ENCORE WIRE CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

June 30, 2017

NOTE 1 – BASIS OF PRESENTATION

The unaudited consolidated financial statements of Encore Wire Corporation (the “Company”) have been prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) for interim information and the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete annual financial statements. In the opinion of management, all adjustments, consisting only of normal recurring adjustments considered necessary for a fair presentation, have been included. Results of operations for interim periods presented do not necessarily indicate the results that may be expected for the entire year. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2016.

Recent Accounting Pronouncements

The Financial Accounting Standards Board (the “FASB”) Accounting Standards Codification (“ASC”) is the sole source of authoritative U.S. GAAP other than Securities and Exchange Commission (“SEC”) issued rules and regulations that apply only to SEC registrants. The FASB issues an Accounting Standard Update (“ASU”) to communicate changes to the codification. The Company considers the applicability and impact of all ASUs. The followings are those ASUs that are relevant to the Company.

In March 2016, the FASB issued ASU 2016-09, “Compensation - Stock Compensation (Topic 718),” to simplify several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and forfeitures, as well as classification in the statement of cash flows. ASU 2016-09 became effective for the Company on January 1, 2017. The standard did not have a material impact on the Company’s consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, “Revenue from Contracts with Customers (Topic 606),” which supersedes the revenue recognition requirements in ASC Topic 605, “Revenue Recognition,” and most industry-specific guidance. This ASU is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments, and assets recognized from costs incurred to obtain or fulfill a contract. We are currently evaluating the provisions of this ASU and assessing the impact, if any, that it may have on our financial position and results of operations. As part of our assessment work to date, our team has taken training of the new ASU’s five-step revenue recognition model, formed a project assessment and adoption team and completed an initial revenue stream scoping analysis. Under our current accounting policy (as described in Note 1 of our 2016 Form 10-K), we recognize revenue when title and risk of loss pass to the customer and collectability is reasonably assured. We are continuing our assessment of sales and related contract terms and assessing the impact on the consolidated financial statements upon adoption of the new standard. The standard is effective for annual and interim periods beginning January 1, 2018. We currently expect to apply the modified retrospective method of adoption at that time and do not expect the standard to materially impact our financial statements.

NOTE 2 – INVENTORIES

Inventories are stated at the lower of cost, determined by the last-in, first-out (LIFO) method, or market. Inventories consist of the following:

Table of Contents

In Thousands	June 30, 2017	December 31, 2016
Raw materials	\$24,796	\$23,144
Work-in-process	22,006	20,889
Finished goods	85,179	81,764
Total Inventory at FIFO cost	131,981	125,797
Adjust to LIFO cost	(36,523)	(32,523)
Inventory, net	\$95,458	\$93,274

LIFO pools are established at the end of each fiscal year. During the first three quarters of every year, LIFO calculations are based on the inventory levels and costs at that time. Accordingly, interim LIFO balances will fluctuate depending on those inventory levels and costs.

In the second quarter of 2017, LIFO adjustments were recorded, decreasing cost of sales by \$0.4 million, versus LIFO adjustments decreasing cost of sales by \$3.1 million in the second quarter of 2016. In the first six months of 2017, LIFO adjustments were recorded, increasing cost of sales by \$4.0 million, versus LIFO adjustments decreasing cost of sales by \$0.9 million in the first six months of 2016.

During the first six months of 2017 and 2016, the Company liquidated portions of the LIFO inventory layer in the aluminum wire pool established in prior years. These liquidations had an insignificant effect on the net income of the Company.

NOTE 3 – ACCRUED LIABILITIES

Accrued liabilities consist of the following:

In Thousands	June 30, 2017	December 31, 2016
Sales rebates payable	\$13,474	\$13,590
Property taxes payable	2,005	3,932
Accrued salaries	4,715	6,198
Other accrued liabilities	4,785	4,266
Total accrued liabilities	\$24,979	\$27,986

NOTE 4 – INCOME TAXES

Income taxes were accrued at an effective rate of 34.0% in the second quarter of 2017 versus 34.3% in the second quarter of 2016, consistent with the Company's estimated liabilities. For the six months ended June 30, the Company's tax rate was approximately 33.7% in 2017 and 33.6% in 2016. The differences between the provisions for income taxes and the income taxes computed using the federal income tax statutory rate are due to changes in the proportional effects of permanent differences between transactions reported for financial reporting and tax purposes, primarily the domestic production activity deduction.

NOTE 5 – EARNINGS PER SHARE

Earnings per common and common equivalent share are computed using the weighted average number of shares of common stock and common stock equivalents outstanding during each period. If dilutive, the effect of stock options, treated as common stock equivalents, is calculated using the treasury stock method.

The following table sets forth the computation of basic and diluted earnings per share:

Table of Contents

In Thousands	Quarter Ended		Six Months	
	June 30, 2017	2016	Ended June 30, 2017	2016
Numerator:				
Net income	\$10,933	\$7,839	\$24,565	\$16,438
Denominator:				
Denominator for basic earnings per share – weighted average shares	20,751	20,694	20,745	20,691
Effect of dilutive securities:				
Employee stock options	84	71	89	65
Denominator for diluted earnings per share – weighted average shares	20,835	20,765	20,834	20,756

The weighted average of employee stock options excluded from the determination of diluted earnings per common and common equivalent share for the second quarter was 129,000 in 2017 and 129,000 in 2016. The weighted average of employee stock options excluded from the determination of diluted earnings per common and common equivalent share for the six months ended June 30 was 121,445 in 2017 and 157,850 in 2016. Such options were anti-dilutive for their respective periods.

NOTE 6 – DEBT

The Company is party to a Credit Agreement (the “Credit Agreement”) with two banks, Bank of America, N.A., as administrative agent and letter of credit issuer, and Wells Fargo Bank, National Association, as syndication agent. The Credit Agreement, as amended, extends through October 1, 2021 and provides for maximum borrowings of \$150.0 million. At our request, and subject to certain conditions, the commitments under the Credit Agreement may be increased by a maximum of up to \$100.0 million as long as existing or new lenders agree to provide such additional commitments. Borrowings under the line of credit bear interest, at the Company’s option, at either (1) LIBOR plus a margin that varies from 0.875% to 1.75% depending upon the Leverage Ratio (as defined in the Credit Agreement), or (2) the base rate (which is the highest of the federal funds rate plus 0.5%, the prime rate, or LIBOR plus 1.0%) plus 0% to 0.25% (depending upon the Leverage Ratio). A commitment fee ranging from 0.15% to 0.30% (depending upon the Leverage Ratio) is payable on the unused line of credit. At June 30, 2017, there were no borrowings outstanding under the Credit Agreement, and letters of credit outstanding in the amount of \$1.3 million left \$148.7 million of credit available under the Credit Agreement. Obligations under the Credit Agreement are the only contractual borrowing obligations or commercial borrowing commitments of the Company.

Obligations under the Credit Agreement are unsecured and contain customary covenants and events of default. The Company was in compliance with the covenants as of June 30, 2017.

NOTE 7 – STOCKHOLDERS’ EQUITY

On November 10, 2006, the Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to an authorized number of shares of its common stock on the open market or through privately negotiated transactions at prices determined by the President of the Company during the term of the program. The Company’s Board of Directors has authorized several increases and annual extensions of this stock repurchase program, and, as of June 30, 2017, 1,132,946 shares remained authorized for repurchase through March 31, 2018. The Company did not repurchase any shares of its stock in the six months ended June 30, 2017 or 2016. There were no changes to stockholders’ equity for the six months ended June 30, 2017 and 2016 other than net income, the declaration of dividends, and the issuance of immaterial amounts of shares of common stock.

NOTE 8 - CONTINGENCIES

The Company is from time to time involved in litigation, certain other claims and arbitration matters arising in the ordinary course of its business. The Company accrues for a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Significant judgment is required in both the

determination of the probability of a loss and the determination as to whether a loss is reasonably estimable. Any such accruals are reviewed at least quarterly and adjusted to reflect the effects of negotiations, settlements, rulings, advice of legal counsel and technical experts and other information and

Table of Contents

events pertaining to a particular matter. To the extent there is a reasonable possibility (within the meaning of ASC 450) that probable losses could exceed amounts already accrued, if any, and the additional loss or range of loss is able to be estimated, management discloses the additional loss or range of loss.

For matters where the Company has evaluated that a loss is not probable, but is reasonably possible, the Company will disclose an estimate of the possible loss or range of loss or make a statement that such an estimate cannot be made. In some instances, for reasonably possible losses, the Company cannot estimate the possible loss or range of loss. The nature and progression of litigation can make it difficult to predict the impact a particular lawsuit will have on the Company. There are many reasons that the Company cannot make these assessments, including, among others, one or more of the following: the early stages of a proceeding; damages sought that are unspecified, unsupported, unexplained or uncertain; discovery is incomplete; the complexity of the facts that are in dispute; the difficulty of assessing novel claims; the parties not having engaged in any meaningful settlement discussions; the possibility that other parties may share in any ultimate liability; and/or the often slow pace of litigation.

On July 7, 2009, Southwire Company, a Delaware corporation (“Southwire”), filed a complaint for patent infringement against the Company and Cerro Wire, Inc. (“Cerro”) in the United States District Court for the Eastern District of Texas. In the complaint, Southwire alleged that the Company infringed one or more claims of United States Patent No. 7,557,301 (the “301 Patent”), entitled “Method of Manufacturing Electrical Cable Having Reduced Required Force for Installation,” by making and selling electrical cables, including the Company’s Super Slick cables. The case has been transferred to the Northern District of Georgia and the parties have agreed to stay it pending reexamination of the 301 Patent by the United States Patent and Trademark Office. One reexamination proceeding - a reexamination request by Cerro - remains pending. In that reexamination, the examiner rejected all the claims, and the Patent Trial and Appeal Board affirmed the examiner’s rejection. Southwire appealed the decision to the Federal Circuit, and that appeal is ongoing.

The potentially applicable factual and legal issues related to the above claims asserted against the Company have not been resolved. The Company disputes all of Southwire’s claims and alleged damages and intends to vigorously defend the lawsuits and vigorously pursue its own claims against Southwire if and when the litigation resumes.

At this time, given the status of the proceedings, the complexities of the facts in dispute and the multiple claims involved, the Company has not concluded that a probable loss exists with respect to the Southwire litigation. Accordingly, no accrual has been made. Additionally, given the aforementioned uncertainties, while it is reasonably possible that we may incur a loss, the Company is unable to estimate any possible loss or range of losses for disclosure purposes.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Encore believes it is a low-cost manufacturer of electrical building wire and cable. The Company is a significant supplier of building wire for interior electrical wiring in commercial and industrial buildings, homes, apartments, and manufactured housing.

The Company’s operating results in any given period are driven by several key factors, including the volume of product produced and shipped, the cost of copper and other raw materials, the competitive pricing environment in the wire industry and the resulting influence on gross margin and the efficiency with which the Company’s plants operate during the period, among others. Price competition for electrical wire and cable is intense, and the Company sells its products in accordance with prevailing market prices. Copper, a commodity product, is the principal raw material used by the Company in manufacturing its products. Copper accounted for approximately 65.2%, 72.1%, and 74.7% of the Company’s cost of goods sold during fiscal 2016, 2015 and 2014, respectively. The price of copper fluctuates depending on general economic conditions and in relation to supply and demand and other factors, which causes monthly variations in the cost of the Company’s purchased copper. Additionally, the SEC allows shares of certain physically backed copper exchange-traded funds (“ETFs”) to be listed and publicly traded. Such funds and other copper ETFs like them hold copper cathode as collateral against their shares. The acquisition of copper cathode by copper

ETFs may materially decrease or interrupt the availability of copper for immediate delivery in the United States, which could materially increase the Company's cost of copper. In addition to rising copper prices and potential supply shortages, we believe that ETFs and similar copper-backed derivative products could lead to increased price volatility for copper. The Company cannot predict copper prices or the effect of fluctuations in the cost of copper on the Company's future operating results. Wire prices can, and frequently do, change on a daily basis. This competitive pricing market for wire does not always mirror changes in copper prices, making margins highly volatile. Aluminum wire sales represented 9.9% and 10.3% of net sales in 2015 and 2016, respectively. Historically, the cost of aluminum has been much lower than copper and also less volatile. With the volatility of both raw material prices and wire prices in the Company's end market, hedging raw materials can be risky. Historically, the Company has not engaged in hedging strategies for raw material purchases. The tables below highlight the range of closing prices of copper on the Comex exchange for the periods shown.

COMEX COPPER CLOSING PRICE 2016

	April 2016	May 2016	June 2016	Quarter Six Ended June 30, 2016	Months Ended June 30, 2016
High	\$2.28	\$2.26	\$2.19	\$ 2.28	\$ 2.29
Low	2.07	2.06	2.03	2.03	1.94
Average	2.18	2.11	2.10	2.13	2.12

The following discussion and analysis relates to factors that have affected the operating results of the Company for the quarters and six months ended June 30, 2017 and 2016. Reference should also be made to the audited financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

Results of Operations

Quarter Ended June 30, 2017 Compared to Quarter Ended June 30, 2016

Net sales were \$291.5 million in the second quarter of 2017 compared to \$238.8 million in the second quarter of 2016. This 22.1% increase in net sales is primarily the result of a 23.5% increase in copper wire sales, driven by a 14.4% increase in the average selling price of copper wire and an 8.0% increase in copper wire unit volume shipped. Additionally, there was an 8.9% increase in aluminum wire sales, driven by a 12.7% increase in aluminum wire unit volume shipped, offset somewhat by a 3.4% decrease in the average selling price of aluminum wire. Unit volume is measured in pounds of copper or aluminum contained in the wire shipped during the period. Fluctuations in sales prices are primarily a result of changing copper and other raw material prices and product price competition. The average cost per pound of raw copper purchased increased 19.2% in the second quarter of 2017 compared to the second quarter of 2016, and was the principal driver of the increased average sales price of copper wire. In the second quarter of 2017, aluminum building wire constituted 8.7% of the Company's net sales dollars compared to 9.8% in the second quarter of 2016.

Cost of goods sold was \$255.7 million, or 87.7% of net sales, in the second quarter of 2017, compared to \$210.2 million, or 88.0% of net sales, in the second quarter of 2016. Gross profit increased to \$35.9 million, or 12.3% of net sales, in the second quarter of 2017 versus \$28.6 million, or 12.0% of net sales, in the second quarter of 2016.

The increase in gross profit margin percentage was driven primarily by increased spreads. The spread between the average price paid for a pound of raw copper and the average sales price for a pound of copper contained in finished wire increased 5.5% in the second quarter of 2017 versus the second quarter of 2016. The spread increased as a result of the average sales price per copper pound sold increasing 14.4% while the per pound cost of raw copper increased 19.2%. The aluminum wire spread decreased 14.6% in the same quarterly comparison. The percentage change on sales is on a higher nominal dollar amount than on purchases and, therefore, spreads change on a nominal dollar basis. The margin changes were due primarily to the competitive pricing environment in the industry. It appears that the industry consolidation of a copper competitor that took place last year and damaged margins in the second and third quarters of 2016 may be resolving itself. On the aluminum side, however, there are a couple of small competitors importing aluminum wire and selling it at below market prices. We understand that the government is looking into this import activity. We also have a financially stressed competitor who appears to readily follow these low-price

competitors. We believe both of these factors have contributed to the unsettled pricing environment and impacted our aluminum spreads negatively.

Total raw materials cost, including the LIFO adjustment, increased to 75.7% of net sales in the second quarter of 2017, from 73.3% of net sales in the second quarter of 2016. Lower overhead costs as a percentage of net sales, offset somewhat by this increase in total raw materials cost as a percentage of net sales, resulted in the increased gross profit margin percentage. Overheads contained some fixed and semi-fixed components which will fluctuate as a percentage of sales when sales dollars vary.

Table of Contents

Inventories are stated at the lower of cost, using the last-in, first out (LIFO) method, or market. The Company maintains two inventory pools for LIFO purposes. As permitted by U.S. generally accepted accounting principles, the Company maintains its inventory costs and cost of goods sold on a first-in, first-out (FIFO) basis and makes a monthly adjustment to adjust total inventory and cost of goods sold from FIFO to LIFO. The Company applies the lower of cost or market (LCM) test by comparing the LIFO cost of its raw materials, work-in-process and finished goods inventories to estimated market values, which are based primarily upon the most recent quoted market price of copper, aluminum and finished wire prices as of the end of each reporting period. The Company performs a lower of cost or market calculation quarterly. As of June 30, 2017, no LCM adjustment was required. However, decreases in copper and other material prices could necessitate establishing an LCM reserve in future periods. Additionally, future reductions in the quantity of inventory on hand could cause copper or other raw materials that are carried in inventory at costs different from the cost of copper and other raw materials in the period in which the reduction occurs to be included in costs of goods sold for that period at the different price.

Due primarily to increases in copper costs, partially offset by price and volume movements of other materials, a LIFO adjustment was recorded, decreasing cost of sales by \$0.4 million during the second quarter of 2017. During the second quarter of 2016, a LIFO adjustment was recorded, decreasing cost of sales by \$3.1 million.

Selling expenses, consisting of commissions and freight, for the second quarter of 2017 were \$14.1 million, or 4.8% of net sales, compared to \$12.1 million, or 5.1% of net sales, in the second quarter of 2016. Commissions paid to independent manufacturers' representatives are paid as a relatively stable percentage of sales dollars and, therefore, exhibited little change in percentage terms. Freight costs as a percentage of net sales decreased to 2.3% of net sales in the second quarter of 2017 from 2.6% of net sales in the second quarter of 2016, primarily due to the increase in top line sales dollars as well as small changes in the mix of products sold, fuel costs and the geographical distribution of product sold. General and administrative expenses for the second quarter of 2017 were \$5.2 million, or 1.8% of net sales, compared to \$4.6 million, or 1.9% of net sales, in the second quarter of 2016. The Company did not record any bad debt expense during the second quarters of 2017 or 2016.

Six Months Ended June 30, 2017 Compared to Six Months Ended June 30, 2016

Net sales for the first six months of 2017 were \$570.9 million compared to net sales of \$464.4 million for the first six months of 2016. This 22.9% increase in net sales is primarily the result of a 24.9% increase in copper wire sales, driven by a 15.6% increase in the average selling price of copper wire, coupled with an 8.1% increase in copper wire unit volume shipped. Additionally, during the first six months of 2017 compared to the first six months of 2016, there was a 5.3% increase in aluminum wire sales, driven by a 10.3% increase in aluminum wire unit volume shipped, somewhat offset by a 4.5% decrease in the average selling price of aluminum wire. Unit volume is measured in pounds of copper or aluminum contained in the wire shipped during the period. Fluctuations in sales prices are primarily a result of changing copper and other raw material prices and product price competition. The average cost per pound of raw copper purchased increased 20.8% in the first six months of 2017 compared to the first six months of 2016, and was the principal driver of the increased average sales price of copper wire. In the first six months of 2017, aluminum building wire constituted 8.7% of the Company's net sales dollars compared to 10.1% in the first six months of 2016.

Cost of goods sold increased to \$495.8 million in the first six months of 2017, compared to \$405.6 million in the first six months of 2016. Gross profit increased to \$75.1 million, or 13.2% of net sales, in the first six months of 2017 versus \$58.8 million, or 12.7% of net sales, in the first six months of 2016.

The increase in gross profit margin percentage was primarily the result of an increase in the spread between the average price paid for a pound of raw copper and the average sale price for a pound of copper in the first six months of 2017 versus the first six months of 2016 due primarily to competitive industry pricing. Fluctuations in sales prices are primarily a result of changing copper raw material prices and product price competition. The copper spread increased 6.2% in the first six months of 2017 versus the first six months of 2016. The spread increased as a result of the 15.6% increase in the average sales price per copper pound sold while the per pound cost of raw copper increased 20.8%. In

nominal dollars, the sales price increased more than the cost of copper. Aluminum wire went in the opposite direction, with the spread decreasing 15.3% in the same year-to-date comparison.

Due primarily to increases in copper costs and a small decrease in copper inventory quantities on hand, aided somewhat by price and volume movements of other materials in the first six months of 2017, LIFO adjustments were recorded, increasing cost of sales by \$4.0 million. During the same period in 2016, LIFO adjustments were recorded, decreasing cost of sales by \$0.9 million. During the first six months of both 2017 and 2016, the Company liquidated a portion of the LIFO inventory layer in the aluminum wire pool established in prior years. The liquidation had an insignificant effect on the net income of the Company. Based on current copper prices, there is no LCM adjustment necessary. Future reductions in the price of copper could require the Company to record an LCM adjustment against the related inventory balance, which would result in a negative impact on net income.

Table of Contents

Selling expenses for the first six months of 2017 increased to \$27.6 million, or 4.8% of net sales, compared to \$23.3 million, or 5.0% of net sales, in the same period of 2016. Commissions paid to independent manufacturers' representatives are paid as a relatively stable percentage of sales dollars, and therefore, exhibited little change in percentage terms, increasing \$2.6 million in concert with the increased sales dollars. Freight costs for the first six months of 2017 decreased to 2.3% of net sales, versus 2.5% of net sales for the first six months of 2016. General and administrative expenses were \$10.5 million, or 1.8% of net sales, in the first half of 2017 compared to \$10.7 million, or 2.3% of net sales, in the first half of 2016. The Company did not record any bad debt expense during the first six months of 2017 and 2016.

Liquidity and Capital Resources

The Company maintains a substantial inventory of finished products to satisfy customers' delivery requirements promptly. As is customary in the building wire industry, the Company provides payment terms to most of its customers that exceed terms that it receives from its suppliers. Copper suppliers generally give very short payment terms (less than 15 days) while the Company and the building wire industry give customers much longer terms. In general, the Company's standard payment terms result in the collection of a significant majority of net sales within approximately 75 days of the date of invoice. As a result of this timing difference, building wire companies must have sufficient cash and access to capital resources to finance their working capital needs, thereby creating a barrier to entry for companies who do not have sufficient liquidity and capital resources. The two largest components of working capital, receivables and inventory, and to a lesser extent, capital expenditures, are the primary drivers of the Company's liquidity needs. Generally, these needs will cause the Company's cash balance to rise and fall inversely to the receivables and inventory balances. The Company's receivables and inventories will rise and fall in concert with several factors, most notably the price of copper and other raw materials and the level of unit sales. Capital expenditures have historically been necessary to expand and update the production capacity of the Company's manufacturing operations. The Company has historically satisfied its liquidity and capital expenditure needs with cash generated from operations and borrowings under its various debt arrangements. The Company historically uses its revolving credit facility to manage day to day operating cash needs as required by daily fluctuations in working capital, and has the facility in place should such a need arise in the future.

For more information on the Company's revolving credit facility, see Note 6 to the Company's consolidated financial statements included in Item 1 to this report, which is incorporated herein by reference.

Cash provided in operating activities was \$0.7 million in the first six months of 2017 compared to cash provided of \$24.1 million in the first six months of 2016. The following changes in components of cash flow from operations were notable. The Company had net income of \$24.6 million in the first six months of 2017 compared to net income of \$16.4 million in the first six months of 2016. Accounts receivable increased \$35.7 million in the first six months of 2017 compared to decreasing \$7.3 million in the first six months of 2016, resulting in a source of cash in 2016 and a use of cash in 2017, a net decrease of \$43.0 million in cash provided. Accounts receivable generally fluctuate in proportion to dollar sales and, to a lesser extent, are affected by the timing of when sales occur during a given quarter. With an average of 60 to 75 days of sales outstanding, quarters in which sales are more back-end loaded will have higher accounts receivable balances outstanding at quarter-end. Inventory value increased in the first six months of 2017, using cash of \$2.2 million versus a use of cash of \$0.3 million in the first six months of 2016, resulting in a negative swing in cash flow of \$1.9 million. Trade accounts payable and accrued liabilities provided cash of \$14.5 million in 2017 versus a \$13.2 million use of cash in 2016, resulting in a change in cash flow of \$27.7 million. In the first six months of 2017, changes in current and deferred taxes used cash of \$7.6 million versus cash provided of \$5.0 million in the first six months of 2016. These changes in cash flow were the primary drivers of the \$23.4 million decrease in cash provided by operations in the first six months of 2017 compared to the first six months of 2016. Cash used in investing activities decreased to \$10.2 million in the first six months of 2017 from \$21.5 million in the first six months of 2016. Cash used in financing activities consisted of \$0.8 million of cash dividends paid, partially offset by \$0.4 million of proceeds from exercised stock options. These changes in cash flow were the primary drivers of the \$0.4 million of cash used in financing activities for the first six months of 2017 versus \$0.6 million used in the first six months of 2016. As of June 30, 2017, the balance on the Company's revolving line of credit remained at zero. The Company's cash balance was \$85.9 million at June 30, 2017 versus \$81.1 million at June 30, 2016.

During the remainder of 2017, the Company expects its capital expenditures will consist primarily of expenditures related to the purchases of manufacturing equipment throughout its facilities to update equipment and address bottlenecks. The total capital expenditures for all of 2017 associated with these projects are currently estimated to be between \$30 million and \$35 million. The Company also expects its future working capital requirements to fluctuate as a result of changes in unit sales volumes and the price of copper and other raw materials. The Company believes that the current cash balance, cash flow from operations, and the financing available from its revolving credit facility will satisfy anticipated working capital and capital expenditure requirements during 2017.

Information Regarding Forward-Looking Statements

This quarterly report on Form 10-Q contains various “forward-looking statements” (within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended) and information that is based on management’s belief as well as assumptions made by and information currently available to management. The words “believes”, “estimates”, “anticipates”, “plans”, “seeks”, “expects”, “intends” and similar expressions identify some of the forward-looking statements. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct. Such statements are subject to certain risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those expected. Among the key factors that may have a direct bearing on the Company’s operating results are fluctuations in the economy and in the level of activity in the building and construction industry, demand for the Company’s products, the impact of price competition and fluctuations in the price of copper and other raw materials. For more information regarding “forward-looking statements” see “Information Regarding Forward-Looking Statements” in Part II, Item 7 of the Company’s Annual Report on Form 10-K for the year ended December 31, 2016, which is hereby incorporated by reference.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There have been no material changes from the information provided in Item 7A, “Quantitative and Qualitative Disclosures About Market Risk,” of the Company’s Annual Report on Form 10-K for the year ended December 31, 2016.

Item 4. Controls and Procedures.

The Company maintains controls and procedures designed to ensure that information required to be disclosed by it in the reports it files with or submits to the Securities and Exchange Commission (the “SEC”) is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and to ensure that information required to be disclosed by the Company in such reports is accumulated and communicated to the Company’s management, including the Chief Executive and Chief Financial Officers, as appropriate, to allow timely decisions regarding required disclosure. Based on an evaluation of the Company’s disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report conducted by the Company’s management, with the participation of the Chief Executive and Chief Financial Officers, the Chief Executive and Chief Financial Officers concluded that the Company’s disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports it files with or submits to the SEC is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and to ensure that information required to be disclosed by the Company in such reports is accumulated and communicated to the Company’s management, including the Chief Executive and Chief Financial Officers, as appropriate, to allow timely decisions regarding required disclosure. There have been no changes in the Company’s internal control over financial reporting or in other factors that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting during the period covered by this report.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

For information on the Company's legal proceedings, see Note 8 to the Company's consolidated financial statements included in Item 1 to this report and incorporated herein by reference.

Item 1A. Risk Factors.

There have been no material changes to the Company's risk factors as disclosed in Item 1A, "Risk Factors," in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Note 7 to the Company's consolidated financial statements included in Item 1 to this report is hereby incorporated herein by reference.

Item 6. Exhibits.

The information required by this Item 6 is set forth in the Index to Exhibits accompanying this Form 10-Q and incorporated herein by reference.

INDEX TO EXHIBITS

Exhibit Number	Description
3.1	Certificate of Incorporation of Encore Wire Corporation and all amendments thereto (filed as Exhibit 3.1 to the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2009, and incorporated herein by reference).
3.2	Third Amended and Restated Bylaws of Encore Wire Corporation, as amended through February 27, 2012 (filed as Exhibit 3.2 to the Company's Annual Report on Form 10-K for the year ended December 31, 2011, and incorporated herein by reference).
4.1	Form of certificate for Common Stock (filed as Exhibit 1 to the Company's registration statement on Form 8-A, filed with the SEC on June 4, 1992, and incorporated herein by reference).
10.1	Third Amendment dated as of September 29, 2016 to Credit Agreement dated as of September 27, 2012 by and among Encore Wire Corporation, as borrower, Bank of America, N.A., as administrative agent and letter of credit issuer, Wells Fargo Bank, National Association, as syndication agent, the financial institutions a party thereto as lenders and EWC Aviation Corporation, as guarantor (filed as Exhibit 10.1 to the Company's Current Report on Form 8-K filed with the SEC on October 5, 2016, and incorporated herein by reference).
10.2	Encore Wire Corporation 2010 Stock Option Plan, as amended and restated effective February 20, 2017 (filed as Appendix A to the Company's Notice and Proxy Statement filed March 27, 2017, and incorporated herein by reference).
10.3	Form of Encore Wire Corporation 2010 Stock Option Plan Stock Award Agreement.
31.1	Certification by Daniel L. Jones, Chairman, President and Chief Executive Officer of the Company, dated August 2, 2017 and submitted pursuant to Rule 13a-14(a)/15d-14(a) and pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification by Frank J. Bilban, Vice President – Finance, Treasurer, Secretary and Chief Financial Officer of the Company, dated August 2, 2017 and submitted pursuant to Rule 13a-14(a)/15d-14(a) and pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification by Daniel L. Jones, Chairman, President and Chief Executive Officer of the Company, dated August 2, 2017 as required by 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification by Frank J. Bilban, Vice President – Finance, Treasurer, Secretary and Chief Financial Officer of the Company, dated August 2, 2017 as required by 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
