective tax rates for the second quarters of 2010 and 2009 were 34.8% and 34.9%, respectively.

Income tax expense for the first six months of 2010 was \$10,467,000, compared to income tax expense of \$8,836,000 for the first six months of 2009. The effective tax rates for the first six months of 2010 and the first six months of 2009 were 35.3% and 36.8%, respectively. The primary reason for the decrease in the effective tax rate from the first six months of 2009 to the first six months of 2010 is an increase in a tax deduction the Company receives for domestic production activity. Both the rate of the deduction and the volume of domestic production increased.

Net Income

The Company had net income attributable to controlling interest of \$10,308,000 for the second quarter of 2010 compared to \$7,749,000 in the second quarter of 2009, an increase of \$2,559,000, or 33.0%. Earnings per diluted share were \$0.45 in the second quarter of 2010 compared to \$0.34 in the second quarter of 2009, an increase of \$0.11 or 32.4%. Diluted shares outstanding for the quarters ended June 30, 2010 and 2009 were 22,832,785 and 22,735,770, respectively. The increase in shares outstanding is primarily due to the exercise of stock options by employees of the Company.

The Company had net income attributable to controlling interest of \$19,102,000 for the six months ending June 30, 2010 compared to \$15,181,000 in the first six months of 2009, an increase of \$3,921,000, or 25.8%. Earnings per diluted share were \$0.84 in the first six months of 2010 compared to \$0.67 in the first six months of 2009, an increase of \$0.17 or 25.4%. Diluted shares outstanding for the six-month periods ended June 30, 2010 and 2009 were 22,800,223 and 22,699,619, respectively. The increase in shares outstanding is primarily due to the exercise of stock options by employees of the Company.

Backlog

The backlog of orders at June 30, 2010 was \$139,692,000 compared to \$133,584,000 at June 30, 2009, an increase of \$6,108,000, or 4.6%. The increase in backlog is due to an increase in international backlogs of \$10,251,000 or 14.3% offset by a decrease in domestic backlogs of \$4,143,000 or 6.7%. The increase in backlogs was also due primarily to an increase in the backlog of the Asphalt Group of \$12,019,000 or 22.2% and the Mobile Asphalt Paving Group of \$9,303,000 or 493.3%, offset by a decrease in the backlog of the Aggregate and Mining Group of \$17,121,000 or

26.0%. The Company is unable to determine whether the changes in backlogs were experienced by the industry as a whole; however, the Company believes the changes in backlogs reflect the current economic conditions the industry is experiencing.

Net Sales (in thousands):

	Three Months Ended June 30,		\$ Change	% Change	
	2010	2009			
Asphalt Group	\$65,362	\$ 69,578	\$ (4,216)	(6.1	%)
Aggregate and Mining Group	67,000	55,452	11,548	20.8	%
Mobile Asphalt Paving Group	47,231	36,859	10,372	28.1	%
Underground Group	13,636	17,145	(3,509)	(20.5	%)
Other Group	16,020	9,809	6,211	63.3	%

Asphalt Group: Sales in this group were \$65,362,000 for the second quarter of 2010 compared to \$69,578,000 for the same period in 2009, a decrease of \$4,216,000 or 6.1%. Domestic sales for the Asphalt Group decreased \$18,693,000 or 29.5% in the second quarter of 2010 compared to the same period in 2009. International sales for the Asphalt Group increased \$14,477,000 or 235.3% in the second quarter of 2010 compared to the same period in 2009. Domestic sales were impacted by Congress's failure to renew the long-term federal highway funding legislation that expired in September 2009. The previous legislation expired in September 2009 and the highway fund operated under continuation bills at the previously approved funding levels until April 2010 when a new short-term bill funding the 2010 calendar year was passed. International sales increased primarily in Canada, the West Indies, Africa and South America while decreasing in Central America and Asia. Parts sales for the Asphalt Group increased 6.9% in the second quarter of 2010 compared to the same period in 2009.

Aggregate and Mining Group: Sales in this group were \$67,000,000 for the second quarter of 2010 compared to \$55,452,000 for the same period in 2009, an increase of \$11,548,000 or 20.8%. Domestic sales for the Aggregate and Mining Group increased \$11,281,000 or 50.0% in the second quarter of 2010 compared to the same period in 2009. The primary driver of this increase was increased road building activity during the second quarter of 2010 plus a 21.5% increase in parts sales. International sales for the Aggregate and Mining Group were relatively flat with 2009 increasing \$267,000 or 0.8% in the second quarter of 2010 compared to the same period in 2009. The increase in international sales occurred primarily in Canada, South America and Central America. These increases were offset by decreases in Asia, the Middle East, China and Africa.

Mobile Asphalt Paving Group: Sales in this group were \$47,231,000 for the second quarter of 2010 compared to \$36,859,000 for the same period in 2009, an increase of \$10,372,000 or 28.1%. Domestic sales for the Mobile Asphalt Paving Group increased \$5,093,000 or 17.4% in the second quarter of 2010 compared to the same period in 2009. The increase in domestic sales is primarily due to the federal stimulus package, which funded highway resurfacing projects. International sales for the Mobile Asphalt Paving Group increased \$5,279,000 or 70.1% in the second quarter of 2010 compared to the same period in 2009, due partially to the adoption of infrastructure stimulus plans by certain foreign countries. The increase internationally occurred primarily in Canada, Europe and Central America. Parts sales for this group decreased 1.2% in the second quarter of 2010 compared to the same period in 2009.

Underground Group: Sales in this group were \$13,636,000 for the second quarter of 2010 compared to \$17,145,000 for the same period in 2009, a decrease of \$3,509,000 or 20.5%. Domestic sales for the Underground Group increased

\$433,000 or 5.3% in the second quarter of 2010 compared to the same period in 2009. International sales for the Underground Group decreased \$3,942,000 or 44.0% in the second quarter of 2010 compared to the same period in 2009. The decrease in international sales occurred in Canada and the Middle East. The decrease in international sales is primarily due to weakness in pipeline and utility construction in certain foreign markets. Parts sales for the Underground Group increased 18.1% in the second quarter of 2010 compared to the same period in 2009.

Other Group: Sales for the Other Group were \$16,020,000 for the second quarter of 2010 compared to \$9,809,000 for the same period in 2009, an increase of \$6,211,000 or 63.3%. Domestic sales for the Other Group, which are primarily generated by Peterson Pacific Corp., increased \$1,925,000 or 33.5% in the second quarter of 2010 compared to the same period in 2009. This increase is due primarily to the strength of the domestic economy during the second quarter of 2010 as compared to the second quarter of 2009. International sales for the Other Group increased \$4,286,000 or 105.4% in the second quarter of 2010 compared to the same period in 2009. This increase occurred in Australia and was offset by declines in Europe, Canada, China and South America. Parts sales for the Other Group increased 13.2% in the second quarter of 2010 compared to the same period in 2009.

Net Sales (in thousands):

	Six Months Ended June 30,		\$ Change	% Change	
	2010	2009			
Asphalt Group	\$135,423	\$152,829	\$(17,406)	(11.4	%)
Aggregate and Mining Group	125,919	107,029	18,890	17.6	%
Mobile Asphalt Paving Group	89,314	68,263	21,051	30.8	%
Underground Group	22,563	37,391	(14,828)	(39.7	%)
Other Group	29,485	28,636	849	3.0	%

Asphalt Group: Sales in this group were \$135,423,000 for the first six months of 2010 compared to \$152,829,000 for the same period in 2009, a decrease of \$17,406,000 or 11.4%. Domestic sales for the Asphalt Group decreased \$24,554,000 or 19.1% in the first six months of 2010 compared to the same period in 2009. International sales for the Asphalt Group increased \$7,148,000 or 29.5% in the first six months of 2010 compared to the same period in 2009. Domestic sales were impacted by Congress's failure to renew the long-term federal highway funding legislation that expired in September 2009. The highway fund operated under continuation bills at the previously approved funding levels until April 2010 when a new short-term bill funding the 2010 calendar year was passed. International sales increased primarily in South America, the West Indies, Central America, Canada and Africa while decreasing in Europe, the Middle East and Asia. Parts sales for the Asphalt Group increased 12.6% in the first six months of 2010 compared to the same period in 2009.

Aggregate and Mining Group: Sales in this group were \$125,919,000 for the first six months of 2010 compared to \$107,029,000 for the same period in 2009, an increase of \$18,890,000 or 17.6%. Domestic sales for the Aggregate and Mining Group increased \$10,285,000 or 22.3% in the first six months of 2010 compared to the same period in 2009. The primary driver of this increase was increased road building activity due to the federal stimulus plan plus a 22.2% increase in parts sales. International sales for the Aggregate and Mining Group increased \$8,605,000 or 14.1% in the first six months of 2010 compared to the same period in 2009. This increase was primarily due to strengthening in the construction and mining markets globally. The increase in international sales occurred primarily in Canada, Africa, South America and Central America. These increases were offset by decreases in Asia, the West Indies and China.

Mobile Asphalt Paving Group: Sales in this group were \$89,314,000 for the first six months of 2010 compared to \$68,263,000 for the same period in 2009, an increase of \$21,051,000 or 30.8%. Domestic sales for the Mobile Asphalt Paving Group increased \$13,145,000 or 23.1% in the first six months of 2010 compared to the same period in 2009. The increase in domestic sales is primarily due to the federal stimulus package, which funded highway resurfacing projects. International sales for the Mobile Asphalt Paving Group increased \$7,906,000 or 69.9% in the first six months of 2010 compared to the same period in 2009, due partially to the adoption of infrastructure stimulus plans by foreign countries. The increase internationally occurred primarily in Canada, Europe and Central America. Parts sales for this group increased 6.4% in the first six months of 2010 compared to the same period in 2009.

Underground Group: Sales in this group were \$22,563,000 for the first six months of 2010 compared to \$37,391,000 for the same period in 2009, a decrease of \$14,828,000 or 39.7%. Domestic sales for the Underground Group decreased \$4,626,000 or 26.1% in the first six months of 2010 compared to the same period in 2009. The primary reason for this decline is the continuing weak domestic residential and commercial construction markets. International sales for the Underground Group decreased \$10,203,000 or 51.9% in the first six months of 2010 compared to the same period in 2009. The decrease in international sales occurred in the Middle East, Canada, Africa and Asia. The decrease in international sales is primarily due to weakness in pipeline and utility construction in those certain foreign markets. Parts sales for the Underground Group decreased 9.1% in the first six months of 2010 compared to the same period in 2009.

Other Group: Sales for the Other Group were \$29,485,000 for the first six months of 2010 compared to \$28,636,000 for the same period in 2009, an increase of \$849,000 or 3.0%. Domestic sales for the Other Group, which are primarily generated by Peterson Pacific Corp., increased \$3,309,000 or 27.9% in the first six months of 2010 compared to the same period in 2009. This increase is due primarily to chipper sales used to reduce biomass for renewable energy. International sales for the Other Group decreased \$2,460,000 or 14.7% in the first six months of 2010 compared to the same period in 2009. This decrease occurred in Europe, China and Australia. Parts sales for the Other Group increased 5.4% in the first six months of 2010 compared to the same period in 2009.

Segment Profit (Loss) (in thousands):

	Three Months Ended		\$ Change	% Change	
	2010	2009			
Asphalt Group	\$7,574	\$11,281	\$(3,707)	(32.9)	%
Aggregate and Mining Group	4,973	3,949	1,024	25.9	%
Mobile Asphalt Paving Group	6,264	4,346	1,918	44.1	%
Underground Group	(1,901)	(4,241)	2,340	55.2	%
Other Group	(6,069)	(6,978)	909	13.0	%

Asphalt Group: Segment profit for this group was \$7,574,000 for the second quarter of 2010 compared to \$11,281,000 for the same period in 2009, a decrease of \$3,707,000 or 32.9%. The decreased profit for this segment resulted from

the 6.1% decline in sales during the periods, coupled with a decline in gross margin percent due primarily to an increase in unabsorbed overhead and slightly increased discounting on some customer orders.

Aggregate and Mining Group: Segment profit for this group was \$4,973,000 for the second quarter of 2010 compared to \$3,949,000 for the same period in 2009, an increase of \$1,024,000 or 25.9%. This group had an increase of \$1,947,000 in gross profit during the second quarter of 2010 compared to the same quarter in 2009, primarily provided by the 20.8% increase in sales during the second quarter of 2010 compared to the second quarter of 2009. Parts sales increased 21.5% for the quarter and overhead absorption was improved.

Mobile Asphalt Paving Group: Segment profit for this group was \$6,264,000 for the second quarter of 2010 compared to \$4,364,000 in 2009, an increase of \$1,918,000 or 44.1%. The primary reason for the increase in profit was an increase in sales of 28.1% during the second quarter of 2010 compared to the second quarter of 2009, coupled with increased gross margins. The sales increase was primarily the result of the federal government's stimulus package.

Underground Group: This group had a segment loss of \$1,901,000 in the second quarter of 2010 compared to a loss of \$4,241,000 in the second quarter of 2009 for an improvement of \$2,340,000 or 55.2%. The primary drivers of this improvement were a \$1,646,000 reduction in selling, general, administrative and engineering expenses and a 480 basis point improvement in gross margins due primarily to continuing cost containment efforts.

Other Group: The Other Group had a segment loss of \$6,069,000 in the second quarter of 2010 compared to a loss of \$6,978,000 in the second quarter of 2009 for an improvement of \$909,000 or 13.0%. The primary reasons for the decreased loss were a \$1,238,000 improvement in gross margins due to increased sales of 63.3% and a decrease in selling, general, administrative and engineering expenses of \$1,118,000 for the second quarter of 2010 compared to the same period in 2009, offset by increased income taxes of \$1,091,000 due to increased consolidated pretax profits.

Segment Profit (Loss) (in thousands):

	Six Months Ended		\$ Change	% Change	
	2010	2009			
Asphalt Group	\$20,369	\$23,280	\$(2,911)	(12.5)	%
Aggregate and Mining Group	7,795	5,721	2,074	36.3	%
Mobile Asphalt Paving Group	11,475	6,351	5,124	80.7	%
Underground Group	(5,443)	(6,582)	1,139	17.3	%
Other Group	(13,579)	(13,814)	235	1.7	%

Asphalt Group: Segment profit for this group was \$20,369,000 for the first six months of 2010 compared to \$23,280,000 for the same period in 2009, a decrease of \$2,911,000 or 12.5%. The reduction in profits between periods directly resulted from the related 11.4% reduction in sales during the periods, increased unabsorbed overhead and slightly increased discounting on some customer orders. These reductions were partially offset by an increase in parts sales.

Aggregate and Mining Group: Segment profit for this group was \$7,795,000 for the first six months of 2010 compared to \$5,721,000 for the same period in 2009, an increase of \$2,074,000 or 36.3%. The increase resulted from a 17.6% increase in sales, including a significant increase in parts sales, and an improvement in overhead utilization.

Mobile Asphalt Paving Group: Segment profit for this group was \$11,475,000 for the first six months of 2010 compared to \$6,351,000 in 2009, an increase of \$5,124,000 or 80.7%. The primary reasons for the increase in profit were an increase in sales of 30.8% during the first six months of 2010 compared to the first six months of 2009, as well as a 300 basis point increase in gross margins. An increase in parts sales and an improvement in overhead utilization also attributed to the improved profits.

Underground Group: This group had a segment loss of \$5,443,000 in the first six months of 2010 compared to a loss of \$6,582,000 in the first six months of 2009, an improvement of \$1,139,000 or 17.3%. The primary driver in the improvement between periods was a reduction in SGA & Engineering expenses of \$3,236,000 offset by the impact of a 39.7% reduction in sales including a reduction in parts sales and increased unabsorbed overhead.

Other Group: The Other Group had a segment loss of \$13,579,000 in the first six months of 2010 compared to a loss of \$13,814,000 in the first six months of 2009 for an improvement of \$235,000 or 1.7%.

Liquidity and Capital Resources

The Company's primary sources of liquidity and capital resources are its cash on hand, investments, borrowing capacity under a \$100 million revolving credit facility and cash flows from operations. The Company had \$81,989,000 of cash available for operating purposes at June 30, 2010. In addition, the Company had no borrowings outstanding under its credit facility with Wachovia Bank, National Association ("Wachovia") at June 30, 2010 as discussed further below. Net of letters of credit of \$7,999,000, the Company had borrowing availability of \$92,001,000 under the credit facility as of June 30, 2010.

During April 2007, the Company entered into an unsecured credit agreement with Wachovia whereby Wachovia has extended to the Company an unsecured line of credit of up to \$100,000,000 including a sub-limit for letters of credit of up to \$15,000,000.

The Wachovia credit facility had an original term of three years with two one-year extensions available. Early in 2010, the Company exercised the final extension bringing the new loan maturity date to May 2012. The interest rate for borrowings is a function of the Adjusted LIBOR Rate or Adjusted LIBOR Market Index Rate, as defined, as elected by the Company, plus a margin based upon a leverage ratio pricing grid ranging between 0.5% and 1.5%. As of June 30, 2010, the applicable margin based upon the leverage ratio pricing grid was equal to 0.5%. The unused facility fee is 0.125%. The Wachovia credit facility requires no principal amortization and interest only payments are due, in the case of loans bearing interest at the Adjusted LIBOR Market Index Rate, monthly in arrears and, in the case of loans bearing interest at the Adjusted LIBOR Rate, at the end of the applicable interest period. The Wachovia credit agreement contains certain financial covenants, including a minimum fixed charge coverage ratio, minimum tangible net worth and maximum allowed capital expenditures. The Company was in compliance with the covenants under its credit facility as of June 30, 2010.

The Company's South African subsidiary, Osborn Engineered Products SA (Pty) Ltd. ("Osborn"), has available a credit facility of approximately \$7,849,000 (ZAR 60,000,000) to finance short-term working capital needs, as well as to cover letter of credit performance, advance payment and retention guarantees. As of June 30, 2010, Osborn had no outstanding borrowings under the credit facility, but approximately \$3,369,000 in performance, advance payment and retention bonds were issued under the facility. The facility is secured by Osborn's buildings and improvements, accounts receivable, cash balances and a \$2,000,000 letter of credit issued by the parent Company. As of June 30, 2010, Osborn had available credit under the facility of approximately \$4,480,000. The facility has an ongoing, indefinite term subject to annual reviews by the bank. The agreement has an unused facility fee of 0.793%.

The Company's Australian subsidiary, Astec Australia Pty Ltd ("Astec Australia") has an available credit facility to finance short-term working capital needs of approximately \$2,386,000 (AUD 2,800,000) to finance foreign exchange dealer limit orders of approximately \$2,131,000 (AUD 2,500,000) and to provide bank guarantees to others of approximately \$170,000 (AUD 200,000). The facility is secured by a \$2,500,000 letter of credit issued by the parent Company. No amounts were outstanding under the credit facility at June 30, 2010.

Cash Flows from Operating Activities (in thousands):

	Six Months Ended		Increase/ (Decrease)
	June 30, 2010	June 30, 2009	
Net income	\$ 19,162	\$ 15,172	\$ 3,990
Non-cash items in net income, net	19,069	17,641	1,428
Changes in working capital:			
(Increase) decrease in receivables	(16,517)	(12,367)	(4,150)
(Increase) decrease in inventories	20,115	16,665	3,450
(Increase) decrease in prepaid expenses	8,335	3,172	5,163
Increase (decrease) in accounts payable	1,081	(13,791)	14,872
Increase (decrease) in customer deposits	1,516	(18,925)	20,441
Increase (decrease) in other accrued liabilities	(1,875)	(3,492)	1,617
Other, net	(5,797)	(5,815)	18
Net cash provided (used) by operating activities	\$ 45,089	\$ (1,740)	\$ 46,829

For the first six months of 2010, net cash provided by operating activities increased \$46,829,000 as compared to the same period in 2009. The primary reasons for the increase in operating cash flows are an increase in cash provided by accounts payable of \$14,872,000 and prepaid expenses of \$5,163,000 as well as an improvement in customer deposits during the respective periods of \$20,441,000. These positive cash changes were offset by an increase in cash used by receivables of \$4,150,000. These changes in operating cash flows reflect increased sales and production activity during the first six months of 2010 compared to the first six months of 2009.

Cash Flows from Investing Activities (in thousands):

	Six Months Ended		Increase/ (Decrease)
	June 30, 2010	June 30, 2009	
Expenditures for property and equipment	\$ (3,759)	\$ (8,966)	\$ 5,207
Other, net	71	103	(32)
Net cash used by investing activities	\$ (3,688)	\$ (8,863)	\$ 5,175

Net cash used by investing activities in the first six months of 2010 decreased \$5,175,000 compared to the same period in 2009 due to reductions in cash used for capital expenditures of \$5,207,000.

Capital expenditures for 2010 are forecasted to total \$15,291,000. The Company expects to finance these expenditures using currently available cash balances, internally generated funds and available credit under the Company's credit facility. Capital expenditures are generally for machinery, equipment and facilities used by the Company in the production of its various products.

Cash Flows from Financing Activities (in thousands):

	Six Months Ended		Increase/ (Decrease)
	June 30, 2010	June 30, 2009	
Net borrowings under revolving line of credit	\$-	\$ 8,482	\$ (8,482)
Other, net	956	210	746
Net cash provided by financing activities	\$ 956	\$ 8,692	\$ (7,736)

Cash provided by financing activities decreased \$7,736,000 in the first six months of 2010 compared to the same period in 2009. During the first six months of 2009, the Company borrowed \$8,482,000 against its revolving line of credit. The Company repaid these borrowings prior to December 31, 2009 and had no similar borrowings during the first half of 2010.

The Company believes that its current working capital, cash flows generated from future operations and available capacity under its credit facilities will be sufficient to meet the Company's working capital and capital expenditure requirements through June 30, 2011.

Financial Condition

The Company's current assets increased to \$409,209,000 at June 30, 2010 from \$384,365,000 at December 31, 2009, an increase of \$24,844,000, or 6.5%. The increase is primarily attributable to an increase in cash and cash equivalents of \$41,560,000 combined with an increase in trade receivables of \$16,355,000. These increases were offset by decreases in prepaid expenses and other of \$8,789,000 and inventory of \$24,269,000. Trade receivables increased due to an increase in sales of \$31,387,000 in the second quarter of 2010 compared to the fourth quarter of 2009. Prepaid expenses and other decreased due to decreases in prepaid federal and state income taxes of \$6,059,000 and prepaid insurance of \$1,844,000. The reduction in inventory is due to the Company's efforts to improve inventory turns.

The Company's current liabilities increased \$4,192,000 from \$106,307,000 at December 31, 2009 to \$110,499,000 at June 30, 2010. The increase is primarily attributable to increases in accrued payroll and related liabilities of \$1,876,000, customer deposits of \$1,516,000 and accounts payable of \$1,081,000.

Market Risk and Risk Management Policies

We have no material changes to the disclosure on this matter made in our Annual Report on Form 10-K for the year ended December 31, 2009.

Off-balance Sheet Arrangements

As of June 30, 2010, the Company does not have any off-balance sheet arrangements as defined by Item 303(a)(4) of Regulation S-K.

Seasonality

The Company's businesses are subject to the effects of seasonality. Consequently, the operating results for the three and six-month periods ended June 30, 2010 for each business segment, and for the Company as a whole, are not necessarily indicative of results to be expected for the full year. Based upon historical results of the past several years, 51% to 55% of the Company's annual revenues typically occur during the first six months of the year. During the usual seasonal trend, the first three quarters of the year are the Company's stronger quarters for sales volume, with the fourth quarter normally being the weakest quarter.

Contractual Obligations

During the three months ended June 30, 2010, there were no substantial changes in our commitments or contractual liabilities.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We have no material changes to the disclosure on this matter made in our Annual Report on Form 10-K for the year ended December 31, 2009.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. The Company's principal executive officer and principal financial officer have evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, the Company's principal

executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective.

Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) under the Exchange Act) that occurred during the quarter ended June 30, 2010 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved from time to time in legal actions arising in the ordinary course of our business. Other than as set forth in Part I, "Item 3. Legal Proceedings" in our Annual Report on Form 10-K for the year ended December 31, 2009, we currently have no pending or threatened litigation that we believe will result in an outcome that would materially affect our business. Nevertheless, there can be no assurance that future litigation to which we become a party will not have a material adverse effect on our business.

Item 1A. Risk Factors

In addition to the other information set forth in this Report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2009, which could materially affect our business, financial condition or future results. There have been no material changes in our risk factors from those disclosed in our Annual Report on Form 10-K for the year ended December 31, 2009. The risks described in our Annual Report on Form 10-K for the year ended December 31, 2009 and in this Quarterly Report on Form 10-Q are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or operating results.

Item 6. Exhibits

Exhibit

No.	Description
31.1	Certification of the Chief Executive Officer pursuant to Rule 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934, as amended, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of the Chief Financial Officer pursuant to Rule 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934, as amended, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32*	Certification of Chief Executive Officer and Chief Financial Officer pursuant to Rule 13a-14(b)/15d-14(b) of the Securities Exchange Act of 1934, as amended, and 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
